PRESIDENT HARRISON'S ENDORSEMENT.

EXECUTIVE MANSION, October 31, 1890.

BISHOP JOHN F. HURST, Washington, D. C. :

MY DEAR BISHOP:—I regret that I am to be absent from the city on Monday, and shall, therefore, be unable to fulfill my purpose to attend the meeting to be held that evening to promote the movement, so wisely and so auspiciously inaugurated by the Methodist Episcopal Church of the United States, to found at the National Capital a great university.

This movement should receive, and I hope will receive, the effective support and sympathy, not only of all the members of your great Church, but of all patriotic people. Such an institution, to serve its proper purpose, to save it from the jealousies and competitions of other educational enterprises in the States, should be so organized as to supplement and perfect their work. It must be a National University, with strong emphasis on both words.

With the assurance of a deep interest in your enterprise, and the most cordial wishes for its perfect and early success,

I am very sincerely yours,

BENJAMIN HARRISON.

SAMPLE COPY.—We send you this number as a *sample copy* of THE UNIVERSITY COURIER. For the first year we will send it at *half rates*. Only *fifty cents* for single subscription. In clubs of ten, *twenty-five cents*. Send in your orders at once. Address

UNIVERSITY COURIER, WASHINGTON, D. C.

THE WOMAN'S COLLEGE

OF BALTIMORE.

JOHN F. GOUCHER, President.

A Representative Protestant College of
HIGHEST GRADE.

FOURTEEN COURSES

Leading to the degree of

BACHELOR OF ARTS.

Every Department in charge of Specialists.

Equipment Unsurpassed.

Work thorough. Expenses moderate.

"Its high curriculum, its many specialists, and its large resources enable it to offer facilities for the highest education of women equal to the best in the range of our knowledge."—*The Episcopal address to the General Conference of 1892.*

PROGRAM and APPLICATION BLANKS

Will be sent upon request.

THE GIRLS' LATIN SCHOOL

OF BALTIMORE.

A Representative Protestant School for
THOROUGH COLLEGE PREPARATORY WORK.

AN EXCELLENT FACULTY

AND CHRISTIAN HOME.

UNEXCELLED SCHOOLROOMS,

GYMNASium, CHAPEL,

AND OFFICES.

Program sent upon application.

For Girls and Young Ladies.

A MODERN HIGH GRADE

BOARDING AND DAY SCHOOL.

MOUNT VERNON SEMINARY,

1100-1101 M ST. and 1121-1128 11th ST.

EIGHTEENTH YEAR OPENS OCT. 4, 1892.

Thoroughly equipped in all departments. Special advantages in Literature, French and German and Music.

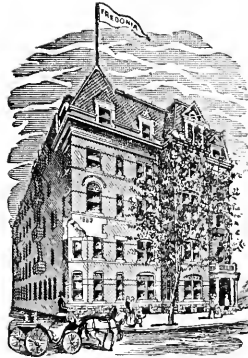

A Home in which students have rare advantages for special training and experience.

Hygiene, sanitation and physical comforts of the most approved modern kind.

Address

Mrs. ELIZABETH J. SOMERS,

Principal.

HOTEL FREDONIA,

Editorial.

THE UNIVERSITY COURIER is in the interest of Christian education. It is in no sense a competitive paper, neither has it been projected because the editors of our church papers have not done all in their power to push forward the interests of the American University, but because the space required to discuss the issues involved is much greater than any paper having a general circulation could give to the presentation of any special subject. The central thought of the COURIER will be the scope and present condition of university education in this and foreign countries. We believe the necessity of an advanced movement by the Protestant Church in America will become manifest when the facts are known.

REV. ALFRED WHEELER, D. D., recently deceased, wrote to Bishop Simpson in 1856 outlining and urging the establishment of a great university at Washington, D. C., under the leadership of the Methodist Episcopal Church. He was a man of large plans and great force of character.

We think it is not generally known that as early as 1775 it was the fixed purpose of Gen. George Washington that there should be in connection with the National Capital a great National University. We ask special attention to the article, "The National University," in another column.

THE Methodist Episcopal Church is the largest Protestant Church in the world; it has the greatest responsibilities to meet; it should have the best leaders; it must afford the broadest educational advantages, or, in a measure, fail in discharging its responsibilities and doing its part in taking the world for Christ.

IN 1791 there were reported in this country fifteen colleges and twenty academies. Five years later there was added one college and five academies. Within the

next five years one more college and five more academies were opened. In 1804 we find reported eighteen colleges and thirty-eight academies in the whole country. From this small beginning has come the great educational system of the United States.

THE Methodist Episcopal Church has now under her general supervision seventeen theological schools. Seven of these are in the United States. Starting from the one in California and coming eastward you travel about 2,000 miles before you reach the next "school of the prophets" at Evanston, Ill. Through the magnificent gift of Mrs. Bishop Warren this great span will soon be broken by the Iliff School of Theology at Denver, Col. It is to be opened this September.

According to the annual Report of the Board of Education for 1892 we had in the colleges of the Methodist Episcopal Church last year 5,916 collegiate students. Where are these students to receive special training for their particular life work? Many will find it in the German universities under rationalistic influences. We should afford equal opportunities in America, surrounded by Protestant Christian environments.

A Concert Exercise is being prepared by Rev. John O. Foster, A. M., of Chicago. He has made many of the most popular concert exercises used by the Missionary and other societies.

It will be divided into three parts. One in the interest of the Columbian Thank Offering, ordered by the General Conference for October 16th, another part will be adapted for those desiring to raise money for the Lincoln Hall, and a third part will be arranged for the Epworth League.

Many of the hymns have been written especially in the interest of the cause to be presented. Much of the music is new, and all of a very high quality. It is hoped that the demand for this concert exercise will be very general. We trust that the request of the General Conference, that the 16th day of October be set apart to the interest of "The American University" will be generally regarded.

The concert exercises will not be ready for distribu-

tion before the first of September, but as soon as published will be sent free on application to any pastor or Epworth League desiring to use it in presenting the cause and taking a collection for The American University.

The American University is under the auspices of the Methodist Episcopal Church. The Chancellor and at least two-thirds of the Board of Trustees must be members of our church. The entire Board must be approved by the General Conference. A magnificent site has been purchased. It consists of 92 acres at the northwestern end of Massachusetts avenue extended, and has cost \$100,000. This sum has been contributed by the citizens of Washington. Competent judges estimate its present value largely in excess of the original cost.

These initial steps for the founding of The American University were taken after consultation with wise and trusted leaders of our denomination, and, as we believe, with the guidance of the great head of the church.

PATRIOTIC UNDERTAKING.

Mrs. Gen. JOHN A. LOGAN has undertaken to raise a million of dollars from the women of this country for the American University at Washington, D. C.

Her plan is to organize the women into state, congressional district, and local leagues; these leagues to co-operate with her in raising the money to aid in this great national enterprise.

Here is an opportunity for the women of America by concert of action to establish a university that means more for women than any single movement ever started in this country.

Suppose that this million of dollars should be set apart as Fellowships, of \$10,000 each, to be held for women only, we can readily see that this would support 100 women each year, while they pursued departmental studies. One hundred women would here have an opportunity for post-graduate work and original investigation, which would mean more to them and to humanity than any one can estimate.

We trust that the women throughout the land will give Mrs. Logan the cordial support which she richly deserves in undertaking the leadership of so great a movement. We may venture to hope that her plans will commend themselves to the Collegiate Alumnae Association, which is soon to meet in Washington, D. C.

IN THE RIGHT DIRECTION.

Clark University, located at Worcester, Mass., is the result of the beneficence of Mr. and Mrs. Jonas G. Clark. It has organized five departments, as follows:

Mathematics.

Physics.

Psychology, including Neurology, Anthropology,

Criminology and History of Philosophy.

Chemistry.

Biology, including Anatomy and Physiology.

The members of the university during the year just closed represent graduates of 48 colleges and scientific schools.

The general policy of the university is to strengthen the departments already established rather than to organize new ones. We shall give a full account of this movement at Worcester, in the near future.

No one in touch with the educational thought of to-day but knows that the trend is toward university education in America. We mean more by this than simply applying the university methods to collegiate training. It is a serious question whether the most successful university work can be done in connection with the undergraduate course. It is quite certain that it cannot be done by the corps of teachers, who are burdened with the care of under-graduate students. They must be free to pursue lines of research, which they cannot do as teachers of college classes. We invite discussion upon this subject.

The following is the condition of admission to Clark University:

Only graduate students are admitted or those of equivalent attainments, unless in rare and special cases. At present no entrance examinations are required, but, by testimonials, diplomas, personal interviews of written specimens of work, the authorities must be satisfied that the applicant has scholarship enough to work to advantage, and zeal and ability enough to devote himself to his chosen field. The methods of the university are too costly, and its energy and funds too precious to be spent upon men who are not promising and in earnest.

FELLOWSHIPS.

The plan of providing Fellowships for worthy students has not become very common in America. With the high rate of interest which money brings in this country, \$10,000 will afford a yearly income of from \$500 to \$600. With this the student can pay his board, tuition, and supply himself with books. The benefit of a Fellowship can be given to one student for three years, while he pursues his work along some line of original investigation; then to another, and so on. Thus by the donation of \$10,000 any one can be the direct instrumentality of sending out into society from thirty to forty scholars each century to the end of time.

No church owes more to the idea of Fellowships than the Methodist. It was while Wesley was enjoying the advantages which such opportunities afford as a Fellow in Lincoln College that he formed a club which resulted in the formation of Methodist societies, and finally in the organization of a church.

In our pioneer work in this country we have not had time to look farther than the college course, and many not even so far as that. We have now passed to the

period of accumulation, and wealth has crowned our efforts. We are the richest nation in the world. We are fully persuaded that the time has come when we should take a step forward and provide at least 100 Fellowships for worthy young men and women.

Yes, young women! We have much more faith in securing for woman the place God designed for her by giving her opportunity for the highest and broadest culture than in short-cut methods, which may give legislative responsibility, but add not a farthing to the wealth of her resources.

Let the almost intuitive insight of woman be turned into lines of original investigation; let her inquire of the Father about the "Secrets of the Lord," which He has promised to unfold "to them that fear Him," and consecrated womanhood will give to our Christian civilization a new power and a greater glory.

A REGIMENT OF WOMEN.

Are there not ten women who will pledge \$1,000 a year for ten years? Are there not twenty more who will pledge \$500 a year for ten years? Are there not forty who will pledge \$250 a year for the same time? Are there not one hundred who may not be able to do as much as these, but could give \$100 a year for ten years? Once more, are there not 1,000 who will pledge \$10 a year for ten years to afford American women an opportunity never enjoyed by their sex for securing the broadest and deepest culture?

Here are 1,170 women—a regiment—who, by concert of action, can provide each year for the higher education of fifty women of the brightest intellects that grace American society.

Christian women, think of it! Before the close of the twentieth century you will have afforded a year of supreme advantage to each of 5,000 women, whose consecrated lives will be spent in bringing the world to Christ. What nobler ambition could quicken the step of such a regiment of women?

ACTION OF THE GENERAL CONFERENCE.

OMAHA, NEB., May 25, 1892.

WHEREAS, The cause of The American University, located at Washington, D. C., has been presented by its Trustees for the consideration of the General Conference; and

WHEREAS, The National Capital presents unequalled facilities as a distributing center for great intellectual and moral forces, and incomparable advantages because of the vast treasures for scientific and literary investigation accumulated by the General Government, and

WHEREAS, It is the imperative duty of the Protestant Church to provide in the city of Washington a university, Christian, catholic, tolerant and American, having for its sole aim post-graduate and profes-

sional study and original research; and

WHEREAS, The American University, under its charter, has been placed under the authority and control of the Methodist Episcopal Church; therefore

Resolved. First, that the General Conference approve the establishment of the American University, and accept the patronage of the same according to the terms of its charter; *provided,* nevertheless, that the endowment of the institution shall be not less than five millions of dollars, over and above its present real estate, before any department of the University shall be opened.

Resolved. Second, that, in our judgment, at least ten millions of dollars should be secured for the endowment of the University, and THAT ALL OUR PASTORS BE REQUESTED TO TAKE SUBSCRIPTIONS OR COLLECTIONS FOR THIS OBJECT *at the Sabbath service succeeding the 12th day of October, 1892,* the quarter-centennial of the discovery of America, and that the offerings of all our people be for this one object as our Columbian Memorial.

Resolved. Third, that we commend the generosity of the citizens of Washington for the site of ninety-two acres which they have provided by the gift of one hundred thousand dollars.

"BEING DEAD YET SPEAKETH."

Those who knew Dr. Chas. W. Bennett best knew most thoroughly his greatness of soul, his soundness of thought and his effectiveness as an educator. He wrote the following letter to Bishop Hurst just before he died:

MY DEAR BISHOP HURST:

You are a man after my own heart. God be thanked that we have in the Board of Bishops one broad enough and bold enough to strike the one needed blow—one clear-eyed enough to discover the key to future success or failure.

I am only keenly sorry that you did not go to Washington ten years ago, when you were elected, and thus be the pioneer and leader rather than now the follower of the Catholics.

Yes, the lesson is to me plain as sunlight that we must plant ourselves at this center (and other Protestants must help) or this country will surely be Romanized through subtle and powerful influences on national legislation, and Romanism be popularized and made fashionable by the concentration of the brightest, most polished, and able *personnel* of the Catholic hierarchy. Their utterances before the Centennial are before the country, and I am studying them as the most potent chapter of modern church history.

I believe the Methodist Episcopal Church and united Methodism will stand by you. I think a million of money can be raised in a single year if we could place it properly before the church, and it is in my judgment the mightiest Home Missionary movement yet made, and I believe that it would prove to be one of the grandest unifying powers of the century—bringing into closest fellowship not Methodism alone, but American Protestantism as well.

This is the time when the scattered warring forces of Protestantism must hear the command "close rank,"

'shoulder-to-shoulder," "aim," "fire," or we are the easy victims of a strong, confident, self-asserting, united foe. Give us your hand in an earnest grasp. Raise with me your hand in solemn pledge to no yielding in this high purpose which you have conceived. No man could covet a grander immortality.

Ever yours for Christ,

CHAS. W. BENNETT.

OUR APPEAL.

We make our appeal for \$10,000,000.

We appeal to the Methodist Episcopal Church, with its two and a quarter million of communicants, with its fifteen thousand ministers, and with its Epworth Leagues of three hundred and fifty thousand members, soon to become five hundred thousand. In one month, if the sympathy and will are equal to the providential occasion and necessity, this entire sum can be given. By such an act the Methodist Episcopal Church can add another rich benefaction to the American people for all time to come. We must do our part to enforce and perpetuate the example of our immortal founders.

To all the Methodist Bodies in America, numbering four million eight hundred and eighty-seven thousand members, we appeal for help in aiding to establish The American University, which, we hope, shall prove a cementing bond for our Methodist churches in every part of the country, and shall project into the future the piety of our common Epworth and the learning of our common Oxford.

To all friends of Christian education, under whatever denominational banner, and to all lovers of Protestant America, we appeal for co-operation in the great work of establishing a central institution, which shall conserve and promote all the interests of our country and our common Christianity.

To the rich, we appeal to give largely of the wealth of which the Lord has made them stewards. How can they better perpetuate their beneficence and name than by some princely gift to build a hall or endow a chair of learning in such an institution at the National Capital?

To those of limited means, we appeal to give according to their ability, though their gifts be farthings. They, or their children, may be the recipients of thousand-fold benefits.

We, therefore, shall accept with gladness and thankfulness the assistance of all who from patriotic, philanthropic or religious considerations aid our undertaking.

AMERICAN FORTUNES.

Nowhere in the world are individual fortunes so great as in America. There are nine Americans whose possessions are reckoned at from \$50,000,000 to \$150,000,000. There are probably 1,000 Americans who are worth \$1,000,000 or more.

The largest personal fortune in any foreign country

belongs to the Duke of Westminster, a British peer. It consists of entailed estates, and he therefore has only a life interest in it. It is estimated at \$60,000,000. The accumulated wealth of the Rothschilds is enormous, but no one member of this family of money-getters is considered worth over \$40,000,000. The Rothschild family wealth, however, is undoubtedly the greatest in the universe. The fortune of Baron de Hirsch, the philanthropist, does not exceed \$25,000,000.

Money is more easily made in America than elsewhere, because the opportunities are more numerous and more favorable. Fortunes of \$1,000,000 attract no more attention nowadays than those of \$100,000 did two decades ago. Fortunes are likely to increase as fast, if not faster, in the future than they have in the past.

NINE MEN.

Every one of the nine men whose fortunes amount to \$50,000,000 or more was born in America, was reared here, and either made or inherited his money here. There is not one of the fortunes but was accumulated here, so that both the men and the money are entirely American. Following is a list of the fortunes compiled from the most authoritative sources:

William Waldorf Astor.....	\$150,000,000
Jay Gould	100,000,000
John D. Rockefeller.....	90,000,000
Cornelius Vanderbilt.....	90,000,000
William K. Vanderbilt.....	80,000,000
Henry M. Flagler.....	60,000,000
John I. Blair.....	50,000,000
Russell Sage.....	50,000,000
Collis P. Huntington.....	50,000,000
	<hr/>
	720,000,000

A better idea of the wealth of the nine richest Americans is afforded by comparative illustrations than in any other way.

One million dollars in the standard silver dollars of the United States weigh 30 tons.

The total aggregation of silver—21,600 tons—which these nine men represent, would make eighteen trains of forty cars each, reckoning a car load at 30 tons. Allowing 2 tons for a load, it would take 10,800 wagons to convey it to the train. It would require 8,640,000 men, each bearing 50 pounds, to carry it.

There is a probability that William W. Astor will be a billionaire long before he reaches his allotted age.

Mr. Astor has just turned forty. He is a large, fine looking man, wears glasses and has the air of a student. He is an omnivorous reader. He has written several novels. In politics he is a Republican.

NINETEEN AMERICANS.

There are more millionaires in America than in any other country, and probably more than in all Europe.

THE LINCOLN HALL MEDAL.

OBVERSE.

REVERSE.

Here are some of the principal fortunes in addition to those already mentioned:

William Astor.....	\$40,000,000
Leland Stanford	30,000,000
Mrs. Hetty Green.....	30,000,000
Philip D. Armour.....	30,000,000
Edward F. Searles	25,000,000
J. P. Morgan	25,000,000
Charles Crocker estate.....	25,000,000
Henry Hilton	25,000,000
Darius O. Mills	25,000,000
Andrew Carnegie	25,000,000
E. S. Higgins' estate.....	20,000,000
George M. Pullman	20,000,000
Anthony J. Drexel.....	15,000,000
John W. Mackay	10,000,000
Robert Goelet.....	10,000,000
Ogden Goelet.....	10,000,000
Percy R. Pyne.....	10,000,000
Mrs. Moses Taylor.....	10,000,000
George Westinghouse, jr.....	10,000,000

Adding to these the amount belonging to the nine above referred to, we find that in the hands of twenty-eight persons in the United States there is lodged the enormous sum of \$1,115,000,000. Six per cent interest on this amount would build an American University costing \$10,000,000 every two months. What more noble and patriotic object could come before these twenty-eight than to establish and endow the greatest protestant university in the world?

LINCOLN HALL.

We make our appeal to the American citizen, independent of church relationship, race or color, for 500,000 persons to give us one dollar each to build The Administration Hall of the American University as a monument in honor of, and to bear the name of, Abraham Lincoln. Thirty years have passed since the struggle between two great civilizations occurred in this country. We think none can be found who do

not ascribe to Mr. Lincoln pureness of purpose, wisdom in action, tenderness of heart, consideration of the oppressed, unsullied patriotism, devotion to truth, indeed almost every element of character that goes to make a great man for a great emergency. No monument worthy of such a man, or worthy of the nation which through his patient forbearance and unflinching integrity was saved as one country, has ever been built. It is appropriate that such a monument should be built in the city of Washington, where such an eventful life was cut off by such a tragic death.

We have confined this to one dollar that both rich and poor might meet together and stand on a common level in the presence of the honored dead. He was a representative of the poor but honorable white people of the South. He was always the poor man's friend, and we are sure that if he could be consulted in this tribute of respect, he would endorse the plan which we here suggest.

Each person giving one dollar to this cause will have his name enrolled in the University Register, prepared for this purpose, and which will be kept in the public library of the institution. We hope to make this record of names and postoffice addresses of great value in the future study along genealogical lines. For this reason we invite the record of families, and a statement of relationship existing between parties giving, so far as it may be known.

In addition to this, we have provided a most beautiful medal, made out of aluminum, containing a medallion of Mr. Lincoln on the obverse side, and on the reverse side a brief statement of the principal facts of the movement thus far. There will be just 500,000 of these souvenirs to dispose of. Send us your name, postoffice address, age (if you desire), and any record that you would like to have made, consisting of not more than half a dozen words. The record will be made and the medal forwarded. Who will be the first? Who will be the last?

THE G. A. R. AND OTHER PATRIOTIC ORDERS.

The building of a Memorial Hall to the memory of Abraham Lincoln as a part of the American University will commend itself to all the patriotic organizations of the Nation. At the head of these stands the Grand Army of the Republic, that body of men who bore arms to preserve the Union and who looked to "Father Abraham" for sympathy and encouragement in the darkest days, and never looked in vain. We believe this and other patriotic orders will delight to contribute to this great undertaking for so noble a purpose, and to perpetuate a spirit of loyalty under the banner of his own words: "With malice toward none, with charity for all, let us press forward in the right, as God gives us to see the right."

Mrs. John A. Logan is earnestly at work for the great University. Dr. P. L. McKinnie of Chicago, the well known Grand Army writer and late A. A. G. of Department, Ill., is working under direction of the University to promote this cause. It is the cause of American education, of loyalty, and patriotism.

The Grand Army of the Republic will hold its twenty-sixth National Encampment in this city in September. Here will gather Veterans by the thousands, here will be revived the memories of the Great Contest, and the Grand Review at the close of the war. Here again will the old stories be told, old friendships renewed and the fires of patriotic ardor kindled anew in the breasts of the "Boys in Blue." Welcome! thrice welcome! preservers of our Union, to the Capital city!

THE AMERICAN UNIVERSITY.**ITS DESIGNS.**

The design of the American University is to afford special opportunities and inducements for original investigation to students who have completed some course of study at our colleges and desire to devote themselves to some department of research. The language of the charter, in defining the scope, is, "An institution for the promotion of education and investigation in science, literature and art." Its methods are necessarily different from the college. It is, therefore, in no sense competitive, but seeks to meet a want created by our colleges.

It is to do for the American student all that the universities of the older countries offer, with such additional departments demanded by our modern and higher Christian civilization.

The work will be departmental and specific. In its relation to our colleges it will advance instead of retard their interests, by emphasizing the necessity of collegiate training, and offering special inducements for the best scholarship; thus it will be an inspiration

to the under-graduate classes in all the collegiate and professional schools.

WHY IN WASHINGTON?

Its location at Washington, D. C., is unquestioned by all who are familiar with the opportunities afforded by the Government. Why in Washington?

Because of the unequalled facilities of the National Capital as a distributing center for great intellectual and moral forces, and because of the incomparable advantages for scientific and literary investigation presented by the general Government. American University life is destined to center here. The Congressional, Departmental, and Technical Libraries, the Smithsonian Institution, the National Museum, the Army and Naval Medical Museum, the great Naval Observatory, the Departments of Agriculture and Labor, the Patent Office, the Geological Survey, the Bureau of Ethnology, the Botanical Garden, the Museum of Hygiene, the Department of Education and the many subdivisions of scientific investigation, under the direct patronage of the Government, are gratuitously furnished and constantly multiplying. Money given for education here must go farther than anywhere else in the country, because of these priceless accessories. A student in The American University will find outside its walls another university, and constantly within reach.

MAGNITUDE OF THE UNDERTAKING.

The institution the church proposes at Washington, D. C., is of no ordinary magnitude. It is designed to represent the highest form of Christian education, to be an exponent of the best forces of Christian thought and activity, and to express, at this center of our civil and political influence, the firm faith of our people, and their devotion to Christ and His kingdom. We cannot afford to make it inferior to the strongest in the world. That which we offer Him should be the best.

The time has fully come when the Protestant Church in America should be able to rightfully boast of affording the best opportunities in the world for *original investigation*. The scientific men of the twentieth century should be consecrated earnest Christians.

STUDENTS.

The American University proposes to receive as students young men and women who shall have completed their collegiate studies, and received their first degree in arts and sciences. Its plan is to furnish the amplest facilities for the broadest culture in post-graduate studies and in original research. We shall endeavor so to plan as to satisfy the supreme need of the multitudes who, having graduated at our colleges, instead of being lost in some skeptical wilderness, shall here find, in a pure atmosphere of Christian learning, superior means for securing the best special preparation for their intended career. The only con-

ditions of admission will be character and literary qualification.

BEQUESTS.

Bequests should be made to "The American University," situated in the District of Columbia. We advise, however, that all who have the ability should make their gifts promptly, in their lifetime, that they may have the satisfaction of seeing the fruit of their beneficence. The risk is too great and the issues too serious, in these days, to entrust too confidently one's noble benevolent plans to the doubtful mercies of discontented heirs and industrious attorneys.

ENDORSEMENTS.

The Methodist Episcopal Church is thoroughly committed to the undertaking through the approving action of the bishops, numerous annual conferences, the representatives of our benevolent societies and publishing houses, the editors of our periodicals, the Board of Control of the Epworth League, members of the faculties of many of our largest institutions of learning, a large number of pastors, and assurances of support from representative men and women in all parts of our country, but above all by the enthusiastic endorsement of the General Conference at Omaha, Neb. Members of other Christian bodies have given practical expression to their gratification at the inauguration of the work. But we stand before the Protestant churches and the whole world as the sponsors in this undertaking, and are pledged to its successful prosecution. We do not shun the responsibility, for we believe it a Divine purpose. The history of our church proves that in our best hours of exaltation we do not fear, but welcome, a providential burden. A great opportunity now throws its door wide open. We must enter. Opportunity, in such a case, means duty. Duty means possibility of success—victory.

ASBURY HALL.

It is a growing sentiment that Bishop Asbury had more to do in shaping Methodism in this country than has been ascribed to him. The following extract from an article written by Bishop Merrill for *The Daily Christian Advocate* states the case very forcibly:

"When Mr. Asbury declined the appointment (of bishop) on Mr. Wesley's terms, and insisted on calling a conference, he did a grander thing than any one could have imagined at that time. By that act he introduced the elective principle in the conferment of ordinations, made the conference the governing power in the church and established the connectional bond which has distinguished the Methodism in all important branches till the present day. Few lives in any age have equalled his in courage, in faith, in heroic service, in unflinching loyalty, or in the patient endurance of hardships; and certainly no successor has excelled him in such efficiency, as is evidenced in the awakening and conversion of sinners, if any one has approached him in the power to influence men, or to organize crude materials into consistent and effective working forces.

With less culture than Mr. Wesley possessed, and less flexibility of talent, the record of Francis Asbury, in persistent labor, under difficulties, in wisdom of administration, in faithful supervision of every interest of the church, and in steadfast faith in God and unselfish consecration, will not suffer in comparison with that of the unsurpassed founder of Methodism, or any other man whose life has adorned the annals of Christian work since the days of the Apostles."

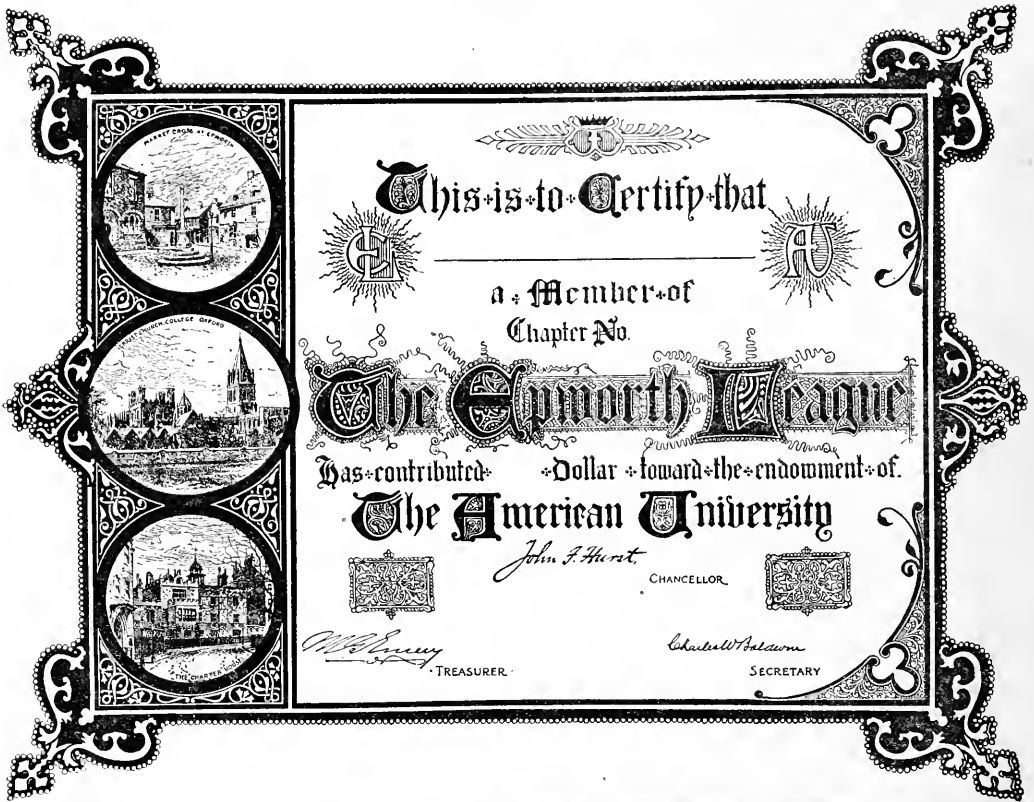

Very many of our educational institutions bear the name of Wesley. The only one which bore that of Asbury has changed to another for reasons satisfactory to itself. The proposition has been made to build an Asbury Hall, to cost not less than \$100,000, in honor of the founder of American Methodism. We limit this appeal to ministers of the Methodist Episcopal Church. We ask for one thousand preachers to give \$100 each. Already the following have sent us their names: Who will be the next?

- Rev. R. W. Copeland, Rush, N. Y.
- Rev. Abel Stevens, D. D., San Francisco, Cal.
- Rev. Daniel Wise, D. D., Englewood, N. J.
- Rev. H. C. Weakley, D. D., Cincinnati, O.
- Bishop Thomas Bowman, St. Louis, Mo.
- Rev. Lucien Clark, D. D., Baltimore, Md.
- Rev. A. B. Leonard, D. D., New York City.
- Rev. C. H. Payne, D. D., New York City.
- Rev. J. W. Hamilton, D. D., Boston, Mass.
- Rev. Wesley Webster, South Charleston, O.
- Rev. W. H. Haverfield, Jerusalem, O.
- Rev. J. Wesley Hill, Ogden, Utah.
- Rev. D. Lee Aultman, Cincinnati, O.
- Rev. Chas. W. Baldwin, A. M., Washington, D. C.
- Rev. T. H. Hagerty, D. D., St. Louis, Mo.

THE EPWORTH LEAGUE CERTIFICATE.

The certificate of the American University which is given to every member of the Epworth League who contributes a dollar or more toward the endowment of the University is almost startling in its beauty. It was designed by one of the most distinguished "decorative" artists of America, and its graceful design, its rich colors, and its singular symbolism well sustain his reputation. It measures about thirteen by sixteen inches. A rich border of red and gold incloses the quaint old-English lettering. This border bears such a relation to a red and gold line in the center of the certificate that it gradually resolves itself into the capital letter E, the initial of the title of the League.

The upright line of this capital E is a broad column of red, white, and gold, marked by exquisite Gothic tracery, and bearing in three panels, one above the other, dainty etchings of the "Market Cross at Epworth," "Christ Church College at Oxford," and the "Charter House School." These views have been prepared from photographs and sketches made especially for this certificate, and are highly

picturesque. The etching of Christ Church is unusually beautiful. "The Market Cross" at Epworth will bring to every pilgrim who has visited the primal home of Methodism a vivid recollection of that quaint village; and of all the views we have ever seen of the historic old Charter House, where so many of England's famous sons were trained in boyhood, that here given is the finest.

The initial letter of each word is in red and gold, the rest being printed in black. "E. L.," the initials of the League, and "A. U.," the initials of the University, have been twined into graceful monograms, and stand at the extremities of the line on which the name of the member of the League who contributes is to be written.

Another ornament which is conspicuous in gold and white is a decorated capital W (standing for Wesley), which stands surmounted by a golden crown. The certificate is signed by Bishop John F. Hurst, Chancellor of the University, Charles W. Baldwin, Secretary, and M. G. Emery, Treasurer, with the University seal attached. There is a symmetry and character in the general design which we have never

seen surpassed. It almost brings to us the aroma of a quaint old parchment. The ornaments have been copied in detail from illuminated manuscripts of the Middle Ages, and we can assure our friends of the Epworth League that a more beautiful memento will not soon again come within their reach.

R. R. DOHERTY.

THE EPWORTH LEAGUE HALL.

The following is the action taken by the Board of Control of the Epworth League at its meeting in St. Louis in May, 1891:

"Whereas this Board of Control learn with genuine satisfaction of the measures taken for the founding of a great National University in the city of Washington, D. C., under the patronage of the Methodist Episcopal Church; and

have endorsed the proposed University in unqualified language; Therefore,

"Resolved, That we, the Board of Control, representing the young people of Methodism, and recognizing the close relation between the Epworth League and the American University, whose object is the higher education of the youth of our land, gladly unite in the endorsement of the bishops, and commend this national educational enterprise to the Epworth Leagues of the church."

In addition to money for the endowment of professorships, lectureships, fellowships and studentships, funds will be required for halls of science, philosophy, languages and literature, history, law and medicine, besides dormitories, etc. For this great purpose we estimate that \$10,000,000 must be dedicated to God and humanity. We now appeal to our brothers and sisters of the Epworth League, soon to number 500,000, that they may have a share in this magnificent enterprise by establishing the "Epworth Fund" for building the Epworth Hall and endowing the Epworth Professorship. What better act could the League do, while yet in the first glow and fervor of its existence, than to consecrate its efforts on this great and universal object?

We appeal to you, and through you to every member of your chapter, to aid your brethren of every other chapter in securing \$500,000 toward the Epworth Fund of The American University. To every one giving \$1 we will give a beautiful and suggestive certificate, which you will find illustrated in another column.

In addition to sending this certificate, we will also enroll your name in the University Register prepared for that purpose, so that your name and address will become a matter of record in the University library. To aid you in raising this amount, we are having prepared a concert exercise for young people, which we will furnish *free on application*. It has been prepared with great care to meet the varied wants of different sections of the country.

THE AMERICAN UNIVERSITY REGISTER.

A large register is being prepared, in which the name and address of every donor giving one dollar or more to the various funds of The American University will be recorded. These names will be enrolled alphabetically. It will be stated for which fund the money was given, and any condition in connection with the donation. It will be kept in the library of the University as a public record. Great care will be taken to make the Register valuable in the study of genealogy. This is certainly to become in the near future a question of importance in this country.

We invite all who make a donation to the University, large or small, to send us any item of importance which can be expressed in a few words.

Donations may be made to the following specific purposes: Epworth League Fund, Lincoln Hall Fund, Fellowship Fund, Asbury Hall Fund.

Dr. Learned, of Johns Hopkins University, proposes to be one of five thousand to give \$100 each to establish a SCHOOL OF DISCOVERY as a part of the American University. Nothing has come to us so in harmony with the original idea of the University as this. No one word says so much of its scope and purpose as discovery. It is to be a School, not a Hall, for the field is the undiscovered along all lines.

The proposition is made more particularly to the professional class. The educators and physicians are more directly pressing their investigation along original research. Who will second Dr. Learned's proposition? There should be one hundred within thirty days. You can pay it in installments. Write us soon.

Any donation coming to the University not specified will be charged to the General Fund.

We wish to enroll the names of five hundred thousand young people, donors to the Epworth League Fund.

We expect to enroll the names of five hundred thousand patriotic people, who give us one dollar each for the Lincoln Hall Fund.

Every educational institution in the land should have at least one Fellowship in The American University, to offer as a prize to each graduating class for the best scholarship. Let all who are interested in their local institutions give their name for one dollar or more, in the collection to be taken October 16th, 1892, for the Fellowship Fund.

There are certainly one thousand Methodist preachers who can and will give one hundred dollars each to build an Asbury Hall, where there shall be kept in a fire proof building the antiquities of Methodism. We are making history. Let us commence at once to preserve everything that may become valuable touching the development of American Methodism.

Contributions.

LEYDEN UNIVERSITY.

ITS ORIGIN.

Leyden University is the monument both of the heroism of its stalwart citizens through the terrible double siege by the Spanish army and of their gratitude for deliverance. Seven years of relentless war had Philip waged against the Dutch nation in order to compel them to return to the bosom of the mother church.

THE FAMOUS SIEGE.

The first siege of the city by the Spanish forces lasted from October 31, 1573, to March 21, 1574, when the Spaniards were diverted by the approach of Count Louis of Nassau, who hoped to join his army with that of William, Prince of Orange. Louis having been defeated and killed at the battle of Mookerheyde, the siege was renewed May 26 by Valdez. By the last of June food had become very scarce and was meted out most economically. By the middle of July William decided to open the dykes and flood the country around Leyden. The sentiment of the people was: "Better a drowned land than a lost land." From sixteen openings in the outer massive dykes on August 3 Old Ocean began his march to the help of the beleaguered city.

William, the Silent Prince, was now smitten with fever, and lay in its grasp for several weeks. On August 21 the city sent word to William that malt cake was now their food, and that only enough of that remained for four days, and then—starvation. On September 1 William, now convalescent, resumes active measures for relief. His troops take possession of the Land-scheiding, a heavy wall, five miles from Leyden, on the night of September 10 and 11. Boisot, in command of the Dutch fleet, sails in upon the advancing ocean, and, barrier after barrier having been passed, finally reaches the two forts near the city, both in the hands of the Spanish.

Bread and horse-flesh had now given out in the city, and morsels snatched from the dogs or found in the gutters were eagerly sought. Dogs, cats and rats were luxuries to these starving ones. Motley says: "Leyden was sublime in its despair."

A HERO IN FACT.

The words of the brave Van der Werf, the burgomaster, when reproached by some of the faint-hearted citizens, reflect the lofty and unflinching courage of the sturdy burghers:

"What would ye, my friends? Why do ye murmur that we do not break our vows and surrender the city to the Spaniards? a fate more horrible than the agony which she now endures. I tell you I have made an oath to hold the city, and may God give me strength to keep my oath! I can die but once, whether by your hands, the enemy's, or by the hand of God. My own fate is indifferent to me; not so that of the city intrusted to my care. I know that we shall starve if not soon relieved; but starvation is preferable to the dishonored death which is the only alternative. Your menaces move me not; my life is at your disposal; here is my sword, plunge it into my breast, and divide my flesh among you. Take my body to appease your hunger, but expect no surrender so long as I remain alive."

THE HARD-EARNED VICTORY.

The plague broke out in the midst of all this distress and carried off from six thousand to eight thousand of the people. On October 1 a northwest storm brought the waters

to their help, and Boisot opened battle at midnight. A strange spectacle was the mingling of ships of war in lively action and half-submerged chimney-stacks of the peasants' houses on that memorable night. The first fort was taken, and the panic-stricken Spaniards abandoned the second fort; and Boisot entered Leyden on October 3, 1574. Thus was the city saved.

As a memorial to the heroism of the defenders of Leyden and as a thank-offering for their rescue, it was decided by William and the estates that a university be forthwith established within the walls of the city. The University of Leyden was thus founded at the point of extreme exhaustion of the people from the horrors of a most bitter war.

This is the story in brief of the founding of an institution of the higher learning which for three hundred and eighteen years has had a most useful history, and records among other illustrious names such men as Scaliger, Gomarus, Arminius, Grotius and Descartes. A. O.

NATIONAL UNIVERSITY, WASHINGTON, D. C. ORIGIN.

The thought of a National University at Washington, D. C., is older than the republic. In October, 1775, Maj. William Blodgett went to the headquarters of Gen. Washington to complain of the ruinous state of the college (Harvard) from the conduct of the militia quartered in Cambridge, Mass. Gen. Green, being present, said to the company in consultation: "To make amends for these injuries, after our war he hoped we would erect a National University at Washington." Gen. Washington made reply with that inimitably expressive and truly interesting look for which he was sometimes so remarkable: "Young man, you are a prophet, inspired to speak what I feel evident will one day be realized." Gen. Washington gave the credit of the thought of building a university at the National Capital to Col. Byrd, of Virginia, who is believed to be the first man who suggested the Federal city as the place for a great university for America.

During the subsequent years of Washington's life he always put the idea of a great university at the Capital next to the federation of the States. His thought was that a Federal city and a National University would be two great influences for the purpose of strengthening the bond existing between the various State governments and the National. Through his influence a committee was sent to Europe to study and devise plans for the university. The detailed drawings, as agreed upon, are in the Congressional Library, and are worthy of study. We hope in some future number of THE COURIER to present them to our readers.

During Mr. Washington's presidency, in his communications to Congress, he frequently made reference to his favorite idea. In his will he provided for it beneficently. He died at the age of sixty-seven, Dec. 14, 1799, "leaving in his will stocks equal to \$25,000 for his favorite National University, and inviting subscribing followers, and directing the interest to be invested at compound interest until the fund that such subscription has invited in his will may be sufficient for the entire object."

SUBSCRIPTION.

In the same year a subscription was started. No one was allowed to give more than the price of one stone. Men, women and children were invited to subscribe, with the limitation that no foreigner was permitted to help in building an institution devoted to the interests of the model republic of the world. In this restriction there were some things worthy of consideration. It was evident that the

possible danger of the influence of foreign emigration upon the destiny of the country was the reason for this limitation. On the other hand, it would appear that Gen. Washington had but little conception of the readiness with which foreigners would become Americanized, and constitute not only a large but valuable element in the population of the country. In a future number we hope to discuss what became of this bequest of President Washington and the subsequent subscription.

METHODIST EPISCOPAL CHURCH.

It is certainly remarkable that an enterprise so absorbing to the Father of our Country should wait so long for its fulfillment.

It is fitting that the church, whose loyalty to the country has never been divided, that "sent more prayers to Heaven, more soldiers to the field, and more nurses to the hospital" than any other, should lead in building the thought of the great National University, which, in the mind of Washington, was so inseparably connected with the perpetuity of the nation. If the call for a million soldiers was made today in defense of the welfare of the country, the Methodist Episcopal Church would do its full share. Will not the same spirit of loyalty to the welfare of the republic inspire every true American citizen to do something toward building this bulwark of national prosperity?

ITS SCOPE.

As early as 1800 the plan and scope of the university was clearly marked out. The plan was designed from the Magazine Temple built in honor of Timoleon, in Syracuse, Sicily. It was to have a department for the science of politics, another for the science of war, belles-lettres or elegant literature was to occupy a department, philosophy and mathematics were to take a prominent place, and in addition to all these a department of morals was to crown the enterprise.

G. W. G.

PRESBYTERIAN VIEW.

Remarks by Rev. Dr. BARTLETT, pastor of the New York Avenue Presbyterian Church, at a reception given to the Ecumenical Conference, Washington, D. C.

Mr. CHAIRMAN: I am here to-night, because I believe in education, in Christian education, in the Methodist Church, in Washington City, and in Bishop Hurst. (Applause.)

WASHINGTON, D. C.

The members of this Ecumenical Conference have made a splendid impression upon this city for their level-headedness, for the dignity with which they have discussed the topics that are agitating the world—political, social, and religious. They have brought themselves to disseminate their influence to one of the great centers of distribution of the world—Washington City. Whatever there is or is not in Washington, during the period of our great legislative sessions we have men and women here from every Congressional district of our broad land, and we have representatives of every intelligent nation upon the face of the earth. It is a distributing center. If you have a truth or a lie to promulgate you can send it further from here than you can from almost any part of the earth. It is a political center, necessarily and naturally. It is a great social center, and it is a great educational center. As Bishop Hurst suggested, you could build a roof over the city and it would be a vast university, and our white exclamation point, the Washington Monument, would be its steeple.

Why should not Washington be as well a center for religious power? We must mass piety; we must concentrate the religious forces, as the nations of the world are concen-

trating their great intellectual abilities for the rearing of their great central powers. And here is the place for a Christian university.

THE METHODIST LABEL.

I do not know that I have any objection to a Methodist label upon this University, although I am a Presbyterian through and through. I know one thing—you cannot have a baby unless you have a mother. Universities do not spring up with nobody to care for them. Somebody may say it is a narrow way; but the household is about the narrowest thing we can think of, and that is the house where real love is begotten, which is the nursery of the large love of country that we call patriotism and of mankind which we call philanthropy. These begin within the narrow but warm walls of a home. A child must have a mother before it can have a country or before it can be a child of God. So that the label is a necessity, the way things go to-day. The mother bears the burden; the community share the benefit. I do not believe you can put the flavor of Methodism upon the binomial theorem, nor embarrass the pedal extremities of a Greek pentameter with badges of free grace. The basis of many scents is musk, and the rose and violet odors only accentuate its pungency. So we say the substantial basis of all varieties of learning should be religion. The religious power, the universal force that comes from Christ to the Methodist Church or any other church, will abide after all the labels have been rubbed off, after all differentiating perfumes have evaporated. (Applause.) Hence, I am for the Methodist University.

THE POOR MAN'S DOLLAR.

I believe that the Methodists should build this university, because they are able to do it. They are a mighty denomination. They can gather the necessary money in dribbles. They have rich men, and what is a most blessed thing they have poor men. And the poor man's dollar will build bigger buildings than the rich man's millions and better ones. They ought to build this university, because they have the right; they have earned the right to do it by what they have done for the masses of men. They have the spiritual enthusiasm, and learning needs enthusiasm. We have had enough of soggy-headed professors, sitting up on high stools trying to work out abstruse problems with no heart behind their work, with no enthusiasm streaming through it. We want enthused education, and that influenced by the Holy Ghost—an education that has religion in it.

SELF-CONTROL.

One of the distinguished justices who went out from this city for his summer vacation never to return, the last time I met him on the street, told me this story: "In the town in which I lived in Pennsylvania there were two brothers, George and Charley. George was phlegmatic; he was so afraid he would do the wrong thing that he never did anything. He kept his hands almost always ready, but he never finally launched himself out, while Charles was in everything, the city affairs, the town affairs, the religious affairs, the educational affairs. After awhile George, the phlegmatic man, died. Some one asked another of what George died. 'Well,' said the man, 'between you and me he died of self-control.'" (Laughter.)

Now, the Methodist Church will never die of self-control. If a man must perish he had better perish of enthusiasm. The learning of the world must be itinerant; it must be disseminated and have fire and life in it to meet the emergencies of every man's case on every continent on earth. And I hail with delight the fact that Methodism began in a

university. John Wesley walked out of Oxford with fire in his heart and the best education of England in his brain. He walked among the masses, the lowest of men. He took his best achievements and the flame of the Holy Ghost to the meanest and worst.

FERVOR OF THE HOLY GHOST.

You Methodists have a right to come up after your splendid success to another university and place a beacon-light on this continent that will shine with your intelligent achievements, with your fervor—the university of the old continent interpreted and crowned in the fulfilled prophecy of the university of the new continent. We want an education that is baptized. We want an education that has in it the fervor of the Holy Ghost, lambent and sufficient to illuminate, so that there will be a science of God who made the universe as well as of the atom which He created. I believe Washington is the city. I believe the closing years of the nineteenth century to be the favored era. I believe Bishop Hurst is the man.

You can build a great university in Washington, but you cannot build a little one. When you talk of two million dollars and ten million dollars you are all right. A small thing will fail among sixty millions of throbbing citizens. A great thing they will lift on their shoulders, and the heavier the better.

My friends, this then is the city; this is the opportunity. The safety of this republic and the hope of the world depend upon Christian education. (Applause.)

HIGHER EDUCATION.

PRESIDENT DWIGHT, in a recent article in the *Forum*, discusses with great clearness the true purpose of a higher education. He seeks to answer four questions. We quote below the questions and a sentence or two of the reply to each; sufficient, we hope, to indicate the main thought:

HOW ARE WE TO UNDERSTAND ITS SIGNIFICANCE?

The higher education should have as its end and purpose the culture and development of the thinking mind. Its aim should be serious thought. The proper design of all education is and must be to build up and build out the mind. The thoughts which he receives stir the thought forces of the soul, and the man becomes, in the true sense of the words, a thoughtful man.

BY WHAT MEANS SHALL WE DETERMINE ITS EXTENT?

The thinking mind should be fitted to think widely. Life is everywhere moving towards material growth. Education is, first of all, for the sphere within the man, and not for the sphere without him. The work for the outward, which is to accomplish its result for the well-being and up-building of the world, is to be the outcome of the energies within. The education which is thus set before us is one that is all-sided, not one-sided. It opens the mind to the true, the beautiful, and the good everywhere. We may know literature and art and history and science, not fully, all of them, and equally well; but on that highest principle of educated life, "Everything of something and something of everything," we may give our serious thought to what each and all offer to us. The forces of the mind moving with one leader, yet all moving, is the true philosophy of life.

TO WHOM OUGHT IT TO BE GIVEN?

If education is for the growth of the human mind—the personal human mind—and if the glory of it is in the up-

building and outbuilding of the mind, the womanly mind is just as important, just as beautiful, just as much a divine creation with wide-reaching possibilities as the manly mind. When we have in our vision serious thought as the working force and end of education, the woman makes the same claim with the man, and her claim rests, at its deepest foundation, upon the same grand idea. Let the idea be what it should be, and the conclusion irresistibly follows. Education is for the purpose of developing and cultivating the thinking power. It is to the end of making a knowing, thinking mind. The higher education is for the realization of broad knowledge and wide thinking. It is too late in the world's history to think that a woman's mind is not of as much consequence as a man's mind, or that, whatever may be her peculiar sphere, she is not to be richly, broadly, and if we may use the word, thoughtfully educated, as well as he.

WHAT SHOULD BE OUR OUTLOOK RESPECTING IT IN THE NEAR FUTURE?

Two or three suggestions. The first is, that the opening years of the new century will, I think, carry forward this thought of the higher education towards general appreciation and acceptance in a measure far beyond what is realized at present. The time is not far distant, we may believe, when a new change will have come over us, as a people, and we shall have entered upon a new stage of our progress. We have, in the older sections of the country, already passed altogether beyond what we may call the pioneer era. We are now passing through the era of the accumulation of wealth and material powers and gifts. But the two earlier stages are preparatory to a third. The characteristic of the coming era is not to be found in the making, but rather in the fact that what was once making is already made. We are to be, in some fitting use of the term, a developed and not simply a developing people.

The twentieth century is to be more than the nineteenth. It is, we may hope, to bring with itself the full apprehension of the manhood of the individual man in all the possibilities of his thought and culture, for which the nineteenth century has been preparing by its partial work and through its developments on many sides.

A second thought: The lesson of the coming years is, I am sure, a lesson full of significance. It is a lesson which we are in danger of passing by unheeded, in the rush and pressure of material interests, but one which has infinite meaning for the highest welfare of our children's lives. If we take it to ourselves, the future for them will be full of richest and sweetest light. But if we fail, the inheritance of the ages in the bright coming age will be lost.

The old education was not too broad; it was too mechanical. The present education is somewhat less mechanical, but the danger besetting it is that it may become too narrow. The era of thought and of wide thought is that which we must hope for. There is nothing narrow and insignificant in education when it stands forth before us in its proper aspect. It is broadening, elevating, ennobling for the intellectual life always, if it is its ideal self. But as it thus elevates and broadens the man, it rises into the sphere of the spirit and above that of the letter; it subordinates and passes beyond the mechanical element pertaining to it, and makes thought and thinking power the end of its effort, the atmosphere of its life.

The era will be for the schools, as well as for the household and the individual, an era of wide culture, in which the higher education will be valued for what it gives the man of thinking power and range of mental life.

Educational Notes.

The increase of population in the United States from 1880 to 1890 was 26.7 per cent; for the same period the increase of students in college classes in all schools in the United States was 53.1 per cent, in all Methodist schools in the United States 52.3 per cent. In the seven colleges under the patronage of the Methodist Episcopal Church having the largest number of college students there were in attendance last year 2,310. They are divided as follows:

Ohio Wesleyan University, Ohio.....	531
Northwestern University, Ill.....	341
De Pauw University, Ind.....	327
Syracuse University, N. Y.....	301
Cornell College, Iowa.....	290
Boston University, Mass.....	276
Wesleyan University, Conn.....	244

The seven colleges of Methodism having the largest income are the following:

Boston University.....	\$160,244
Northwestern University.....	111,404
Syracuse University.....	110,331
Wesleyan University.....	70,000
Ohio Wesleyan University.....	61,184
De Pauw University.....	50,000
Dickinson College.....	40,300

The American University will be a crown that will not only adorn, but will also enrich and ennoble, the whole educational body and the whole church. It will not take money, students or influence from any other school of the church, but will add immeasurably to the strength and usefulness of them all. Methodism is building for a vast future and for uncounted millions. Let us build this glorious temple of Methodism with its marble front toward the future; build for the coming generations; build for all the years of time and eternity.—*Dr. C. H. Payne, Secretary Board of Education.*

Northern Christian Advocate, in reporting the address of the State Librarian, refers to a fact worthy of profound consideration, viz., the increased interest in university work in this country:

State Librarian Melvil Dewey in a lecture at Round Lake last week stated that the development of university extension had been so rapid and so steady that there was no doubt that it had come to stay. American history, political and social economics, the tariff question, and the relations of labor and capital, and the currency were high in popular favor.

Shall we not a great church utilize this rising tide for broader culture?

A recent announcement has been made by the authorities of Yale University, that the post-graduate courses of that institution are hereafter to be open to all properly qualified persons, irrespective of sex. This concession is really a greater gain toward the higher education of women in America, than the opening of the under-graduate courses would have been. Smith, Vassar, Wellesley, and others of this class, furnish large opportunities for the regular collegiate courses, but the need for advanced and special work they do not give. Hence there is cause for congratulation that the splendid appliances of Yale for the higher learning are now available for women.

Literary Notices.

All books sent to THE UNIVERSITY COURIER, Washington, D. C., will be noticed by title when received, and will be carefully reviewed as rapidly as time and space will permit.

"ECONOMICA," a statistical manual for the United States of America, is a rare book. It was prepared and published in 1806 by Samuel Blodgett, jr. He was an intimate friend of George Washington. This book was the first work published on economics in this country, and is really the basis of all that has followed on that subject. The copy, from which we shall make some extracts, is the property of Mr. William F. Boogher, of Washington, D. C., one of the best genealogists in this country.

The *Review of Reviews* for August contains a brief article on "University Education for Women; Some Notes of Progress chiefly in Europe." It is illustrated by four faces, the most prominent being that of Mrs. Kempin, Doctor of Laws, a graduate of the University at Zürich, who has become *privat-docent* in her alma mater. Switzerland thus takes a leading position in the promotion of woman's educational work, not only in study, but also in teaching. The writer gives a gloomy view of the exclusion of women from the universities of Germany, though he admits there are amid the general darkness some gleams of light from the position taken by Herr Bosse, the present cultus minister at Berlin, who is trying to secure some recognition of the right of woman to an education.

Under the heading of "Women in Politics" in the *Progress of the World*, the faces of Mrs. Henry M. Stanley and Mrs. John A. Logan are given. The editor draws the contrast between the fashion of the English ladies who are ambitious for the political success of their husbands and the method of Mrs. Logan, of whom he says: "She is, perhaps, the best representative of American women in politics in a strictly American manner."

Henri Taine, in a June issue of the *Revue des Deux Mondes*, writes on "Schools and Universities under Napoleon II."

Professor Mahaffy has an article on Trinity College, Dublin, in the July number of *Nineteenth Century*.

Oriental Education in Burmah is the title of an article written by P. Horden, in the *Asiatic Quarterly Review* of July.

Joseph Cook has written and published in the July number of *Our Day* an interesting article on "Fast and Loose Theories of Evolution."

The *Methodist Review* (July-August number) contains a thoughtful and trustworthy article from the pen of Bishop James M. Thoburn on Theosophy, in which he gives an account of the Blavatsky-Olcott fiasco in India.

The *National Methodist* is a religious weekly paper just started in Washington, D. C. Thomas Coke Carter, D. D., is the editor and Martin N. Evans business manager. The first number shows newspaper taste and ability.

It is published for one dollar a year. This is a popular price, and we think the *National Methodist* will win a deserved success.

FROM THE FIELD.

DEAR DR. GRAY: Your letter at hand with the appeal for the University. It is splendid. I will put it in *World Wide Missions* for August. We *must* build and endow the greatest university in the world, and it must be in Washington. The poor must start with their small gifts and the rich will follow by and by. I have perfect faith in overwhelming success. There is no appeal that has ever been made to the church that will make such a response as this. It means so much for our country, that patriotism—the love that sends men to the battlefield to die by thousands—will lead the masses to come to our help.

I would rather have a university built and endowed by the contributions of the many than by the great contributions of the few.

Go on with unflinching faith. It will be a bond of union for all Methodisms in the United States.

Yours, faithfully,

C. C. McCABE.

DEAR DOCTOR: I am in receipt of your circular of July 22, and am greatly impressed with the scheme. I rejoice that you have taken hold of this, as you are so well fitted to make it a great success. It seems to me there ought to be a very ready response to this appeal, and I wish you great success, not only for Methodism, but for the whole national prosperity, which I believe to be involved in the planting of a great protestant university at the Capital of the Nation, where it may have such remarkable facilities and at the same time exert so permanent an influence on the affairs of the nation. You will have the prayers and sympathy of the entire church in your wonderful undertaking, and I pray that God's blessing may be upon you.

Yours, faithfully,

W. A. SPENCER.

We are satisfied that no more far-reaching enterprise was ever undertaken by our church than the founding of a great university at the Capital of the Nation. Once accomplished, protestantism has infused its salubrious influences into the very fountain-head of American life. The effects upon the destiny of Christianity and our country will be of incalculable good.

Upon our own church its influence will be no less potent and beneficial; in this, particularly, that it will bind our educational institutions into a glorious federation—into a union of colleges and universities, of which it will be the radiant capital. Let every Methodist study the General Conference action and make some contribution toward realizing the great undertaking.—*Dr. Moore, in Western Christian Advocate.*

MY DEAR DOCTOR: I have read your plan for the American University. Am especially pleased with the scheme of raising ten-thousand dollar fellowships. I believe the American University is destined to be a crowning factor in the educational system and work of American Methodism. It has an unique field and must more and more command the attention and money of wealthy people.

Yours, truly,

J. C. HARTZELL.

There is in my judgment no more worthy object of benevolence now before the American people, especially American Methodism, than the American University. It appeals to every noblest and highest sentiment in the church and in the nation. The General Conference wisely and heartily

endorsed the appeal to the church at large for a Columbian Thank Offering to this worthy cause. The plan of establishing fellowships for the benefit of institutions located in the territory where the offerings are made is an admirable one. If every college in Methodism can have the benefit of one or more such fellowships it will prove a great stimulus to advanced scholarship and inspire earnest students in all the institutions of the church to pursue post-graduate studies. It is hoped that this Columbian Thank Offering will be worthy of the Methodism of the nation.

C. H. PAYNE.

Dr. Abel Stevens, our able and venerable church historian, writing from California, sends the following timely message to Bishop Hurst:

"With God's blessing I may hereafter repeat my gift, perhaps as long as I live, for I esteem this great enterprise one of the most momentous undertakings of the church. Our people may not immediately respond, but they will never fail to sustain the project. It has come about in due season; it altogether befits us—our relative standing in the Protestantism of the nation, our present and future needs in education, and our duty to the common country. So God speed you, my dear friend, in your great work."

President G. H. Bridgman, of Hamline University, in a letter to Bishop Hurst, says:

"Your plan for an American University at Washington is a grand idea. It is just what we want. In no way could the church or higher education be served so well. I hope you may secure all the money you need, and that no discouragement or opposition may prevent you from going ahead."

Dr. Daniel Wise, writes:

"Thinking the other day of our University, to be established in Washington, begat a thought in my mind which I venture to mention to you, namely, that a hundred thousand dollars might be secured for the endowment of its theological chair by the ministers of our church. Surely, thought I, there are a thousand of our travelling ministers able and willing to contribute \$100 each toward such an endowment fund. The effect of such a noble sum given by the ministry, would powerfully influence the liberality of our laity * * * ONE HUNDRED THOUSAND DOLLARS FROM A THOUSAND OF OUR PREACHERS FOR THE METHODIST UNIVERSITY! Is not it a good watchword?"

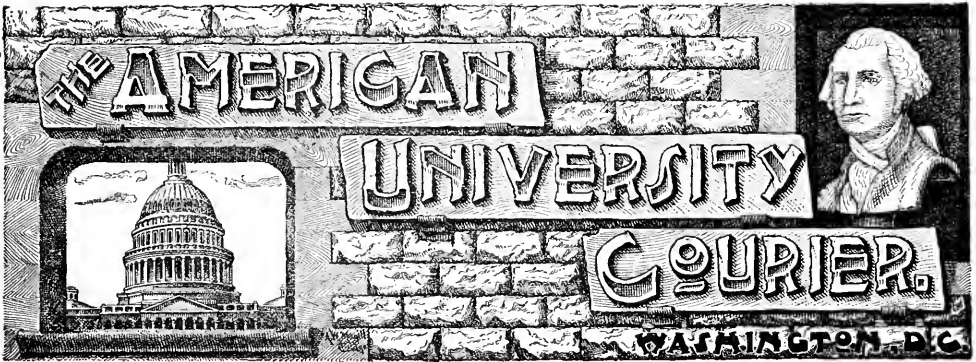

These words are from a young pastor in the General Conference and were the first containing the proposition for a hundred dollars from ten thousand ministers:

BISHOP JOHN F. HURST:

DEAR SIR AND BROTHER: The step you have taken looking to the possible establishment of a university in Washington, D. C., must meet with an immense response from the patriotic and Protestant impulses of northern Methodism and in the good time coming, the Methodism of the South no less. I cannot doubt that ten thousand Methodist preachers of the rank and file would quickly subscribe a hundred dollars each toward the endowment. Count me as one of them.

Very truly,

R. W. COPELAND.

ACTION OF THE GENERAL CONFERENCE AT OMAHA.

Resolved. First, that the General Conference approve the establishment of the American University, and accept the patronage of the same according to the terms of its charter; *provided*, nevertheless, that the endowment of the institution shall be not less than five millions of dollars, over and above its present real estate, before any department of the University shall be opened.

Resolved. Second, that, in our judgment, at least ten millions of dollars should be secured for the endowment of the University, **and that all our pastors be requested to take subscriptions or collections for this object at the Sabbath service succeeding the 12th day of October, 1892**, the quarter-centennial of the discovery of America, and that the offerings of all our people be for this **one object as our Columbian memorial.**

Resolved. Third, that we commend the generosity of the citizens of Washington for the site of ninety-two acres which they have provided by the gift of one hundred thousand dollars.

Sample Copy.—We send you this number as a *sample copy* of THE UNIVERSITY COURIER. For the first year we will send it at *half rates—fifty cents* for single subscription. In clubs of ten, *twenty-five cents*. Send in your orders at once. Address

The Great American Martyr.

DR. THOMAS COKE CARTER'S ILLUSTRATED LECTURE ON ABRAHAM LINCOLN.

Dr. THOMAS COKE CARTER, of Washington City, is soon to deliver throughout the country his unique and thrilling lecture on the life, characteristics, achievements and martyrdom of Abraham Lincoln. Every important event in the sublime career of the murdered President will be illustrated by photographic views thrown on the canvass under the powerful light of the stereopticon. These views have been prepared by the foremost artist of Washington, and will add a special charm and interest to the word pictures of the lecturer.

Dr. Carter is one of the most fluent and eloquent speakers on the American platform, and his best gifts are called out by the splendid theme of this lecture. Churches, Epworth Leagues, Colleges, Lyceums and Lecture Committees desiring to secure the services of Dr. Carter will please address

MARTIN N. EVANS, Manager,

Editorial.

FOR assistance and courtesies in the preparation of our illustrated article on the Catholic University of America, which we present in this issue, we are greatly indebted to Rev. Philip J. Garrigan, D. D., Vice-Rector, and to Mr. Merwin-Marie Snell, Secretary to the Rector of that institution.

JOHN GREENLEAF WHITTIER, poet of the heart and of the hearth, is enshrined in the affections of his countrymen and will occupy a niche in the gallery of the world's sweetest and strongest singers. He died at Hampton Falls, N. H., September 7, 1892.

PRESIDENT BASHFORD, of the Ohio Wesleyan University, writes words of cheer. He says: "All hail to the American University. It will afford the College graduates of the nation an opportunity for the highest culture and for the noblest consecration. It is the loftiest educational enterprise of the closing decade of the nineteenth century."

THE action of General Conference, with reference to the American University, covered the following points:

1. It adopted the American University as outlined by the Board of Trustees and represented by Bishop Hurst.
2. It made the American University the only object of our Columbian Thank Offering.
3. It requested that every pastor present the subject and take a "subscription and collection" on the Sabbath following October 12.

We hope this great educational movement will have as thorough a presentation in every Methodist pulpit in the world as was contemplated by the action of the General Conference.

IN our series of sketches of the prominent universities of Europe and America, we in this issue give some descriptive and historical facts concerning the Catholic University of America. By virtue of its location and its proposed high purpose and broad scope, we deem it worthy of the careful study of all our readers.

May the enterprise and generosity of our Roman Catholic neighbors prove a stimulus to the minds and hearts of all the friends of the American University.

IN the Calendar of the Catholic University January 7, 1892, is devoted to saying "Mass for living benefactors," November 5, "Mass for deceased benefactors."

IN this number of the COURIER we have given considerable space to the Catholic University at Washington, D. C.

The Catholics are wise in utilizing the advantages afforded by the government to students of higher learning. The scope of university work, as set forth by Cardinal Gibbons, is worthy of profound study.

There can be no doubt but that the university training of the next fifty years will do more than any other single influence in giving direction to the thought of the twentieth century. The leaders of the next century will come from the university.

In its school of sociology will be studied the social development and political institutions of this country. Shall they be determined solely from the standpoint of Catholicism, or shall Protestantism do her part in shaping the destiny of our free institutions?

IN the death of Mr. Francis H. Root, which occurred in Buffalo, N. Y., on September 6, 1892, the Methodist Episcopal Church loses one of its most liberal and distinguished laymen. Mr. Root was one of the charter members and has been for many years the president of the board of trustees of Syracuse University. Among his bequests is one for \$50,000 to that worthy institution.

SEND to Geo. W. Gray, 1425 N. Y. Avenue, Washington, D. C., for Columbian Concert Exercises, sent free, except postage.

THE *Northwestern Christian Advocate* of September 7 says: "This great enterprise is receiving the indorsement of the press and of leading men."

President Harrison, in a letter addressed to the chancellor, Bishop Hurst, writes: "This movement should receive, and I hope will receive, the effective support and sympathy, not only of all the members of your great church, but of all patriotic people."

General W. H. Gibson, of Ohio, and other leaders of the Grand Army of the Republic, not only com-

ment this enterprise, but are giving it the benefit of their practical support. There are already indications that many thousands of members of the Grand Army of the Republic will secure the Lincoln medallion by dollar contributions. Since some of the plans for the establishment of the American University were made public last week, a friend, whose name we are not now at liberty to print, has subscribed \$100,000 for an endowment fund.

STEPS have been taken toward raising a fund of \$500,000 to build Lincoln Hall, as a monument in honor of and to bear the name of the martyr president. It is expected to raise this fund by contributions of \$1 each from 500,000 patriotic Americans, independent of church relationship, race or color. Every contributor will receive a beautiful medal made of aluminum, containing a medallion of Mr. Lincoln on the obverse side, and on the reverse side a brief statement of the principal facts of the American University movement. There will be just 500,000 of these souvenirs, and one will be given for each dollar contributed. There should be at least one of them in every American home, and it would stimulate patriotism as well as interest in higher education if one be given each child.

The building of Lincoln Hall will no doubt commend itself to all the patriotic organizations of the nation, and many members of the Grand Army of the Republic, and other orders, will consider it a pleasure and honor to contribute to this great institution devoted to the cause of American education, loyalty and patriotism. Dr. P. L. McKinnie, of Chicago, the well-known writer and late Assistant Adjutant-General of the Department of Illinois, has been engaged to assist in promoting the cause of the university.—*Northwestern Christian Advocate.*

THE NATION'S HEROES.

In the universal greeting to the officers and members of the Grand Army of the Republic at their Twenty-sixth National Encampment, the COURIER most warmly and sincerely joins. To revere the memory and deck the graves of the brave ones who sleep in dust, is a just tribute to departed worth. Equal honor should be shown to the soldiers who still live; heroes are not made by death; heroes they were who fell; heroes they were before they fell; heroes are they who fell not; heroes, by whose loyal hearts and strong hands our union was preserved, the nation bids you a hearty welcome to the Capital City.

May the blessing of our fathers' God rest upon you, every one, and upon the loved ones in your homes, and may your visit to Washington kindle in all Americans a quenchless love for our country, and an ardent affection for her defenders. (A. G.)

REMEMBER October 16 is set apart by General Conference as Columbus Thank Offering Day and every pastor in Methodism is requested to take a "Subscription" or "Collection" for The American University.

A GREAT DAY.

A Columbian Concert Exercise has been prepared for ministers to use in taking the collection for the American University, which, by action of General Conference, was made the sole object of the Columbian Thank Offering. We have, also, prepared a Young People's Concert Exercise, to be used by the Epworth League, Christian Endeavor, or any other society of the church for the purpose of building an Epworth Hall and endowing an Epworth Professorship. These services will be sent free, on application, to any one wishing to use them in presenting the claims of the American University. Those ordering will please send fifty cents per hundred to pay postage.

These Concert Exercises are so arranged as to give information and to make a profitable, as well as beautiful, service. We hope that every pastor in Methodism will arrange to give a full day to the religious recognition of the discovery of America.

Various denominations are arranging for the observance of a National Day. A National Executive Committee has been appointed for that purpose. The day set apart by this Executive Committee is the same as that fixed by the General Conference at its session in Omaha. This year is to mark one of the greatest events of modern times. There are no more continents to discover. There ought not to be a pulpit of any denomination in this favored land where the flag should not be unfurled and the service entirely devoted to such lines of information that would make the people more intelligently and devoutly thankful that we live in this country and in this age of the world.

Address Geo. W. Gray, D. D., 1425 New York Avenue, Washington, D. C.

COLUMBIAN SUNDAY, OCTOBER 16TH, 1892.

This date, by the action of the Executive Committee of the National Celebration of Columbus Day, has been selected to be observed as Columbian Sunday in all the churches of America, without distinction of creed.

The committee, of which Francis Bellamy is chairman, suggests "that not only the proper services of the day give recognition of Divine Providence which has so marvellously led, and abundantly blessed, this people; but also that the sermons of the day, in view of the national celebration of the following Friday, give special emphasis to the educational idea which has with such wisdom been made the center of all the local celebrations. Our system of free and common education is the master-force which, under

God, has been filling the American people with their ideas of equality, justice, and liberty. It seems to be, moreover, the institution upon which America must depend for the proper training in good citizenship of the coming generations. While unchecked waves of un-American sentiment are spreading themselves over our country, the common school alone has a sure command of the future; its education in intelligent patriotism, its training in the duties of citizenship, are forces which can be trusted to Americanize the huge armies of alien immigration. The ministers of America have been invariably the friends of education. It is, therefore, with a degree of confidence that American educators turn to the churches, and respectfully solicit their co-operation in impressing upon the people America's dependence upon the system of public enlightenment."

The same Sunday has, by the action of the General Conference of the Methodist Episcopal Church, been set apart to be observed in all Methodist Episcopal Churches in the interest of the American University. The General Conference requests "all our pastors to take subscriptions or collections for this cause, and that the offerings of our people be for this one object as our Columbian Memorial."

Both as Christians and as Methodists, our pastors and their congregations are all requested and are with great unanimity preparing to make SUNDAY, OCTOBER 16th, 1892, a memorable day in the annals of the Church and the nation, by sermon, by addresses, by song, by prayer, and by a united and enthusiastic offering toward the endowment of the American University.

THE SCOPE OF THE CATHOLIC UNIVERSITY.

CARDINAL GIBBONS.

The faculty of divinity, now organized, has for its object the profound study of all that concerns man, and his multiform relations with all below him, around him, and above him, as seen in the light of natural reason.

The school of philosophy embraces the thorough study of man's spiritual, rational and ethical nature with the aid imparted by the wisdom of the philosophers and schoolmen of all ages, especially St. Thomas Aquinas.

The school of sciences comprises the study of man's relations to all organic and inorganic nature. It includes in its scope investigations (1) in physics, chemistry and geology; (2) in biology, physiology, and anthropology, these being crowned by a complete course of experimental or physiological psychology in which the relations between mind and matter in all mental operations are carefully analyzed.

These scientific courses are to be organized and conducted in such a manner that they who wish to

study the sciences not merely in their relation to philosophy, but for purposes of professional utility, or of profound experimental research, will find every facility for doing so.

In the school of sociology will be thoroughly treated the organization of human society under its three great heads of social development, political institutions, and economic adjustments.

With this will be intimately connected the school of jurisprudence, which will have for its field the history and the philosophy of the development of law in the civilized world. From this school of jurisprudence will naturally grow in process of time our faculty of law.

The above-mentioned schools, in which man's nature and relationships are studied in all their phases, will naturally call for departments of philology and literature, and departments of history, in which the busy workings of human thought and human life in all ages and nations will furnish abundant matter for most interesting study.

NATIONAL GROWTH AND DECLINE.

Every country passes through three periods—the pioneer, when the people are taking possession of uncultivated fields, conquering forests, and steadily encroaching upon the natural order of things. This period is full of sacrifice. It absorbs the time and thought of the people, and gives but little opportunity for consideration of anything beyond their surroundings. Its influence is to develop a sturdy manhood along economic lines.

SECOND PERIOD.

The next period in any country is that of accumulation. The cultivated lands become valuable—the wild forest has given away to the cultivated field, and yielded to its victors the wealth which it held in its possession. Manufactures of various kinds are organized to use up what would be wasted material, and increased value is found in every change that takes place. This increased value induces emigration, emigration in turn gives an impetus to increased values, and thus wealth is the assured result of the development of a new country having natural possibilities.

DIVERGING LINES.

At this point there may be diverging lines. The usual course of nations is to follow the period of accumulation by that of luxury, ease, reduction of character, disintegration and ruin. Christianity that consecrates wealth to the good of others, and not to self-enjoyment, may so change the current of life of the people that the ruin that follows luxury may be avoided. The spirit of helpfulness which Christianity enjoins, and the consecration of property that underlies it, is the absolute safeguard to Christian civilization, and

marks the distinction between those of the past and the promised era of Christianity.

The building of every charitable institution of learning, the support of every missionary, the building of every church, the maintenance of all the appliances that result from an inherent spirit of helpfulness in the gospel seem essential to the establishment of a civilization which will continue to increase in power and for the good of humanity beyond the period of accumulation.

The rapid multiplication of things making demands on every hand for money, the cry of need going up from all lands, the rush of thousands into the field of charitable work, all indicate, not only the spirit of Christianity, but the necessity of that spirit following close upon the heels of the great accumulation of property which has come to this country.

ACCUMULATED WEALTH.

We are in the tide of the second period of this country. We have passed through largely the pioneer age, and we are enjoying the results of accumulated wealth. We are standing at the dividing line between the luxury ending in ruin and a higher consecration of property to all lines of helpfulness, looking toward higher development and greater possibilities, and a glory to crown that result, which the world has never seen.

THE RESPONSIBILITY OF WEALTH.

In the hands of the wealthy people of this country to-day, more than any other class, is the destiny of our Christian civilization. By their large donations to institutions reaching out to touch the higher and purer civilization of the future they may turn the thought of the age from self-gratification to the development of a noble manhood, and save the country to God and humanity. Let the Church of America preach the gospel of investigation rather than gratification. Let it bend its energies to secure the best possible appliances for study and original research. Let it reach out after the development of a higher manhood and a deeper hold upon the truth.

GERMAN EMPIRE.

The German empire is worthy of consideration in illustrating this point. Having gone through the pioneer age and reached the high tide of wealth, it turned its attention to lines of comprehensive thought. It entered the domain of the unknown with the spirit of investigation, and the same economic methods which produced the nation's wealth have been applied to pioneering into the unknown realms of truth; and they are to-day enjoying the period of accumulation in the higher realms of human thought, which induces an influx of students to their universities as to no other country.

Over and above the 250 gymnasias, which correspond to our colleges, Germany has to-day twenty-two uni-

versities, manned by 2,431 professors and teaching 31,803 students.

The time certainly has come for the Methodist Episcopal Church to seek to turn the material wealth of our nation into the same higher realms of thought, and commence to pioneer the untrodden fields of truth, that to us may come a period of accumulation of knowledge and power that will bless the world and bring it still nearer to the Christ who alone is truth.

THE SPECIAL ADVANTAGES OF THE UNIVERSITY.

REV. CHARLES M. STUART, A. M.

A preliminary word by way of definition. The writer has been asked to signify the special advantages offered by the university as compared with those offered by the college. But in what does the university idea differ from the college idea? The universities of Germany are justly regarded as first among the learned institutions of the world. There, if anywhere, the university idea is most fully and definitely expressed; and there we find the distinguishing characteristic to be advanced work in professional lines. The organization of the German university proceeds upon the basis of an already finished college course. In England and in this country the university idea at present is that of a confederation of colleges, and includes the under-graduate work which, in Germany, is done by the gymnasias or lyceas. In this country the average university does not, even in its professional departments, organize upon the post-graduate basis. So that in speaking of the special advantages offered by the university, as this is expected to be a practical paper, we must recognize that it is the average American university we are dealing with, and that, in the main, the college idea has its expression in the university plan. It ought also to be specified that we are dealing with universities of established character and reputation, and not with the "wild-cat" species which have their origin and scope determined by commercial rather than by educational considerations.

In general, then, we may say that the distinction between the university and the college is that of resources, and, therefore, of opportunity. The college proposes to be a university when its resources are sufficient to warrant the extension. In proportion to its prosperity will the standard of work be advanced, the faculty strengthened and enlarged, and the equipment perfected. Upon the fullest development of this progression is the university idea realized. The university, therefore, has all the advantages of the lesser institution plus those denied the latter just because it is lesser.

These increased resources and opportunities attract to the university the best teaching talent; and the teacher is an important factor in the personal edu-

educational problem. Emerson's judgment was that "it is little matter what you learn, the question is, with whom you learn." The faculty is, in an important sense, the university. Doubtless the smaller colleges have had their great teachers, but in this country it was when the difference between the college and the university was not so marked as it is now. They have them now, for there are fine teachers who deliberately prefer the smaller field. But more and more eminent teaching qualities are in demand for the larger market, and teachers are few who do not covet the larger opportunity.

The university resources admit of a wider range of study and of its prosecution under better conditions. In the smaller college there are departments of science wholly untouched, and other departments so inadequately equipped that they might as well be non-existent. One American man of letters, writing of a classmate, says that though he was one of the ablest men in the school where both were trained, he made no record simply because he had no outlet. The course of study provided nothing upon which his genius could expend itself. This, too, was in a college which has since become one of our leading universities. Libraries and laboratories are necessary tools for the prosecution of work under the most favorable conditions. But these are achieved only by large expenditure of money, which is not at the command of the smaller college.

The faculty and equipment of the university attract the best students. Given a student with scholarly enthusiasm, and, even if he has finished a course at the smaller college, he will find his way to the university to avail himself of the opportunities not to be found in the former institution. This association with the highest order of talent, brought to its best by an enthusiasm for study and wealth of opportunity, every scholar recognizes as among the most potent influences of the educational life. "The good of a college," says one of our most delightful essayists, "is to be had from the fellows who are there and your associations with them." In class-room, in the debating society, in the literary club, in the closer intimacies of social life, "the fellows" have about as much moulding power as all the other influences combined.

Among minor but appreciable advantages are those arising from association with a distinguished body of alumni, which is perhaps the peculiar privilege of the university; also, from possessing the diploma of a school whose name is a guarantee not only of liberal but of thorough and sound scholarship. The most eminent scholars of the Old World are particular to place the name of the university with the degree which they have obtained, and the coveted Oxon., or

Cantab., are passports immediately recognized and honored to respect and confidence in the world of science and letters.

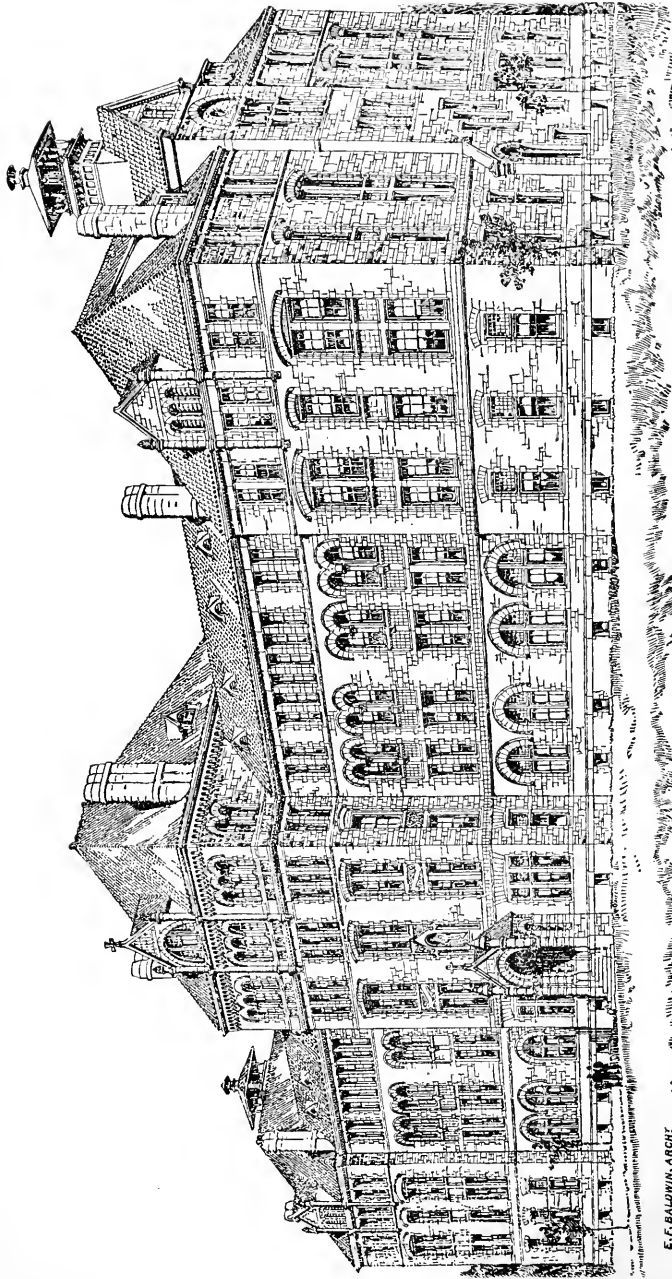

These claims for the university are so obvious that it seems almost like willfully consuming space to make them. A more important word may be allowed in closing. The college and the university are alike opportunities. Only that, and nothing more. The best they can do for a student is to give him a chance to make the most of himself; he himself is the determining factor. Whatever the opportunity, it will be found that all higher education is self-education, and that one is enriched only in proportion as he appropriates and assimilates for himself what the school offers. Nevertheless even the most indifferent and indolent student cannot take the university course without contracting some nobler aims and qualities. And he is the best representative of the university idea who makes its splendid advantages all contribute to the development of the highest manhood. For there is no dispute that, as Sir Philip Sidney says, "The ending end of all earthly learning is virtuous action."—*Epworth Herald*.

AN IDEAL CHAIR OF BOTANY.

The necessity for a university, with its lines of special work, is seen in the following from the pen of Prof. L. H. Bailey, of Cornell:

"The ideal chair or department of botany, therefore, should comprise, in material equipment, laboratories, botanic gardens, green houses, orchards, vegetable and ornamental gardens, all of which should be maintained for purposes of active investigation rather than as mere collections; and I am sure that no department of botany can accomplish the results of which the science is capable until such breadth of equipment is secured. I am aware that there are difficulties in such a comprehensive field, but the only serious one is the lack of men. Botanists, as a rule, care little for gardens and cultivated plants, and horticulturists are too apt to undervalue the importance of scientific training and investigation; but the time cannot be far distant when men shall appear with sufficient scientific and practical training to appreciate the needs of the whole science and with enough executive ability to manage its many interests. Such men are no doubt teaching in some of our colleges to-day, were the opportunity open to them. One cannot be a specialist in all or even several of the many subjects comprised in this ideal, but he may possess the genius to encourage and direct the work of other specialists. *The first need is the opportunity, for there is not yet, so far as I know, an ideal chair of botany in existence, where the science can be actively studied in its fullest possibilities and then be presented to the student and the world.*"

The ease with which all this could be done at Washington, D. C., is proof positive of the wisdom of locating the American University at Washington, where everything necessary is provided by the Government except the man. We will contract to find the man if the Church will respond to our appeal for two million.

E. F. BALDWIN, ARCHT.

Divinity Hall Catholic University of America, Washington, D. C. Corner-stone laid May 24, 1888; Dedicated, November 13, 1889.

THE CATHOLIC UNIVERSITY OF AMERICA.

The site of the Catholic University is a quadrangular piece of land of about sixty acres in extent, located on a line running a little east of north about two and one-half miles from the Capitol. It lies directly east of and adjacent to the grounds of the Soldiers' Home, and has a commanding view over the surrounding country. Its surface is beautifully diversified by undulating swells and ridges, which are here and there adorned with rows and groups of trees and shrubs. Access to it may be had either by the electric cars of the Eckington line or by the Metropolitan Branch of the B. & O. Railroad.

ORIGIN.

The Third Plenary Council of Baltimore recognized that the great need of the hour was the extension and improvement of the facilities for Catholic education in the United States.

It observed, also, that the Catholic colleges and universities of the country did not, as a class, offer to its citizens as excellent opportunities for the prosecution of higher collegiate studies as could be found in the non-Catholic institutions, and that little systematic provision existed in the United States for the post-graduate work characteristic of a true university. It was decided to found, at the earliest practical moment, an institution which would be a home of the most profound and Catholic learning.

When it was made possible, through the generosity of Miss Mary Gwendolen Caldwell to enter upon the execution of this colossal plan, it was decided, after a careful consideration of the claims of various cities in different parts of the country, that no more appropriate place could be found for the great National University than the Capital City itself, the very center of the nation's life. A consideration not to be overlooked was the extraordinary and unique advantages offered to the students by the libraries and scientific collections of the United States Government at Washington, to say nothing of the public libraries at Baltimore, which are comparatively easy of access.

The Catholic University of America, which was decreed by the Third Plenary Council of Baltimore, December 6th, 1884, and solemnly approved by the Pope, Leo XIII. on Easter Sunday, April 10th, 1887, was legally incorporated in the District of Columbia on April 21st of the latter year. The Right Rev. John J. Keane, bishop of Richmond, Va., had already been appointed by the American hierarchy to the rectorship of the University, in the spring of 1886, and in the fall of that year went to Europe with Archbishop Ireland and received the ratification of his appointment from the Pope. In August, 1888, Dr. Keane was translated from Richmond to the titular see of Ajasso. On the 13th of November, 1889, the

opening of the University took place with great solemnity in the presence of the President of the United States, the bishops and archbishops of America, and a large number of civil and ecclesiastical dignitaries of every rank, together with many college presidents and educationalists, without regard to religion, from various parts of the United States, and a vast concourse of people.

The divinity faculty, which has begun its work, is the only one thus far established, but the faculty of philosophy and letters is now being organized, and will enter upon its functions as soon as the Hall of Philosophy is complete, which will be in the fall of 1894.

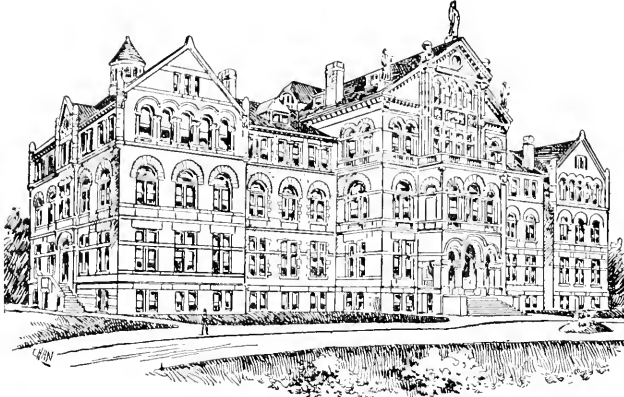

As soon as possible thereafter other faculties will be added. It is hoped to equip all departments so thoroughly as to offer to the graduate student every facility, whatever be his chosen speciality, which he could find at the best universities of Europe.

DIVINITY HALL.

Mr. E. F. Baldwin was the architect of the divinity building, the corner stone of which was laid with impressive ceremonies by Cardinal Gibbons on May 24th, 1888. The building is of the modern Romanesque style, and has an imposing, massive appearance. The middle structure, 56x70 feet, has two wings, each 105x45 feet, making the whole front 266 feet in addition to two return wings, each 46x45 feet, with a back building to one wing and a chapel in the rear of the middle building. One wing still remains unfinished and will be completed by the addition of a return wing, constituting a fine southern façade with a square central tower.

The central portion, finished plainly with a gable, is five stories high; the rest of the building is four stories high. The material used is Georgetown blue gneiss rock, which is laid in broken range face work. There is a little carving here and there, but the design is essentially plain and the carved work relieves rather than enriches.

At the main entrance, which is at the center of the front, there is a stone porch, and above is a recess in the wall, in which there will be placed a marble statue of the Savior, executed in Munich. A marble slab is set in the pediment of the porch with an inscription in Latin commemorative of the generosity of Miss Caldwell, whose gift of \$300,000 formed the nucleus of the university's fund. The finials of the pinnacle in the center building and wings are ornamented with six ideal figures in alto-relievo, representing philosophers. The Romanesque arches over the windows are ornamented with similar though smaller figures. The woodwork of the main entrance hall and approach to the chapel is of oak, and some fine carving has been introduced. The grand stair-case is likewise of oak and the newel posts solid and substantial. The two

HALL OF PHILOSOPHY, IN PROCESS OF ERECTION; CORNER-STONE LAID MAY 27, 1889.

parlors on each side of the main entrance hall are finished in oak, with wainscoting of the same material, and handsome oak mantels with framing-in slabs of highly polished marble instead of tiling.

From the main entrance a large hall extends back to the landing of the grand stair-case. On the north side of the chapel entrance stands a statue of the Mother of Jesus, which was executed in Munich. This statue was the gift of Madame de la Rue, of Paris. The chapel extends back from the central portion of the building for 80 feet, and is a handsome piece of architecture. There is a grand altar at the east end and several smaller ones on the north and

south sides. The south side of the main entrance hall is finished in oak, with wainscoting of the same material, and handsome oak mantels with framing-in slabs of highly polished marble instead of tiling. From the main entrance a large hall extends back to the landing of the grand stair-case. On the north side of the chapel entrance stands a statue of the Mother of Jesus, which was executed in Munich. This statue was the gift of Madame de la Rue, of Paris. The chapel extends back from the central portion of the building for 80 feet, and is a handsome piece of architecture. There is a grand altar at the east end and several smaller ones on the north and

tion halls for the professors are in the second story of the north wing. The fifth floor contains one of the handsomest rooms in the building, and is used for the recreation room of the students, containing billiard and gymnastic appliances. The central portion is furnished with a grand double stair-case and two smaller flights of stairs in the wings are built around the brick shaft that incloses the elevator and ventilating flues. The floors are made of North Carolina pine and are filled with plaster that not only deadens all sound but is fire proof. The walls are lined with terra-cotta and wire lathing is used instead of wood. There are no wooden partitions in the building, and the whole house is practically fire-proof. Steam is used in heating the building, and a system of pneumatic clocks furnish the time. In 1891 a small observatory was erected north of Divinity Hall.

HALL OF PHILOSOPHY.

The hall of philosophy is being built a short distance southeast of the divinity building and at right angles to the latter. It faces south and is in the rear of the site selected for the University Church, which will face west. It will be 250 feet wide and will be divided into a center building and two wings. The ceiling of the basement will be twelve feet high. The first, second and third floors will have a height of 18 feet and the fourth floor will have a height of 16 feet. Port Davenport granite has been selected for the basement and the walls above will be of Potomac rock. The roof is to be covered with slate. The main entrance is to be of massive granite and will lead to a large vestibule.

The rector's and secretaries' offices will be placed in the first floor of the center. The second floor of the center will be used for an assembly hall 64x44 feet. It will seat 400 people. In the east wing there will

SEAL OF THE CATHOLIC UNIVERSITY.

south sides. On the west end is the choir gallery, in which is an excellent church organ donated by Mrs. Chas. F. Barbour of this city. The ceiling will be ornamented with stucco work, and the walls of the side chapels with mural paintings. This chapel has a seating capacity of one hundred and fifty.

Adjoining the parlor on the south are class rooms and on the southwest corner of the building is a public lecture hall which will seat about three hundred people. In the return wing on the north are the dining rooms, pantries and kitchens. The dining rooms and recrea-

be the vivisection laboratories, lecture hall, professors' rooms, sectional laboratories, zoological and botanical museums and laboratories for histological research. In the future a residence will be built for the rector, in which will be placed all the executive offices.

The faculty for the department of philosophy will be mainly American, drawn from the great northern colleges. Students will be admitted who have taken the degree of baccalaureate, or who have passed an examination at the University. As the University is to do no collegiate work, there can be no conflict or rivalry between it and any other institution.

Professional education is properly the exclusive work of the University, but its imperative necessity is so evident that while no fully equipped faculty of philosophy and letters has thus far existed on American soil, schools of law, medicine and other sciences have grown up all over the country. But these schools, as a result partly of the fact that a preliminary college course has not been insisted upon, partly of the lack of thoroughness in their professional teaching, and partly of the shortness of their courses, have standards far below that of similar institutions abroad. From this consideration arises the importance of post-graduate professional studies, to which the Catholic University of America is to give special attention.

GIFTS TO THE CATHOLIC UNIVERSITY

have been as follows :

Miss Mary Gwendolen Caldwell, Newport, R. I., for Divinity Hall, for the Shakespeare Caldwell Chair of Dogmatic Theology, and the Elizabeth Breckenridge Caldwell Chair of Philosophy	\$300,000.00
Miss Elizabeth Caldwell, for Chapel of Divinity Hall	50,000.00
Rev. James McMahon, for Hall of Philosophy (estimated).....	400,000.00
Mr. Patrick Quinn, Philadelphia, for the Quinn Chair of Ecclesiastical History	55,000.00
The Misses Andrews, Baltimore, for the Andrews Chair of Scriptural Archaeology	50,000.00
The Misses Drexel, Philadelphia, for the Francis A. Drexel Chair of Moral Theology	50,000.00
Mr. and Mrs. Eugene Kelly, New York, for the Eugene Kelly Chair of Ecclesiastical History, and for the Margaret Hughes Kelly Chair of Holy Scripture	100,000.00
Hon. M. P. O'Connor, San José, Cal., for the O'Connor Chair of Canon Law	50,000.00
Mr. Sylvester Johnston, St. Louis	15,000.00
Messrs. Benziger Brothers, New York, for a scholarship	5,000.00
Mr. Leopold Hüffer and family, Paris	8,000.00
Mr. E. C. Loubat, New York	5,000.00
Mr. Thomas E. Waggaman, Washington	5,000.00
Count Joseph Loubat, New York, for a scholarship	5,000.00
Mr. Michael Jenkins, Baltimore, for a scholarship	5,000.00
Miss Emily Harper (deceased) Baltimore, for a scholarship	5,000.00
Total benefactions to present.....	\$1,108,000.00

THE OFFICERS AND FACULTY

as now constituted are :

CHANCELLOR—Cardinal Gibbons, Archbishop of Baltimore.

BOARD OF DIRECTORS—Cardinal Gibbons, the archbishops of Boston, New York, Philadelphia and St. Paul, the bishops of Cleveland, Covington, Detroit, Peoria and Sioux Falls, and the coadjutor of Santa Fé.; the Rector of the University; Rev. J. M. Farley, V. G.; Rev. Thomas S. Lee; Eugene Kelly, Esq.; Michael Jenkins, Esq.; and Thomas E. Waggaman, Esq.

RECTOR—Bishop John J. Keane, D. D.

VICE-RECTOR—Rev. Philip J. Garrigan, D. D., Ph. D.

FACULTY—Rev. Thomas Bouquillon, D. D., Dean, Professor of Moral Theology. Rev. Monsignor Schroeder, D. D., Ph. D., Professor of Dogmatic Theology. Rev. Joseph Pohle, D. D., Vice-Dean, Professor of Apologetics. Rev. Henry Hyvernat, D. D., Professor of Oriental Languages and Archaeology. Rev. Thomas O'Gorman, D. D., Professor of Ecclesiastical History. Rev. Charles Granman, D. D., Ph. D., Professor of Scripture. Rev. Thomas J. Shahan, D. D., Professor of Ecclesiastical History. Rev. Edward A. Pace, D. D., Ph. D., Professor of Psychology. Rev. Sebastian G. Messmer, D. D., D. C. L., Professor of Canon Law 1889-'92, now Bishop of Green Bay, Wis.

LECTURERS—Bishop J. J. Keane, D. D., Lecturer in Homiletics. Rev. J. B. Hogan, D. D., Lecturer in Ascetic Theology. Prof. Charles Warren Stoddard, Lecturer in English Literature.

PRESIDENT OF DIVINITY COLLEGE—Rev. J. B. Hogan, S. S., D. D.

LIBRARIAN AND ASSISTANT OF THE PRESIDENT—Rev. A. Orban, S. S., D. D.

DIRECTOR OF THE OBSERVATORY—Rev. George M. Searle, C. S. P.

A PROTESTANT MOVEMENT.

The plan which has been long maturing in the active and resourceful brain of Bishop Hurst of the Methodist Episcopal Church for a National University at Washington is at length confided in part to the public. Bishop Hurst has set about raising an endowment and building fund of \$10,000,000, chiefly among the people of his own denomination. He is to have the co-operation of Mrs. John A. Logan, who will raise \$1,000,000 or more among the Methodist women. The institution is to be for post-graduate students, and Washington is chosen as the place in order to make available the priceless government museums and libraries at the Capital. We give good wishes and congratulations to the bishop, his colleagues and their enterprise. There are some post-graduate schools in America already, but there is room for more. Not to mention the post-graduate departments of the regular universities, one of them is at Baltimore, near Washington, the Johns Hopkins University; another is at the National Capital itself, the Roman Catholic University. The establishment of a new institution in so close vicinity will but strengthen the other two. We do not hesitate to prophesy that they will work in harmony for the good of each other and of knowledge, enlightenment, religion and patriotism. The more post-graduate schools the better. The time must surely come when our college boys need no longer go to Germany to pursue special studies in their chosen lines of work. We must have our own universities—first-rate in equipment and standard.—Chicago Post.

Contributions.

A LETTER FROM DR. MULLER.

DEAR DR. GRAY: I send the following reasons for founding the American University:

1. The plan of endowment and study is progressive and American. The work of the University will not begin until it is fully equipped for success.
2. The location and design are in harmony with the growth of the nation and the latest developments of educational work. The one is seen in the increasing beauty of the Capital, the other in the newer views of educational methods.
3. It meets the need of the Republic for a distinctively American University—representative, truly catholic, eminently Christian.
4. It meets the need of Methodism, furnishing a culmination in her educational system without interference of any antecedent part. The broad-minded opinion of the best minds in Methodism, foreign and native, confirm this statement.
5. It should command and receive the practical sympathy and generous support of all intelligent Christian men and women who can appreciate the benefits such a university will give the nation and church.
6. A grateful recognition of the blessings the discovery of America has brought to the country, and a baptism of patriotism and enthusiasm upon the millions in the Methodist Church.

October 16th ought to bring two million dollars from their hands to the treasury of the University, and a shout of victory from their hearts. To secure both results, "Here am I."

"A TREE KNOWN BY ITS" SHOOTS.

No quadrennium in the history of the Methodist Episcopal Church bears more signal marks of her vigor than the one which closed in May. The new off-shoots from the parent stem are remarkable if we consider them in their present and prospective character. The steady numerical increase of the membership, the stately march of her missionaries into new territory and the royal response of the church to the enlarged demands for money to support her missions, and the full tide of evangelical and benevolent spirit that has continued to flow through all her varied agencies for carrying the gospel to every creature, these alone would indicate a healthful and progressive life. But besides these tokens of strength we hail as additional proofs of her providential guidance and future usefulness: First, the institution, organization, and initial success of the deaconess work; second, the origination and marvelous development of the Epworth League, with its almost unlimited possibilities for the spiritual training of our youth and the consequent strengthening of the entire communion when youthful vigor shall have grown into robust maturity; and, third, the birth of the American University.

To these latest-born children of the church—a trio of beautiful young life—the kindest, truest, and tenderest treatment is due. They all bear in their faces the spiritual lineaments of the mother who bore them, and they will each receive her prayerful blessing, her wealth of affection, and her generous provision for an assured future.

The first in this trinity of "Applied Methodism," the Deaconess movement, will become more and more the exponent of the church in her warm and practical sympathy with the poor, the sick, the prisoner, the unfortunate, the ignorant, the oppressed, and the mourning ones. The

second, the Epworth League, will find its legitimate and well-chosen mission in voicing to the hosts of our young people the hearty welcome of our church to all the spiritual, intellectual, and social activities involved in the Epworth "wheel." The third, and youngest of the group, The American University, is the organic embodiment of a long-cherished purpose to provide on an ample scale, in a central location, on a just and true basis, and with Christian and evangelical environments, facilities for the highest education of the most advanced students in America or from abroad in professional life, in special and original research.

ITS FIELD

of operation is a large and inviting one, and grows larger and more inviting with every passing year. From the forty thousand students in Methodist Episcopal schools alone, and especially from the six thousand students in our institutions of collegiate rank, comes every year a large band of our brightest and most cultured young men and women as graduates, seeking the best helps for their chosen lines of life. A few of this number tarry for a year or two at the schools where they have taken their first degrees and receive sympathetic and helpful assistance in post-graduate work from professors and instructors who are able and willing to take them to the higher sources of learning, but who are already burdened with the task of caring for the larger number in the collegiate courses, and who cannot with justice to their own health and the demands of their regular work give the time nor the enthusiastic energy required in the highest forms of study in special lines of inquiry. The larger number of our graduates who desire and seek a few years of special preparation for their career in life go either to some other American or more likely a European university to seek the instruction and facilities they need. And they find them; but under circumstances which often militate against social comfort and taste, against moral principle, and even against Christian character and faith.

The trend in American and in all education sets powerfully toward the higher learning. Unless the church shall make provision in some more adequate measure for the highest needs of her students, she is in danger of entering upon the twentieth century with the limp and gait of a cripple, not maimed in foot, but dim of eye and paralyzed in nerve.

Protestantism, and Methodism as the most vital and prolific branch of the Protestant family, are commissioned of Heaven to give such institutions to the world as beacons to those who sail the seas of thought and philosophy, and to keep them from the fatal rocks of error and reefs of doubt. This commission has thus far been fulfilled. With the increasing pace of progress in science and education the church must and will keep step—nay, more, she must prepare to be able and worthy to lead in this march of the human mind. She can take no wiser path than to build strong, broad and deep during this decade the foundations of the American University at the National Capital.

A. O.

THE UNIVERSITY THE DEFENDER OF THE FAITH. BY BISHOP C. H. FOWLER.

The Duke of Monmouth, on account of his assumption of royal prerogative, was beheaded by England's king. Years afterward, simple people were found in the remotest parts of the island who carried their right hand carefully wrapped, and refused to use it in any of the common occupations or salutations of life, saying, "Oh, no, I cannot put that hand

to common uses. It has grasped the hand of King Monmouth." So, to-day, I seem to myself like one of these simple folk from the remotest frontiers of the church, who years ago grasped the royal hand of the university, and since have felt that most other things were common and unclean. The university rises before me, a royal figure, and I am loath to look elsewhere for the scepter and the crown. My subject brings us face to face with all the great interests of the race. Food and shelter are prized by our animal nature, in common with the other animals beneath us, but culture and worship link us fast to shining ranks that reach above us, up to the eternal throne. The relation of the university to our faith involves every great question for which heroic souls have dared to die.

Such is the nature and constitution of the unregenerate mind that we must struggle either with superstition or with doubt. Sunk in ignorance and sluggishness, we are certain to deform our characters by our deformed conceptions of God. Awakened and thrown out into the universe to solve its vast problems, we stagger into doubt. We are compelled to choose between these oppressive alternatives. In this age, in this nation, in this church, we are practically shut up to meeting and mastering our doubts. The ignorance that fosters superstition is in too narrow a field, and too certainly fenced off from the range of our permanent labors to make our perils serious in that direction.

NEW AGE WITH NEW DUTIES.

We are entered into a new age in intellectual activity, and have new duties. There never were before so many heads at work in any nation as in this American nation. Reading, thinking, planning, speculating on all subjects, investigating, questioning are the common occupations of the great majority. Think of the printed pages that would carpet every street and highway in all our cities every month in the year. Count the hundreds of thousands of libraries, public and private, with literally tens of millions of volumes within hand-reach of our great people. Enumerate the common schools that stand like endless armies of veterans around every city, town, and hamlet. Passing up and down these long lines you can see the high schools, and academies, and seminaries, and colleges, the line officers who dress up and direct and inspire these vast hosts, while here and there, on the summits of society, stand the great commanders, the universities, who plan the campaigns and issue the orders for moving upward and forward.

ARMY OF TEACHERS.

It is difficult to adequately apprehend the United States school census. Let your mind take in, of this vast elevating system, the single item of teachers, 353,797, trained, qualified men and women who have passed examinations more or less thorough in quite a wide range of preparatory work. Neither Rome, nor Greece, nor Egypt, in all the glory of their wisdom, could furnish a single sage or philosopher who could pass the simplest examination to which these teachers have been subjected. What a host, 353,797! More than ten times as many as there were citizens of Athens when she ruled Greece and dictated law to mankind. Must they not be enrolled among the ruling forces of the country? More than thirty times the number of the immortal legion that under Xenophon cut its way through a continent of barbarians. Is it too much to expect them to help mightily in cutting a way through the continents of ignorance that are drifted to our shores? More than twelve times as many as there were soldiers in the army of Hannibal when he slid down the sides of the Alps into the plains of Italy, and made Rome shiver with mortal fear. May we not con-

fidently hope that this host of teachers will make Rome shiver again? More than fifty times as many as there were soldiers that followed Caesar over the Rubicon to the conquest of the world. Surely these trained legions must be counted in the rugged business of widening and strengthening the empire of thought and in subduing the world.

Now turn with me from this vast, brilliant, resistless force, and run your thoughts along the endless lines of enrolled pupils in the schools of the Republic—there they are: 12,382,080. This is only a formula; no finite mind can measure it. Four times as many as there were inhabitants in the thirteen colonies when our fathers won liberty for mankind on the fields from Lexington to Yorktown. Twice as many as all the great armies of the fighting nations on earth that preserve order to-day. Almost as many as there were English-speaking people in the world at the beginning of this century of enlightenment. Standing in this presence, nothing is impossible for liberty, for order, for civilization.

MORE IMPOSING COMPANY.

I see another company, not so vast, but more imposing—the colleges and institutions for higher and professional education—890, with their varied equipments—890 of the mills of God, that often seem to grind slow though they grind exceeding small—operated, worked by 11,273 professors and instructors, learned men and women, who bend their energies upon 138,902 students, seeking to make them meet for God's use in building a nation and a civilization. Such mills, such millers, such a grist, culled out of all the two and one-fourth billions of acres under our flag—2,292,086,547! Surely we must have much flour meet for the Master's table! We must see to it that it is made fit for the great wedding feast at the marriage of the King's Son.

POWER OF THE SUNBEAM.

Who can calculate the elevating power of all these workers? Look at that slender beam of light, one solitary ray stealing through the morning gloom and touching the heavy bosom of the earth! It is as silent as the foot-fall of a shadow. It is so feeble that a floating mote can almost resist it in the open air. Yet it comes with the authority of the sun, backed by the power of the universe; and see what miracles follow its touch, what voices answer its call, what anthems ring out on the gleam of its wand. The quivering pulse of life at its touch is seen in the dull bosom of the cloud. All the great forces of the universe swell and surge at the inspiration of its presence, and the hard grip of winter is relaxed; the brooklets leap out of their icy beds; the forests swing out of their coffins, shedding their white shrouds and donning the festal robes of bloom and beauty. Uncounted millions of tons of water are lifted up in the trunks of all the meadows and harvests and forests. The whole round of joyous life breaks forth in song and shout all the world over. A sunbeam does not seem worth much attention, yet it shows itself in league with the sun and all the forces of the universe. So with these higher forces. They do not seem much. Their voice is drowned in the din of the mart. Their value is obscured by the glitter of gold. Their beauty is concealed by the dust of the hurrying multitude. Their arduous greatness is forgotten in the transitory glory of popular idols, yet like the sunbeam they demonstrate their celestial birth and heirship.

SPELLING-BOOK AND NEW TESTAMENT.

A single spelling book and one copy of the New Testament dropped into a land will lift off millions of tons of ignorance and superstition. They will widen the streets of every city, pile up the palaces of trade in every mart,

lift the roof of every poor man's cottage above the stars. They drive the gods and demons from every forest's depths and from every mountain's solitude. They take the wrath from the lightning, and putting the bit in his fiery teeth drive him in a willing errandry. They reclaim every acre of earth and every yard of air from the domain of fear, and attach them to the peaceful patrimony of the race. With such a host of industrious, restless, fearless workers, armed with telescope and microscope, with spectroscope and retort, lifting the earth up and pulling the stars down, quenching the literal fires of Gehenna, and storing up the fires of the sun, holding great nature as an indulgent mother, stealing her secrets without fear of reprimand, and lighting their way into new discoveries with the burning mummies of ancient gods—with such a host of workers turned loose in our doorway there is but one course left open to us; that is to continue in the universal search for truth and secure our share of the rewards, do our part of the work and receive our part of the wages. Nature is no respecter of persons. She has no prejudices against saints. She offers her secrets and her rewards to all alike. She keeps a one-price store. Whoever puts down upon her counter the price takes the goods. We enter an open mart to compete in the business of stamping an image and superscription on the mind of this age. This mind comes into the mart ready to be impressed. Secular ideas, worldly convictions, will have the right of way and stamp the coming generations with the attractive impress of worldly indifference and scientific skepticism, unless we are in the mart equipped with scholarship, with science, with breadth of views, with quietness of soul, with winsomeness of character, with the splendor of heroism, with the magnetism of sacrifice, to resist every advance of skepticism and claim the soul of the age for our God, that we may put upon it the image and superscription of His Son.

[TO BE CONTINUED.]

WHY SHOULD THE METHODISTS BUILD THE AMERICAN UNIVERSITY.

BY JOHN E. SEARLES, JR.

In the first place, because of its representative character. It is proposed that this institution shall be representative, not only of the highest order of education, but also of the best forms of Christian thought and activity, and clearly expressing the faith and doctrines which are the staples of the Christian religion. By whom then should it be espoused and controlled, if not by that church which, not only in point of numbers and influence, occupies the front rank, but whose doctrines and methods, as we heard the other day in the Episcopal Address, "once greatly opposed, have so approved themselves to our sister denominations as to be extensively embraced and practiced by them, greatly to their advantage in religious power and usefulness"? It is, therefore, fitting beyond question that to the representative church of America should be confided the building and endowment of this great and representative Christian institution of learning. Broad-minded Christian men of every name will gladly co-operate, but to the Methodist Episcopal Church they look for leadership.

THE METHODIST CHURCH NEEDS THIS UNIVERSITY.

Born in a university, the greatest of its day, the highest order of learning and culture was utilized for the founding of this great church, and because of that culture its foundations were laid so broad and deep that they have proved sufficient for the superstructure which is alike the wonder

and admiration of the century. But, because Methodists went out into the highways and hedges, seeking souls among the illiterate and poor, and, for the work of the hour, in the absence of better material, utilized as preachers men whose only qualification was the love of Christ in their hearts and a burning zeal to tell to others the story of their salvation, there came to be prevalent the idea that little importance was attached to the value of education by the Methodists in their ministry or among their membership, notwithstanding the many brilliant exceptions that were admitted to exist here and there.

All this is changed. The legitimate fruit of Methodism has appeared, and it is seen that the gospel, as preached by this church, involves the uplift of all its members, better homes, higher aspirations and an ever-increasing desire for higher educational facilities, so that the records of our Board of Education show that the number of our colleges and universities has nearly trebled in the last twenty-five years. But we are now, as I believe, on the eve of a new movement toward higher education, which will be a great surprise to the church, and that largely by reason of certain new factors which have come into the field during the last twenty years, and the influence of which has not yet been felt.

THE EPWORTH LEAGUE.

Now, sir, let us add to this the influence of the Epworth League, for if the league shall preserve, even in a modified degree, the literary character of the Oxford League from which it sprang, this will be an added power in leading our young people up to the craving after an education, which word has now come to stand almost universally for a college course of study. Now, what is the relation of all this to the American University? I answer, that the proper equipment of the ever-multiplying colleges which will be demanded for the Methodist youth of the future, with thoroughly qualified instructors, makes the university imperatively necessary; and where shall we go for presidents and professors for our institutions if we do not provide the university for their equipment and training? The Episcopal Address put the case none too strongly when it stated concerning our ministry, "Our educated pews will not long endure an uneducated pulpit. We must meet the demand for an educated pulpit. No man should be permitted to fill the theological chair who is not abreast of the best scholarship of our time." But pray tell me how are these chairs to be filled with men of broad scholarship and sound doctrine unless we provide the university for their preparation?

RALLYING POINT.

But again we need this great university in the interests of denominational unity. This great American University is to be the rallying point of the Methodist family of this country in all its branches, and will, as I believe, inevitably lead to the organic union of the church. Our educated men are the leaders of the church, and the bringing together of such men means the bringing together of the church. Already the educational representative of our sister in the South has expressed her interest in and willingness to support this great institution, and we have only to move in the matter, and move strongly, to bring to our side all our brethren. The ability of our people is increasing in even larger ratio than our membership, and I have great faith that any undertaking which commends itself, as this will, to the heart of the church, will be carried through to a grand success.

Let us then speed on the good work,

LELAND STANFORD, JR., UNIVERSITY.

BY EX-PRESIDENT ANDREW D. WHITE.

From the Christian Advocate.

As is well known, this University was founded by Governor Leland Stanford in memory of his only son, who died some years ago at Florence. I can well understand the devotion of Mr. and Mrs. Stanford to so beautiful a memory. Shortly before his death I met the youth, and was greatly impressed by the nobility of his character; a strong mind and high purpose were evident in all his utterances and conduct. Sad indeed seemed that untimely loss, and yet few lives have been more effective than his, for it has inspired this work, which there is every reason to hope is to be one of the greatest benefactions in the history of our country, and a noted contribution in the higher evolution of man.

The first endowment act for the institution was passed in 1885, and ever since that time Governor and Mrs. Stanford have been steadily but quietly at work, taking counsel of those who might aid them in perfecting plans and laying foundations. In the original grant there was first dedicated as an endowment fund a productive landed property containing over eighty-five thousand acres, or more than one hundred and thirty three square miles, among the best improved and most valuable lands in the State. This serves as a substantial basis, but it is merely a beginning; in addition to it there have been already expended sums mounting among the millions for buildings and endowment, and the income of six millions has been placed at the disposal of the president for carrying on the university at its beginning.

In its situation it is especially happy. It stands in the midst of Santa Clara valley, within easy railway communication with San Francisco at a distance of about thirty miles, and in the neighborhood of some of the most suburban villages in California. The estate devoted to the immediate uses of the university, and which may be considered as its campus, embraces more than thirteen square miles. Nothing can be more beautiful in its way. The valley lies not far from the sea, but framed in by hills, which at this season of the year are covered with rich verdure to their summits; while in the distance are mountains that give dignity to the whole view; and on one of them, easily seen on a clear day, though at forty miles' distance, is the Lick Observatory on Mount Hamilton, in itself one of the wonders of the world. The whole valley is diversified with groves of live oak and evergreen forests, and dotted with the pleasant villages and country residences of San Francisco men of business. In the midst of this great estate have been placed the first buildings, and they are well worthy the attention of men interested in university architecture, not only in this country, but in others. Certainly no more perfect and beautiful plan has ever been adopted by any institution, and none has been carried out, so far as it has gone, with greater fidelity. Knowing, as I do, almost every university of importance in our own country, I do not hesitate to say that the section of the plan already carried out is far finer than anything which has yet been achieved in any other part of the United States. The great interior quadrangle or court of the university must always rank among the nobler specimens of architecture in the world. The original germ of its plan was found in the old Spanish architecture of this region, but this has been developed, perfected, and indeed idealized. This court of three and a half acres is surrounded by columns of a rich, cream-colored stone with well carved capitals, bearing broad, massive stone arches, upon which rest the walls and roofs of the surrounding buildings. All about

this court runs a broad ambulatory flagged with stone in two colors, and opening into wide-columned passages leading to the various laboratories, libraries, and lecture rooms, as well as to the inner courts, and to various parts of the grounds. The great central court itself is adorned with spacious beds of semi-tropical plants, while here and there luxuriant vines climb the columns and spread over the walls. Walking through these massive archways and along these extended and spacious corridors one can imagine himself in Granada, or in some of the more beautiful conventual buildings of Italy. Down the long vistas and under the arches he catches glimpses of the outer world, and everywhere it is a world of beauty. It is only at the hours when the great body of students is hurrying to and fro between lecture room, laboratory, and libraries that this illusion is dispelled. Further development of this great central group of buildings is soon to begin, and the large outer rows of buildings for libraries, museum of natural history, and auditorium will be fully under way before the beginning of the coming year. Already two great dormitories, one for men and the other for women, have been erected, one on either side; and at right angles with these, in accordance with the original plan, Mrs. Stanford has erected an art gallery, which is far more extensive and beautiful than any as yet reared in connection with any other American university. It has fourteen main halls, besides the great entrance room containing the main staircase, lined and decorated with rich marbles. This, too, is very elegant in its architecture, and adorned with colossal statues in marble, and with doors in sculptured bronze.

In order to provide for the increasing number of students, temporary buildings have already begun on an extensive scale at the rear of the main quadrangle. Some twenty or thirty cottages have also been erected for the members of the faculty. The general equipment is worthy of these surroundings, and most valuable machinery and apparatus of all sorts are in place on every side, and all this is rapidly increasing.

As to the faculty, President Jordan is developing more and more the qualities that led to his election, the same which were recognized when he was a student at Cornell, an investigator at the Smithsonian Institution, and President of the University of Indiana. He has already gathered about him a faculty of about forty vigorous men, and it is constantly increasing. His plan evidently is to choose young men who have a reputation to make and can make it. Many of us in Eastern colleges know to our cost how keen is his eye in selecting and attracting just those whom our institutions would most gladly retain. I have been struck with the intellectual vigor and earnestness of these young professors as I have discussed university matters with them, or seen them at work with their classes, and am prepared to see this faculty become, not only one of the largest, but one of the most influential in the United States. The students, too, have greatly interested me. I remember that the question was asked, when Governor Stanford's proposal was first made, "Where is such an institution to get students?" That question is answered. Over five hundred are now in attendance, and the cry is "Still they come." The great majority, of course, are from the Pacific coast, but a very considerable number have come from our side of the mountains. There is a spirit of devotion to work among these young men which argues well for the future of the institution. Nearly every day for a month I looked into the faces of about three hundred of them, and during that time I lived with a still larger number at the college dormitory, and found them in their whole spirit and conduct worthy of the benefaction they are receiving.

Educational Notes.

Thirteen women have given \$225,000 of the last million raised for the Chicago University, Mrs. Mary Beecher contributing \$50,000 of this amount.

Miss Mary Gwendolen Caldwell has given more money to the Catholic Church than any other woman now living in America, and has received a special gold medal from the Pope.

The leading universities of the country (omitting the Stanford, of which no accurate estimate can at present be given) in order of wealth are: Harvard, \$10,000,000, approximately; Columbia, Cornell, Chicago, Yale and Johns Hopkins or Princeton. England, with 94 universities, has 2,723 more professors and 51,814 more students than the 360 universities and colleges in the United States. The revenues of Oxford and Cambridge represent a capital of about \$75,000,000. The university of Leipsic is worth nearly \$20,000,000.—*Michigan Christian Advocate.*

Two more colleges are added to those which have opened their doors for the admission of women—Tufts College, Mass., and Brown University, R. I.; the former, under the auspices of the Universalists, and the latter, one of the Baptist institutions of high grade. President Andrews, of Brown, calls for half a million dollars for the Woman's Department of the University, in order that the girls shall have just as good a chance as the boys in all the advantages and facilities of the institution. It is but a few years since hardly a college in America offered equal facilities for education to men and women; now there is hardly an institution—except the colleges for women only—that has not opened its doors to both sexes. The facilities afforded by Oxford and Cambridge, and by the higher institutions in London, in the same direction, are phases of the question that are worth noting also. In this connection it is further worthy of record that Indiana Asbury University, now De Pauw, when Bishop Bowman was president, was the first Methodist college to institute co-education.—*Central Christian Advocate.*

Literary Notices.

In the *Scottish Review*, Paisley, for July, C. T. H. Wright has an article on "Russian Universities."

"Education in Germany" is the title of an article in the August number of the *Westminster Review* written by F. Reutter.

H. von Helmholtz writes in the *Deutsche Rundschau*, Berlin, for July, on "Goethe's Predictions of Future Discoveries in Natural Science."

The *Educational Review*, London, for August, has a paper from Sir M. E. Grant Duff on "Geographical Education and the Royal Geographical Society."

A very interesting and profitable discussion of an important subject is that by Professor William James, of Harvard, on "What Psychological Research has Accomplished," which appeared in the August *Forum*.

The *Century* announces the immediate publication of a

series of important letters which passed between General W. T. Sherman and his brother, Senator John Sherman, giving an inside view of certain interesting periods and events in American history, and marked by a candor and vigor of expression characteristic of their distinguished authors. The letters are printed by arrangement with Senator Sherman and the heirs of General Sherman, and with notes by Mrs. Rachael Sherman Thorndike, the General's daughter.

FROM THE FIELD.

From a large number of cheering notes coming to us from all over the country, we have room only for three, one from a minister, one from an educator and one from a lawyer.

NEW YORK CITY, September 13, 1892.

UNIVERSITY COURIER:

I send fifty cents for the *COURIER*. I believe in the American University. As chairman of the committee on education in the New York Conference I penned the original resolution commending the enterprise.

I will gladly take the collection in my church in October. I hope to lend a helping hand before the battle is over.

Let the enterprise be pushed with vigor.

I am very truly yours,

EZRA TINKER.

BOSTON, August 8, 1892.

MY DEAR DOCTOR GRAY: Having in hand an effort to raise \$2,000,000 the present year for Boston University, I am in perfect sympathy with you in your like noble work, and I sincerely hope the church and Christian public will give us both success.

As ever, your friend and brother,

WM. F. WARREN.

We hope that the Boston University will more than realize its fondest hopes.

MARYVILLE, Mo. September, 15th, 1892.

THE UNIVERSITY COURIER, Washington, D. C.

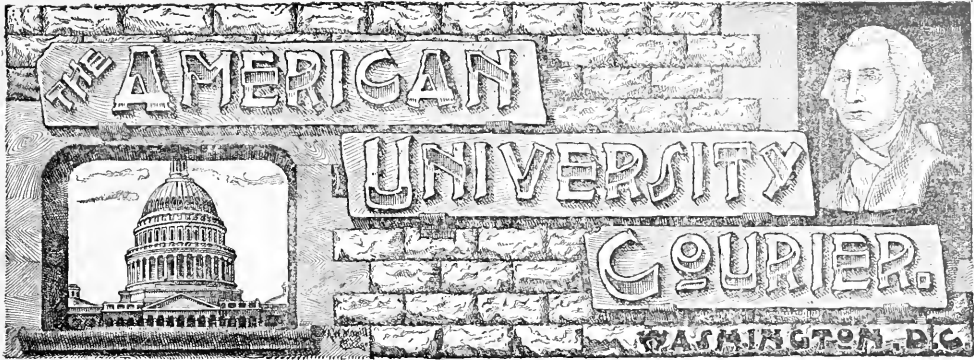

EDITOR:

In looking over No. 1, Vol. 1, THE AMERICAN UNIVERSITY COURIER, which has been sent me by some friend of the *greatest educational enterprise of Methodism* if not of our country, my attention was fastened to the article "Lincoln Hall" on fifth page. It seems to me that no better method of commemorating the pure, wise, tender, true, and patriotic Abraham Lincoln, than the building of an Administration Hall of the American University, and the Methodist Church, having been so universally in sympathy with the great War President, and he with that church, no other organization could more appropriately thus commemorate him. I want to be one of the 500,000 in this enterprise. I could not if this appeal had overreached the poor. I enclose \$1 herein, and on the enclosed law card, the matter for enrollment with my name in the University Register.

Very truly,

IRA K. ALDERMAN.

FIVE MILLIONS FOR THE AMERICAN UNIVERSITY.

Donations have been received upon each of the following propositions:

1. The young people of the Church under the leadership of the Epworth League, Christian Endeavor, and other young people's organizations, to raise \$500,000 to build an **Epworth Hall** and endow an **Epworth Professorship**.
2. \$500,000 to be raised by a donation of one dollar each to build the **Administration Hall** in honor of and to bear the name of **Abraham Lincoln**.
3. 5,000 preachers to give one hundred dollars each to build an **Asbury Hall** and endow a series of **Lectureships** in the interest of profound research in Christian Theology.
4. 5,000 persons to give one hundred dollars each to endow a **School of Discovery**.
5. One hundred persons to give \$10,000 each to establish one hundred **Fellowships**.
6. 1,000 persons to give \$1,000 each for the **General Fund**.
7. \$1,000,000 to be raised by the women of the country organized into the American University Leagues under the leadership of **Mrs. John A. Logan**.

Important.—Please forward your collections as soon as possible, stating in each case to which fund it is given.

Address all communications to—

Our Country's Martyr.

DR. THOMAS COKE CARTER'S ILLUSTRATED LECTURE ON ABRAHAM LINCOLN.

Dr. THOMAS COKE CARTER, of Washington City, is soon to deliver throughout the country his unique and thrilling lecture on the life, characteristics, achievements and martyrdom of Abraham Lincoln. Every important event in the sublime career of the murdered President will be illustrated by photographic views thrown on the canvas under the powerful light of the stereopticon. These views have been prepared by the foremost artist of Washington, and will add a special charm and interest to the word pictures of the lecturer.

Dr. Carter is one of the most fluent and eloquent speakers on the American platform, and his best gifts are called out by the splendid theme of this lecture. Churches, Epworth Leagues, Colleges, Lyceums and Lecture Committees desiring to secure the services of Dr. Carter will please address

MARTIN N. EVANS, Manager,
222 13th St. S. W., Washington, D. C.

For Girls and Young Ladies.

A MODERN HIGH GRADE

BOARDING AND DAY SCHOOL.

MOUNT VERNON SEMINARY,

1100-1104 M St. and 1124-1128 11th St.

EIGHTEENTH YEAR OPENED OCT. 4, 1892.

Thoroughly equipped in all departments. Special advantages in Literature, French and German and Music.

A Home in which students have rare advantages for special training and experience.

Hygiene, sanitation and physical comforts of the most approved modern kind.

Editorial.

THE next issue will contain an article from Prof. Learned, of Johns Hopkins University, giving as full an account of that institution as the space will permit. This will be a valuable addition to the discussion of university training in this country.

UNDER the taking caption "What I would do if I could" in the *Epworth Herald*, Dr. Joseph F. Berry says: "I would build yonder on the hill at Washington a cluster of university buildings that would be the pride of Methodism for centuries to come."

AMONG the interesting associations recalled by the Encampment of the G. A. R. in our city, is the fact that Fort Gaines, built during the civil war, occupied a portion of what is now the site of the American University. In the conflict for the supremacy of American principles and of American ideas in the educational work of the nation the American University has a field as important in our day as did Fort Gaines and other fortresses and their brave garrisons in the early sixties.

IN the first number of the COURIER we published some educational statistics taken from a statement prepared by Professor Norton, of Cornell College, Mt. Vernon, Iowa, which the *Christian and Northern Advocate* thought were incorrect. The following letter from Professor Norton needs no explanation:

I notice that the *Christian Advocate* of last week disparages, and the *Northern* controverts, the statistics of collegiate attendance you publish in the welcome UNIVERSITY COURIER, No. 1, page 13. The statistics in their original form, which I inclose, are entirely correct. They refer, as they plainly state, only to the students in college classes. Their critics seem to suppose that the phrases *college students* and *students in college classes* mean the total attendance and include students in conservatories and business colleges, in preparatory departments and professional schools. I am responsible for the statistics, though not for their publication in our papers. I had other use for them—and will vouch for their accuracy. Very respectfully,

WM. H. NORTON,

Professor of Geology, Cornell College.

THE leaders of the twentieth century will come from the University. If the Methodist Church holds her place in the van guard of advancing civilization she must put her molding influence upon the men of thought and action of that period. Great questions must be settled within the coming century. The study of economic relations, political institutions and the various forms of sociology cannot be longer delayed. We can now determine the arena of this discussion. It should be the Christian University—patriotic and protestant.

DR. BASHFORD in his address before the Central Ohio Conference stated that Dr. Harper, chancellor of the Chicago University, said to him that "he had found his best trained men for the university among the graduates of Methodist colleges."

This should encourage us to more vigorous effort to push the standard still higher. While the Methodist Church has ever been the church of the people, it has always had within it the progressive spirit. If we maintain our position we must do that which will make us worthy of it.

WE visited Madisonville, Ohio, October 16, and presented the interest of The American University. The result was a collection and subscription of \$500.00. The people are ready to give if they understand the spirit and scope of this great movement. Captain Peabody, Vice-President of the B. & O. R. R., and leader of the church choir, pledged for it \$100 to part of the endowment of the College of Music to be a part of the University. We ought to have at least one thousand such pledges. Let the choirs of the country respond. Who will be the next?

IN the biographies of eminent scholars, it is curious to observe how many indicated in youth pre-eminent ability. Isaac Casaubon, whose name in the sixteenth century shed lustre on the learned circles of Geneva, Montpellier, Paris, London and Oxford, began as professor of Greek, at the age of twenty-two; and Heinsius, his Leyden contemporary, at eighteen. It was at the age of twenty-eight that Linnaeus first published his *Systema Naturae*. Cuvier was appointed a professor in Paris at twenty-six, and, a few months later, a member of the Institute. James Kent, the great commentator on American law, began his lectures in Columbia College at the age of thirty-one.

Henry was not far from thirty years of age when he made his world-renowned researches in electro-magnetism; and Dana's great work on mineralogy was first published before he was twenty-five years old, and about four years after he graduated at New Haven. Look at the Harvard lists:—Everett was appointed Professor of Greek at twenty-one; Benjamin Peirce, of Mathematics at twenty-four; and Agassiz was not yet forty when he came to this country. For fifty years Yale College rested on three men selected in their youth by Dr. Dwight, and almost simultaneously set at work; Day was twenty-eight, Silliman twenty-three, and Kingsley twenty-seven, when they began their professional lives. The University of Virginia, early in its history, attracted foreign teachers, who were all young men.—*President D. C. Gilman.*

The difference between a great act and a small one is *persistency of effort*. There are hundreds of people who can and do give a thousand dollars to some enterprise. If such a person should persist in giving \$1,000 a year for ten years he could establish a Fellowship in The American University that would secure to some bright devoted Christian man or woman the opportunity of profound research which he can never enjoy without such help. Some John Wesley or some Hypatia might be all the while in training for leadership in the world's great conflict. Think of it. It is worthy of your highest and noblest ambition.

PRESIDENT D. C. GILMAN says: "The object of the University is to develop character—to make men. It misses its aim if it produces learned pedants, or simple artisans, or cunning sophists, or pretentious practitioners. Its purpose is not so much to impart knowledge to the pupils, as to whet the appetite, exhibit methods, develop powers, strengthen judgment, and invigorate the intellectual and moral forces. It should prepare for the service of society a class of students who will be wise, thoughtful, progressive guides in whatever department of work or thought they may be engaged."

It is said that Mrs. Warren received her inspiration to build a theological school while on her knees in prayer. It came to her that if she could spend \$15,000 for a stone monument for her deceased husband she ought to give \$50,000 to educate young men for the ministry. She has given over a hundred thousand dollars and the work goes on. This may reach some one who is inquiring how to build a monument not of stone but of lives.

A gift of \$10,000 to the American University will secure a permanent Fellowship for some young man or woman of energy and purpose to pursue special training for some special field of usefulness. Such

a gift in its first century will aid one hundred of the brightest and best that our colleges may afford. It will then be as powerful for good as at the beginning. "Take it to God in prayer."

THE California Conference has heartily indorsed the American University and pledged its support. We may expect this Golden State, noted for noble generosity, to show its faith by generous works. Dr. Hancock presented the interests of the American University to the Trinity M. E. Sunday School, Denver, Col., Sunday, October 16, and was assured by its officers that it should be heard from in the near future. This great school of nearly 700 in that magnificent city of the mountains can do great things. Whenever people hear of this latest and most important movement of the church it strikes a responsive chord in the heart.

GENERAL RUSSELL A. ALGER, of the Grand Army of the Republic, writes: "The effort to erect a Lincoln Memorial Hall in Washington ought to have the indorsement and support of every American citizen."

FOUR GREAT FACTS AND TWO GREAT QUESTIONS.

1. The United States Government has now invested in its various bureaus and departments in Washington, including libraries, museums, collections, appliances, buildings, etc., useful and largely necessary for the purposes of higher education the magnificent sum of thirty-three millions of dollars (see p. 33)..... \$33,000,000
2. The United States Government appropriated the last fiscal year for the maintenance and increase of the same three million three hundred thousand dollars, a sum equal to the income arising from a productive endowment of sixty-six million dollars (see p. 34).. \$66,000,000
3. The United States Government thus furnishes gratuitously for the encouragement of true university work a grand total of ninety-nine million dollars..... \$99,000,000
4. By act of Congress at its last session this vast array of classified helps was declared open for the use of all students in the higher institutions of learning now, or hereafter to be, located in Washington.
 1. Shall these treasures continue to be the mere objects of idle and gaping curiosity to a sight-seeing public, and only a handful of specialists avail themselves of the rich privileges here offered? or—
 2. Shall we, as grateful citizens and patriots, each one to the extent of his ability and opportunity, help

to establish the American University, and thus utilize these accumulated and ever-growing materials by bringing the alert minds from every State in the Union to a thorough and scientific study of them and of the departments of knowledge to which they relate?

JOHNS HOPKINS UNIVERSITY.

This great school of learning is located in the heart of Baltimore. It was established by the munificence of Johns Hopkins, Esq., a merchant prince of that city, who bequeathed to it three and a half millions of dollars. He also gave a like sum for the erection and endowment of a twin institution in his thought and heart, the Johns Hopkins Hospital, located on the eastern heights of the same city. The two corporations will in time become one, as the desire was expressed by the founder that the Medical Faculty of the University, when organized, should have supervision of the Hospital. The University was incorporated six and a half years prior to the death of Mr. Hopkins, viz., August 24, 1867. The election of a president—Dr. Daniel C. Gilman—occurred in December, 1874. He traveled in Europe in 1875, conferring with many leaders of university education in Great Britain and visiting many important seats of learning. The plans of the University were formulated the winter following, and the Inaugural Address of the President was delivered February 22, 1876, the birthday of the great Washington and the Centennial year of American Independence. The following are the principal buildings now in use:

- (1) A central administration building, in which are the class-rooms for classical and oriental studies.
- (2) A library building, in which are also rooms devoted especially to history and political science.
- (3) A chemical laboratory well equipped for the service of more than a hundred workers.
- (4) A biological laboratory, with excellent arrangements for physiological and morphological investigations.
- (5) A physical laboratory—the latest and best of the laboratories—with excellent accommodations for physical research and instruction.
- (6) A gymnasium for bodily exercise.
- (7) Two dwelling houses, appropriated to the collections in mineralogy and geology until a suitable museum and laboratory can be constructed.
- (8) Levering Hall, constructed for the uses of the Young Men's Christian Association, and containing a large hall which may be used for general purposes.
- (9) Smaller buildings used for the smaller classes.
- (10) An official residence of the President, which came to the University as a part of the bequest of the late John W. McCoy, Esq.

The library of the University numbers nearly

45,000 well selected volumes—including "the McCoy library" not yet incorporated with the other books, and numbering 8,000 volumes. Not far from 1,000 periodicals are received from every part of the civilized world. Quite near to the University is the library of the Peabody Institute, a large, well chosen, well arranged, and well catalogued collection. It numbers more than one hundred thousand volumes.

The University has extensive collections of minerals and fossils, a select zoological and botanical museum, a valuable collection of ancient coins, a remarkable collection of Egyptian antiquities (formed by Col. Mendes I. Cohen, of Baltimore), and a bureau of maps and charts.

The total number of students enrolled from 1876 to 1891—fifteen years—has been 3,906, which includes both collegiates and post-graduates.

As yet only the Faculty of Philosophy has been organized, whose instruction comprehends mathematics, ethics, history, and science. The Medical Faculty will not long be delayed. That of Jurisprudence will also come in time. That of Theology is not now proposed.

The names of the professors in the Faculty of Philosophy from 1876 to 1890 are as follows, arranged in the order of their appointment:

- 1876—Basil L. Gildersleeve, LL. D., Greek.
- 1876—J. J. Sylvester, LL. D., Mathematics.
- 1876—Ira Remsen, Ph. D., Chemistry.
- 1876—Henry A. Rowland, Ph. D., Physics.
- 1876—H. Newell Martin, Sc. D., Biology.
- 1876—Charles D. Morris, A. M., Classics (Collegiate).
- 1883—Paul Haupt, Ph. D., Semitic Languages.
- 1884—G. Stanley Hall, LL. D., Psychology.
- 1884—William H. Welch, M. D., Pathology.
- 1884—Simon Newcombe, LL. D., Mathematics and Astronomy.
- 1886—John H. Wright, A. M., Classical Philology.
- 1889—Edward H. Griffin, LL. D., History of Philosophy.
- 1891—Herbert B. Adams, Ph. D., Amer. and Inst. History.
- 1891—William K. Brooks, Ph. D., Animal Morphology.

The persons below named have been appointed associate professors, and their names are arranged in the order of their appointment:

- 1883—Herbert B. Adams, Ph. D., History.
- 1883—Maurice Bloomfield, Ph. D., Sanskrit and Comp. Philology.
- 1883—William K. Brooks, Ph. D., Animal Morphology.
- 1883—Thomas Craig, Ph. D., Mathematics.
- 1883—Charles S. Hastings, Ph. D., Physics.

- 1883—Harmon N. Morse, Ph. D., Chemistry.
 1883—William E. Story, Ph. D., Mathematics.
 1883—Minton Warren, Ph. D., Latin.
 1884—A. Marshall Elliott, Ph. D., Romance Languages.
 1884—J. Rendel Harris, A. M., New Testament Greek.
 1885—George H. Emmott, A. M., Logic.
 1885—C. René Gregory, Ph. D., New Testament Greek.
 1885—George H. Williams, Ph. D., Inorganic Geology.
 1885—Henry Wood, Ph. D., German.
 1887—Richard T. Ely, Ph. D., Political Economy.
 1888—William T. Councilman, M. D., Anatomy.
 1888—William H. Howell, Ph. D., Animal Physiology.
 1888—Arthur L. Kimball, Ph. D., Physics.
 1888—Edward H. Spieker, Ph. D., Greek and Latin.
 1889—Louis Duncan, Ph. D., Electricity.
 1890—Fabian Franklin, Ph. D., Mathematics.

The wisdom of the appeal for ten millions of dollars for the endowment of the American University is readily appreciated by the Trustees, Faculty, and patrons of the Johns Hopkins University, who, having started with three millions and a half have been working for fifteen years without reaching beyond the organization of the Faculty of Philosophy. To go slow is good common sense in a great undertaking; but the President of Johns Hopkins and his admirable Trustees have to build slower than they thought and frequently impress the need of larger funds upon the public. Their proximity to Washington is a great assistance in the work of original investigation and discovery.

Mr. Asa C. Hill, a member of G. A. R., in Washington, has taken one of the Lincoln Souvenirs which we give to each one giving a dollar to the Lincoln Hall, and has had a gold band put around it so as to hold on each side a watch crystal. This protects the medal from dust and makes a beautiful pocket piece.

THE EPWORTH LEAGUE AUTOGRAPH ALBUM.

We are preparing to send to every Epworth League in Methodism properly ruled sheets of paper upon which the name and address are to be written by each member of the League giving one dollar or as many names as there are dollars given by the League. These sheets are to be returned to the office in Washington and will be bound in volumes bearing the title of The Epworth League Album of the American University. These will be kept in the Epworth Hall, which the money given is to build. The paper is to be the best quality of bank paper and the names written with the best of ink. This probably will be

the most remarkable autograph record ever made. We hope it will be a complete list of each league, with such definite information in the column of remarks as to make it invaluable. These sheets will be sent free to any league writing for them. In writing, state the number of members, so that we will be sure to send you sufficient to enroll the entire membership of the league. In addition to this, each donor will receive the beautiful Epworth League Certificate.

THE LEAGUE AND THE UNIVERSITY.

Epworth will reinforce our educational institutions. The leagues are so many recruiting stations for the denominational and orthodox schools. President Eliot of Harvard is reported to have said in one of his recent addresses in California that denominational schools were dying at the root, and that the future would have nondenominational schools alone; that is, state and liberal schools. He is entirely in error. We are not drifting toward a refined paganism. This great religious movement among the young people means a revival of Christian education. Christianity stands at the very threshold of every school. "Behold, I stand at the door and knock" is true of institutions as well as of individuals. The negative education has *begun to die at the root*. The Epworth Leagues form a sort of cordon about the great American University at Washington.—*Epworth Herald, October 22*.

The following action was taken by the State Convention of the Epworth Leagues of Iowa in Oskaloosa, October 27:

Resolved, First, That we, Epworth Leagues of Iowa, recognize in the action of the recent General Conference in Omaha, designating the American University as the only object for the gifts of the Methodist Episcopal Church during the Columbian year, as the crowning work of our educational system.

Second, As the young people of today are to be the church of tomorrow, and the Epworth League is rapidly becoming the organized force of the young people of the Methodist Episcopal Church, we see in this a Providential call to action, and assure the founders and managers of this projected institution of our hearty sympathy and co-operation, and invite all the young people of Methodism to join us in assisting to make it worthy the closing decade of the nineteenth century and capable of meeting the highest educational demands of the age.

Third, That we believe the young people of our Church should provide at least \$500,000 of the \$10,000,000 asked for this grand and worthy object; and we recommend that each chapter shall hold at least one service during this Columbian year, at which the interests of the University shall be presented and an effort made to provide funds.

The above action was taken with perfect unanimity, and much enthusiasm was manifested pending the action. Evidently the institution is on the heart of the Church, and none are more enthusiastic than the young. It is safe to say the young people can be counted on to do their part. They are anxious to get all the facts and suggestions to aid them.

Contributions.

WHAT IS A LIBERAL EDUCATION?

BY J. M. BUCKLEY, D. D.

President Gilman, of Johns Hopkins University, some months ago defined a liberal education. We are not certain that the report printed at the time does him justice; but if not, it is a fine summary. "The powers of a man of liberal education must be attention, concentration and analysis. He must have the power of arranging as well as retaining his knowledge, and be able to express it for the benefit of others. The culmination of all these powers is good judgment. His knowledge should consist of the workings of body and mind, and should include not only an understanding of his mother tongue, its history and capabilities, but of at least two other tongues; and with scientific learning should be combined a knowledge of the literature of the world, together with universal history and political economy." Therefore he held that the groundwork of a modern liberal education should be mathematics, languages (ancient and modern), history and political science in all their phases and philosophy, with due attention to physical culture, without which it would not be possible to acquire such extended knowledge.

We have reproduced this because it appears to present the subject in due proportion. With the honor conferred upon physical science we are in full sympathy. With the prevalent relative disparagement of languages, especially ancient, we have no sympathy.

Mathematics, too, is slighted: it has not been long since we heard an alumnus of one of the most advanced colleges derying the time spent in the study of mathematics. We attribute much of the general prevailing feebleness of mental grasp, inexactness of statement, and vagueness and incoherence of conclusion to a neglect of mathematical studies. There is no practice so well adapted to qualify a man to write and speak well as the translation of Latin and Greek classics into his mother tongue, whether that tongue be French, German or English.

When it is considered that three-quarters of professional and scientific terms are derived from those languages, that in accurate translation the comparison of the words of one's own tongue must be constantly made to obtain the best, and that, if as far as possible the translation is made into the original words of his own tongue, the student becomes possessed of a knowledge both of the Greek and Latin derivatives that are incorporated with his vernacular and their equivalents in the latter, that man seems to us an intellectual weakling or views the subject askance who recommends anyone desiring a liberal education to ignore the ancient languages.

Through the plausible sophistries of a friend the writer in the "real period" was led into such an opinion, but the necessity of enlarging a limited vocabulary to avoid wearisome repetitions soon taught him better.

Our advice, therefore, to all young men is to take a full college course, giving greater attention to what taxes the mind most, and to what they like least, and thus carry out President Gilman's further prescription, "to get as great an amount of liberal education as possible between the work of the school-boy and the work of the professional man." Such, too, should be the course of the business man, who, if successful, will be raised to a position where the ability to express himself on important occasions by speech or pen may be of immense advantage.—*Christian Advocate*.

GOVERNMENT AID TO HIGHER EDUCATION.

LETTERS FROM MAJOR J. W. POWELL.

[Director of U. S. Geological Survey.]

(L.)

ESTIMATED VALUE OF GOVERNMENT SCIENTIFIC COLLECTIONS.

DEPARTMENT OF THE INTERIOR,
UNITED STATES GEOLOGICAL SURVEY,
WASHINGTON, D. C., March 31, 1892.

DEAR SIR:—In compliance with your request to furnish you with an estimate of the libraries, museums and other appliances available for a university of higher education in Washington, D. C., and which can be used under proper conditions for the purposes of a National University of high order, I have the honor to state as follows:

A careful investigation of the subject has been made and the conclusions reached have been submitted for criticism to others engaged in the various bureaus of the United States, and as a result of this conference it has been concluded to report as follows:

1. Library of Congress.....	\$8,500,000
2. National Museum.....	6,500,000
3. Patent Office.....	5,500,000
4. Bureau of Education.....	200,000
5. Bureau of Ethnology.....	200,000
6. Army Medical Museum.....	1,500,000
7. Department of Agriculture.....	3,000,000
8. Fish Commission.....	1,000,000
9. Botanic Gardens.....	1,250,000
10. Coast and Geodetic Survey.....	1,500,000
11. Geological Survey.....	1,500,000
12. Naval Observatory.....	1,835,000
Total.....	\$32,485,000

All of the above materials are of such a nature as to be useful and largely necessary to the faculties and students in an institution of higher learning.

There is another phase of the subject which I think worthy of consideration. In connection with the bureaus engaged in scientific research there are a very large number of men employed as specialists, many of whom could be utilized to a greater or less extent as lecturers and demonstrators, and through them a great variety of subjects would be presented to faculties and students in fields where spe-

cialists are pre-eminently fitted for the office of higher instruction.

I am, with respect, your obedient servant,

J. W. POWELL

(H.)

UNITED STATES GEOLOGICAL SURVEY,
WASHINGTON, D. C., April 18, 1892.

DEAR SIR:—In reply to your interrogatory in relation to the annual cost of the maintenance and increase of the libraries, museums, and other scientific collections of the Government, I take pleasure in making the following statement:

The direct appropriations made for the present fiscal year are hereby scheduled:

Army Medical Museum	\$15,000
Bureau of Education	54,620
Bureau of Ethnology	50,000
Botanical Garden	21,893
Coast Survey	513,630
Department of Agriculture	300,000
Fish Commission	348,393
Geological Survey	631,940
Library of Congress	57,600
National Museum	200,500
Nautical Almanac Office.....	26,380
Naval Observatory	45,690
Patent Office	893,990
Smithsonian Institution	87,000
Zoological Park	50,500
Total	\$3,297,136

In addition to the total given above, about \$2,000,000 is annually appropriated indirectly for various purposes connected with the institutions named, as for printing and binding publications, etc.; and through these publications, libraries are increased by exchange.

It will be seen from the above that the institutions which will be immediately available for the purposes of a higher institution of learning at Washington receive annually between five and six million dollars, to be expended in a manner which maintains and rapidly increases their resources for higher educational purposes.

It should be added that the Government is year by year erecting new buildings for the custody of the materials collected.

I am, with respect, your obedient servant,

J. W. POWELL

THE STATE AND THE UNIVERSITY.

The elementary school is not more necessary to the existence of a free State than the University. The public school system depends upon the institutions of higher education, and could not be maintained in real efficiency without them. The function of colleges, universities and professional schools is largely a public function; their work is done primarily, indeed, upon individuals, but ultimately for the public good. They help powerfully to form and mould aright the public character; and that public character is the foundation of everything which is precious in the State, including even its material prosperity. * * * The true greatness of States lies not in territory, revenue, population, commerce, crops or manufactures,

but in immaterial or spiritual things; in the purity, fortitude and uprightness of their people, in the poetry, literature, science and art which they give birth to, in the moral worth of their history and life. With nations, as with individuals, none but moral supremacy is immutable and forever beneficent. Universities, wisely directed, store up the intellectual capital of the race, and become fountains of spiritual and moral power. * * * Here young feet, shunning the sordid paths of low desire and worldly ambition, walk humbly in the steps of the illustrious dead—the poets, artists, philosophers and statesmen of the past; here fresh minds explore new fields and increase the sum of knowledge; here from time to time great men are trained up to be leaders of the people; here the irradiating light of genius sometimes flashes out to rejoice mankind; above all, here many generations of manly youth learn righteousness.—*President Charles W. Eliot, LL. D., of Harvard University.*

THE SUPREME WORK OF THE COLLEGE.

PRESIDENT MERRILL EDWARDS GATES, LL. D.

From Zion's Herald.]

That the supreme work of the college must concern itself with the intellectual powers of young men, goes without saying. If a piece of work is to be honest, it must meet the conditions which it professes to meet. Since the college is pre-eminently a place for the development of intellectual power, no college can honestly wear the name which does not concern itself primarily, continuously and strenuously with the intellectual life of its students. The Christian college is not an exception to this general rule. The higher the Christian purpose of those who are interested in the Christian college, the stronger the obligation upon them to keep high the standards of scholarship, the ideals of scholarly attainment, at that college. No graver danger threatens the higher education in our land than subtly assails it when Christian people advocate the

LOWERING OF THE STANDARD OF INTELLECTUAL LIFE and of scholarly work at a Christian college in order that larger numbers of good but incapable young men may share in the looser and lower courses of study thus opened to them. Wise Christian parents will not ignore the life-long—yes, the eternal—influence which will make itself felt in the life of their sons as the result of four years' association with students and professors at college. It is altogether unreasonable to suppose, if these four plastic years are spent at a center where Christ and Christian truth are ignored under the influence of strong intellects which do not reverence God in Christ, that the student life spent under such surroundings will be likely to contribute to strong, sound Christian character and "spiritual-mindedness." This is no plea for narrow sectarian colleges. It is a reminder that the trend of thought and life, the prevalent current of impression and of tendency at a college of sufficient strength to deserve serious consideration, must be either avowedly and openly Christian, or by the very absence of avowed Christian influence it will be strongly and decidedly un-Christian in its effect upon students.

DANGEROUS TENDENCY.

But, on the other hand, the careful observer of the work

done at educational centers in our country must discern the dangerous tendency in certain quarters, in place of the intellectual standards and the scholarly work which should characterize the college, to substitute moral and religious features, which are admirable if they attend upon high scholarly work, but which can never be a substitute for such work at a college. It will be a grave blow at the Christian life of our country if it is ever even tacitly admitted that our best Christian colleges allow a substitution of other aims for the aims which are essential to the honest work of the college. Take the scholastic definition of "essence," and by it test the college: "The essence of a person or a thing is that by virtue of which that person or thing is, and is what it is." That by virtue of which the college is, and is what it is, we must find in the intellectual work of the college. Certainly, it would be disastrous to the prospects of our country if the Christian scholarship of our land were for a moment to tolerate the idea that less of intellectual achievement and power was to be expected of and exacted from it than from scholarship that was not avowedly Christian. We hold that no pure culture is too broad for the consistent follower of the Lord Jesus Christ. We hold that all science leads along converging lines up to that conception of God which is given in His revealed Word.

The first duty of a Christian college, then, is a
CONSISTENT MAINTENANCE OF HIGH SCHOLARLY STANDARDS OF WORK.

No Christian man can be a consistent Christian in college without being a careful, thorough student. No board of trustees which manages a Christian college has any right to allow any considerations of "general good influence" or of "moral and religious culture" to divert their minds from the fact that a college exists pre-eminently for the attainment of knowledge, and of that high character which comes from the systematic training of the knowing powers.

Do we mean, then, that a college has no right to concern itself with the moral and religious culture of its students? On the contrary, we hold that no college can truly accomplish its appointed work which does not thus concern itself with the moral and spiritual life of its students. It is idle to speak of the *laissez faire* principle as the proper one to govern a college in its relations to the spiritual life and the moral condition of its students. To leave entirely out of consideration the moral tone and spiritual life of a body of undergraduates, is not to guarantee to them freedom, but is to deliver them over unaided to the strong influence from the worst, least conscientious, among their own number—an influence the fearful strength of which is well known to all who have carefully studied the life of large bodies of boys and young men who have left home life and family influence and are not yet responsible as citizens. In saying this, I yield to no man in my respect for the good purpose and the average moral stamina of American young men from seventeen to twenty-two years of age. But there is no time in the life of anybody of men when moral and religious truth can be ignored without injury to the whole life.

THE CRITICAL TIME.

And during the years when old associations are first set aside, when the young man is feeling his way to his own standards of living and is keenly sensitive to the opinions of those about him, when a reticence about his own spiritual life and about religious truth, which may be natural to him, may be confirmed into a systematic ignoring of these truths—into an atrophy of the spiritual and religious na-

ture—at this critical time to be entirely cut off from the influence of Christian truth, to have one's moral condition ignored, is pre-eminently dangerous. Some men will come safely through it. Those who are morally and religiously strong will in some cases withstand this downward tendency. This fact makes it possible to advocate this method as one which "kills off the weakest and strengthens the strongest." But the law of the survival of the fittest in morals is not the law of Christ, and is not the practice of Christian civilization. You and I do not wish our sons subjected to such a test during the four years immediately following their transplanting from the homes where they have received kindly Christian nurture.

The supreme work of the American college, then, is to secure the

HIGHEST POSSIBLE INTELLECTUAL ACTIVITY

along with the clear recognition of the fact that conscience, faith, the religious life, are essential factors in the highest manhood and naturally attend and direct the highest intellectual activity. For the supreme object of the college is to give an education for power in social life, to build up the broadest and soundest character based on the full and free training of the knowing powers.

Believing this, we must ask the question, "While young men study, are they living purely and nobly?" Is it defensible to ignore the moral and religious life of young men during the formative period of young student life? Can older young men, more independent in habits, and as they trust more fixed in habits of right living—can older university students afford to shut themselves out from active participation in avowedly Christian influences and from Christian fellowship with the men with whom they enjoy every other form of fellowship?

Books alone, the study of ethics alone, will not keep young men pure, unselfish, morally strong and pure-hearted during years of isolation from home life and from social life. When the intellectual life is uninterruptedly pursued, there arise diseases of the mind such as follow in the body when one physical organ is used to excess and other powers fail and other organs suffer from atrophy. Man is not, and was not meant to be, pure disembodied intellect. True philosophy, as well as common sense, teaches that the heart and will have their rightful domain in every man's life. If the understanding becomes arrogant and spurns the aid of the other powers of the mind, not only does the man become an incomplete man, but his intellect itself inevitably loses poise and clearness. The man ceases to be a man, and becomes a calculating machine; and his intellect becomes subject to those sudden reversals of legitimate processes and results which the law of construction for calculating machines renders inevitable in them, but from which life saves the living man, the feeling, worshipping soul.

A MORAL DYNAMIC.

In that effort to build up character while acquiring knowledge—which is the supreme work of the college—do we not come to know the need of a moral dynamic, of some strong elemental force that shall draw us with a powerful attraction toward goodness and duty when duty is clearly seen? There are many men connected with the highest education in America who believe that the supreme work of the college lies in maintaining the highest possible standards of intellectual achievements under the sway of that light of reason which continually refers to God as the source of light and draws heat and life-power from Christ, who is the life and the light of the world.

THE FIRST METHODIST SCHOOLS.

REV. J. W. CORNELIUS, D. D.

John Wesley had a superior education. The intellectual and moral training he had in the Epworth Rectory, under his peerless mother, of itself was almost a guarantee of a high destiny. At the tender age of eleven he was sent to the large and splendidly founded Charter House School in London, where he rapidly gained the highest esteem of the instructors and made remarkable attainments. In 1719, when only sixteen years of age, he entered Christ Church College, Oxford University. By the merit of high classical scholarship he was elected a Fellow of Lincoln College when only twenty-three. He received the degree of M. A. in 1727—not then a thing thrown around for money or for compliment, but won in the hard struggle for real education. He was shortly after chosen Greek Lecturer in the University and gained a wide reputation for elegance of composition and speech and for keenness and profundity of varied mental characteristics and acquirements. The great zeal of his soul for the knowledge of God diverted him from a merely professional literary career; yet he ever consecrated and widened his learning in extending the Kingdom of God. Though there were many good schools in England in his day, he saw the special need of one for the children of his preachers and therefore he founded the Kingswood School at Bristol in 1748. Many youths who became famous in the political and religious activities of the second half of the eighteenth century were educated there. The guiding genius of its founder and its successful work made it famous in his generation, and it still exists, having undergone some enlargements and changes in New Kingswood, etc.

John Dickens, who was born in London but not converted until he had emigrated to this country, having some knowledge of the Bristol Institution, presented plans to Bishop Asbury as early as 1780 for a Christian school under Methodist auspices in America, similar to Kingswood. Mr. Asbury strongly favored it and authorized Dickens to secure subscriptions. When Wesley selected Coke and ordained him to be a superintendent of the Methodists in America, the latter laid before the venerable founder a plan for a Methodist college—almost a university in germ and grasp. Coke was himself a scholar of no mean grade, educated at Oxford—a “Gentleman Commoner”—one who has paid all his own expenses of education, asking no favors of the University revenues. He thoroughly appreciated the benefits of wide culture and wished the newly organized church to enjoy it, especially in its ministry. Wesley approbated and as soon as Coke, after landing in New York, could have an interview with Asbury and his principal co-laborers the scheme was revealed. Asbury had encouraged Dickens in the establishment of an American Kingswood School, but yielded to the wider thought of Wesley and Coke. When the Christmas Conference was convened a month later, as soon as the organization of the Methodist Episcopal Church was effected and some “Rules of Discipline” were enacted, the conference, on the first day of January, 1785, considered the question of establishing a college. It was agreed to with large unanimity and was called in honor of Coke and Asbury, Cokesbury College. A beautiful and central site was selected near Abingdon, Maryland, and the cornerstone laid in June of that year. Coke took great interest in collecting the funds and the materials for the building—a very considerable structure—and with Asbury issued a “plan for erecting a college to advance the interests of religion in America.” Students were to be instructed in

English, Latin, Greek, Logic, Rhetoric, History, Geography, Natural Philosophy and Astronomy. Sciences were soon to be added with the Hebrew, French and German languages. There were to be “Recreations” in husbandry, the Georgics of Virgil to be perused in these recreations so that “the students may delightfully unite together both theory and practice.” Four guineas were to be charged per annum for tuition. “Deep learning and genuine piety” were the mottoes and motives of the institution. \$5,300 were subscribed at the beginning—\$50,000 in all being paid in ten years for this enterprise by the humble Methodist preachers and communicants, to realize the ideals of Wesley, Coke, Asbury and the Christmas Conference. Only money was needed to make it a very Harvard in scholarly environment and a very Kingswood in religious inspiration. A president, Rev. Mr. Heath, was sent over by Wesley and duly installed; but he was not a man equal to the situation either in scholarly requirements or in the sublime, unearthly *motive* of a self-denying Methodist. He soon retired. The torch of the incendiary destroyed the institution after a rather brilliant career of ten years. The undaunted Coke soon collected another thousand pounds for a second college building, and friends in Baltimore and elsewhere added thirteen hundred pounds more, but the new institution shared the fate of the previous one in a year’s time. The leaders of the church still felt profoundly the need of intellectual training for themselves, their children, and their successors. They had showed the first great effort of Methodism on this line, seemingly thwarted by Providence, but really only by their poverty and by the consecrated activity of their ministers in evangelistic work. If we out of our riches were to give as they out of their poverty did give, the last decade of the nineteenth century would witness the building and endowment of the great University at the nation’s capital. Cokesbury is indeed a sublime object lesson to stimulate us in the building and endowment of the American University.

THE UNIVERSITY THE DEFENDER OF THE FAITH— CONTINUED.

BY BISHOP C. H. FOWLER.

Each age has its own peculiar type of skepticism. The Church has had her natural history. She has grown from childhood to manhood in revelation, in truth, in polity and in experience. We will concern ourselves at this hour only with her experience.

This can be measured by her conflicts. She began like the individual believer in feeling. She has fought her way through every type of opposition up to the supreme assault now being made upon the very existence of her Author, on high, scientific grounds. Run your mind over the progressive series of assaults.

In Old Testament days it was a struggle against polytheism. It was largely a measure of power. The one God of the Hebrews was Himself put on probation, on trial, against the gods of the Gentiles. Moses and Aaron demonstrated that Jehovah was mightier than the gods of Egypt. Elijah’s God answered by fire, to the confusion of the priests of Baal. Daniel’s God was declared after a trial to be the true God.

In the New Testament days the assault was two-fold, partly from Judaism and partly from heathen religions. And the New Testament answers are two-fold. Each enemy is met and vanquished on his chosen field. Christianity stands against all comers, offers all challenges, and so allows all enemies to select the field, the day and the

weapons. In the great Epistle to the Hebrews, Apollos forever settles the relations of Christianity to Judaism. And St. Paul, as set forth in the Acts, touches heathenism and carries the argument home to their own understanding.

THREE SACRED SPOTS OF EARTH.

In wandering about the East, I touched three spots of earth that, like telescopes, opened new worlds before my enraptured vision. The first was in Bethlehem, where the Son of God came into the world for our redemption. As I looked at the silver star that veneration has set in the floor of the grotto, to mark the spot where Jesus was born, the low roof of the grotto opened above me and I saw a path of light all the way up to the throne of God. I shall not soon forget that hour. The second was just outside the walls of Damascus, on the old cement highway built by the Romans from Damascus toward Jerusalem. There it stands, solid as a single rock, four or five feet high, stretching across the plain.

The wind and winters of twenty centuries have carried away the adjoining soil. As I stood where they said St. Paul was smitten down, and saw by the contour of the country that I was near the place where he fell, I heard the voice saying, "Behold, I send you far hence to the Gentiles." Then my heart leaped within me and I choked with the thought, "Here is where we found our chance as Gentiles. Here the gates of the Eternal City outward swung to let us in."

The third spot was yonder in Greece. We came down from the Acropolis of Athens, walked across the little valley that separates it from Mars Hill, and made our way up the broken and dim steps cut in the rock that led to the seat of the court of the Areopagus. As I looked about me I could hardly catch my breath. Close at hand, rising to the left, was the Parthenon, the pride of Pericles, of Phidias, of Socrates, of Plato—the pride of Athens, of Greece, of all the ages. Yonder, at the foot of the Acropolis, was the theatre of Sophocles and Aeschylus, where the excited Athenians listened to the play of Oedipus Tyrannus. Away beyond, on the plain, were the majestic columns of the Temple of Jupiter Maximus, some fallen, some still standing. Away in front of me, in the mountain side, is the old Pentelicus quarry from which came the marble for the Parthenon. A little to the right rises Mt. Hymettus, where Greek bees gather the world's sweetest honey, of which Horace sang. Still farther to the right and not far away, beyond the agora, where once stood the statues of heroes and of gods, is the same old stone platform on which Demosthenes stood when he delivered his great oration against Philip. And yonder, on the hillside, you see a dark opening, cut in the rock. That is where dear old Socrates spent his last night and drank the hemlock. All these places are great and historically sacred. But here, on this level spot, three yards square, nearly surrounded by stone seats, is the place where St. Paul stood and revealed the unknown God. Here he appealed, not to Moses and the prophets, but to the God who made the world and all things therein, who giveth to all life and breath, who hath made of one blood all nations, and hath appointed the bounds of their habitation. His appeal is to the great argument from nature. Here we are met on the plain of our intelligence, we are treated as rational beings. Here I had the assurance that God intended not to mutilate but to save me, my whole being. I straightened up in these footprints of St. Paul on Mars Hill, and thanked God for the manhood He had redeemed.

Christianity meets every foe on his own field. In the age

immediately succeeding the days of the Apostles, the struggle was with Greek Theism or Platonism. Celsus and Porphyry, Platonic infidels, urged the old Greek Theism of Socrates with some adulterations. Justin Martyr and Origen rose into the philosophy of Plato and became the great Platonic Apologists. They quoted Plato against their enemies and made their great defence on the plane of the philosophy that assailed them.

In the third century the attack was made by Ebionites, who denied that Christianity met the requirements of the Old Testament prophecies. The field of conflict was the Old Testament Scriptures. On this field rose up the great exegetes, Irenaeus, Tertullian, Clement and Origen.

Next followed the great swarm of heresies. These discussions demonstrated the need of an infallible standard. Up rose the great Augustine, brushed away and condensed the lax views concerning the Scriptures and exalted the infallible word of God.

In these later centuries Herbert made a learned and elegant assault upon Christianity, denying our need of it, and holding that Nature could give all that man requires. This was met by the great defenders, Conybeare, Lardner and Butler, who, on the same basis of natural religion, showed the need of revelation to meet man's ignorance of redemption.

It has been reserved for our time to make the most bold, the most startling, the most candid attack of all the ages. It sweeps away everything at one stroke. It denies the existence of a personal God, and the possibility of any revelation. We confront the supreme assault upon faith at once scholarly, elegant and popular. It bases all its claims and denials upon purely scientific data. It attempts the destruction of all the faith of past ages by the discoveries and developments of science. Our answer and vindication must come from the same field.

We are in an age of intense mental activity. Some of the great leaders of scientific thought are borne away from the old lines of religious convictions. Their sentiments run down through much of the strongest literature. Their doubts are clouding the vision of many in all our cities and towns. I do not refer to the cheap skepticism which peddles its vulgar wit for so much a dose in the form of popular lecture-shows. But there are great and scholarly men who impress the public conviction by their own evident candor and earnestness—men who turn away into orphanage and darkness with an agonizing will.

John Stuart Mill, believing that religion had been removed from the region of belief, seeks to retain it in the region of hope and imagination. He says: "The beneficial effect of retaining religious ideas is far from trifling.....It makes life a far greater thing to the feelings.....Human excellence greatly depends upon the sufficiency of the provision made for it." He thinks "we need familiarity with the conception of a morally perfect being as the *norma*, or standard to which to refer and by which to regulate our characters and lives."

Tyndall, with touching pathos, in his Belfast speech, intimates that the human mind, with the yearning of a pilgrim for his distant home, will find a field for the use of the recreative faculties. He says, "Here, however, I touch upon a theme too great for me, but which will assuredly be handled by the loftiest minds when you and I, like streaks of morning cloud, shall have melted into the infinite azure of the past." And Prof. Clifford wails out, "We have seen the spring sunshine out of an empty heaven upon a soulless earth, and we have felt with utter loneliness that the Great Companion was dead."

[TO BE CONTINUED.]

Educational Notes.

A new building for the Law School at Yale is found necessary and will be erected at a cost of \$250,000.

Columbia College Library has 140,000 volumes, 12,000 of which have been purchased recently. 60,000 volumes are in the Library of the Law school.

The gifts to Yale University during the school year ending with June, 1892, amounted to \$373,860.37. There were accessions to the Library of 8,730 volumes and 29,000 pamphlets.

The Gymnasium of Wesleyan University when completed will have cost \$85,000 and is thoroughly equipped. Wesleyan students have pledged \$5,240 for a Y. M. C. A. building in Middletown.

The number of graduates from Boston University from its foundation in 1869 is 2,407, about 100 of whom have died. The late Miss Lovicy D. Paddock, of Boston, bequeathed to the institution \$30,000 the past year.

Two of the Presidents of the United States have been graduates of Harvard and three of William and Mary. Dickinson, Princeton, Bowdoin, Williams, Union, Dixon, Hampden, Sydney, Kenyon, University of North Carolina, West Point and Miami have also each graduated one of the Presidents of the United States.

In fifteen of the most important institutions of the country there were in attendance in the five years last past 15,084 students—an increase over the preceding five years of 6,887, or 33 per cent. Harvard stands at the head with 2,658 students, Michigan University is next with 2,622; Yale University, 1,784; University of Pennsylvania, 1,764; Cornell University, 1,489.

Chicago University, which shows a disposition to distance everything on the educational line, has voted \$200,000 for a Gymnasium. Silas B. Cobb, an octogenarian, has donated \$150,000 to the general building fund. When he went to Chicago from his native Vermont at twenty-one years of age he was without a penny. He was a carpenter, but afterward worked at harness making until he saw there was something better for him at the shoe and leather business.

The Faculty of the Iliff School of Theology are Bishop H. W. Warren, Chancellor McDowell, Dr. J. R. Van Pelt, Dr. W. F. Steele, and others. The departments already established are Homiletics, Practical Theology, Christian Evidences, Systematic Theology, Historical Theology and Exegetical Theology. For all candidates for the Methodist Episcopal ministry the tuition is free. In addition to these scholastic advantages, the splendor of Rocky Mountain scenery, the great altitude, the dry atmosphere, etc., will ever make the University of Denver a great attraction for students from all parts of the land.

The number of students in Cornell University increased under the administration of President Charles K. Adams from 575 to 1,538; the number of graduates from 31 to 177; the corps of professors from 53 to 122. Barnes Hall, Lincoln Hall, Morse Hall, the Library and Law buildings have been erected and equipped. Sibley College and the gymnasium have been greatly enlarged and their faculties much improved. The endowment grew \$2,000,000 and an

increase in donations for buildings and equipment was received of \$465,215. The annual income of the university climbed up to the splendid figure of \$706,709. The total increase in the productive funds, buildings and equipment was \$3,154,037. Yet President Adams resigned because he could not endure the discordant elements in the faculty and management.

The Library of Brown University now numbers 72,000 volumes and 20,000 pamphlets. It was increased in the last scholastic year by 1,766 volumes (722 of which were donated) and 430 pamphlets. The treasury (April 15th) had \$1,243,365 as against \$1,199,122 of the previous year. A fund of \$50,700 for a gymnasium building has been received, and for the maintenance of the gymnasium \$34,320. The Lyman Fund for students now is \$38,865. The Ladd Observatory has been finished and equipped. \$50,000 have been received from the Fayerweather estate and \$100,000 from the estate of John Wilson Smith, of Providence.

HARVARD UNIVERSITY ITEMS.

The Sargent Prize of \$100 for the best metrical translation of an ode of Horace was awarded, June 14, to Miss Margaret Foster Herrick. This is the third time, and the second successive year the prize has been awarded to one of the young women students.

One hundred and forty of the three hundred and eighteen students registered for Harvard summer schools last season were women.

The following are recent bequests to Harvard :

By E. Price Greenleaf.....	\$711,000
“ Ellen Gurney.....	170,000
“ Boyden estate.....	237,000
“ Anonymous.....	200,000
“ Miss C. W. Bruce.....	50,000
“ J. S. Wheeler.....	50,000
“ Dr. H. F. Sears.....	35,000
“ Henry Villard.....	25,000

and many smaller amounts.

Edwin Conant's will gave Harvard \$5,000 for the Divinity School and \$27,700 for the Library.

The will of Rev. Frederick Frothingham gives \$30,000, to found a Frothingham Professorship of Ecclesiastical History in the Theological School at Cambridge.

Mrs. Elizabeth Fogg has paid to the treasurer \$198,000 as part of a bequest in the establishment of an Art Museum in honor of William Hayes Fogg.

Mr. Frederick L. Ames has given \$25,000 for the improvement of the Arboretum, and Professor Sargent has given \$10,000 for books for the Arboretum.

An anonymous friend of the Botanical Department has given recently \$4,500 through Professor Goodale. Henry Lee, Esq., also gave \$1,000 for the Botanical Department.

In accordance with the wishes of the late Dr. John Witt Randall, who graduated from Harvard College in 1834 and from the Medical School in 1839, his sister, Miss Belinda L. Randall, has given to the College his large collection of engravings, and \$30,000 for the creation of a fund for their care and increase.

Eugene Wamburgh, LL. D., was elected a Professor of Law, and William Thomas Councilman was elected a Shattuck Professor of Pathological Anatomy at a meeting of the Harvard Corporation, September 1, 1892.

Frank William Taussig, Ph. D., was elected a Professor of Political Economy, and Frank Beverly Williams an Instructor in Roman Law.

Literary Notices.

GOSPEL CRITICISM AND HISTORICAL CHRISTIANITY. By ORCLE COBE, D. D. Published by Putnam & Sons, N. Y.

Notwithstanding the protestations of Roman Catholic and Orthodox Protestant theologians, that the standards of Christian faith have been successfully maintained against the encroachments of "the higher criticism," so called, it must, in fairness, be admitted that the intelligence of this age demands a larger liberty of thought in relation to the historical accuracy of the several books of the Bible, the inspiration and authority of their contents, and the make-up of the sacred canon, than had hitherto been conceded by the conservative theologian. This book is a response to this demand.

The Christian public is to be congratulated that so much Christian candor and eminent ability and scholarship have been brought to this discussion.

The assaults of criticism have been regarded with something of consternation by those who have felt content to abide by existing standards, and frantic efforts have been made in certain quarters to weaken and ward off these assaults. The author of this work has the courage to enter the field of inquiry, in the spirit of the severest criticism, and following fact and reason to accept results, however much at variance with accepted theories and teachings they might be. That he surrenders much to the historical critic, and admits innovations, which seem perilous to some is evident. This does not weaken his faith in the essential inspiration and truth of the Scriptures. He disarms hostile criticism by yielding up indefensible positions, but finds ample standing room for faith in what remains of fact and truth, and assures the Christian he may dismiss his fears as to the ultimate truth and power and triumph of Christianity. The book is a most able and admirable contribution to the religious literature of the times.

WHO WROTE THE BIBLE?—A BOOK FOR THE PEOPLE. By Washington Gladden. Published by Houghton, Mifflin & Co., Boston, Mass.

As to the divine inspiration of the Bible, there has been every degree of faith and kind of sentiment among its readers.

While some have regarded it as a transcript of the Divine Mind from "lid to lid," inspired in every word, and too sacred to admit of doubt without sacrilege, others have felt at liberty to doubt its plenary inspiration, yet they hold that in its general scope and meaning it is "God's Book," and must be maintained in its integrity against criticism, while the faith of yet others is still less, shading off more and more till it reaches utter skepticism and infidelity.

The author of this work, an accredited minister of the Gospel, Rev. Washington Gladden, of Columbus, Ohio, accedes to the claims of the historical critics, grants that there is much bound up with the inspired teachings which is neither inspired nor true, and claims that the intelligent Christian must exercise his reason and common sense in discriminating between the human and divine in the make up of the book.

Those who are willing to do this will find the work of Mr. Gladden a most suggestive and valuable help.

The spirit of the broadest charity breathes through the work, but it will doubtless produce a flutter in conservative theological circles. Believing in the largest liberty of Christian thought and belief we heartily commend the book as a valuable contribution to the theological literature of the age.

THE METHODIST EPISCOPACY VALID, CONSIDERED IN THE LIGHT OF THE SCRIPTURES, THE APOSTOLIC FATHERS AND OF HISTORY. By BOSTWICK HAWLEY, D. D. Published by Hunt & Eaton, Cranston & Curtis.

Anyone desiring a succinct and forcible putting of the question of Episcopacy cannot do better than get this little book. Under the heading of "Modifications of the Episcopacy" the author does not rise to the magnitude of the question. It may have been a want of room rather than a failure to appreciate the importance of the discussion.

INTER-DENOMINATIONAL SERMONS. A series of Sermons delivered in "Old John Street" Methodist Episcopal Church, New York City, by prominent ministers of different denominations. Edited by W. W. Bowditch, D. D.

In 1889-'90, under the pastorate of Dr. Bowditch, there were a series of twenty-eight sermons preached by ministers of seven denominations, in the "Old John Street" Church, New York City. These have been put into book form. The volume is worthy of perusal. Many questions of great interest are discussed by very prominent men of our own and other denominations.

In connection with each sermon is a half-tone picture of the preacher. Everything has been done possible to throw about the printed sermon the charm of the speaker.

THE CHURCH OF THE FUTURE. By W. J. Dawson. Hunt & Eaton, N. Y., Cranston & Curtis, Cld.

The addresses which make up this book are bold, dashing, and exhibit a good range of intelligence. The addresses, as the author admits, do not have a very close or logical connection with the subject which is assumed as the title of the book. A vein of originality runs through them, and at times they are refreshingly suggestive.

But they leave us very much in the dark as to "The church of the Future." If existing churches fall so far short of representing Christ and Christianity, it is difficult to avoid the conviction that they ought to be abandoned for something better suited to the purpose.

That there is too much ground for his scathing allegations we must all admit, and we can all unite with him in insisting that very many of those who profess religion should do very differently; but alas, what is the ground of hope that they ever will? He does not tell us. If the church of the future is incapable of some definition, it seems hardly worth while to write about it. We need something of it in outline and method to make it an intelligent object of thought, but the author fails to give it.

In his view the value of a "profession of faith" and a creed dwindles into nothing in the presence of right conduct and a right life. His drift is strongly and unmistakably away from dogmatism and ecclesiasticism, but from want of a better defined objective, his brilliant and epigrammatic rhetoric may be said to be iconoclastic more than constructive in effect.

The Christian Propaganda needs method, and while the author makes existing methods fearfully inadequate, without seeming to intend it, he leaves us with a feeling of uncertainty as to what better is possible.

The chapter on the "Socialism of Jesus" is disappointing. The hope that something would be set forth having form and consistence as a scheme or mode of social life is not realized. We are left to feel, as we have long felt, that the hand of a competent master has not yet taken hold of this subject. But we commend the book for its liberty of thought, its aggressiveness, and the Christian spirit which breathes through all its pages.

A WINTER IN INDIA AND MALAYA AMONG THE METHODIST MISSIONS. By Rev. M. V. R. Knox, Ph. D., R. D. Hunt & Eaton, N. Y.

It is difficult to understand why books of travel are not more in demand. The desire to visit other lands is very strong, and many thousands are annually spent in "touring beyond the sea." It is well known, however, that other elements besides the desire to know other lands and peoples, enter, as causes, into the yearly pilgrims to Europe and elsewhere. "To see is to know," and seeing better satisfies ordinary curiosity than can any book of travel. "Actual travel, therefore, is more fascinating to the average enquirer after this kind of knowledge than books of travel, however ably written. But, after all, books of travel present many advantages over an outing tour. They can be procured at the merest trifle of cost. They are free from the dangers, annoyances and privations inevitably incident to traveling abroad. Besides a much more comprehensive and fuller knowledge can be obtained from books than the ordinary tourist can hope to obtain by travel. He who tells the story of his travel for the public should, of course, in addition to being a close observer, be well versed in literature and art, in economic and social science, and thus qualified to estimate the true significance of facts, for he is not to serve as a mere gazetteer. His aim should be rather to develop a better ideal of human life. If, in addition to this equipment, he have the happy faculty of drawing his pictures to the life he may be relied on as furnishing better means of information than that of actual travel itself. The author in this case with no great pretensions or flourish of trumpets yet brings to his work good ability. His book is literally crammed with instructive facts and incidents, though destitute somewhat of dramatic interest. You may depend upon it you will be interested and profited by a perusal of his clean and religiously helpful pages.

BEAUTIFUL THOUGHTS FROM HENRY DRUMMOND. By Elizabeth Curston. Published by James Pott & Co., N. Y.

This is a beautiful book of nearly three hundred pages. It is made up of selections from the various works of Dr. Drummond. It is so arranged that each day of the year has its reading. It is specially fitted for the parlor or bed-room table, where a few minutes can be utilized by reading such choice selections as compose this little volume.

The *National Medical Review* is a journal published by Chas. H. Stowell, M. D., Washington, D. C. It is a very bright medical journal, and is worthy of careful perusal of any one interested in the discussion of advanced medical thought. Dr. Stowell is a well-known author of various school books on subjects especially qualifying him to be the editor of such a review. It is published monthly, and is edited with reference to the busy practitioner, who may not have as much time for study as he would desire. Price \$1.00 per year.

THE INCARNATION OF THE SON OF GOD. Being the Bampton Lectures for 1891. By Charles Gore, M. A. Charles Scribner Sons, N. Y.

The subject of this work precipitates the author into a discussion which thoroughly stirred and even divided the church as early as the middle of the third century. It is not surprising that on going before a modern Oxford audience he felt that he must hold in check the drift into scholastic and theological substitutes which his subject imparted to his inquiries. He says in his preface, "I aim at presenting the subject of the Incarnation to the general reader rather than the theological student."

But the reader nevertheless must not hope if he consents

to shut himself up with the author that he will be able to breathe the atmosphere of modern liberal thought and criticism. He must listen to the arguments which have often been made to prove the "Trinity," the "Eternal Sonship," the essential nature of the divine Son both as to his humanity and his divinity, his sacrificial "Atonement for the sins of the world;" and going through with it all he must, if he can make up his mind to agree with the author, take sides with Athanasius against Arius; that it is *homoousios* and not *homoiousios*; the Son of God is of the same substance with the Father.

In the first three chapters he endeavors "to justify," as he says, "at the bar of nature and of history the faith of the Christian in the incarnate Son of God," and then proceeds to "a more exact examination of what that faith means."

This requires, he thinks, "more specific definitions;" and he accepts the statements as finally formulated in the Council of Chalcedon as such definitions. They are these, to wit:

1. As Son of God, Jesus Christ is very God, of one substance with the Father.
2. As Son of Man, he is perfectly man in the completeness of human faculties and sympathies.
3. Though both God and Man, He is yet one person, namely, the Son of God, who has taken manhood into Himself.
4. In this incarnation the manhood, though it is truly assumed into the divine person, still remains none the less truly human, so that Jesus Christ is of one substance with us men in respect of His manhood, as He is with the Father in respect of His Godhead.

In the light of these definitions the author accepts the orthodox creeds of the early church "as simple summaries of the original Christian faith," and, of course, seeks to defend them.

Then he proceeds to enquire "what is the relation of the theology of these creeds to the faith of the New Testament in Jesus Christ."

The author brings to his task a cast of mind moulded in the most conservative orthodoxy and an implicit faith in the authority of the church and her teachers with a fair degree, one may say, of ability and scholarship. But notwithstanding his expressed aim to produce a work "for the general reader," we must think he has produced one more suited to "the theological student."

FROM THE FIELD.

Dr. Henry A. Buttz, president of Drew Theological Seminary, writes from Carlsbad, Austria, in regard to The American University as follows:

"The plans for the University as outlined by the Chancellor, Bishop Hurst, must commend it to the church as worthy of its cordial support. The movement is a great one. I trust you will find a most hearty response from the church in accordance with the recommendation of the late General Conference. It affords me pleasure to join in recommending this great enterprise, and in wishing for it a most liberal support in connection with the approaching Columbian Collection."

Rev. J. F. Pierce, of Flagstaff, Ariz., sends us \$4.40, and adds: "We wish you abundant success in an enterprise worthy of such a name as this." This shows that our frontier fields have men of broad thought and enterprise. It would have been easy for him to have excused himself on the ground of doing missionary work. This should be an inspiration to some who are more favorably situated.

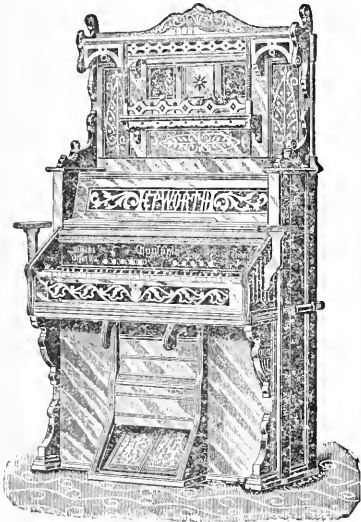

**TO OUR READERS WHO HAVE NOT SENT US THEIR SUB-
SCRIPTION.**

This is the third number of THE COURIER which we have sent you as "sample copy." We hope you are pleased with it and will forward to us as soon as convenient the subscription price—fifty cents for the year commencing with September, 1892. If you do not care to have THE COURIER continue coming, please notify your postmaster or drop us a postal to that effect and we will take your name from our list. We hope you will not only permit us to count you among our readers, but that you will secure a club of at least ten at the exceedingly low rates which we offer for the first year. It is impossible for us to communicate with each one except in this general way.

To the 4,800,000 Methodists in the United States, **GREETING.**

A few years ago we conceived the idea of confining our business to the Methodist people of this vast country. Nothing strange about that, for we have been Methodists away back from the beginning. We decided to sell our EPWORTH PIANOS and ORGANS direct to Methodist people without the help or expense of agents, which adds from \$25.00 on an Organ to \$150.00 on a Piano. We decided to allow people to send their orders, through their preachers, just the same as they do for their church papers, hymn books, etc. We decided to allow our Epworth Pianos and Organs to be thoroughly tested in the homes and churches of our customers before payment, and if not found as represented returned at our expense. We decided that Methodist people would give us a square deal if our goods were satisfactory. And we have decided that as our trade is increasing, and we are daily receiving orders from every corner of this great country, that Epworths please the people, and that our plan is a great success. We could publish thousands of letters from preachers and people testifying to the Beautiful Cabinets, Sweet Voices and Easy Actions of the Epworths. We could tell how the Epworth captivated the General Conference; we could tell how we have saved many thousands of dollars to Methodist people; how poor families and societies have been able through our low prices to furnish the homes and churches with Sweet-Voiced Epworths. But to tell all this would take space, and space costs money. So we will invite you to send for our 32-page illustrated catalogue, which is mailed free for a stamp. We will here show a few cuts of

Favorite Epworth Styles.

This Shows Beautiful Style 602

Epworth Parlor Organ

Black walnut case, hand rubbed, oil finish; handsome detachable canopy top, which can be packed in same box with organ for shipping; mouse-proof pedal cover. This organ contains 10 octaves of sweet-voiced reeds; 12 stops double octave couplers; grand organ and knee swells, and is a genuine beauty. Retail price \$97.50, but a discount of 33 1/2 per cent will be allowed those who order through a Methodist Minister, which reduces it to \$65.00, with good stool and book. Delivered on board cars boxed for shipment; average freight charges \$2.00.

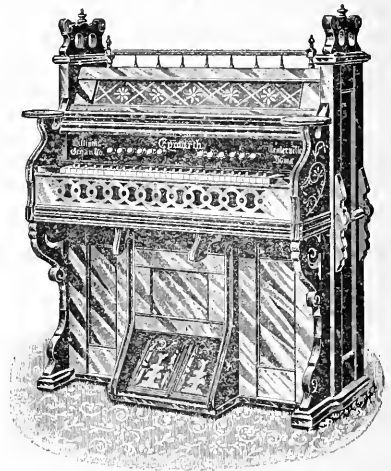

If you are a preacher in the regular work, send your order and the instrument will go forward at once. If you are not, get your preacher to order for you, and if you do not find instrument as represented tell us so, and we will give shipping instructions and pay all expenses.

SEND FOR PIANO CATALOGUE AND PRICES.

Our Mr. H. B. Williams was a member of the last General Conference, and we refer to the Book Concerns or to the editors of this paper, or any other Methodist paper as to our reliability.

ORDER NOW FOR HOLIDAYS.

EPWORTH

Epworth Chapel Style 302

Is similar in general description to the 602 parlor style, but with a low Chapel top, finished back, and contains same action, and is same price. This style 302 is a great favorite with churches, Epworth Leagues and Sunday Schools, and is frequently ordered for parlor use. All Epworths are voiced and tuned in most careful manner and are known everywhere as the Sweet Voiced Organs. A good Organ must have a good action. These two Epworth Organs are favorites everywhere, and the best value for the money in the United States.

WILLIAMS ORGAN COMPANY,
CENTERVILLE, IOWA.

Vol. I, No. 4.

THE AMERICAN UNIVERSITY.

PROPOSED OUTLINES OF BUILDINGS AND DEPARTMENTS.

HALLS.

1. Administration Hall with Library and Chapel forming one group.
2. Halls suited for the use of the several departments of the University.

DEPARTMENTS.

I. *Science.*

1. Mathematics.
2. Physics.
3. Chemistry.
4. Biology.

II. *Philosophy.*

1. Metaphysics and History of Philosophy.
2. Psychology and Logic.
3. Political Economy and Sociology.
4. Constitutional Law and Political Science.

III. *Languages and Literature.*

1. Oriental and Semitic.
2. Greek.
3. Latin.
4. Romance.
5. Germanic.
6. English.

IV. *History.*

1. American.
2. European (West and North).
3. Mediterranean.
4. Oriental.

V. *School of Law.*

VI. *School of Medicine.*

Besides Professorships, Lectureships, Scholarships and Studentships in all the above named departments it is proposed to make special provision for the following subjects:

1. Christian Archaeology and the Evidences of Christianity.
2. The Science of Government.

MOUNT VERNON SEMINARY

FOR YOUNG LADIES.

ENGLISH, FRENCH AND GERMAN BOARD-
ING AND DAY SCHOOL.

Cor. of M and 11th Sts. N. W., Washington, D. C.

MRS. ELIZABETH J. SOMERS, Principal.

The Seminary endeavors to meet a demand known to be imperative by all acquainted with the problems of the education of girls—the demand for a school more systematic, thorough, and modern than the typical boarding-school, yet less severe and arduous than our women's colleges. Up to the Junior year its course is as full and its disciplines as thorough as that of any college preparatory school in the land. Beginning with the Junior year, the course consists of selections from the college curriculum, adapted to the needs of those young women who desire a thorough training in selected branches, but who desire, also, to avoid the strain of a college course.

The school is thoroughly modern in spirit and in method. Its faculty is composed of earnest, enthusiastic teachers—specialists in their several departments—most of them women with college training.

Special emphasis is given to the following subjects: English Language, Literature, and Composition; Natural History; Art, and the History of Art; General History and American Political History. The time given to these subjects, and the breadth and thoroughness of the treatment accorded to them, do not fall below those given them in our best colleges.

The buildings are new and perfectly equipped for health and comfort. They are heated by steam, have perfect drainage and ventilation, a passenger elevator, and bath-rooms which are furnished and fitted with the best appliances known to modern sanitary science.

For further information apply to the principal, who also refers to the following patrons:

- Rev. Bishop JOHN F. HURST, D. D.,
LL. D., Washington, D. C.
- Rev. Bishop E. G. ANDREWS, D. D.,
LL. D., New York, N. Y.
- Rev. Bishop D. A. GOODSSELL, D. D.,
LL. D., San Francisco, Cal.
- Rev. CHARLES C. McCABE, D. D.,
LL. D., New York, N. Y.
- Hon. MELVILLE R. FULLER,
Washington, D. C.

Chief Justice of the United States.

- Hon. LEVI P. MORTON,
Washington, D. C.
- Vice-President of the United States.

- U. S. Senator H. M. TELLER,
Central City, Col.
- U. S. Senator J. T. MORGAN,
Selma, Ala.

- Hon. JOHN W. FOSTER,
Washington, D. C.
- Secretary of State.

- Hon. CARROLL D. WRIGHT,
Washington, D. C.
- Commissioner of Labor.

ATTORNEY.

OFFICE:

1423 F STREET,

Washington, D. C.

This extensive work the past thirty years is approved by the Government Officials, Senators, and Members of Congress, and thousands of his clients and friends throughout the United States, as will be attested by the Pastor of Metropolitan M. E. Church, of which he is a member.

RECOMMENDATIONS.

WASHINGTON, D. C., March 31, 1890.

Having intimately known T. W. Tallmadge, of Washington, D. C., we recommend him as a reliable and capable attorney for prosecuting Pension and other Claims against the Government.

John P. Newman, Bishop of the M. E. Church, Omaha, Neb.

John F. Hurst, Bishop of the M. E. Church, Washington, D. C.

John Sherman, Senator from Ohio.

Calvin S. Brice, Senator from Ohio.

Jos. R. Hawley, Senator from Connecticut.

H. M. Teller, Senator from Colorado.

Alfred H. Colquitt, Senator from Georgia.

Sheby M. Cullom, Senator from Illinois.

Redfield Proctor, Senator from Vermont.

Bishop W. Perkins, Senator from Kansas.

H. W. Blair, ex-Senator from New Hampshire.

Wm. McKinley, Jr., Governor of Ohio.

Charles Foster, ex-Governor of Ohio.

Jos. H. Outwaite, Member of Congress from Ohio.

John C. Hook, Member of Congress from Tennessee.

James W. Owens, Member of Congress from Ohio.

J. D. Taylor, Member of Congress from Ohio.

W. G. Veazey, Past-Commander-in-Chief of G.

A. R., Interstate Commerce Commissioner, of Vermont.

W. S. Rosecrans, Brig. Gen'l U. S. A. (retired), Washington, D. C.

T. B. Hood, M. D., late Surgeon U. S. Vols. and Medical Referee Pension Office, Washington, D. C.

Wm. Lawrence, late Comptroller of the U. S. Treasury, Bellefontaine, Ohio.

John B. Batfelder, Gov. Historian of the battle of Gettysburg.

Fountain and Gold PENS Made and Re-
paired.

Editorial.

PLEASE read the notice "To Our Readers" on last page, and encourage us by not only sending in your name for the permanent list of subscribers, but also those of your friends.

WE hope that the two letters of Bishop Hurst in this issue of THE COURIER to our Presiding Elders and Pastors will receive special attention as bearing upon the Columbian Offering for The American University.

THE leaves for the Autograph Album are now ready for the Epworth Leagues. We hope the pastors will encourage their Epworth Leagues to raise an average of one dollar for each member, so that we may have a complete Autograph Record.

LETTER TO THE PASTORS.

The General Conference authorized a subscription or collection on October 16th in all our churches in behalf of the establishment and endowment of The American University at Washington, D. C. This is to be called the "Columbian Offering." A large number of our pastors were either attending their annual conferences, or but just returning from them in October. For this and various other good reasons this cause has not yet been presented to many of our churches. Satisfactory returns have come from a large number and are still arriving from every part of the country.

In the case of the churches where the subscription has not been taken, I will ask the pastor to please arrange with his Official Board for a specified day to be set apart for this purpose. This is not to be an annual subscription, and all that we ask is that one day. What we want is *an offering from every church in the denomination.*

Please do not take a plate collection, but a subscription by cards or personal solicitation. Some of our pastors have given the matter such personal attention that the result has been in every way most gratifying.

The present number of THE COURIER is intended to convey such information as may be helpful in pre-

senting the interests of The American University to the congregations of our church. If any further information is needed, please apply to the office of this paper and it will be forwarded. I would like you to have all the information which is at our command.

Please bear in mind that this subscription on the part of our individual churches is only for one occasion. We have no authority nor desire to ask a second presentation, but only that in cases where the subscription has not as yet been taken it may be attended to as early as possible.

I am glad to report that the interest in the University is still growing. You may be glad to know that among recent contributions are two, one of twenty-five thousand dollars from a gentleman who is a member of another denomination and another of five thousand dollars from a lady.

Please do all you can to have your church do its part in the establishment of this institution, that it may be a tower of strength for all the years to come. Please send me a line giving me the date when the cause will be presented.

The American University, coming before the church with the indorsement of a large number of annual conferences and the unanimous approval of the General Conference of 1892, I feel that it is not too much to ask you as a brother minister to lead the people under your charge to large deeds toward the planting of this Protestant University at the Capital of the nation.

Yours sincerely,

JOHN F. HURST.

WASHINGTON, D. C., Dec. 15, 1892.

LETTER TO THE PRESIDING ELDERS.

MY DEAR BRETHREN:

In the present number of THE COURIER I address a letter to all the pastors of our church who have not as yet taken the Columbian Offering for The American University, in order that measures may be taken as promptly as possible to present the interests of this institution to our people. While you are not pastors and do not have immediate responsibility for the congregations, let me ask you to do what you can to urge the pastors to do their utmost to take a subscription in every case where it has not been taken.

The day appointed was Sunday, October 16th, but in many parts of the country many of the pastors had not returned to their work, and in a large part of

the West the churches had not reached their regular order of fall and winter work. In every case where the subscription has not been taken it is of great importance that one be taken. May I not request that at your quarterly conferences and district conferences, and in your visits to the various churches, in all your ministrations you will do all you can? We have no authority to ask for more than one presentation. The General Conference authorized but one. But this one should be made as full and strong as possible.

This number of our paper contains information suitable for a pastor to use on such an occasion, but should you need further information please drop a line to our office and it will be sent you.

Among the recent facts that will encourage our friends throughout the country is Mrs. John A. Logan's organization of the women of the country into the American University League to raise one million dollars for the enterprise.

We greatly need the help of our Presiding Elders to carry out the important work before us, and I am sure we shall not look to them in vain.

Yours fraternally,

JOHN F. HURST.

WASHINGTON, D. C., Dec. 15, 1892.

A PLEASING ANNOUNCEMENT.

Among the events of the recent past is one of which all our friends will be glad to hear. On October 20th Mr. William Thompson, an honored citizen of Washington, who has a suburban residence at Sligo, Montgomery County, Maryland, accompanied by his wife, made a pleasant morning call upon Bishop Hurst, and at the close put into the hand of the Bishop his check for twenty-five thousand dollars for the American University. This liberal and graceful act will make the donor one of the chief benefactors of the University, both because of the magnitude of the contribution and because of its early bestowment. Such a gift should inspire others from various sources. It will hasten the day when the institution, as yet invisible to the natural eye, shall assume form and take to itself "a local habitation" as well as "a name," on the beautiful and commanding site already secured in the northwest part of our city by the generosity of the people of Washington.

Mr. Thompson prescribes that his gift shall be a part of a fund for the erection of a Hall. He expressed his strong desire for the speedy erection of the first building, and also for the early laying out of the grounds. Bishop Hurst informed him that Mr. Frederick Law Olmsted, the landscape architect of the Central Park, New York, had visited the grounds and made an examination preliminary to its laying out,

THE DECEMBER MEETING OF THE TRUSTEES.

The semi-annual meeting of the Board of Trustees of The American University was held Wednesday, December 7, at the Arlington Hotel, Washington, D. C. Hon. Hiram Price presided, and there were present also Rev. Dr. D. H. Carroll, Baltimore, Md.; Mr. George P. Hunkill, Oil City, Pa.; Rev. Dr. J. L. Hurlbut, Rev. Dr. A. M. King, Rev. Dr. C. H. Payne, of New York; President W. W. Smith, of Randolph-Macon College; Hon. W. M. Springer, of Illinois; Hon. Jacob Tome, Port Deposit, Md.; Mr. A. B. Browne, Mr. Benjamin Charlton, Mr. A. B. Duvall, Hon. M. G. Emery, General S. S. Henkle, Bishop J. F. Hurst, Mr. B. F. Leighton, Mrs. John A. Logan, Mr. H. B. Moulton, and Mr. S. W. Woodward, of Washington. The following were elected members of the Board: Rev. J. W. Reid, Grand Rapids, Mich., Mr. John S. Huyler, New York, and Mrs. P. L. Bennett, Wilkesbarre, Pa. General S. S. Henkle was elected a member of the Executive Committee.

A Finance Committee consisting of five members of the Board was constituted, and Hon. M. G. Emery, Mr. S. W. Woodward, Mr. B. F. Leighton, Mr. A. B. Browne, and Bishop J. F. Hurst were elected as such.

Mrs. John A. Logan was elected President of the American University League, an organization of American women who purpose to raise \$1,000,000 for the University. A contribution to this fund of \$5,000 from Mrs. P. L. Bennett, of Wilkesbarre, Pa., was announced, and also the cash gift of \$25,000 from Mr. William Thompson, of Sligo, Md., towards a building fund. Initial measures were taken towards raising one million dollars during the year 1893, and toward this amount, on condition that it be secured before January 1, 1894. Rev. Dr. George W. Gray, General Secretary, pledged ten thousand dollars.

The Secretary, Rev. Charles W. Baldwin, was absent, being in attendance upon the Central Convention of Presiding Elders, at Elkhart, Ind. Letters explaining their absence and encouraging the work were received from Bishop Thomas Bowman, St. Louis; Rev. Dr. J. M. Buckley, New York; Bishop C. H. Fowler, Minneapolis; Mr. Job H. Jackson, Wilmington, Del.; Rev. Dr. C. C. McCabe, New York; Bishop J. P. Newman, Omaha; Governor R. E. Pattison, Harrisburg; Mr. Charles Scott and Mrs. Matthew Simpson, Philadelphia; Mr. J. E. Searles, Jr., Brooklyn; Bishop J. H. Vincent, Buffalo; and Bishop A. W. Wilson, Baltimore.

The Chancellor, Bishop Hurst, was authorized, in the name of the Board, to present for co-operation to the Trustees and to other friends of the University the proposition for raising ONE MILLION DOLLARS IN EIGHTEEN HUNDRED AND NINETY-THREE.

ALBERT OSBORN, Secretary *pro tem*,

DR. WHEELER TO BISHOP SIMPSON.

ERIE, PA., June 1, 1892.

MY DEAR BISHOP HURST: As you desired, I send you a short account of a suggestion I made years ago to Bishop Simpson concerning the establishment of a great Methodist University in Washington City. It was in the fall of 1854, the year after I was received into the North Ohio Conference. I was stationed at Milan, Ohio, and for some reason, I do not remember what, had occasion to drop a note to Bishop Simpson. In it I spoke of the want of recognition of the Methodist Episcopal Church by the Government at Washington, stating that we had no representative in the President's Cabinet and never had. In this last statement I was mistaken, for Judge McLean had been a member of General Jackson's Cabinet. I then suggested the importance of a great Methodist University in Washington, associated with a periodical through which the Church might influence public opinion in the interests of political morality, righteousness and religion. This is the substance of what I wrote.

Yours truly,

A. WHEELER.

WOMEN AND THE LONDON UNIVERSITY.

The relation of women to higher institutions of learning is worthy of consideration. In 1868 the royal charter of the London University was so extended that it made it possible for the university to extend to women certain opportunities, which permitted them to enjoy partial benefits of the university, but not to enter the arena, and contend for all the institution proffered.

The language of the charter as amended August 27, 1868, is as follows:

We did, amongst other things, will, grant and ordain that the said Chancellor, Vice Chancellor and Fellows should have power to cause to be held from time to time as they should deem expedient, a special Examination of Women being Candidates for such Certificates of Proficiency as therein mentioned, and after every such Examination to grant to such Female Candidates in such mode and on compliance by such Candidates with such conditions as the Chancellor, Vice Chancellor and Fellows of the said University might determine, such Certificates of Proficiency, as the said Chancellor, Vice Chancellor and Fellows should from time to time by regulations made in that behalf determine.

Ten years after this, May 4, 1878, the charter was again amended, and a much broader and more advanced position taken upon the subject. The language of the charter at that time is as follows:

And Whereas it is expedient still further to extend the benefits of the said University, and for that purpose to enlarge the powers of the said Chancellor, Vice Chancellor and Fellows so as to enable them to examine for and after examination to grant to Women any Degrees or Certificates of Proficiency which they have power to grant to Men:

NOW KNOW YE, that We do, by virtue of our Prerogative Royal and of our special grace, certain knowledge and mere motion, by these presents, for Us, our Heirs and Successors, will, grant and ordain that all the powers and provisions relating to the granting of Degrees and Certificates of Proficiency contained in our said recited Letters Patent of the sixth day of January in the twenty-sixth year of our reign shall henceforward be read and construed as applying to Women as well as to Men, and that except as hereinafter mentioned all the parts of our same Letters Patent shall be read and construed as if the extended powers hereby conferred were contained in our same Letters Patent.

The women were not to be members of the Convocation until invited to become so by the Convocation. In every other respect unlimited privileges were extended to them.

The inquiry would naturally arise, What has been the result of this remarkable change in the charter of this great institution? In order to form a basis of deduction we give the following facts as reported in the catalogue of 1890 and 1891.

The figures cover all the departments of the University as organized for the past seven years, commencing with 1883. This is probably sufficient data from which to draw correct inferences. We hope from time to time to give the facts upon this subject with reference to other institutions of similar grade.

PERSONS APPLYING FOR MATRICULATION.

Candidates—men, 12,857; women, 2,016.

Passed—men, 7,164; women, 1,255.

INTERMEDIATE EXAMINATION IN ARTS.

TOTAL NUMBER AT ALL OF THE EXAMINATIONS.*

Candidates—men, 23,876; women, 3,179.
Passed—men, 13,499; women, 1,955.

AN IMPORTANT GIFT.

Through the gift of Mr. John E. Searles, jr., of Brooklyn, N. Y., one of our trustees, and who represented the Board among the speakers at the University mass-meeting held at Omaha last May, this historic Bible becomes the possession of The American University. Mr. Searles recently purchased it from Rev. W. H. Boole, who in 1870 purchased it, through Philip Phillips, from George John Stevenson, of London, England. The following original certificates accompany the precious volume:

The Rev. Samuel Wesley, A. M., was appointed Rector of Epworth at the end of the year 1696. He lived to enjoy that preferment till the spring of the year 1735, a period of nearly forty years. During that whole period the Bible used by him and by his curates, one of whom was for some time his son, the Rev. John Wesley, is this volume. It continued to be used in Epworth Church till about the end of the reign of King George, when another and smaller one took its place and this was preserved in the vestry. In October, 1834, the Rev. Robert Aitken, then an exceedingly popular clergyman, preached some special sermons in Epworth Church, and on the following day Mr. Sharp, churchwarden of the parish, presented this old Bible to Mr. Aitken, who immediately on his arrival in London gave the book to Mrs. Smith, youngest daughter of the Rev. Dr. Adam Clarke, and when that lady died, this with other Wesley valuables was disposed of to cover the cost of her illness and funeral. This Bible was bought by the present writer, G. J. Stevenson, as executor to Mrs. Smith. On the blank leaf, opposite

to St. Matthew's Gospel, Mr. Aitken has written as follows: "This Bible was used in Epworth Church by the Rev. Samuel Wesley, father of the great and good John Wesley, during the term of his incumbency. It was presented to me by Mr. Sharp as a most valuable relic of the Wesley family, on my visit to Epworth in the month of October, eighteen hundred and thirty-four; and its identity was most clearly attested by unquestionable testimony.—R. AITKEN."

EYRETON, October 28th, 1834.

GEO. JNO. STEVENSON.

[Letter of Philip Phillips, attached to invoice.]

NEW YORK, March 27, 1870.

The Bible referred to in the above invoice I first saw in England in the possession of Geo. J. Stevenson, and was held by him as a most precious relic of the great and good Wesley.

Returning to New York, the fact of the existence of this rare and valuable Epworth Wesley Pulpit Bible was casually made known in conversation with Rev. W. H. Boole, who desired me to immediately write and learn if it could be obtained for any consideration. Owing to pecuniary embarrassments having overtaken the owner, he reluctantly consented to dispose of it to me. And I this day transfer the same to Rev. W. H. Boole. PHILIP PHILLIPS.

This Bible was seen by thousands of visitors at the Ecumenical Methodist Conference, held in Washington in October, 1891, and it will ever hold a conspicuous place among the relics of Methodist history.

THE RIGHT RING.

The following article, by Rev. Charles W. Buoy, D. D., of Philadelphia, clipped from the *Peninsula Methodist*, has the right ring. We must not think of trying to accomplish so great an undertaking as building a great university with a few dollars which simply float in upon us. We have opened an account with every church in Methodism, and hope that each church will raise at least one dollar per member. This would give us \$2,500,000. Some of our most prominent pastors, such as Drs. Buoy, Chapman and Hulburt of Philadelphia Conference, are making private appeals and securing generous responses.

Brethren, by one united effort let us show the world what the Methodist Episcopal Church can do when it makes a united effort.

"In reading your most excellent paper, I noticed one offering for the American University, and was not a little surprised that the pastor only took a plate collection, when the object was one of such magnitude. It seems to me that a subscription might be taken in our churches generally that would at least average one dollar a member. I took my offering last Sunday, and during this week have been hunting my absentees, trying to gain a subscription from every one. I want all friends to know of the great work started by Bishop Hurst; for I am firmly convinced that if Protestantism can know of the meaning of this great work, it will respond and millions will be collected. The question of its necessity can be summed

up in one inquiry: "Shall the higher thought of the nation be captured by Rome, or shall it be ruled by Protestantism?"

"The answer to that inquiry is in the power largely of the ministry of the Methodist Episcopal Church. The Roman clergy for their University in Washington went from door to door in Philadelphia, and some of us in Protestant bonds of fellowship are doing the same in the same city, being determined by all means to build our great school.

"May we not have in all the churches a personal canvass for this new ministry of our beloved church?"

THE BEGINNINGS OF OUR FUNDS.

Aside from the Land Fund of \$100,000 for the purchase of the site, provided for by the citizens of Washington, donations have been received upon each of the following propositions:

1. The young people of the Church under the leadership of the Epworth League, Christian Endeavor, and other young people's organizations, to raise \$500,000 to build an Epworth Hall and endow an Epworth Professorship.

2. \$500,000 to be raised by a donation of one dollar each to build the Administration Hall in honor of and to bear the name of Abraham Lincoln.

3. 1,000 preachers to give one hundred dollars each to build an Asbury Memorial Hall in commemoration of the services and labors of Francis Asbury, our pioneer American bishop.

4. 5,000 persons to give one hundred dollars each to endow a School of Discovery.

5. One hundred persons to give \$10,000 each to establish one hundred Fellowships.

6. 1,000 persons to give \$1,000 dollars each for the General Fund.

7. \$1,000,000 to be raised by the women of the country organized into the American University Leagues under the leadership of Mrs. John A. Logan.

STEPS OF PROGRESS INTERESTING DATA.

1850-1880—Early suggested by Bishops Simpson and Ames, Dr. (now Bishop) Newman, Dr. Alfred Wheeler, and Rev. William Arthur, M. A., of England.

1880-1890—A topic of conversation among our educators and public men.

Jan. 25, 1890—Option of \$1000 paid on land with money guaranteed by Mrs. Catherine E. Hurst.

Feb. 14, 1890—First subscription of \$100 toward the proposed \$100,000 from Methodist preachers by Rev. Richard W. Copeland.

Feb. 28, 1890—First installment of \$20,000 paid on site; transfer of title, Davis, Achsah, to John F. Hurst, \$100,000, parts of tracts known as "St. Philip and Jacob" and "Friendship."

March 25, 1890—Public meeting at the Metropolitan Church. Addresses by Bishop Hurst, Dr. W. A. Bartlett, Senator Hawley, Representative Elijah W. Morse and Bishop Newman.

April 14, 1890—Letter and contribution from George Bancroft, the historian.

April 27, 1890—University Sunday in Methodist Episcopal Churches of Washington.

May 13, 1890—Resolutions of approval by twenty Methodist students in Berlin, Germany.

May 13, 1890—Resolutions of Bishops approving.

Nov. 3, 1890—Planting of eighteen Oriental Plane trees, given by T. W. Tallmadge, on University grounds by the Bishops.

Nov. 3, 1890—Mass-meeting at Metropolitan Church, Washington; letter from President Harrison; addresses by Bishops Bowman, Ninde, Vincent, Warren and Hurst, and Major H. O. Cloughton.

May 15, 1891—Resolution by the Epworth League Board of Control, at St. Louis, Mo., approving.

May 28, 1891—Certificate of Incorporation, District of Columbia.

May 28, 1891—Organization of The American University, at Arlington Hotel, Washington. Election of thirty-six trustees, of Chancellor, Secretary and Registrar. Transfer of title to University site by Bishop Hurst to Trustees.

August, 1891—Appeal by Bishop Hurst for ten millions of dollars.

October, 1891—Presentation of Historic Chair, made from wood of City Road Chapel, to the University, by Dr. T. B. Stephenson, President of Wesleyan Methodist Conference of England.

October 15, 1891—Reception to the Methodist Ecumenical Conference by the Trustees at Arlington Hotel. Addresses by Bishop Hurst, William Arthur, Hugh Price Hughes, Bishop Hendrix, Bishop Newman, Dr. Carman, Dr. W. A. Bartlett, Dr. J. W. Hamilton and Dr. J. M. Buckley.

October 17, 1891—Visit of members of the Ecumenical Conference to University site. Addresses by Bishop Foss, Dr. T. B. Stephenson and ex-Governor John Evans, of Colorado.

October 20, 1891—Gift of gold watch and chain by a lady eighty-eight years old.

Nov. 11, 1891—Resolutions of College Presidents, Cleveland, O., at College Association of the Methodist Episcopal Church, approving.

Feb. 12, 1892—Certificates for contributing members of the Epworth League issued.

March 31, 1892—Meeting of Trustees. Election of eleven Trustees.

April 20, 1892—The American University League, a plan to organize the women of America in the interest of the University, outlined to the Executive Committee, at their request, by Mrs. John A. Logan.

May 8, 1892—American University day at General Conference, Omaha.

May 25, 1892—The General Conference at Omaha adopts The American University, approves its Trustees, and authorizes a Columbian Offering in all Methodist Episcopal Churches, on Sunday, Oct. 16, 1892.

July 7, 1892—Election of General Secretary by the Executive Committee.

Oct. 20, 1892—Gift of \$25,000 from William Thompson, Washington, D. C., toward a Building Fund.

Dec. 7, 1892—Semi-annual meeting of the trustees. Election of three additional members of the Board, making forty-six in all. Election of National Officers of The American University League.

Contributions.

THE JOHNS HOPKINS UNIVERSITY.

BY PROFESSOR M. D. LEARNED, PH. D.

The Johns Hopkins University was opened in the fall of 1876, and, as the Centennial University, marks the beginning of a new epoch in American education. The older American universities were rather colleges with university appendages than universities proper. To be sure, some of them were equipped with the traditional faculties of theology, law, medicine, and philosophy; but the method and spirit of the instruction were directed for the most part toward the preparation of students for the practice of their respective professions rather than toward research and discovery. American scholars had contributed no small share to the scientific results of the first century of our national history, but this work was rather the accomplishment of individuals than the organized effort of a distinct school or system of schools.

The conflict between the *gymnasium* and the *real schule*, between the humanities and the sciences, between the classical and moderns, threatened to sweep away the older traditions of academic work and inaugurate new ones. But the old mooring which held us to the past remained firm, and readjustment, compromise between the old and the new, seemed the proper solution of the problem. This compromise by adjustment or selection was expressed by President Gilman in his Inaugural in these words: "All sciences are worthy of promotion; or in other words it is useless to dispute whether literature or science should receive most attention or whether there is any essential difference between the old and the new education. * * *

As it is impossible for any university to encourage with equal freedom all branches of learning, a selection must be made by enlightened governors, and that selection must depend on the requirements and deficiencies of a given people in a given period. * * * Individual students cannot pursue all branches of learning, and must be allowed to select under the guidance of those who are appointed to counsel them."

In a word, specialization must become the watchword of the new education. As in the arts and trades, so in the domain of letters, differentiation and concentration are the conditions of success.

The new education, then, to meet the demands of this exacting age must train specialists—specialists in classical literature and philology, specialists in modern literature and philology, specialists in mathematics and the natural sciences, specialists in history and politics.

It was on the crest of this new wave of educational revolution that the *idea* of the Johns Hopkins University came in. A university in the new spirit of the times, a school or system of schools, where both letters and science, the old and the new, should thrive side by side, each stimulating the other.

ORGANIZATION.

The Johns Hopkins University began its work by the organization of but one of the traditional faculties, that of philosophy. The reasons for the choice of philosophy are obvious, as this faculty comprehends those subjects most closely connected with modern culture—languages, literature, history, political economy, mathematics, chemistry, physics, and biology. It is interesting and significant that among the first departments organized the oldest and the newest studies—Greek and biology—were represented. In

the selection of instructors the University sought men who represented distinctive lines of inquiry, drawing as far as possible from the ranks of American scholars. It was necessary, however, particularly in those early days, to call specialists from abroad.

COLLEGIATE WORK.

Collegiate or undergraduate work in the early history of the University was quite subsidiary to the graduate departments. It was the natural result of the conditions under which the students labored, as in many cases those coming with the bachelor's degree from other colleges were obliged to do one or more years of preliminary work before entering the graduate courses of the University. It was, therefore, a necessity that under-graduate courses should be offered under the auspices of the University. In the organization of collegiate courses, the work of the graduate departments was constantly kept in view, and the under-graduate work leading up to the degree of bachelor of Arts was differentiated into separate groups, seven in number, each requiring the same number of years for its completion. These groups are: I. Classical; II. Mathematical-Physical; III. Chemical-Biological; IV. Physical-Chemical; V. Latin-Mathematical; VI. Historical-Political; VII. Modern Languages. Though in the case of all of the groups certain studies are required, there remains ample scope for election without materially affecting the symmetry of the collegiate course. This departure from the old academic traditions is amply justified by the results already obtained. A great advantage was gained in point of time. But perhaps the chief advantage of this group system so closely connected with the graduate work of the University has been the stimulus which both the methods and the men of the University departments have exerted upon the under-graduate students.

SPIRIT AND METHOD OF UNIVERSITY WORK.

The University, from the first, has combined instruction with investigation, and while it has always selected its faculty with a view of securing good instruction, the one predominant characteristic of the institution is the spirit of research which has been the inspiring genius of the University, and has shaped its unique career in America. This atmosphere of investigation gives color, form and direction to the vague ideals of the aspiring student. In the quest of new truth his crude purpose of acquiring the known is but a milestone in his study, and the mastery of method as well as of matter becomes his equipment for the discovery of new truth.

As regards method, University instruction consists chiefly of two features, the lecture and the seminary. Though the relation of these two forms of instruction varies in different departments, they are, nevertheless, clearly recognizable in all.

By means of lectures the instructor presents the general principles of the subject, or group of subjects, in hand.

The seminary, on the other hand, may be characterized as the workshop or laboratory of a given department, but in a somewhat extended sense. In it are assembled the instructor and advanced students of a department for purposes of analysis, interpretation, and investigation. Thus the experience of the instructor and the inquiry of the student are brought into closest relations, and co-operate in determining new methods and finding new results. A variation of the seminary is found in the journal meeting or club. In these meetings very many perhaps most of the researches made by the members of the University have

originated. To show what has been produced in one department of the Philosophical faculty alone, that of Philology, it will suffice to consult "Bibliographia Hopkinsiensis," published in 1891.

LIBRARIES.

University work has been greatly facilitated by the system of open libraries. From the first, great care has been exercised in the selection of books and monographs. At the opening of the University there was already a well assorted collection of books, about 100,000 in number, known as the Peabody Library, in this city. The reference libraries of the University have been equipped with a view to supplementing the Peabody collection by such special treatises as are of value to the investigator. In more recent years the Enoch Pratt Free Library has come to the further aid of scholars by purchasing large collections of modern authors in English, French, German and Spanish. Thus the University, by supplying what was not accessible in these two large libraries in the city, has collected some 50,000 volumes, and so has access to about 300,000 in all. These facilities are further increased by the easy access to the great Congressional Library at Washington.

One feature of the library system of the University deserves special mention, viz: the accessibility of the books. All special departmental collections and alcoves are open to students during library hours, and with the exception of a few reserved books, works may be taken out for an indefinite period by both instructors and students.

A very efficient part of the University library equipment is the large collection of current learned journals and reviews received as they appear. These are about 1,000 in number, and present the latest researches of the civilized world in the languages of the respective countries. Through this scientific exchange, members of the University are enabled to keep in close touch with the work of their respective departments.

THE MEDICAL FACULTY.

It was the purpose of the trustees from the first to organize other faculties besides that of Philosophy as the Johns Hopkins Hospital buildings should approach completion. With this end in view certain departments of the faculty of Philosophy, particularly Chemistry and Biology, have directed special instruction, known as the Preliminary Medical Course. The medical faculty and the Hospital Staff at present constitute the nucleus of the Medical School and represent the departments of Psychiatry, Pathology, Gynecology, Surgery, Anatomy, Principles and Practice of Medicine. The medical work so far has been in the more advanced phases of the science. In the near future the medical faculty will doubtless be fully organized and opened to the candidates for the degree of M. D.

Beginnings of other faculties have been included under that of Philosophy. The courses in Historical Jurisprudence, Administration, and Public Law, for example, are the germ for a future faculty of Law, and the department of Semitic languages would materially contribute to the organization of the faculty of Theology, though the formation of this faculty is not in the immediate plans of the University.

THE DRILL-MASTER.

BY REV. C. C. M'CALL, D. D.

From World-Wide Missions.

All the great enterprises of Methodism await his advent. The time has come when we *must* attempt and accomplish great things for God, or fall far behind in the struggle for

the supremacy of our holy religion in this world.

We need money—not by the hundred thousand only, but by millions. The Church ought to be in position to make her power felt in one year throughout the world, like an electric shock. What an impression it would make upon mankind if the Methodist Episcopal Church should build and endow the American University in a single year, and make it the Missionary Training School for all the peoples and tribes and tongues of this babbling earth! It might be done. If the twelve thousand pastors of the Church, who are sworn to utter loyalty to all that concerns the propagation of our holy religion, would only work together, fill their mouths with arguments and their hearts with burning zeal and bring the mighty logic of the facts to bear upon the people, it is possible to secure an extra penny a day from each communicant for this sublime purpose, and that would make us a thank-offering of

TEN MILLIONS OF DOLLARS.

five millions for buildings and five millions for endowment, and thus launch into existence a power which would confront the false religions of the world in every land with the Gospel of Jesus Christ.

TEN MILLIONS OF DOLLARS!!

a fitting offering to lay at the feet of the King of kings.

Nor will this enterprise interfere with missionary collections. The million and a quarter by collections only will come. There is a steady upward movement. The army of Emmanuel will never halt again. Fortress after fortress will surrender at the command of our Divine Leader. O for a new baptism of faith and hope and dauntless courage! O for a million Joshuas and Calebs to shout along the lines, "We are fully able to go up and possess the world!"

Where is the drill-master who can call every soldier of Jesus Christ to a life of sacrifice and consecration and tireless effort!

"All at it! Always at it!" When will those words truthfully describe the rank and file of the Methodist Episcopal Church? Our victory would be the victory of Protestant Christianity for the whole world. Where we lead, all the other denominations would surely follow.

We want the drill-master to turn this great undisciplined host of Methodists into an invincible army. It is the one great need of the hour. The speedy conquest of the world depends upon his coming. Who is he, where is he, whose potent voice shall reach every Christian heart and every Christian home with a divine authority that shall summon all the timid and the half-hearted and the unconsecrated millions to the standard of the Cross of Christ?

GLADSTONE AT OXFORD.

BY REV. W. H. EGLIN, B. D.

From the Western Christian Advocate.

A young man, strong and healthy, glowing with knowledge and truth and love, is grand. A man who, in the prime of life, stands among the first of men, is great. But an old man, in full possession of all that youth can give and all that age imparts, is sublime.

These are the thoughts that come to our minds as we listen to the greatest of all living Englishmen, William E. Gladstone. Here, we say, is one that may well be called a sublime old man.

The man who is the political leader in England to-day ranks among her greatest of scholars and literary men. The prime minister is perfectly at home in addressing a

body of students and professors; for he is in the fullest meaning of the term a "university man," well fitted to take a professorship in any line of study to-day, or stand at the head of a great university.

Not only does he speak in a general way of various topics, but even dares to speak with authority upon subjects that require the profoundest research, and upon which specialists have spent their whole lives.

Oxford has sent out from her classic walls two men who have elevated, broadened, and invigorated the thought of two continents—Wesley and Gladstone. One, a theologian; the other, a statesman. Gladstone was a hard student and a brilliant student. He took first class honors at Oxford in both mathematics and classics.

I desire to describe a visit that this famous man made to the university where his college days were spent. The occasion of the visit was to deliver there the first of a series of lectures for the benefit of the university students. The subject of the lecture was "Mediæval Universities."

This subject at once presents to us a vast field of research in science, history, and theology. To give a comprehensive, logical, and unbiased account of all that this topic contains, is indeed a great undertaking. But here is a man, eighty-three years old, laying aside for awhile the pressing political duties, tearing himself away from the exciting debates of Parliament, to take up this, so different, so difficult, but yet, to him, so genial a task. The London *Daily Chronicle* speaks of this occasion as follows:

"Assuredly, age can not wither our venerable premier, nor custom stale his infinite variety. It might have been assumed that the heavy burdens of office would be sufficient for even a comparatively young man holding such a responsible position. But here we have the aged veteran repairing to the seat of learning which he quitted with the highest honors before most of us were born, and discussing there the question of mediæval universities, just as though a Home Rule problem had never been heard of, and Cabinet Councils were things unknown. Such intellectual virility must endear Mr. Gladstone even to that section of his countrymen most opposed to him politically, and it must make us all proud that our century and our own land has produced so notable and versatile a man."

The lecture was delivered at the Sheldonian Theater. This building has a seating capacity of two thousand. Those who were not connected with the university in any way had no chance at all of getting into the building. All who wore the "cap and gown" were to be admitted at a certain time. But before that certain time came, the enormous, eager, pushing crowd of students that swarmed on every side said plainly, "Let him that is strongest enter first." To many like myself, who are unwilling to engage in such a contest, the case seemed rather hopeless. Some who were very anxious did not wait to go through the gate but climbed over a high picket iron fence, tearing their clothes in the operation. You would have thought that the students were trying to escape from a burning building. The *Oxford Review* well describes what took place:

"The crush to obtain admission at the gates in Broad Street was something to be remembered by those who were in it, the single door being quite inadequate to carry off the surging mass of undergraduates as they forced their way through the gates and over the railings. Luckily, the gates on either side of the entrance were forcibly thrown down, otherwise some must have been fatally crushed, and the scene of the crush afterwards gave ample evidence of the struggle gone through, railings being bent and the

ground littered with remnants of caps and gowns. If anything, it was even worse inside. The heat on the stairs was almost unbearable, and men had to be assisted up by friends. Had one of them had the misfortune to fall, he would have stood but a poor chance of getting up again. How many fainted away we cannot say, but there were at least half a dozen; and many who did manage to reach the gallery had to leave owing to the effects of the crushing they had received."

This detailed account of the gathering here has been given in order to show how popular this leader of the Liberal party in England is among students of a university that is decidedly Tory in its management, and has the great leader of the Tories, Lord Salisbury, at its head. Speaking of Oxford, Gladstone once said: "I did not learn there what I have learned since, to set a due value on the imperishable and inestimable privileges of human liberty."

I shall never forget the first time that I looked upon that sublime old man, eighty-three years old, standing there, arrayed in his doctor's robes of bright red, delivering his lecture to that vast audience. His voice was loud, clear, pleasant, well modulated, and could be heard distinctly in all parts of the building. If it were not for his gray hair and somewhat wrinkled face, you might think he was thirty-eight instead of eighty-three. There was nothing in his voice or gesture to indicate old age; and though he spoke for one hour and a half, he seemed even more vigorous at the last than he was at the beginning. The lecture was a scholarly and eloquent production, that held the attention of that packed and uncomfortable audience until the very end. The London *Daily Times* speaks of the lecture as follows:

"It was a remarkable performance in every way; it would indeed be phenomenal in the case of any other prime minister than Mr. Gladstone. But from him the world seems to expect these excursions into strange fields, these wanderings in the wilderness."

Gladstone spoke in high praise of John Wesley, saying: "The remarkable will, energy, and character of John Wesley, now, after a century and a half, are represented in the English-speaking race by organized bodies of adherents estimated at not less than twelve millions, and by some at such a high figure as to exceed twenty millions."

Perhaps the most noticeable feature of the lecture was the high place the speaker assigned to theology. He made it the foundation of every true university, and expressed a strong desire that Oxford should never depart from an idea essentially Christian. He pointed out the danger that lies before universities to-day in these words: "The idea that they are contracting to turn out machines of so many horsepower, rather than to form character, to rear into true excellence that marvelous creature they call man."

The orator wisely reserved this supreme thought until the last, becoming earnest and still more earnest as he quoted the motto of the university—"Dominus illuminatio mea"—and ended with a long but brilliant sentence: "May that root and atmosphere and light which yielded the best in leaf and flower and fruit, and which fed humanity up to its highest excellence for the performance of its great work in creation, be ever more and more, from age to age, the root, the atmosphere, and the light which shall sustain the life of Oxford in the generations yet to come!"

You should have heard the shouts and the clapping of hands, and seen the waving of caps that took place as Gladstone finished his lecture, and, bowing gracefully, took his seat. The prime minister was escorted to the carriage that

was awaiting him, at some distance from the place of the lecture, by many men of distinction. Most of these men were far younger than he, but none of them walked along with quicker step or better balance than that sublime old man, who in his eighty-third year is still at the front, leading his countrymen on to yet greater achievements in the future.

Oxford University, England.

THE METHODIST EPISCOPAL CHURCH AND EDUCATION.

H. H. MOORE, D. D.

From Pittsburgh Christian Advocate.

If on examination it is found that the reading and scholarship of the times are as superficial as their scope is wide in extent, we shall have but slight cause for congratulation or boasting. This is a fast age, and everything is affected by it. In all manufacturing establishments the idea of celerity by the use of machinery is prevalent; this notion has entered the counting-room in the form of lightning calculators, shorthand writing and typewriters; and it would be strange if schemes of education were not influenced by it. As a means of compassing this end school books have been multiplied until they have in variety become a nuisance. The boys and girls have been "helped" till they have but a faint idea of helping themselves. Instead of the midnight lamp, and toil, and time, and patience as the necessary means to an education, a perpetual search is kept up for some cross-cut easy road to scholarship. Probably not less than thirty or forty text-books may be found in every high school, and each one is a last and improved method of facilitating the acquisition of an education. Instead of delving in the roots and working up the trunk of the tree of knowledge into exact thought, pupils spend their school-days in hopping around among the small branches, plucking the tender blossoms or feeding upon the fruit.

Numerous as may be the branches of learning, and far and wide as they may extend, at root they are few in number. We arrange and specify them as follows: (1) Language, including words, orthography, grammar, rhetoric, logic, etc. (2) Mathematics, all that pertains to numbers and quantity—all that can be made to play an abstract part in time or space. (3) Physics, embracing astronomy, geology, chemistry, mechanics, and all the properties, forces and laws of matter. (4) Biology, or all that relates to the vital world, including mind, the life of the body, of animals, and of the vegetable world. As the organic world is a vital product, physiology, anatomy and medicine would come under this head. (5) Literature, embracing history, metaphysics and all branches of the higher philosophies. (6) Art, embracing poetry, painting, sculpture, music, engraving, photography, etc.

Of course, the trunk lines of learning may be put in other forms, but the above classification serves our purpose because, as we think, it is natural and logical. Starting with these as the basal elements of learning, the city high school should be of such a character that all its bright-minded boys and girls will be fitted for college as early in life as their eighteenth year. This implies hard work on the part of the pupil and conscientious thoroughness on the part of the teacher. The high school and college should be so nearly related that the passage from the one to the other will be possible to all the ambitious young men and women of the country.

The nation is suffering from a famine of college-bred men and women. What proportion of our judges, lawyers, statesmen, clergymen, physicians, teachers, capitalists, mer-

chants, manufacturers and farmers are graduates from a college of any grade? Taking these classes as a whole, probably not more than one in a hundred. Perhaps one-half the judges are graduates, a third of the lawyers and clergymen, a fifth of the physicians, teachers and statesmen, and not more than one in a thousand of the mechanics and farmers. We say, then, tone up the high school, academy and seminary, and if necessary make more flexible the college, that the two institutions of learning may be brought more fully within supporting distance of each other.

On every suitable occasion we enter our protest against the centralization, in a few heavily endowed universities, of our educational interests. As the church becomes able and population increases, our colleges should be multiplied, that they may become convenient to the young people. They should confine themselves to their legitimate business, and never undertake university work. It matters not what a man's ability, culture or learning may be, such is the commanding position of the college that, unless favored with its advantages, he is likely to feel some deficiency when in the circle of educated people. Horace Greeley was an illustrious example of this class of really great men. It is true that a host of college graduates amount to but little, but the fault is their own, and the fact still stands that it is difficult for an able man to attain and hold a rank for scholarship equal to his merits independent of the help of the college.

To such as may desire to prosecute still further their scholastic training, the doors of our universities are open. The church needs but few educational centers of this kind, and in this respect its wants are fairly well supplied. It would be well if the high school and academy could always be in the hands of college graduates, do and do thoroughly preparatory work, and attempt nothing more. As an intermediary between the academy and the university the college would find its appointed field of labor.

The university extension and Chautauqua movements are simply actuated by the spirit of the times, which demands, especially for this republic, the education of the masses. It perfectly accords with the genius of our church to fall into this line of action, without letting down in the least the standard of education. The immense masses of humanity which are annually dumped upon our shores from other lands, bound in soul if not in body in the chains of popery or heathenism, must be educated and Americanized as a condition of the continuance of this nation. Only a flexible scheme of education can reach these varied conditions.

What the church mostly needs is, not schools nor money, but pupils—bright, ambitious young men and women. Few of these, however, can meet the heavy expenses incident to a residence far from home, and fortunate are they if the halls of a college of any grade are accessible. President Garfield spoke from experience when he said that a log anywhere with Mark Hopkins sitting on it was a good college. The need of the times is the scholarly enthusiast as a teacher.

Chautauqua, New York.

THE UNIVERSITY THE DEFENDER OF THE FAITH— CONCLUDED.

BY BISHOP C. H. FOWLER.

It is impossible but that these convictions, flowing out of earnest lives that have drifted into the night, will have very perceptible influence upon our age and the age next at hand. It matters not that their exclusive devotion to

science disqualifies them to determine great questions which they have neglected for years. There are the towers of their great abilities and world-wide reputations holding aloft this lurid and false light over the stormy reefs of life. In some way we must turn out of the latest and brightest science some magnesian or electric search light, like the great Agassiz, or like Principal Dawson, who shall clearly reveal every concealed rock or approaching foe, or men like Professor Virchow, the eminent German Pathologist, who the other day in the Anthropological Congress in Vienna, showed the drift of science away from Darwinism. As I read Providence, this is the loftiest work required of us as a church.

The steady and believing preaching of the gospel must be pushed with all the old-time vigor. The spirit and faith of our fathers must never be abated. The gospel, and the gospel alone, can do the work of saving the hurrying multitudes. Converted men, having the good news and telling it, will be honored of God in reaching men; these are the soldiers that go into the field and win the victories. But some great workers must keep them supplied with the latest and best weapons, must manufacture the cartridges for them to use. It would be idle to send out an army without ammunition to be butchered by a skilled, equipped and merciless foe; it would be crime beyond measure. No less would it be a crime for our church to send out our children and young people into the great conflict of ideas and strifes of opinion without furnishing them means for defense and conquest.

We are in a life and death struggle. The challenge is to fight to the death. There is no room for quarter. We could not accept it, even if it could be given. The enemy sails down upon us in the iron walls of his Merrimac. Courage is useless against him. We can stand on the devoted deck of the Cumberland and go down with the flag above us, with all the spirit of patriots and all the courage of martyrs, but we go down none the less. We leave our homes, our cities, our treasures, our country, the open and easy spoil of a ruthless and un pitying foe. Our wooden walls are a mockery and a crime. We have sacrificed ourselves, wrecked the liberties entrusted to us, and desolated the country that looked to us for protection. We are without excuse. It was our business in some way to prepare for this peril. We must have our Monitors ready. To fail of that is to lose all. To fail of this is to deserve shameful and ignoble graves. So, in this great moral conflict of all centuries, where everything is in peril, it is folly, it is madness, it is treason against God, not to forecast the conflict and be ready for it. If the enemy has an armor of chilled steel and nickel, we must be as well equipped as he. Anything short of this is saying to God, we must have a harvest, but we will not sow any seed. As certainly as God would let us starve if we did not sow and reap, so certainly will He let us be scourged from the face of the earth if we do not prepare to defend the great truths He has entrusted to us.

It is true that Herbert presented beautiful and adroit and specious systems of skepticism, and that Butler's Analogy hardly made a perceptible ripple on the surface of English society. It is also true that John Wesley's cobblers and miners, with the knowledge of sins forgiven, stood up among men and testified that the Son of God hath power on earth to forgive sins, and men listened, and all England heard and felt the rising tide of spiritual life. All this is true; but this is a widely different age. This is the age of reading and questioning. In that age few could read, and the high price of books prevented them from

reading much. A single copy of a small paper cost about all a laboring man could earn in a day. The works of Spinoza and Herbert and Tindal were beyond the reach of the common people. Only the well-to-do could afford the luxury of a newspaper or of books. Not so to-day. The cheapness of printing and the abundance of money, and the universality of the ability to read, have brought all the great problems to every man's door, into every man's life. In some way these doubts must be met.

The Cyclopedists in France did through literature a little of what is now being done in the English language. They so popularized and spread their skepticism that it took possession of the popular mind. There were no evangelical truths to oppose them, and Romanism furnished no scholars to answer them; so events answered them in the Reign of Terror. God answered them with the guillotine. God dealt with the few who monopolized the culture and knowledge of the time, and left Voltaire's wit and Rousseau's rhetoric to poison the people and furnish no antidotes. He held them to a strict account. It became equivalent to a death warrant to have either culture, or wealth, or inherited privileges. Flight in the disguise of peasants was the only hope. This case is more like ours than was the skepticism of England in the days of Wesley. We combine the distemper of both lands and the perils of both and the duties of both. Papers too cheap to steal and too numerous to be mislaid reach into every crevice and to every level of society. The gang under the sidewalk that conspires against the public peace and safety, read every language, know much of every science, and discuss every social, political and religious problem.

There is hardly a club that does not read and absorb the doubts of the great scientists. There is hardly a society that cannot manufacture dynamite bombs. The magazines and papers and lectures pour the whole volume of scientific, exegetical and critical doubt over the whole body of society. We are shut up to the stubborn choice between answering this doubt or losing all saving power in society.

It is a fearful crime against humanity to poison the sources of knowledge. The corrupt and godless court of Charles II. corrupted and poisoned the very springs of information concerning Oliver Cromwell. For centuries he stood as the monstrosity in English history. His was the name with which English nurses frightened the children. The old hero had to wait for Thomas Carlyle to come and resurrect the real Cromwell. In our day great efforts are being made by the inspiration from the Tiber to mutilate and belittle the irregular, yet gigantic and substantial, character of Henry VIII. Compare the last edition of Appleton's New American Cyclopadia with the edition that preceded it. Study the changes in every article that touches Romanism, or the issues between Romanism and Protestantism, and you will see the hand of the Jesuit. A new generation will soon be here, with convictions from a mutilated history. It is far-reaching to poison the sources of knowledge and of convictions.

Who can measure the consequences of spreading the blight of skepticism over all our advanced scholarship? Already one of our new and great universities is creating evolution clubs. The issue is upon us. The polished stiletto is aimed at the heart of the universe. "The Great Companion is dead." God, the personal God, the only possible God, the Eternal Father, is no more. Jesus Christ ceases to be the Son of God, and becomes a Jewish tramp, wandering about Palestine with a group of common women. The Holy Ghost is an inconceivable chimera.

The Bible is an ancient book of fables, no longer able to stand the searching glance of higher criticism. Salvation is a delusion. The Church is a tool of state-craft or a net of priest-craft. The saints are the monumental villains or fools of the past. The martyrs are the fanatics of the first water, and all that can logically remain of religion is the baseless fabric of the imagination. This is the issue, stripped of its fine rhetoric and technical terms, its assumption of wisdom and patronizing compensation.

It is impossible to measure the consequences involved in the great struggle of thought in our time. Brothers, stand a moment on the brink of the bottomless abyss. Peer into its gloom. What would you accept as compensation for your loss in having all this established as true? Could you conceive of anything that could form a motive for which you could want this dark program carried out? Could millions of worlds of solid gold as large as our sun be any inducement?

I stand on this platform, look into the faces of immortals, and look up toward the Eternal, and I can conceive of no motive that could reconcile me to dropping into the abyss that skepticism opens before us. Fearful as must be the condition of the lost, yet there seems to me something majestic in a full-grown man, clad in the power of his freedom, striding down the eternities, facing the awakened wrath of Almighty God, peeled and scarred by the thunderbolts of unforgiven sin, overwhelmed with the gloom of a rayless and hopeless despair and consumed with undiminished anguish, with the red-hot beak of guilt beating and ever beating upon the core of the heart. There is a majesty about such a being. Though uncrowned it has near kinship to the Eternal Monarch. But infinitely above all this, and beyond all comprehension of mortal man, must be those better conditions of being which cost the blood of the Son of God, and which exhausted the resources of the Infinite to perfect, and which run through all the long lifetime of Jehovah.

Surely we can stop at nothing to defend and transmit to our children the inheritance we have received. Transmit it with every glory untarnished and every blessing undiminished.

In this war of the giants our champions must not be wanting. This American University, located at the heart of the nation, not far from the most distant home, with vast accumulations of appliances, and to offer the most possible advantages, cannot wait long for any good thing. We can not afford to miss our opportunity. God never forgives a blunder. History moves forward, and destiny approaches by the most certain and discernible laws. Spain cannot consign scores of thousands of her most industrious, most intelligent subjects to the torture of the Inquisition without suffering severe loss in her wealth. It is not the most profitable use to make of able and skilled citizens. No wonder Spain was soon transformed from the banker to the pauper of the race. The French, in one fearful slaughter on the night of St. Bartholomew, wiped out Protestantism. Protestantism has never recovered. France remains the victim and dupe of merciless superstitions. Such blunders and crimes have no pardon. In the first decade of this century the English had a good footing in the south temperate zone of this hemisphere. But by the bribery of the Spanish and the treachery of an English officer, England lost her opportunity for capturing a continent, and South America lost her opportunity for becoming a strong, rich, Protestant empire. These blunders are never forgiven. If we fail to see our day of opportunity we shall

drop into the rear, and cease to do our part for the evangelization of this land and of this world, and that sad voice from the broken-hearted watcher of Olivet will come to us: "O Methodism, Methodism; if thou hadst known, even thou, at least, in this, thy day, the things which belong unto thy peace!"

But, as I listen and look, a brighter vision spreads out before my gaze. I see the rich men of this great church coming up from every section of the country; from the factories and refineries of New England; from the shops and homes of New York; from the mountains and coal treasures of Pennsylvania; from the wide plains and crowded granaries of the Mississippi Valley; from the vast cotton-fields of the South; from the mines of the golden West; from the counting-rooms of all the great cities. I see them coming with their treasures and their wealth, pouring their gifts into the lap of this American University till she has no want unmet. I see her professors, under the guidance and inspiration of a great evangelical church, unfolding every science to its utmost depths, and leading the throngs of students with glad hearts into the new and multiplying apartments of the magnificent mansion fitted up and given to us by our Great Father. I see on the summits, overlooking the capital of this greatest of nations, an opulent group of stately buildings, forming a suitable city of letters, while, over the dome of her great science hall, the outstretched arms of the cross and the waving folds of the stars and stripes catch the first beams of the Atlantic sun.

BRITISH INSTITUTIONS OF LEARNING IN INDIA.

BY REV. J. W. CORNELIUS.

Not until the administration of Lord William Bentinck as governor-general of India was there any satisfactory arrangement for studies in the English language by institutions which were supported by government subsidies. The policy of the East India Company was to gratify as much as possible the prejudices and superstitions of both the learned and the illiterate natives, on the supposition that thereby they would be the more easily controlled. Warren Hastings had founded a college at Calcutta on the basis of English study in 1781; but the study of the sacred books in Arabic and Sanskrit was the principal occupation of Oriental students in almost every other place until Lord William, with a courage rarely equaled in emergencies, decreed a radical change in the system of public instruction. Through him a clause was inserted in the renewed charter of the East India Company in 1833 admitting natives to higher civil appointments—a thing which would have been practically inoperative without an English education. As English was the official language of the ruling English Government, an accurate and thorough scholarship in English was strictly essential to those of the natives who should be admitted to civil stations.

By a most happy providence in this crisis, Lord Macaulay was appointed by Parliament in 1834 a member of the council of the governor-general, and by Lord Bentinck was made president of the Committee of Public Instruction. The committee was about equally divided between Anglicists and Orientalists. It was a serious struggle to break from all the old traditions and practices; for the Orientalists think what has been should forever be. The clear and positive position taken by Macaulay on this subject was one of the noblest acts of his life. He refused to construe the acts of Parliament governing the collegiate instruction of India as requiring either oriental or other special classes of

literature to be used. — or did he agree that the public faith of Great Britain was pledged to teaching the old mysteries of the sacred books of the Hindus and the system of absorption into the Deity. He plainly asserted to the Orientalists that the dialects of India contained neither literary nor scientific information, but were so poor that no valuable work could be translated into them. One shelf of any good European library was worth the whole native learning of India and Arabia. "All the historical information," he averred, "which has been collected from all the books written in the Sanskrit language is less valuable than what may be found in the most paltry abridgments used at preparatory schools in England." On the contrary, "the English language abounds with works of the imagination not inferior to the noblest which Greece has bequeathed to the world; with models of every species of eloquence; with unsurpassed historical compositions; with lively representations of human nature; with the most profound speculation on metaphysics, morals, government, jurisprudence and trade; with a full and correct information on every experimental science which tends to expand the intellect, preserve the health and increase the comfort of mankind. Whoever knows the English language has ready access to all the vast intellectual wealth which all the wisest nations of the earth have created and hoarded in the course of ninety generations." To continue the Oriental languages and literature in colleges and universities supported by the English Government is "to countenance at the public expense medical doctrines which would disgrace an English farrier, astronomy which would make the girls of an English boarding-school laugh, history abounding with kings thirty feet high, whose reigns were thirty thousand years long, and geography made up of seas of treacle or seas of butter." "The sacred books inculcate the most serious errors on the most important subjects in a manner not reconcilable with reason or morality. They are fruitful of monster superstitions, false history, false astronomy, false medicine, false religion. Can we, therefore, with decency or in reason bribe men out of the revenues of the state to waste their youth in learning how they are to purify themselves by touching an ass, or what text of the Vedas they are to repeat in expiating the crime of killing a goat?"

Such solid shot from British brains and such courage of convictions at a crisis moment among British officials triumphed against a hundred millions of devotees to the Sanskrit and Arabic "sacred" books. Strangely enough Macaulay, as all the governmental officers of the British Government at that time, exhibited hostility to Christian missions, but the introduction of English studies into Government schools for higher education brought English literature into India. The central volume of English literature is the English Bible. Multiply the efficiency of the schools for higher education and the errors of the centuries hide themselves in the shame of a future oblivion. The natives of India exhibit the most extraordinary ability for acquiring and speaking the English language fluently. They are proud of it, and the ruling classes are proud of them for it. Modern culture is being rapidly disseminated in this great empire. A free press creates a healthy public sentiment. Missionaries are the most efficient allies of the Government. The heaven has worked and Christian truth has been so absorbed that we would not be surprised if the marvelous intellectual and moral transformations now distinguishing India were a thousand fold increased, and a nation yet to be "born in a day" to the light of the Sun of Righteousness.

Educational Notes.

The library of the late John W. McCoy, of Baltimore, presented to Johns Hopkins University, has about 5,000 volumes, and is especially rich in illustrated works of art from the great artists.

Johns Hopkins also has the Birney Library of books on slavery, numbering over one thousand titles, collected by the late James G. Birney and his son, General Wm. Birney, and by the latter presented to the university in 1891.

At a meeting in the interest of Victoria College, Canada, William Hart Massey surprised and electrified the audience by sending up his card, stating that he would give \$40,000 to endow a chair in the Department of Theology.

God bless him and multiply such men more and more.

The Hliff School of Theology in the University of Denver was endowed by Mrs. Bishop Warren by the gift of \$100,000. The building was erected by her son at a cost of \$50,000, and has just been completed. Ex-Governor Evans, an octogenarian, the first governor of Colorado, appointed by President Lincoln, has aided in the endowment and has secured also \$50,000 additional to his own contributions.

Harvard has not only furnished two Presidents, but 1 Vice-President, 15 Cabinet officers, 20 Foreign Ministers, 29 United States Senators, 104 Congressmen, 19 Governors. But Princeton has beaten the Harvard record in everything except the first and fourth items. It has given to the country 1 President, 2 Vice-Presidents, 19 Cabinet officers, 19 Foreign ministers, 55 United States Senators, 142 Congressmen, 35 Governors.

The Peabody Institute, Baltimore, Md., endowed by the munificence of George Peabody in 1857, now has a library of 110,000 volumes, and is constantly growing with the best extant publications of ancient and modern learning. It is now one of the best reference libraries in the country. There are 5,000 volumes in individual biography; 3,500 volumes of special collections relating to English History; 2,000 volumes of archives, recueils, etc., relating to French History; 500 volumes on the French Revolution; 600 volumes of Egyptian Antiquities; Shakespeare, 500 volumes; Dante, 175 volumes, and 450 reprints of rare English texts, Chaucer, etc.

FROM THE FIELD.

Very many letters are received in the office from which we should be delighted to make an extract, but the want of space in THE COURIER does not permit the printing of many things that would be read with great interest.

Brother Eslinger, from York, Pa., writes as follows:

"The church I am pastor of is a mission church, and of course we are poor, but I felt it a duty as well as a privilege to present the cause of the American University to my people and invite them to give. I have never enjoyed the privilege of a college or university education, but I want to do what I can for my children and the children of Methodism, that Methodism may have the very best opportunity to obtain a high degree of culture in the schools of our own church, and with culture learning also to be loyal to God and to our dear Methodism."

He sends us \$5.40.

TO OUR READERS.

THE EPWORTH LEAGUE.

The notice in the last COURIER asking those who did not care to subscribe for it to notify us, was not intended to apply to the Epworth Leagues. We send it to the President or Secretary of the League to read and pass it to others who would be interested in the great movement of building a Christian University in this country. If any Epworthian desires to subscribe we should be very glad to furnish back numbers that he may have a complete file.

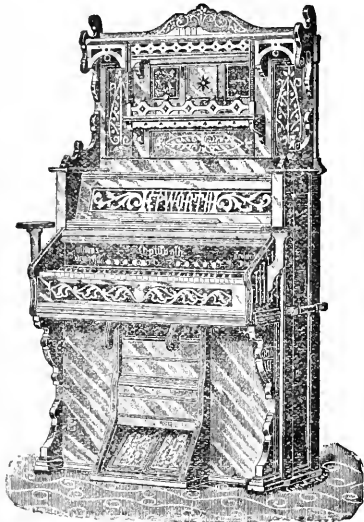

THE PASTORS.

We would gladly furnish every pastor THE COURIER *free of charge*, but in inaugurating an enterprise so large as this the greatest economy is necessary. We would have written to each pastor instead of giving this general notice if it had not been for the expense. The postage alone for sending a letter to each person to whom we are sending THE COURIER would be \$400. We seek to save this expenditure by this and the notice in the November COURIER. We hope you will not consider it burdensome to notify us if you do not wish to subscribe. Permit us to urge your hearty co-operation by allowing your name to continue on our list. You can pay at any time during the year. Price, *fifty cents*.

To the 4,800,000 Methodists in the United States,
GREETING.

A few years ago we conceived the idea of confining our business to the Methodist people of this vast country. Nothing strange about that, for we have been Methodists away back from the beginning. We decided to sell our EPWORTH PIANOS and ORGANS direct to Methodist people without the help or expense of agents, which adds from \$25.00 on an Organ to \$150.00 on a Piano. We decided to allow people to send their orders, through their preachers, just the same as they do for their church papers, hymn books, etc. We decided to allow our Epworth Pianos and Organs to be thoroughly tested in the homes and churches of our customers before payment, and if not found as represented returned at our expense. We decided that Methodist people would give us a square deal if our goods were satisfactory. And we have decided that as our trade is increasing, and we are daily receiving orders from every corner of this great country, that Epworths please the people, and that our plan is a great success. We could publish thousands of letters from preachers and people testifying to the Beautiful Cabinets, Sweet Voices and Easy Actions of the Epworths. We could tell how the Epworth captivated the General Conference; we could tell how we have saved many thousands of dollars to Methodist people; how poor families and societies have been able through our low prices to furnish the homes and churches with Sweet-Voiced Epworths. But to tell all this would take space, and space costs money. So we will invite you to send for our 32-page illustrated catalogue, which is mailed free for a stamp. We will here show a few cuts of

Favorite Epworth Styles.

This Shows Beautiful Style 602
Epworth Parlor Organ

Black walnut case, hand rubbed, oil finish; handsome detachable canopy top, which can be packed in same box with organ for shipping; mouse-proof pedal cover. This organ contains 10 octaves of sweet-voiced reeds; 12 stops double octave couplers; grand organ and knee swells, and is a genuine beauty. Retail price \$97.50, but a discount of 33 1/2 per cent will be allowed those who order through a Methodist Minister, which reduces it to \$65.00, with good stool and book. Delivered on board cars boxed for shipment; average freight charges \$2.00.

If you are a preacher in the regular work, send your order and the instrument will go forward at once. If you are not, get your preacher to order for you, and if you do not find instrument as represented tell us so, and we will give shipping instructions and pay all expenses.

SEND FOR PIANO CATALOGUE AND PRICES.

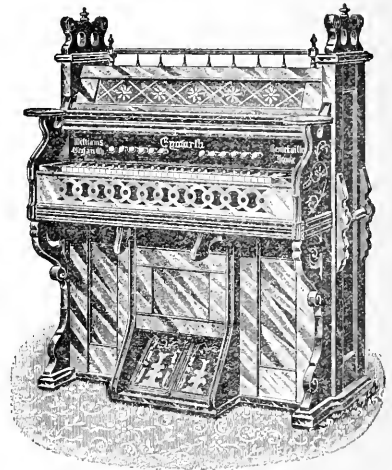

Our Mr. H. B. Williams was a member of the last General Conference, and we refer to the Book Concerns or to the editors of this paper, or any other Methodist paper as to our reliability.

Epworth Chapel Style 302

Is similar in general description to the 602 parlor style, but with a low Chapel top, finished back, and contains same action, and is same price. This style 302 is a great favorite with churches, Epworth Leagues and Sunday Schools, and is frequently ordered for parlor use. All Epworths are voiced and tuned in most careful manner and are known everywhere as the Sweet Voiced Organs. A good Organ must have a good action. These two Epworth Organs are favorites everywhere, and the best value for the money in the United States.

PITHY POINTS FROM FRIENDLY PENS.

“The heart of the Church is with you.”—C. C. McCABE, D. D.

“It is one of those capital measures which are full of coming history.”—ABEL STEVENS, LL. D.

“It will stimulate and supplement every other good school.”—WILLIAM F. KING, D. D.

“It is truly a strategic point in our national education.”—Professor EDMUND J. JAMES, University of Pennsylvania.

“Let it be on the grand old German lines of plain living and high thinking.”—R. J. COOKE, D. D.

“I regard The American University as the most important movement in Methodism in our time.”—H. A. CLEVELAND, D. D.

“No church movement since I became a minister has so commended itself to my judgment.”—ALFRED WHEELER, D. D.

“This is the greatest movement for Protestant Christian education since the foundation of our Republic.”—Bishop JOHN P. NEWMAN.

“The busiest men always must do the world’s extra work. Count on my spade and trowel all the time.”—ARTHUR EDWARDS, D. D.

“Your great scheme for a university to be located at Washington is one worthy of the patronage of all countries.”—Mr. H. A. MASSEY, Toronto, Ont.

“The Church which was born in Oxford should deem one part of its mission unaccomplished till it has an Oxford of its own.”—Professor WILLIAM NORTH RICE, Wesleyan University.

“It will be the strength of Protestantism not only here but throughout America and the whole world.”—Mr. BRAINERD H. WARNER, Washington, D. C.

“One feature of your plan deserves especial commendation, viz., that of restricting the scope of the institution to university work proper.”—Professor MARION D. LEARNED, Johns Hopkins University.

“I believe that ground for Asbury Hall might be broken in this year of our Lord, 1893, if the thousand Preachers resolved that it should be done.”—DANIEL WISE, D. D., LL. D., January 12, 1893.

MOUNT VERNON SEMINARY

FOR YOUNG LADIES.

ENGLISH, FRENCH AND GERMAN BOARDING AND DAY SCHOOL.

Cor. of M and 11th Sts. N. W., Washington, D. C.

MRS. ELIZABETH J. SOMERS, Principal.

The Seminary endeavors to meet a demand known to be imperative by all acquainted with the problems of the education of girls—the demand for a school more systematic, thorough, and modern than the typical boarding-school, yet less severe and arduous than our women's colleges. Up to the Junior year its course is as full and its discipline as thorough as that of any college preparatory school in the land. Beginning with the Junior year, the course consists of selections from the college curriculum, adapted to the needs of those young women who desire a thorough training in selected branches, but who desire, also, to avoid the strain of a college course.

The school is thoroughly modern in spirit and in method. Its faculty is composed of earnest, enthusiastic teachers—specialists in their several departments—most of them women with college training.

Special emphasis is given to the following subjects: English Language, Literature, and Composition; Natural History; Art, and the History of Art; General History and American Political History. The time given to these subjects, and the breadth and thoroughness of the treatment accorded to them, do not fall below those given them in our best colleges.

The buildings are new and perfectly equipped for health and comfort. They are heated by steam, have perfect drainage and ventilation, a passenger elevator, and bath-rooms which are furnished and fitted with the best appliances known to modern sanitary science.

For further information apply to the principal, who also refers to the following patrons:

Editorial.

A SAMPLE of the Epworth League Autograph Record which is being used in the subscriptions to the Epworth League Fund will be found on the inside of the last cover. These blanks are sent free on application to any League.

PASTORS who desire to hold a Columbus Memorial Service on some Sunday of 1893 are invited to send for sample copies of either the "Church Service" or "Young People's Concert Exercise," or both. Please read notice on the third page of cover.

HARVARD, Yale, Princeton, Brown, Michigan, Cornell and Wisconsin Universities each publish a daily paper. Who can now say that the Christian people of the great cities could not, if they would, revolutionize public sentiment on many great topics by uniting in the publication of clean dailies which would not be a breakfast feast of sensation, lust, rum and murder?

WHATEVER is secured for the Lincoln Fund by the use of the Lincoln Medal will be credited to the Church on its collection for The American University. If each pastor of the Methodist Episcopal Church would take one of these medals into his pulpit and explain the plan of building the Administration Hall of the University as a monument to Abraham Lincoln, the \$500,000 asked for this purpose could be secured within six months. Why not? Try it.

It is with no little pride (pardonable, we hope) that we record the fact that among the graduate students of the Johns Hopkins University there are about twice as many Methodists as of any other denomination, and they compose about one-eighth of the whole number. This means much. The zeal of Methodism has put it in the front of the moral forces of the age. Nothing but knowledge added to zeal will keep it there. This flocking of our Methodist students to the highest standards of an educational character is a hopeful indication.—*Baltimore Methodist.*

THE following letter from Miss Callie B. Morgan, of Dixon, Ill., district secretary of the Epworth League, explains itself. We hope the action taken by this League will become the basis of similar action by many other Leagues in the Church:

At the Fall Convention of the Epworth League, Dixon District, Rock River Conference, held at Princeton, Ill., November 17 and 18, 1892, the following resolution was passed, and I was ordered to forward a copy to you:

"Whereas the Methodist Episcopal Church has committed itself to the great work of establishing the American University at Washington, D. C., and has made a special appeal to the Epworth League of the Church for aid in carrying forward the enterprise; therefore,

Resolved, That we, the Epworth League of Dixon District, declare ourselves in hearty sympathy with this forward educational movement of our Church, and pledge to it our individual and united support. God speed The American University.

Rev. ENOS HOLT, Walnut, Ill.,
Miss JOSEPHINE BARRETT, Sterling, Ill.,
Mrs. DAVID GOSTELLOW, Prophetstown, Ill.,
Committee."

1492 — 1892

THE AMERICAN UNIVERSITY AND THE COLUMBIAN YEAR.

The American University is the product of the desires, longings, prayers and convictions of the Protestant churches of America. The rival of no other institution of our Church but "the ally and pride of all," it aims to represent at all times the sum of human knowledge; to supply full courses of graduate instruction in every department of learning; and to lead the world in the work of original research and investigation and in new applications of science. The whole enterprise is to be conducted by men not merely imbued with the spirit of the age, but inspired by the spirit of Christianity, and always holding aloft the standard of our Lord Jesus Christ.

The American University is not to be sectarian; nor in any narrow sense denominational. Yet in order that responsibility for its conduct and maintenance may be definite, the charter requires that two-thirds of its trustees and its chancellor shall be members of the Methodist Episcopal Church, and that all of its trustees shall be approved by the General Conference of our Church. No denominational qualification is required of any other officer or teacher. We do not doubt that scholars of all the Protestant churches will find here a field for the exercise of their highest abilities.

The establishment of a university in Washington was the subject of earnest desire and persistent effort on the part of that great pulpit orator and ecclesiastical statesman, Bishop Matthew Simpson. At one time he had prevailed upon a wealthy layman to begin the work, but adverse influences thwarted his plans. Bishops Ames and Newman, when the latter was first pastor of the Metropolitan Church in this city, wrought for the same end. Rev. William Arthur, of England, years ago in conversation with the Harper Brothers, outlined a plan of a university for our National Capital. For many years past the National University has been a topic of conversation among our educators, public men and thoughtful Methodists.

The idea of a Protestant University was abroad in the church and country when, in October, 1888, Bishop Hurst became a resident of Washington. An idea, however, needs incarnation to render it powerful for good or to effect a permanent place in the lives of men. This incarnation was effected in the person of Bishop Hurst, who carefully weighed the subject, and having decided, acted with foresight, promptness and energy. After laborious investigation of various sites in Washington and vicinity, Bishop Hurst, on the 25th day of January, 1890, on his own responsibility, bought a tract of land, about ninety acres in extent, 400 feet above tide-water, on the range of hills northwest of the city, and not remote from the Presidential Mansion. No location could be more beautiful or more worthy of a magnificent university. The wide-spread announcement of this fact revealed clearly that the Bishop had not misinterpreted the state of the public mind. From all parts of the land came by telegram and by mail assurances of sympathy and promises of assistance.

On the 25th of March a public meeting crowded the Metropolitan Church, when addresses were made by Bishops Hurst and Newman, the Rev. W. A. Bartlett, D. D., pastor of the New York Avenue Presbyterian Church, Senator Hawley, of Connecticut, and Representative Elijah W. Morse, of Massachusetts. The venerable historian, George Bancroft, sent the following letter with a contribution a few weeks later:

1623 H STREET N. W., WASHINGTON, D. C.,
April 14, 1890.

MY DEAR BISHOP: I thank you for giving me an opportunity of showing how highly I esteem the importance of the great design upon which you have entered of establishing a university in the Capital of our country, to be thoroughly complete in every branch of science and human learning. The importance of the object at which you aim cannot be too forcibly stated, and I hope that the result may be a university equal to any in the world.

Yours most truly,

GEORGE BANCROFT.

To Rev. Bishop JOHN F. HURST.

On the 27th of April the Methodists of Washington made liberal offerings in all their churches, to be used in payment for the site. These, together with subscriptions from other citizens, irrespective of religious associations, amounted to more than \$100,000, the purchase price of the land. The bishops, in their semi-annual meeting on the 13th of May, passed resolutions highly approving the enterprise. Two days later the Board of Control of the Epworth League resolved, "We gladly unite in the indorsement of the Bishops, and commend this national educational enterprise to the Epworth Leagues of our Church."

At a second mass-meeting in Washington, November 3, 1890, addresses were made by Bishops Bowman, Ninde, Vincent, Warren, and Hurst, and the following letter from President Harrison was read:

EXECUTIVE MANSION,
October 31, 1890.

Bishop JOHN F. HURST,
Washington, D. C.:

My Dear BISHOP: I regret that I am to be absent from the city on Monday, and shall, therefore, be unable to fulfill my purpose to attend the meeting to be held that evening to promote the movement, so wisely and so auspiciously inaugurated by the Methodist Episcopal Church of the United States, to found at the National Capital a great University.

This movement should receive, and I hope will receive, the effective support and sympathy not only of all the members of your great Church but of all patriotic people. Such an institution, to serve its proper purpose, to save it from the jealousies and competition of other educational enterprises in the States, should be so organized as to supplement and perfect their work. It must be a National University with strong emphasis on both words.

With the assurance of a deep interest in your enterprise, and the most cordial wishes for its perfect and early success,

I am very sincerely yours,

BENJAMIN HARRISON.

On May 28, 1891, the University was incorporated and organized by the election of trustees, the chancellor, the secretary and the registrar. In August Bishop Hurst issued an appeal for \$10,000,000.

At a reception given by the trustees to the Methodist Ecumenical Conference, October 15th, the University was cordially and emphatically indorsed.

The College Presidents, in their association on the 11th of November following, at Cleveland, Ohio, united in a similar commendation.

On Sunday, May 8, 1892, during the General Conference in Omaha, Neb., a great meeting was held in the interest of The American University. An immense concourse of people assembled at Exposition Hall. There were present delegates and visitors from all parts of the United States, and from Europe, Canada, Mexico, South America, Japan, India, China and other parts of the world. Many of these were distinguished scholars and educators who were in-

tensely interested in the exercises. Addresses were made by Bishops Hurst, Newman, Fowler, and Thoburn, and by Drs. Payne, McCabe, Bristol and Moore, by President Bashford and by the Rev. Dr. Moulton, Fraternal Delegate from the British Conference. The effects of this meeting were far-reaching, and have greatly stimulated the desire of the churches and of the people of the country to see the consummation of this great undertaking—the establishment and endowment of The American University.

The bishops in their quadrennial address to the General Conference had already highly commended the enterprise. That body on the 25th of May, in a series of resolutions recognized the incomparable advantages of Washington for such an institution; the imperative duty of the Protestant Church to provide a Christian, catholic, tolerant and American University in that city; approved the establishment, and accepted the patronage of The American University, and appealed to the loyal pastors of Methodism to take subscriptions in all of our churches as a Columbian Memorial Fund during the quater-centennial celebration of the discovery of America.

Many reasons have been assigned for, and several attempts made to secure, the establishment of a National University in Washington under the authority and control of the General Government.

Such efforts were put forth by George Washington in his first inaugural address, in letters to the Commissioners of the District of Columbia, to Governor Brooke, of Virginia, to Jefferson and Hamilton, and in his last message to Congress. His dying bequest for such an institution, if it had been duly husbanded, would now amount to \$4,000,000, and is proof how dear this project was to his heart. Both the Adamses, Jefferson, Madison and Monroe, in their inaugural addresses, urged the establishment of a National University. In later times, Grant, Hayes and Garfield, among the Presidents; Chief Justice Chase, Senators Sumner, Morrill, Garland, Schurz, Lamar, Doolittle, Carpenter, Edmunds and Hoar, among our statesmen; Hill of Harvard, Barnard of Columbia, White of Cornell, Winchell of Syracuse, Haven of Michigan, Welling of the Columbian, among our university presidents; Agassiz, Henry, Gray, Baird, Hayden, Powell, Youmans, Sands, Maury, Langley, Newcomb and Mendenhall, among our scientists, as well as the National Education Association, have with emphasis approved the much desired National University.

It does not seem likely, however, that the United States will undertake such an establishment.

First. Because a very large number of our people do not believe that such a movement accords with the functions of the Federal Government.

Second. Others are persuaded of its unwisdom lest it should become, as many State universities have, more or less the foot-ball of politicians.

Third. Others believe it would be either an instrument of sectarian aggrandizement on the part of some church, or more likely still, a seat of sceptical and anti-Christian propagandism.

However this may be, it is quite certain there is needed at Washington such a university as that described by the General Conference—"Christian, catholic, tolerant, American." Christian—owning allegiance to one Master, Jesus Christ, always and in every department; catholic—welcoming to its halls all seekers of truth, without distinction of race or sex; tolerant—assured that in the fair and open field truth will surely conquer; and lastly American—believing fully in the high destiny of America, and aiming to collect in the Nation's Capital tens of thousands of noble youth, to teach them the highest ideals of American citizenship as well as to open wide to them all avenues to literary and scientific culture, and to send them forth to mold into one homogeneous and Christian Nation the vast populations of all races now crowding our shores. By this means we shall do no small share in creating a people *Christian, catholic, tolerant and American*.

It is not difficult to say why such a scheme should be pressed to a successful issue by the Protestant churches of America.

First. The need not only exists but increases with the years.

Second. There is throughout our land marked appreciation of the highest education as shown by the most liberal gifts in that behalf. A strong and vigorous beginning now made will certainly attract donations from our own people and from Protestants generally.

Third. This year, when we celebrate a continent discovered by Columbus, would most fitly be commemorated by a university founded in the District named "Columbia," and in the city which bears the name of the first President of the Republic.

Fourth. The growth of the people of the United States in wealth, intelligence and power, and their high standing among the nations of the earth, demand that, at the National Capital, there shall be a Christian University, gathering and disseminating such forces and influences as shall worthily impress and lead the world.

Fifth. It is not to be forgotten that already the church of Rome is establishing a university in Washington. Whatever fault may attach to the hierarchy of that church, it cannot be charged with a lack of worldly wisdom. Sixty acres of ground north of the Capitol occupied by two immense structures (the sec-

and now building), \$1,100,000 subscribed (much of it paid), and the whole church from Leo XIII. down to the humblest member in America pledged to the enterprise, give promise of a splendid success. It is morally certain that the work thus begun with strength of purpose and liberal gifts will become an important factor in forming the political and religious character of our people, as well as an efficient means of entrenching the power of the Roman hierarchy in America and at the very seat of government.

While we have not the remotest desire to restrict the liberty of that church in the great educational scheme she has undertaken, and are willing she should do her own work, we cannot consent to such a let-alone policy as would throw into her hands the magnificent opportunity which Providence has put within reach of the Protestant churches.

Our proposition is to found a great university which, at the outset of its career, shall set before it the highest educational aims of both hemispheres, and which means to be the most comprehensive and generous training school for humanity in the world.

Lowell says of Lincoln :

“For him her old-world moulds aside she threw,
And choosing sweet clay from the breast
Of the unexhausted West,
With stuff untainted shaped a hero new.”

English, German, French and all old-world experiences and ideas must of necessity be utilized in the foundation and development of our university, but no old-world mould can serve in which to cast an institution which will be “the bright, consummate flower of democracy.” It must not be cast at all, but must grow and bloom. It must be, not mediæval and Latin, but modern and American. Holding fast all that is best of ancient learning, it must be sensitive to the needs of its own age, and meet the requirements of its own generation. Built by Americans it must be for Americans, yet to its wide-open halls students from all the world will be welcomed that they may drink in the American spirit of the freedom and brotherhood of mankind, of reverence for God, for law, for the Bible and for the Sabbath.

Hence the conditions of admission to our university will relate to character and competency only. Its students aiming at degrees must have received the Bachelor's degree already; its system of scholarships will reward efficiency and elevate the standard of education throughout the country; its fellowships must be amply endowed and open to the world; its professors must be men and women of the highest character and efficiency, and their research, investigation and instruction will lead to the most valuable scientific and literary results; its beginnings are to be with such means as befit the great undertaking, to

encourage liberal endowments and to make it the leading university of the world. It will be a bond of union for all the Methodisms in America, and indeed of the divided Protestant hosts of our country. It will be forever the seat of a learning at once “Christian, catholic, tolerant and American.”

If it were demanded to undertake this great work solely at our own cost, we might well despair of success; or had any other Protestant church established such a university, we might excuse ourselves the task. But since by act of Congress all the scientific and literary treasures of the government, costing unmeasured sums, and maintained and enlarged every year at an expense of three and a half millions of dollars, are absolutely at our service; and since there is no institution at the Capital which meets the requirements of our age, it is clear that our church is not only able to do this work, but has opened to her a magnificent opportunity, from which she dare not shrink—an opportunity which comes only once in the history of a church. It were as unreasonable to expect the rich soils of America to remain the pasture of roaming herds and the hunting-ground of savages, as that this great educational field should furnish only occasional browsing to wandering students, and not be seized upon and diligently cultivated by the university, one of the highest forces of our organized Christian civilization. The country waits to know if we will do it. It will not wait long. Of this we may be sure, somebody will do it. Dare we to whom Christ has committed so large a division of his flock, and so rich a field, lose this precious opportunity?

The scheme which we propose requires three things:

First. A large force of learned, devout and skilled teachers, who shall know how to inspire their students with love of truth and zeal in study, and who in addition to their duty as instructors shall have leisure for original research and investigation.

Second. We must have a large body of earnest students face to face with these professors in these treasure-houses of learning and science.

Third. There must be halls for every department, with professorships, lectureships, fellowships, scholarships, studentships and dormitories, thoroughly equipped and endowed.

To provide for these it is estimated that ultimately not less than ten millions of dollars (\$10,000,000) will be required, while half that sum may be necessary to make a suitable beginning.

We need 100 fellowships whose income shall be \$500 each, to award the most competent and diligent students. This will require a fund of \$10,000 to each fellowship, which may bear the name of the donor, or of any other person selected by him. We shall

need 100 scholarships of \$2,000 each, whose income of \$100 per year shall aid meritorious and industrious young people in obtaining the highest training.

There is needed a great Administration Hall, which, with its endowment, should cost \$500,000. This is to be built by the one dollar contributions of 500,000 people, and is to be named the "Abraham Lincoln Memorial Hall." Each person contributing one dollar to this hall will receive a beautiful aluminium medal, with the portrait of Lincoln in relief on one side, and historical inscriptions on the other.

The flower of our church, the nearly 500,000 Epworth Leaguers, are invited by the gift of one dollar each to found an Epworth Hall, Epworth Lectureships, Fellowships and Studentships. Each member thus contributing will receive an elegant certificate of artistic and ecclesiastical design.

One thousand preachers are invited to give \$100 each to found a hall to be named in honor of Asbury.

We shall need other halls, lecture-rooms, dormitories, chapels, etc., besides a large number of endowed professorships, each of which should have an income of from \$3,000 to \$5,000 per year. There must also be a large sum of money for free endowment, whose income shall be used at the discretion of the trustees for such purposes as may arise from time to time, so as to enable the University to meet the ever changing needs of our civilization.

To these several objects we invite the gifts, the cooperation and the legacies of all people. As President Harrison says, "this movement should receive, and I hope will receive, the effective support and sympathy not only of the members of your great church, but of all patriotic people." Nevertheless we must depend chiefly upon our own church. We have the numbers, the wealth, the stimulus, the zeal and the ambition which are equal to this great undertaking. May God grant us without measure that Spirit who shall sanctify the whole.

We have already referred to the action of the late General Conference in reference to the American University. The following is one of the resolutions passed by that body:

Resolved, That in our judgment at least ten millions of dollars should be secured for the endowment of the University, and that all our pastors be requested to take subscriptions or collections for this object at the Sabbath services succeeding the 12th day of October, 1892, the quarter-centennial of the discovery of America, and that the offerings of all our people be for this one object as our Columbian Memorial.

Many of our churches took the offering on the 16th of October, but many others were in circumstances that prevented. Nevertheless we earnestly hope that those who have not done so will, at the earliest practicable day, present the subject to their congregations

and receive a liberal contribution for this great cause.

Mark these points:

One dollar from every Epworth Leaguer, to each of whom we shall send a beautiful certificate.

One dollar from 500,000 persons for the Lincoln Hall. Each of these receives a Lincoln medal made of aluminium.

One hundred dollars from each of 1,000 preachers (to be paid in instalments if desirable).

One Fellowship of \$10,000 from each conference. Other Fellowships of \$10,000 each from individual donors.

In Professorships, Scholarships, Lectureships, Halls and free endowment, \$8,000,000.

A Columbian offering from every church and every member during the four hundredth Columbian Anniversary.

The American University has a great field. The Methodist Episcopal Church alone has 40,000 students in her institutions of learning of every grade. Of these 10,000 every year leave the schools. In her colleges are 6,000, of whom nearly 1,500 graduate annually with the Bachelor's degree. Of these many go at once to business or to professional schools. A few continue for a short time at alma mater, and attempt post-graduate courses under more or less advantageous circumstances; while yet a larger number in other American universities or in those abroad seek the higher learning they covet, and which in no adequate measure the Methodism they love has yet opened to them. The Methodist Episcopal Church, South, with her 1,250,000 communicants and increasing number of academies and colleges, is without a complete university. A Methodist University in the Capital of the Nation would receive large patronage from that Church. Indeed all the Southern colleges might naturally be expected to send most of their students who take post-graduate studies to The American University. These with the immense number who will come from the East, the North, the West and from abroad, will give us a university cosmopolitan in patronage, but American, Protestant, and Methodist in its characteristics.

To illustrate the probable career of our university, we will take the University of Berlin, because it is not only one of the youngest, but it is also one of the most prosperous and splendid in the world. This university began its life in 1810. It was inaugurated in the midst of those years when Prussia was practically a conquered nation and under Napoleonic oppression. Her people were struggling for their autonomy. Berlin had then a population of less than 200,000. Eighty-two years have passed and the city has grown to a population of 1,800,000. Washington is the capital of a young, vigorous, and growing Republic. In thirty-two years it has grown from a miser-

able town of "magnificent distances and squalid poverty" with 50,000 inhabitants to be, what many traveling people call, the handsomest city in the world with a population of more than 250,000. If the same ratio of increase be continued, the Capital with its suburbs will number millions in eighty-two years, while the Nation at its present rate of progress will number 500,000,000; but even if these figures should be greater than history shall verify (though this seems improbable), nothing but an unheard-of catastrophe can check the unparalleled growth of the American people in numbers, wealth, education and all the blessings of a Christian civilization. In all these the Capital must share to more than an average degree. The University of Berlin now has nearly 9,000 students. Who shall say that The American University will not number 10,000 or even 20,000 students fifty years hence?

Humboldt, Fichte and Schleiermacher; De Wette, Neander and Eichhorn; Hegel, Raumer, Niebuhr and Buttman; Hengstenberg, Nitzsch and Schelling; the brothers Grimm, Zumpt and Carl Ritter; Dörner, Hin-schius and Du Bois-Reymond; Von Ranke, Mommsen and Curtius; and Lepsius, Hoffman and Kiepert are among the brilliant and learned men whose careers have illuminated the world and illustrated the brief but magnificent career of the University of Berlin. For the names of those men of world-wide reputation who shall be trained within the scholarly precincts of The American University, or who shall train others therein, we must await the verdict of history; but that here shall arise scholars, historians, scientists, theologians, who shall not suffer by comparison with the best produced by the past ages or by the present, he must have lost faith in God and humanity who can doubt. The present is ours, the future is God's and posterity's. We shall lay broad and deep the foundation. Those who follow us shall work on the superstructure. They and we, because under the guidance of the Divine Architect, shall build wiser than we know.

C. W. B.

WASHINGTON AS AN EDUCATIONAL CENTER.

Few persons are aware of the unequaled wealth of educational material which is stored in Washington. The silent forces of nature through unknown ages enriched our continent with vast forests, alluvial soils, gold, silver, iron, coal and all manner of minerals in untold abundance. The time came when the world needed it and must have it. Columbus opened the way to it. Behold the result! Even so for its own purposes and for the commercial and material welfare of the people, the National Government during the hundred years past, little by little, at immense cost, has collected a great educational plant, to which all times, all civilizations and all peoples have contrib-

uted. A brief account of these treasures will inadequately inform, though it may surprise or even astonish those who have given the subject no attention.

The Congressional, or as it is henceforth to be called, the National Library, is the largest single collection of books in our country. It possesses 650,000 bound volumes, 200,000 pamphlets, 500,000 works of art and 800,000 musical compositions. By the silent operation of the copyright law alone it is increased at the rate of 20,000 volumes per year. The law department grows in value by this means at the rate of \$8,000 per year. The new *international* copyright law will add largely to the ratio of increase.

In the near future this splendid library, now poorly housed, will be in a home built by the Nation's money, at a cost of \$6,000,000, with every possible convenience for student and instructor. The expense of its care and increase (now \$57,600) will not be less than \$100,000 per year, and the whole library, absolutely free of cost, will be as much at the service of the University as if every volume on its shelves and every stone in its walls belonged to its trustees and the income of \$2,000,000 were yearly spent by them in its maintenance.

The National Museum with all its appliances will become tributary to university courses with a vast saving of expense. Its marvelous accumulations, which can never be duplicated, if it were possible to estimate their value in dollars and cents, are worth at least \$6,500,000. There are twenty-two distinct scientific departments under its jurisdiction. Each of these is placed under a curator, and is provided with the necessary appliances for original research, which are yearly increasing in completeness and efficiency. Each curator has his laboratory, his study-series of specimens, his working library and access to the central library of the Museum, numbering many thousand volumes. These scientific laboratories are always open to students, and in fact university students in large numbers may follow special lines of investigation under the employ of the Museum while pursuing full courses under the guidance of our professors. In this way they may earn a large part of the cost of their education.

In the study of Chemical Science, Washington offers unsurpassed opportunities. There are at least seven centres of chemical activity conducted under the auspices of the government.

In the Geological Survey analyses are made and researches pertinent to chemical geology are pursued. In the Agricultural Department's Laboratory, work is done by able men thoroughly equipped with scientific apparatus and the scientific spirit. Problems pertaining to soil, fertilizers, food, etc., are here investigated. The Surgeon General of the Army, the

Surgeon General of the Navy, the Bureaus of the Mint and of the Internal Revenue and the Patent Office, each have a laboratory where solution is sought for the questions arising in these several fields.

The Patent Office has its own library, as indeed is the case with every department. It numbers 62,000 volumes, valued at \$100,000, and is especially rich in works on Electricity, Engineering and Chemistry. The drawings and models of this office, open to the public, number 555,116, increasing daily, and constitute a vast encyclopædia of the applied sciences: Here a school of invention may find not only the richest possible illustrations, but receive the highest inspiration to discover the secret processes of nature, apply them to the arts and sciences and to the needs, conveniences and luxuries of mankind. Its value in all is \$5,500,000.

The Naval Observatory, now transferred to its new grounds and buildings near the site of our university, has an establishment valued at \$1,835,000, with an annual outlay of \$45,690.

The Botanical Gardens are worth \$1,250,000, and \$18,000 is yearly spent in perfecting their collections of plants from all parts of the world. No place in the country gives so great facilities for the study of Botany.

The Army Medical and Surgical Museum has a value computed at \$1,500,000. Its collection of surgical specimens could only be duplicated by a war, whose victims should be as numerous as those of our late civil war. Its library is invaluable, thoroughly catalogued and at the service of the medical student, the professor or the specialist.

The Fish Commission, which is opening a new world of scientific investigation, the Bureau of Education, which is in touch with our whole system of instruction, public and private, and the Geological and Coast Survey, contain scientific material and apparatus contributed by learned men in the employ of the government for generations.

The Geological Survey has a history of achievement of which any institution might be proud. Its library is so exhaustive and complete that Major J. W. Powell, the eminent director, declares it to be the best geological library in the world, and that no man can perfect himself in the geology of America without consulting its treasures. In point of fact, professors and students from great universities in the United States are often found searching its shelves.

The Corcoran Art Gallery and Art School, gifts of the late W. W. Corcoran, with their art treasures, other properties and endowments are valued at \$2,000,000, all open, without cost, to students from any quarter.

The Supreme Court of the United States, the Senate

and House of Representatives, give opportunities increasing in number every year, to meet and hear the celebrities of the Nation and of the world. These afford lessons in jurisprudence, statesmanship, in literary and scientific culture, unsurpassed anywhere.

The value of these vast accumulations is summed up and vouched for in the following letters of Major J. W. Powell, Director of the United States Geological Survey. It will also be noted how explicit this scholarly man is in declaring them to be "useful and largely necessary to the faculties and students in an institution of higher learning:"

DEPARTMENT OF THE INTERIOR,
UNITED STATES GEOLOGICAL SURVEY,
WASHINGTON, D. C., *March 31, 1892.*

DEAR SIR: In compliance with your request to furnish you with an estimate of the libraries, museums and other appliances available for a university of higher education in Washington, D. C., and which can be used under proper conditions for the purposes of a National University of high order, I have the honor to state as follows:

A careful investigation of the subject has been made and the conclusions reached have been submitted for criticism to others engaged in the various bureaus of the United States, and as a result of this conference it has been concluded to report as follows:

1. Library of Congress.....	\$8,500,000
2. National Museum.....	6,500,000
3. Patent Office.....	5,500,000
4. Bureau of Education.....	200,000
5. Bureau of Ethnology.....	200,000
6. Army Medical Museum.....	1,500,000
7. Department of Agriculture.....	3,000,000
8. Fish Commission.....	1,000,000
9. Botanic Gardens.....	1,250,000
10. Coast and Geodetic Survey.....	1,500,000
11. Geological Survey.....	1,500,000
12. Naval Observatory.....	1,835,000
Total.....	\$32,485,000

All of the above materials are of such a nature as to be useful and largely necessary to the faculties and students in an institution of higher learning.

There is another phase of the subject which I think worthy of consideration. In connection with the bureaus engaged in scientific research there are a very large number of men employed as specialists, many of whom could be utilized to a greater or less extent as lecturers and demonstrators, and through them a great variety of subjects would be presented to faculties and students in fields where specialists are pre-eminently fitted for the office of higher instruction.

I am, with respect, your obedient servant,
J. W. POWELL.

UNITED STATES GEOLOGICAL SURVEY,
WASHINGTON, D. C., *April 18, 1892.*

DEAR SIR: In reply to your interrogatory in relation to the annual cost of the maintenance and increase of the libraries, museums, and other scientific collections of the Government, I take pleasure in making the following statement:

The direct appropriations made for the present fiscal year are hereby scheduled :

Army Medical Museum.....	\$15,000
Bureau of Education.....	54,620
Bureau of Ethnology.....	50,000
Botanical Garden.....	21,893
Coast Survey.....	513,630
Department of Agriculture.....	300,000
Fish Commission.....	348,393
Geological Survey.....	631,940
Library of Congress.....	57,600
National Museum.....	200,500
Nautical Almanac Office.....	26,380
Naval Observatory.....	45,690
Patent Office.....	\$93,990
Smithsonian Institution.....	87,000
Zoological Park.....	50,500
Total.....	\$3,297,136

In addition to the total given above, about \$2,000,000 is annually appropriated indirectly for various purposes connected with the institutions named, as for printing and binding publications, etc., and through these publications libraries are increased by exchange.

It will be seen from the above that the institutions which will be immediately available for the purposes of a higher institution of learning at Washington receive annually between five and six million dollars, to be expended in a manner which maintains and rapidly increases their resources for higher educational purposes.

It should be added that the Government is year by year erecting new buildings for the custody of the materials collected.

I am, with respect, your obedient servant,

J. W. POWELL.

It will be seen from the above figures that these values, if funded at 5 per centum per annum, would reach the enormous sum of \$90,000,000.

This whole body of material is now accessible to University students by the following joint resolution prepared by one of the trustees of our University, passed by both Houses of Congress at their last session, and signed by the President.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the facilities for research and illustration in the following and other governmental collections now existing or hereafter to be established in the city of Washington for the promotion of knowledge shall be accessible, under such rules and restrictions as the officers in charge of each collection may prescribe, or as are already or hereafter may be prescribed by act of Congress, to the students of any institution of higher education incorporated under the laws of Congress or of the District of Columbia:

Army Medical Museum.	Fish Commission.
Bureau of Education.	Geological Survey.
Bureau of Ethnology.	Library of Congress.
Botanical Gardens.	National Museum.
Coast Survey.	Naval Observatory
Department of Agriculture.	Patent Office.

It has well been said "every branch of human knowledge has a literary deposit in Washington."

and in the 600 learned men connected with the different departments of scientific work conducted under the patronage of the National Government, we have a body of specialists from whose ranks the most able lecturers and demonstrators may be drawn for university instruction at a very moderate cost. B.

THE EPWORTH LEAGUE AND THE AMERICAN UNIVERSITY.

In August, 1891, Bishop Hurst wrote and published his appeal to the Protestant public in general and to the Methodist public in particular for \$10,000,000 to build and endow The American University. In this undertaking he asks the Epworth League to take a part and to have as its aim the raising of an Epworth Fund of not less than \$500,000 with which to build an Epworth Hall, and endow an Epworth Professorship and Epworth Scholarships.

To this appeal have come many responses in the sympathetic words of individuals, the approving action of various bodies of Methodism, and the beginning of contributions; and from the Epworth League the response has been in its full proportion of sympathetic endorsement and gifts. Here and there, however, have appeared in various forms indications that by some who are friends both to the League and to the University it is questioned whether the League as such should enter into this work; and it is to help in putting this question in its proper light that these lines are written.

The wisdom or unwisdom of this great work set before the League depends upon the proper answer to one fundamental question—namely: In the new and unique enterprise projected by the Methodist Episcopal Church in the creation of The American University, should there be special recognition of the part which the young people of the Church take in accomplishing the end in view, or should their part, as in other benevolent and educational work of the Church, be simply and wholly merged in the general movement?

This question resolves itself into two parts: First, which will conduce most largely to the success of the Epworth League as an organization, to have its part in this colossal effort designated as its own, or to have its work simply to be an undiscernible part of the great achievement; and, second, which method of procedure will best serve the success and completion of the gigantic enterprise itself? We direct our attention at present solely to the first of these two questions.

It seems to us that the larger results of benefit to the League will be received by the recognition of the young people and their effort in a separate fund and in an Epworth Hall. We name some reasons. To the League it will act as a perpetual stimulus to the

best intellectual culture and give to it both an immediate and permanent source of inspiration for the highest spiritual attainments. A spirituality that ignores or omits in its purview the ethical element of an honest and conscientious effort to secure the highest and best instruments and results in the search for truth is a misnomer, and is to be rejected as defective, if not spurious. The ideals of Christian character set before the Epworth League are, as they should be, incentives to mental improvement as a life-long duty and delight.

The Epworth Hall will be a visible and national monument to the devotion of the League to the highest and best interests of the race, while the Epworth Professorship and the Epworth Scholarships will form through the centuries strong, practical and living bonds of union between the beautiful and vigorous life of the old Epworth home of the Wesleys and the unfolding powers of our American youth.

Such a distinct and signal identification of the League with the establishment and endowment of the University will furnish in large measure just such a lofty and abiding *esprit de corps* as will be found to be an indispensable element for the surest progress and success.

Like all other appeals for benevolence, this one should be kept upon the voluntary basis, and the work of collecting should be carried on in the spirit of sympathy and helpfulness toward any and every other good cause. The American University is the friend and ally of every other good cause, both within and without the Church, and its welcome to the educated youth of America in the years to come will be no warmer and no more genuine than is its good will for the well-being and success of the Epworth League in the present appeal for co-operation. No desire nor purpose exists to put upon our Epworthians the double duty of contributing both as members of the church and as members of the League, but simply that in the general gathering of funds and in their expenditure there be a distinct and helpful recognition of the efforts and needs of our young people.

On the broad and important subject of whether the League should as such enter into all or many of the general and local efforts to raise funds for religious purposes, there can be but one opinion; it should neither be asked nor expected. For this would to a large extent mean a divided and hence a weakened church. But upon this particular proposition, so fitting in all its aspects whether viewed as to its effects upon the League itself, upon the University, upon the Church at large or upon the cause of Christian education, we have no hesitation in affirming it to be good and only good.

A vital relation exists in the very circumstances on

the origin of these twin-born children of Methodism. After years of deep thought and earnest effort, taking form during the same quadrennium, they were both heartily adopted by the same General Conference as institutions of our church. The Methodist Episcopal Church has thus put the seal of her interest, affection and approval upon these her youngest offspring and in one utterance pronounced them blessed. Our immortal Epworth bard might well have had this providential union prophetically in mind when he wrote:

“Why hast thou cast our lot
In the same age and place?
And why together brought
To see each other's face?
To join with softest sympathy
And mix our friendly souls in thee.
Didst thou not make us one
That we might one remain?”

Surely, if it be a crime for man to put asunder what God hath joined together, it would be nothing less than an unpardonable blunder to attempt to sever the vital ties which bind in one The Epworth League and The American University. This, however, is impossible. The union already effected is strong and every day grows stronger. One in spirit, the bonds that now unite them shall become the channels of a mutual and mighty fellowship for good. A. O.

Contributions.

PRESIDENT LOW ON UNIVERSITY EDUCATION.

From The Nation.

In the January number of the *Educational Review* the President of Columbia College gives his impressions of the condition and tendencies of the “higher education” in the United States. He modestly disclaims expert authority, and undertakes only to state “impressions of one coming from without into the educational field.” But whatever Dr. Low may have been in 1890, he is no longer an outsider in educational matters. He has been for three years the head of a great and growing university, and the period of his Presidency has been one of especially rapid development. The University has been transformed from a collection of unrelated fragments into an organic whole, and its consolidation has not only checked a considerable waste of educational energy, but has given a wise direction to the forces thus set free. It is not probable that all this progress is due solely to the wisdom of the President. Every revolution has its antecedent history, and it may be assumed that the changes made at Columbia during the past three years had long been preparing; but the speed and smoothness with which they were realized after Dr. Low's accession to office show a greater degree of insight into educational matters than his disclaimer would indicate.

In surveying the development of the higher education during the past quarter of a century, Dr. Low distinguishes two currents. One of these he terms the “world current” and ascribes to “the demand which has been felt everywhere for the recognition of new studies as of equal intrinsic value, in these days, with the old humanities. This pressure has come especially from two directions;

from the modern languages and from the many new developments of science. No country has been exempt from this pressure." The result in this country has been a widening of the field of college instruction, partly by the establishment of "parallel curricula," partly by the introduction of the elective system.

The other current he terms "national;" and this, in his analysis, is substantially university development as distinguished from the mere broadening of the college course. Its most important results are the incorporation of the professional schools into the scheme of the university, the development of non-professional graduate courses, and the correlation of the professional courses with the courses of research. Above the "higher education," in the old sense of the term, has appeared "this new thing, the university;" and "the college . . . is no longer and never can become again . . . the top of the educational system of the United States." "The college aims, or should aim, to lay the broad foundation upon which the university must build."

With this general statement of the tendencies of the highest education in the United States no one can well quarrel, but issue may be taken with Dr. Low's use of terms. Is the university movement in any true sense a "national" as distinguished from a "world current"? The whole movement, as he recognizes, is largely due to men educated abroad and familiar with the great European universities; and in our organization of the American university we are steadily approaching the Continental model. We think that the future historian of education in the United States will describe this movement in the midst of which we stand to-day as "the reception of the German university system." Of course we are not borrowing that system in all its details, and of course much that we have borrowed is becoming modified by American conditions; but we are debtors to Germany for the main principles of the new organization.

From the point of broadest view it seems to us that Dr. Low's two currents are identical in source, and that the only distinction is in the channels into which the stream has poured. A generation ago a great body of new learning was striving to force its way into our educational system. Not merely were the modern languages and the natural sciences inadequately housed in our schools and colleges, but philology, philosophy, the historical and political sciences, and the higher and more complex branches of inductive natural science were without academic shelter of any sort. The establishment of "parallel courses" (which term, we suppose, includes the scientific schools) and the introduction of the elective system could only partly meet the necessities of the situation. For advanced work in all these neglected subjects, the preliminary training of the college (or something equivalent to that training) was absolutely required. Some attempt was made, indeed, to crowd advanced courses into the already overcrowded college curriculum, but the results were far from satisfactory. The proper place for such work was in graduate courses; and with the establishment of graduate courses co-ordinated with the professional courses, these studies have begun to thrive and bear fruit. What is more, they have begun to broaden the work of the professional schools and to inspire them with the true university spirit—to which, as Schiller said long ago, Isis is, "the high and heavenly goddess," and not merely "the excellent cow that supplies its devotees with butter."

Much of this Dr. Low himself recognizes. He says in terms that the introduction of the elective system into our

colleges was largely due to the university movement. What he does not say, unless between the lines, but what we believe to be true, is that in so far as true university work, especially work of research, has been crowded into the college course, the experiment has been unsuccessful. The attempt to provide in this way for the highest education has been a failure. The stream has forced its way into the wrong channel.

It is a natural corollary of Dr. Low's view of the relation of the college and the university that he should look forward to a time when the college training shall be made a prerequisite for university education in theology, law, and medicine.

"The prophetic eye," he says, "can even now discern the day when a college education will be a condition precedent for entrance into the professional schools of the American university. This will not mean that only college-trained men will make good practitioners in law or medicine, for example, nor that only college-trained men are entitled to a professional education. It will rather mean, I think, that the university will then have fully realized its own obligation to the country to send forth into professional life, in all parts of the land, men of a thorough and wide equipment * * * I am not anticipating this result in the immediate future; but that this is the end towards which things are tending, seems to me hardly open to dispute."

Perhaps when the universities of the country have taken this position, the people of the country may say that no man shall be permitted to practice law or medicine without college and university training. That is the position which republican France and democratic Germany—socially democratic under its monarchic forms of government—have already taken, refusing to put up with professional service that is in any way short of the best that their educational institutions can provide.

THE AMERICAN UNIVERSITY, A WATER-MARK OF THE TWENTY-FIRST QUADRENNIUM.

ADDRESS BY DAVID H. MOORE, D. D., AT OMAHA, MAY 8, 1892.

It is significant that simultaneously with the uprising of the Epworth hosts, the pick and flower of all our youthful chivalry, whose central motive is self-improvement in order to greater usefulness for Christ, there should come the plan to build and endow, in the Capital of our Nation, a University to meet their loftiest purposes. God means that the Epworth League and The American University should be the twin-born prodigies of the last decade of nineteenth century Methodism. Let us see to it that the ends of Providence are not defeated.

Education and civilization have advanced with equal pace on our continent. The germs of classical learning were borne hither by Puritan and Cavalier. Harvard, Yale, King's, and William and Mary were among the first thoughts of those who broke the virgin solitudes of Massachusetts, Connecticut, New York and Virginia. And whenever in its westward course the march of civilization has halted to gather strength for still further advances, a college has sprung up, so that institutions for higher education stand as mile-stones from Plymouth Rock to the Golden Gate.

In this work the churches have pioneered the way, ours not the last nor the least. Out of the ashes of its Cokesbury have arisen, Phoenix-like, fifty-seven colleges, with property and endowments of over \$17,000,000.

The fadeless splendor of "Old Wesleyan" has been

caught on rising domes of new institutions and reflected to every section of our expanding country. There was a time when these vast plains and the snow-clad summits of the Rocky Mountains seemed to interpose an insuperable barrier. But to-day all her glories are caught on the shining pinnacles of the Nebraska Wesleyan and thence reflected to the mountain summits, where the University of Denver gathers into itself the scattered rays until it stands like Phoebus Apollo on Olympus, the very god of the sun, darting its beams to far-off California and Oregon. So that now, fed alike from the Atlantic and the Pacific, the iridescent glories of our educational institutions arch the continent. But the university period has only dawned on America. Its harbingers have been many, but itself is not older than the opening of Johns Hopkins. It must certainly be gratifying to Methodists that thus early the plans are matured and the enterprise auspiciously inaugurated to found in our National Capital a Methodist institution, which shall be a University in the broadest sense of the term, the scope of whose work is suggested by the fact that it does not propose to open its doors until it has an endowment greater than that gathered by all the institutions of our Church in a hundred years.

Think of the influence for good of such a University, located at the very fountain-head of American life!

It is the audacious largeness and the unchallenged wisdom of the undertaking which commend it. It is its harmony with the spirit of modern enterprise which attracts the notice and favor of those able to meet its expectations.

All business undertakings that are favored are colossal. Labor unions on the one hand and monopolies on the other are indications of a tendency to great schemes. Nothing is too stupendous for the enterprise of American capital! Having tunneled the Hoosac, it will, by and by, bridge Behring's Strait. Give people some vast undertaking and they are ready. Ask the Colossus to lift a trifle and he laughs at you; ask him to remove mountains and he is your obedient servant. Such are the grounds of our confidence that The American University will receive its millions for endowment and equipment and will enter upon a career of transcendent importance to Methodism and the destiny of the American people.

The eyes of the civilized world are upon the undertaking. When the Romish Goliath pitched his educational array under the shadows of the Capitol, and defied the hosts of Protestantism, it looked like a deliberate purpose to plant another Vatican over against our American Quirinal and to repeat on American soil the tragedies that have darkened sunny Italy.

Little wonder that a feeling akin to dismay smote the heart of this Protestant Nation, until the Spirit of God came upon our Bishop, and sent him out, in the name of the Lord of Hosts, to lift up the banner of Methodism, as the champion of an open Bible and a free conscience. Nor is it wonderful that Elijah, and even Saul, should have felt that the stripling, who had hitherto attended a few sheep in the wilderness of New Jersey, was not able to go against this Philistine, until they remembered that when the Wall Street lion and bear came and took a lamb out of his flock at Drew, he pursued after them and smote them, and slew them and delivered the lamb out of their mouths. Then they felt assured that the Lord, who delivered him out of the paw of the lion and out of the paw of the bear, would deliver him out of the hand of this Philistine, and they said, "Go, and the Lord be with thee!" Brethren, he is going. He is crossing the brook. He has chosen him the five smooth

stones. Even now he puts one into his sling. Be ready, ye men of Israel and of Judah, to arise and shout and pursue to the very gates of Ekron!

I confess that I shrink agast at the mere thought of failure. We have gone too far to retreat. We are committed to the cause. Our Bishops have indorsed it. Ecumenical Methodism has hailed its inception. It will stand in history as the stupendous victory or the irretrievable disaster of Methodism. Some among us may be disheartened and discouraged; but listen to the sturdy cheer and rugged confidence of our Joshuas and Calebs, for we are fully able to go up and possess the land.

However great the good to our Nation from the successful prosecution of this enterprise, equally great must be its success to our Church. This in many ways—enlarging the sphere of its influence, increasing the efficiency of its ministers, and, chiefest of all, serving as a mighty connective bond. After our Episcopacy and Book Concerns, our educational institutions are our strongest connective ties. Yet their influence in this regard is limited to the conferences which patronize them. But of this University all conferences and all colleges are to be the patrons; hence its connective influence will be bounded only by the extent of the Church itself.

Into its treasury will flow the widow's mite and the poor boy's penny, the servant girl's wages and the mechanic's offering; for its blessings are for all. And from their abundance the rich among us will make princely gifts. The day has come which Wesley anticipated and almost feared—the day when our congregations abound with rich men. Such insight and foresight have some among us that, like Midas, whatever they touch turns to gold. They are burdened with their wealth and anxiously inquire where they shall bestow their goods. Will they not remember that when Midas prayed the gods to deliver him from the burden of the fateful gift, he was directed to trace Pactolus to its source and bathe in its fountain head? Then, when he had done so, lo! he had deliverance, and thenceforth its sands were golden for the poor man's good. Do not our Methodist Midases see that our Pactolus heads in Washington in The American University? and will they not bathe therein, that, wherever its streams of influence flow, its sands shall be golden for humanity's needs?

In its external conditions Methodism is ever changing, but preserves its identity in the continuity of its spiritual life. Its days of persecution, and, in some large measure, its days of hardships are past. The little one has become a strong people, and they of Caesar's household are in its communion. But it remains the Methodism which Wesley instituted, and Asbury and Coke planted amid the wilds of the Western Continent. Emerson says: "The Dorian temple preserves the semblance of the wooden cabin in which the Dorian dwelt. The Chinese Pagoda is plainly a Tartar tent." And so I believe that when our hopes are realized and our prophecies fulfilled in The American University, there will be retained in its classic halls and academic groves the memory of Wesley and Fletcher, and Coke and Asbury, of Susannah Wesley, Dinah Evans, Sarah Crosby, and Barbara Heck, and of their immortal successors. Aye, and the very glories of its architecture will be shaped by the unfading impress of the past. Its halls of art and science will reflect Kingswood and Cokesbury. Its dormitories will perpetuate the hearty cheer of the pioneer's cabin, and its spacious chapel blend the memories of Foundry and sail-loft, and log-meeting-house, with those of the massive cathedrals and tasteful shrines of to-day.

Thus in doctrine and in polity, in fellowship and practice, the past will be reproduced in the present. In The American University the Doric temple of Methodism will be preserved, the semblance of the wooden cabin in which the Dorian dwelt, and in its heroic John Hurst will be perpetuated the dauntless and triumphant spirit of his John Wesley.

Educational Notes.

The widow of Gen. John A. Logan, whose name stands so high upon his country's honor roll, is said to have undertaken the task of raising \$1,000,000 from the women of this country for the American University at Washington, D. C. Systematic bodies of assistants throughout all the States will aid in obtaining this sum. May Mrs. Logan meet with success.—*New York Mail and Express.*

The bishops at their recent meeting in New York City appointed the following University Senate: At large, W. F. Warren, D. D., Boston, Mass.; District 1. B. P. Bowne, D. D., Boston, Mass.; 2. B. P. Raymond, D. D., Middletown, Conn.; 3. C. N. Sims, D. D., Syracuse, N. Y.; 4. J. F. Goucher, D. D., Baltimore, Md.; 5. T. P. Marsh, Mt. Union, Ohio; 6. Prof. W. H. Crogman, Atlanta, Ga.; 7. J. P. D. John, D. D., Greencastle, Ind.; 8. Pres. H. W. Rogers, Evanston, Ill.; 9. M. V. B. Knox, D. D., Wahpeton, N. D.; 10. Prof. A. B. Hyde, D. D., Denver, Col.; 11. W. A. Quayle, D. D., Baldwin, Kans.; 12. L. G. Adkinson, D. D., New Orleans, La.; 13. Prof. F. W. Schneider, Berea, Ohio; 14. J. N. Beard, Napa, Cal.

The Illinois Wesleyan University not only shows increased prosperity in the time covering the past school year and the beginning of the present, but has reached a crisis of opportunity. No time in its past history has presented such opportunities of enlarging its endowment fund, increasing its facilities, and thus immediately enlarging its sphere of general usefulness, as is now presented it. The Preparatory School is full. The College of Letters is rapidly growing. At the last Commencement forty-three passed from the Preparatory School to the freshmen class. All the other schools—namely, Law, Art, and Music—are full, self-supporting and increasing in popularity and power. Special efforts are now being made by Rev. B. W. Baker, Financial Agent, and Dr. W. H. Wilder, President, to secure greatly needed increase to the funds of this institution.

The recent Conference of the Catholic Archbishops adopted the following report on parochial schools:

"First. *Resolved*, To promote the erection of Catholic schools so that there may be accommodations in them for more, and, if possible, for all our Catholic children, according to the decrees of the Third Plenary Council of Baltimore and the decisions of the Holy See.

"Second. *Resolved*, That as to children who at present do not attend Catholic schools we direct, in addition, that provision be made for them by Sunday-schools and also by instructions on some other day or days of the week, and by urging parents to teach their children the Christian doctrines in their homes.

"These Sunday and week-day schools should be under the direct supervision of the clergy, aided by intelligent lay teachers, and, when possible, by members of religious teaching orders."

ONE OR MANY?

One post-graduate university for our church, and that in Washington, the Capital of the Nation, is enough. What sensible man can plan better things? God's blessings upon the army of "A. B.'s." Let them flock to the Capital aforesaid and learn that which their sophomoric wisdom deemed unnecessary before they obtained a fuller glimpse of the land of scholastic promise. We hold that one prominent university of the kind for our church is enough. Let ambiguous graduates who have sufficient friends, money, and time go to our American Mecca and get their graduated brains stimulated and informed to the maximum. We are persuaded that this equation is in best shape. Other colleges should do their best for candidates for the degree of "A. B." The better the A. B., the better for him who aspires to a point, or points, beyond A. B. Work like this is a unit. If it is definitely understood and agreed that The American University at Washington is to serve the church as an exclusive post-graduate university, all Methodist rivers will pour water on that valuable water mill. Let there be no misunderstanding about that! Washington is our Capital in many respects. If graduated men and women long for advance scholastic privileges, our undergraduate schools will direct knowledge-hungry students to that privileged fountain of advanced and advancing learning.—*Northwestern Christian Advocate.*

FROM THE FIELD.

The following is a voice of courage and power from the uplands:

LAMAR, COLO., Dec. 13, 1892.

DEAR BISHOP HURST: I hereby send you \$1.30 to go towards the most needful things about the University. I took up this little collection so that we might have something in The American University. The church that sends this is far out on the plains and the members are poor. I wish I could send you a million. You have my prayers for this great cause. Yours very truly,

W. I. TAYLOR.

Rev. William S. Crandall writes from Nunda, N. Y.: "Will you see that the cash for the enclosed money order for \$16 find its way into the proper channels, as per the following directions: For the General Fund, \$8.25; for Lincoln Hall, \$3.00; for Epworth League Fund, \$3.00; for Mrs. Logan's Fund, \$3.00; for UNIVERSITY COURIER, \$1.75;" and then adds: "My own subscription for the University will follow at a later date," with many encouraging notes which we do not feel at liberty to publish. He closed his letter by saying: "We had a decidedly interesting service on the 16th instant, the people manifesting much more interest in the affair than I anticipated. It is a large undertaking, but it will be accomplished."

The Iliff School of Theology will issue a monthly series of short studies in St. Paul's epistles in their chronological order. That order will naturally follow the development of doctrine and of the man from the fresh exuberance of his early Christian life toward the unwordable richness of his full manhood's experience and knowledge. They will be designed to be fresh and useful to every Bible student. Price, 25 cents a year. Address Bishop H. W. Warren, Professor of English Bible, University Park, Colo.

NOTICE

To Pastors and Officers of Epworth Leagues who desire to hold a Columbus Memorial Service in 1893.

We are filling, and shall continue to fill, orders for the CHURCH SERVICE and for the YOUNG PEOPLE'S CONCERT EXERCISE, furnished for 30 cents per hundred (to cover postage), for use in presenting the cause and taking a subscription for The American University. Each Service is distinct from the other, and can be used in the same church without duplication of exercises. Samples sent free on application. Address

THE AMERICAN UNIVERSITY,
1425 N. Y. Ave., Washington, D. C.

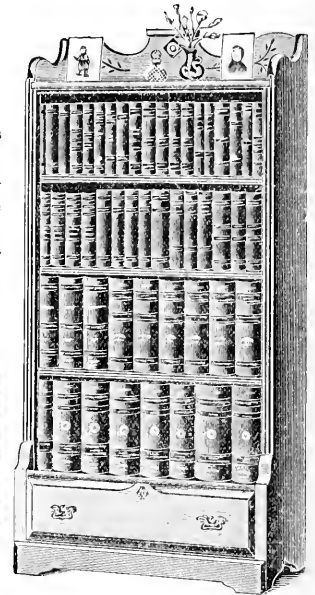

One Hundred Antique Oak Book Cases. Free to Methodist Preachers.

WHEN ALL METHODISTS
realize how thoroughly good the actions,
handsome the cases, and sweet the voices
of EPWORTH PIANOS and ORGANS,
we will be compelled to increase our man-
ufacturing capacity, for even now the
three factories are crowded with orders,
which flow in from every nook and corner
of this vast country.

WILLIAMS ORGAN COMPANY.

CUT OUT THIS TICKET
and pin to your order or list of pro-
spective buyers if you want one of the
book cases. Read conditions below
carefully. It is as safe to do business
with us as with the Book Concerns.

IN NOVEMBER we ordered the factory to make one hundred Oak Book Cases for the Holiday trade. These cases were delayed and are just now finished, but the holidays are past and the holiday trade is gone. We have decided to give these Cases to Methodist Preachers sending names of people who will buy Epworth Organs or Pianos from us in the dull months of January and February, or we will give them, as long as they last, to Methodist preachers who order Styles 302 Chapel, or 602 Parlor Organs or Epworth Pianos for themselves or others before March 1, 1893; the Stationary Case with Organs and the Revolving Case with Pianos. If you want one of these handsome Oak Cases send us a list with post office addresses of half a dozen or more people who are likely to buy Pianos or Organs soon, and if we can sell to one or more will send you as a premium, one of the above cases. We will soon issue a book giving testimonials from

ONE THOUSAND METHODIST PREACHERS

Who have bought Epworth Pianos and Organs for themselves and friends. Epworth Pianos and Organs are thoroughly reliable, well built inside and out, and sold by us direct from factory to the people at factory prices, and if they are ordered through our ministers no money is wanted until they are thoroughly tested and found as represented. We refer to Cranston and Curtis, Hunt and Eaton, Chaplain McCabe, Dr. J. C. W. Coxe, Dr. G. W. Gray, editor of this paper, our own pastor and presiding elder, and to thousands of satisfied Methodist preachers and people all over the United States. We are shipping pianos and organs right to New York, Massachusetts, New Jersey and other eastern states, saving our customers from \$25.00 on an organ to \$100.00 on a Piano.

REV. J. E. CORLEY, Presiding
Elder of Burlington District,
Mt. Pleasant, Iowa:

"We are still enjoying our Ep-
worth Piano."

WE ARE METHODISTS,

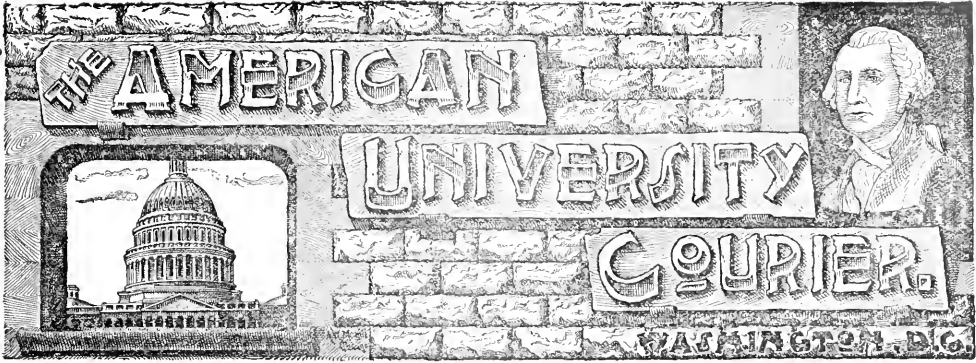

**BUT DON'T ASK ANY FAVORS EXCEPT THOSE
FOR WHICH WE GIVE FULL VALUE.**

REV. J. A. SARGENT, Presiding
Elder of Connersville District,
Connersville, Indiana:

"We are more than pleased with
our Epworth Piano. Wish your
company success."

Send for our new Thirty-two page Catalogue free, and if a preacher state conference:
if not, give name and address of preacher.

ENDORSEMENTS FROM REPRESENTATIVE BODIES.

California Conference.—“We pledge to this great institution our heartiest sympathy and co-operation.”

Northwest Indiana Conference.—“We heartily concur in the enterprise. We are pleased with the name.”

Pittsburgh Conference.—“We promise our co-operation in the bringing of this great enterprise to a triumphant consummation.”

Cincinnati Conference.—“It deserves the hearty support of every Methodist. We pledge the cordial co-operation of our ministers and members.”

Central New York Conference.—“We bespeak for this undertaking the favor and the assistance of the Church, and of the general American public.”

Detroit Conference.—“The plan to organize a real and grand American University at Washington, D. C., we hail as a desirable and noble advance in education.”

Indiana Conference.—“We give hearty endorsement to this great enterprise and express faith in its future. We commend it to the confidence and liberality of our people.”

Minnesota Conference.—“We endorse the action of the General Conference regarding the establishment of The American University. We pledge sympathy and support.”

Central Illinois Conference.—“Resolved, that we heartily co-operate in the action of the General Conference in the establishment of a great Christian University at Washington, D. C.”

Wisconsin Conference.—“We cordially commend the great enterprise to the attention of our preachers and people. It will have an immense advantage over every post-graduate institution in the United States.”

Board of Control of the Epworth League.—“We gladly unite in the endorsement of the Bishops, and commend this National educational enterprise to the Epworth Leagues of our Church.”

Philadelphia Conference.—“We give our hearty endorsement to the scheme of Bishop Hurst to erect Epworth Hall at The American University at Washington, by contributions from members of the League.”

Erie Conference.—“We trust that Bishop Hurst's appeal to the Epworth Leagues of the Church will meet with prompt and liberal response on the part of the various chapters of the League in our Conference.”

Baltimore Conference.—“This institution, when equipped as intended, will furnish graduates from all colleges the largest opportunities for post-graduate courses, under circumstances unsurpassed by any of the institutions of the old world.”

New York Conference.—“We rejoice at the progress being made to lay broad and deep foundations for The American University, an institution which will take its place along with the Universities of London, Heidelberg and Berlin, for the promotion of education and investigation in science, literature and art.”

Bishops of the Methodist Episcopal Church.—“We are of the opinion that a university fully equipped and amply endowed for original investigation, and for post-graduate and professional courses of study, established at the Capital of the Nation, under Protestant control, would be of great service to both the Church and the State.”

MOUNT VERNON SEMINARY

FOR YOUNG LADIES.

ENGLISH, FRENCH AND GERMAN BOARD-
ING AND DAY SCHOOL.

Cor. of M and 11th Sts. N. W., Washington, D. C.

MRS. ELIZABETH J. SOMERS, Principal.

The Seminary endeavors to meet a demand known to be imperative by all acquainted with the problems of the education of girls—the demand for a school more systematic, thorough, and modern than the typical boarding-school, yet less severe and arduous than our women's colleges. Up to the Junior year its course is as full and its discipline as thorough as that of any college preparatory school in the land. Beginning with the Junior year, the course consists of selections from the college curriculum, adapted to the needs of those young women who desire a thorough training in selected branches, but who desire, also, to avoid the strain of a college course.

The school is thoroughly modern in spirit and in method. Its faculty is composed of earnest, enthusiastic teachers—specialists in their several departments—most of them women with college training.

Special emphasis is given to the following subjects: English Language, Literature, and Composition; Natural History; Art, and the History of Art; General History and American Political History. The time given to these subjects, and the breadth and thoroughness of the treatment accorded to them, do not fall below those given them in our best colleges.

The buildings are new and perfectly equipped for health and comfort. They are heated by steam, have perfect drainage and ventilation, a passenger elevator, and bath-rooms which are furnished and fitted with the best appliances known to modern sanitary science.

For further information apply to the principal, who also refers to the following patrons:

Editorial.

SOME changes in the publication of THE UNIVERSITY COURIER are under advisement by the Executive Committee. One of the features will probably be its publication as a bi-monthly or quarterly, instead of as a monthly periodical. The next number will be issued about May 1st.

OUR Board of Trustees has sustained a great loss in the death of the Rev. James W. Reid, of the Michigan Conference, pastor of the Second Street Methodist Episcopal Church, Grand Rapids, Michigan. He died after an illness of three weeks, January 21, 1893. A brave, talented, consecrated worker for God and humanity sleeps in peace. He was elected a Trustee of The American University December 7, 1892.

ALWAYS below her ideal in practice and in learning, she (the Methodist Church) has held the banner of holiness high because the Lord commanded; and beginning her work in a university has passed her people, converted at her altars, on to her schools, her colleges and universities, and dares to plan today at the Capital of the Nation the most modern and the greatest of American schools of learning.—Bishop DANIEL A. GOODSSELL, in *Methodist Review*.

"A MILLION IN '93."

This watchword adopted at the semi-annual meeting of the Trustees December 7, 1892, has been efficiently seconded. It was announced to a recent meeting of the Executive Committee by Bishop Hurst that a gentleman of Washington had subscribed \$100,000 towards the endowment of the University, on condition that one million dollars be secured during 1893. Another condition attached to the gift is that the name of the donor be a private matter for the present. Other subscriptions for smaller amounts have also been received of late. Due announcement will be made of these and other important contributions. Around this nucleus of one-tenth acting as a magnet we both hope and expect to see other noble subscriptions from various sources cluster to the full million.

THE FIRST TWO YEARS OF THE AMERICAN UNIVERSITY.

BISHOP HURST'S ADDRESS, AT OMAHA, MAY 8, 1892.

When, a few weeks ago, the liberty was extended from Omaha, for a meeting this afternoon on behalf of The American University and Christian education, it did not take long for a telegram to tell back to the Committee of Arrangements in Omaha: "Accepted with many thanks." But that was only the formal acceptance. The real acceptance is to be found in this magnificent audience, gathered here beneath these generous skies, consisting of representative Methodist people from every part of the world. We have met here for Christian education in the highest, broadest, and most Christian sense. I am very thankful that we are honored with the presence of so many educators. A church whose origin dates back to the educational life of John Wesley has a right to a great university. That man, walking with the Word of God in his right hand and a basket of bread for prisoners on his left arm, is a fitting type for all time of the impulses and aspirations of the Methodist heart and brain. It is difficult to tell just where a great thought begins. I think that no one living in Washington at this time, no one who sees from his home the top of the Washington Monument, or the far reaches of the Potomac, is responsible for this idea. There is a member of this General Conference, now getting quite venerable, who, many years ago, wrote a letter to Bishop Simpson begging him to embrace the opportunity for a university to be built in Washington by our church. Bishop Simpson contemplated removing to Washington, that he might promote the enterprise. Bishop Newman will tell us of the genesis of The American University. He will not tell you, however, about his part in it, which was a great one.

In 1872 Dr Newman, then a resident in Washington, Dr. E. O. Haven, secretary of our Board of Education, and Bishop Ames began arrangements to select a site for the University, which should be of the broadest National character and under the auspices of the Methodist Episcopal Church. Bishop Ames said to Dr. Newman, our present Bishop Newman—of whom Omaha, and the church, and the country, have reason to be proud—"Dr. Newman, you go out and raise the money." That was the end of the consultation.

The church was really not then ready for the Uni-

versity. The Metropolitan Church was a double handful for even Dr. Newman. The sentiment of the general church had not gravitated toward the great thought. In due time, however, the heart of the church began to beat more quickly at the thought. Sentiment began to be concentrated, and I may say consecrated, for the supreme purpose of planting a Protestant force on the bank of the Potomac which should reach around the world and to the end of time.

The pressure came from humble pastors; from men and women in different parts of our country; and from every class of life. So pressing and frequent were these monitions from the great outside world, that at last I felt ashamed to sit quietly in an easy chair and look out through the window upon finished things. A search for a good piece of ground as a site for the University was made. The land came, a beautiful location, not surpassed, as a site for a university, in Europe or the United States. Before the purchase was made, however, I talked with financial gentlemen of wealth in our church, with educators, and others, in order to see what they thought of it. Of all the persons with whom conversation was held before a foot of land was bought, every one said: "The church is anxious for it, the church needs it, and the church will plant it."

A site of 92 acres of land for the University, on the northwest heights of the city, was bought for \$100,000. Responses came in from many quarters, expressing the hearty salutations of the noble representatives of our educational institutions. One among the first was that of Dr. Warren, of Boston, then another from the equal Warren of Denver, and then others from presidents and members of faculties, all expressing the wish: "God bless the noble work." Many of the honored men who sit on this platform, and lead the young mind of our church toward the higher planes of Christian knowledge, gave early expression to their confidence in the success of the undertaking. They said, "We cannot yet see how the money will come, whether or not the sentiment of the church will rapidly grow; but our hearts are waiting, and we believe in ultimate triumph."

When last November, in Cleveland, Ohio, the Association of College Presidents of our church adopted resolutions commending this work to the action and co-operation and endorsement of the General Conference, I felt it was just like them to do that noble thing and say that strong word.

The payment for the site has already been provided for, besides a surplus of about \$20,000. At least three-fourths of that money has come from Protestants in Washington of other confessions than our own. We

have, in addition, pledges amounting to \$140,000, the mere beginning of an endowment which we aim to reach, namely, \$10,000,000.

Perhaps one of the great things that have led our church to think of Washington as the site for educational life is this: The unequalled combination of scientific collections in that city. Major John W. Powell, of the United States Geological Survey, has given us information showing the vast wealth deposited in the government collections, and which are now available for all students in the higher walks of science. As to the value of the collections, the original cost and the annual expense of maintaining them, few people have the least idea. It is found that the present value is over \$32,485,000, and that the annual outlay of the Government necessary to maintain them, is nearly \$4,000,000. Congress has just passed a law requiring all these collections to be open for the inspection and study of students in higher science. All this is without cost to any student. Our University will never need to buy any general library, or a single geological specimen, or a medical specimen, or a telescopic appliance, or mechanical illustrations, or, indeed, anything in the line of object lessons. These are furnished in the remarkable scientific treasures in Washington alone.

You can imagine how happy our hearts were when both Houses of Congress passed the bill throwing open this vast store-house of scientific treasure to students of every confession who might gather in Washington for scientific research. There is, therefore, in Washington a university in many sciences already. What is now needed is the grand religious support of an organization working in a Christian atmosphere, and students coming from every part of the United States and using these various treasures for the highest culture of the mind in a spirit of delightful unity.

What does all this great opportunity mean? First, that he who invests money in education for The American University may depend upon it that his investment will go directly to the benefit of the students, and that none of it need be expended in scientific accessories: for these are all furnished by the government of the United States. All that is needed is the erection of buildings and the employment of a faculty worthy of the twentieth century. Why did we ask Major Powell to give us these facts? In order, also, that the world might know that something else is going on in Washington besides politics and legislation. In order to furnish the money necessary to conduct the various institutions in Washington, \$58,000,000 would be needed to provide the annual income. In addition, the value of the government collections is

\$32,485,000. We, therefore, have the lowest possible estimate which would be needed to furnish a revenue sufficient to support the institution—about \$90,000,000. All we ask is that the Methodist Episcopal Church put the capstone on this great endowment by the final gift of \$10,000,000.

In no city of this Nation, and I believe of any nation, are there living so many men eminent in science and literature as in Washington. Professor Tyndall says: "In no city can so large an audience of learned men be secured at so short a notice."

The universities of our own country make constant drafts upon the treasures of literature and science in Washington by sending hither their professors and students. Major Powell says that no man can perfect himself in geology without coming to Washington, and that his bureau contains the most excellent geological library in the world. In fact, that one Geological Library numbers 74,000 volumes.

Professor Balfour, of Oxford University, says there is no city in the world where scientific studies can be pursued to so great advantage as in Washington.

In our first days there came word from twenty-one Methodist students in Berlin, saying in substance that they would not have gone abroad had there been a National Protestant University in Washington. I need not speak of the sympathy of great public men with this movement. Senators, Members of the House, and others eminent in public services, in literature, and in science, have spoken most helpful words. President Harrison, at the beginning, wrote a letter of warmest sympathy with our movement, and urged its early inauguration and completion. He would have attended our first meeting, but was absent from the city.

Our object is to appeal to the wide world for funds, but not to hasten. The University cannot be built in a day. Our plan is to raise a fund of \$5,000,000 besides the buildings before we begin operations, but not to regard our equipment complete until we shall have raised \$10,000,000.

Further, we do not propose to have a college department at all. As the college corresponds with the German gymnasium, and the gymnasium is the proper preparatory school for the university, so do we want in Washington this University to begin where the college leaves off. We propose to confine the curriculum to strictly post-graduate and professional work. The University doors will swing wide open to all persons of approved moral character who come with academic and scientific degrees. As God, by His special Providence, has led us at every step, so will He lead us in all future years, until students from many lands shall enter its halls in quest of light from Him who is the Light of the World.

PROPOSED OUTLINES OF BUILDINGS AND DEPARTMENTS.

HALLS.

1. Administration Hall with Library and Chapel forming one group.
2. Halls suited for the use of the several departments of the University.

DEPARTMENTS.

I. *Science.*

1. Mathematics.
2. Physics.
3. Chemistry.
4. Biology.

II. *Philosophy.*

1. Metaphysics and History of Philosophy.
2. Psychology and Logic.
3. Political Economy and Sociology.
4. Constitutional Law and Political Science.

III. *Languages and Literature.*

1. Oriental and Semitic.
2. Greek.
3. Latin.
4. Romance.
5. Germanic.
6. English.

IV. *History.*

1. American.
2. European (West and North).
3. Mediterranean.
4. Oriental.

V. *School of Law.*

VI. *School of Medicine.*

Besides Professorships, Lectureships, Scholarships and Studentships in all the above named departments it is proposed to make special provision for the following subjects:

1. Christian Archaeology and the Evidences of Christianity.
2. The Science of Government.

THE ASBURY MEMORIAL HALL.

Several of our ministers in different parts of the country almost simultaneously conceived the idea that at least 1,000 of their brethren would esteem it a privilege to give \$100 each to build a Hall of The American University. They believe that a spontaneous gift of \$100,000 from our preachers would give a new impulse to the liberality of our laymen, furnish a fresh proof of the deep interest of our ministers in such higher education as The American University is intended to provide, and be an expression of their conviction that the further development of Christian education in America demands the creation of a great Protestant University, in which post-graduate and professional studies of the highest grade may be pursued, under instructors both learned and evangelical.

The name of the building will be The Asbury Memorial Hall, to commemorate in fitting and permanent form the service and labors of our pioneer bishop and the founder of American Methodism—Francis Asbury. It is proposed that the Hall be after the general plan of Christ Church College, Oxford, where John Wesley was a student. The trustees of The American University, consenting to this proposal, pledge themselves to provide a tablet to be built into the wall of the entrance of the Asbury Memorial Hall, to be inscribed with the names of the one thousand donors.

Any preacher who desires to join in this movement is invited to send his name and amount of subscription, payable at convenience within three years, together with any correspondence, to Bishop John F. Hurst, 4 Iowa Circle, Washington, D. C. Any church or congregation wishing to give this amount (\$100) in behalf of the pastor can thus add his name to the list as one of the one thousand. All money should be sent to Hon. Matthew G. Emery, Treasurer of The American University and President of Second National Bank, Washington, D. C.

THE WOMAN'S COLLEGE OF BALTIMORE CITY.

BY REV. J. W. CORNELIUS.

The Woman's College of Baltimore is one of the educational marvels of the age. Though only in the fifth year of its scholastic work, it already ranks among the chiefest of those institutions which provide, either co-ordinately or exclusively for the physical, intellectual and moral culture of the gentler sex. Determined upon in 1884, incorporated in 1885, its first building completed in 1887 and its first classes enrolled in 1888, its most sanguine friends voted it a decided success when forty students matriculated. Now there are 350 students and as many more have been refused for want of accommodations. A Faculty of thirty-six expert specialists has been secured, a group of five magnificent collegiate edifices, with three more under contract, have been erected, and six acres of land for its present needs and future growth have been purchased in one of the best and newest residence portions of the Monumental City. The properties and endowments already accumulated have an estimation of a million dollars with an immediate prospect of large additional donations. A few noble spirits have from the beginning been in local touch with the enterprise, stimulating it with their patronage, influence and gifts; but the reputation of The Woman's College seems to have taken the wings of the morning and traveled to the ends of the continent. There are young lady students within its walls from Maine and California, from Michigan and Texas, and from many of the intervening States and Territories; while applications from those who are preparing to enter are pouring in from all directions. The superb structures, the high curricula, the refined social and moral environment, the complete organization and equipment have attracted wide observation and have prompted unsolicited recognition by the chief official body of the great denomination which is its special patron. The Episcopal Address to the last General Conference of the Methodist Episcopal Church viewed the Woman's College as a twin institution with the great American University to be located at the National Capital, commending them both to the admiration and support of the great Protestant Christianity of the country.

The thought of a Woman's College for Baltimore originated in the large heart and brain of its present efficient and distinguished president, Rev. John F. Goucher, D. D. While pastor of the First Church (the actual and legal successor of Lovely Lane Chapel, where the Methodist Episcopal Church was organized at the Christmas Conference of 1784), and gratefully contemplating what special offering he might make to God in the centennial year of American Methodism, it came to Dr. Goucher as an inspiration that the higher education of woman was one of the supreme needs of the time. He first agitated the subject in private circles. Elected and representative Christian women were consulted, who agreed that a thoroughly equipped school of high grade for young ladies was one of the noblest objects upon which to concentrate Christian beneficence. It was then presented to the Baltimore Annual Conference, the mother conference of the Church, at its one-hundredth session held in Washington City March 5-11, 1884. That body, after careful consideration extending through several days, agreed to make the establishment and endowment of a Woman's College the principal aim of its centenary contributions. An elaborate report was

adopted, and, with a hearty practical consistency, \$15,000 were subscribed immediately by the members of the Conference besides the large absolute and conditional subscriptions by Dr. Goucher. The Conference also determined that a part of the annual educational collections taken in its various charges should be devoted to the support of six scholarships awarded equally in its five presiding elders' districts after competitive examinations, and one at large.

The city of Baltimore furnishes, providentially, superior advantages for this new seat of learning. The authorities of the Woman's College forcibly state them thus:

"The whole section of country in which it is situated is noted for its healthfulness; the mildness of the winters is in marked contrast with those of the North and West, while the cleanliness and excellent sanitary condition of the city are proverbial. The prevailing tone of cultivated society is wholesome. The churches represent the leading denominations and furnish opportunities for religious culture and Christian work. The Lord's Day is generally observed in a manner indicative of elevated public sentiment and well executed laws. The presence of the Johns Hopkins Hospital and Medical School brings here practitioners of general medicine and specialists who are in the front of their profession. The Johns Hopkins University diffuses an atmosphere of studious investigation and literary taste and affords, through its lectures, many valuable opportunities of hearing from eminent scholars in all departments of learning the statement of their own most recent views. There are large and well selected libraries—the Peabody, Pratt, Historical, Mercantile, Bar, Medical and Chirurgical—which, with the University Library, contain in the aggregate nearly half a million volumes and afford abundant facilities for general reading or special investigation. The Art Gallery of the Peabody Institute is open all the year, and the celebrated private galleries of Mr. William T. Walters during a portion of each winter. The Peabody Course of Lectures and Peabody Symphony Concerts offer literary and musical entertainment and stimulus. Additional opportunities are frequently afforded of hearing notable singers, musicians and lecturers from all parts of the world. It may be added that the proximity of the National Capital renders accessible, at a trifling expenditure of time and money, libraries, museums, galleries of art and other institutions of great educational importance."

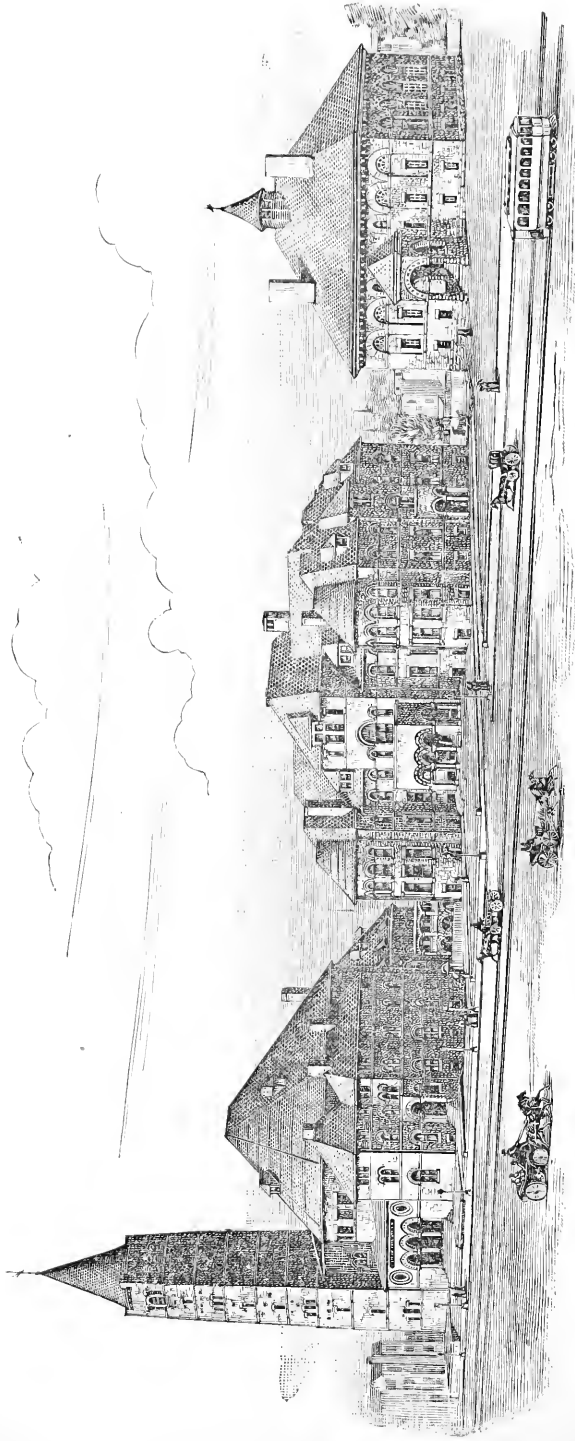

The Woman's College is adjacent to the First Methodist Episcopal Church, one of the best church properties in the connection, the chapel of which is available always for devotional and concert exercises, and the auditorium for any occasion of general interest. Goucher Hall, immediately to the north, is a peerless granite building of Romanesque architecture, adapted for purposes of administration and instruction only. It contains forty rooms, with chemical, physical and biological laboratories and apparatus in the lower story, and botanical, mineralogical and other collections well displayed in the principal hall-ways. The structure, with the ground on which it stands, valued at \$185,000, is the gift of Dr. Goucher and family. Bennett Hall, the Gymnasium, standing near the Goucher Hall, is the gift of Mr. Benjamin F. Bennett, one of the princely men of Baltimore Methodism, who in its erection perpetuates the memory of a sainted consort. The building itself is worth \$49,000, without the ground, and contains a swimming pool and walking track, besides many choice modern appliances for physical culture. It is pronounced by those who have had opportunities for wide observation to be the best and most thoroughly furnished gymnasium in the world for the

exclusive use of women. The Girls' Latin School, a preparatory department made necessary by the great variety of educational attainments of many who seek admission to the degree courses, another magnificent building now being completed at a cost of \$100,000, will also bear the name of the generous donor, Mr. Alcaeus Hooper, of Baltimore. It contains the best features of such a department that money, architecture and experience have suggested. The College Homes, two of which are completed and a third under contract, contain every convenience for health, comfort and utility. They are provided with elevators and fire escapes, and have kitchen, laundry, dining-room and service quarters in the upper stories, so that no odors or noise may annoy the students. Buildings for art, music and science are in contemplation for the near future, and will not be inferior to the best modern edifices for such purposes.

Though having a distinct local and denominational origin, nothing is more foreign to the aim, scope and administration of the Woman's College than a sectarian spirit. The Faculty has been constituted without regard to denominational attachment, every Protestant Church being represented in its personnel. Women of every faith are welcomed to its scholastic privileges. The instruction is distinctly Christian, not distinctively denominational. All legitimate means are used to develop a high standard of Christian character and personal religious life; but no effort, direct or indirect, is made to influence Church relations.

The academic curriculum is equal to that of any college either for men or women in the United States. The student work is divided into fourteen groups of subjects, each group leading to the degree of A. B. In each of these groups fully one-half of the required studies are the same, the other half being dependent upon the special purposes or aptitudes of the student herself. This gives option in a wide range of electives under the most careful supervision.

Besides these facilities for the best culture of the female mind, there are unexcelled provisions for physical and for moral culture. The Woman's College was the first in the world to make the hygiene and physical training of women a regular department of required scholastic attainment, and to place a full professor in charge. All students who matriculate are obliged to take both the kind and quantity of exercise prescribed by the professor in charge. The head of this department is a lady physician who has attained eminence in her profession both in this country and abroad, and has a thorough knowledge of Mechanical Therapeutics. She is assisted by two graduates of the Central Royal Gymnastic Institute of Stockholm. The better kind of Zander apparatus, especially constructed for the development of a single class of muscles, is liberally employed. Each student is carefully examined and the strength of each set of muscles tested. Where deviations from the normal are detected, diagrams are drawn showing the exact location and strength of the muscles. Measurements are taken every month, in such cases, and the diagram of each measurement is drawn over the preceding one in different colored inks, so that at a glance the improvement and present condition are readily shown. The results realized by these tests have been almost startling. Of the students admitted in September, 1892, thirteen had curvature of the spine more or less severe, but only one possessed knowledge of the fact. Some of the others had considerable nervous excitability, weariness, lack of endurance and other uncomfortable conditions, but the true cause had not been detected until they were accurately

SOUTHERN HALF OF CAMPUS.

measured. In every case improvement has been noticed; in some the difficulty has been almost entirely eradicated. Of the students in September, 1892, who had been previously measured in September, 1891, thirty-six per cent had increased their lung capacity twenty-five per cent or more; twenty-five per cent had increased their lung capacity forty per cent or more; and four per cent had doubled their lung capacity. The elastic and firm tread of the young women, the graceful carriage and general appearance of health and buoyancy so frequently noticed by visitors cannot be tabulated in figures, but proves the correctness of the principle and success of the method.

The highest culture includes the culture of the highest of our three-fold natures. The Woman's College, therefore, places emphasis on the moral atmosphere and environment of its students and provides for the proper study of The Book of Books. In the general course of each year the Bible is a required study of all who matriculate. It is not taught doctrinally, nor devotionally, nor dogmatically, but as a classic, the purest and greatest English classic, to be studied critically and scientifically. In the first year the Old Testament History, through the period of the Captivity, is given; for Bible History has its proper setting as an important part of the world's history. In the second year the course includes Old-Testament prophecy and song; for when these are critically compared with the wisdom and song of our own or of other ages, the immeasurable superiority of the Biblical is manifest. In the third year, New-Testament history and in the fourth year New-Testament teachings are studied. Christian evidences and ethics are also a part of the required work. Every member of the Faculty recognizes truth as the supremely worthy object of human quest and the law of rational life. When a student perceives by critical investigation the inspiration of the Holy Scriptures and that they reveal ultimate truth, it is but a natural step that she should yield her life in willing obedience to its Divine authority.

BUILDING A UNIVERSITY.

The Methodist Episcopal Church is preparing to build at Washington, D. C., a great university. It is to be called The American University. The intention is to plant ten millions of dollars at the Capital of the Nation for Protestant Christian education. The thought is timely, the need great, and the conception magnificent. It must be a Christian school worthy of Methodism, of America, and of Protestantism. To fall below such an ideal would be humiliating, not to say damaging. Can Methodism build such a university at Washington? The answer is given in the elaborate plans and far-reaching designs for securing the funds. It is desired to interest the entire M. E. Church, and as far as possible other Methodisms in America. The scholarly and cultured Bishop Hurst has been chosen Chancellor, and he is expected to lead in the mammoth enterprise. For several months he has been marshaling his forces and arranging the lines of action. As a means of creating a sentiment favorable to the university, and scattering information on the subject, a monthly paper called THE UNIVERSITY COURIER is issued. It is packed full of facts bearing upon university education, with especial reference to the future American University. Among the plans for securing the necessary money, it is intended to find half a million people who will give one dollar each to build and endow Lincoln Hall. It is thought also that there are half a million Epworth Leaguers who will give \$1.00 each to an Epworth Hall, or Professorship. The ministry will be

called on to furnish one thousand men who will give \$100 each to build Asbury Hall. A like number of educators are expected to give \$100 each to endow the School of Discovery, while Mrs. John A. Logan is to raise a million of dollars out of the women of the country to help forward the enterprise. Ten thousand choirs will be called upon to endow a school of sacred music. By these and other methods the aim will be to arouse the whole church to assist in the work, and by so doing not only will the dimes and dollars be gotten, but the affections as well, which after all are far better. Of course there are many rich men who will be appealed to for large gifts. Success to the effort. We are in sympathy with the movement, and shall rejoice when it is opened for students. The chief object had in view, however, in what we have written, is to call attention to the methods of operation by which a great church seeks to establish a great educational institution. She does not go about it in a hap-hazard way, but of deliberate purpose conceives the idea and enters upon its execution. There is far-seeing wisdom in the whole movement, and though it may take years to work it out, there is a determination expressed in the methods of work that will not fall short of its object. In the proposed American University we believe the man, and the church, and the occasion have met. The outcome will be an institution of learning that will bless the unborn millions of American Methodism.—*Epworth Methodist, Fort Worth, Texas.*

A FAILURE IN EDUCATION.

BY PRESIDENT CHARLES W. ELIOT.

When one reviews the course of instruction in schools and colleges with the intention of discovering how much of it contributes directly to the development of reasoning power, one cannot but be struck with the very small portion of time expressly devoted to this all-important object. No amount of *memoriter* study of languages or of the natural sciences and no attainments in arithmetic will protect a man or woman—except imperfectly through a certain indirect cultivation of general intelligence—from succumbing to the first plausible delusion or sophism he or she may encounter. No amount of such studies will protect one from believing in astrology, theosophy, or free silver, or strikes, or boycotts, or in the persecution of Jews or of Mormons, or in the violent exclusion of non-union men from employment. One is fortified against the acceptance of unreasonable propositions only by skill in determining facts through observation and experience, by practice in comparing facts or groups of facts, and by the unvarying habit of questioning and verifying allegations, and of distinguishing between facts and inferences from facts, and between a true cause and an antecedent event. One must have direct training and practice in logical speech and writing before he can be quite safe against specious rhetoric and imaginative oratory. Many popular delusions are founded on the commonest of fallacies—this preceded that, therefore this caused that; or, in shorter phrase, what preceded caused. For example: I was sick; I took such and such a medicine and became well; therefore, the medicine cured me. During the Civil War the Government issued many millions of paper money, and some men became rich; therefore, the way to make all men richer must be to issue from the Government presses an indefinite amount of paper money. The wages of American workingmen are higher than those of English in the same trades; protection has been the policy of the United States, and approximate free trade the policy of England; therefore, high tariffs cause

high wages. Bessemer steel is much cheaper now than it was twenty years ago; there has been a tariff tax on Bessemer steel in the United States for the past twenty years; therefore, the tax cheapened the steel. England, France and Germany are civilized and prosperous nations; they have enormous public debts; therefore, a public debt is a public blessing. He must carry Ithuriel's spear and wear stout armor who can always expose and resist this fallacy. It is not only the uneducated or the little educated who are vanquished by it. There are many educated people who have little better protection against delusions and sophisms than the uneducated; for the simple reason that their education, though prolonged and elaborate, was still not of a kind to train their judgment and reasoning powers.—*The Forum*.

MEMORIAL WASHINGTON.

A most useful and patriotic work has been undertaken by the Memorial Association of the District of Columbia. It aims to cultivate reverence for the memories of the nation's greatest men either by preserving or marking with suitable tablets houses and public places in Washington with which they were identified in life. It contemplates the purchase of the house in which Lincoln died and its conversion into a shrine of patriotic pilgrimage for the millions that venerate his memory. It desires also to place appropriate tablets on the most notable of the historic houses in the National Capital. For the benefit of the multitudes which will visit Washington this year it purposes to issue a pamphlet giving authentic information respecting all the historic associations of the city. It ought not be difficult to enlist public sympathy and the support of Congress for so noble a work.

When the war opened Edward Everett was making his final appeals for the Mount Vernon Association, and eloquently referring to the memory of Washington as the golden cord binding together all true American hearts. During the last generation memorial arches, columns and statues have been multiplied on battle-fields and pleasure-grounds in honor of the heroes and victories of the Civil War. This has been a patriotic movement, ennobling and inspiring in its influences; but the time has now come for a reversion to the Mount Vernon method and for the transformation of Washington into a city of hallowed memories where all the famous houses will bear record of great names and memorable services to the nation.

Washington was known originally with cynical humor as the city of magnificent distances. It is now a National metropolis, continuously and well built, and outreaching at every point its earliest bounds. But there are dreamy reaches of historic distance in its past which need to be illuminated. It has been the home for generations of great Americans, who have founded and preserved National institutions and directed the progress of a Republic that with the consent of Christendom is accounted the hope of the world. Nothing should be left undone to preserve the reminiscences of their greatness, and by memorials on every side to educate and develop the historic spirit of coming generations.—*N. Y. Tribune*.

THE GENESIS OF THE AMERICAN UNIVERSITY.
ADDRESS OF BISHOP JOHN P. NEWMAN, AT OMAHA, MAY 8, 1892.

Great thoughts never die. The American University had its genesis in George Washington. His great patriot, Hamilton, scholar, statesman and orator, young and brilliant, drafted a comprehensive plan of national education, with its controlling institution in the city of Washing-

ton; at once the source of authority and the power of direction for all institutions of learning, from the primary department to a well equipped university for original investigation and for professional study. Both Washington and Hamilton conceived the idea that the highest intelligence is indispensable to the welfare and perpetuity of the Republic; and believing in this they sought to lay plans for the consummation of such a desirable end, an end to be sanctified by virtue born of Christianity. But the proposition excited contention. The cry of centralization vexed the very skies of the Republic, and the jealousy incident to the rule of State rights compelled Washington and Hamilton to delay the consummation of their wise and beneficent purpose. Yet, strong in his convictions and steadfast in his noble purpose, Hamilton, in 1787, induced the Legislature of the State of New York to adopt his comprehensive system of education under the style and title of a "University." A hundred years passed, and in 1889 the State of New York revived the University founded by Hamilton, declared its scope and intention and enlarged the powers of the Board of Regents, so that these Regents to-day have the power to amend or repeal the charter of any incorporated school, whether academy, college or university. How magnificent the line of chancellors of that University of the State of New York—Clinton and Hamilton, Jay and Livingston. These constitute a galaxy of glory. We, to-day, my brethren, have occasion to lament that the plans of the fathers of the Republic were not properly carried forward, and incorporated into the organic law of the nation. For the inevitable results have followed. Congress has no control over the education of the children of the Republic. That is relegated to the States and Territories, so that today the legislature of a State or Territory can fix the school year at five days or five months; can appropriate a thousand dollars or a hundred thousand dollars, as partisan bias may dictate. In view of this strange fact, it is certainly a reflection on the founders of the Republic, but a glory to Washington and Hamilton and other noble patriots.

In view of these sad effects, there are three things we should demand; First, a national system of education under the General Government, with its head a cabinet officer; second, a system of compulsory education in every State and Territory; and, third, no appropriation by the nation or by any State or municipality for any sectarian institution in any part of the land.

As I said, great thoughts never die. So it is true in regard to this. A hundred years have passed, but during that century the thought of an American University has been conspicuous in the teachings of the great jurists and statesmen of the past, and has been the dominant thought of those master minds—Jay and Kent and Marshall; and, in our own days, of the scholarly Sumner, and that great jurist of Vermont, Edmunds. This thought did not die with them, for it is said that an Englishman walking through the streets of our capital, some forty years ago, thought of the same great idea, and you will not be surprised if I tell you that that Englishman is William Arthur, whose name is great in two hemispheres. Like a vision of beauty this thought rose up before the imagination of our own Simpson, was expressed by that greatest of ecclesiastical statesmen, Ames; but these died without the sight, but did not die without faith. They saw the promise from afar, but God ordained that others should consummate the glorious work and that "they without us should not be made perfect." So our illustrious chancellor, who is here to-day, is in the best of company. It is not a vagary; it is not a wild no-

tion, or a momentary fancy even, of a scholarly man; but around him are the shades of these great statesmen and scholars, and he is simply thinking their thoughts and aiming to consummate their glorious plan.

Providence ordains the times and seasons according to an infinite wisdom and raises up men to accomplish the exalted purposes of Jehovah. Educated carefully at home and abroad, gifted with an imagination that frescoes the future with the actualities of the present, endowed with the rare power of organization to prepare great plans for the oncoming generations, it comes to us more and more, that in the roll of the centuries, in the ordering of time, God Almighty, the God of our Fathers, has selected Bishop Ilurst to lay the foundation of The American University for American Methodism.

When difficulties arise, remember the fathers that thought of this ere you were born. When doubts shall vex your great soul, gather inspiration from the heroic struggles they made for liberty and for intelligence. Remember that you are a successor, and merely a successor, but you are in an apostolic succession, as we understand it. Go forward, and may God Almighty permit you to lay the foundations broad and deep, and perhaps the boy is here to-day who shall see the capstone placed amidst shouts of grace and glory.

THE NEED FOR UNIVERSITIES IN AMERICA.

BY PROF. VON HOLST—FROM HIS ADDRESS AT THE UNIVERSITY OF CHICAGO, JANUARY 1, 1893.

There is in the United States as yet not a single university in the sense attached to this word by Europeans. All the American institutions bearing this name are either compounds of college and university—the university as an after-growth figuring still to some extent as a kind of annex or excrescence of the college, or hybrids of college and university, or, finally, a torso of a university. An institution wholly detached from the school work done by colleges and containing all the four faculties organically connected to a *universitas literarum* does not exist.

The day when it could be seriously asserted that the United States cannot afford to have such institutions is surely passed. A nation paying for pensions a sum considerably higher than the cost of the standing armies sucking out the life blood of European nations not able to maintain universities! It is too absurd to deserve refutation. The other allegation inherited from the past, that there is no need of such institutions in this "plain democratic" country, is deserving of a still severer rebuff. Even if the universities are considered only as schools for imparting certain professional knowledge, it is a slur upon the American people which I, though not to the manner born, shall never allow to pass uncontradicted. Count the American students going over to Europe and those flocking to your own institutions, coming in this or that respect nearest to the standard of European universities, and then tell me again there is no need, *i. e.*, no demand for universities! I have not only visited but lived in a number of countries, and the results of my observations of their higher educated youth is that though by no means as to knowledge, yet as to the earnestness, steadiness and enthusiasm in the pursuit or knowledge the American students stand first. And nature has not been in a stingy mood when weighing out their allotment of brains! Give them but the opportunities and you will soon see whether they need to shun comparison with the scholars of any other nation. They are handicapped in the race, handicapped in a way which makes the

blood of a true friend of this country tingle with impatience.

You are a proud people. Aye! mount the steed of your pride and press the spurs into its flanks till they quiver with pain. Be done once for all and in every respect with that nonsensical and humiliating prating about the "good average" being all the "plain democracy" needs or has any use for. No, I say, and again, no! This nation of sixty-five millions dare not assign to itself such an unworthy position. It has achieved too much in the past and it must achieve too much in the future to rest satisfied with excelling as to the average; if it does not strive with intent purpose to excel also in everything above the average, satisfied with nothing less than the best and the highest, it will and must fail. If democracy, because it rests upon the principle of equality, ought to retain as much as it possibly can the character of the plane, an elevated plane, but still a plane—then the sooner the world has done with democracy the better. The preachers of this doctrine are the worst enemies of the masses, whose interests they pretend to champion. The most effectual way to lift the masses to a higher plane—materially, intellectually and morally—is to do everything favoring the climbing up of an ever-increasing minority to higher and higher intellectual and moral altitudes. Therefore universities of the very highest order become every year more desirable, nay, necessary for the preservation and the development of the vital forces of American democracy. Undoubtedly to have them established is in the interest of those who would frequent them, but it is still infinitely more in the interests of the American people in its entirety.

THE WORK OF THE UNIVERSITY.

This would hold good even if the universities were but, as I said before, schools for imparting certain professional knowledge. If the universities would furnish to the American people professionals of the order A where they have thus far had to put up with the order B, and of the order B where they had heretofore to be contented with the order C, I for one do not know of anything done by the American people rendering them unworthy of better service. Every American would consider it a gross insult if he were told he ought not to buy a coat of good cloth because shoddy is amply good enough for him. Is it not a much worse insult to say Americans ought not to provide for obtaining the best professions of every kind, for what the institutions of an inferior standard turn out will do very well for them? Nor is there any force in the argument that America has—especially in some branches, as, for instance, the law—many good professionals, and quite a number of excellent ones who have never enjoyed the advantages of a first-class university. Might they not have reached a still higher round of the ladder if they had had those advantages? At all events it is better to have 1,000 than ten good ones, for out of 1,000, 990 can acquire only with the help of superior advantages what ten attain by dint of genius or extraordinary application. Nature's favorites stand much less in need of first-class universities than the indifferent many who, in universities as in every other walk of life, always constitute the great majority.

The imparting of certain professional knowledge is, however, by no means the only task of universities. In university teaching, the How is of as much importance as the What, and in some essential respects much more important than the How Much. A university which merely turns out efficient professionals has only done one-third of its task.

If, besides, a fair percentage of them has been made fit to become good, independent scholars, half of its legitimate work has been done, but not more. Only if the whole intellectual and moral constitution of all has received for life the imprint of a true university education has it accomplished what it must consciously and with set purpose strive for.

The university has not only, in the way of a college, to impart knowledge. It must also teach how additions to the treasury of knowledge are made. The teacher of the student must indeed be poor, never intended for anything but the hackney professional, if, in this part of the instruction, the spark of enthusiasm which ought to have been struck from the pupil's mind in imparting knowledge is not made to kindle a flame whose light and warmth will influence his whole life. From week to week the mind's eye ought to be opened wider to the inspiring fact that knowledge is something infinitely higher than a ware and a trade—that it is a good, to be hungered and thirsted after for its own sake. And that it is but the half-way house. The university and the student have not done their whole duty if the student does not carry from the halls of the Alma Mater the full consciousness into life, that knowledge, because it is a good, is also a sacred trust.

These higher aims are the better attained, the closer the methods of true university teaching are adhered to; not drill, not training, but educating by guiding, guiding with a constant view to rendering independent not only in technicalities, but in the first place and above all in thinking. Filter as many barrels and tanks full of facts and rules as you like into the student's memory, if you do nothing else you will only produce new samples of Carlyle's "Professor Dryasdust" or Goethe's Wagner in "Faust"—quite useful men in their way, a kind of scientific brick-carriers and mortar-stirrers. But the university's business is to send forth architects, not, indeed, every one fit to build palaces and cathedrals, but at least a weather-tight, comfortable and cheery house, with plenty of light, air and warmth—a good home for himself and an enviable resort for friends. To guide the student systematically to ever-growing independence in thinking is the only way to make him properly conscious that a grave responsibility attaches to thinking, *i. e.*, that correct thinking is not only intellectually but also morally a duty toward one's self and toward one's fellow-men. If that were better and more generally understood the records of vain regrets in the lives of individuals and of nations would be reduced by more than one-half. And nowhere is there more need of it than in the democracy, where everybody is required to do his own thinking, not only for his private affairs, but also for the common affairs of all—in community, State, and nation.

Independence in thinking and a lively sense of individual responsibility are the twin pillars on which the dome of democratic liberty rests. Fail to constantly strengthen them, while by the natural course of development the weight of the dome steadily increases, and it will come down with a terrible crash, crushing everything beneath it. Experience, however, teaches that the surest if not the only way to propagate and invigorate independence in thinking and a lively sense of individual responsibility is to grant a large measure of liberty. Where this truth is not recognized in theory and in fact with regard to university education, the vital principle of the true university is chained down, like the Prometheus of ancient mythology. Grant that by allowing a large measure of liberty—not only as to the What, but also as to How, When and How Much—

part of the students will lay in a smaller stock of facts, rules and technical training than they would have done if they had studied under the restraints of a system, resembling in leading features the systems deemed best, closely adapted to the purposes of schools of a higher grade, principally colleges. That is more than compensated by the advantages which only the freedom of true university education can secure. Only this can fan the burning coals of that enthusiasm which is absolutely untainted by any sordid motives into the intensest glow; only this can fully develop the in-born forces, for it alone allows full play in the use of them; only this provides sufficiently for the invaluable lessons taught by stumbling and tripping; only this incites to the development of constructive intellectual individualities, casting off the dead weight which to every aspiring mind lies in the consciousness of being moulded and pressed into shape according to some pattern cast in the notions of other people; only this systematically fosters the intellectual and moral courage required for striking out into new paths, for it methodically wars against that frame of mind to which the jogging on in the old ruts seems as good and irreversible as a wise law of nature.

This, in my opinion, is the weightiest among all the reasons requiring strenuous exertions for the speedy establishment of a goodly number of true universities. An ample number of more efficient professionals than the present average is highly desirable, but an ample number of men and women, thoroughly imbued with the spirit which true university education tends to awaken and strives to develop, becomes every year a more urgent necessity. Not as professionals will their greatest services be rendered to the people, but as citizens and fellow-men. The aims they pursue, their manner of pursuing them, the whole view they take of life and its problems, their way of tackling every question, cannot but work as a beneficent leaven and a good seed, for which a vast expanse of grateful soil is already prepared from the palace of the merchant prince down to the block house of the pioneer. And one of the methods most approved by experience is to bring into full play the systematically trained sober second thought and the systematically trained idealism of the nation. To be the nurseries of trained sober second thought, and of that genuine idealism which is not the opposite but the complement of realism—that, however, is the main task of the true university. The universities must and they will be the nurseries of what Matthew Arnold calls "the remnant." Therefore you must have them, for although unquestionably there is already a "remnant" in the American people, Arnold very correctly says that everything depends upon the proportion the "remnant" bears to what he calls the "unsound majority." It never can be too large, and in a democratic republic of such vastness, and confronted by such a number of the most perplexing and portentous problems, it must be enormously large to insure the safety of the commonwealth. Sooner or later it will be found to be not large enough, unless those who now constitute the "remnant" go to work in dead earnest to provide for educating, in the shape of university taught professionals of every kind, missionaries, who, by their whole way of feeling, thinking and acting, will, day in and day out, infuse the spirit of the "remnant" into the "unsound majority." If a chasm opens up between the "remnant" and the "unsound majority," and is allowed to widen, nothing can save this country. The remnant must not only greatly increase in numbers while vigorously struggling up to ever higher planes, but it must, at the same time, be unremittingly in-

tent upon filling up the gaps and lifting the majority out of any unsoundness. All these four purposes will be effectually furthered by establishing true universities. It would be no easy task to point out a more patriotic and more truly democratic work. Every one contributing toward it, with his money or with his work, may stand up before the American people in its entirety, remnant and majority, inseparably bound together for weal and for woe, for better and for worse, and say to it: *Tua res agitur*—it is thy cause I am contending for.

A STATEMENT AND A PROPHECY WITH REASONS.

Hon. John W. Hoyt of Madison, Wis., has prepared a long memorial to be presented to Congress to establish a National University, endowing it with a \$1,000,000 a year. Other educators join in the petition. They do not want this National University to be an ordinary academical or collegiate institution. Their aim is higher. They want an institution advantageously established at the seat of the National Government toward which will drift the brightest representative students from American colleges, where in post-graduate courses, they can enjoy all of the advantages possible to human kind for the development of arts and sciences, for increasing the sum of human knowledge. The petitioners claim nothing new in the plan. It is as old as the days of Washington. He and others contemplated the same thing. Their names and a long line of successors give prestige to the project. It will not carry, however. Many of the people are disposed to curtail the expenses of the Government. They would look on this appropriation with suspicion. Then, too, more than a third of our people are church members. They and many more discern possible dangers in the management of the higher schools by the State. They favor religious colleges and universities. They will fill the latter, while the national school would fluctuate in attendance, sometimes filled and sometimes deserted, according to the character of the teachers and the management. Besides, the execution of this plan has already been entered upon. The Catholic University has been begun and the American University is fast approaching materialization. The 10,000,000 Catholics of the country are committed to the one and many more millions of Protestants are going to rally around the latter.—*Michigan Christian Advocate*.

PERTINENT PARAGRAPHS FROM "REPRESENTATIVE WOMEN OF METHODISM."

BY CHARLES W. BUOY, D. D.

In England Methodism has gone back to Oxford and Cambridge, and the doors closed against the new faith have been opened, and its sons and daughters made welcome. In America the oldest seats no longer repel, but invite the youth of our Church, and the same intellectual vigor of the fathers is seen in their children as they bear away in graceful triumph a large share of academic honors. But the colleges of the oldest churches are not only open to the children of the youngest Church of the Republic, but the pioneer Church has laid plans for a new work that in the future will be the greatest blessing conferred upon our own loved America; an educational center that, drawing in affiliation to it all secondary schools of the Church, will find in their federation a strength that is now wanting and an outlet that is now closed—The American University at Washington.

As in the first school a woman's faith and love united to give Kingswood to the Church, so the first offering toward

the establishment of this, the greatest work of Methodism, was the gift of a woman. When one of the most beautiful sites overlooking the Capital of the Nation was available, and her honored husband doubted, Catherine Hurst, full of faith in the great work, made the first contribution, and what will yet be a boon of greatest value to Protestantism and the Republic became an assured fact. Herself a woman of high culture and an authoress, this deed of love was almost the last act of her beautiful life, that, crowned so early, has left sadness in so many hearts. Two great schools have been planted at Washington, and a woman's gift was their beginning. Both inaugurated by churches that are similar in compact organization, zeal and energy, Rome and Methodism, the oldest and the youngest churches, plant their highest seat at the center of the Republic. Rome, weakest of all churches in higher foundations, seeks by this new movement to recover her ground lost in the past. Methodism rich in secondary schools seeks to complete her system of training by opening up the highest avenues to thought. Both churches have planted at the highest point—the political center of the nation and the strategic point of the New World. Here Romanism and Methodism are striving for the mastery of the higher thought of the great Republic. Representative of opposite thought and idea, in friendly rivalry they contend. How different the aspirations of these two great schools! Rome holds Church above the State, but Methodism entirely separates them. One teaches, in the words of Pius IX, that "force is inherent in the Church;" the other, "My Kingdom is not of this world," and no earthly power is enforced. One, founded on the birthday of Thomas Aquinas, holds his precepts as authority, teaching that "dissent and heresy must be put down by the sword." The other, in the name of its leader, Wesley, has never used the sword, and dare not by its creed. Rome builds alone, not consenting with any who bear a different Christian name; but Methodism, in fellowship with the highest unity of truth, unites in her rule the Episcopalian, Presbyterian, and Baptist, fulfilling in her highest works the words of Wesley: "I desire a league offensive and defensive with every soldier of Christ." In the former an Italian prince and prelate gives the law, and its professoriate is filled with men of foreign birth and idea; in the latter, the President of the nation, its highest judiciary and legislative share in its government. One is a purely clerical foundation, and dominated by priestly influence; in the other lay and clerical agency unite in equal privilege. In the one only man shares the right of rule, in the other woman is represented in the board of trustees. Rome looks backward, the traditions of the past being its highest authority. Methodism looks forward, and, like Pascal, accepting the past as the childhood of humanity, it honors its wisdom, but allows no control.

Both have begun a work that Washington and his immediate successors desired, and the future alone will determine their influence upon the New World. Both will be a blessing to the Republic, for the deeper the search after truth the more secure the stability of church and state. Contact with free institutions at the highest center cannot fail unconsciously to influence Rome. If both are true to the truth, tolerant and inviting deepest research, freedom of thought will be honored of the nation; but if blinds are put on knowledge and the truth is fettered, only revolt will take place, and the seats will be vacated by students, as those of Paris left its university to follow Abelard to his college in the desert. Rome built the great universities of the past, the oldest seats of the Anglo-Saxon family;

but, disloyal to the truth, in the break of the Saxon from her erring creed her schools passed over to the reformers, and to-day are most alien to her creed. Her example is a warning to all men who would put down the truth in unrighteousness, limit the fullest inquiry or shackle the mind of man.

Educational Notes.

There is no half-way business in the admission of women at Edinburgh University. Thus far the privilege is limited to the Faculty of Arts, and the experiment there will decide as to the others. Twenty-five matriculated at once, and the number has materially increased. The male students seem to accept the new order gracefully and gallantly. There was some good-natured rudeness at first; but it was incidental to the unoccupation of opening days. The *Times* says :

"Already the conviction is growing that the presence of women will have an elevating, humanizing influence on the men, and probably a few months hence the association of men and women in the same class-rooms at the university will not be thought more incongruous than the presence of men and women in the pews of a church, or in the seats of a concert-room or a theater.—*Western Christian Advocate*.

Johns Hopkins University now issues regularly the following from its press :

- (1) American Journal of Mathematics.
- (2) " Chemical Journal.
- (3) " Journal of Philology.
- (4) Studies from the Biological Laboratory.
- (5) Studies in History and Politics.
- (6) Johns Hopkins University Circulars.
- (7) Johns Hopkins Hospital Reports.
- (8) Johns Hopkins Hospital Bulletin.
- (9) Contributions to Assyriology.
- (10) Annual Report.
- (11) Annual Register.

Syracuse University has a rare collection of books in the library of the historian Von Ranke, which was the gift of Mrs. J. M. Reid. It numbers 18,000 volumes, 3,000 pamphlets, and 1,500 manuscripts, and is especially rich in German and Italian History and in works relating to the French Revolution. Dr. Wiedemann has completed a magnificent catalogue of the manuscripts, giving a complete history of each, on which he spent about three years.

The Public Library of Boston is the second in size in the United States (the Congressional Library being the largest) and contains 560,000 volumes. It is especially full in fine arts, architecture, useful arts, American history (especially of the Civil War), English history, French, German, and Italian, archaeology, Egyptology, and all departments of science. There are special collections on early New England history and theology, such as the Theodore Parker collection of 14,116; the Bowditch collection on mathematics and astronomy of 5,509; the Tichnor Library of 5,981 Spanish and Portuguese books; the Barton Shakespeariana, 13,740 volumes; the Hunt Library on the West Indies and slavery therein; the Benjamin Franklin Library—works written by or printed by and relating to Benjamin Franklin, with 80 different portraits and engrav-

ings; also special collections on Methodism, on the Unitarian controversy in Dr. Channing's day, on military history and military science, early American literature, patents, Congressional documents, etc.

The Lenox Library, New York, contains 2,200 different English Bibles, dating from the year 1535, with editions of the New Testament dating from 1534; editions of separate parts of the Bible (like the Psalms) dating as far back as 1508 and 1493. It also contains 1,200 copies of Bibles in foreign languages, comprising a selection of the earliest, rarest and most noted editions, in over 100 languages, including all the great polyglots. There are five copies of Eliot's Indian Bible and two copies of the Indian New Testament in the collection. The Robert L. Stuart collection was opened for the first view February 21, 1893.

Cornell University's exhibit at the World's Fair will form a part of the educational display of the State of New York. The work of the institution will be represented by 150 figures and about fifty diagrams illustrating the history, development and present condition of Cornell. The work of preparing the collection is being carried on, as far as possible, by students.

FROM THE FIELD.

From a letter of General William G. Webb, San Bernardino, Cal., we are permitted to make the following interesting extracts :

"Not only Methodists but all good people should give liberally to the establishment and success of The American University. If the people of this nation who count their wealth by millions would give some of their millions to this University, it would be a more enduring monument to them than any mausoleum. I highly approve the name of Lincoln Hall for the administration building. Abraham Lincoln was a great and good man, and was raised up by God to preserve this nation as one and indivisible, and to give freedom to the slaves. As a Confederate I could not see it, and after our defeat it took me some time to grasp it; but it became very plain to me after a while. God has a great work for this nation to do, and Mr. Lincoln was, like Washington, one of His instruments to prepare the people for this mission which the United States is to accomplish towards the enlightenment, freedom and Christianization of the world."

HOUSTON, TEX., January 27, 1893.

DEAR BISHOP HURST: Find enclosed draft for \$25, the amount realized from the collections made in the Texas Conference for The American University. I wish the amount was ten times as much for this grand cause, and trust the day is not distant when we shall consider even the amount now hoped for small. Yours truly,

I. B. SCOTT.

GRAND JUNCTION, COL., January 16, 1893.

DEAR BISHOP HURST: In accordance with your published request, I presented The American University cause to my congregation yesterday. They contributed \$22. This is a modest sum, but if the very limited ability of a poor people, heavily laden with a church debt, be taken account of, I feel sure that 17 cents per member will close the door of your heart against their utter excommunication.

Yours in the cause of Christian culture,

J. L. VALLOW.

THE UNIVERSITY COURIER.

FORM OF WILL FOR " THE AMERICAN UNIVERSITY,"
WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest:

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land:

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate:

I give, devise, and bequeath all the residue and remainder of my estate, real and personal (including herein any and every legacy, bequest or devise, that may lapse or for any reason fail to take effect), to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses who should write against their names their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have herunto subscribed our names as witnesses."

NOTICE

To Pastors and Officers of Epworth Leagues who desire to hold a Columbus Memorial Service in 1893.

We are filling, and shall continue to fill, orders for the CHURCH SERVICE and for the YOUNG PEOPLE'S CONCERT EXERCISE, furnished for 30 cents per hundred (to cover postage), for use in presenting the cause and taking a subscription for The American University. Each Service is distinct from the other, and can be used in the same church without duplication of exercises. Samples sent free on application. Address

THE AMERICAN UNIVERSITY,
1425 N. Y. Ave., Washington, D. C.

EPWORTH CATECHISM.

We are pined with many questions which require a great deal of time to answer. It is our hope that this Catechism will serve this purpose. We have arranged a few of these questions with answers. Study them carefully; then, if there is any point you do not understand, or any other information you desire, write to us, and we will gladly answer you to the best of our ability.

1st Question. When did you give your instruments the name Epworth?

ANSWER. Several years ago, when the Epworth Hymnal was first published. It is secured to us by copyright for thirty years.

2d Question. How are the Epworth Organs and Pianos constructed?

ANSWER. The cases are made strong and substantial, of neat and tasteful designs. The actions with special reference to durability and elasticity of touch. The pedals of the Epworth Organs require but little power because the bellows is so large.

3d Question. What can you say for the tone of the Epworth?

ANSWER. The tone is sweet and pure. The volume can be graduated from full power to a mere whisper by proper use of the stops and pedals.

4th Question. How many stops in the Epworth Organs?

ANSWER. All necessary to produce the various shadings of tone possible in a reed organ. We avoid unnecessary complications of action which are of no value but deceive the purchaser and confuse the player. See "Stops" page 16 of Catalogue.

5th Question. Do you sell the Epworth through Agents, Peddlers or Dealers?

ANSWER. No. We did so for years; but finding that the expense and loss incident to that plan added quite a large amount to the cost, which was absolutely of no benefit to the purchaser, we called in our travelers and peddlers, and withdrew our agencies, and determined to sell Epworth Organs and Pianos to purchaser, shipping direct from factory, thus saving the buyer from \$25 per organ to \$100 on a piano.

6th Question. Has the new plan proved successful?

ANSWER. It has been very satisfactory to ourselves as well as to our customers; for we are selling thousands of instruments and at a great saving both to ourselves and our customers.

7th Question. From what class of people do you receive your largest patronage?

ANSWER. From church-going people comes the bulk of our orders, because as a class they appreciate the elevating power of good music in church and home.

8th Question. How do you reach the great army of church-going people?

ANSWER. By advertising in the various church papers we make our plans known to the people, and by authorizing ministers to accept orders for Epworth Organs and Pianos. Hence we feel sure the business will be attended to in a strictly honorable way, both for ourselves and for our customers.

9th Question. Are ministers willing to attend to the business for you?

ANSWER. Yes. Ministers heartily endorse our plans, as can be seen by reading extracts from their letters in Catalogue. They know that our system permits us to sell organs and pianos to their people at least 33% per cent. lower than instruments of equal merit are sold by agents and peddlers, who, of course, must have pay for their time and expense of doing business.

10th Question. How shall I proceed if I desire to buy an Epworth Organ or Piano, shipped direct from factory?

ANSWER. See set from Catalogue the style of instrument desired, and send us the price by draft, or postoffice order, stating the railroad station to which you desire the organ or piano shipped. Be sure to designate the style by the catalogue number.

REV. J. E. CORLEY, Presiding
Elder of Burlington District,
Mt. Pleasant, Iowa;

"We are still enjoying our Epworth Piano."

11th Question. But how do I know you will send the instrument, and that it will prove to be as your catalogue represents it?

ANSWER. That's a perfectly proper question, and, in answer, we call your attention to the endorsements we present from prominent ministers, lawyers, bankers and others, who would not dare to recommend us if there was a probability of our not fulfilling every letter of our agreements, for such a failure would at once reflect upon them.

12th Question. Is there a way by which I can see and test the "Epworth" before you receive the price for it?

ANSWER. Yes. You can deposit the price with any minister in the regular work, and request him to order for you. When organ or piano arrives and is found as we represent it, the minister will forward us the price. Or you may deposit the price with your banker, express agent or postmaster, on same terms, sending his receipt.

13th Question. What are the prices of the Epworth Organs and Pianos?

ANSWER. You will find the retail list prices of the various styles on the pages with the descriptions. These prices are low considering the quality of the Epworth. But if you order an Epworth through your minister he is instructed to allow you a liberal discount. Our intention is to furnish an Honest instrument at an Honest price. Don't pay a hundred dollars for an organ worth sixty dollars, nor be deceived into buying an organ at thirty-five or forty dollars purporting to be worth a hundred. Either one of these extremes may be avoided by buying the sweet-voiced, well-built Epworth.

14th Question. What do you furnish with Epworth Organs and Pianos?

ANSWER. With Parlor and Cottage Organs we send a good stool and only one new Epworth Organ Tealder; and with Chapel Organs a stool only; with Pianos a beautiful stool, cover and book.

15th Question. What will the freight cost on an Epworth Organ?

ANSWER. That depends on the point to which the organ is shipped; but the average for Nebraska, Kansas, Missouri, Illinois, Wisconsin, Minnesota, Dakota and Wyoming is about \$4; Iowa about \$2. Pianos about three times as much.

16th Question. When I get ready to buy an instrument shall I discuss the matter with an agent?

ANSWER. Not unless you intend buying from him, for he will force one into your house in spite of all you can do to prevent it. If you intend buying from us, the better plan is to say nothing about it to agents, for they will haul you by day and by night till you are heartily tired of the whole matter.

17th Question. Do agents and peddlers try to interfere with your business?

ANSWER. Yes. Some agents say very hard things about us and our way of doing business, because wherever our Epworth is known the profits for peddlers are greatly reduced. But what they say against us frequently helps the sale of the Epworth, which is certainly the best in the market for the price.

18th Question. What warranty do you give on the Epworth Organs and Pianos?

ANSWER. We give about the same that any responsible house does that expects to make its warranty good, and the following is a copy:

WARRANTY.—EPWORTH ORGAN OR PIANO, Style.....No..... sold thisday of.....189.....to.....of.....is warranted to have Tone Sweet and Pleasant, easily modulated by use of proper stops and pedals; Touch light and responsive; Action strong and durable, not liable to get out of order. If said instrument shall fail within five years to operate properly because of defective workmanship or material, we agree to put it in good working order upon return to us, providing it is accompanied by this warranty, properly countersigned by a member of our firm.

By.....

GEORGE BANCROFT'S HISTORIC LETTER.

1623 H STREET N. W., WASHINGTON, D. C., *April 14, 1890.*

MY DEAR BISHOP: I thank you for giving me an opportunity of showing how highly I esteem the importance of the great design upon which you have entered of establishing a university in the Capital of our country, to be thoroughly complete in every branch of science and human learning. The importance of the object at which you aim cannot be too forcibly stated, and I hope that the result may be a university equal to any in the world.

Yours most truly,

To Rev. Bishop JOHN F. HURST.

GEORGE BANCROFT.

MOUNT VERNON SEMINARY

FOR YOUNG LADIES.

ENGLISH, FRENCH AND GERMAN BOARD-
ING AND DAY SCHOOL.

Cor. of M and 11th Sts. N. W., Washington, D. C.

MRS. ELIZABETH J. SOMERS, Principal.

The Seminary endeavors to meet a demand known to be imperative by all acquainted with the problems of the education of girls—the demand for a school more systematic, thorough, and modern than the typical boarding-school, yet less severe and arduous than our women's colleges. Up to the Junior year its course is as full and its discipline as thorough as that of any college preparatory school in the land. Beginning with the Junior year, the course consists of selections from the college curriculum, adapted to the needs of those young women who desire a thorough training in selected branches, but who desire, also, to avoid the strain of a college course.

The school is thoroughly modern in spirit and in method. Its faculty is composed of earnest, enthusiastic teachers—specialists in their several departments—most of them women with college training.

Special emphasis is given to the following subjects: English Language, Literature, and Composition; Natural History; Art, and the History of Art; General History and American Political History. The time given to these subjects, and the breadth and thoroughness of the treatment accorded to them, do not fall below those given them in our best colleges.

The buildings are new and perfectly equipped for health and comfort. They are heated by steam, have perfect drainage and ventilation, a passenger elevator, and bath-rooms which are furnished and fitted with the best appliances known to modern sanitary science.

For further information apply to the principal, who also refers to the following patrons:

Editorial.

REV. SAMUEL L. BEILER, Ph. D., a member of the New York East Conference and the late pastor of Sands Street Memorial Church, Brooklyn, N. Y., was elected Vice-Chancellor of The American University on March 9, 1893, and entered upon his duties April 1st.

REV. B. C. SWARTZ, of Southwest Kansas Conference, has given to The American University a precious relic of early American Methodism, namely, a Bible that was once the property of Bishop Asbury. This is a fitting climax to a generous offering by the ministers of that Conference to the Asbury Fund.

"THE American Flag ought to float over every public school building in the Republic while the schools are in session, as an object lesson in patriotism for childhood and youth, and as a symbol to the world that we consider these buildings as fortresses of our strength, from which go forth the forces which are the best protectors of our free institutions."—JAMES M. KING, D. D., *General Secretary of the National League for the Protection of American Institutions.*

PREACHERS LEAD THE HOST.

The movement among our ministers to create a fund of not less than \$100,000 with which to build Asbury Memorial Hall is assuming proportions which not only guarantee its success, but is an earnest of the broader and more universal movement among our laity and the Protestant citizenship of the country for the complete endowment of The American University. The fund grows both by private correspondence and by combined action at Conference sessions. Through the visits of Bishop Hurst, Vice-Chancellor S. L. Beiler, and General Secretary George W. Gray, there has been a rapid ingathering of subscriptions during the past few weeks. We give herewith a detailed account of the subscription list as it stands at present for

THE ASBURY MEMORIAL HALL.

\$100 each—R. W. Copeland, Victor, N. Y.; Abel Stevens, LL. D., San Francisco, Cal.; Daniel Wise, D. D., Englewood, N. J.; H. C. Weakley, D. D., Cincinnati, Ohio; Bishop

Thomas Bowman, St. Louis, Mo.; A. B. Leonard, D. D., New York City; C. H. Payne, D. D., New York City; Wesley Webster, South Charleston, Ohio; W. H. Haverfield, Jerusalem, Ohio; J. Wesley Hill, Helena, Mont.; D. Lee Aultman, Cincinnati, Ohio; T. H. Hagerty, D. D., St. Louis, Mo.; G. Asbury Reeder, Sr., Olmsted Falls, Ohio; M. L. Smyser, Curwensville, Pa.; Thomas H. Pearne, D. D., Xenia, Ohio; A. J. Hawk, A. M., Wellston, Ohio; Earl Cranston, D. D., Cincinnati, Ohio; D. H. Moore, D. D., Cincinnati, Ohio; M. Kaufmann, D. D., Springfield, Ohio; D. C. Vance, Xenia, Ohio; C. W. Buoy, D. D., Philadelphia, Pa.; W. W. McIntosh, Oakland, Ill.; W. P. Arbuckle, New Haven, Conn.; H. A. Cleveland, D. D., Indianapolis, Ind.; William Burt, D. D., Rome, Italy; Zenas Hurd, A. M., Lima, N. Y. (by a friend); H. E. Heacock, D. D., California Conference; S. L. Beiler, Ph. D., N. Y. East Conference; J. C. Jackson, Columbus, Ohio; J. W. Bashford, Ph. D., D. D., Delaware, O.; S. S. Benedict, New Lisbon, Wis.; B. F. Taylor, Napa, Cal. \$300—A. B. Riker, Wheeling, W. Va.

BALTIMORE CONFERENCE.

Bishop John P. Newman, Omaha, Neb., \$5,000. \$100 each—Lucien Clark, C. W. Baldwin, A. M. Courtenay, J. B. Stitt, J. P. Wright, D. H. Carroll, L. B. Wilson, L. T. Widerman, E. E. Shipley, J. F. Ockerman, S. A. Wilson, J. N. Davis, S. M. Hartsock, J. St. C. Neal, John Lanahan, Richard Norris (by D. P. Miller), O. A. Brown, R. Harcourt, J. McK. Reiley, F. J. Wagner, A. S. Hank, G. G. Markham (by O. A. Brown), G. H. Corey, Bishop J. P. Newman (by Gen. J. S. Berry), Bishop J. F. Hurst (by Gen. J. S. Berry), W. R. Stricklen, M. F. B. Rice, H. R. Naylor, George Elliott, E. T. Mowbray (by E. F. Bennett), Thomas Wood (by his church), Edward Hayes, D. M. Browning. \$50 each—A. E. Gibson, D. D., C. H. Richardson, C. T. Weede, W. D. Morgan, B. F. Devries, \$30—S. German. \$25 each—C. T. House, G. W. Feelmeyer, E. O. Eldridge, Wm. S. Edwards, D. D., W. W. Davis, Ph. D., J. R. Wheeler, J. L. McLain, O. C. Marriott, Osborne Belt, W. A. Carroll, W. L. McDowell, G. V. Leach, D. D., Wm. J. Thompson, E. L. Watson, B. F. Clarkson, J. A. Price, D. D., D. H. Carroll, D. D. (by Theo. Mottu), W. H. Laney, L. F. Morgan, D. D. (by F. J. Wagner). \$20 each—W. G. Herbert, J. R. Cadden. \$15—J. E. Amos. \$10 each—R. W. H. Weech, Daniel Haskell, F. H. Havenner, T. Marshall West, D. A. Foard, S. S. Greenwell, Henry Mann, J. R. Schultz, C. O. Cook, C. H. Mytinger, Thomas Wheeler, H. D. Mitchell, J. D. Still, J. T. Whitide, W. A. Koontz, E. D. W. Hayes, W. M. Osborne, C. E. Guthrie, A. H. Thompson, F. B. Chadda, L. M. Bennett, J. M. Sarrow, E. D. Huntley, D. D. (by a lady), J. W. Fleming, F. E. Kilmon, T. J. Cross, Elmer Dutton, H. M. Thurlow. \$5 each—A Friend (by J. P. Wright), J. W. Cornelius, C. J. Price, S. H. Cummings.

SOUTH-WEST KANSAS CONFERENCE.

\$100 each—Dodge School of Theology (by W. J. Martindale), class of Fourth Year, March, 1893, J. A. Holmes, I. E. Pulliam, C. N. Bortorff, J. A. Hyden, C. H. Montgomery, J. A. Davis, J. M. Sullivan (by Don S. Colt), C. F. Burdick (by J. F. Somerville), J. C. Hall, Joseph Earp (by J. E.

Earp), W. H. Rose (by Alden Meeker), W. E. Woodward (by S. Sanderson and Geo. S. Christopher), M. E. Phillips, C. H. McMillan, H. E. Swan (by T. E. Hinshaw), A. M. Gibbons, M. M. Haun. \$85 for P. P. Wesley, (by Great Bend Sunday School), \$15; Church Treasury, Mrs. Dora Stephens and Sherrod Wesley, \$10 each; and Epworth League, Mrs. Anna L. Parker, Mrs. Susannah Wesley, Mrs. Dr. Connett, Mrs. W. H. Torrey, Mrs. Geo. W. Nimock, J. B. Hannum and Rev. E. R. Williams, \$5 each. \$25—Arthur E. Watson, (by D. G. Watson).

NORTH-WEST KANSAS CONFERENCE.

\$250—E. S. Chenoweth. \$100 each—E. R. Zimmerman, G. H. Woodward, D. A. Allen, B. T. Stauber. \$60—I. S. Hall. \$50—C. A. Luce. \$40—U. J. Mumford. \$30 each—C. V. Penn, E. G. Alderman, F. A. Smith, E. P. Michener, H. M. Mayo, G. L. King. \$20 each—A. N. See, J. W. Adams. \$10 each—A. Schuyler, Dr. Payne.

NORTH INDIANA CONFERENCE.

\$100 each—W. D. Parr, G. N. Eldridge, W. S. Birch, E. L. Semans, G. S. V. Howard, H. Bridge, C. U. Wade, J. M. Driver, W. M. Nelson, J. M. Haines, O. V. L. Harbour, E. E. Neal, J. S. Bitler, H. M. Johnson, E. W. Osborn, J. W. Welch, P. S. Cook, A. E. Sarah, E. T. Gregg, H. C. Smith, M. Mahin. \$25 each—C. King, J. W. Cain, T. Stabler, Geo. W. Green.

WILMINGTON CONFERENCE.

\$100 each—S. R. Maxwell, John D. Kemp, V. S. Collins, W. F. Corkran, James Conner, J. S. Thompson, J. E. Bryan, G. W. Townsend, R. Irving Watkins, C. A. Grise, W. G. Koons. \$25—Bishop S. M. Merrill (by twenty-five members of the Conference).

CENTRAL PENNSYLVANIA CONFERENCE.

\$100 each—J. W. Rue, W. A. Stephens, George Leidy, T. S. Wilcox, R. H. Gilbert, T. J. Leak, I. N. Moorhead, S. D. Wilson, H. C. Pardoe, D. S. Monroe, A. R. Miller, D. H. Shields, George Trach, C. H. Barnard, C. W. Burnley, J. B. Stein, Job Truax, H. L. Smyser, R. W. Illingworth. \$50 each—W. F. D. Noble, C. W. Rishel, C. L. Bencoter. \$20 each—G. M. Larned, J. C. Mumper, M. J. Runyan, J. B. Graham, W. McK. Reilley, W. A. Carver. \$10 each—A. C. Forscht, E. L. Eslinger, J. H. Mortimer, M. C. Piper, O. S. Metzler, R. H. Wharton, A. L. Miller, Owen Hiecks, V. T. Rue, I. J. Reeser, R. W. Runyan, J. H. Morgart, Mrs. Ray (Tyrone, Pa.), H. E. Cares, J. F. Pennington, J. F. Anderson, E. S. Latshave, T. S. Faus, J. W. Buckley, C. W. Karns. \$5—T. L. Tompkinson.

NEWARK CONFERENCE.

\$100 each—H. A. Buttz, L. R. Dunn, C. S. Ryman, J. B. Brady, D. R. Lowrie, R. Vanhorne, H. C. Thompson, A. H. Tuttle, C. R. Barnes, J. W. Marshall, G. P. Eckman, H. Spellmeyer, A. Craig, J. W. Young. \$50—M. L. Gates.

NEW YORK CONFERENCE.

\$800—C. W. Millard. \$470—J. M. King. \$400—G. W. Miller. \$350—A. J. Palmer. \$300 each—M. D. C. Crawford, Geo. Clarke, Bishop Walden (by St. Paul's M. E. Sunday School, Tarrytown, N. Y., through E. T. Lovatt). \$220—C. S. Harrower. \$200 each—J. R. Day, P. M. Watters, Elon Foster, A. K. Sanford, C. H. McAnney (by E. T. Lovatt), A. Longacre, P. Germond. \$100 each—J. A. B. Wilson, J. S. Stone, W. F. Anderson, Geo. Daniels, E. R. Smith, W. G. Browning, W. C. Willing, C. Wright, F. L. Wilson, J. N. Ramsey, A. Ostrander, B. H. Burch, A. C. Morehouse (by Leonard Layman), Professor A. H. Flack, E. Lyon, S. Lowther, W. Colden, J. Y. Bates, L. C. H.

Adams, T. Lamont, W. E. Clarke, J. B. Cross, F. C. Iglehart, C. W. McPherson, F. T. Angevine, W. H. Mickle, Alfred Coons, E. McChesney, G. H. Gregory, O. Haviland, E. Lewis, Geo. B. Clark, Bishop C. D. Foss, A. S. Hunt, J. J. Reed, Robert Knapp (by G. H. Gregory), W. H. Peters, C. H. Travis, P. N. Chase, E. L. Hoffecker, F. Hermance, H. Welch, A. T. Civill, F. D. Abrams, E. Tinker, R. H. Travis, S. L. Bowman, T. S. Bond. \$50 each—W. A. Mackey, C. H. Reynolds, C. B. Landon, A. E. Barnett, F. J. Beleher, R. F. Elsdon, Abraham Davis, W. A. Chadwick, J. H. Michell, Five Lovatts (by E. H. Lovatt), Gipsey Smith (by E. H. Lovatt), G. W. Worrell, B. C. Warren, R. M. Stratton. \$25 each—R. H. Kelly, 2nd, E. H. W. Barden, Eli Quick, G. H. Smith, M. M. Curtis, A. Jameison, H. Gilbert. \$10 each—B. T. Abbott, A. S. Hagarty, James Robinson, E. L. Fox, W. T. Hill.

NEW ENGLAND CONFERENCE.

\$100 each—S. F. Upham, George Skene, Wallace McMullen, E. A. Smith, S. C. Carey, J. W. Hamilton, (Class of '77, Boston University) (by C. L. Goodell), W. N. Brodbeck, W. T. Perrin. \$50—W. H. Dockham. \$25 each—W. E. Groves, F. K. Stratton.

TROY CONFERENCE.

\$100 each—Homer Eaton, B. S. Burnham, J. E. C. Sawyer, J. E. King, R. M. Little, deceased (by J. E. King), Merritt Hulburd (by J. E. King), S. M. Williams, G. W. Brown, William Griffin, H. C. Farrar (by Mr. Gibson), W. H. Meeker.

WYOMING CONFERENCE.

\$100 each—A. F. Chaffee, M. S. Hard, J. Richards Boyle, L. C. Murdock, W. R. Turner (last of \$100,000), J. W. Nicholson (next to last), P. R. Hawthurst, J. A. Faulkner, D. D. King. 50 each—L. L. Sprague, J. S. Lewis.

MAINE CONFERENCE.

\$100 each—Hosea Hewitt, E. L. House, Joseph Hawks,

Kinsman Atkinson, G. D. Lindsay, Wm. Wood (by Mr. F. A. Hatch), M. Hughes, A. V. Pottle, A. S. Ladd, C. F. Allen, C. J. Clark, deceased (by J. H. Roberts, A. Hamilton, A. K. Bryant, and Pine Street Church, Portland).

NEW HAMPSHIRE CONFERENCE.

\$100 each—J. M. Durrell, Alumni School of Theology, Boston University (by C. M. Howard and others), M. R. Webster. \$25—William Warren. \$10—C. W. Dockrill.

NEW ENGLAND SOUTHERN CONFERENCE.

\$50—F. D. Blakeslee.

NORTHERN NEW YORK CONFERENCE.

\$100 each—G. P. Kenney, D. F. Pierce, H. L. Holmes, Gordon Moore, Charles Sheard. \$25 each—J. H. Myers, B. D. Brown.

The footing of the subscription is now \$43,995. Additions can be made under the appropriate Conference head. Subscriptions are payable within three years. The leaders of our Methodism will fill the quota and pass beyond it, and prove themselves the worthy successors of our honored pioneer American Bishop, FRANCIS ASBURY.

THE AMERICAN UNIVERSITY.

BISHOP JOHN F. HURST.

Methodism is at once an evangel and an educator. The American University is the product of a deep and long-felt conviction that American Methodism owes to itself, to the country and to the race such an institution as will make permanently active in the widest circles the saving truths which have been and still are the inspiring power in all its evangelizing of the nations.

The ideals of John Wesley, of a developed and a constantly developing intellectual force side by side with the growth of the spiritual nature in man, have always characterized the leaders of the Wesleyan reform—a reform involving in the operation of the Divine Spirit upon man—first, the renewing of the heart; second, the culture of the mind; and, third, the application of the hand. Insisting, as Methodism does and will, upon the first as the great prerequisite to a true life, it hesitates not to affirm and maintain that the second and third must accompany or closely follow as seals and proofs of the genuine character of the first.

Education thus forms a prominent feature in the history of our denomination. Our membership has been a large factor in the establishment of the public school system, which is the common pride of our American Protestantism. In intermediate and collegiate instruction we yield to no other denomination in the spirit and success with which institutions of these grades have been brought forth and developed. Leading minds in our common Methodist Church have, however, felt a growing need for a half century that more ample provision should be made for continuous helpfulness to our college graduates as they

emerge from institutions of training to take up the special and crowning work of their lives.

To secure the best and highest instruction in every department of human learning under influences both intellectually the strongest and spiritually the purest, The American University has been incorporated, in the District of Columbia, for post-graduate and professional courses of study and for original research. The act of incorporation bears the date of May 28, 1891, and on the same day the title to a beautiful and commanding site consisting of ninety-two acres, at the northwestern terminus of Massachusetts avenue extended, and costing \$100,000, was transferred to the trustees of the University, being the gift of the citizens of Washington. The Board of Trustees, consisting at first of thirty-six members, now increased to forty-five—three of whom are members of the Methodist Episcopal Church, South—was constituted at the same time, and the administrative offices of Chancellor, Treasurer, Secretary and Registrar were filled.

The location of The American University at the American Capital is one of the events that grow out of the "fitness of things." The city of Washington, apart from being the political center of the nation, has become a vast store-house of accumulated scientific and literary treasures, vitally related to every branch of science and historical study. Access to and use of the various collections of the Government have been by specific act of Congress, through the direct efforts of the officers of the University, guaranteed to our students. The richness of these various collections is but slightly indicated by the enumeration of the following appliances thus made available for higher education, namely: The Library of Congress (the largest and most varied in America), the Smithsonian Institution, the National Museum, the Patent Office, the Department of Agriculture, the Naval Observatory, the Geological Survey, the Coast and Geodetic Survey, the Army Medical Museum, the Botanic Gardens, the Fish Commission, the Bureau of Education, the Bureau of Ethnology, the Nautical Almanac office, and the Zoological Park. To create these and bring them to their present condition has cost, according to estimates furnished us by Major J. W. Powell, Director of the United States Geological Survey, about \$33,000,000; and, according to the same authority, the amount appropriated to maintain and increase these during the last fiscal year was nearly \$3,300,000—a sum equivalent to the income from a productive endowment of \$82,500,000. Thus the United States Government furnishes gratuitously for the encouragement of university work a grand total of \$115,000,000.

To utilize these immense and ever-increasing materials by bringing the alert minds from every State in the Union to a thorough and scientific study of them

and of the departments of knowledge to which they relate, under the fostering care of modern, progressive, evangelical, American Protestantism, is the proper work and purpose of The American University. To accomplish this end we need ten millions of dollars for the necessary buildings, professorships, fellowships and scholarships.

Thus far in our undertaking we have been encouraged by the voices of those in high official position in the Methodist Episcopal Church, South, and by representative men of all the evangelical denominations. In the prosecution of this enterprise we invite the attention, the prayer, the sympathy, the co-operation and the gifts of all Americans, and of all abroad who are interested in the America to be.

As a practical and powerful bond of union between the two great bodies of American Methodism, we believe there is and can be nothing so appropriate or efficient as this projected University. Here the flower of our youth from the South and from the North, from the East and from the West, may come and mingle in the common lofty aims of such an institution, and, going hence with appreciation of the merits of one another learned in the friendly friction of university life, build both in Church and State on the foundations of the first century of the Republic a structure more beautiful and enduring than the one our eyes behold.—*Richmond Christian Advocate*.

IDEALS AND REALITIES.

Day dreams are often inspirations. Man's environment is full of secrets which are often whispered to sensitive minds. The mind that can clearly receive them, firmly hold them, and bring them into the realm of realities, is not only the prophet of the time, but the leader of his age. Many have hints or catch glimpses of these secrets that would be inspirations, but let them pass. It often requires sublime faith and heroic courage to do otherwise.

This not only holds in the realm of Christian inspiration with Abraham's dream of a promised land, the prophet's vision of a coming Messiah, and a Paul's faith in a universal kingdom of Jesus, the Christ, but is as assuredly true in other realms. Stephenson's dream of the application of steam, Newton's early vision of the law of gravitation, Spencer's grasp of the great theory of evolution, the weird hints that led Morse and the wizard of Menlo Park to their great achievements with electricity, are vivid illustrations in the realm of nature.

In history the dream of an American Republic in the brain of Samuel Adams, and the idea of a great German empire in the mind of Bismarck, have been prophecies of great realities.

Such day dreams neglected or rejected by one soul pass to another, as the Buddhists think the Karma

does, until it finds an incarnation in some new life and at last through it enters the realm of realities. Some dreams flit from soul to soul, from generation to generation, before they find their incarnation, but at last they gain lodgment in an active brain, then place in an open heart, then become a conviction in some soul, then a fire in some man's bones, then an assurance in his faith, then a contagion in his life. Soon a community, a church, a nation is aroused. The dream takes tangible form. The world approves and only wonders it was delayed so long.

Such is the outline history of The American University. It is already a contagion; sentiment is becoming a conviction; conviction is putting itself into deeds and gifts. The dream of the years is taking on reality. Not the "Philosopher's stone that turns all to gold," but the gold that turns dreams to stone is beginning its magical work. It will require both small gifts from the many and large gifts from the few. We believe the dream is to be realized, because it is of God. It is a divine inspiration to which the heart of the Christian Church responds. B.

FUNDAMENTAL DISTINCTIONS IN UNIVERSITY EDUCATION.

REV. J. W. CORNELIUS.

The average university begins in the School of Philosophy or in the Medical School or the Law School. Divinity is ordinarily an addendum not specially urged but somewhat necessary for making up the "Four Faculties" which justify the name of university. Even Harvard, with a century and a half of endowment and prestige behind it has only 47 students in its Divinity School. But the Catholic University of America is thus far all Divinity. Its College of Divinity is a full grown man at its birth. The Chancellor is His Eminence, James Cardinal Gibbons; its Rector is the Right Rev. John J. Keane, Titular Bishop of Ajazzo; its Dean is Very Reverend Thomas Bonquillon, D. D.; its Professor of Dogmatic Theology is very Reverend Joseph Schroeder, D. D., Private Chamberlain of His Holiness Pope Leo XIII; and so, to the end of the list, every professor is an eminent clergyman. There is not a layman in the Faculty and only one among its Lecturers; and there is not one subject in its list of specialties which is not directly theological. In the Board of Directors, inclusive of the Cardinal and the Rector, there are twelve archbishops and bishops, one vicar-general, and three laymen. The Papal Delegate, M. Satolli, has also his official residence at the University.

It is announced, however, that a Faculty of Philosophy, Letters and Sciences is to open its courses of study in 1894. In describing what its School of Philosophy is to be, Cardinal Gibbons says: "It embraces the thorough study of man's spiritual, rational

ethical nature, with the aid imparted by the wisdom of the philosophers and schoolmen of all ages, especially St. Thomas Aquinas." As Aquinas was the most distinguished Catholic theologian of the Middle Ages, it is fair to conclude from the above statement that the School of Philosophy in the Catholic University of America is really also a School of Theology. So, the classical and scientific studies will also naturally be directly tributary to attainments in Divinity. Cardinal Gibbons felicitously expresses this thought thus:

"These two great departments of study, the Faculty of Divinity and the Faculty of Philosophy, Letters, and Sciences—the former proceeding chiefly by the light of divine revelation, the latter chiefly by the light of natural reason and observation—are not to be independent and separate one from the other, as if alien or hostile to each other, but are congruous and harmonious elements of one and the same University organism, having constant and intimate relations with each other, each free and untrammelled in its own domain, yet both agreeing and blending as sister emanations from the same infinite fountain of all light and beauty."

The Catholic is thoroughly consistent in making his private and public school, his seminary, college and university, the bulwark and propagator of his "religion." He believes the Pope to be a temporal sovereign and rightfully to be at the head of all earthly governments: hence to be truly religious is to be truly patriotic. Theologic dogma must likewise thoroughly interpenetrate home and social life. From the cradle to the grave the Catholic must be completely exclusive of all faiths but his own: he must be saturated with his own as the only one, for all others are heresy. The church is everything and permeates everything. Education of course is mainly the education of religion. The Protestant does not believe that "religion" consists in hierarchies and bishoprics, in orders of priesthood and sisterhood, in traditions and doctrines and formularies, in ceremonials, in veneration of saints and angels, in adoring the mass, in keeping the calendar days, in spectacular services, in princely titles, in societies, parades, etc. Hence, the Protestant does not make that "religion" the supreme thing in a seminary or a university. His religion is an experience which sanctifies the heart and transforms the life; and his intellectuality mainly concerns the truth which in Scripture or in literature and science irradiates the conscience and breaks the fetters of superstition and darkness from the whole nature. The Protestant, therefore, maintains schools, small and great, for the accumulation of knowledge in its general and universal branches and for the discipline of the mental faculties, and expects that the

more spiritual doctrines of the Holy Scriptures will be the specialty of the pulpit, the Sunday-school, the home and the denominational theological school. But in his zeal for the absolute separation of Church and State and his anxiety that man may not be fettered intellectually and morally by the formalities and rites of a human ecclesiasticism, the Protestant may swing too much to the other limit of the pendulum and overlook the great value of profound religious sentiment. Scholarship is valueless which does not elevate the earthly life, glorify God and point man to a glorious immortality.

PROGRESS OF THE AMERICAN UNIVERSITY.

The American University is enlisting a continually widening circle, and taking on more and more the aspect of a spontaneous movement, to which, no doubt, the official sanction given by the Bishops and by the last General Conference mightily contributes. While Methodism in its oldest universities has already exhibited its sympathy with the higher education, and made important contributions to it, the establishment of this institution, to be devoted entirely thereto, is an expression of its purpose to move hand in hand with whatever emancipates, cultivates, and enlarges the intellect.

It is designed to be a lighthouse in the Capital of the United States, from which shall shine forth those evangelical principles which are as vitally related to the temporal as to the eternal well-being of the race, since they underlie all civil, political, and sociological relationships.

The American University has been incorporated with the definite and announced purpose of securing to all who are morally fit and mentally competent, the best and highest instruction in every department of human learning, under influences both intellectually the strongest and spiritually the purest. The citizens of Washington have given it a beautiful and commanding site, costing one hundred thousand dollars, and embracing ninety-two acres at the north-western terminus of Massachusetts Avenue. By the unanimous action of the General Conference on May 25, 1892, the Methodist Episcopal Church allied itself in a special manner to the University.

Having seen many statements in the papers concerning gifts and other conditions, we have written to Washington for accurate information, and find that a recent subscription of one hundred thousand dollars is conditioned on securing a million in 1893. It is made by a citizen of Washington. Before the institution can open one department, or organize any one of its faculties, five million dollars must be secured as endowment. When this was first promulgated we regarded it as a startling proposition, yet a gentleman not accustomed to extravagant statements has remarked to us recently that it ought to be in hand before the General Conference of 1896. If all the Methodists in the United States co-operate in the spirit with which leading representatives of the different branches of our extended communion have pledged themselves to its support, it can certainly be done within a few years, whether so soon as that or not.

The highest religious motives—while seeking the best both in the instrument and in the results of knowledge, the best that is in the individual, the best which the church in its collegiate capacity can offer, all pervaded by a

deep and undying sense of the fundamental importance of Christianity as the supernatural revelation which dignifies and ennobles life by making fidelity to God in the age and to the age in which we live the conditions of the divine favor as well as of eternal salvation and personal development—find scope in this sublime project. From a patriotic point of view, not merely as Methodists, not simply as Protestants, but as Americans, the aims of this institution, when duly contemplated, furnish reasons for the deepest satisfaction.

Its advantages already acquired make, without exaggeration, an imposing list when the short time is taken into the account. The first of these would naturally be the pre-eminent adaptation of Bishop Hurst, by his scholarship, varied experiences as teacher and organizer of schools on both sides of the Atlantic, and opportunities for thorough familiarity with educational principles, to its chancellorship, and the fortunate circumstance of his residence in Washington. The site, which cost one hundred thousand dollars three years ago, is unquestionably worth much more now. Some place it at seven hundred and fifty thousand dollars. We always discount such estimates of rapid increase in value, but a conservative Methodist citizen thinks it is worth at least four times what it cost. Other advantages are the resolutions of the Bishops and the action of the General Conference; the Board of Control of the Epworth League; and the charter given to it by Congress. The gifts made have already been mentioned, but many that have not been tabulated are reported. In recent visits to the Baltimore, New York, New York East, and other conferences, in response to appeals by the Chancellor, more than thirty thousand dollars have been subscribed toward the one hundred thousand dollars given by ministers for the erection of Asbury Hall.

It is not for us to suggest methods of increasing public interest in the work. The Board of Trustees, Chancellor Hurst, the corresponding secretary, the vice-chancellor, Dr. Beiler, and others, have these things well in hand; but it is within our province, to which we are compelled by a consideration of the whole field, to emphasize the fact that Methodism has begun to build a great university, called The American University, located in the Capital city of the United States, where unequaled advantages, provided by the public in various departments, and waiting to be utilized, are given to students.

It must be carried forward, lest they that pass by in future years have occasion to say that Methodism began to build, and was not able finish.—*Christian Advocate*.

"A GOVERNMENT can be no better than its people, whatever its form. A country cannot rise superior to its homes, nor defeat the inevitable influence of its schools. That which is sown in the university shall surely be reaped in the field, shop and factory; in the forum, on the rostrum and the hustings. It spreads everywhere and touches everything—the sacred vestments, the judicial ermine, the pulse of commerce, the thrift of business, the course of law and the fundamental institutions, the public credit and the national honor."—*Curators of Missouri University*.

WHILE it is absolutely necessary to differentiate more and more completely between the regular undergraduate collegiate work and the post-graduate and

professional work of the real university, it must not therefore be concluded that the higher education has no sympathy with the lower. Those who devote themselves to the higher have passed through the lower and are better prepared from their last position to appreciate the ground over which they have ascended. The university does not ignore the needs of the academic curricula any more than those who can read ignore the alphabet. Calculus must be preceded by arithmetic, algebra and geometry. The lower branches are ever the foundations, the pillars, the walls of the great educational edifice. Story after story may ascend on those foundations and walls; so much the greater the propriety and necessity that they be thoroughly trustworthy. This is the era of higher culture; it is also the era for reform and improvement in the public schools, high schools and colleges. The superficial must be removed from the preliminary courses of scholastic attainment that the maturer attainment may be more practicable and valuable. This is no time for depreciating or disintegrating our primary institutions or delivering them over to politicians or sectarians. All the cultured classes of the nation must rebel against any return to the priestcraft or statecraft of the middle ages. Give us no inferior rock for basal walls; give us no soft bricks nor soft metals for any parts of the superstructure; rather give the best granite and marble that Europe or America can produce, that the ideal civilization may be more permanent than the pyramids.

Contributions.

THE STUDY OF LANGUAGE PRE-EMINENT IN THE PREACHER'S CURRICULUM.

The office of the Christian minister is to do all he can to fulfill the command of Christ: "Go ye into all the world and preach the gospel to every creature." His specific duty as distinguished from the common duties of all believers is the public and stated proclamation of the truth as it is in Jesus. For success in this work the first and most essential preparation is that of the heart, the baptism of the Holy Ghost, the knowledge of God's love, the continual indwelling of Christ. "Out of the abundance of the heart the mouth speaketh" is God's great rule of human speech. It is the heart power of Christ that is drawing all men to him; and the power of Christ's preacher comes only through the close personal contact of his own soul with Him who said "All power is given unto me."

With this spiritual anointing for the preaching of the gospel, there will be in the consecrated minister a full employment of all the varied powers of body and mind, subordinated to the Holy Spirit as the supreme motor. Among the mental exercises over which the will has the power of control and direction, what place should the preacher give to the study of language?

This question resolves itself into two: First. What relation does language sustain to other fields of scientific thought and study? and, second, What relation does lan-

guage sustain to the spiritual enlightenment and development of men?

And, first, what is the relation of language to other fields of scientific thought and study? The steps of progress in any science from the beginning to the end are briefly these: (1) Observation or experience. (2) Generalization. (3) Deduction. (4) Verification. Now, before the mind, which observes or experiences, can proceed from one object of observation or experience to another, this object or fact must be embodied in some outward symbol in order to retain the fact in the memory until another fact has been similarly observed or experienced. The symbol thus employed is language. And if the mind cannot proceed without language in the exercise of simple observation much less can it dispense with language when it advances to the other more complicated steps in scientific processes, those of generalization, comparison, and deduction; and least of all can the preacher ignore the primal and absolute necessity of careful and clear language in the science of touching and molding men's souls; for his sphere of operation is one where inexactness in the statement of facts—such as those of human depravity, redemption, regeneration, sanctification, and other cardinal parts of revelation—must inevitably lead to ruinous generalizations. Language, then, must immediately follow every thought if the thought is to be in any way permanent with the thinker, and much more if it is to have any effect on another mind. The study of language then becomes a necessity in the first stage of our mental growth. When a mind has knowledge of two facts and their relation, science has begun in that mind. But no knowledge of this relation is possible until we have first named the facts; and as these relations multiply the necessity for language becomes greater and greater. Language then is an essential element, a prerequisite to any science. A man may be endowed with all the natural powers of observation, comparison and generalization necessary to scientific progress, but if he lack the linguistic preparation, particularly in Greek and Latin, his scientific researches and discoveries will result in a collection more like a curiosity shop full of odds and ends from all parts of the universe than an intelligible system of principles and facts worthy the name of science. Our most distinguished scientists are men who have built upon this foundation of language.

The preacher who would be most widely and permanently useful must be sufficiently well acquainted with the established principles and facts of modern science to speak with confidence and accuracy concerning them, and to draw apposite and effectual illustrations from the material world in the inculcation and application of spiritual truth. Language forms the portal to the temple of science. Rather, it is the password to the inner shrine of nature; and he who would enter the sacred enclosure without it will find himself justly challenged and repelled as an intruder. The relation, then, of language to other sciences is both introductory and fundamental. It therefore demands early and continued study for the acquisition and retention of all important scientific truth.

Second. What relation does language sustain to the moral and spiritual enlightenment and development of men? An answer may be given to this question first from the history of God's revelation to man as contained in the Bible. This history shows that man's preparation to receive the divine word was not sufficient until the Hebrew language was developed and offered a satisfactory channel for the introduction and preservation of the Old Testament revela-

tion. For the Hebrew is confessedly unsurpassed by any language in its purity, simplicity, strength, and capacity for the expression of moral truths. Again, in the more full and glorious revelation of God to man at the advent of Christ, we find that the medium employed is the Greek, a language by universal consent pronounced the most cultivated known to man and the best adapted to the expression of the highest intellectual and spiritual truths. It thus appears that God has measured the fullness of his own revelation by the progress of the race in the cultivation and development of language. God has thus put his seal of approval upon these languages as the instruments for the incoming of a flood of divine light into the world, and has designated these two tongues as the peculiar province for the linguistic search of his ministers. As connected with this two-fold revelation it may here be noted that to Christ has been given a most significant title—the Word—the rational and intelligible expression, the most perfect symbol of the divine mind in its revelation of itself to the human.

Another answer to the question as to the moral and spiritual influence upon men may be drawn from the peculiar nature of language as the chief instrument for the expression of thought and feeling. Language is the link which joins the psychological to the physical; or, better, it is the joint product of the two natures. In its origin a word is psychological; in its outcome it is physical. To say where it passes from the one to the other were as difficult as to explain how soul and body co-exist in the same man. This wonderful, this mysterious, medium of thought and feeling, articulate speech and written language, is the chief external characteristic of man as distinguished from the brute. Its study, then, is peculiarly the study of man as he is revealed both to himself and his fellows. And surely of all men the minister most needs to be thoroughly acquainted with man through this manifestation of the human mind.

Again, the study of language, particularly in the exegesis of the key-words of Scripture has already done and is still doing much toward the peaceful settlement of long and bitter controversies that have rent the Christian Church and diverted the energies of many mighty minds from the legitimate channels of gospel preaching into a thousand endless, unedifying and even destructive logomachies. Truly, if these bickerings and misunderstandings can be abolished, if upon the field of strife where in the mists of darkness of mutual misapprehension these gallant knights of the pen contend in uncertain battle, the clear light of a pure and unbiased exegesis may be made to shine, the contestants for the truth will see that in fact they are all arrayed on one side, the weapons heretofore used in the indiscriminate attack of both friends and foes will be turned in unbroken columns upon the ranks of error, and the victory for truth more speedily won.

Another way in which language influences the moral and spiritual life of men may be seen in the strong, simple, pure words employed by our most successful and truly popular modern preachers. The vocabulary which they use is a wide one; but their language charms by its simplicity and exactness. They give seed thoughts to the attentive listener. They startle the mind into new trains of inquiry and arouse new desires for a deeper study into the inexhaustible treasures of God's word. Their pulpit preparation is largely exegetical, and the fruitage of their ministry is the ripest and strongest element in the Church; for they grapple in earnest and constant study with the

fundamental truths of Scripture, and their sermons have in them the elements of the divine life, which, when once securely lodged in the believer's mind are sooner or later wrought into his experience and life. Thus they become potent influences in the moral and spiritual elevation of the world.

This survey of the preacher's preparatory culture is perhaps inadequate to a full and perfect statement of the importance and place of the study of language in a minister's intellectual curriculum. But as a conclusion, which farther experience and study would serve to strengthen and which it will be safe and useful to follow, it may be said that for the minister the study of language is introductory and fundamental to the proper understanding of all scientific truth, and is supremely important above all physical sciences as a means for the moral and spiritual enlightenment and development of men. A. O.

THE UNIVERSITY OF MARYLAND.

(The historical parts of the following are abridged mainly from Professor Bernard C. Steiner's History of University Education in Maryland.)

What is generally known as The University of Maryland or The Second University of Maryland began as a medical school and has been chiefly such throughout its entire existence. In 1802 a physician of Baltimore, Dr. John B. Davidge, began giving private lessons in medicine to select scholars. Five years after, Drs. James Cocke and John Shaw were associated with him—for their private classes of students were constantly becoming larger and the need of a corporate institution was widely felt. These instructors obtained a charter from the Legislature of Maryland for a school to be known as The College of Medicine in Maryland. A board of trustees was organized and the grant of "A Lottery" of \$40,000 for its assistance was made. The State already had a commission of medical examiners called "The Medical and Chirurgical Faculty," whose members were constituted ex-officio trustees of the new school. A building was secured in 1808 and a class of five was graduated in 1810, those receiving degrees having had the benefits of the previous private lectures in the houses of the professors and of the more elaborate ones in the college. The institution was a decided success.

In 1812 the Legislature added to the original franchises the authority for uniting to the Medical College three other colleges whose specialties were to be Divinity, Law, and The Arts and Sciences. The four faculties were to constitute "The University of Maryland." The "Medical and Chirurgical Faculty" were no longer to be a part of the governing body, but those of the Medical, Law, Divinity and Arts and Sciences Colleges were jointly to constitute the Regents for the University of Maryland and were to have full powers over it, holding property not to exceed the annual income value of more than one hundred thousand dollars. Hon. Robert Smith, an ex-Secretary of State of the United States, was elected the first Provost in 1813 and other lotteries were voted by the Legislature of thirty thousand dollars in 1814, and one hundred thousand dollars in 1817. From these and other sources a few years later, medical buildings, which, with their annexes still stand on the northeast and southwest corners of Lombard and Green streets, were erected. The Hall of Instruction was modeled after that of the Pantheon at Rome, and at the date of its construction the University was the finest medical school in the United States. The University Hospital was opened in 1823. Very respectable collections

were made for a Museum of Medical Art. The number of students grew until in 1824 there were 320.

Contentions between some of the professors and the Regents as to the right of the former to instruct private classes, etc., precipitated litigation in which the Regents retained such distinguished legal counsel as Daniel Webster, William Wirt and John Purviance. The Legislature attempted an adjustment by abolishing the Regents and appointing a board of twenty-one trustees. The Court of Appeals of Maryland, after a lapse of twelve years, during which the Trustees held the property, ruled upon the case, affirming the legal opinions given by Webster, Wirt, and Purviance and restoring the authority of the Regents. Fourteen or fifteen years had dragged along their weary length during these disputations, while the patronage and prestige of the University were well nigh exhausted. The return to the original plan was, however, accompanied with the return of prosperity, though, by the formation in the meantime of various other medical schools, the number of students attained in 1824 was never after reached. During the civil war the school suffered also the loss of Southern patronage, which, however, it has since largely regained. The Medical Department of the Maryland University has always been in the front rank of broad study and great efficiency, many physicians and surgeons of national celebrity having been here trained in their graduate and professional careers.

In 1837 the first dental lectures in America were delivered before the Medical students in the Maryland University, and by authority of the Legislature in more recent years (1882) a Dental Department was added. In the eight years first succeeding its establishment there were two hundred and fifty graduates, their instruction having required large additions to the University buildings.

The College of Theology was never more than nominal, except that a solitary course of lectures on the Evidences of Christianity was delivered before the medical students in 1823 by Rev. William E. Wyatt. The "Faculty of Theology" in 1852 reported that "no active organization of the Faculty had ever been attempted, and in view of the character of the department contemplated by the charter none seemed desirable."

The College of Arts and Sciences has scarcely been more real. A faculty was organized during the supremacy of the Trustees and the distractions of the legal contention previously mentioned. In 1830 a building known as Baltimore College was secured, which was afterward exchanged for a more eligible one on Mulberry street, near the Roman Catholic Cathedral. The charter of the Baltimore College was surrendered to the State, the property merged in the University and a Chair of Ancient Languages established. The Trustees announced that the Department would be "exclusively collegiate in its system, requiring an advanced state of classical and scientific attainments for admission to its lectures, affording pupils advantages similar to what may be obtained in distant universities of this country and Europe." But nothing came of it except talk. It was reorganized in 1854 as "A school of Letters under the Faculty of Arts and Sciences" with Rev. E. A. Dalrymple as its head; but the failure of its later was as signal as that of its former efforts and the "College of Arts and Sciences" became extinct.

In 1826 Professor David Hoffman began the Law School in a department called "The Maryland Law Institute." He published some of his lecture notes in a volume called *Legal Outlines*, continuing his instructions for ten years. The Law School, however, was abandoned until 1870, when

it reopened with a class of twenty-five. In 1890 there were one hundred and one students in the three years' course. For a while it occupied the old Baltimore College structure on Mulberry street, but in 1884 moved to a new building erected for it on the old Maryland University property, Lombard street, next to the Medical Department.

The munificent gift of Mr. Johns Hopkins, for the building and endowment of the University and Hospital which bear his name, has somewhat obscured the Maryland University which has existed for over eighty years. As the Medical Department of the latter has been its principal department, and as Mr. Hopkins desired in his foundation that the great Hospital now in operation should be under the control of the Medical Faculty of his University, when such Faculty should be organized; and, furthermore, as the Medical Faculty of the Johns Hopkins is not yet constituted, it would seem to an outsider quite desirable for the young Johns Hopkins maiden to make a matrimonial alliance with the mature Maryland University. Let the Maryland Legislature authorize the nuptials and give the groom a dower equal to that possessed by the bride. Johns Hopkins University and Hospital, with their actual endowment, will aggregate a valuation of ten millions. Let Maryland give ten millions more, including its Maryland University and buildings, and authorize the organic unity of the two universities. Then in the Monumental City we shall have one of the strongest and noblest monuments of utility and learning that our great America ever boasted of in its history.

PROVIDENTIAL ASPECTS OF THE AMERICAN UNIVERSITY.

DR. BASHFORD'S ADDRESS AT OMAHA, NEB., MAY 8, 1892.

The twentieth century has striking surprises in store for us. The discovery of steam, electricity and other forces has turned the world into a common neighborhood; and the coming century will witness the adoption of common ideas of commerce and of political, intellectual and religious life. The conflict between the powers of light and the powers of darkness will then be waged for the mastery of the globe.

It is indeed possible that the civilization adopted by the race in the coming century will be lower than that of Christian countries to-day. The Chinese Empire numbers 303,000,000 souls. If China masters our material civilization, then, with the self-denial of her people, and their cheap modes of living, with her hundreds of millions of souls so pressed together that the tendency to expansion is inevitable, China may become the colonizer of the world. If she thoroughly masters our material civilization, and especially our modes of warfare, before she accepts the principles of Christ, then a nation capable of putting 60,000,000 men into the field—men unsurpassed for stoicism, if not for bravery—could overwhelm the people of the United States, and secure possession of the most fertile continent on the globe. The population of Asia is eighteen times as dense as that of America. Who can say that under the law of supply and demand, a redistribution of population according to the capacity of the soil to support life may not take place? What assurance have we that the migration of races has ceased forever? If the world becomes a neighborhood in the twentieth century, the old danger of the dominance of a pagan faith is at least possible. We cannot build a Chinese wall of exclusion around the United States. The present Chinese exclusion bill is unwise, as well as unjust. We are sowing the wind, and we may reap the whirlwind.

The only statesmanlike course is to freely offer our Chinese brethren and sisters the Christian inheritance which the Heavenly Father has entrusted to our race, and then leave the result to the inherent strength of truth and to the watch-care of God.

There is also a possibility of a less violent reversion, viz.: the reversion of the race to a military type of civilization. The race has spent most of its life in warfare. The present generation has witnessed the greatest wars in history. The men enrolled in the armies of Europe, including Russia, number 23,265,000—an army unprecedented in history. These troops are furnished with deadlier weapons than the race has ever possessed before. If the Russian aristocracy is so pressed with Nihilists that a foreign struggle becomes necessary to prevent an internal revolution, then war may begin. In that case, Russia with her population of 108,000,000—people just entering the military stage of civilization—Russia, with an army of 7,900,000 men now enrolled, and with 20,000,000 men capable of bearing arms, may become the controlling power in a half barbarous civilization. The world will become a neighborhood in the twentieth century; and we must either lift China and Russia to our Christian privileges, or else sink to their lower level.

We are persuaded that God, at least, has planned a better destiny for us than the dark picture thus far drawn reveals. Emerson wrote: "America is God's last opportunity for the race." But if God has exalted the English-speaking races, as He exalted the Jews of old, He is lifting us up, not for our own sake chiefly, but that we may be a blessing to the world. Surely, there are hopeful signs of progress. The peoples speaking the English tongue numbered 6,000,000 in 1700, 20,000,000 in 1800, 100,000,000 in 1880. God has given these English-speaking peoples, who now number one-fifteenth of the population of the globe, the political control of one-fourth of the globe. Still more, as if He has a yet grander destiny in store for us, He has given the English-speaking peoples the control of those portions of the globe which have the greatest possibility of growth in the twentieth century. Asia has now a population of 125 to the square mile; Europe has a population of 100 to the square mile; America a population of seven to the square mile, and Australia a population of only two or three to the square mile. The growth of the population must plainly be upon the last two continents. If the United States maintains for another century her rate of growth from 1780 to 1880, her population will be 800,000,000 souls. Strange to say, our rate of growth from 1870 to 1880 was greater than during any preceding decade in our history. If we maintain that rate of growth, our population would be 1,300,000,000 souls in 1980. Our rate of advance bewilders European historians. Even French statisticians admit that, if the world becomes a neighborhood in the twentieth century, the English language probably will be its common tongue.

Here, then, are two marvelous possibilities spread out before us: upon the one side the possibility of a repetition of race migrations, and the lowering of our present standard of civilization to a pagan or semi-barbarous military type of life; upon the other side the possibility of the spread of a European, Christian civilization and of the English tongue among all the nations of the earth.

We may be sure that God intends the race to adopt a Christian civilization. Christ's closing words foretell with confidence His conquest of the world. "He will not fail nor be discouraged till He have set judgment in the earth and the isles shall wait for His law." Dr. Dorchester, in his able volumes, has shown that the Christian population

of the globe was 50,000,000 in 1000; 100,000,000 in 1500; 200,000,000 in 1800; and 410,000,000 in 1880. Truly, we may cry with the prophet of old, "What hath God wrought!"

I think, too, we may claim, without sectarianism, that if, under the law of the survival of the fittest, the Anglo-Saxon races seem destined to secure the leadership of the world, under this same law Protestantism has the possibility of becoming the dominant faith of the race. We must, indeed, beware of race pride and sectarian bigotry, and of even Christian arrogance. But we may say boldly to the Roman Catholic Church and to the other confessions of the globe, that we shall do our utmost to give our English tongue and our Protestant faith to all the races of the world.

If, however, we are to win in this magnificent, but yet undetermined, conquest, we must cultivate every source of influence within our reach. The greatest means for multiplying the power of a human being is Christian education. A coarse illustration of the increase of influence arising from thorough training is furnished in the statistics of college-bred men in public life. These men number only one-fifth of one per cent of our population. And yet this little handful of college graduates, numbering only one in 500, has furnished thirty per cent of all our Congressmen, fifty per cent of all our Senators, and sixty per cent of all our Presidents, and over seventy per cent of our Supreme Court Judges. In a word, the college-bred men furnish 150 times as many Congressmen as their numbers alone would give them, and 350 times as many members of the Supreme Court as their numbers alone would furnish. I am sure that the Nation and the Church will never become pedantic enough to refuse her ablest and best men, irrespective of their titles or diplomas. But, on the other hand, if we are to succeed in this tremendous conflict, we cannot neglect an agency which multiplies the influence of young people from 150 to 350 fold. We might as well attempt to extend our industrial civilization around the globe, and yet neglect modern inventions, as to expect to extend a Christian civilization around the globe without the aid of Christian Universities.

But our education must be Christian. Mental training alone gives mental power. But it has two fatal limitations which will prevent its conquest of the globe, viz.: lack of breadth, and lack of consecration. Culture, as distinct from mere technical training, implies the development of all one's faculties of body, of mind and of soul. Aaron Burr, who sharpened his intellect, but destroyed his moral nature, presents as defective a type of culture, and an infinitely more dangerous type than Sullivan, who trained his body alone. Culture, as we said before, implies the development of all one's faculties of body, mind and spirit. Just here our state institutions are subject to a fatal limitation. They cannot train the spirit without adopting a spiritual science. The state is afraid to adopt a spiritual science, lest it be charged with adopting a state religion. So long as culture demands the training of the spirit as well as the body and the mind, and so long as the state neglects spiritual science, so long will there be a providential work for Christian colleges.

But the conquest of the world by the Church demands something more than culture. It demands the consecration of all one's powers to the highest service. It demands the consecration of myriads of the college graduates to the fulfillment of Christ's last command. The question which may well perplex us is, not what will become of the heathen, but what will become of us, if we fail to evangelize the world. We must either Christianize the world in

the twentieth century or else sink to its lower level. Holiness, which means, as the good old Anglo-Saxon word implies, wholeness or completeness—holiness, which demands the development of every faculty to its highest power and its devotion to the highest service, should be the motto of every Christian college in the world. Do you not begin to see what an important factor the Christian university is in this final conflict between the powers of darkness and light?

But what particular form should our higher education take in order to enable it to contribute the most toward the realization of our golden vision? Here, again, the Divine Providence does not leave us without hints. Paul, guided by the spirit of God, sought the capitals of the world, Athens, Corinth, Ephesus, Jerusalem and Rome were the centers in which this Christian leader sought to plant the Church. If we can capture the capitals for Christ, we can take the outlying provinces. There is no better way to capture the capitals than to establish in them our seats of mental and spiritual influence. Possibly the great city is not the best place for the college.

The cost of maintaining the college in a large city, the diversion of young and immature minds through the entertainments of city life, the prevalence of the commercial spirit, and, above all, the difficulty of bringing spiritual forces to bear in the most effective manner, may lead the Church for generations to maintain her colleges in more retired localities. But the great cities are absolutely essential to university work. The demand for concentration and study amidst the whirl of business and entertainment is in itself a discipline for professional students. The great hospitals and courts of law, the leading pulpits, the galleries of art and the great libraries, are absolutely essential to the professional student. But what great city is more favorable to university work than the capital of the nation? The University of Paris, at the capital of France, is the largest university in the world. The history of the University of Berlin is a more striking illustration of this principle. It is a modern university, organized less than a century ago. It was planted in a nation full of universities. And yet with the marvelous advantages of the capital of that great empire, Berlin University has become within three-quarters of a century the leading university of the world.

Congress, with great unanimity, has passed a bill opening the national collections to our students in such a manner as to make the location of The American University providential. The Congressional Library is the largest in America. It receives by law a copy of every book copyrighted in this country. It will be opened freely to the students of The American University. Not only the library, but the vast scientific and archaeological and industrial collections of the Nation are now open by law to university students residing in Washington. By this single vote of Congress vast collections are open to our students, which a century of time and \$65,000,000 would be required to procure, and which \$600,000, or \$800,000, a year would be required to maintain after they were procured.

The lack of a great Protestant University at the Capital, and the presence of the Catholic University there, is in itself a Providential summons to some great Protestant Church to enter this field. If Johns Hopkins University had been located at Washington, instead of Baltimore, Methodism might excuse herself on the ground that this field is already occupied. If, upon the other hand, we could have paid for the Metropolitan Church the day it was dedicated, and could then have founded in Washington a University with a reasonable prospect of success, it is at

least possible that such an University might have received the munificent endowment of that generous friend of Methodism, Leland Stanford. If the Church to-day manifest statesmanship and courage and devotion in planting this great University, God will raise up some Hopkins or Stanford for the coming crisis.

There are special reasons why Methodism should undertake this work instead of some other Protestant Church. Our theology occupies the golden mean between the extremes of conservatism and radicalism. This fact enables Christians of other denominations, who could not co-operate with each other, to meet upon our common ground. Our Arminian theology, with its strong emphasis of human freedom and responsibility, has been especially adapted to the Anglo-Saxon races. Again, our Church is modern and the spirit and enterprise of modern times have entered into Methodism. Above all, our Church is evangelical, and the realities of an eternal world and the responsibilities of immortal souls have led us to the utmost activity.

All these combined have given Methodism a genius for achievement which other Christians gladly recognize, and which has led some of the foremost statesmen in other churches to summon Methodism to take the lead in this common enterprise.

Perhaps the reason that Methodism has flourished, and especially that Methodist colleges have grown so rapidly in a scientific age, is because Wesley did for theology what Bacon did for science. Bacon found men absorbed in metaphysical subtleties. He became the founder of modern science by calling men back to experiment as the test of theories. So Wesley found men engrossed in theological subtleties. He, also, catching the spirit of the great scientist, or more probably receiving inspiration directly from Him who said that if any man will do His will he shall know of the doctrine, called the Church back from theological speculation to personal experience. Thus Methodism has flourished in a scientific age because she, first of all Churches, applied the scientific method to the Christian life. Whatever may be the causes, Dr. Dorchester, in "Christianity in the United States," shows that Methodism has made more rapid progress in college work during the last half century than any other church in America. In 1830 the denominational colleges furnished seventy-five per cent of all students in the college courses in this country. Since that time the Nation, and almost all the States, have made magnificent donations to State universities. Despite this governmental aid to secular colleges, the Churches contributed in 1883 seventy-nine per cent of all the college graduates in America. The Episcopal Church contributed eight per cent in 1830 and three per cent fifty years later. The Congregationalists, thirty-eight per cent in 1830 and twelve per cent fifty years later. The Baptists contributed seven per cent in 1830 and fourteen per cent fifty years later. The Methodists contributed six per cent fifty years ago and nineteen per cent in 1884.

With, therefore, her theology occupying the golden mean upon which Protestantism can meet, with her Arminian doctrines adapted to the genius of the Anglo-Saxon race, with her practical tendencies adapted to the spirit of the age, and with the success through which God has set His seal upon her past achievements, what Church has such a providential field as our own beloved Church?

I have been asked how the presidents of the colleges feel in regard to the recognition of the University by the General Conference. I think I can speak for all the college presidents in telling you that we feel no jealousy of The

American University. Some of these colleges are already engaged in incipient University work. They are grateful that their small beginnings have been appreciated by the Church, and are sure that their larger achievements will find more generous recognition. But as the minister will rather trust his own support to a church which gives generously to benevolent causes, so we would rather trust our colleges and universities to a Methodism which will wisely found and magnificently endow The American University. So the conference of the Presidents of Methodist colleges at its last session unanimously adopted a resolution asking the General Conference to give suitable recognition to this enterprise.

We feel only one anxiety in regard to The American University, viz.: an anxiety that the endowment be munificent and the success of the enterprise in some measure assured, before teaching is actually begun. It seems to us that with the providential opportunities for The American University and the unique position of this great School, with the name which the University assumes, and the high work it undertakes to do, it would be an unspeakable calamity to have a mere weakling flung out to lead a precarious life amidst the competition of existing Methodist colleges. We hope that the General Conference will accept Bishop Hurst's statesmanlike plan and distinctly authorize him to keep the doors of the University closed until the endowment reaches at least \$5,000,000.

I cannot close without a personal reference. It was my privilege once to be the pastor of Mrs. Hurst. She was a woman of culture, of common sense and of consecration. It was her faith and generosity which enabled Bishop Hurst to take the first step in securing that wonderful site for the University, and it was, in part, her money which was devoted to the first payment upon the land. It was one of the last of her many services to the Church. Perhaps the light of the eternal world to which she was even then drawing so strangely near illuminated her mind. At any rate, the site which she enabled her husband to secure is now worth five times its cost, and will grow in beauty and value as long as the capital of the Nation stands.

"Fairer seems the noble city,
And its sunshine seems more fair,
That He once hath trod its pavements,
That He once hath breathed its air."

When Columbus set sail for the new world, he determined, on scientific principles, to sail due west until he discovered land or circumnavigated the globe. The fears of the sailors at last produced a spirit of mutiny. In those trying days Columbus often conferred with Martin Pinzon, a common sailor of uncommon sense. At the sailor's advice they let loose some parrots, which flew away to the southwest. Pinzon urged Columbus to trust to the instinct of the birds to find land rather than to an unverified hypothesis. Columbus at last yielded and changed his course to the southwest. Never, says Alexander von Humboldt, had the flight of birds more important consequences. Had Columbus held to his original plan he would soon have struck the Gulf Stream and his sailing vessels would have drifted north. Had he then discovered land at all, he would have touched America somewhere between Florida and Virginia. The original plan, says the Encyclopædia Britannica, would have given the United States a Roman Catholic, Spanish population instead of a Protestant Anglo-Saxon one, a circumstance of immeasurable importance. It is because we believe that America will give a Christian Protestant civilization to the world, and because we believe The American University will help to carry out God's providential plan, that we pledge it this afternoon our earnest prayers and our heartiest support.

A SOUTHERN LAWYER'S VIEWS.

He regards an American University under Protestant control as the greatest need of the age.

NO. 108 MASSACHUSETTS AVENUE N. W.,

WASHINGTON, D. C., April 15, 1893.

DEAR EDITOR: When I hear anything said in favor of The American University I like to repeat it; and hence it is that I write this letter. In a recent conversation with a lawyer of my acquaintance from North Carolina, I referred to this subject and asked his opinion of it. He said:

"I am satisfied that the most important work now going on in the world is that which looks to the establishment of an American University to be under Protestant control. As you know," he continued, "I am a politician—a student of Tacitus, Machiavelli, and Jefferson—and therefore, while far from being a religious zealot, yet regard religion as the corner stone of civil institutions—as the one thing, above all others, to be attended to in educating the people. For as no people will submit to a ruler who has no religion; or as the ancients expressed it, *Dis te minorem ut geris imperas*; neither will any people submit to a government whose controlling force is a religious institution at variance with its civil constitution.

Now, our civil Constitution is the fruit of Protestantism; and in fact, the Virginia Legislature, in 1799, declared that the law entitled *An Act for establishing religious freedom* (in Virginia) is a true exposition of the bill of rights and of the Constitution. That act may therefore be regarded as the civil definition of Protestantism. It was written by Thomas Jefferson, and is one of the three things mentioned in the inscription on his tomb; the other two being the founding of the University of Virginia and the writing of the Declaration of Independence.

Hence, if Evangelical Christians fail to educate our statesmen, our professional men, our scholars, this country will not become a Catholic country, as many imagine, but it will become something much worse—a veritable Mexican Pandemonium.

Thus you see why I consider such a University as the greatest need of the age."

I took the trouble to look up the statute establishing religious freedom in Virginia, to which my friend referred. It is in the Twelfth Volume of Henning's Statutes at Large, and is as follows:

1. "Whereas Almighty God hath created the mind free—that all attempts to influence it by temporal punishments or burdens, or by civil incapacitations, tend only to beget habits of hypocrisy and meanness, and are a departure from the plan of the Holy Author of our religion who, being Lord both of body and mind, yet chose not to propagate it by coercions on either, as it was in his Almighty power to do.

That the impious presumption of legislators and rulers, civil as well as ecclesiastical, who, being themselves but fallible and uninspired men, have assumed dominion over the faith of others, setting up their own opinions and modes of thinking as the only true and infallible, and as such endeavoring to impose them on others, has established and maintained false religions over the greatest part of the world and through all time.

That to compel a man to furnish contributions of money

for the propagation of opinions which he disbelieves is sinful and tyrannical.

That even the forcing him to support this or that teacher of his own religious persuasion is depriving him of the comfortable liberty of giving his contributions to the particular pastor whose morals he would make his pattern, and whose powers he feels most persuasive to righteousness; and is withdrawing from the ministry those temporary rewards which, proceeding from an approbation of their personal conduct, is an additional incitement to earnest and unremitting labor for the instruction of mankind.

That our civil rights have no dependence on our religious opinions, any more than our opinions in physics or geometry, and therefore the proscribing of any citizen as unworthy of public confidence by laying upon him an incapacity of being called to offices of trust and emolument unless he profess or renounce this or that religious opinion, is depriving him injuriously of those privileges and advantages to which in common with his fellow citizens he has a natural right, and that it tends only to corrupt the principles of that religion which it is meant to encourage, by bribing with a monopoly of worldly honors and emoluments those who will externally profess and conform to it; and while indeed those are criminal who do not withstand such temptation, yet neither are those guiltless who lay the bait in their way.

That to suffer the civil magistrate to intrude his powers into the field of opinion, and to restrain the profession or propagation of principles on supposition of their ill tendency is a dangerous fallacy which at once destroys all religious liberty, because he, being of course judge of that tendency, will make his opinions the rule of judgment, and approve or condemn the sentiments of others only as they shall square with or differ from his own; and it is time enough for the rightful purposes of civil government for its officers to interfere when principles break out into overt acts against peace and good order.

And, finally, that truth is great and will prevail if left to itself; that it is the proper and sufficient antagonist of error, and has nothing to fear from the conflict, unless by human interposition disarmed of its natural weapons, free argument and debate—errors ceasing to be dangerous when it is permitted freely to contradict them.

2. *Be it enacted by the General Assembly*, that no man shall be compelled to frequent or support any religious worship, place, or ministry whatsoever, nor shall be enforced, restrained, molested, or burdened in his body or goods, nor shall otherwise suffer on account of his religious opinions or belief; but that all men shall be free to profess, and by argument to maintain, their opinion in matters of religion; and that the same shall in no wise diminish, enlarge, or affect their civil capacities.

3. And though we well know that this assembly, elected by the people for the ordinary purposes of legislation only, have no power to restrain the acts of succeeding assemblies constituted with powers equal to our own; and that therefore to declare this act to be irrevocable would be of no effect in law; yet we are free to declare that the rights hereby asserted are among the natural rights of mankind, and that if any act shall be hereafter passed to repeal the present, or to narrow its operation, such act will be an infringement of natural right."

I hope this remarkable statute may be thought worth reproducing in the columns of the UNIVERSITY COURIER.

ASA C. HILL.

Educational Notes.

At the close of the year 1892 there were in the Boston Public Library 580,334 volumes of all kinds.

In the prison statistics of seventeen States, collated for the special purpose of examining the oft-repeated allegation that education increases rather than diminishes crime, U. S. Commissioner Harris proves that the illiterate criminals are eight times as many proportionately as the educated criminals.

McCoy Hall, Johns Hopkins University, is now being erected by the trustees from a bequest of John W. McCoy. There will be rooms for the Faculty, an Assembly Room, and ample accommodation for the seminaries in the various departments of language, history, and philosophy. The Central Library and Reading Room will be placed on the top floor and lighted from above.

So far as its graduate department is concerned, Brown University now places women on exactly the same footing as men. In respect to instruction, examinations, degrees and, substantially, expenses the two sexes are treated alike. The university also offers to examine all women candidates in undergraduate studies, and to confer its degrees on those who are successful in these examinations.

Ex-President Harrison, with a compensation worthy of his great experience and ability and the generosity of the wealthiest educational institution in the world, is to deliver law lectures for six weeks of next autumn at the Leland Stanford, Jr., University, California. As yet, there is no organized Law Department in this institution, and all the students of all the departments will have the privilege of attendance. Mr. Harrison's long connection with State and National politics and his really statesmanlike qualifications will render his lectures of classical and permanent utility.

The Seventh Annual Report of Dr. Gilman, President of Johns Hopkins University, shows considerable prosperity during the last year. There are 65 teachers, 547 scholars (of whom 337 represent 146 colleges); 41 graduates received the degree of Bachelor of Arts; 37 post-graduates received Ph. D. The Department of History and Philosophy under Professor Adams attracted the largest number of students, 165. The Department of Physics under Professor Roland had 138 students; Chemistry under Professor Remson had 135; German under Dr. Wood 121. By a recent regulation the B. A. is entitled on fitting occasions to wear a black gown with black hood lined with white silk and edged with blue. The Ph. D. is entitled to wear a black gown and a hood of black silk lined with scarlet silk and edged with gold.

Important gifts have recently been made to the Johns Hopkins Library of the professional libraries of two distinguished physicians of Baltimore, Dr. Christopher Johnston and Dr. Frank Donaldson, late professors in the University

of Maryland and consulting physicians of the Johns Hopkins Hospital. Dr. Johnston, by his will, directed that his books and his medical and surgical instruments, with his cabinet of microscopical preparations, and the cabinet of crystals prepared by him for optical purposes, should be given to this University. Dr. Frank Donaldson, jr., soon after his father's death, presented over 800 medical books as a memorial of his father's professional life. The two libraries, with other medical books received from various sources, have been deposited in the Johns Hopkins Hospital, where they are accessible to members of the profession while awaiting the organization of the Medical School.

Henry W. Sage, Esq., donated to the Cornell University (Ithaca, N. Y.) during the year 1892 a new Library Building accompanied with an endowment fund of \$300,000. The Library now contains, including the Law Library, 111,000 volumes and 25,000 pamphlets, of which 6,485 volumes and 1,200 pamphlets were accumulated in 1892. Notwithstanding the fact that the reference volumes which are for the free use of all in the Reading Rooms, and that there is a separate Periodical Room which all use without calling upon the clerk, there were about thirty thousand volumes given out, an increase of nearly 3,000 over the previous year. There is a special collection of Columbian volumes, in which there are many noteworthy and rare books, portraits, fac-similes, etc., relating to the discovery of the new world. In the spring of 1892, ex-President White, during a visit to Utah, secured a valuable collection of histories of the Mormon community, of its leaders, of its sacred and devotional books and of its doctrinal and educational literature. One notable rarity of this series is a copy of the original edition of the Book of Mormon.

At the meeting of the Department of Superintendence of the National Educational Association, held in Boston recently, a committee to report at the next meeting was appointed to "investigate the city schools of the country, the prevalent methods of training teachers, and the co-ordination of studies." The committee consists of William H. Maxwell, Brooklyn, Chairman; William T. Harris, U. S. Commissioner of Education; S. M. Balliet, Springfield, Mass.; N. C. Dougherty, Peoria, Ill.; W. B. Powell, Washington, D. C.; H. S. Tarbell, Providence, R. I.; L. N. Jones, Indianapolis, Ind.; J. M. Greenwood, Kansas City; A. B. Poland, New Jersey; Edward Brooks, Philadelphia; Andrew S. Draper, Cleveland; Edwin P. Seaver, Boston; Albert G. Lane, Chicago; Charles B. Gilbert, St. Paul. An appropriation of \$2,500 was made to provide the expenses of conducting the examination, which is regarded as the most important work ever undertaken by the Association. These gentlemen have great prominence in and familiarity with the public school work of the whole country. The *Educational Review*, somewhat obscurely intimating the line of inquiry which it supposes the committee will take, says: "Prevailing discontent with the results of public school education has prepared the public for the acceptance of a well-developed, moderate scheme of reform that will elevate the schools, insure to parents and pupils their rights and enable every school officer and teacher to work in the way in which his efforts will produce the best results. It will be the fault of the men who compose this committee if they do not produce a report that will long be memorable."

THE UNIVERSITY COURIER.

THE LINCOLN HALL MEDAL.

OBVERSE.

REVERSE.

The above are fac-similes of the beautiful medal given in return for every contribution of one dollar or more for the Abraham Lincoln Hall. The medal is made of aluminum, a metal which admits of a more lustrous polish than silver, but is not so likely to tarnish, and is wonderful for lightness. Every contributor is permitted with his name to have recorded a few words of personal history or sentiment, not exceeding ten. Pastors who may wish to use a medal as a sample in securing subscriptions for others will receive one by making application. Send all communications to The American University, 1425 New York Avenue, Washington, D. C.

Notice to Pastors and Officers of Epworth Leagues

Who Desire to Hold a Columbus Memorial Service in 1893.

We are filling, and shall continue to fill, orders for the CHURCH SERVICE and for the YOUNG PEOPLE'S CONCERT EXERCISE, furnished for 30 cents per hundred (to cover postage), for use in presenting the cause and taking a subscription for The American University. Each Service is distinct from the other, and can be used in the same church without duplication of exercises. Samples sent free on application. Address

A STATESMAN'S VIEW.

“WASHINGTON is the one place on this continent where, in time, all the sources of Science and Education will cluster. Here the facilities for research are even now unrivalled. The Sciences, some one has said, are sociable, and flourish best in close proximity to each other, and no better center could be found than Washington. The great AMERICAN UNIVERSITY, if that should be its title, will undoubtedly be established in this city, where there are advantages which no endowment can give to other cities.”

SENATOR HOAR, 1888.

Trustees of the American University.

[Ex-Officio.]

Editorial Notes.

ON THE first of July, at the close of a year of hard work, the term of service of the Rev. Geo. W. Gray, D. D., expired, and the office of General Secretary was discontinued. Dr. Gray leaves the service of THE AMERICAN UNIVERSITY with the confidence and kindly feeling of all its officers.

THE Columbian celebration is just in the height of its glory; so the Columbian collection in behalf of the American University, which the General Conference authorized in all our Methodist Episcopal Churches, is still in order. A church in the far west reports \$5,000 as its gift. Many small churches are doing nobly also, when judged by ability.

THE Rev. A. C. Hill was so anxious that his granddaughter should have the honor of putting the first stone in the UNIVERSITY, that in her name a block of granite has been dressed and put on the site of the first building, where it lies as a sort of first fruits of the faith that is in Christian hearts, and of the harvest of great piles of stone to be there arranged in architectural beauty ere many years go by.

ABOUT five years ago Dr. Dollinger, one of the ablest scholars in Europe, said before the Munich Academy of Science, "the main hindrance to literary and scientific progress in the United States is the want of a great Central University." How much longer shall this be said truthfully? Ten millions to THE AMERICAN UNIVERSITY would soon remove the stigma.

TO ERR is human. Our attention has been called to several mistakes in the list of ministerial subscribers to the Asbury Memorial Hall Fund as published in our last number. In the Baltimore Conference list the name of Rev. Wm. Harris should occur instead of that of Rev. E. W. D. Hayes. In the New York East

Conference, Bro. I. C. Barnhart is credited with pledging \$250. We have no objection to Bro. "I. C." doing so much, but the credit is due to Bro. J. W. Barnhart for this subscription that so nobly leads his Conference.

AN Epworth League Chapter on the Pacific Coast has lately sent THE AMERICAN UNIVERSITY a check for \$500, as its part toward the building and endowment of a great institution at the Nation's Capital. It is a noble gift that we hope will inspire many others to go and do likewise. What a magnificent deed it would be for the 750,000 members of this enthusiastic band to put one dollar each into this work. Other Chapters are responding. Wherever we touch the young people we find them interested. A few weeks since a band of these workers journeyed five miles on a dark night to hear about the University, and went home determined we should hear from them. Send on the orders for Epworth certificates. We hope sometime to publish a list of League Chapters that have given, as we are doing for the preachers. Will your Chapter be on the roll?

IN THE absence of Bishop Hurst, we give to our readers an epitome of his address at the Metropolitan Methodist Episcopal Church, on the Life and Character of Senator Leland Stanford. Many lessons may be drawn from this man's remarkable career, but it seems to us the last and greatest is his wise disposing of his wealth to so large degree during his lifetime. Drexel in founding his Institute, Clark in starting his University, Carnegie in giving so abundantly, and Rockefeller in establishing the Chicago University, are similar examples that speak loudly to all people of wealth, whether the amount be large or small. The wrangling and expensive law suits over so many large estates, finally dissipating them, or turning them from the testator's purpose, teach the same lesson. It is hoped that the examples named above may set the tide of benevolence flowing so that the joy of giving will fill many earthly homes and hearts. Why should this joy be lost?

THE *Christian Advocate* says the Trustees of the American University have been presented with "a marble slab from the ruins at *Cousin's Run, Ind.*, where Asbury made several attempts to found a university." Where is this place? An interesting relic from the still existing ruins of Cokesbury College is to be furnished for the Asbury Hall by a generous layman. Cokesbury College was near Abingdon, Md. Was it "Carsin's Run, Md.?" Did Asbury try to found a university in Indiana? Or did Jupiter nod?

PROF. HERBERT B. ADAMS, of Johns Hopkins University, said in 1880: "Washington's dream of a great University, rising grandly upon the Maryland bank of the Potomac, has remained a dream for more than a century. But there is nothing more real or persistent than the dreams of great men, whether statesmen like Baron von Stein, or poets like Dante and Petrarch, or prophets like Savonarola, or thinkers like St. Thomas Aquinas, the fathers of the Church and of Greek philosophy. States are overthrown; literatures are lost; temples are destroyed; systems of thought are shattered to pieces like the statues of Phidias; but somehow truth and beauty, art and architecture, forms of poetry, ideals of liberty and government, of sound learning and of the education of youth, these immortal dreams are revived from age to age and take concrete shape before the very eyes of successive generations."

He thought he saw a State University, but it was certainly THE AMERICAN UNIVERSITY founded by private munificence and under religious direction.

The Vice-Chancellor is having the privilege of seeing our Church engaged in its multifarm work during these summer months. The Churches are not closed while other forms of activity are multiplying, but east and west, in cities and rural regions, large congregations gather to hear the Gospel. Some camp meetings may be losing their spiritual power, but it does not seem so on the Maryland peninsula, or at Ocean Grove. The Assembly at Lakeside, O., was feeling the effect of "hard times" and the "World's Fair," but was reaching, inspiring, and training many Sunday-school workers. At Ocean Grove the Woman's Home Missionary Society was rejoicing over a successful year closed, and boldly facing the new year with the prospect of meeting the thousands of unemployed who

will need help. At Round Lake the Ministers' Institute showed that the preachers of the Gospel are alive to all new methods and needs of the times. At Cleveland the Epworth League enthusiasm was at high tide. Surely if organization and work will bring the millennium, it must soon be here. Amid all these forms of work there seemed no clash, and the workers in each had room for a warm interest in THE AMERICAN UNIVERSITY. Touch with the people everywhere inspired hope and courage that when the clouds of this troublous time are past, *golden* beams of manifold gifts will fall upon our great enterprise from all these directions.

PROGRESS.

Since our last number was sent out, the Trustees have held a semi-annual meeting in the kindly proffered rooms of the Arlington Hotel, and the Chancellor reported \$285,000 secured in pledges. This is in addition to the site of the UNIVERSITY, now estimated as worth a half million. Some pledges have been added to the above since the Trustee meeting. Meanwhile it has been felt that preparations must be made for building. Landscape artists and architects are at work on schemes for laying out the grounds, locating and planning the halls for the different departments. It is the purpose to erect a building for each department rather than to house all in one overgrown structure. Some thirteen of these halls, with necessary subordinate buildings, are projected. It is hoped, and indeed expected, that individual men of wealth will erect one or more of these halls of learning in their own name, at their own expense. We believe, with President Schurman, that "the heart behind American wealth is at bottom generous and discerning, and so long as money can foster intelligence, that heart will not suffer our civilization to become a prey to ignorance, brutishness, and stupid materialism. No one knows better than the millionaire that man lives not by bread alone." Some of these see the need and advantages of THE AMERICAN UNIVERSITY. People of less means are planning to help, and we hope by our next issue to make definite announcement of plans and gifts of buildings. Besides buildings we must also have endowments of professorships, lectureships, fellowships, and scholarships. What an opportunity for wealth to make itself useful and forever blessed!

We are glad to note the organization of the American Institute of Sociology at Chautauqua, July 19-20. It shows the drift, and faces the need of the times.

ASBURY MEMORIAL HALL.

The movement on the part of the ministry to erect this hall by 1,000 of them contributing \$100 each, is awakening widespread interest. Many whose names do not yet appear in the list assure us that they mean to have a part in the matter. These pledges by ministers make laymen feel that they ought to help also. It is the old story over again, both in the old world and the new. Who does not know that Oxford, Cambridge, and Glasgow Universities were founded by clergymen; that Harvard, Yale, Dartmouth, and Princeton are the creation of ministers of the gospel; and that the foundations of our Methodist schools have been laid by preachers? Of course, in all cases, laymen of noble mold have followed with their larger gifts, and so we have faith it will be with THE AMERICAN UNIVERSITY. The color-bearers are in the van; the banners of benevolence wave in every breeze; they beckon the hosts onward.

Since our last issue no Conferences have been held, but the following individuals have pledged themselves for \$100 each: William V. Kelly, D. D., editor of the *Methodist Review*; A. J. Nast, M. A., editor of the *Apologetic*; John B. Merwin, New York East Conference; J. R. Colley, Portland, Oregon; C. C. McLean, San Antonio, Texas; W. H. McAllister, Alexandria, Va.; John Thompson, Philadelphia, Pa.; S. A. Keen, D. D., Delaware, O.; L. A. Rudisill, of the Central Pennsylvania Conference; and George F. Oliver, of Stuebenville, O.

One of the above, in sending his subscription, well said: "It is as honorable to be among that thousand as to have had one's name on the millenary petition of the Puritan ministers to James I. We, as well as they, are path-makers among the mountains for the feet of those who publish peace."

The total pledged to date, toward the \$100,000, is \$18,800. We look to the Fall Conferences to complete the amount and secure the building.

THE EDUCATIONAL CONGRESS.

One of the notable events of the year was the International Congress of Education at Chicago. Seldom, if ever, has there been an assembly of such quality on American soil. The section devoted to higher education grappled with some of the greatest questions in college and university work. There could not be perfect agreement on either theoretical or practical grounds when such independent thinkers as McCosh and Keane, Gilman and Raymond, Jordan and Harper, Seth Low and Schurman, Augell and Shorey, with many more who might be named, were there to speak their minds. But the spirit of the gatherings was an inspiration, and the discussions must bear fruit. To think merely of

some of the topics considered is to catch some little idea of the scope of thought that blazed from brilliant brains. "The evolution of liberal education." "Should Greek be required for the degree of Bachelor of Arts?" "How should we cope with the problem of excessive specialization in university study?" "How far is it desirable that universities should be of one type?" "On what conditions should the degree of Doctor of Philosophy be given?" These and others were discussed.

The last question led to the appointment of an able committee, who will be expected to formulate an answer. But will they be able to bring practical relief? Certainly it is needed. This noble degree is being dragged down to the level of our poorest colleges, that are indeed only colleges in name. It is time that all scholarly men, all real colleges, and especially all institutions that are trying to do university work, should combine to bring about a reform in this whole matter of degrees. The root of the trouble is in the legislatures that grant charter powers so indiscriminately. But there might be an agreement of all worthy institutions that would go far toward stamping out, or, at least, restricting the evil. But can there be agreement? While some would insist that a Doctor of Philosophy who has never read, and can not read, Plato or Aristotle in their own tongue, is an absurdity, what will President Jordan say, who dogmatizes against the requirement of Greek for the lower degree of Bachelor of Arts?

Indeed, this question is apt to bring out more clearly the distinction between the college and the university—the former with its course of study planned for discipline, and outline survey of the field of human learning—the latter with its specialization of the activities of the student along lines of professional work or original research. It may array the two parties in opposition that are now forming in educational circles—the one trying to hold the college course intact, with specialization beyond it; the other bringing specialization down into the college course and reforming the latter almost out of existence. Is Doctor of Philosophy a college or a university degree?

Furthermore, we do not see how the committee can avoid dealing with the great question of educational values, a fundamental question to-day. Classics and modern studies, languages and science and mathematics, will be arrayed against each other as to worth. The old will battle with the new, the established with the tentative and experimental. We await with interest the answer of the committee; we rejoice in the clearing skies that follow such agitative discussions.

An exchange says, "Yale College has applications from 1,132 for admission to the next year's freshmen's class."

A UNIVERSITY.

Prof. Von Holst, the Russo-German historian, who has had opportunity to know whereof he speaks, says: "There is in the United States as yet not a single University in the sense attached to this word by Europeans. All the American institutions bearing this name are either compounds of college and university—the university as an aftergrowth figuring still to some extent as a kind of annex or excrescence of the College—or hybrids of college and university, or, finally, a torso of a university. An institution wholly detached from the school work done by colleges and containing all the four faculties connected with a *universitas literarum* does not exist."

This statement, almost startling us with a fact only too evident, is at the same time a fine negative statement of what it is proposed to make THE AMERICAN UNIVERSITY. It is to be neither a "compound," a "hybrid," nor a "torso." It will have the "four faculties" of the ideal European university, with added faculties along other lines of work that are growing up into "professions," in whose fields there is need for large culture, demand for wide knowledge, and opportunity for original research that will bring rich blessings to humanity.

To this ideal we are pledged and consecrated. It may sometimes, amid the closing of banks and factories, the crash of business houses and fortunes, seem far from realization. But meanwhile there is courage, blessing, and joy in a great idea. It helps to bear burdens and rise above defeats. Henry D. Thoreau was right when he wrote: "The fact is, you have got to take the world on your shoulders like Atlas, and put along with it. You will do this for an idea's sake, and your success will be in proportion to your devotion to ideas. It may make your back ache occasionally, but you will have the satisfaction of hanging it or twirling it to suit yourself. Cowards suffer; heroes enjoy."

A great idea is the need of many of our business men to-day. It would be a help in the battle to feel that their lives were consecrated, not simply to making money, but to some great project that in all time would bless humanity. It would eliminate selfishness, which when defeated turns into bitterness. It would incarnate a nobleness that in itself is a fountain of joy.

What nobler ideal can business men take to their hearts to-day than that of helping to build at the Nation's Capital a great Christian university? We commend it to them for their own blessing. America should, America must, be left no longer under the reproach that she has not "one university." On the Maryland banks of the Potomac, near the White House and Capitol, it must arise. The day when America is too poor for such an enterprise is past. The day of America's largest benevolence is but dawning. Stanford and Rockefeller lead on, but here at Washington is a grander opportunity to build amid appliances unequalled. It will be done.

LIFE AND CHARACTER OF SENATOR STANFORD.

BISHOP JOHN F. HURST.

At the Metropolitan Methodist Episcopal Church in this city a memorial sermon upon the life and character of the late Senator Stanford was preached by Bishop Hurst to a large congregation. He said:

We pause in the midst of the usual life of the Metropolitan Methodist Church to pay a tribute of the heart to the late Senator Leland Stanford. In that vacant seat (pointing to the draped and decorated pew of the deceased) he was accustomed to worship, and none were more reverent than was he. Unlike many public men, when he left his constituency and the State which he represented for his official sojourn in the Capital, he did not leave his religion, but brought it with him to Washington, where it constituted the controlling influence of his private, domestic, and public life. His special interest in this particular Church arose through his intimate relations with Bishop Newman, who at this time is on a tour of duty through South America, and who, but for his absence, would of all men be the most fitting to conduct this memorial service. Our American life is distinguished above all other types of civilization by its violent transitions and its almost incredible contrasts. Nowhere as here does success so promptly respond to honest effort. So was it in the beginning of our national history. The career of Washington, from the humble boy on the way to the coast to become a sailor, and later a tireless surveyor of Virginia lands to become the father of his country, was only the first illustration of what we have seen repeated in every striking crisis of all our subsequent history. Even a single decade is not too short a period for the suffrages of our people to change a private citizen once and a second time into their chief magistrate.

HOW SENATOR STANFORD BEGAN LIFE.

Senator Stanford began life with little in his favor except energy, a good education, a far vision and conscience. To some these would seem to count but little in the ordinary sense of success, but, after all, they are the greatest factors toward brilliant and permanent achievement. Now that his life has come to a close, it is fitting that we take note of the character of the man and endeavor, so far as we may, to examine some of the threads out of which was woven the fabric of his large and useful life. Surely those were no ordinary forces by which he attained so strong a place in the sympathy and respect of his generation. It is not our purpose to speak of him as the Governor of California, marshaling his troops with magnificent energy for the preservation of the Union; nor as a prime manager, turning up the first shovelful of earth out of which

was built the Central Pacific Railroad; nor as United States Senator for the last nine years from California. Our concern at this time is not so much with his public life or his place in the political history of the country as with those sterling qualities of the heart and with those large plans which came to full fruition in the latest decade of his nearly three score and ten years.

A HUMANE AND KINDLY NATURE.

Senator Stanford was of most humane and kindly nature. Of the multitudes who last Wednesday read the dispatches giving account of his sudden departure it is not likely that there was an enemy among the millions. On the other hand, all over the land there was a deep feeling of regret, and in many cases the keenest sense of personal bereavement. That one who to-day is living in memories and hopes, and who has so often worshipped here with him, has multitudes of sympathizing friends from the Atlantic to the Pacific. The large means of Senator Stanford never chilled him in the least toward the suffering or the needy. He was one of the men whom wealth never alienated from close touch with the suffering classes. His entire theory of good citizenship was based on helping the most needy part of the population. Over few thresholds in Washington have poor boys been permitted to pass as they have over his, entering with heavy hearts, and on festal occasions going out with large accessions to their little store of comfort. The telegraph and messenger boys and the Senate pages will never forget the many tokens of his kindness which it was an habitual pleasure every year for him to bestow. Where is the man to take his place for the toiling boys of Washington in the years to come?

HIS DEEPLY RELIGIOUS NATURE.

The deeply religious nature of Senator Stanford was perceptible to all who came into intimate relationship with him. Religion was his favorite theme in the latest years of his life. The two sole articles in his creed were, God's goodness toward men, and man's charity toward his brother. It mattered little in what circle he was, he was not slow to communicate his firm faith in a guiding Providence ruling over the affairs of men. Neither was it to him simply a general Providence but a particular Providence who guides the footsteps of each of His children. He used to speak of God's special interest in each individual, and to say that the framework of the universe was constructed on the principle of God's infinite goodness toward His children. There was no pessimistic chord in Senator Stanford's harp. He had always the firmest faith in the gradual progress of the world toward loftier ideals and higher achievements. That the world was to be conquered for Christ and by Christ

was his strong belief. The calamities and disappointments happening to both individuals and nations he was accustomed to think of as incidents for a purely disciplinary purpose, while day after day the world was marching toward its promised perfection. We do not wonder that religion formed such a steady part of his life when we recall the religious element in his domestic life. The worship at his family altar was not permitted to be disturbed by any public or business claims, but was regular, free from haste, and radiant with the Divine presence.

Again, Senator Stanford regarded himself as a debtor to his generation. He seems never to have thought that the large means which a successful career had placed in his possession were to be absorbed by himself or those most closely related to him. He pronounced the day when he placed the chief part of his vast accumulations in the hands of directors for what he was accustomed to call his "school house" the happiest of his life. He explained this later as due to the freedom from care of a burden which had so long oppressed him.

HIS INTEREST IN EDUCATION.

The interest of Senator Stanford in education revealed itself most strikingly in the founding of the university which bears the name of his only son, Leland Stanford, Jr., who died in Florence in March, 1884. It is not a matter generally known, but nevertheless it is true, that the son himself had expressed a sympathy with the education of the poor, and it is a fact that this had great weight in the unparalleled gift creating the university. These plain words were spoken by Senator Stanford October 1, 1891, on the occasion of the formal opening of the university:

"I speak for Mrs. Stanford as well as for myself, for she has been my active and sympathetic coadjutor and is cograntor with me in the endowment and establishment of this university. In its behalf her prayers have gone forth that it may be a benefactor to humanity and receive the blessing of the Heavenly Father. For Mrs. Stanford and myself this ceremony marks an epoch in our lives, for we see in part the realization of the hopes and efforts of years. For you, faculty and students, the work begins now, and it is to commemorate this commencement of your labors that we are here assembled.

* * * * *

"It has been suggested to us that there was a limit to the beneficence of education, that that limit had been reached in this country, and that the public, private, and endowed schools and colleges already more than supplied all the needs of the community, but we have thought differently. We do not believe that there can be superfluous education. A man can not

have too much health and intelligence, so he can not be too highly educated. Whether in the discharge of responsible or humble duties he will ever find the knowledge he has acquired through education not only of practical assistance to him, but a factor in his personal happiness and a joy forever. * * * When that day comes to us that sooner or later must come to all, we think we shall both approach the great change the more calmly from the knowledge that the threads of our work will be taken up by you and followed along the line we have traced."

LESSONS FROM HIS LIFE

Some lessons we may learn from this honored and finished life. God has His purposes in our afflictions. There was a deeper meaning than at first we might imagine in a great sorrow—the death of an only child. But when that son was taken away, it seems that God meant that multitudes of sons and daughters of the poor should come to fountains of knowledge in all the centuries yet to be. I heard Senator Stanford say that he knew it was God's will that he should be taken, for otherwise it could not be; and knowing this was His will, he would not have asked for his return had he known it to be possible. A large faith was that to reach such a height of trust.

Again, what we determine to do for God's cause should not be postponed. Here was a lawyer who left no chances on the distribution of his wealth, but set it at work during his own lifetime and was permitted to see the beginning of its beneficent results, which are to continue for all the years to come, a perpetual benediction to our land and to the whole world.

Charity, or love, is a sure and magnificent sowing. Other seed may fail of harvest, but "charity never faileth." Scattered widely and wisely on the furrowed field of our common humanity, the seeds of love shall have a multiplied growth in the ennobled and beautiful characters of earth and in the enrichment and endless enjoyment of the higher activities of heaven.—*Evening Star*.

WASHINGTON AND THE UNIVERSITY.

The Capital is asserting itself. If the shade of Charles Dickens could revisit the city of Washington, it would delight in great avenues which begin in "something" and end at "somewhere." The progress of every phase of American society during the reconstruction period since the war has received its largest exposition at the seat of Federal Government. One of the fairest estimates of our advance as a people in the period from Lincoln to Harrison can be made by a comparison between Washington as it was when the great President came there over thirty years ago and as it is to-day.

The wisely-chosen site of the city justifies and enhances all efforts to beautify it, and it is small prophecy to assert that Washington will be the resort of many during the next generation whose ancestors have found Paris their paradise.

Great as Washington is in its legislative and executive departments, it will also become a center for home-life, in fact, is rapidly becoming so, and the population will consist of the leaders of this Republic, both men and women. One attraction is lacking, and that is a national university. London has one, young, but more thorough in its work than Oxford or Cambridge. Paris was a focus for genius and learning as long ago as the days of the schoolmen. Berlin's professors are among the great "savants" of the age.

Why should not Washington have the university of the continent? Bishop John F. Hurst, one of the most scholarly of clergymen, able, erudite, sagacious, a typical American of the highest standard, has set himself to found a ten million dollar university at the Capital. His plans, as we understand them, are of the broadest description. The Government has granted the university free use of its museums, scientific collections, its observatories, etc. And having secured ninety-three acres of land as the location for the buildings and campus, the worthy Bishop asks for ten millions in aid of the American University. Of course he will get it. The Church he represents will insure much of it, and his personality and the scheme will secure the remainder.—*S. P. Cadman, in Godey's Magazine*.

STATE UNIVERSITIES.

That a few of these institutions (which, as Prof. Von Holst would say, are only colleges, or compounds of college and university, the latter part being still an annex to the former) have had considerable growth of late years through land grants and State subsidizes, no one can deny. That they are making progress in the university part of their work is gladly admitted. But whether all their assumptions should be conceded, and their desires will be fully granted, is another question. It is not yet universally believed that a State institution can be the ideal university in these United States. There are those who claim that the attempts at higher education on the part of the State is a failure. We are not personally ready to speak in such absolute fashion. But that it can be, in the highest sense, a success, we doubt. A notable discussion in the early part of July emphasizes this whole question. The regents of the University of the State of New York, at their annual convention, in whose discussions leading educators are invited to participate, propounded the question of the advisability of founding a National university by the general government at Washington. Presidents Schur-

man and Ely favored such a founding in able and pronounced addresses. They would naturally do so, the former being at the head of Cornell, which he loves to speak of as *the* State University of New York, and the latter being at the head of the State University of Wisconsin, each having been made by land grants, and either having, or being in pursuit of, a large State subsidy.

We do not believe the people are ready for such a movement. It would mean the expenditure of millions of dollars by Congress. That would mean so much more taxation, or higher tariff, and tax-payers are not anxious for heavier burdens, and the last election did not mean any higher duties.

It would introduce another line of patronage, and make education—the highest education, source of all other—a foot ball of politicians. No wonder a professor in one of our leading universities lately said, "better turn the whole matter of education over to Tammany and be done with it."

It is in harmony with President Ely's tendency to paternalism in all his sociological discussions. It is a step toward Bellamy's dream, in which the State is and does everything—a consummation not yet devoutly wished by the majority of American voters.

It would only result in a "torso" of a university at the best, for while in Germany and England, with State Churches, the State may direct a theological department, how could it be done in this country? What kind of theology would it teach?

Furthermore, one of the grounds on which it is urged sounds strangely enough in view of recent facts. President Schurman said, in his inaugural address at Cornell University: "Nothing is more patent than that the college-founding instinct, with the ever-increasing growth of knowledge, is becoming atrophied in all denominations. I can not think of a great modern university which owes its origin to a religious body." Then after trying to except Chicago, he says: "Shall we entrust the cause of higher education to private universities? No; they are in supply too capricious, in maintenance too precarious, in efficiency too variable, and in the charge for instruction they are too far beyond the means of the masses of the people." Does he forget Clark and Johns Hopkins and Leland Stanford and many others of less note? This latter statement is hardly consistent with his former avowal, "the heart behind American wealth is at bottom generous." It sounds more like a slur on the magnificent generosity of our American people. And is the voluntary principle in this great field of benevolence to be thus relinquished? His cool dogmatism that "denominational and private colleges belong to an age which is passing away" is a blow in the face of every denomination in the country, for one and all are putting more men and money into these colleges than

ever before, and are educating more students and producing a higher grade of scholars than ever in their history. President Schurman was engaged in a party plea with the State of New York for a subsidy.

Finally, this movement means the secularizing of all education. It is a part of the wide-spread movement away from the Church and religion. Not that the movement now means to oppose religion. The State universities would not claim to be irreligious. Many men in them are devoutly religious. But as State institutions they would simply have nothing to do with religion. That would be left to the churches. What would be the result? There would be no basis left for morals. The example of a certain State university in which four great "balls" were *the* events of the late commencement season, would not be rare, but a very commonplace and noble thing compared with the bacchanalian revels that might be expected to follow. It is not difficult to see that this movement is in the direction of the German universities managed by the State, and where religion in the evangelical sense is a thing unknown. Do we want repeated in this country what Prof. William North Rice so graphically pictures in an excellent article in a late number of *Zion's Herald*, as true, in Berlin?

"Among the educated classes the attitude of indifference or hostility to the Church is very general. Probably few professors in the universities, besides the professors of theology, ever attend Church. Indeed, the majority of theological professors seldom go to Church. Theology as a science is no more religious than mathematics or physics. Young men enter the ministry as they enter any other department of the civil service. They make thereby no more profession of unselfish aims, religious consecration, or spiritual experience than in taking a clerkship in a post office. The examination which they must pass is purely scholastic. In the early part of their university career the theological students are not noticeably less addicted to dueling, drunkenness, and other vices than the students in other departments."

What is in other departments of State institutions there goes without saying. Is it this kind of a State institution that is to supplant the denominational college in this country, and assume the headship in a National university at Washington? Again we would affirm that the American people are not ready for this movement. The Church does well to look after the higher education of the day, that it not only proceeds from a Christian standpoint, but that the colleges and especially universities are infused with the highest evangelical spirit. There will yet be room and need for the continued benevolence of Christian people. The Nation's Capital is the strategic point for its investment to-day.

THE AMERICAN UNIVERSITY

And the Educational Institutions of the Church.

ADDRESS OF DR. C. H. PAYNE AT THE GENERAL CONFERENCE.

The supreme need of the Church to-day is consecrated and cultured Christian workers, men and women who do for themselves the best that human culture can do, and let God do for them the best that Divine grace can do. The time has come for a fuller recognition of the fact that the character of the work now to be done by the Church demands the highest qualities in the workmen employed. Methodism proposes to do her full share in taking this world for Christ in the shortest possible time. And her full share is a large share. To meet her responsibilities and fulfill her mission she must have the best officered and best commanded army in Christendom.

Where shall these spiritual and intellectual leaders be trained for their task—a task unequalled in the world's history? Beyond question she must train them in her own institutions of learning. The Church that relies upon the State to furnish higher education to its ministry, its educators and workers in all departments, will be sadly out-distanced in the race of the twentieth century for the prize of high success.

And it follows by relentless logic that the Methodist Church, in order to secure its quota of the best disciplined *leaders*, must provide the best equipped institutions. A superior man may sometimes come from an inferior institution, or, for that matter, he may occasionally, in modern times, as he frequently did in earlier days, come from that once splendid but now fast declining institution known to our fathers as "Brush College." But other things equal, the quality and efficiency of the trained men in any Church will correspond with the quality of the training schools of that Church. We are forced, then, to the conclusion that the greatest Church in Christendom, with the greatest responsibility and the greatest mission of duty, must have the best educational institutions in Christendom.

And to secure the best educational institutions makes necessary the best educational *system*, the wisest connectional care and supervision, and a loyal, united, enthusiastic rallying of this vast Methodist host to the support of its own educational institutions and work.

Strong, well-equipped and well-endowed colleges and universities, such as Methodism must have, will not spring up spontaneously, without wise planning and careful fostering by the great Church whose agents they are, and whose training work they must do. No connectional work rises in importance above this, which is so vital to the growth and efficiency of the Church. No connectional responsibility outranks this. The whole Church, and the Church as a whole in its organic

capacity, and by its weightiest words and its wisest endeavor, should undertake the necessary task of providing for its many-millioned membership a system of higher education, equal to the demands of the age and surpassed by none. Happily for us, our Church polity is admirably adapted to the task imposed upon us, and we can do, as perhaps no other Protestant Church can do, the work demanded.

Our providential Methodist machinery is well suited to this providential work. The educational system demanded would embrace:

(1) Schools for elementary instruction wherever the State fails to furnish good instruction of this class, and in our foreign mission fields.

(2) One high-class Academy or Seminary in every Conference where it is needed, possibly more than one in some Conferences, but never so many as to lower their standard or cheapen the quality of their work.

(3) One College for a group of Conferences sufficiently large in number and with adequate ability to insure for it a thorough equipment with a generous support in money and students.

(4) A few, and only a few, Universities, which shall be Universities in fact, and not in name only, and shall be wisely located in centers of population sufficiently separated in distance from each other.

(5) A limited number of Theological Seminaries.

Such a system, compacted together by connectional bonds of federation, having all of its schools affiliated with each other and all integral parts of a common organic whole, with proper local autonomy, joined with wise connectional supervision, protection, and aid, would secure to our educational work a standing and efficiency otherwise impossible, and would send the Church forward into the twentieth century with a sweep of conquest hitherto unknown.

If now we add to this system what properly belongs to it, a great central University at the National Capital, for special and technological and post-graduate studies; an University which shall be the rival of no other institution, but the ally and the pride of all, we shall have the completest and most efficient educational system of any Church in this country.

Such is the relation between The American University and the other educational institutions of the Church. Though it may not be claimed that this University is absolutely necessary to the system proposed, it is believed that it will greatly increase the efficiency of the system, and of all the several institutions which the system embraces. It will be a crown that will not only adorn, but will also enrich and ennoble, the whole educational body and the whole Church. It will not take money, students, or influence from any other school of the Church, but will add immeasurably to the strength and usefulness of them all.

Time fails me to give even the briefest outline of the benefits that the University would inevitably bring to all our church schools. It would aid in supplying these institutions with needed instructors of amplest qualifications for their work. No need of the Church is greater than this. No college can command wide patronage to-day that does not have professors specially trained for their several departments. Where shall these

secure their professional training? Where are they now obtaining this training? Chiefly in professional schools outside of our own Church in this country, and in the Universities of Europe. And this opens an inviting field of discussion, which we must regretfully pass with but a brief sentence or two.

The proposed University, conducted under Christian auspices and reared on ample endowments, will prove a powerful ally in the fierce battle which is being waged between skepticism and infidelity on the one hand and the Christian faith on the other. Educate the coming teachers of our youth in the murky, skeptical atmosphere of German Universities, and in Universities in this country not difficult to name, and we shall soon surround these youth with the same blighting atmosphere in the schools of our own Church—which may Heaven forbid! No, we must, unquestionably must, provide for the best possible special training of our own professors, under influences that shall not dim the soul's vision of God, nor dampen its religious zeal.

And finally, such a professional training school for the teachers of our Church institutions will enable these institutions to maintain the high religious standard and the revivalistic character which have been their glory and power in the past. Far distant be the day when this glory shall depart from these seats of learning! It must not, it will not if Methodism is true to itself, to her opportunity, and to her duty.

Methodism has done well in educational work in the past, but she must do even better in the future; she must *do her best*, and her best to-day is incalculably beyond her best in the earlier yesterdays of her history. Let the Methodist Episcopal Church of to-day lay upon her educational altars gifts equal to those that built Cokesbury College, when a few thousand scattered members out of their poverty gave nearly \$50,000 into its treasury, and many millions of dollars would immediately bless these needy institutions and make glad the whole Church.

We rejoice over our *twenty-six million dollars'* worth of school property and endowments which a hundred years have brought us, and our *forty thousand* students now in the higher schools of our Church.

Now let the rallying cry be, a *hundred million dollars* in the treasuries of our schools, a *hundred thousand students* in their halls, and every teacher and every student exemplifying the motto, "Christo et Ecclesia," to Christ and His Church.

Standing recently in the dome of the famous *World* building in New York City, and looking down upon the miniature world below in the great city with its teeming millions, I remembered the fact that it was but yesterday, as history is written, when the entire population of the city was confined within the narrow limits contiguous to the Battery, and I recalled the story, said to be historic, that when the City Hall was built they put upon it a marble front facing the Battery, but thought a brick wall quite good enough for the upper side, where no population then was. But the tide of population went sweeping up, till now it reaches many miles above the City Hall, and the early mistake has been but poorly rectified by later attempts to improve the unsightly appearance of the structure.

Methodism is building for a vast future and for uncounted millions. Let us build this glorious temple of Methodism with its marble front toward the future; build for the coming generations; build for all the years of time and eternity.

Educational Notes.

It is reported that about 400 students were at Mr. Moody's summer school at Northfield.

The Royal Geographical Society of England lately voted 172 to 158 not to admit women. Our sisters who wish to wear the title F. R. G. S. will have to wait a little longer, but not many years.

We are pained to see in an exchange that the bequests of DePauw have dwindled from a supposed million to \$600,000, and the failure of his son and successor may yet more cripple DePauw University.

The Girard College fund now amounts to over \$13,000,000. Cornell has \$8,000,000, and President Schurman said in his inaugural, "Cornell University is poor and needy." Chicago with \$7,000,000 is still seeking for more.

Women are admitted to our latest great University, and four ladies are put on the Board of Instruction—Alice Freeman Palmer, Marion Talbot, Julia E. Buckley, and Martha Foote Crow. No conservative shouts himself hoarse. The world moves.

Many of our educators have resigned their positions at the late commencements. Among the many are Chancellor Sims, of Syracuse; Prof. L. T. Townsend, of Boston; Dr. Strong, of Drew; Dr. Wheeler, of Allegheny; Chancellor Creighton, of Nebraska; and C. W. Gallagher, of Lawrence.

It is interesting to study the growth of great institutions. Think of Harvard, for instance. Its older buildings date: Massachusetts Hall, 1720; Holden, 1734; Hollis, 1763; Harvard, 1766; Stoughton, 1804; University, 1812; Gore Hall, 1813. These were the work of a century. Times change. Chicago University has already put over a million dollars into buildings.

Elections to educational positions are constantly reported in the daily and weekly press. This shows the demand to-day for trained men in all the departments of learning, as well as leaders to take charge of our Colleges. Dr. Daniel Steele takes Prof. Townsend's place for the year; Prof. Rogers succeeds Dr. Strong; Rev. R. T. Stevenson goes to the Ohio Wesleyan; Prof. Crawford becomes President of Allegheny, and Dr. John takes charge of Clark University.

EPWORTH PIANOS and ORGANS

Elegant in Finish, Beautiful in Design, Solid in Construction, Pleasing in Tone.

GUARANTEED THE BEST IN THE WORLD FOR THE PRICE.

No money wanted until Instruments arrive in Good Order, are tested in your homes, and found Exactly as Represented.

OUR CATALOGUE,

With pictures, prices, and other information, sent free to those who give name and address of their minister.

OUR FACTORY,

Under the personal supervision of our Mr. Carl S. Williams, is fitted with the latest improved and most expensive machinery. Our workmen are experts in their various departments, and are instructed to spare no pains or expense necessary to make the Epworth perfect in all essential features. The best grades of reeds, keys, stops, action wires and felts are used, for

What the Works Are to a Watch the Action is to an Organ or Piano.

OUR TERMS:

Epworth Organs and Pianos are not sold through Dealers, Agents or Peddlers, but shipped direct from Factory to Purchaser at discounted prices. If ordered through Methodist minister no money is asked until instruments arrive in good order, are tested, and found as represented.

OUR REFERENCES:

- HUNT & EATON, New York.
- CRANSTON & CURTS, Chicago.
- BANKERS' NATIONAL BANK, Chicago.
- FIRST NATIONAL BANK, Centreville, Iowa.
- BRADSTREET'S or DUN'S COMMERCIAL AGENCY.

A CLOUD OF WITNESSES.

The Epworth is endorsed by thousands of satisfied purchasers in all parts of the country. Space forbids the insertion of letters, but we give a few references, selected at random. If you write to any of the parties, please enclose a stamp for reply.

A BISHOP'S JUDGMENT.

“For many years I have been meditating upon the prospect of an AMERICAN UNIVERSITY, which should occupy a unique position in the American educational world. The idea which is taking an actual form in Bishop Hurst’s plan, meets, as I understand it, every requirement of such a university. Its peculiar position in Washington will give it a prominence, a dignity, and an environment to be found nowhere else.”

BISHOP SAMUEL FALLOWS, 1891.

Trustees of the American University.

Editorial Notes.

THE TRUSTEES of the American University hold their next semi-annual meeting in Washington, on December 13.

THE REV. JOHN PEATE, of the Erie Conference, whose skill is well known, has offered to furnish the largest reflecting telescope glass in the world for the the American University if the material is furnished. Our Chancellor has accepted the offer.

ALL correspondence, financial, as well as other, should be sent to the office of the University, 1425 New York Avenue, Washington, D. C. Checks made payable to either the Treasurer, Chancellor, or Vice-Chancellor, should be sent to the same place, and receipts will be at once sent from the office.

THE REV. WILLIAM KEPLER, of the North Ohio Conference, who was for some time Professor of Natural Sciences at Berea University, has lately begun the scientific collections of the American University by presenting it with one thousand dollars' worth of fossil fish of his own collecting.

THE REV. GEORGE ADAMS, of the New York East Conference, has recently given to the embryo library a complete file of *The New York Times* during the entire period of the war of the Rebellion. These gifts may be suggestive to other friends of ways in which they can help the University.

IT IS felt that more of our Epworth Leagues will certainly desire to assist in erecting an Epworth Hall, or endowing an Epworth Professorship, and it is probable that information concerning the matter will soon be sent to them and efforts made to secure their coöperation. We now bespeak the good will and help of the pastors when the cause is brought before the Leagues.

Many friends inform us of their purpose to help in the building and endowment of the American University. Some of these hope to do it out of money yet to be earned or won in the eager competitions of business or professional life. Of course, such must wait until they possess before they can give.

But there are others with the same purpose to help, who already possess. They are waiting a more excellent time to give or are intending to put a liberal clause in their wills, and neither is yet done. Such good purposes are often suddenly thwarted. The *Western Christian Advocate* reminds us how death plays havoc with unfulfilled promises not put into legal form. Harvard University was to have received a half million from Mr. Frederick L. Ames, but though it was well understood, the will was not actually made, and the money is not Harvard's. It was likewise well known that Isaac Rich intended to give Boston University his vast wealth, but so nearly did death defeat the plan that the pen had to be held in his dying hand to make the gift legal.

What can be done ought to be done at once. If it is to be done by *will*, as we understand is to be the programme in a number of cases, be sure the legal form is correct.

In order that our friends may be sure of this, we publish again, on our last inside page, the legal form and method. We would especially call attention to the title of the University, as we often hear it spoken of as the Washington or the National University. One friend came near making his will to the Methodist University. We may seem to repeat it often, but take pains again to emphasize that the legal title is "The American University."

THE COLUMBIAN COLLECTION.

Pastors are still sending us reports of this one collection for The American University, which was authorized by the General Conference in connection with the discovery of America. Others tell us they intended to take a subscription during the continuance of the World's Fair, but found it advisable to postpone it on account of the financial stringency so prevalent everywhere.

It is not yet too late to have a part in this good work. We find the people are interested wherever the matter is presented, and willing to help according to their

knowledge and ability. Certainly every Church in Methodism will want some part in this enterprise. If we can help in presenting the matter in the Churches, we will be glad to send some one to places that can be reached, as other work will allow, or to furnish information to any pastor desiring it, or to mail copies of the "Church Service." This service might be appropriately used in connection with an address on the World's Fair, so combining the Columbian celebration and the American University. Let us hear from you.

DANGER IN EDUCATION.

All good things may be perverted and so become a menace to society. Sunlight may be focused into a blinding, burning blaze. Religion, that "pure and undefiled," is such a blessing to mankind, may become the inspiration of a Ghengis Khan or a Roman Inquisition.

So education, now universally conceded to be a good, may, by perversion, be made a curse. It was in some such sense that one of our Bishops recently said that, "we (Methodists) are in danger of going to seed in education." "Going to seed" is not a bad thing under proper conditions, in the right way and at the right time. But evidently the good Bishop, who, though not a college man, is conceded to be able and wise, meant something very damaging might come to Methodism through devoting so much energy to education, unless the proper spirit and purpose were maintained. In the same vein writes Dr. Howard Henderson: "There is peril of a highly endowed university becoming a hotbed for the germination of deadly mental bacteria. A microscopic germ floating from an infected lecture room may carry pestilence to Church and State. The universities of Russia breed the bacilli of nihilism; of Germany hatch the cockatrice eggs of infidelity; and there are signs in America of scholastic plague. If benefactors could provide antiseptic qualities—a spray of germicide for 'the chairs they endow'—the current enrichment of our seats of learning could be contemplated with more satisfaction."

This writer evidently had in mind some of our private or State institutions. Certainly none of our Church colleges are in danger of being too "highly endowed." It is a crying fact that all are suffering for want of funds. There are institutions in America of which his words may be true. Of Girard College, worth \$13,000,000, Daniel Webster said: "This school of learning is not to be valued, because it has not the chastening influences of true religion; because it has no fragrance of the spirit of Christianity. I look for no good whatever from the establishment of this school, his college, this scheme, this experiment of an educa-

tion in 'practical morality,' unbled by the influences of religion."

Nearly as strong language might be used of some others, as of one of our so-called State Universities worth \$8,000,000, whose president is currently reported as holding that, while he believes in God and religion, he does not believe there ever has been a deposit of revealed truth given to man. So he denies revelation, sweeps away inspiration, lets the Bible down to the same authoritative plane as the sacred books of other religions. The education obtained under such conditions may become a menace to society, may contain germs of danger to the State as well as the Church.

But there is an "antiseptic quality," "a spray of germicide," provided in a positive religious faith and a high-toned Christian spirit. To these qualities in our educational institutions is due much that is noblest in our American civilization. It may be well to recall that even from universities not specially evangelical, to say the least, great good has come to society. "It was through the interchange of students between the universities of Oxford and Prague that the teachings of Wyclif passed over into Bohemia and issued in the splendid work of Huss. It was from college students of Florence that Colet, and Erasmus, and More caught somewhat of the spirit of Savonarola, and felt the power of the truths that emerged in the Italian Renaissance, and made them contribute so grandly to the birth of religious liberty in England. It was in the presence of the college students of Germany that Martin Luther nailed his theses to the doors, and burned the papal bull, and lit the watch-fire of the Reformation that has waked an answering brightness from ten thousand hills. It was from a little circle of Oxford students that God led forth Wesley and Whitfield to shake the mighty pillars of unbelief in the eighteenth century."

With such facts before us, and especially the fruits of Christian colleges all about us, and the existence in our Church institutions of Young Men's Christian Associations, college and university settlements for home missionary work, and missionary alliances to stimulate foreign missionary zeal, we need have no fears of danger from any highly endowed Christian university wherein abides the true faith and glows an evangelical piety. Of this kind of education the greatest of Methodist Bishops, Simpson, said: "This is a cause which, more than any, should engross the hearts, the affections, and the feelings of Methodists. God grant that we may now do something worthy of Methodism."

The Chicago University has recently made the largest single purchase of books ever known—300,000 volumes.

THE MINISTERS AGAIN.

The heroic spirit of the ministry of the Methodist Episcopal Church is once more manifest in the following list of subscriptions to the Asbury Memorial Hall Fund. Most of them were made at the sessions of the Fall Conferences, and indicate not only their approval of the founding of The American University, but their enthusiasm over the enterprise. This was especially manifest at some of the conferences where, in spite of the financial stringency, and the many local burdens already assumed, such large amounts were pledged. Of the proposed one hundred thousand dollars for the erection of this hall, over sixty thousand are now pledged, giving assurance of the completion of this building in due time. It is hardly necessary to say that they also cheer the heart of our Chancellor in pushing on the great enterprise. We give the list by conferences.

CINCINNATI CONFERENCE.

\$345—S. McChesney.

\$100—William Herr and wife, S. B. Smith, John Pearson, H. C. Weakley, A. B. Leonard, C. H. Payne, Wesley Webster, D. Lee Aultmann, Thomas H. Pearne, M. Kauffman, D. C. Vance, J. W. Bashford, F. M. Clemons, R. S. Rust, R. H. Rust, George K. Morris, R. E. Smith, Frank G. Mitchell, James Murray, J. W. Peters, Paul C. Curnick, Thomas F. Royal (by S. O. Royal), George L. Tufts, Heber D. Ketcham, M. E. Ketcham, D. D. Cheney, W. L. Hypes (by Frank B. Drees), John F. Marlay (by C. L. Spencer), W. I. Fee (by Frank B. Drees), Wilbur G. Warner, O. D. Becker (by Mrs. S. G. Howes), J. Verity (in memory of his wife), Davis W. Clark, Bishop Clark (by R. S. Rust), Bishop Wiley (by R. S. Rust), Bishop Hurst (by class of first year), M. Swadener, Richard Brandriff (by S. B. Smith), V. F. Brown (by Troy M. E. Church), Samuel Bashford (by J. W. Bashford), Bishop Walden (by T. H. Pearne and D. W. Clark), L. E. Prentiss, Bishop Joyce (by class of third year), C. W. Rishell, William Macafee, E. T. Wells, H. C. Weakley (by a friend), John J. McCabe, George H. Dart, John A. Story (by Joseph Story).

\$50—George V. Morris, C. W. Briggs, L. M. Davis,

\$25—E. Burdsall, D. W. C. Washburn, J. L. Shively, J. W. Mason, F. E. Vance, A. N. Spahr, T. P. Walter, A. D. Maddox.

\$10—J. W. Gaddis, R. K. Deem, W. H. Wehrley, J. W. Shorten, J. F. Laird, W. P. Jackson, James Stephenson, J. P. Nine, Frank Leever, J. L. Dalbey, C. D. Muncey, C. H. Kalbfus, C. J. Wells, C. F. Enyart, A. G. Newton, D. J. Starr, A. L. Brokaw, G. W. Vorhis, C. F. Enyart (by Anna Gates), L. O. Deputy.

\$5—B. D. Hypes.

OHIO CONFERENCE.

\$500—Philip Rising.

\$200—W. H. Holmes, Bishop J. F. Hurst, S. A. Keen.

\$110—B. L. McElroy, J. C. Jackson.

\$100—A. J. Hawk, D. H. Moore, J. Finley Bell, P. S. Butts, J. E. Rudisill, H. C. Sexton, R. F. Bishop, F. R. Crooks, I. M. Brashares, J. W. Dillon, (by G. E. Kelly), T. G. Dickinson (by W. F. Janeway and S. W. Smith), W. H. Lewis (by Lancaster Sunday School), A. B. Sniff, W. D. Cherington, A. Gilruth, D. Mann (by Mrs. A. M. Mann), W. B. Barnett, W. W. Trout (by H. C. Trout), W. W. Good, Class of Fourth Year, St. Paul's Church, Delaware, J. H. Mougey, Class of Third Year, H. B. Westervelt, L. C. Sparks, W. V. Dick, B. F. Thomas, D. S. Porter, L. A. Jeune (Frost, O.), W. L. Slutz, W. F. Filler, J. C. Arluck.

\$50—F. H. Smiley, Class of 1893, J. W. Atkinson, H. B. Alkire, F. M. Evans, A. Gilruth (for Thoburn Gilruth), C. C. Wyatt (by Col. E. P. Brooks), A. C. Kelly, A. E. Johnson.

\$30—T. G. Wakefield.

\$25—A. H. Lathrop, J. W. Dillon, W. W. Trout, F. A. Zimmerman, I. F. King, G. A. Spence, A. B. Sniff.

\$20—J. N. Shoop, T. G. Wakefield, T. T. Buell, J. E. Gordon, F. McElfresh, R. D. Morgan.

\$10—J. F. Grimes, J. H. Stratton, J. H. Redmon, E. N. Nichols, J. F. Steele, J. T. Miller, T. M. Ricketts, T. T. Buell, P. Henry, G. Aten, T. W. Creighton, A. M. Mann, N. D. Creamer, M. V. B. Evans, J. H. Goss, N. A. Palmer, W. H. Lewis, Joseph Clark, L. H. Binkley.

\$5—Mrs. A. G. Byers.

ERIE CONFERENCE.

\$150—A. J. Merchant.

\$125—G. H. Humason.

\$100—J. P. Hicks (by T. D. Collins), J. M. Thoburn, Jr. (by G. P. Hukill), A. R. Rich, J. K. Adams, J. W. Blaisdell, S. H. Prather, J. N. Fradenburgh, W. H. Crawford, J. W. Crawford, Cearing Peters, J. C. Scofield, Manassas Miller (by Wesley Chambers), James Clyde (by Centennial Class).

\$50—C. O. Mead, C. E. McKinley, C. C. Albertson, R. A. Buzza, J. C. Gillette, T. C. Beach, J. H. Miller, W. P. Graham.

\$25—J. A. Hume, A. C. Bowers, C. W. Miner, Milton Hamilton, J. C. and L. P. Wharton, P. J. Slattery, T. J. Hamilton, J. D. Knapp, W. S. Shepard, J. C. McDonald.

\$10—S. M. Gordon.

NORTH OHIO CONFERENCE.

\$100—G. A. Reeder, Sr., W. C. Endley, W. C. Dawson, J. F. Smith.

\$50—J. M. Barker.

CENTRAL OHIO CONFERENCE.

\$100—W. W. Lance, J. M. Mills, S. D. Hutsinpillar.

EAST OHIO CONFERENCE.

\$100—G. F. Oliver, W. H. Haverfield, Bishop S. M. Merrill (by S. L.), R. B. Pope, B. F. Dimmick, R. M. Freshwater, Levi Gilbert, Byron Palmer, W. L. Davidson, L. Timberlake, D. H. Muller.

\$50—C. E. Manchester.

MICHIGAN CONFERENCE.

\$100—George S. Hickey, A. E. Craig, E. B. Patterson, James Hamilton, N. L. Bray, Class of Fourth Year (by C. W. East), M. M. Callen (last \$100 of \$1,000 from the Conference), James Roberts.

\$10—D. F. Barnes.

ILLINOIS CONFERENCE.

\$100—W. W. McIntosh, L. F. Walden, Frost Craft.

DETROIT CONFERENCE.

TREASURES AT THE SMITHSONIAN.

Among the varied and valuable collections to be found in Washington, none are more important for historical and scientific research than those of the Smithsonian Institution. This Institution has under its charge the National Museum, the Bureau of Ethnology, the International Exchanges, the National Zoological Park, and the Astro-Physical Observatory. All of these departments are administered with general reference to the diffusion of knowledge among men, and with particular reference to original and productive investigation. We desire to call the attention of our student readers and of all friends of the higher education, to the superb collection belonging to this Institution, containing in 1892, as reported by the Secretary, Professor S. P. Langley, the prodigious number of 3,226,941 specimens, classified and exhibited for educational and instructional use. We append a partial list of the different departments for those who have a special interest in them, with the number of specimens in each:

Insects, 646,500.

Marine invertebrates, 533,870.

Ethnology, 512,871.

Mollusks, 482,725

Prehistoric Anthropology, 137,087.

Recent plants, 134,001.

Fishes, 129,218.

Fossil plants, 110,685.

Paleozoic fossils, 93,839.

Mesozoic fossils, 82,853.

Birds, 68,416.

Birds' eggs and nests, 58,260.

Minerals, 48,357.

Geology, 35,787.

American aboriginal pottery, 32,305.

Reptiles and batrachians, 30,939.

Historical relics, 28,390.

Comparative anatomy, 12,555.

Mammals, 10,387.

Fisheries, 10,080.

Materia Medica, 6,290.

Textiles, 3,288.

Modern pottery, porcelain, and bronzes, 3,232.

Vertebrate fossils, 1,582.

A. O.

BISHOP JOHN F. HURST, D. D., LL. D.,

CHANCELLOR OF THE AMERICAN UNIVERSITY.

While our Chancellor is absent in the Northwest at the Bishops' meeting and the sessions of the various benevolent boards of the Church, we give our friends a new view of his face, and a sketch of his very active life. The facts were collated by our Registrar, and show how educational and literary work has largely engrossed his time.

Born near Salem, Dorchester County, Maryland, August 17, 1834, he attended school at Cambridge until he went to Dickinson College, Carlisle, Pa., where he graduated in 1854.

After teaching the ancient languages for two years in New York, he studied Theology in the German universities of Halle and Heidelberg in 1857. Returning to America, he joined the Newark Conference in 1858, and for eight years filled the pastoral office in New Jersey and on Staten Island.

Elected Professor of Theology in the Mission Institute for the training of ministers for the work in Germany, he crossed the ocean again, and during 1866-'69 he taught at Bremen, and in the year 1869-'71 at Frankfort-on-the-Main, whither the institution was removed and called Martin Mission Institute.

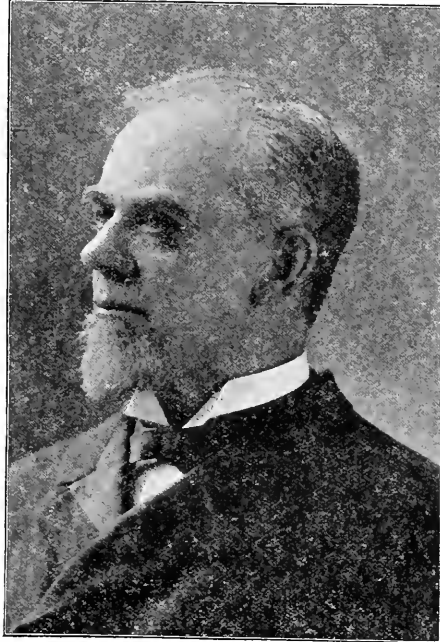

During these five years of teaching in Germany, he visited all the leading European countries, and in 1870 made a tour of the Holy Land and Syria. In the same year, the chair of Historical Theology in the Drew Theological Seminary was made vacant by the death of Dr. B. H. Nadal, and Professor Hurst was elected to and accepted the position. Three years later, when Dr. R. S. Foster was elected Bishop, Prof. Hurst was made President of the seminary, though still filling the chair of Ecclesiastical History.

In the great financial panic that followed, Mr. Daniel Drew failed, and with him went the entire endowment of the seminary; but President Hurst, with rare skill and indomitable courage and patience, raised sufficient endowment to put the institution on its feet again and equip it for its noble work.

In 1880 he was elected and consecrated Bishop of the Methodist Episcopal Church, and in these thirteen

years has presided once or more over nearly all the hundred Conferences of world-wide Methodism. He resided in Des Moines, Iowa, from 1880 to 1884; in Buffalo, New York, from 1884 to 1888; and has lived in Washington since 1888.

Here there was pressed upon him from many directions the duty of leading in the foundation of a great Christian university that, at the Capital of the nation, might avail itself of all the accumulating facilities for professional schools, for the training of specialists and for original research. Already his wise leadership is being rewarded with encouraging progress and indications of success.

BISHOP JOHN F. HURST, LL. D.,
CHANCELLOR OF THE AMERICAN UNIVERSITY.

Meanwhile, amid the duties of the professorship, the presidency, the episcopacy, and the chancellorship, he has translated and written a large number of books, besides contributing largely to religious and literary periodicals. The names of his books and the dates of their publication will give some little idea of the range and amount of his literary production.

His translations are: Hagenbach's History of the Church in the 18th and 19th Centuries, 1869; Van Oosterzee's Apologetical Lectures on John's Gospel (Edinburgh), 1869; and Lange's Commentary on Romans, 1870.

His books are: Why Americans love Shakespeare, 1855; History of Rationalism, 1866 (London, 1867); Martyrs to the Tract Cause, 1872; Outlines of Bible History, 1873; Outlines of Church History, 1874; Life and Literature in the Fatherland, 1876; Our

Theological Century, 1877; jointly with H. C. Whiting, Ph.D., Seneca's Moral Essay, with notes, 1877; Bibliotheca Theologica, 1883; Short History of the Reformation, 1884; jointly with Professor George R. Crooks, D. D., an adaptation of Hagenbach's Theological Encyclopedia and Methodology, 1884; Short History of the Early Church, 1886; Short History of the Mediaeval Church, 1887; Short History of the Modern Church in Europe, 1888; Short History of the Church in the United States, 1890; Indika, The Country and the People of India and Ceylon, 1891; Short History of the Christian Church, a fine octavo recently published by Harper & Brothers, and already a part of the course of study for the preachers of Methodism.

Other literary work is already in hand, and plans are outlined for the future. What with episcopal supervision, building a university, and such constant literary production, it is needless to suggest that he is an energetic and ever-busy man. His works speak; we need add no more.

THE WASHINGTON UNIVERSITIES.

A coincidence may be something more than a coincidence. It may be the concurrence of a number of facts or conditions whose significance shall appear providential with peculiar emphasis. Is it not something more than a coincidence that three great universities have been proposed for Washington, the capital of the nation, and proposed almost simultaneously? It is well known that a plan for a great National University exists in the minds of some of our leading statesmen and publicists. Ex-Senator Edmunds had one in mind. State education in various forms and in the high realms is now given in most of the States of the Union. We do not discuss its merits or demerits. We simply call attention to the fact that its completion and climax in a National University at Washington would probably find numerous supporters in all parts of the Union, if a definite scheme were to be unfolded. The plan of ex-Senator Blair for liberal appropriations for common school education, with the view of helping the South and the Negroes, all but carried.

Two of the proposed universities are in the initial stages of their career. One is Catholic, the other Protestant and Methodist. The Catholic University proposes to make and confirm Catholics, directly and indirectly. The Methodist University proposes to give a liberal education of the highest kind, under religious auspices, but with the denominational emphasis secondary. The Catholic University is in the more advanced stage of life. It is a reality. One faculty is already established and endowed in perpetuity, secure, as far as human things can be secure, against all possibilities of financial embarrassment—the faculty of divinity. Efforts are now making to establish and endow another great faculty—the faculty of philosophy, science, and letters. It is to be expected that, under the best auspices in any denomination, great difficulties would be encountered in initiating so great an enterprise. But we confess to surprise at some of the difficulties which Bishop Keane, the Dean of the University, has encountered. He speaks very frankly as follows:

“There are naturally those who, when the project was first proposed, believed it inopportune; who, when its plan was determined by competent authority, believed it mistaken; who, when the attempt was made, considered it doomed to failure, and who, naturally, would be somewhat glad to wag their heads and say, ‘I told you so.’ Some people are proof even against papal

pronouncements and invulnerable against the logic of accomplished facts. Their imagination having made up its mind to the worst, can see chimeras dire peeping over the walls of the new institution, threatening the destruction of all orthodoxy in the land. The pope and his delegate say the contrary; ‘but that makes no difference, you know; you see we know better.’ Nay, they even discover that it is an ogre plotting the overthrow of the Catholic school system in our country. True, it is an integral part of the system of Catholic education, and it is rather an unheard-of thing for the super-structure of a house to plot against its own foundations; true, the utterances of its rector have always, as is well known, been strongly in advocacy of Catholic education in all its departments. ‘But nevertheless,’ say these wiseacres, ‘we know it is so and the university is laboring to destroy our schools.’

“Well, we are willing to have patience with all this silly misrepresentation, sorry for those who disseminate or believe it, and regard the hindrance which it may throw in the way of the work as only a ripple at its prow. The work of the hierarchy of the United States and of Leo XIII. can afford to be magnanimous with such obstacles and to press on.”

We already know that Bishop Hurst could furnish an interesting bit of autobiography, if he were to tell his experiences as fully and frankly, in his efforts to secure endowment. We wish to emphasize that, notwithstanding the reaction occasioned by financial distress, making haste slowly in this matter is poor policy. It is not Bishop Hurst’s line of action from choice or habit, but from necessity. The rivalry of these two institutions before the eyes of all the nation is inevitable. They will not collide; but it will be seen which is making the better pace toward the attainment of its ends. Benefactors are needed, the large and small gifts. Then the faculties, students, and buildings will follow.—*Zion’s Herald*.

Giving is a divine art. God has given us everything. He has given his only begotten Son for the salvation of the world. “God loveth a cheerful giver.” The standard of Christian giving is not the tenth, as some have supposed, but “as God hath prospered us.” There are times when men can spare fifty per cent. of their income, and even all their income, and not give as much as another man with a large family, heavy expenses on account of sickness, who gives one per cent. Christian giving is not according to the arithmetic, but according to an enlightened conscience. Under Christ we are no longer machines, but “fellow-citizens of the household of faith.” We ought to give like men. Religious stinginess is a subtle form of hypocrisy.

Cornell University is the recipient of 1,000 volumes on the philosopher Kant, and 500 volumes on Spinoza, the Dutch pantheist.

CHURCH INSTITUTIONS.

Because of its intrinsic importance and its bearing on The American University, we give our readers the following extract from an excellent address before the Central New York Conference by Prof. W. P. Coddington, D. D.:

"Should the Methodist Episcopal Church build and maintain universities as an integral part of her work as a world's educator? We think she should.

"In the first place, in this matter we confront not only a theory, but a condition of things deep rooted in the traditions and affection of the people. Denominational colleges exist, numerous and on permanent bases. In 1880 the property held by denominational colleges in this country was three times as great as that of the non-denominational. At that date four-fifths of all the college students of the land were in denominational colleges. For the preceding decade the increase in church colleges was five times that of others. While the population of our country was increasing fourfold, denominational colleges and the students in them increased nearly eightfold.

"If, then, our own Church is to do her part with the great sister churches in the work of education she must conceive and execute magnificently. Moreover, she needs institutions of higher culture for the protection of her own children during the formative period of their lives. State institutions must be either absolutely colorless, forbidding all specific religious instruction and influence, or, on the other hand, they must be universally and indifferently tolerant. To be absolutely colorless on the subject is impossible, and, so far as it is approximated, serves only to send out young people in a like state of mind, utterly indifferent. No subject within the range of human investigation or interest but has its religious bearings. If impartial and tolerant to all, they must allow the freest exposition and the freest propagandism of all faiths and of all infidelities alike. In such a misty, tempestuous atmosphere the religious anchorage of early home education is apt to be snapped asunder and the young go forth confused and adrift on an endless sea of conflicting notions. It must never be forgotten that the learned professor of loose religious views in history, science, ethics, has always much advantage over the unlearned parent, though the latter may be far safer as a religious guide to the child. Such tolerance of religious differences and discussion in the community at large may be correct, but within the sacred precincts of the household it is not allowed; neither is it a safe method of educating young people yet unsettled in their life principles and immature in judgment. We do not hesitate to affirm that it is both philosophical and praiseworthy to prepossess the young soul with the principles and habits of a rational religious faith.

"But the Church has a much larger duty than merely to preserve her own from corruption. Her children must be propagandists of the truth, familiar with the whole field of conflict and with every weapon of her warfare. To this end she must build not only schools for instruction, but immense laboratories for production, sacred seats of learning where, separate from the hot breath of crowds, her elite and erudite scholars may have freedom and the largest facilities for original research, and whence shall issue works of Christian learning which the world will not soon let die. No institution in our day may properly claim the title of 'University' whose faculty is not a producing as well as pedagogical body. Germany leads the world in art and science and literature, for the most part the fruit of her magnificently equipped university faculties.

"In this breaking-up period of old theologies and creeds, when this new world seems to be the storm center for all converging whirlwinds of passion and opinion, now as never before the scholarship of the Church should appear aloft, luminous and resplendent, a steady, celestial beacon to the tempest-tossed. Fulminations from a superficially prepared pulpit are worse than useless.

"Summarily, then, this is the work lying before the Church: Intermediate schools for the many; colleges mainly for pedagogical work preparatory to life's professions; universities, few but unsurpassed, for specialists and production, in each of which the Church may have men and women in the love of the Master consecrated if not ceremonially ordained to the pursuit and defense of all truth."—*Northern Christian Advocate*.

The educational world feels deeply the loss of three men noted in their various departments—Gounod in the realm of music, Philip Schaff in the different lines of theological research, and William Smith, author of valuable dictionaries and histories.

A Lost Opportunity.

It came and went so quickly,
My sluggish soul saw not
The Master stand and beckoning
Toward one of humble lot.

And I rose not up to follow,
So slow was I to see,
Till the help I might have given
Forever fled from me.

And often I am grieving,
And longing all in vain,
For a blessed opportunity
That will not come again.

Dear Lord, give thine anointing,
And make mine eyes to see;
And make me swift in doing
The work thou givest me.

—L. Ada Nichols, in *Sunday-School Times*.

WASHINGTON SCIENTISTS.

Mr. Coville, Assistant Botanist U. S. Department of Agriculture, has been appointed Chief of the Division of Botany and Honorary Curator of the National Herbarium. He is a young man, full of energy, perfectly at home in his subject, a careful investigator, very popular among his colleagues, and his appointment by Secretary Morton meets universal approval.

Dr. Theobald Smith, Chief of Division of Animal Pathology, Bureau of Animal Industry, has recently published the results of his extensive investigations on Texas Fever.

The recent meetings of the Biological Society of Washington have been enlivened by very spirited discussions on the methods of teaching Biology in American colleges and universities. Many of the Washington scientists claim that not enough attention is paid to systematic Zoology. As the foremost systematists of the country are located in Washington, this city should naturally be the center of systematic zoology for the United States, and we hope that The American University will soon be able to obtain the services of these specialists.

The following specialists are now lecturing to students in different institutions: Dr. Th. Gill, Ichthyologist; Dr. Th. Smith, Pathologist; Dr. Lamb, Anatomist of the Army Medical Museum; Dr. Frank Baker, Director of the National Zoological Park and Curator of Comparative Anatomy in the National Museum; Dr. J. J. Kinyoun, Bacteriologist of the Marine Hospital Service, and Dr. Stiles, Zoologist of the Bureau of Animal Industry. This indicates how, by a fair endowment, The American University might avail itself of the skill and knowledge of such men to establish the strongest and broadest zoological and botanical departments in the country.

Dr. C. Hart Merriam, Chief of the Division of Mammology and Ornithology; Profs. Gill and J. Brown Goode, of the Smithsonian Institution, who have international reputations through work in Ichthyology; Dr. D. E. Salmon, Chief of the Bureau of Animal Industry; Dr. Dall, Conchologist of the Smithsonian; Prof. C. V. Riley and Messrs. L. O. Howard and Ashmead, of the Division of Entomology, are among the foremost men of the world in their subjects, and it seems a pity that their knowledge should not be imparted to students by means of lectures, laboratory work, and personal acquaintance. Doubtless these and many other eminent specialists could be induced to lecture in their respective specialties in a properly endowed department of Biology.

The Smithsonian Institution has recently engaged a table at the International Biological station at Naples, Italy, for the use of American scientists. Mr. David Fairchild, assistant Mycologist, United States Department of Agriculture, and Dr. Wheeler, of the University of Chicago, are the first appointees to the table. Applications are referred to Major J. S. Billings, M. D., Dr. Stiles, and Profs. E. B. Wilson and John Ryder, but should be addressed to Prof. S. P. Langley, Secretary of the Smithsonian, giving the candidate's educational history, and enclosing letters from scientific men shewing the applicant is competent to carry on original investigation.

We heartily commend this movement, and hope the Smithsonian will support the American table permanently.

Educational Notes.

The largest library in the world is the Bibliotheque National, of Paris. It contains 1,400,000 volumes.

It is said the Baptists of Chicago were lately in an uproar because Prof. Drummond was invited to lecture at the University.

The Johns Hopkins Medical School opened its doors to students on October 2, 1893, but only to students of the first year.

The Rev. Augusta J. Chapin, who has recently received the degree of Doctor of Divinity, is said to be the first woman to obtain that honor. She will doubtless wear it as worthily as many of her brothers.

The four richest of the women's colleges in this country—Vassar, Wellesley, Smith, and Bryn Mawr—received about \$6,000,000 in gifts of every kind during the first twenty years of their existence. The Woman's College of Baltimore bids fair to overtake them.

It now seems likely that a great museum in Chicago will result from the World's Fair. Most of the money needed to secure it is already pledged.

The College Presidents of the Methodist Episcopal Church met in Syracuse November 22-23.

The Baltimore *Sun* tells us that on August 13, one of our trustees, Hon. Jacob Tome, of Port Deposit, Md., celebrated his eighty-third birthday. He is still, as he has been for so many years, an active, energetic, business man. He is to day considered one of the wealthiest men of the State. His residence is an imposing granite structure. The Tome Institute, now being erected at a heavy expense, is to be well endowed by Mr. Tome, for the education of orphan children of his county and state.

FORM OF WILL FOR "THE AMERICAN UNIVERSITY,"

WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest :

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

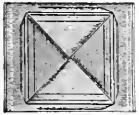

If a Devise of Land :

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purpose of the said University.

If the Residue of an Estate :

I give, devise, and bequeath all the residue and remainder of my estate, real and personal (including herein any and every legacy, bequest, or devise, that may lapse or for any reason fail to take effect), to "The American University," a corporation in the District of Columbia, for the purpose of said University.

The will should be attested by three witnesses, who should write against their names their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published, and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

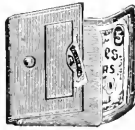

Unique Patent Combination Bill Fold and Coin Purse.

Separate places for coin, bills and car tickets, independent of each other. Flexibility; Lightness; No metal parts to get out of order, or wear the pocket. Ask your dealer for it or I will send sample at following prices:

No.	It holds	Price	Monro.	Calif.	Calif.

WORDS OF WASHINGTON.

“While the work of establishing a national university may be properly deferred until Congress is comfortably accommodated and the city has so far grown as to be prepared for it, *the enterprise must not be forgotten*; and I trust that I have not omitted to take such measures as will at all events secure the entire object in time. * * * I give and bequeath in perpetuity the fifty shares which I hold in the Potomac Company toward the endowment of a university to be established in the District of Columbia * * *.” 1788-1799.

These words of George Washington show not only his interest in the establishment of a University in the District of Columbia, but that he expected it to be done largely by individual gifts. Hence his own legacy, which was never utilized for this purpose. It is on this basis that benevolent citizens of every part of the country are carrying out his injunction. The American University is the outgrowth and fulfillment of the wish of the Father of his Country. We appeal for gifts and legacies to all patriotic people, and repeat the historic words, “the enterprise must not be forgotten.”

HALL OF LAW.

HALL OF HISTORY.

Departments.
AMERICAN, EUROPEAN (west and north), MEDITERRANEAN,
ORIENTAL.

HALL OF LANGUAGES AND LITERATURE.

Departments.
ORIENTAL AND SEMITIC, GREEK, LATIN, ROMANCE, GER-
MANIC, ENGLISH.

HALL OF MEDICINE.

In addition to these buildings there will be needed special endowments for instruction in the various Halls classified under the general names of Professorships, Lectureships, Fellowships, and Studentships. It is preferred, unless there be special reasons to the contrary, that gifts of both Halls and Endowments should bear the names of the donors, or of such friends, living or deceased, as they may designate.

The University grounds comprise a tract of nearly ninety acres, situated on the northwest heights of Washington. This space furnishes commanding sites for all the above buildings, with such others as the future may prove to be necessary for the full development of the University. The arrangement of the grounds is under the care of Mr. Frederick Law Olmstead, who will advise with reference to the location of the Halls.

THE UNIVERSITY COURIER.

Devoted to the Interest of The American University.

VOL. II.

WASHINGTON, D. C., MARCH, 1893.

No. 3

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price - - - Twenty-five Cents a Year.

Notes.

ANOTHER \$100,755.

After the statements about our progress were in type, Bishop Hurst returned from New York, whither he had gone by request, and announced the gift of \$100,755 from a lady in that city. It is in securities now bearing a good interest, and is for the purpose of endowing the first Professorship in the Department of History. The name of the donor is not to be made known. The securities are already in the possession of the University.

This queenly benefaction is not the outcome of a sudden impulse. It is the fruit of a Christian character. It represents the savings of years made through a noble purpose to help some great and good cause. It was a devoutly religious purpose, born of deep love for God. This sanctifies the gift and carries with it the Divine blessing. It makes the reflex blessing on the giver also all the greater and more enduring.

This second gift of this amount following so soon after the other is, indeed, encouraging. We are glad to know that the donor has been a regular reader of our COURIER. We hope other readers may go and do likewise. This makes the total of gifts and pledges, which we can announce, outside of land, \$500,000, and with the land, \$800,000.

THE REV. A. B. SANFORD, D. D., assistant editor of *The Methodist Review*, has kindly offered to present to the University Library a complete set of the *Review* from its beginning. This will be invaluable in tracing the lines of theological discussion in the history of American Methodism. Other gifts of books have been received from other friends, especially from Miss Mary H. Wright, of Philadelphia. We shall be glad to receive books, especially old and rare volumes, for what is to be a large and valuable Department of the University.

CALLERS WHO ARE INTERESTED in The American University are frequent. Among the recent ones were Dr. Earl Cranston, the genial and pushing agent of the Western Methodist Book Concern; Dr. Wm. F. King, the live and scholarly President of Cornell College, Iowa; Dr. L. T. Townsend, Pastor of Mt. Vernon Place Church, Baltimore, twenty-five years professor in the School of Theology of Boston University; Prof. W. W. Martin, recently of Vanderbilt University; Rev. Charles W. Parsons, Pastor of Hanson Place Church, Brooklyn; Mr. Woolley, a wealthy manufacturer of Manchester, England.

WE DESIRE TO THANK a number of our exchanges and friends who have spoken or written kind words about the COURIER. It is hoped that decided improvements may be introduced in the near future.

EPWORTH LEAGUES still report to us their interest in the University and intention to make contributions toward the Epworth League Hall. Some Leagues have voted to raise or give certain definite sums. Remittances of money are also received from Leaguers, and the beautiful Epworth League Certificate is sent to each donor of one dollar. Will you be in when the roll of the Leagues is called?

THE LINCOLN MEMORIAL HALL is not forgotten. The medals given to each donor to this object are much admired and still called for. It will be an interesting memento as the years go by and the great University is doing its purposed work. Have you a medal? Send a dollar to the office for one.

THE ASBURY MEMORIAL HALL FUND has, now reached \$61,900 in pledges. Payment is progressing also. Many expect to pay all or a part of their pledges at the time of the sessions of the Spring Conferences. Money may be sent to the office, or paid to the representative of the University at the Conference Session. Additional promises, payable within three years, are still in order, and will be thankfully received.

*Progress.***\$100,000.**

For several months a gentleman has had in contemplation a gift to the University. The more he thought of it, for he is a thoughtful man, the more interested he became. The more he prayed about it, for he is a praying Christian, the more he felt it to be the will of his Father. The nearer he came to the realization of his well-formed purpose, the more the joy of it filled his heart. His family, too, shared with him the exquisite pleasure of this noble deed. It may well be imagined that the joy in the hearts of those who were in the meeting of the Board of Trustees when the announcement was made was only a shadow compared with the reality in the hearts of the donors when the legal document was signed making the transfer to the University of this splendid gift. It is to be applied to the endowment of a Professorship, Lectureship, Fellowship, and Scholarship, so far as the fund may be sufficient. It is not available for the immediate needs of the University, but is just such a gift as will be needed by it in a very few years—we were tempted to say, months. How wise to do this while yet amid the activities of life, and so not only be sure that it is done, but also have the joy of it on earth as well as in heaven. The inspiration this gift was to the authorities, will be long remembered and felt. The interest it has awakened throughout the country is manifest in many ways. It is a pledge of other gifts to come. May the noble donor live long on earth to see others follow in his footsteps.

SEED SOWING.

The past three months have not been thought favorable to a harvest of gifts to the University. But some have been received besides the two hundred thousand dollars elsewhere mentioned, and some pledges have been redeemed that were made before the financial depression. It has, also, been a time of seed sowing. Friends have been sought out and interested; those already interested have given assurance of help when times change. Could all be published on the housetop that has come to the ears of those who are within, there would be a consciousness of progress that may not be known to many watchers. The advance of a tide is not always visible. It may seem to stand still until some great wave breaks on the shore and carries the water mark high up on the sand. We believe many waves are forming that will before long carry our enterprise to high-water mark.

TRUSTEE MEETING.

According to the By-Laws under which we are now working, the Trustees meet twice each year, in December and May. The meeting of December 13 is regarded as the annual meeting. It was one of the largest and most enthusiastic meetings of the Board so far held. There were present: Mr. John E. Andrus, Dr. Charles H. Payne, Dr. David H. Carroll, Bishop Alpheus W. Wilson, Bishop Charles H. Fowler, Prest. W. W. Smith, Bishop John F. Hurst, Gen. S. S. Henkle, B. F. Leighton, Esq., Judge L. E. McComas, Mr. Benjamin Charlton, Hon. Matthew G. Emery, Mr. C. C. Glover, A. B. Browne, Esq., Mrs. Gen. John A. Logan, Mrs. Elizabeth J. Somers, and Dr. A. J. Palmer. Vice-Chancellor Beiler, Secretary Baldwin, and Registrar Osborn were also present. Mr. John E. Andrus, president of the Board, was in the chair. The reports of the officers were encouraging. The pledges, promises, and assurances of help from friends of the enterprise were full of cheer for the near future when the financial skies brighten again. There had also been much preliminary work done in preparation for laying out the grounds, locating and erecting buildings, and shaping the great enterprise. The gift of \$100,000 was first announced in this meeting.

There was a feeling manifest that while the management should move cautiously and surely, so as not to "harm the eagle by breaking the shell with a hatchet," yet there should before long be some actual steps taken in the erection of one or more buildings. The widespread interest in the University as an institution for post-graduate work only, the training of specialists and the work of original research, has led to a clearer consciousness of the need of such an institution, and the necessity of its being at work speedily. Eagerness for progress is growing.

No doubt this feeling was stimulated by the acceptance of the new Charter, which gave to all the feeling that permanence was now given to the Board itself, and that its actions have an authority sanctioned by the National Congress. Much of the time of the meeting was taken up in accepting the Charter and making the necessary legal transfers, so that much important business was referred to committees, either with power to act, or for deliberation and future action.

As one not a member of the board, we may say to our friends all over the country, that the men who have this great interest in charge may well be trusted with its vast interests. Scholarship, legal acumen, business sagacity, courage, caution, and wide executive experience are rarely combined. They move cautiously amid perplexing preliminary questions, and yet, when need be, march forward with "the swing of conquest."

CHARTER DAY.

December 13, 1894, will be an epochal day in the history of The American University. Much important history had preceded this. The Institution had been born, named, and furnished a local habitation. A widespread interest had been awakened, valuable friends had been won, and a number of gifts secured. The Epworth League Board of Control, the Meeting of Presidents of Methodist Colleges, the Ecumenical Conference, the Board of Bishops, and the General Conference had endorsed the enterprise.

The site purchased in the city of Washington was first held by Bishop Hurst personally. In May, 1891, the first Board of Trustees was incorporated under the general laws of the District of Columbia, and organized so as to hold the site and take the preliminary steps necessary to inaugurate the enterprise.

But this certificate of incorporation did not confer the powers and privileges necessary to a great University. During the winter of 1893 the Congress of the United States granted the Institution a special charter, which was approved by President Benjamin Harrison, February 24, 1893.

This Charter is as follows:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That John H. Vincent, John E. Andrus, James M. Buckley, Mark Hoyt, Jesse L. Harlbut, James M. King, Charles C. McCabe, Charles H. Payne, John E. Searles, junior; John S. Huyler, of New York; Charles W. Buoy, J. A. M. Chapman, G. P. Hukill, Robert E. Pattison, Charles Scott, Mrs. Matthew Simpson, of Pennsylvania; Julian S. Carr, of North Carolina; David H. Carroll, Jacob Tome, Alpheus W. Wilson, of Maryland; Charles H. Fowler, of Minnesota; William M. Springer, J. B. Hobbs, of Illinois; John P. Newman, of Nebraska; Job H. Jackson, of Delaware; Redfield Proctor, of Vermont; W. W. Smith, of Virginia; D. B. Weston, M. Burnham, of Massachusetts; Thomas Bowman, of Missouri; and John F. Hurst, Louis E. McComas, Benjamin Charlton, Andrew B. Duvall, Matthew G. Emery, Charles C. Glover, S. S. Henkle, Benjamin F. Leighton, John E. Beall, Aldis B. Browne, Mrs. John A. Logan, H. B. Moulton, Hiram Price, Mrs. Elizabeth J. Somers, Brainard H. Warner, and S. W. Woodward, of the District of Columbia, their associates and successors, two-thirds of whom shall at all times be members of the Methodist Episcopal Church, are hereby constituted a body politic and corporate by the name The American University, with power to sue and be sued, plead and be impleaded, and have perpetual succession; to acquire, take by devise, bequest, or otherwise, hold, purchase, encumber, and convey such real and personal estate as shall be required for the purpose of its incorporation; to make and use a common seal, and the same to alter at pleasure; to choose a board of trustees consisting of not more than fifty, of whom fifteen shall constitute a quorum to do business, and which board shall be authorized to fill any vacancies

in their number, to appoint such officers and agents as the business of the corporation shall require, and to make by-laws for the accomplishment of its purposes, for the management of its property, and for the regulation of its affairs. Said corporation is hereby empowered to establish and maintain within the District of Columbia a university for the promotion of education. The said corporation shall have power to grant and confer diplomas and the usual college and university degrees, and honorary degrees, and also such other powers as may be necessary fully to carry out and execute the general purposes of the said corporation as herein appearing.

"SEC. 2. That this act may be amended or repealed at any time by the Congress in its pleasure."

On the day mentioned, the old Board met and transacted the business necessarily coming before it. Then the above-named incorporators met, organized, and assumed the responsibilities, functions and powers imposed in the charter. The old Board thereupon transferred to the newly-organized Board all its property, rights, functions and powers, and adjourned. The new Board then accepted the transfer, and elected the officers needed to carry on its work. To the above names were added those of Mr. Anderson Fowler and Rev. Abraham J. Palmer, D. D., of New York; Rev. Thomas H. Pearne, D. D., of Ohio; and Hon. H. N. Higinbotham, of Illinois. So the University was born again. Its powers and privileges are only limited by the necessities of the enterprise. It can hold any amount of property "required for the purpose of its incorporation," and exercise all "powers necessary fully to carry out and execute its general purposes."

This new beginning of life under larger conditions was felt by all to be an hour full of significance. Addresses by Bishop Fowler, Bishop Wilson, Mrs. Gen. John A. Logan, and Bishop Hurst were full of faith and hope. Some things that cannot yet be given to the public, made hope sanguine of speedy realization.

PAYMENT ON SITE.

Our Treasurer informs us that a payment of \$10,000 will be made on the University site on the date this issue of the COURIER bears. This leaves only \$10,000 unpaid on the land. To meet this amount there are subscriptions still unpaid, conditional pledges that will be realized, and property it is unwise to sell now, as well as other gifts to come. Washington has been pledged to furnish the site, and will in the near future make good the pledge. We wish all our friends could stand on this Pisgah height, and see the landscape view of scores of miles, and the array of fine buildings crowded with students led on by five men of highest scholarship which are within the easy ken of faith.

Immediate Needs.

TELESCOPE.

IN OUR LAST NUMBER was a brief note that Rev. John Peate had offered to furnish to the American University the largest reflecting telescope glass in the world if the material was provided. This fell under the eye of Rev. H. G. Sedgwick, of Nashville, Tenn., who now offers to mount this telescope with driving clock, circles, finder, all complete and first class, if some one will donate the cost of material. Mr. Sedgwick has lately done this work for instruments in Queensland, Australia, and England. Where is the person who will put these gentlemen to work and secure a telescope for the University? Work on the glass should begin at once, as it requires time. The other expense might come later.

BUILDINGS.

People from all parts of the country, preachers and laymen, declare with one voice that the time has fully come to begin the erection of buildings for the University. The Executive Committee at a late meeting authorized steps to be taken in this direction as fast as funds will justify the movement. It is anticipated that work will be begun this summer, or autumn, at the latest. It is a good time to build. The work can be done in Washington for 15 to 25 per cent. less than one year ago.

We print on the inside page of the cover a tentative scheme of Halls. Our friends can now form some idea of what we want to do, and propose to do, if they will help us. Buildings as solid, durable, and adapted to their uses as we must erect, will be somewhat expensive. To this work our energies will now be directed. Some friends we know are purposing to help in this part of the enterprise. We want co-operation from many. As times are brightening, plan to put some stones in these buildings.

CURRENT EXPENSE FUND.

No great enterprise can be launched and carried on without expense. Besides money paid for the land, to erect buildings, and for endowment of professorships, lectureships, fellowships, and studentships, there are incidental expenses, purely business expenses, that do not come under any of the above heads. Some gifts have been received that can be used for this general purpose, but most of the funds given and pledged are for specific purposes from which they can not be

diverted. As building progresses and these structures and the grounds must be cared for, this general expense will increase. To meet this, it is felt a fund must be secured. Plans for this end are under consideration and will be submitted to our friends in due time. It may take the popular form of a University Circle, the members of which will agree to give ten dollars a year for a series of years to help push on the enterprise.

Contributed Articles.

FINANCIAL LESSONS.

Times of financial depression are not only good seasons for religious awakening and widespread revival, but they are also good occasions for people of wealth to stop and think. The uncertainty of all investments, even loss through shrinkage of stocks and failures of trusted men and institutions, may well suggest the doing good with money while one has it. A man of fortune says, "I never feel so much like giving as when I am getting out of a panic." Another said recently, "If I had sold stock I hold and given you what you asked from me last spring, I would be better off to-day." A panic is a sort of financial ploughing time—a time when seed for harvests of benevolence may well be broadcast o'er the land.

People are learning to give what costs sacrifice of comforts as well as luxuries. One year ago hundreds gave to missions what they did not feel. Now they are economizing and sacrificing to give what they do feel, that the cause of God may not suffer. Many are learning the luxury of self-denial. They see how little is required for the necessities of life, and how large a margin they might give in prosperous times. They will give more largely in the future.

Others, perhaps of larger wealth, have been led to gather in their sails. All their canvas was to the breeze. The hurricane struck them. But they have lived through it, and with close-reefed sails are lying to in as safe a harbor as they can find. They are situated somewhat like the banks of New York with their two hundred million dollars in their vaults, and no demand for it. If private individuals are not yet in that condition, many soon will be. Money will be a drug in the market. The completed liquidation of our financial affairs will result quite largely in money returning from borrowers to those who own it. What better time can there be for them to ask, Shall I seek to reinvest it at lower interest or greater risk, or now, when it is in hand, shall I give of my fullness to some cause that is crying for help?

This is a favorable time also for men to ask themselves, What am I making money for? Is it all for self? All for family? All for social or political power? How noble it sounds to hear a prosperous man say: "You would better watch our firm. We are making money just to do good with it. We are consecrated to that work!" How manly, when an appeal was made for as many young men to consecrate themselves to making money for the advancement of Christ's kingdom as are consecrated to preaching the gospel, to

have a young man say: "You have opened my eyes. I did not know what I could do as my great life work. I see it now. I can make money. I did not know whether it was right to amass a large fortune. Now I am going to accumulate every dollar I can, just to pour it into the Lord's treasury. You will hear from me."

The streams of benevolence in America are well started, but have not yet left the highlands of irregular flow. Every financial storm sooner or later swells their currents. When this storm is over and past, it will be necessary for some benevolences to widen their channels or raise their levees. The people of America are giving more, in proportion to the money in hand, this winter to charities, benevolences and educational institutions than ever was known in the history of the world. This is the first swelling of the currents. The surge of this wave will soon be followed by others larger and stronger. The spirit of the Christ who gave up all, including himself, for the establishment of the divine kingdom of truth and righteousness is permeating society and more and more dominating the lives of Christian men and women. B.

STUDY OF THE ENGLISH BIBLE IN COLLEGES.

A person to be liberally educated in Christian America must have a knowledge of the English Bible. The Bible is the fountain and conservator of pure English and a treasure of Christian thought. Its classic beauty and lofty speculations and sublime morality is essential to a liberal education. The study of the English Bible in colleges is important in developing the will and conscience and evoking religious feelings which have a practical influence in conduct. It certainly imparts a vigorous character to education, and brings men face to face with the facts of sin and its remedy. The presence of Christianity in the intellectual life of the student is corrective of selfishness and other vices which enslave the intellect and renders life a disastrous failure. It is encouraging to note that the study of the Bible is finding its place in the American college curriculum on a level with other studies, and time is allotted to attain a certain intellectual mastery of it. The active class instruction is as exacting and exhausting as any part of the college course. The student is led to trace the historic movements, and perceive the organic character, the literary forms and personal factors in its composition. The inductive method adopted develops original and independent students of the Word. The intellectual, devotional, and practical aims attained by this study will be a powerful factor in upholding and maintaining the moral and spiritual character of the student.

J. M. BARKER.

COLLEGE AND UNIVERSITY.

THE REV. HENRY M. MACCRACKEN, D.D., LL. D.,
Chancellor of the University of the City of New York.

The last meeting of Presidents of Methodist Colleges discussed at length the question of allowing a senior in the college to elect the studies of the first year in his professional course. We had thought of writing

something on the topic from the University standpoint, but the following, from an address by Chancellor MacCracken, covers the ground so neatly, that we give it instead:

The university which takes the most care to help, by its example, the colleges of America, will in the end reap the richest harvest. The university movement thus far in a few centers in America has disturbed the undergraduate colleges. It is because it has seemed necessary that advanced instruction should be given, and the task of giving it has seemed to fall to the colleges.

A score or two of our richer foundations have undertaken it. They have not set about it deliberately, or upon any well-settled system. They have merely added to their courses of study from time to time one and another subject. They have also added to the requirements for admission to college. What then? They are now very much as I fancy the banks of a community might be if from handling the affairs of a county or State they should gradually, without any reorganization, attempt to transact the affairs of an entire continent and foreign countries. There are a score or two of colleges in America that find that they have overburdened the college proper. They have greatly changed and expanded the American college course. The result is, we find, that the college course needs relief. If I may be permitted to personify this subject, I may say of that very worthy personage, the American College Course, that he is in some localities in an ailing condition; not thoroughly sick, but still not in as good working order as he was twenty or thirty years ago. There is too much of him. He needs to be reduced. Either his Freshman feet, or his Sophomore legs and thighs, or his Junior breast and arms, or his Senior head, are requiring treatment. The doctors have taken hold of him. Indeed, a new profession has risen up for his benefit. Its members are entitled to the degree of D.C.C., Doctor of College Courses; and it is, as the proverb says, "*tot homines, tot sententiae.*" There are as many opinions as doctors.

The Harvard doctor has said cut off his feet. Do away with his Freshman part, and give it to the Academies. The Columbia doctor, my next neighbor, says cut off his head. Let a year in the Law School, or Medical School, or Divinity School, be taken in the place of the Senior year. The Cornell doctor says cut off both hands and feet. Cut him in two in the middle, as Solomon prescribed for the living babe, and give the upper half to the coming university, the lower to the high school and academy. A Johns Hopkins doctor says "Contract him lengthwise, making three years out of four, by putting harder work into every year." A new Chicago doctor says "Contract him breadthwise, by giving the student only two studies a day, instead of three or four." A Yale and Princeton doctor agree in saying "Inflate him, especially in his upper part, so as to make him twice as large as before. Cran in the electives." Yale offers over one hundred electives for the Senior year. A Boston technological doctor says "Empty him. He will do just as well if you have no language or philosophy. Leave in only science and mathematics, and he will do just as well."

What is the diagnosis? Upon what principles are these prescriptions given? As already indicated, it is to adapt the college course to the age. There must be

From Our Exchanges.

The treasurer of the fund for the maintenance of a Father Mathew chair at the Catholic University in Washington reports the full amount, \$25,000, as having been collected.—*Pittsburg Advocate*.

✓The assets of the American University are said to be \$700,000. This is encouraging, but could we realize what Rome is doing to sap and mine Washington, socially, educationally, and politically, we would pour out our treasure like water for the only institution in the country whose location and projected plans make it a possible check on papal aggression.—*Western Christian Advocate*.

"EVIDENTLY, THE UNIVERSITY SENATE (of the Methodist Episcopal Church) is here to stay, and should organize with reference to permanent usefulness. It has large possibilities of a beneficent and helpful kind.—*Pres't Stubbs*."

DOCUMENT NO. 19.

For clearness of statement, cogency of argument, and irresistibility of conclusion nothing could exceed Document No. 19, just issued by the National League for the Protection of American Institutions. In writing this document Dr. James M. King has put the entire nation under obligations to him, and has rendered a service of incalculable value and character. As a defense of the common school and as a reply to the demands of Roman Catholicism the document is simply overwhelming, and we can readily understand the agitated discussion which it provoked at a meeting of Romanist dignitaries in this city. So pitiless was the logic and so unanswerable were the arguments of Dr. King's paper that it was there resolved to recall the petitions which had been sent all through the State, and to wait for a more opportune time before presenting to the legislature the bill which provided for a division of the money now appropriated for our common schools. Whether these resolves will be carried out remains to be seen. If our Roman Catholic friends are wise they will burn the bill, withdraw the petitions, and drop the whole business once and for all. As matters now stand and with the spirit that has been aroused it would be easier to bombard Gibraltar with a bean-blower or swim up the Falls of Niagara than to enact the measure which has been proposed. Satolli does not understand the American people; he has misinterpreted their kindness and liberality and put a wrong construction upon the way in which he has been received; but he will be enlightened one of these days, and he will then realize that the parochial school, which has degraded and impoverished every nation that adopted it, has no place in our free Republic.—*Manhattan, in Zion's Herald*.

"The college should furnish the broad foundation on which to build life-long education—the view point from which to survey the intellectual kingdoms of this world. * * * Nor should the college agonize for university titles or methods. The ideal college has a high calling indeed; the indifferent or mediocre university is not even called. Let the college stick to its text, content to do college work.—Prof. Nicholson, in *The Laurentian*."

universities, in the sense of schools, in which the great fields of knowledge must be cultivated to the utmost. Teachers must be found for them. Students must be secured. Plant must be provided. A university is a school in which is taught and studied all that is known of great fields of human knowledge, and where new researches are pressed forward. Harvard's plan is simply to make the college into a university by as short and easy a plan as the famous cobbler used for making a pair of boots into shoes—by cutting off the legs. If a large share of the former college work can be sent back to the academies, it is argued that there will be time and room for university work. Harvard has relegated at least two years of what was its college work thirty years ago, to the academies.

A college in a city is tempted to a different course. Its students are continually asking to enter the Law School, or the Medical School, or the Theological Seminary, when at the end of the sophomore or junior year. I have been in college work in cities for over ten years. There has never been a year when I was not approached by some youth who either thought the world would suffer if he did not hasten away to help it, or that he should suffer if he did not hasten to persuade the world to help him. How easy to accommodate such a youth with a four years' college course by counting his first years in law, medicine or theology a part of his college course. Thus the college entrance standard can be maintained and the youth accommodated.

The cutting in halves method is simply a conforming of our system to that of Germany, where two schools, the gymnasium and the university, cover the whole period. An easy way to make two boxes of notions out of three boxes of notions is to pack half of the middle box into each of the boxes at the sides. But a college is not a box of notions, but an organism. So must the university and the academy be organisms. It is not yet discovered how to engraft the two halves of an organism each upon a neighbor organism. The Johns Hopkins mode of encouraging an undergraduate to hasten through in less than the ordinary number of years, and the Chicago proposition to help him along by concentrating him upon two studies each day, are worth considering, but it may be feared that what is good in them is not new, and what is new is not good.

The inflating process, which invites a senior to choose several electives from among a hundred, is a clumsy way of trying to make one person into two persons—trying to make the college boy into both the college boy and the university man. It spoils him for a college boy—it does not make him a university man.

The emptying process is the worst of all. It deprives the boy of the main advantage of a college course, which is a systematic training in each of the three great fields of knowledge. It makes him too early a specialist. It sets him down in the University stage without having led him through the college stage. It is too much encouraged by every professional school. It were better to be left undone.—*Christian at Work*.

HARPER'S WEEKLY gave some fine views of Syracuse University and a good picture of Chancellor Day in a recent number.

ROBERT STEIN'S ARCTIC PROJECT.

Washington, which is already in many respects the scientific centre of the United States, seems destined to become the centre of polar exploration. The plans in the latter direction, which have been proposed by Mr. Robert Stein, of the Geological Survey, have received the indorsement of the National Geographic Society, the Anthropological Society, and of many Arctic authorities both in this city and elsewhere. They have the merit of being practical rather than visionary. They have a well-defined, matter-of-fact purpose, and are evidently not conceived in a mere spirit of adventure. The object is not to reach the North Pole and swing the American flag from its summit, but to explore a large area, which, though unknown, is easily accessible, and has hitherto been neglected because it does not lie in the direction of the Pole.

The main principle of the plan is a secure base of operations to consist of a permanent camp at the entrance of Jones Sound, a measure so simple and of such evident utility that, in the words of Lieutenant Brainerd, "the wonder is why it was not thought of long ago." For many years a number of powerful steamers have annually passed in sight of that point, in quest of whales. The number of shipwrecks in Baffin's Bay in recent years compares favorably with that in the Atlantic. On our coasts the necessity of providing for such accidents has resulted in the development of the life-saving service. For a similar purpose the Government has established a refuge station at Point Barrow, the north cape of Alaska. The Baffin's Bay whalers have not thus far enjoyed a similar advantage, and they will no doubt welcome the news that a station answering the same purpose is to be established at the mouth of Jones Sound.

For this service, however, the whalers will make ample return by rendering communication between that point and the outer world almost as safe and convenient as in the temperate zone. In this lies the great advantage of the mouth of Jones Sound as a base of operations. From that point exploration is to be carried on leisurely along the west coast of Ellesmere Land and the adjoining waters, completing the western outline of those lands whose eastern shores were traced by Kane, Hayes, and Greely. The field of operations is thus peculiarly American. Geographic discovery will be regarded as merely auxiliary to scientific research instead of being made the main object, as in former expeditions. In this will lie one of the chief merits of the new plan, for the main desideratum, as in scientific observation, is continuity. Too often in previous expeditions was scientific research interrupted or neglected, owing to the desire to reach the highest possible latitude. Again, in previous expeditions the work had to be done in breathless haste, because the party was only supplied for a definite time, and thus, in order to accomplish the greatest possible results, they were constantly tempted to run extraordinary risks. All this haste will become unnecessary when a permanent station is established close to the area to be explored. In securing an advisory board, consisting of General Greely, Commodore Melville, and Dr. Mendenhall, with Mr. John Joy Edson as treasurer, Mr. Stein has succeeded in giving to his enterprise the strongest possible organization. We congratulate him on his success and wish him god-speed in his undertaking.—*Washington Post* and *Public Opinion*.

THOSE GIFTS.

All hail to such men as Bishop John F. Hurst, who startle the nation with the unfolding of prodigious plans and rapidly carry on to completion a scheme so vast and astounding as that revealed in the founding of the American University at Washington. May the Bishop receive another one hundred thousand dollars, donor's name given or concealed, before this sentence is an hour in print.—*Baltimore Methodist*.

That other \$100,000 has come and is now in the hands of the Trustees. Let the *Baltimore Methodist* offer another prayer: "The Chair of History now being provided for in the American University, may these words be not an hour in print before some noble friend, the name given or concealed, who has a vision of the future, give \$150,000 for the erection of a granite or marble edifice, to be called the 'Hall of History,' in which the Department of History shall be conducted."

That this noble gift may soon begin its good work, let us now have the building.

THESE BRIEF EXCERPTS from an article by Prest. Thwing, in a recent number of *Harper's Monthly*, hint at some of the difficulties of State universities:

"The western commonwealth regards its duty as not done till it has established the college and schools fitting for the law and medicine. The university is the crown of the system of public education of each State. * * * If its government is still more or less subject to partisan prejudices, its welfare is the object of common regard and endeavor. * * * It is to be confessed that most State universities are obliged to use all their influence with the legislatures of their States for getting the money they need for their work. * * * The intellectual atmosphere of the State university is popularly interpreted as technical or utilitarian. Some ground for the opinion exists. * * * A difficult part in the administration of the State universities is the religious attitude. * * * The right course for the university to adopt is for it to be as Christian as the State is Christian."

Comment is hardly necessary. The last statement is striking. When the State allowed slavery, the university should. If the State allows polygamy, lotteries, gambling, licenses saloons, banishes the Bible and religious exercises from the public school, the State university should be as Christian as the State!

WE were led by an exchange to say in our last number that the pen had to be held in the dying hand of Isaac Rich to make his great gift to Boston University legal. President Warren writes that this is a mistake. His will was made several years before his death. We are glad to make this correction, and hope that all who intend to make gifts by will may see that the legal documents are complete as long before they die.

Book Notices.

[The Editor will be glad to give brief notices of such books as are appropriate to the *Courier*. Copies of volumes sent for notice will be placed in the University Library.]

THE RELIGIOUS FORCES OF THE UNITED STATES: Enumerated, Classified, and Described on the Basis of the Census of 1892. With an Introduction on the Condition and Character of American Christianity. By H. K. Carroll, LL. D., Editor of the *Independent* and Superintendent of the Church Statistics, U. S. Census. Christian Literature Society: New York.

This is a volume that every minister should have, whether he takes the whole series which it introduces or not. The American Church History Society, made up of well-known scholars, has projected a series of twelve volumes on the history of all the sects of America. It is proposed to make them popular and at the same time thorough and critical, giving origins, literature, and authorities. Dr. Carroll's "Religious Forces" is a splendid leader in this movement. It combines the statistics in a way convenient for reference, and especially for comparison. The author is now the recognized authority in this field, a position won by his work connected with the census of 1892. The History Society has put the Church generally under great obligations by securing for it this work from the pen of Dr. Carroll.

THE WORLD'S PARLIAMENT OF RELIGIONS: An Illustrated and Popular Story of the World's First Parliament of Religions, &c., 1893. Rev. John Henry Barrows, D. D. The Parliament Publishing Company: Chicago.

Two splendid volumes, giving a very full record of that really great series of gatherings. The editor's work of history and introduction is well done. The papers and addresses vary in value, from mere second-hand, perhaps more truthfully, tenth-hand, restatements of well-known truths and arguments, to clear, full, and somewhat scientific treatment of great themes and even great systems of religion. Names like those of Wise, Harris, D'vivedi, Mozoomdar, Goodspeed, Washburn, Tiele, D'Harlez, Fisher, Max Müller, Dawson, Orelli, assure one of some good work. There is gold in the mine for any digger—gold enough to warrant the purchase of the volumes. To any one interested in comparative religion, and the progress made in this new science, they are a necessity.

STUDIES IN ST. PAUL'S EPISTLES, Bishop Henry W. Warren, D. D., Editor. Issued by Cliff School of Theology, Denver University. Address Rev. John R. Van Pelt, University Park, Colo.

These studies are not intended to be an elaborate commentary, but a guide for individual study. They will give the message of each book, why it was written, the best results of critical study, its highest spiritual value, and name the best helps. Bishop Warren's name is sufficient guarantee for the practical value of this unique course of study.

THE LINCOLN MONUMENT, in memory of Scottish-American soldiers. Unveiled in Edinburgh, 1893. William Blackwood & Sons: Edinburgh.

This interesting pamphlet, handed to us by Hon. Wallace Bruce, late consul at Edinburgh, tells a story interesting to all scholars, soldiers, Scotsmen, Americans. The fine statue of Abraham Lincoln on old Calton Hill, standing amid the sacred dust of literateurs and martyrs, will be a new attraction to American travellers. Consul Wallace has done a good deed in securing this first monument of Lincoln on European soil.

A REVISION OF THE ADULT CESTODES OF CATTLE, SHEEP, AND ALLIED ANIMALS. C. W. Stiles, Ph. D., and Albert Hassall, M. R. C. V. S. Published by authority of the Secretary of Agriculture. Washington, D. C.

This pamphlet of 134 pages, for which we judge Dr. Stiles is chiefly responsible, is a fine specimen of the work being done by our scientists in the Departments at Washington. Dr. Stiles is zoologist in the Bureau of Animal Industry. He comes to his work with thorough German and French training. He gives full bibliography, historical review, anatomy, and specific diagnosis of each species of the entire group of tapeworms found in the above-named animals. There are also sixteen fine plates illustrative of the work. Much of this pamphlet is original work, and all of it work of a high order. The value to stock-growers is manifest—its value to science is even greater.

Educational Notes.

LELAND STANFORD UNIVERSITY, California, receives about \$12,500,000 in property and money by the will of the late Senator Stanford.—*Ex.*

BISHOP VINCENT is this year Preacher to Harvard University and Lecturer in Harvard Divinity School and Andover Theological Seminary.

THE hard times have forced Harvard to retrench. Notice has been given to two professors and four instructors that their services will not be required after the close of the current academic year.

THE LATE George H. Babcock gave \$50,000 during his life to Seventh-Day Baptist schools, and now leaves \$200,000 more by will for the same purpose, besides \$25,000 to the Plainfield, N. J., Public Library, and \$10,000 to his own church in that place.

THE COLLEGES of New England have adopted the plan of admitting students from approved schools on certificate from said schools. Dr. Warren informs us that the College of Liberal Arts of Boston University has fallen in line with this now almost universal rule.

GEORGE W. CHILDS' life was an educative force. He gave while he lived. His private and public benefactions at home were numberless. He put a memorial window to Cowper and George Herbert in Westminster Abbey, erected a fountain to Shakespeare at Stratford-on-Avon, and gave a window to the church in Long Branch in memory of Bishop Simpson.

GREAT EDUCATIONAL PROJECTS, as well as business enterprises, are more or less retarded by the hard times, but there is no meritorious or legitimate undertaking that will not survive such temporary embarrassment and come out all right in the end.

Reference has already been made to the fact that while in New York on Sunday last Bishop Hurst made a strong appeal in behalf of the American University at Washington. * * *

It is to be specially noted that he spoke in the most hopeful terms of the future of the University, and laid great stress upon the fact that the purchase money for its site, \$100,000, had been raised by the people of Washington without regard to denominational distinctions, two Roman Catholics being among the donors. He also informed his New York audience that in addition to the money for the site there had been subscribed an additional \$400,000, while the land bought was now worth not less than \$500,000.

This is a splendid showing to be made at the conclusion of one of the gloomiest and most disastrous years in the business history of the country, and may be regarded as a sure foreshadowing of ultimate success.—Editorial, *Washington Post*, January 24.

WASHINGTON NOTES.

In spite of tariff debates and depressions, the social life of the Capital City has been at high tide.

Mr. W. J. Sibley has just given \$10,000 for the erection of a Methodist Episcopal Hospital, and a building will soon be started. This is the beginning of a much-needed enterprise.

Associate-Justice White, just elevated to the bench of the Supreme Court, is a member of the Roman Catholic Church. He is a graduate of St. Mary's (Jesuit) College and of the Georgetown (Roman Catholic) University. He is the second Romanist who has occupied this place of power and influence—Judge Taney was the first.

The evangelists, Moody and Sankey, are just now attracting large crowds and making a profound impression on the people of Washington. Genuine revivals are times of intellectual awakening. Mr. Moody has a definite grasp on Biblical truth and stirs both mind and heart. This must purify and enlarge the life.

There has been formed in connection with the Catholic University a Divinity Fund Association, composed of priests who undertake to contribute \$100 annually as long as Providence will enable them to do so.

Prof. Shields, of Princeton, has recently delivered a notable address before the clergy of this city, on "The Historic Episcopate" as the bond of ecclesiastical unity in Christendom. The address will soon be published, and deserves a wide circulation.

There are quite a number of wealthy colored men in Washington. Among them are John F. Cook, considered to be worth \$150,000—\$300,000; Frederick Douglas, \$150,000; two sons of the late James Wormley, \$100,000; P. B. S. Pinchback, \$80,000; John R. Lynch, Dr. C. B. Purvis, and Dr. John A. Francis, \$75,000 each; and the children of Lee, the well-known feed-store man, \$600,000.—*Exchange.*

The new Congressional Library building is approaching completion. Arrangements are being made to make this large and valuable collection of books more readily accessible to students. Facilities for workers will be multiplied, and the whole institution become a busy hive.

Unique Patent Combination Bill Fold and Coin Purse.

Separate places for coin, bills and car tickets, independent of each other; Flexibility; Lightness; No metal parts to get out of order, or wear the pocket. Ask your dealer for it or I will send sample at following prices:

Editorial.

Methodist Episcopal Church, South.

THE GENERAL CONFERENCE OF THE METHODIST EPISCOPAL CHURCH, SOUTH, has unanimously indorsed the American University. This important action was taken during the late session at Memphis. On May 12, 1894, Dr. William W. Smith, President of Randolph-Macon College, offered the following resolutions. The rules were suspended and they were heartily adopted, without a dissenting vote:

WHEREAS, A movement has been set on foot, under the leadership of the Methodist Episcopal Church, for the establishment of a great Protestant University in the capital city of our nation; and,

WHEREAS, It becomes all Protestants, and especially all Methodists, to give encouragement to this important enterprise,

Resolved, That we heartily approve and indorse the undertaking of the trustees of the American University to establish in Washington City a great university for post-graduate study and original research, under the influence of Protestant Christianity and the auspices of American Methodism.

It is hardly needful to say that this action is highly gratifying to all who have been striving to inaugurate this enterprise. The spirit of the action, and the manner of its doing, are both delightful and inspiring. Thanks, brethren, thanks. This puts the united Metho-

dism of America behind the University. It makes one's blood tingle with new life to feel that these two great bodies are moving together in one great enterprise. It presages victory.

Dr. Smith, Chairman of the Committee on Education, in forwarding the resolutions to Bishop Hurst said:

"I think * * * my idea that the Southern Church can be made a great feeder for the University can be realized. It will be the nearest great university to our section, and our church has great influence in this matter in the Southern States."

Bishop Hurst telegraphed the following reply:

"Please communicate to the General Conference our cordial appreciation and thanks for indorsement of the American University. That action will inspire us to more heroic endeavor to make the institution a blessing to every cherished interest of our beloved and common Methodism."

Financial Review.

THE AMERICAN SECURITY AND TRUST COMPANY'S FINANCIAL REVIEW, of this city, in its May number has an excellent editorial on The American University, in which it kindly and truly says:

"The inauguration of The American University is an event of unusual public interest. The declared purpose of its founders is to establish, at the National Capital, on a broad and liberal basis, an institution which shall be neither a rival nor an imitator of any other existing university. It is rather to be a unique and well-articulated system of instruction and investigation for post-graduate courses, for professional schools, and for original research that shall command the services of the ablest professors, and attract the attendance and stimulate and guide the studies of the keenest and strongest minds among the youth of our nation and of other lands. All signs point to a certain and successful fulfillment of the beneficent plans of this young but very vigorous enterprise."

Books.

BOOKS FOR THE LIBRARY were incidentally mentioned in the last number of THE COURIER. Some volumes described in the column of book notices are the result. A correspondent asks that we explain more fully what is desired. Any valuable books will be acceptable. Historical, scientific, classical, medical, legal and theological books will not come amiss. Technical works, general literature, and even text-books will be needed in working and reference libraries. Duplicates of many works will be needed. Doubtless many of our friends have volumes that they would be glad to deposit where they might be useful through many years to come. We will receive them and care for them until a building is erected for the library. Old and rare volumes are especially desirable. We will be glad to correspond with any person concerning this valuable part of a university. The library is coming to be the center, the heart, of all true university work. Its growth by many gifts may save much in the purchase of working libraries when departments are opened.

Secularism.

SECULARISM IN EDUCATION is more and more arresting the attention of thoughtful Christians. It is charged with "unchristianizing the universities." The charge is not confined to institutions which are not under Church control. It is not surprising that in such schools a secular spirit should be in the ascendancy. The Baptists, according to reports from their Education Society meeting in Saratoga, are discussing the danger in their institutions. It is evident that the churches of America must look closely after the religious life and spirit of their colleges and universities. There must be utmost freedom in all study and investigation, but it must be that true freedom, loyalty to the whole truth, which is born of a genuine Christian spirit. Loyalty to a tangent is sometimes the shærest rebellion to the whole truth. Secularism is loyalty to a tangent.

Board of Trade.

THE WASHINGTON BOARD OF TRADE, at a recent meeting, adopted an interesting report from the Committee on Universities. It emphasized the fact that \$10,000,000 endowment is equal to \$42,000,000 in other cities, because of the governmental scientific collections and libraries; called attention again to the Columbus

Memorial Library, to be formed by contributions from all the governments represented in the International American Conference, and urged that here at the Capital of the oldest and foremost American Republic is the proper place for Latin-American youths, as well as the young men of this country, to study the principles of government and political history and science. Washington, not Paris nor Berlin, should train the future statesman of this American continent. To this end Washington must and will become the great university center of the new world.

The Courier.

THE DEEPENING AND WIDENING INTEREST in the University is very gratifying to those who are planning and working day and night for its speedy realization. Letters of inquiry from all over the country make us wish we could send THE COURIER everywhere. If pastors who read this would suggest to all inquirers that we will send the paper quarterly to all subscribers at twenty-five cents a year, it might help us very much in furnishing information to many who want to know what progress is being made.

Secretary Baldwin.

THE REV. C. W. BALDWIN, M. A., who has served The American University actively and efficiently for three years as its secretary, felt that it was best for him to return to the pastorate, his love and joy, at the session of his conference in March last. He was appointed to the Wesley Methodist Episcopal Church in this city, from which he was called to the secretaryship. By request of the Board of Trustees, he continues to act as secretary of that body, where his intimate knowledge of all things from the beginning will be of great value.

SCIENTIFIC CIRCLES in Washington will miss two men who have recently been compelled to relinquish the burden of their work. Major J. W. Powell, so long and well known in the field of geology, will have the profound sympathy of multitudes in his affliction, and Prof. J. W. Riley, the entomologist, will be long remembered for the practical as well as purely scientific work he accomplished in his department.

THE valuable library of the late Philip Schaff will be given to the Union Theological Seminary.

Progress.

RECENT GIFTS.

THE FIRST LEGACY to come to The American University was paid into the treasury on March 5, 1894. It was from the late J. R. Sims, of California. Though not large—\$250—it is suggestive of the gifts, large and small, swelling into millions, that may thus come by *will* to this great enterprise.

REV. A. E. TAYLOR, of Montoursville, Pa., a brother of Bishop William Taylor, of Africa, has deeded to the University 160 acres of land in Kansas.

AMONG THE GIFTS of cash since our last issue is \$1,000 from that princely layman of Philadelphia, Mr. Stephen Green.

MR. SUMMERFIELD BALDWIN, of Baltimore, has lately presented to the University a certificate of twenty shares of twenty-five dollars each in the Book Depository of the Baltimore Annual Conference.

ADDITIONS MADE TO THE LIBRARY by Rev. A. B. Sanford, D. D., Rev. Wm. Fotsch, Col. D. R. Goodloe, Dr. O. W. Owen, and Prof. James Riley Weaver, will be found described in the columns of book notices. The gift of Dr. Sanford was mentioned in our last number. That of Rev. Wm. Fotsch, of Brighton, Ill., a member of the St. Louis German Conference, is especially noteworthy and valuable. Especial votes of thanks were given to these brethren by the Board of Trustees.

MR. JOHN A. WAGGAMAN, of Washington, has given to the University thirty-eight lots in the Wesley Heights addition to the city, which lies close to the site of the University. Though the gift was really made some time ago, on account of change in the charter, they have just been deeded to the University. They are not in a solid block, but were carefully selected, and at regular list prices are valued at \$24,000.

ASBURY MEMORIAL HALL.

THE MINISTERS of the Methodist Episcopal Church are still giving royally towards the \$100,000 proposed by them for the erection of the Asbury Memorial Hall. The addition of the following names makes the total now pledged \$67,377. While the subscribers have the privilege of paying any time within three years, \$6,074 has already been turned into the treasury to bear interest

until the hall is erected. In most of the lists the names given are additions to former and larger subscriptions made by the conferences mentioned.

\$2—L. W. Briggs, A. T. Ennets, Moses Opher.

\$1—Phillip Brown, Achilles Jenkins, Mrs. Moses Opher.

CENTRAL PENNSYLVANIA CONFERENCE.

\$100—M. K. Foster, W. R. Picken, M. E. Swartz, H. A. Straub, Jos. Clemens, Oliver Ege (by Professor A. Ege), Justus A. Melick (by his wife and daughter), Hon. M. K. Jackson (for next pastor), C. V. Hartzell, William Brill.

\$50—E. H. Yocum, D. S. Monroe, J. S. Souser, J. H. Daugherty.

\$30—J. S. Leilich.

\$25—E. S. Latslaw, J. W. Rue, D. Y. Brouse, J. A. Mattern, F. W. Curry.

\$20—F. B. Riddle, S. A. Creveling, M. L. Drum.

\$15—A. C. Forscht, S. B. Evans.

\$10—G. M. Hoke, E. H. Witman, J. A. Miller, J. R. Shipe, G. P. Sarvis, H. F. Cares, W. W. Cadle, C. H. Campbell, E. A. Pyles, J. K. Knisely, J. C. Wilhelm, F. E. Hartman, W. J. Sheaffer, A. D. McClosky, R. W. Runyan.

\$5—Dr. C. H. Payne, J. B. Graham, Joseph Gray, R. Hinkle, B. F. Dimmick.

WYOMING CONFERENCE.

\$100—J. G. Eckman, L. W. Peck, Mrs. Kate Floyd, Mrs. Austin Griffin, Americus Don Carlos, E. L. Santee.

\$50—T. M. Furley, S. G. Snowden.

\$25—N. B. Ripley, H. N. Van Deusen, T. Harroun, J. L. Thomas, J. B. Davis, W. M. Hiller, J. W. Price, J. H. Littell, F. P. Doty, Stephen Jay, L. E. Van Housen, James Benninger, Geo. Clarke (by Park Place Church, Scranton), P. B. Ripley.

\$10—C. F. Peck (Elmshurst, Pa.), C. E. Sweet, E. Cook, Mrs. Ames Carl, C. B. Personneus.

By the will of Samuel Simpson, of Wallingford, Conn., the Ladies' Library and Reading Room Association of that town will receive \$50,000, and the Episcopal Academy at Cheshire, \$10,000.

TRUSTEE MEETING.

The spring semi-annual meeting of the Board of Trustees of the University was held on May 2, 1894. There were present Bishops Bowman, Fowler, and Hurst; Drs. James M. Buckley, C. C. McCabe, C. H. Payne, Thomas H. Pearne, C. W. Buoy, and D. H. Carroll; Messrs. John E. Searles, George P. Hukill, Matthew G. Emery, Andrew B. Duval, B. F. Leighton, A. B. Browne, H. B. Moulton, Representative William M. Springer, Mrs. John A. Logan, Vice-Chancellor Samuel L. Beiler, Secretary C. W. Baldwin, and Registrar Albert Osborn.

In the necessary absence of Mr. John E. Andrus, President of the Board, Mr. John E. Searles, of Brooklyn, was called to the chair, and presided with his usual facility and tact.

Much necessary routine business was transacted, and the charter granted by Congress one year ago and accepted last December elicited considerable discussion. Inasmuch as Congress was about voting the right of way for Massachusetts Avenue through the New Naval Observatory grounds, thus practically bringing this great boulevard to the University site, the Executive Committee was voted authority to dedicate the right of way for the avenue through the University grounds when in their judgment it was deemed wise to do so.

The reports of the officers were full of encouragement, and the recent gifts, already announced, gave the meeting a tone of hopeful enthusiasm. It was found that during the year, from May 1 to May 1, one-quarter of a million dollars had been received—about one-half in cash and the rest in legal contracts and good pledges. When the year was considered, it was felt that this showing gave splendid proof of the hold the University has on the hearts of the people. As elsewhere stated, the ministers had pledged two-thirds of the \$100,000 they propose to raise for an Asbury Memorial Hall. Probably the most important action of the Board was that concerning building, with which the largest and most enthusiastic session yet held was closed.

BUILDINGS.

It has been a growing conviction in the minds of the friends of the University that it is time steps should be taken to begin the erection of one or more buildings. The whole question was carefully considered by the Trustees. Most of the pledges made and gifts received so far are for endowment and can not be used for any other purpose. It was determined that no contracts should be made until sufficient funds are in hand to cover them. No debts are to be created, but as fast as funds are available for the buildings so fast is the work to go on. In this wise and safe spirit the Board voted unanimously that—

“Whereas, An endowment has already been provided

which justifies the opening of a department of history:

"Resolved, That it is the judgment of this Board of Trustees that the time has now come when arrangements should be made for the erection of two buildings—a Hall of Administration and a Hall of History—as soon as additional funds covering the expense of the proposed buildings are secured in cash and reliable pledges."

The "arrangements" are already initiated. Before one building can be located the grounds must be definitely laid out with a view to future developments and the location of many buildings. The landscape architects, Frederick Law Olmsted & Co., write us that their studies for the laying out of the grounds will soon be in our office. Before the plan of the first building can be definitely settled, the general scheme of building must be quite well defined. Before this can be done intelligently the lines of work to be pursued in the University must be somewhat carefully determined, so that each building shall be erected for the special work to be done in it. The tentative scheme of halls published in our last number, and inserted on the last inside page of this issue, will give some idea of the progress in this direction. Its publication has elicited some valuable correspondence and suggestions. It is not intended to cover the entire ground of the future work of the University, but to indicate the plans for beginning. Other halls must follow, and several halls be eventually built for some departments like that of science. Architects are at work on studies for the first buildings, and we can now assure our friends that funds put into the hands of the Trustees for building will not lie idle. These summer and autumn months are favorable to building enterprises. Architects are not crowded. Builders are anxious for contracts. The quarries are listening for orders. Laborers are clamoring for work. Building can be done much cheaper than heretofore, and than it can be after the rush of another boom is on. Where are the friends who will help to erect a building during this next year? Or where is the person who will erect a building to bear his or her name, or as a memorial to some friend? We listen! We expect to hear!

ARCHBISHOP SATOLLI made his first visit to a public school in Waterbury, Conn., May 15. He made an address which naturally bore on education. While he did not forget to say a good word for the Catholic schools, he also said: "The State has every reason to exercise her zeal for the advancement of the public schools, deserves great praise for having surmounted so many obstacles, for having erected so many schools, and for the good discipline manifested in them, in order that all this may tend to the formation of the character of American youth, and that nothing shall prove prejudicial to their moral and religious interests."

It is to be hoped that he may continue to visit the public schools till convinced that parochial schools are not needed in the United States.

Contributed Articles.

THE SAFEST INVESTMENT.

"The most comprehensive British Blue Book report ever made, reviewing some 20,000 foundations, new and centuries old, shows that of all the great charities, higher education has proven safest, wisest, and best. First, because the superior integrity and ability of the guardians who consented to administer such funds, the intelligence and gratitude of those aided by them, and the strong interest and resulting publicity, all combined to hold them perpetually truest to the spirit of the founders; and, secondly, because in improving higher education all other good causes are most effectively aided."

These words of President Hall, in the April *Forum*, should attract the attention of our people of wealth who are looking for ways in which to invest money that it may do good in all coming time. We believe that a careful investigation of invested funds in America would lead to the same conclusion. Educational funds are not dissipated by rash investments; they are not squandered by mismanagement; they are not lost by dishonesty; they are faithfully administered according to the wish or will of the donors.

Moreover, higher educational work must be permanent, or rather perpetual. Other forms of work may cease with changed conditions, but as long as children are born and new generations of youth grow up, education must go on, and educational institutions do their work. In the old world wars and revolutions have overturned states, society has been reconstructed, and even the dominant form of religion changed, but the old educational foundations stand, and only seem to root the deeper amid the whirlwinds of change. As education is to be more highly appreciated in the coming centuries of advancing civilization, so will educational funds be more highly appreciated and more carefully protected. What can be safer than The American University, with its Board of Trustees of fifty royal Christian men working under a charter granted by Congress, and watched by the united Methodists of America, and, indeed, by all patriotic citizens whose eyes will ever turn toward the capital of their country.

UNIVERSITY MOVEMENT.

President G. Stanley Hall has given us some valuable thoughts and facts on Universities and Their Work in the last two numbers of the *Forum*. We should be glad to reprint them entire if it were possible. We advise our readers to secure both numbers of the *Forum* and read the articles. Under the above heading we desire to call attention to some of the movements President Hall delineates.

The first movement is the changes in the course of study. This is not new, but is still going forward. It is

not very long ago that one college course was the procreant bed of every student; now to the old A. B. and A. M. there have been added, according to Mr. Thomas, fifty-three other degrees," and "the elective system is still pushed by its chief apostle." With the development of universities proper, this tendency must still increase. It must rule in the training of specialists.

The second movement follows the first most naturally, and may be termed the *university* movement. This is as recent as 1876 in this country, according to President Hall, who passes by the launching of Boston University with its professional departments and school of all sciences as not meeting his ideal. He finds the epoch of this movement in the opening of Johns Hopkins University. Its keynote is quality, not quantity. "A few subjects only at first, but those basal; a few professors, but men of marked and tried power * * * twenty \$500 fellowships for select graduates; stress laid upon research"—these and other features were to mark the *postgraduate* work. The next step in this movement was Clarke University's "dispensing at first with all undergraduate work. Instead of mass teaching, individual work in the laboratory and seminary takes precedence." In this line he speaks of the Catholic University as *postgraduate* only, and of the graduate school of original scientific research in the Chicago University. His far-seeing eye does not fail to discover the rare advantages of Washington for this purely *university* or *postgraduate* movement, and he says, "it is not strange that the Methodist Church, with its forty-nine colleges (not including the sixteen Southern Methodist Episcopal colleges), should, like the Catholics, have chosen Washington, which already had two universities, as the location for its academic keystone."

This *university* movement is but begun in America. It does not yet meet the demand for *postgraduate* facilities, "or 411 American students would not be found, as they were last year, in the nine Prussian universities." The old world is ahead of us in this movement. In Germany, Strassburg, Kiel, and Breslau are rebuilt or reconstructed, while "in Berlin a series of magnificent university buildings have been erected, culminating in the great technical school, where \$2,300,000 was put into one building, close to the *Reichs-Anstalt* * * * costing \$1,000,000 more." "Vienna has erected the most expensive single university building in the world, costing nearly \$4,000,000; and now the Medical Department there hopes for another no less costly." France, too, has been engaged in the work of reconstruction demanded by this world-wide *university* movement, as seen in her special schools and in "the magnificent building of the new Sorbonne, not yet complete, but estimated to cost not less than \$3,200,000." Italy, Holland, Sweden, Russia, Greece, Japan, and Great Britain are moving also. At Oxford and Cambridge the university is gaining on the colleges, and new opportunities are being given for *postgraduate* work.

Still other movements or elements in the general upward movement are discussed, but we stop here for the present. This *university* movement demands attention now. It is one of the problems of the day. States may strive to meet it if State and Church are to be joined. Individuals may undertake to meet it with private institutions and endowments if individualism is to be supreme. But if the Christian Church in this free land is to guide or even influence this highest movement in the educational life, she must build and equip universities

for professional study, for training specialists, and for original research. It must be done speedily. Nowhere do demand and opportunity speak more conjointly and emphatically to Christian men of wealth than in The American University, now being founded at Washington, D. C. It is a part of a world-wide movement created by a world-wide demand, and located amid the immense accumulations of this Capital City, it has the opportunity of meeting the demand with comparatively few millions of dollars. The call of Bishop Hurst for \$10,000,000 ought to be answered quickly.

The erection of buildings for a great University, at Washington, ought not to be delayed, when so many millions are going into University buildings in other capital cities. B.

A LARGE IDEAL.

Men fail at opposite extremes in life. Some have no ideality, no wings. Their feet never leave the earth; their vision never sweeps the sky. They are blind to opportunities; they never hear the voice of inspiration.

On the other hand, there are idealists whose wings are never weary; whose eyes never seek the substantial; whose feet never touch the earth. Their habitation is airy nothing and their delight a large vacuity. They dream a dream that knows no waking.

The really successful man must combine the two. He must have ideals, he must have the philosopher's stone that turns them into realities. This is the line of all progress in the world. When these two elements are combined, the larger the ideal the larger the success. No great speech is made, deed done, or life lived without a great ideal.

Never were so large ideals filling human brains and being changed to realities as in the educational world to-day. The word *university* has become a new one by the larger ideals that have taken possession of it. These ideals are transforming the old realities. The words of ex-President A. D. White are even more true to-day than when penned:

"Just as the material demands of this wonderful time have created vast hotels, steamships, and railway systems, so the moral and intellectual demands are creating great universities. One result is as natural and normal as the other; indeed, all are parts of one great demand. To go back from the great universities to the old sort of colleges would be like giving up railroads and going back to stage coaches. The gentlemen who propose to meet this demand in education by colleges and universities no better than the best equipped of thirty years ago are like men who should offer skiffs to persons wishing to cross the Atlantic, or gigs to those wishing to visit California."

Mrs. D. Hays Agnew has given \$25,000 to the Hospital of the University of Pennsylvania, and the trustees last week voted to name the new wing of the institution the "D. Hays Agnew Wing."

Selected.

WHAT WEALTHY MEN GIVE TO SCHOOLS.

In 1847 Abbott Lawrence gave \$50,000 to Harvard, and it was then said to be the largest amount ever given at one time during the lifetime of the donor to any public institution in America. The Reconstruction period, so fitly consummated at Chicago last year, is a marked epoch for college endowments. Between the years of 1860 and 1882 the colleges of this country gained in wealth an amount larger than their entire valuation in 1859. More than \$50,000,000 were bestowed in these twenty-two years upon our educational establishments, and \$35,000,000 of this amount were donated in the ten years between 1870-'80. Johns Hopkins endowed with \$3,000,000 the University bearing his name. Mrs. Valeria G. Stone, of Massachusetts, distributed more than \$1,000,000 among various institutions of learning. Asa Packer founded Lehigh University, and Ezra Cornell the university at Ithaca, N. Y., which bears his name. The names of Matthew Vassar, Sophia Smith and Henry F. Durant demand more than a passing mention. Each of these pioneers in the cause of higher education for women made their beliefs permanent by founding female colleges, and Henry W. Sage provided for special instruction for women in Cornell University. But the ideas of generosity have widened with the process of the suns, and the last ten years have witnessed a far more liberal endowment of educational centers than the period just referred to.

Mr. Rockefeller's original offer of \$600,000 toward the resuscitation of the defunct Chicago University was made in 1886, and the total sum he chiefly, and others in lesser amounts since bestowed, is more than \$7,000,000. Mr. C. T. Yerkes gave \$500,000 for the observatory and telescope, Mr. Marshall Field gave the university lands, and another \$500,000 was bequeathed from the estate of William B. Ogden for the School of Science, the Reynolds estate adding \$250,000 more. Here, then, and at Palo Alto also, is a university practically made to order. Senator Stanford's gifts to Palo Alto amount to more than \$10,000,000. By the gigantic power of wealth wisely used he has created the Oxford or Yale of the West upon his fruit ranch. The quiet man of affairs has put all future civilization under bonds of obligation to him for this singularly noble achievement, the phenomenal gift of all giving. Mr. James J. Hill, of St. Paul, has given \$1,000,000 for the erection of a Roman theological seminary beneath the superintendence of his friend, Archbishop Ireland. Mr. J. S. Pillsbury presented the city of Minneapolis with \$150,000 for a science hall in its university. Mr. George A. Pillsbury gave another \$150,000 toward the Pillsbury Academy. Mr. James Lick provided the observatory with its mammoth telescope, situated at Mt. Hamilton (California), and named in honor of the donor. Dr. Cogswell bestowed \$1,000 for the San Francisco Polytechnic School. Miss Mary E. Garrett's check for \$350,000 was recently handed to the trustees of Johns Hopkins to complete the sum necessary to open to women the medical department of that university.

The Girard College at Philadelphia has been too long before the American public to need any special intro-

duction here. It cost nearly \$2,000,000 to found this institution. The Drexel Institute is the latest descendant of Girard, and perhaps it is the wisest and best of Philadelphia's many philanthropies. The various departments of Pennsylvania University owe a great deal of their existence and efficiency to prominent Philadelphians. Mr. Lenning, for example, gave \$750,000 to the scientific school, and the late Mr. George Pepper left more than \$1,000,000 to the schools and charities of the city. The Western Reserve University has founded a medical college with \$250,000 given for that purpose by Mr. J. L. Wood, of Cleveland, Ohio. William F. Clark followed with \$100,000 for the Woman's College of the same institution. The Cincinnati University was the gift of Mr. McMicken, who bequeathed almost \$1,000,000 for its support. Mr. Armour has given his institute to Chicago, a worthy peer of the Pratt Institute in Brooklyn and the Cooper Union in New York. Mr. Armour's gift will have cost him about \$3,000,000 by the time it completes its founder's purpose. Bishop Hurst's scheme for a National (The American) University at Washington is well under way. A donation of \$100,000 is just reported. It should be observed that the monetary estimate of these numberless endowments is only a partial one; the contagion of generosity has caused a leading offer such as Mr. Rockefeller's to Chicago, to become the precursor of far greater sums. The timeliness, the healthy spirit, the sanity of view, which has prompted such donations is even more admirable than their magnitude.—Rev. S. P. Cadman, in the *Chautauquan* for March.

CHRISTIAN PROFESSORS IN CHRISTIAN UNIVERSITIES.

The Baptists, at the annual meeting of their Education Society, at Saratoga, have been discussing the danger to religion from the secularization of education. What was said there has elicited considerable discussion in the secular press. President Harper, of Chicago University, took part in the discussion, and proposed as a remedy "for the secular instruction that is unchristianizing the universities," that the Baptists should allow no agnostic to occupy a professor's chair. The *Sun* asks whether such a prohibition would not deprive Baptist colleges of many men of highest scientific distinction.

No doubt it would deprive them of some, but not of all. No person not a member of the church, or avowedly a believer in the divine origin of Christianity, should occupy a professor's chair in any college or university supported by a Christian communion, unless it be in certain technical schools, and not then if the professor be what, for the want of a better phrase, we will call a dogmatic agnostic. It is contrary to the fact that all men of very high scientific eminence are avowed agnostics. That those of whom nothing is known as to their religious sentiments are not agnostics, no one can prove. That some are not only avowed agnostics, but positive opponents of Christianity, the public is well aware. But every year the number of scientific men who have the ability to distinguish the spheres of science and religion increases.

A distinction should be made between a man having sufficient of the scientific spirit and mental furnishing to

expound and illustrate his specialty far beyond the requirements of a university course, and one who has attained eminence as an original discoverer. The number of the latter is small, while of those who confirm the discoveries of this smaller number, and point the way to the enlargement of the domain of science, so that the student, according to his genius, will be prepared for self-development, the number is large.

A preposterous spectacle it is indeed when a denomination establishes a college or university to promote Christian education, and fills its chairs with professors who by their private conversations, class-room implications, and intellectual bent and spirit, as well as their known connections, are continually counteracting the Christian influence of the institution.

Our contemporary philosophizes upon the distinction between religion and science: "A Baptist chemist or physicist is no different from a Presbyterian or an Episcopalian, so far as concerns his chemistry or physics." Religious dogma deals with the illimitable. Science is not science unless it keeps within the bounds of the demonstrable. As science, it is necessarily agnostic, in the sense that it accepts nothing which cannot be proved naturally."

While the Baptist chemist differs not from the Presbyterian or the agnostic, each is a center of moral and religious influence, and this in a denominational or primarily Christian institution is of vital importance. There would be no reason for the Baptists to establish a university all of whose professors should be Presbyterians; for in that case those students might as well attend the established Presbyterian universities. But between Baptist, Episcopalian, or Presbyterian chemists and the agnostic chemist, though there should be no difference with respect to chemistry, there is so great a difference as respects religious influence that the agnostic, under the effect of his mental condition, is liable continually to obtrude beyond the proper sphere of science by disparaging religion because it is not demonstrable in the scientific sense.

A phenomenon worthy the study of the *San's* writer and of other thinkers is that the irreligious or avowedly agnostic scientist is fully as likely to force himself offensively into the sphere of Religion, casting contempt upon it and its votaries because they believe without his sort of demonstration, as the most superstitious religionist is to speak contemptuously of science, and to attempt to explain natural phenomena by passages from the Bible and gauzy theories spun from transcendental ideas.

Colleges and universities need men competent and determined "to follow truth where'er it leads the way," but not in the name of science beyond the possible application of its principles. Professor Huxley might teach some on this head, for he says emphatically that the operation of a personal Creator is beyond the cognizance of science.—*Christian Advocate*.

The will of Mrs. Mary Hemenway, of Milton, Mass., provides that the income of an estate of \$15,000,000 shall be used for educational purposes.

By the will of the late R. S. Ely, Yale University receives between \$50,000 and \$100,000.

Educational Notes.

THE NEW Welsh University contains a feature in its charter which involves a larger and more generous recognition of the intellectual and educational capacities and possibilities of women than any other institution that we can now recall. It stands, at least, in this respect, apart from all other British Universities. Its charter says:

Women shall be eligible equally with men for admittance to any degree which the university is by this our charter authorized to confer. Every office hereby created in the university and the membership of every authority hereby constituted shall be open to women equally with men.—*Central Christian Advocate*.

THERE is an exceedingly able woman in Boston who can report a speech delivered rapidly in German, she first translating the speech into English and then recording it in stenographic characters. Such celerity of thought is only approached by the tradition respecting Kossuth, who is said to have thought in Hungarian, translated into Latin, and retranslated and uttered at a rapid rate the choicest English, born of a study of the Bible and Shakespeare.—*Boston Congregationalist*.

PRESIDENT C. F. THIRING, writing in the *May Forum* of "President Eliot's Twenty-five Years of Service," says: "President Eliot, like his predecessor, Quincy, regards the administration of a university as a business. He is not, like Hopkins, first a great teacher, and, secondly, an administrator. He is not, like Porter, of Yale, who was his contemporary in office for fifteen years, first an author, and, secondly, an administrator. Nor is he, like Woolsey, first a scholar, and, secondly, an administrator. Rather, he is first and last and only a university administrator." He illustrates the fact of making such presidency a business."

IN PERSON Professor Harnack is rather tall and of striking appearance, with large and very bright eyes, brown hair, nervous temperament, genial, but keen and witty, and often sarcastic. He is the most popular lecturer in the theological faculty in Berlin, and, indeed, in Germany. His lecture room, one of the largest in the university, is crowded. He lectures with only a few notes to guide him, and speaks with all the fervor and enthusiasm of a political orator. He has a charming and highly accomplished wife, and several attractive children. He is a man of genuine piety and thorough scholarship, and is the best type of a German evangelical thinker; and, despite his youth (42 years of age), is an acknowledged leader among German theologians.—*Outlook*.

THE EGYPTIAN GOVERNMENT has recently set apart \$750,000 to erect a fire-proof building for the rare collection of Egyptian antiquities which have been heretofore kept in an old wooden building. It is hoped the priceless treasures, the most valuable of all the relics of that interesting land, may be providentially spared till the new building is complete.

THE complete list of the educational institutions of the M. E. Church shows that there are 202 with over 43,000 students, and property and endowments valued at \$26,583,000, and an annual income of \$1,810,171.

FOR the purpose of extending the British Museum the government has purchased five and one half acres of ground adjoining that institution from the Duke of Bedford, for £200,000. This will give the museum a total area of fourteen and one-half acres.

THE Archduke Rainer's collection of 10,000 Egyptian papyrus documents was recently on exhibition at Vienna. These documents are written in eleven different languages and have all been deciphered and scientifically arranged. They cover a period of 2,500 years, and are said to contain evidence that printing from type was known to the Egyptians as far back as the tenth century, A. D. They were discovered at El Fayoum several years ago.

Book Notices.

[The Editor will give brief notices of such books as are appropriate to the COURIER. Copies of volumes sent for notice will be placed in the University Library.]

GLOSSA PSALTERII DAVID MAGISTRI PETRI LOMBARDI: Nuremberge, 1478.

This very old printed volume, the gift of Rev. Wm. Fotsch, is rare and valuable. It is a large quarto, of heavy paper, containing 692 pages, in very good condition. Only the title page is lost, but the body of the book contains the date and place of publication. It is a handsome text, showing the high state of perfection reached by printing at that early day, and is also illuminated by hand. While Peter Lombard's fame rests on his work in systematic theology, he wrote also a number of commentaries. We are surprised that the *Encyclopaedia Britannica* says the above work was first published in Paris in 1533, under the title "*Glossa Commentarius in Psalmos Davidis*." The editor must have been ignorant of this earlier and splendid edition. This shows its rarity and value. We are glad to note that McClintock and Strong knew of it, and mention its publication in Nuremberg in 1478.

IN OMNES PAULI APOSTOLI EPISTOLAS, ATQUE ETIA IN EPISTOLAM AD HEBRÆOS; JOANNIS CALVINI COMMENTARIUS: Joannis Crispini, Genevæ, 1557.

A rare volume of an old edition of this great work of John Calvin, in excellent condition, and ancient binding with iron clasps, appropriate to the iron decrees which the author found in these letters of Paul and riveted with such force on so large a part of the Christian Church. It is well to put this on the shelf for consultation as a relic of the past into which Calvinism is so fast receding. We only note that in the title he separates Hebrews from the Epistles of Paul, so positive was he that Paul was not the author of that wonderful letter. This also is the gift of Rev. Wm. Fotsch.

MONUMENTA SACRA INEDITA, sive Reliquiæ Antiquissimæ Textus Novi Testamenti Græci ex novem plus mille annorum coticibus per Europam dispersis, eruit atque edidit, CONSTANTIUS TISCHENDORF: Lipsiæ, 1836.

This valuable volume is one of the earlier publications of this most prominent scholar in the department of New Testament palaeography. It contains exact copies of the Codex Tischendorfianus (Evang. H); Codicis Purpurei (Evang. I, N, and P); Codex Parisiensis Regius, N° 314 (Evang. W); Codex Parisiensis Regius, N° 62 (Evang. L); Excerpto ex Octatenchi Codici Coslinianus (F. A. sive Actorum F); Codex Vaticanus Apocrypheus, olim Co. Basilianus N° 105 (Apocryphos B). Though later works of Tischendorf supplant this, it is of great value in following the steps by which he reached his final results and his place of authority among scholars. Special thanks are due Rev. Wm. Fotsch, of Brighton, Illinois, for these three valuable books.

METHODIST REVIEW, 75 volumes, published by the Book Concern of the Methodist Episcopal Church.

This splendid set of books is a gift from the Rev. A. B. Sanford, D. D., now the assistant editor. The Review began as the Methodist Magazine in a comparatively humble way in the year 1819. At first it made no claim to originality in its work, but was a "Miscellany," to use its own words. Its articles were largely selections. But frequent changes in its make-up are noticeable, as the agents, and later the editors, changed. Some ten or twelve of the earlier volumes of this set were the property of Wilbur Fisk and have his autograph in them. They contain also some marginal notes in his handwriting.

The numbers for nearly fifty years are made up of some of the best work done by American Methodist scholars. They are a thesaurus of valuable discussions in the theology and polity of the Church. Nor are they without interest to those who are in-

terested in purely educational questions. They had much to do with bringing the Church to its present interest in collegiate and university work. Here are recorded inaugural and educational addresses by Bascom, Fisk, and Edmund S. Jones. The impress of Peck, McClintock, Wheldon, and Curry are forever stamped on Methodism through these pages that yet scintillate with their thought.

Nor are the latest numbers under the literary Kelley showing less of virility, or exerting less influence. They are broader in scope, as the needs of studious and thoughtful readers demand. Their scholarship and originality are a full century beyond the earlier volumes.

THE BIRTH OF THE REPUBLIC, by Daniel R. Goodloe: Belford, Clarke & Co., publishers.

This volume of 400 pages is a convenient compilation of a large amount of material connected with the Revolution from 1765 to 1776, to which is added the more familiar documents pertaining to the organization of our Government. Much of the material here bound together could only otherwise be found by searching through national and colonial histories and historical collections, American archives, and journals and proceedings of the British Parliament of that period. Its value to the student of early United States history is evident.

SIR FRANCIS BACON'S CIPHER STORY, discovered and deciphered by Orville W. Owen, M. D.: Howard Publishing Co.

The fame of Shakespeare is safe, and so is that of Sir Francis Bacon. Otherwise we might hesitate to circulate the knowledge of these two volumes, or put them in our library for future reference. They are an interesting example of what some ingenuity and persistent work can make out of well-known literature.

The theory that Dr. Owen aims to prove will be more difficult of confirmation than some working hypotheses of recent scientists. That Francis Bacon was son of Elizabeth; that he composed all the plays of Shakespeare, Marlow, Green, and Peele, the Anatomy of Melancholy by Burton, and the works of Spenser; that he wove through them a cipher story which Owen has now deciphered—these are only a few of the things we are asked to believe!

SOCIOLOGY AND ITS APPLICATIONS; a syllabus or topical analysis, by Prof. James Riley Weaver, De Pauw University.

This is an attempt to blaze a path, not make a highway, through the wilderness that the new science of sociology is attempting to explore. It is certainly suggestive, and would not only be helpful to the students in the professor's classes, but to many who are attempting to study alone either the science of sociology, or the movement known as socialism, or the so-called social problems in their more detached forms.

THE discovery of a Dante manuscript is heralded from the Vatican Library. Father Ceza Luzzi, the sub-librarian, while examining some papers which had been mislabeled for many years, came upon a Codex of Dante's *Divina Commedia*, beautifully illustrated in miniature, and bearing the date 1450.—*Catholic Mirror*.

TO BE placed in the British museum are 1,000 big books wherein are bound up the 5,020 native volumes of the wonderful Chinese encyclopaedia. This is the only perfect set in Europe, and even in China there are not more than five copies of this edition.

THE General Theological Seminary of the Protestant Episcopal Church has come into the possession of the largest collection of Latin Bibles in the world, consisting of 543 editions in 1,364 volumes. One of the most interesting is the *Servetus* edition of 1542, which was so vigorously prohibited and suppressed that all the copies obtainable were burned with the author.—*New York Christian Advocate*.

Notes.

BENEVOLENT.

By the will of the late Mrs. Eliza A. Clark, of Cleveland, Ohio, widow of James F. Clark, \$100,000 are bequeathed to Lakeside Hospital, \$75,000 to the Old Stone Church, and \$10,000 each to the Invalids' Home and the Board of Home Missions of the Presbyterian Church. Lakeside Hospital is made residuary legatee after a large number of personal bequests are made. During her life Mrs. Clark, by a gift of \$100,000, established Clark Hall for the College for Women of Western Reserve University.

Edward Reed, aged seventy-two, died at his home on Prospect Street, Orange, N. J., recently. The deceased, who left an estate worth \$2,000,000, bequeathed half of it to charitable institutions. He was a war veteran, and leaves a widow but no children.

It is said that Phillip D. Armour, of Chicago, has decided to give \$500,000 to San Francisco for the establishment of a manual training school.

Ohio Wesleyan University has lately received bequests to the amount of \$35,000.

By the will of the late Sarah Parker, Radcliffe College receives \$150,000.

THERE are enough women university graduates in London to have formed a club. It is simply called the Women's University Club.

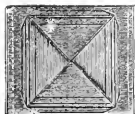

SIXTEEN STATES do not accept a medical diploma as a license for the practice of medicine, but require an independent State examination. In many of these States the trouble is that there is great laxness in granting the power to confer degrees or diplomas.

A GALLERY of religions, long in preparation, has been opened in the British Museum. It exhibits the lowest forms of fetish worship and marks the ascending gradations through Buddhism, Mohammedanism, Abyssinian Christianity, Mediaeval Christianity, and the Greek, Roman Catholic and Protestant types of the Christian faith. Its gradations are also chronological, bringing in the ancient religions of Western Asia and Northern Africa—*The Interior*.

It is reported that a copy, in excellent condition, of Poe's "Tamerlane" (1827), one of the rarest books in the world, has recently been discovered, and is held at \$1,625. It is said to have been picked up in a second-hand bookstore in Boston sixty years ago, and to have remained in the possession of the purchaser ever since. Another copy was sold privately a year or two ago for \$2,500.—*New York Critic*.

AT LAST the order has been given authorizing the Palestine Exploration Society to resume excavations in Jerusalem and extending that privilege for at least two years. The work will be directed by Mr. F. J. Bliss. Results valuable to art and ecclesiastical lore may confidently be expected, and the public needs but to give generously in order that the work may be performed.—*Congregationalist*.

THE National Educational Association will hold its annual convention at Asbury Park, July 6-13.

Proposed Buildings and Endowments of the American University.

ADMINISTRATION HALL.

This should combine Library and Chapel; or Library and Chapel might be detached, the whole forming one group. The Administration Hall should contain the general offices for the management of all Departments, and also a Senate Chamber, as an auditorium for the general assembly purposes of the University.

HALL OF SCIENCE.

For the following Departments of Study.

MATHEMATICS, CHEMISTRY, PHYSICS, BIOLOGY.

HALL OF PHILOSOPHY.

Departments.

METAPHYSICS AND HISTORY OF PHILOSOPHY, ARCHEOLOGY,
 THEISM, COMPARATIVE RELIGION, PSYCHOLOGY, LOGIC AND
 ETHICS, SOCIOLOGY AND ECONOMICS, CIVICS.

HALL OF LAW.

HALL OF HISTORY.

Departments.

AMERICAN, EUROPEAN (west and north), MEDITERRANEAN,
 ORIENTAL.

HALL OF LANGUAGES AND LITERATURE.

Departments.

ORIENTAL AND SEMITIC, GREEK, LATIN, ROMANCE, GER-
 MANIC, ENGLISH.

HALL OF MEDICINE.

In addition to these buildings there will be needed special endowments for instruction in the various Halls classified under the general names of Professorships, Lectureships, Fellowships, and Studentships. It is preferred, unless there be special reasons to the contrary, that gifts of both Halls and Endowments should bear the names of the donors, or of such friends, living or deceased, as they may designate.

The University grounds comprise a tract of nearly ninety acres, situated on the northwest heights of Washington. This space furnishes commanding sites for all the above buildings, with such others as the future may prove to be necessary for the full development of the University. The arrangement of the grounds is under the care of Mr. Frederick Law Olmsted, who will advise with reference to the location of the Halls.

Bishop Simpson and the University.

It is well understood that Bishop Simpson, with his almost prophetic vision, saw the rising of a great university in Washington as the crown and completion of our educational system. His great heart could not keep the vision to itself. He wanted to put his hand to the work. Again and again the idea would find expression on his eloquent lips. The Rev. G. S. Kerr, of the Philadelphia Conference, sends us the following from the Bishop's closing speech before the Pennsylvania Methodist Convention in October, 1870:

"I should like if we could plan something vastly greater than we have yet had, * * * and endow with a greater amount of means. I confess frankly to you that there has floated through my mind somehow in the past, and I dream now, that somewhere * * * will yet spring up a realization of the thoughts that rested in the minds of Coke and Asbury when they met together to plant the first Methodist college in the United States.

"And I have sometimes thought that possibly before the century closes, from the ashes of old Abingdon, or at some point around it, will rise, with more than its

former glory, the institution which shall be a credit to our Methodism, and realize the thought and prayer of the old fathers of the church. I believe there is money enough, and I can scarcely drive away the conviction that the prayers and efforts of these old fathers are not to be set aside, * * * but that, in renewed form, though years have passed and generations have gone, old thoughts will yet germinate and bring forth fruit, and that our children will yet sit under the shadow of these institutions which yet shall grace our land."

Surely his ideas are germinating and already bearing fruit. Before this century closes his vision will be a reality. We sometimes wish his voice of rare eloquence could now plead for its immediate and complete fulfillment.

But he, being dead, yet speaketh. Many hearts are moved; many minds are stirred; and soon the vision of faith, the conviction of things not seen, will become reality through the liberality of those whose faith will be shown by their works.

Establishing a University.

President D. C. Gilman, of Johns Hopkins University, wrote whereof he knows when he penned these words: "To be concerned in the establishment and development of a university is one of the noblest and most important tasks ever imposed on a community or on a set of men. It is an undertaking which calls for the exercise of the utmost care, for combination, co-operation, liberality, inquiry, patience, reticence, exertion, and never-ceasing watchfulness. It involves perplexities, delays, risks. Mistakes can not possibly be avoided; heavy responsibility is never absent; but history and experience light up the problem; hope and faith give animation to the builders when they are weary and depressed."

Perhaps there is nothing much more trying to the workers in such an enterprise, and to the community, the public that is interested in it, than the fact that the

latter can not always be taken fully into the confidence of the former.

There are tasks that require months of "inquiry, patience, reticence, exertion, and never-ceasing watchfulness," of which the public knows nothing till the announcement of completion is made. But the inner progressive steps, the out-of-sight but hopeful gains, that are known to the workers, give a courage and hope that enable them to toil on amid apparent delays. The moment of announced victory is a glad one to which mind and heart, orator and poet, often revert, but there are always more important moments and movements in the long campaign of faithful service that make possible the final victory.

Our Trustees.

The Trustees of the American University are active, busy men in many directions. Bishops Hurst and Newman are in Europe. Bishops Bowman and Fowler lately assisted in the dedication of the new auditorium at Ocean Grove. Bishop Vincent is the life of Chautauqua, and Bishop Wilson is visiting missions in South America.

The Hon. Jacob Tume, who has just passed his 84th birthday, has erected an institute at Port Deposit at a cost of \$60,000, for which he has set apart an endowment of \$750,000. Mr. John E. Andrus has expended \$27,000 on Wesleyan University this past year, and recently gave \$5,000 towards the auditorium at Ocean Grove. Chaplain McCabe has given \$10,000 to the Church Extension Society on annuity, and Mr. John S. Huyler has given to Syracuse University. Of another's gift we have spoken elsewhere. Several others have made gifts and pledges to the University of which we are not at liberty to speak at this present time.

We feel deeply the loss of Mr. Benjamin Charlton, of Washington, and would express our great sympathy with Mrs. Somers in the loss of her mother, Mrs. Eddy, mother also of the eloquent Missionary Secretary.

Long Range.

A quarterly issue necessitates our looking at many things at long range, and prevents our mentioning many things of interest in the educational world until they are far past. Otherwise we would liked to have noticed the Congress on University Extension, at London University; the centennial of Bowdoin College; the semi-centennial of the Ohio Wesleyan University; the in-

auguration of Dr. Day as Chancellor of Syracuse University; the National Educational Association meeting; the report of the Educational Committee of the New York Constitutional Convention against sectarian school appropriations; the deaths of Sir Austen Henry Layard, the orientalist, and of Prof. James Strong, author of *Cyclopaedia and Concordance*; the meeting of the American Association for the Advancement of Science; and the Congress of Religions, at Long Beach, L. I., under the auspices of the American Society of Comparative Religion.

Sociology.

Social questions are pressing upon the minds of students, of legislators, and, indeed, of all thoughtful persons. What interrogation points are the great American Railway Union strike; the as-assassination of President Carnot; the legislation against anarchists; the effects of the new tariff legislation on labor; the need of better control of immigration; the arraignment of Prof. Ely; the end of the Coxe fiasco; the strike in New England against reduction of wages; the general railway situation; the rising demand in the South and West for free silver and State banks; the increasing army of the unemployed; the rapid growth of the American Protective Association; the fearful increase of lynching in later years; the difficulties of agriculture; the massing of population in cities. But why extend the list? All these, and many more, are only phenomena that with united voice demand a new study of society—a Sociology that will be both truly scientific and practically helpful. We are glad to note that a number of men are at work on the problem.

Benjamin Charlton.

Benjamin Charlton, a trustee of the American University, passed to the reward of the faithful on June 12, 1894. He is the second trustee who has died in office. Brother Charlton was a good man, a member of the Metropolitan Methodist Episcopal Church, a well-known citizen of Washington, successful in the management of a large business. He was one of the liberal givers in his church; gave \$5,000 toward the land fund of the University, and we feel quite sure would have given more largely to the enterprise had not death intervened. His name should have been permanently connected with some building or endowment.

*Progress.***RECENT GIFTS.**

THE ELMIRA DISTRICT, of the Central New York Conference, Epworth League Convention, at its session in Canton, Pa., June 7 and 8, passed enthusiastic resolutions of support of the American University. But what is better still, it took pledges on the spot toward the building of an Epworth League Hall, and in a few minutes secured \$505, three Chapters pledging one half this amount. Rev. J. Woodruff is Presiding Elder and Rev. Dr. E. M. Mills President of the League for the District. What other districts will follow this example?

A WELL-KNOWN and liberal layman of New York City has agreed to give \$10,000 toward a building for the University. Who will join him in a similar amount for this good purpose?

A WEALTHY and liberal manufacturer of New England has recently sent his check to the Treasurer for \$5,000 in addition to \$10,000 previously given. There is more to follow.

A SUPERANNUATED MINISTER has just sent to our office a legal agreement to give the University \$5,000 for the endowment of an alcove in the library, and made the first payment on it. The alcove is to bear the names of himself and wife. Are there not others who would like in some similar way to link their names with this great enterprise?

MR. D. D. WHITNEY, ex-Mayor of Brooklyn, N. Y., has recently sent us his check for \$100. Are there not one thousand other men or women, heavily pressed with church burdens at home as we know this good man is, who can do the same for the University?

AGAIN WE ACKNOWLEDGE the receipt of *books*, which are noticed more particularly in the column of Book Notices. While some of them are old, they are all in good condition and may some day be just what some worker will want for reference. The six volumes of Channing's Works are from Rev. Stephen Cushing, of the New England Conference. The twenty-two volumes that follow in the list are from the Rev. J. E. Holmes, of Mamaroneck, New York East Conference. The others are from the publishers or authors. We desire to thankfully acknowledge, also, a package of reports, almost complete, of all the benevolent societies of the Methodist Episcopal Church, from Rev. Joseph C. Thomas, of the New York East Conference, and Group No. 5 of the series of Albertype reproductions of the photographs of fifty prominent contributors to magazines of the day from *Public Opinion*, one of the most valuable publications that comes to our office.

THE ends of the earth agree. From amid China's 400,000,000 heathen, and the war and rumors of war that distract the celestials, comes a gift of \$100 towards the Asbury Memorial Hall from Rev. Marcus L. Taft. He is now appealing for money to buy a heathen temple that stands by his own college, and offers to send the idol, therein worshipped, to begin a Museum of Religion in the American University. Help him buy the temple; help us to get control of that god. We will put him to good use.

THE amount now pledged by ministers for the Asbury Memorial Hall is \$68,000. Of this amount \$6,458.90 have been paid into the treasury of the University. This monument to the apostle of American Methodism will form a beautiful and significant part in our group of buildings.

BUILDINGS.

Our friends will be anxious to know what progress is being made in this direction. The preparatory work is in a good stage of advancement. There lies by my side a roll containing the first study of the grounds by our landscape architects, Frederick Law Olmsted & Co. Already it shows the great possibilities of the site, as roadways, walks, lawns, groves, shrubbery, and buildings assume their places.

Here hangs before me in the office a study for the Administration Hall; a fine-looking structure, 240 feet in length, 100 feet deep in its central part, and 80 feet deep at either end. It is to be practically three stories high, with the central front rising still higher, surmounted by a tower. It is to be of solid stone. Within are offices, lecture-rooms, Seminars, a senate room seating 700, and many other facilities for work.

The final approval of these is yet to come. There may be, doubtless will be, some minor changes, but they indicate what the reality is soon to be.

Many ears are listening to hear the clink of the spade in the gravelly soil as it descends to turn the first sod, and the stroke of the hammer that shall fix the cornerstone for the coming centuries. Some near still day the music will ring forth. Will you, reader, help to hasten it?

We call attention to the advertisement of the American University Heights. We are told lots are selling, and improvements are likely to be begun soon. The University is not connected with this enterprise in any way. It is not selling any ground, but is interested in the improvement of that part of the city.

Needs.

That Telescope Lens.

We would call attention again to the offer of the Rev. John Peate, D. D., as presented on another page. He offers to prepare for a telescope of the American University "the largest lens in the world," if the rough glass and the material for doing the grinding are furnished him. The time through which the offer was to remain open will soon be past. Read the article headed "The Rev. John Peate, D. D., and the University Telescope." The sum necessary to secure this gift is not large. Let us hear from friends of the University who wish to have Dr. Peate go to work.

The Hall of History.

This is felt to be one of the needs of our great enterprise just now. The funds are growing in other directions. There are prospects of building on other lines. The development of landscape and architectural plans is approaching completion. It is the wish of all concerned that this hall might be begun this autumn. We know that our friends who have means at command are interested to see this good work begin. The building for the Department of History, in order that it may house all the facilities requisite for broad and most thorough work, and provide offices, recitation rooms, lecture rooms, rooms for *Seminär* and individual work, with all the latest appliances, must cost at least \$100,000. Where is the friend who will become responsible for this building?

What a splendid memorial it would be of some deceased friend, as it would stand there on the heights above the National Capital, sending out its influence through work done and students trained for generations to come! It will be done and that soon. The question for you is, will you do it?

There Are Many.

In the paragraphs above we refer to two special needs that are now pressing upon us. Were they all we must have, our enterprise would soon be fairly under way. There is, on another page of this paper, an outline of a scheme of halls that will suggest one phase of our larger needs. They must all be built before the American University can be said to be really launched. Then there must be endowment of a large number of professorships, fellowships, and studentships. "As President Coulter has so well shown, student fees are and must be but a small part of the income of any true University, any real 'workshop of the Holy Ghost.'" Dr. Barker

tells us in another column that it costs three universities from \$700 to \$300 annually for each student in their halls. Most of the students of worth in institutions of learning, and especially those who press their way into special studies and give to the world the fruits of original research, are comparatively poor. If they had to pay what an education really costs, they could never obtain it.

Some persons of wealth speak of desiring to help the poorer struggling classes of the day rather than to give to rich corporations. We have few educational institutions that come under this latter head. But even if all did, there could not be found a better chance to help the struggling, an opportunity where the same money will afford more real and needed help, than among the young men and women who are here striving to rise to usefulness in the world.

Buildings, equipments, endowments of a university will go on helping the struggling for all time to come. On these the education of the future depends—and on the education furnished depend the manhood and womanhood of the future—and on these, the civilization in which all classes must find their place.

So with these limitless needs of the American University we appeal to you, reader, for the help you are able to give, whatever it may be. Any amount from \$5,000 to \$1,000,000 can be set apart for a special purpose to bear the donor's name.

The late John Crerar, of Chicago, left \$1,000,000 for religious and charitable organizations, as follows: Second Presbyterian Church, \$108,750; Second Presbyterian Mission Schools, \$108,750; Abraham Lincoln Monument Fund, \$108,750; Presbyterian League of Chicago, \$50,000; Young Men's Christian Association, \$50,000; Old People's Home, \$50,000; Chicago Nursery and Half-Orphan Asylum, \$50,000; Illinois Training School for Nurses, \$50,000; Chicago Relief and Aid Society, \$50,000; American Sunday-School Union, \$50,000; Chicago Orphan Asylum, \$50,000; Chicago Home for the Friendless, \$50,000; Chicago Manual Training School, \$50,000; Chicago Bible Society, \$50,000; Scotch Presbyterian Church of New York, \$25,000; Presbyterian Hospital, \$25,000; St. Luke's Hospital, \$25,000; Chicago Historical Society, \$25,000; St. Andrew's Society of New York State, \$10,000. The residue of the estate is held in trust by the executors to be expended in erecting a building for the Crerar Public Library.—*Outlook.*

Dr. Charles E. Slocum, of Defiance, Ohio, has just given \$50,000 to the Ohio Wesleyan University to erect a library building.

Contributed Articles.

THE UNIVERSITY AND RESEARCH.

Under this title we wish to call attention to an article by President G. Stanley Hall in *The Forum* of July. We have so frequently emphasized *research* as one of the chief lines of work in the American University that we would like our friends to read carefully the whole article by President Hall. He shows that the most interesting, most characteristic, "divinest thing" in childhood is the disposition to investigate. This is the root of the spirit of research that shows itself in full power in the professor who leads his class to original work with an all-conquering enthusiasm. This is contrasted with the routine drill master, and the mere populizer of things already known. How this kind of fresh, original, creative work will fire the souls of young men, as compared with the older method of cramming the dry accumulations of the past for examination day!

This work of *research* must be, is, the soul, the spirit, the center of a university. Teaching institutions, professional schools, may be associated with it, grouped around it. They must be filled with its life. It must not be hampered with their limitations. It is this relation which "saves technical and professional schools from narrowness and dryness" in the German Universities.

"Research has always been the touchstone upon which the value of university work was tested." By this test most of our so-called universities are found wanting. They are *gymnasias* where mental powers are disciplined by doing what others have done. This work is not to be depreciated either. It is necessary. But it is not university work, and too often lacks entirely the university spirit. Some professors, though usually otherwise overworked, have found time for a little original research. Few, indeed, have led their students into co-operation with them, and so multiplied the possibilities of advance. This is to be the life, the soul, of the coming university in America. Professor and students will be an exploring party on the borders of the unknown, never lost, always finding.

President Hall well says: "The ideal university will not float down to us from the heavens like the New Jerusalem; it will not come by observation nor yet by teaching alone. Every new research requires some, though not usually great, special expenditure for construction of new apparatus and purchase of special literature, and cannot be done at institutions that 'plant but do not water,' and which must work with the wolf forever at the door. The true university is still, in Lowell's phrase, like Milton's 'tawny lion pawing to get free;'

but when it does get free it will regenerate the college and the lower school."

The President of Clark University, in this series of articles, is helping to cut the fetters of the lion. May the day soon dawn when America shall have *the* university of the world. She has the means and the men. Who will join the two at our Nation's Capital?

S.

A MUSEUM OF RELIGION.

We note with pleasure the call of Dr. Warren in *Zion's Herald* for such a museum. Two years ago we read a paper on the topic that heads this article before the American Society of Comparative Religion, in which we described the Guimet Museum, in Paris, not knowing that Dr. Warren was interested in that valuable collection. We then urged on the society mentioned the formation of such a museum in New York. Something of a collection, that would hardly assume the name museum, already exists in Philadelphia.

Twenty months ago, before we had a thought of being connected with the American University, we wrote Bishop Hurst asking why one department might not be a School of Religion with a museum of all the religions. It is strange that such a universal phase of human life that is so richly represented by collectable materials has been neglected so long. In our last number we noted that a department of religions had just been arranged in the British Museum. The material was scattered in all sorts of unexpected places when we looked for it three years ago. We found the collection at Leyden in process of rearrangement at that time.

We rejoice that there is thought on the matter, and feel with Dr. Warren that now is a favorable time for a collection representing, especially, the oriental religions. There is already in this country considerable material, held simply as curios, that would have also scientific value if given to a university.

We hope Dr. Warren's call will be heeded, and Boston soon have such a museum. Some material exists in the Smithsonian and National Museum, and we hope to see in our Capital City something better than even Paris now possesses.

B.

David Green Ormsby, of Milwaukee, died on Sunday, August 19, 1894, aged 74 years. He was a liberal giver, and was especially interested in the higher Christian education of young women. He was a prominent benefactor of Lawrence University, at Appleton, Wisconsin.

Selected.

THE REV. JOHN PEATE, D. D., AND THE UNIVERSITY TELESCOPE.

BY THE REV. R. N. STUBBS.

At the Erie Conference Bishop Hurst was startled into surprise and admiration when one of the presiding elders looked him in the face and said, "I will give the American University the largest glass in the world, provided I am supplied with the rough glass and the material with which to do the grinding."

Well he might be; and the magnitude of the promise has not yet been grasped by the friends of the University. Those who visited the White City will not forget the magnificent Yerkes telescope, said to cost one hundred thousand dollars.

The glass for one surpassing that in power John Peate promised to grind. Was it a boast? Think of a Methodist preacher seventy-four years old being willing and able to undertake one of the most difficult and delicate tasks known to science. It was no boast, for already he has produced some of the most perfect lenses ever made.

Who is John Peate? Skeptical stone-mason till thirty; Methodist preacher for over forty years; a world traveler that places him among distinguished travelers; astronomer; builder of telescopes, and manufacturer of large lenses.

Few men have been more popular in the pulpit. His sermons were original, striking, not to be forgotten. You can easily find men who heard him thirty years ago who will tell you the gist of his sermons.

Nature and humanity are God's great books, and with a wild delight he has sought nature's expressions in mountains and seas and studied man in many nationalities and climes. He has not looked at the world from car windows, but has grasped her hand and looked upon her glorious robes. Within the past few years he has been turning his attention to the heavens. He has been as happy in roaming through the skies as in gazing at the wonders of earth. With his own hands he constructed the telescope that for several seasons afforded so much pleasure to the visitors at Chautauqua. Out of sheer love for accomplishing the marvelous he began the work of making lenses. As enthusiastic as many are in climbing the Alps he has been in creating lenses for the study of the stars. So few know anything about lenses that the making of one means no more than the driving of a nail in the wall. None the less, one of the most difficult feats of skill accomplished by man is grinding lenses. It is worthy of being placed by the side of the artist's brush or sculptor's chisel. It cannot be learned as a trade, any more than painting. While

machinery may be constructed to do much of the labor, the finishing requires as much delicacy of touch and exquisiteness of taste as the canvas in receiving the immortal touch, yet withal calling for the mathematical precision of science. The famed McQueen, of Philadelphia, sent him, for six dollars, a glass the size of a spectacle glass, said to be mathematically flat. This the doctor demonstrated to be imperfect. Yet in his own studio are three glasses eight or ten inches in diameter that are mathematically flat, ground by his own skill. The slightest variation from the true curve, or surface, makes a distorted image, hence the only goal is perfection. In the rear of his home, in Greenville, Pa., are two little buildings, each put up by his own hands. In one of these is his telescope. On fine evenings he is often here enraptured with the stars, and will grow enthusiastic in taking a friend a trip in the heavens. The other building, about the dimensions of a box car, is his workshop. Here are many ingenious tools of his own devising and construction, while enough astronomical works abound to give the shop an air of science.

Here, too, is a lens, perfect, thirty-two inches in diameter, worth three thousand dollars, his gift to Allegheny College, on the condition that the college do the mounting. The silvering process for reflectors, the construction of machinery and tools, the lens grinding, are the result of indefatigable labor, patience, skill, self-taught.

Step into his large library; you think he is all books; hear him preach and he is all sermon; see him roaming the fields, he is a true child of nature; look at him handling his telescope and he is all stars; in his shop, machinist; and, knowing him, you say, "He is God's workman." Now he is in the door, waiting your coming. You see a man slight of build, one hundred and sixty pounds, all muscle; agile in every move, strongly featured face, eye keen as an eagle's, head like the dome of the sky, while scant locks of gray bespeak the crowning of honor. The greeting is genial, and in the happy hour you find him a door opening into worlds of splendor. Thus gifted, with skill in perfection, he stands ready to do one of the most difficult, daring, and honorable tasks for what, we pray, will be the greatest university of the world.

Yet his offer only remains open for three months. Are there no friends of the University who will take measures to secure what will some day be necessary for its success?—*Christian Advocate*.

Bishop Hurst and family will return from Europe by the White Star steamer Teutonic, leaving Liverpool September 5th. They have been in England, Germany, Holland, Switzerland, and France during the summer.

ENDOWMENT OF COLLEGES.

BY J. M. BARKER, Ph. D.

The majority of the American colleges are endowed either by the churches, States, or individual donors. The endowment is generally in the form of property, or stocks, or money, yielding an annual revenue. It may be a sum of money given to the college to be loaned, and the interest to be permanently appropriated to the support of a professor, or applied to the current expenses. The amount necessary to endow a professorship varies from twenty-five to fifty thousand dollars. [In the American University it will require from fifty to one hundred thousand dollars.—Ed.] The fund thus given remains intact, and the interest or revenue of it alone issued to carry out the purpose of the donor.

No college of a high grade can exist without a generous endowment, or aid from some source. Education in the colleges and universities throughout the world is given almost as a gratuity. They are maintained principally through the benefactions of wealthy men, who erect buildings, found professorships, and establish libraries for the use of others.

The resources of the American colleges surpass those of any other country of the world. In 1890 the value of grounds, buildings, and apparatus for 378 colleges in the United States was \$72,894,729, and the productive fund of 315 colleges aggregated \$74,090,415. In Germany the twenty-two universities are national property, and are supported out of the national treasury at large annual expense. The annual income of Oxford and Cambridge in England aggregates more than \$3,500,000.

Many of the American colleges have wealthy foundations. Harvard College has property and endowment of \$12,000,000, with an annual income in 1891 and 1892 of \$978,881.92. Columbia College claims \$13,000,000, with an annual income of \$629,000. The estimated value of the funds of Cornell University is \$9,000,000, with an annual income of more than \$400,000; and Johns Hopkins University has \$5,000,000 endowment. In 1892 Yale College had \$4,019,000, with an annual income of \$520,246. The Northwestern University has nearly \$3,000,000 endowment, and an annual income of \$225,000. Boston University has more than \$2,000,000 endowment, and an annual income of \$160,000. Chicago University is one of our youngest universities, and yet it has in property and endowment \$7,500,000. These are only a small portion of the 400 colleges and universities in this country, whose aggregate wealth and income are a source of satisfaction to all the friends of higher education.

The munificence of the wealthy men of this nation in behalf of higher education has excited the surprise and admiration of the people in the Old World. Within

the last quarter of a century nearly seventy-five million dollars have been given for this cause.

We recall with satisfaction some of these distinguished donors. George Peabody left \$6,000,000 of his estate to the cause of education; Isaac Rich, \$2,000,000 to Boston University; Johns Hopkins, \$3,140,000 to found a university in Baltimore which bears his name; Asa Packard gave \$3,000,000 to Lehigh University; D. B. Fayerweather left a bequest of nearly \$3,000,000 to various colleges; Cornelius Vanderbilt gave \$1,000,000 to the Vanderbilt University; John C. Green gave \$1,500,000 to Princeton College; Asa Stone, \$600,000 to Adelbert College; George I. Seney, \$450,000 to Wesleyan University; Matthew Vassar, \$800,000 to Vassar College for women; John D. Rockefeller's gifts to the Chicago University aggregate \$4,500,000; and Leland Stanford's estate will yield from \$15,000,000 to \$20,000,000 for the university that bears his name on the Pacific Coast. These men, and a host of others, will be remembered through succeeding generations for their generous liberality. The wisdom of these noble benefactions commends itself to the enlightened judgment of all good citizens.

We believe, with President Schurman, that "the heart behind American wealth is at the bottom generous and discerning; and, so long as money can foster intelligence, that the heart will not suffer our civilization to become a prey to ignorance, brutishness, and stupid materialism. No one knows better than the millionaire that man lives not by bread alone." The colleges are not founded to make money, but to benefit the public by training and fitting men for the highest service. The majority of the students in American colleges are of limited means. If it were possible to sustain a first-class college by means of the income from students, the tuition would be so high as to limit the great advantage of a higher education to a few children of rich men. The annual cost of each undergraduate to the university at Oxford is \$700; at Cambridge, \$600, and at Harvard, \$300. If the actual expenses of running a college of high grade were divided proportionately among the students, they would have to pay three or four times the amount they now do for tuition. It is important that these educational advantages and incentives come within the reach of the humblest youth of the Republic, in order that they may be productive of the noblest manhood and womanhood.

Time and experience confirm the claim that the wisest and most permanent use of money is to help endow a college. Large wealth imposes obligations to make the best and most permanent use of it. Every man of means ought to be a patron of learning, because it yields the most satisfactory returns. "What better gift can we offer the Republic," says Cicero, "than to teach and

instruct the youth?" Wendell Phillips says that "education is the only interest worthy deep, controlling anxiety of thoughtful men," and President Gilman makes an equally forcible statement, when he says that "to be concerned in the establishment of a university is one of the noblest and most important tasks ever imposed on a community or on a set of men."—*Western Christian Advocate*.

EDUCATIONAL REFORM.

HON. WILLIAM T. HARRIS.

Careful students of the history of education have noticed the fact that its reforms swing from extreme to extreme. At one time it will become the fashion to lay great stress on the training of the will. Schools will accordingly become places where children are submitted to semi-mechanical processes of discipline to the neglect of individual insight and ability to think. Gradually the pendulum will swing to the other extreme and discipline will be neglected for the intellectual self-activity of the pupils. At first it is astonishing to see this incompatibility between will-training and intellectual development. Any one would suppose that the better the school as regards obedience to rule, the formation of correct habits and the subordination of selfish inclinations to the good of the institution, the better would be the intellectual progress. "Intellectual development must be based on moral character." It does not seem possible that there can be such a mistake as over-education in the direction of morality and good behavior. And yet it has always happened that schools managed by pronounced disciplinarians become more or less mechanical in their methods of instruction and are prone to encourage verbal memorizing rather than original thought. This, too, is a matter of race.

The protest of the new education against the old education strengthens its cause by an appeal to the scientific method, and to the importance of comprehension and insight over mere verbal memory and parrot repetition. But it gets so far in some of its applications that it develops weak traits of its own. It leaves the children so much to their caprice that they fail to develop what is called character or moral tone. They are self-indulgent and have to be amused or else do not choose to give their attention. They are great at play but good for nothing at real work. They do not respect the organization of the school in which they are enrolled and they will not respect the social whole in which they grow up. They will pass through life stumbling over themselves—not able to discriminate their idiosyncrasies from their rational aims and purposes or from their moral duties. In the end even their mastery of scientific

method will not avail to save them from becoming sour and misanthropic, for they will not be able to combine with their fellow-men—they will have no directive power. I do not know of any educational reform so much needed as a theory and practice of education which unites and adjusts these two tendencies—that of the old education toward will-training and that of the new education toward intellectual insight and power of independent thought.

It is the unconscious conviction of the advocates of the older education that character is more important than knowledge. This conviction steels them against the adoption of the good that the new education offers. They see something amiss in the theory of the new education. But they do not realize how fully they could unite what is good in both systems by rigidly confining their mechanical methods to discipline of will-training and adopting the methods of the new education for instruction or intellectual education. The disciplinary side would retain its military exactness without harshness, for the pupil would be permitted to understand and appreciate its motives. On the other hand, in his intellectual work the teacher would constantly press him toward original investigation, which is the highest of scholastic methods. This reform of reforms is urgently needed now, because of the increasing influence of the method of natural science and the consequent tendency to break completely with tradition. Inasmuch as the interest of the pupils is an essential item in effective education, it is held by some that there should be free election of studies, even in the primary school. "The pupil should study only what interests him." "One study is as good as another, provided the pupil pursue it with equal zeal." Here we are on the point of losing sight of the most valuable heritage of the old education, namely, the ideal of a liberal or rounded education, which contains within it the means of opening all the five windows of the soul. For mathematics and natural science open only two of these windows, while literature opens another and history still a fourth. The fifth window is opened by such studies as grammatical syntax, logic, psychology, and philosophical studies. The course of studies adopted is as a whole something psychologically complete. The reform of education that I recommend will discriminate between the individual and social elements in education and provide amply for the retention of both so as to save the moral education of the old and add to it the individuality and self-activity of the new education.—*The Kingdom*.

The Congressional Library building, costing \$6,000,000, will soon be completed, and will then house the largest library in America.

THE NEW PSYCHOLOGY AS A BASIS OF EDUCATION.

PROF. G. STANLEY HALL.

Anthropology, which is very lately coming into some of our American colleges, is never, in fact, so large as its name. In older and theological institutions it designated the processes in the fall and redemption of man. For some it is mainly anthropometry, the Benedict school having refined some hundred measurements of the skull alone. For others it means the study of primitive man, cave-dwellers and the like. The psychological side which interests us here is devoted to myth, custom, and belief. If psychology is truly historical, it goes back of all finished systems to their roots in the primary thoughts, sensations, and feelings of early man, which grow more sacredly secret and hard to extract as tribes lose their ethnic originality. These must often be elaborated from words, folk-lore, rites, maxims, and social organizations. This higher anthropology seeks for such primeval notions as a naturalist seeks for new species, and it has a passion for "pooling" sentiments, opinions, and views. When, in the development of a race, such material shoots together into cosmogonies, national epics, or ethnic bibles, the psychic basis for a period of culture is laid, a spiritual cosmos begins. Of this same mother-lye, philosophy at its best is but a more elaborate organization. Thus constituted, it labors to start from the common vulgar standpoint and to dignify homely commonplace things and duties, as Socrates did. It is always saturated with local color; and, instead of being gaspingly thin and abstract as it appears to those who in periods of strong discipleship and little originality study the great systems from the texts, ignoring the psychic environment whence they sprung, it always seems the most warm and condensed of all the manifold expressions of man's needs and ideals.

Here, too, belong the studies of childhood from the sentiment of love in the parents on to birth and up to maturity. The soul and body of the young child is freighted with potencies and reverberations from a past we know not how remote, and was, for Plato, of all things in the world, most worthy of love, reverence, and service. To Compayre it is "the most attractive of the new fields of study opened by modern science," and Le Conte says, "It is impossible to overestimate the importance of these studies;" while Garbin has just published a first study of the infant's voice. The first center of the child's psychic life, the mouth, toward which everything and every motion goes; the extraordinary sensitiveness of touch with all the organs of the adult skin concentrated on one-sixth the space; the slow development of the *ego* within, as distinct from the *non-ego* which includes all outside the bounding dermal surface; the slow development of the seeing-power till it becomes a passion; and the gradual co-ordination of the elements of speech and motion—all these are full of lessons for the psychologist. The centers for eye, ear, motion seem to develop in relative independence, and a plenty of play and even selfishness appear to be necessary in order to associate these elements of the *ego*, or self, into a unity so complete that shock or even hypnotism can not decompose it. The first six years of childhood are marked by growth so amazing as to suggest the six days of creation, while

such problems as personality, the origin of language, character, temperament, will probably never have any solution unless they are found in the study of infancy, the growth of which epitomizes under our eyes the history of the race, each day sometimes representing perhaps the race development of centuries. Adult psychology, which is chiefly taught, even to teachers, while it does not disqualify them for their work, is a very different thing from these practical yet scientific researches into the genesis of the human soul. Thus, it is not strange that so many recent associations, centers and studies, almost by the score, upon nearly every aspect of child-life and adolescence, now promise to make every stage of education more scientific than ever before.

The one chief and immediate field of application for all this work is its application to education, considered as the science of human nature and the art of developing it to its fullest maturity. It is especially opposed to low views of higher education, which are so prevalent often in higher places. It regards all the real history of the world, from protoplasm up, eliminating all stationary and retrograde movements, as educational. The philosophy of education, of history, and of life are one. Every institution, nation or period, subject and man, is judged by its service to education in this large sense. Philosophy in our colleges has often gone into by and forbidden ways; its only justification is the service it can render to education.—*The Forum*.

Book Notices.

[The Editor will give brief notices of such books as are appropriate to the COURIER. Copies of volumes sent for notice will be placed in the University Library.]

THE WORKS OF WILLIAM E. CHANNING, D. D.

Six volumes. 1841-1849.

This collection of Channing's writings has long since passed the ordeal of criticism. Many of the Addresses and Reviews were colored by the times. Their emphasis of human freedom as against Calvinism, and especially against slavery as it then existed in this country, are still gratefully remembered. Channing stood for that liberality which is so all-pervasive to-day, and which is now becoming a grave danger to many. The spirit he breathed, rather than the Unitarianism he preached, has left its impress on the country he loved. He could not emphasize education too strongly.

A COMPREHENSIVE DICTIONARY OF THE BIBLE, abridged from Smith, with important additions and improvements from many scholars, by Rev. Samuel W. Barnum; 500 maps and engravings.

This work proposes to be a standard Dictionary for the people. It seems to be more full and complete than other abridgments of Smith's three octavo volumes. We commend it to those who cannot obtain the larger work.

A NEW HARMONY AND EXPOSITION OF THE GOSPELS, by James Strong, M. A. 1852.

The author of this work, excellent in its day, has just entered his well-earned rest in heaven. His later and larger works, the "Cyclopedia" and "Concordance" especially, have overshadowed this earlier production. It was published before he became a Professor in Drew Theological Seminary, and showed his fitness for that position. While somewhat out of date now, no student can regard himself a master of New Testament Harmonies without knowing this one.

HISTORY OF THE GREAT REFORMATION OF THE SIXTEENTH CENTURY, by J. H. Merle D'Aubigne. 1847.

Fifty years leaves this still a standard and classic work. The movement it describes will be full of interest as long as time

endures. Some phases of it may well be studied anew in these days when Romanism and Protestantism are face to face in the new world. Is not one still formalism allying itself with the forces and powers of the world, while the other is spiritual, by its ever new life changing and uplifting individuals and society?

THE THRONES AND PALACES OF BABYLON AND NINEVEH, by John P. Newman, D. D. 1876.

This description of "a thousand miles on horseback," from the Persian Gulf to the Mediterranean Sea, among scenes and ruins of the world's oldest history, is in Dr. (now Bishop) Newman's luminous and interesting style, and is well illustrated.

ARCTIC EXPLORATIONS, by Dr. Elisha Kent Kane.

This is not a record of scientific investigations, but a popular narrative of the adventures of Dr. Kane's party during the seasons of 1853 and 1854, while in search of Sir John Franklin. The illustrations add to the fascination of the story.

A THEOLOGICAL DICTIONARY, by the Rev. Charles Buck; revised and improved by the Rev. George Bush, A. M. 1841.

The author says, "perhaps it may be said that the theology is too antiquated to please a liberal, philosophising, and refined age." While the book did pass through numerous editions, we fear the author's prejudgment is now true. The book is shelved.

OUR COUNTRY—ITS POSSIBLE FUTURE AND ITS PRESENT CRISIS, by Josiah Strong, 1885.

Of a work so well known we need only say with Austin Phelps, "This is a powerful book. Its great strength lies in its facts." They should not be forgotten.

THE VILLAGE BLACKSMITH, by James Everett. 1842.

A little volume that may well be read by the wisest who wish to live useful lives.

SIR FRANCIS BACON'S CIPHER STORY. Book III, by O. W. Owen, M. D. 1894.

Ingenuity is manifest in weaving this story of the Spanish Armada out of the plays of Shakespeare, with help from the *Fairie Queene*, and the works of Peel, Greene, Marlowe, Burton, and Bacon. This is certainly a reversal of the methods of the higher critics of the Old Testament, and we would suggest to Dr. Owen that when he gets through proving Bacon to be the author of nearly all the English literature of his day, that he try his hand on proving Moses to be the author of the Pentateuch.

"UEBER INNERVATIONS-EMPFINDUNGEN," by A. E. Segsworth, B. A., Hon. Fellow in Psychology of Clark University.

A brief pamphlet dealing with the sensations of innervation, or the sending of stimulation to an organ through its nerves. Is there any sense of effort in it? An interesting question in physiological psychology.

"ENGLISH AUTHORS; a Hand Book of English Literature from Chaucer to Living Writers." By Mildred Rutherford, Athens, Ga. 1890.

"AMERICAN AUTHORS; a Hand-Book of American Literature." Same author. 1894.

Two fair volumes from the Southland. The first title of each book is the better. They do not deal with the literature, but with the authors. The origin and purpose of a book should influence our judgment. These are the result of school room work, and retain "that which is apt to interest and claim the attention of the young." But it is a question whether this last purpose is not carried so far as to give very false impressions to scholars who have no other knowledge of the authors described. If John Wesley is to be introduced is it fair to only name his "Journals" and "Hymns"? If the author is to be described is it just only to tell of the failure of his Kingswood school, and to picture the infelicity of his marital relations? The second volume is better and gives a good bird's-eye view of American authors.

SERMONS, by Rev. J. S. Buckminster. 1814.

The author seems to have been one of the unfortunates, sometimes called a genius. He read Latin at four years of age, and in the same year had his father read Greek to him. He graduated early, was a bright star in the pulpit of Brattle Street Church, Boston, at twenty, and in his grave at twenty-eight. This volume is his memorial.

NOTES ON THE NEW TESTAMENT, by John Wesley, A. M. 1818.

SERMONS, by the Rev. John Wesley, A. M.; two volumes. 1843.

Standard works in all the branches of Methodism. "The Sermons are remarkable for their terseness and purity of their style; the transparency and compactness of their thoughts, and a logical force which is not subtle, but the fruit of a 'keen, clear insight.'" The Notes have "won approval from many eminent scholars," "for conciseness, spirituality, acuteness, and soundness of opinion."

THE LIFE AND TIMES OF HEROD THE GREAT, by Wm. M. Willcutt. 1861.

The writer tries to carry three threads in his hand and weave them into a story that shall give prominence to the Birth of the Christ. First, the Roman history of the time; second, the history of Herod; third, the history of the witnesses to the birth of Christ.

A MANUAL OF MEDIEVAL AND MODERN HISTORY, by M. E. Thalheimer. 1874.

A large class of Methodist ministers who tried to pass Conference examinations on this work will be willing that it should go to the shelves of the University Library.

CHRISTIAN THEOLOGY, by Adam Clarke, LL. D., F. A. S., selected from Clarke's Works by Samuel Dunn. 1837.

It was in the thought of this great scholar to prepare the Theological Institutes of Methodism, but the work was left to Richard Watson. Selections do not make a system.

SPIRITUAL REFLECTIONS ON HOLY SCRIPTURE, by Robert Hawker, D. D. 1845.

Selections of the reflections of the author which he appended to the close of his comments on each chapter of the Bible.

HEROES OF METHODISM, by J. B. Wakeley. 1856.

MEMOIRS OF REV. NICHOLAS MURRAY, D. D., by Samuel Ireneus Prime. 1862.

LIFE AND TIMES OF NATHAN BANGS, D. D., by Abel Stevens, LL. D. 1863.

Biographical studies of a kind once more general than now. The last is of historical value in the first century of Methodism in America.

PARSON BROWNLOW'S BOOK, by W. G. Brownlow. 1862.

This is history from a personal standpoint, giving some inside views of the "Rise, Progress, and Decline of Secession." It certainly has some dark pictures that are almost forgotten in these days of common loyalty.

RIFLE, AXE, AND SADDLE BAGS, by W. H. Millburn. 1857.

Four lectures by the "blind man eloquent," who is now Chaplain of the United States Senate, and still a preacher of remarkable power.

REVERIES OF A BACHELOR, by Ik Marvel. 1850-1863.

Day dreams that take one into the inner life—behind the masks—where mind and heart are themselves—where we may, perchance, see ourselves as others do not see us—and be the better for it.

Trustees and Officers of the American University.

Proposed Buildings and Endowments of the American University.

ADMINISTRATION HALL.

This should combine Library and Chapel; or Library and Chapel might be detached, the whole forming one group. The Administration Hall should contain the general offices for the management of all Departments, and also a Senate Chamber, as an auditorium for the general assembly purposes of the University.

HALL OF SCIENCE.

For the following Departments of Study.

MATHEMATICS, CHEMISTRY, PHYSICS, BIOLOGY

HALL OF PHILOSOPHY.

Departments.

METAPHYSICS AND HISTORY OF PHILOSOPHY, ARCHEOLOGY,
 THEISM, COMPARATIVE RELIGION, PSYCHOLOGY, LOGIC AND
 ETHICS, SOCIOLOGY AND ECONOMICS, CIVICS.

HALL OF LAW.

HALL OF HISTORY.

Departments.

AMERICAN, EUROPEAN (west and north), MEDITERRANEAN,
 ORIENTAL.

HALL OF LANGUAGES AND LITERATURE.

Departments.

ORIENTAL AND SEMITIC, GREEK, LATIN, ROMANCE, GER-
 MANIC, ENGLISH.

HALL OF MEDICINE.

In addition to these buildings there will be needed special endowments for instruction in the various Halls classified under the general names of Professorships, Lectureships, Fellowships, and Studentships. It is preferred, unless there be special reasons to the contrary, that gifts of both Halls and Endowments should bear the names of the donors, or of such friends, living or deceased, as they may designate.

The University grounds comprise a tract of nearly ninety acres, situated on the northwest heights of Washington. This space furnishes commanding sites for all the above buildings, with such others as the future may prove to be necessary for the full development of the University. The arrangement of the grounds is under the care of Mr. Frederick Law Olmsted, who will advise with reference to the location of the Halls.

THE AMERICAN UNIVERSITY HEIGHTS.

Washington's Great University Settlement.

**The Brightest Star in the Constellation of Growing Suburbs
in the Nation's Capital.**

**Joining the Campus of The American University, on which
Ten Million (\$10,000,000) Dollars is to be Expended in De-
velopments.**

TO PREACHERS AND PROFESSIONAL MEN:

The attention of Preachers—especially of the Methodist Episcopal Church—is called to this University Settlement. They well know that while the University is in no sense sectarian, it was conceived by Bishop John F. Hurst, has been cordially approved by the General Conference, and is under the auspices of the Methodist Episcopal Church. These lots adjoin the Campus of the University, which will practically be an open Park. It is estimated that the University property has increased five-fold in value in three years—and this will have correspondingly increased the value of surrounding property. It is now announced that ample funds will soon be available, and that work will begin on the first Hall not later than the ensuing season. With such bright prospects before the University, together with the rapid development of Northwest Washington, both Preachers and Professional Men wishing to make large or small investments for rapid accumulation of profits, or that they may secure sites on which to build future homes of comfort and elegance at reasonable cost, will find this a rare opportunity.

NEW YORK, Nov. 1.

MY DEAR SIR: In reply to your letter of inquiry in reference to the American University Heights, and Mr. J. D. Croissant, I would say, that *there can be no doubt about the early location of the buildings for the great University on the site already purchased.* When these improvements begin, the property in the immediate vicinity will, of course, greatly enhance in value. This site is well chosen, is high and right in the line of march of improvements.

As to Mr. Croissant, I have known him well for many years, and can confidently say that he is perfectly reliable and trustworthy, and any representations he may make you can depend upon.

Yours very truly,

JOHN P. NEWMAN,
Bishop of the M. E. Church.

FACTS TO BE REMEMBERED:

1. WASHINGTON is the "Paris of America."
2. The location—these lots join the American University Park, which covers about one hundred acres, and are on the line of Massachusetts Avenue.
3. Lying next to the University grounds, and on the finest avenue in the Capital City, they are very desirable as an investment for future profit.
4. The prices are exceedingly low (from \$400 to \$1,000), much lower than in any equally good location, and no spot could be selected that will more certainly increase in value with each year's development.
5. Prices will be advanced after two hundred lots are sold.
6. The great Capital must grow with the growth of the Nation. Its future is assured, and it is destined in a brief period to be a city of half a million people.
7. The building of the projected Cable Railway through Massachusetts Avenue from one side of the District to the other, will at once double the value of these lots.
8. Now is the time to invest. Buy a single lot, a square, or a beautiful villa site.
9. This is a safe and solid investment and cannot fail to yield large returns.
10. Send for plat and particulars.

J. D. CROISSANT & CO.,

Editorial.

James McCosh.

The recent death of this great man leaves a name forever linked with Princeton, that Princeton can not limit. He was a great educator in more than one direction. His published works make a list of more than 25 goodly volumes, besides many writings of minor importance. It was the author's joy that these paid financially, but their wide influence on the world of thought will bring a far richer harvest.

That such a voluminous author could also be a great teacher is not so surprising as are some other successes. In Queen's College, Belfast, he showed his power in arousing, stimulating, and leading students to do magnificent work. Many a Princetonian will say to those born out of due time, "Ah, but you were not a pupil of the great McCosh!"

The greater marvel in this man's career was that in addition to being such an author and teacher, he could also be a great administrator. When he came to Princeton it was "weak and fast losing its place among colleges of the first rank. On his departure Princeton is one of the foremost institutions of learning in America." He seemed at once to elevate the character of the college, inspire enthusiasm in his faculty and students, and awaken the respect and compel the confidence of the public.

The day had passed when "Hopkins at one end of a log and a student at the other" could be thought a university. The career of McCosh at Princeton would have been far different, and Princeton far in the background, but for the new "logs"—the material equipments—that loyal friends gave to help the magnificent leader in his work. Robert Bonner, Henry G. Marquand, John C. Green, the Stuarts, and others who poured nearly \$3,000,000 into Princeton's treasury, were the Aaron's and Hur's who upheld the hands of this modern Moses, and without whom his battle could not have gone so bravely. The fine array of buildings, the Halstead Observatory, the Gymnasium, Reunion Hall, the Library, the School of Science, University Hall, Witherspoon Hall, Observatory of Instruction, Murray Hall, Marquand Chapel, and the Biological Laboratory, were all given during his presidency. These, and the endowments added, made Princeton's growth possible. They show what well-placed wealth may help to accomplish in other directions to-day. And is there an opportunity so favorable anywhere as in The American University at Washington? Here, as many buildings, with other material equipments, will launch a university amid facilities unequalled on the continent.

Great Training Schools.

The War Department has recently published a volume on the Organization, Armaments, and Progress of Armies. It is startling in its figures. The war footings of the nations are: Russia, 13,014,865; Germany, 3,600,000; Italy, 3,105,036; France, 2,850,000; Austria, 1,794,175; England, 662,000; Switzerland, 486,000; Spain, 400,000; Mexico, 162,000; Belgium, 140,000; and so on through the nations. The annual cost of these great forces is simply appalling: Russia expends \$186,349,000; France, \$127,000,000; Germany, \$118,118,825; England, \$89,000,000; Austria, \$55,235,000; Spain, \$28,128,000; Switzerland, \$10,550,000; Mexico, \$7,500,000. The annual cost of the armies of the world is at least one billion dollars.

And what are these armies but great training schools? They are made up largely of young men during the period when mental and moral training can only be won-

when habits are formed and characters shaped for life. Were they actually schools of real physical culture, for the development of independent manhood, and a genuine loyalty to right and lofty patriotism for country, there might be some offset to this vast expenditure of time and money. But we fear from rumors and reports that these vast camps on which millions are expended are not only training schools that fit for war, bloodshed and destruction, but are also schools of vice, idleness, and disloyalty.

We are glad the United States does not rank high in the above list. It is surely better for us to have more students in our colleges and universities than soldiers in our camps. We believe our late war showed that the college can, on need, turn out as good soldiers as the camp. But how much better the result of the college in other respects. It would surely be wisdom for America to continue this policy. But if she is to do so she must put into her schools something like the millions that other nations are putting into their camps. American philanthropy to education is magnificent, but the gift to colleges and universities of what Russia expends on camps in one year would well nigh double all our permanent equipments.

Our universities are the training camps of the Prince of Peace. As such they are not to be supported by taxes enforced by law. The Prince of Peace asks voluntary service of his followers. This voluntary principle is the accepted one in American university work. On this ground we appeal to all friends of peace, of purity, of patriotism, of Christianity, to put voluntarily into our camps of learning, annually, at least a tithe of what Russia puts into her camps of war.

Gifts to Education.

In these days, when the wealthy are giving their thousands, hundreds of thousands, and even millions, to education, we hope that the people who have but one talent will not yield to the old temptation to bury it in the napkin. Education must ever be dear to the common people, and they must never cease to carry our educational institutions in their hearts, and help them by the humbler gifts within their power. The beginnings of Oxford in England read like a romance, gifts of all kinds, some of them most comical, being offered by the people and accepted by the authorities.

Nor should we forget that in 1636 the Massachusetts Colonial Legislature voted £400 toward the founding of the college which is now Harvard; that in 1637 John Harvard gave £800 and his library of 300 volumes. Then Boone says, in his book on "Education in the United States," the people of the colony caught his spirit.

Among the magistrates themselves, £200 was subscribed a part in books. All did something, even the indigent; one subscribed a number of sheep; another, nine shillings' worth of cloth; one, a ten-shilling pewter flagon; others, a fruit dish, a sugar spoon, a silver-tipped jug, one great salt, one small trencher salt, &c. From such small beginnings did the institution take its start. No rank, no class of men, is unrepresented. The school was of the people."

So should it be still. Not only to missions, but to education, also, should every person give. To poor and rich alike we make our appeal for The American University.

Recent Events.

Several events of especial interest have recently occurred in Methodist educational institutions. Among these are the installment of Dr. Morris as Professor of Practical Theology in Boston University; the inauguration of Dr. Plantz as President of Lawrence University, of which the Vice-Chancellor was an interested spectator; the formal opening of the Fayerweather Gymnasium of Wesleyan University; the formal opening of the Orrington Lunt Library at the Northwestern University; and the dedication of the Hoyt-Bowen Dormitory at Drew Theological Seminary, at which Bishop Hurst delivered a most beautiful and appropriate address on "The Romance of Drew." We reprint most of this address from the *Christian Advocate*, hoping it may help some reader to erect a building for The American University that will draw even a more eloquent oration from the brain and heart of our Chancellor.

The Epworth League Fund.

We are glad to report that the interest of the Epworth League in this part of the University enterprise does not abate. The action of some Conferences shows that the ministers, too, desire that the Young People of Methodism might be more fully aroused on the subject of education. We rejoice in what the Leagues have been doing in this Thanksgiving time for the Missionary Society. It shows what they can do. It proves that the Leaguers are not afraid to give, as well as sing and pray, and enjoy themselves in social and literary ways, or engage in local deeds of mercy and help. We confidently expect that these enthusiastic workers will put their average of \$1 per member into The American University.

HON. ALDEN SPEARE, of Boston, Mass., has given a library building to his native town, Chelsea, Vt.

Progress.

F. L. OLIMSTED AND SON, the landscape architects of Boston, have been in Washington during the past month consulting with the Commissioners on plans for the extension of streets and avenues throughout the District. They spent an evening, also, with the Chancellor and Vice-Chancellor of The American University, discussing some vital points in the plan for the grounds. Some difficulties were then overcome, and others so arranged that they can be eliminated, it is hoped, in the near future. The result will be the speedy completion of the plans, so that grading may begin in the early spring.

Recent Gifts.

While the COURIER is on the press the treasurer has received \$140 additional on the Library Alcove Fund referred to in our last issue, and also \$1,170 interest, a partial payment for the year on investments in securities.

A much interested friend in Washington has offered \$500, to be expended in the grading of the University grounds, on the condition that work shall be begun before May 1, 1895. The executive committee accepted the gift, and work will be started.

A wealthy and benevolent gentleman in the northwest has agreed to endow a scholarship when the University opens to students, the said scholarship to be filled by a graduate of a school in which he is much interested. The graduate must win it by competitive examination.

That Telescope Lens.

In several past issues of the COURIER reference has been made to the offer of Dr. John Peate, of Greenville, Penn., to make for The American University the largest reflector-telescope lens in existence, on the condition that the actual expense was defrayed. We waited for some friend to accept the offer in behalf of the University. The liberal proposal of Dr. Peate was to expire on September 27. He felt that if it was not accepted then, he must take up other work. This meant the loss of this gift. In the absence of the Chancellor, the Vice-Chancellor assumed the responsibility of accepting Dr. Peate's offer. So the lens is to come to the University.

It will be five feet and two inches in diameter. The cost will only be about \$3,500. There is no doubt about Dr. Peate's skill and ability to make such a lens. He has already made a number that are in actual and successful use. Its use and value are shown in the article

we republish elsewhere on "A Great Telescope," proposed by Sir Joshua Grubb. Photography of the heavenly bodies is the most promising line of astronomical work at present, and for this a large lens is necessary. The University is to be congratulated that Dr. Peate is already arranging to go to work. It will require nearly two years to complete it.

ASBURY HALL.

Neither time nor "the times" can dampen the ardor and enthusiasm of the ministers of the Methodist Episcopal Church in this memorial to the hero of early American Methodism. The total now pledged is about \$72,000. This is splendid giving, and a magnificent endorsement of the enterprise. It assures the erection in due time of the Asbury Hall of The American University. The following pledges have been made since our last issue in September:

LOUISIANA CONFERENCE.

\$100—J. C. Hartzell.

MINNESOTA CONFERENCE.

\$100—C. B. Brecount.

INDIANA CONFERENCE.

\$100—D. T. Davis, H. J. Talbot, T. H. Willis (by Mrs. Willis), J. E. Steele (by W. F. M. S.), J. E. Steele (by W. H. Adams), J. E. Steele (by Epworth League), J. E. Steele (by Mrs. Steele), J. M. Baxter, H. S. Headen (by Mrs. Headen), Wm. Teller (by his wife), E. E. Urner (Mrs. Urner), John Royer (Mrs. Royer), W. R. Halstead (by College Avenue S. S., Bloomington, Ind.), J. H. Ketcham, Frank Edinborough (by Mrs. Edinborough), M. S. Heavenridge (by Mrs. Heavenridge), E. R. Vest, J. B. Likely, C. E. Asbury.

\$50—B. A. May, Willis Winger.

\$25—H. C. Clipping, W. B. Collins, A. Hurlstone, Wm. McK. Hester.

\$10—Rachel Clark.

SOUTHEAST INDIANA CONFERENCE.

\$225—H. A. Buchtel, G. H. McLaughlin.

\$100—Robert Roberts, J. A. Sargent, T. I. Coultas, Charles Tinsley (by Wm. Newkirk), Harvey Harris, C. C. Edwards, J. R. T. Lathrop, J. H. Martin, H. S. Hilton, J. W. Mellender (by Wm. Newkirk), J. H. Ford.

\$50—G. L. Curtiss, J. H. Doddridge, L. W. Moore (by E. D. Woods), E. B. Rawls, S. W. Troyer, G. W. Cohagan.

\$30—A. N. Marlatt.

\$25—C. C. Edwards (by Sarah C. Spiegel), F. I. Tincher, M. A. Farr, A. R. Beach.

\$10—J. W. Currant, E. H. Wood, A. M. Sowden, John Machlan.

TENNESSEE CONFERENCE.

\$50—H. W. Key, J. Braden, L. M. Moores, C. E. Alexander.

\$25—Fannie B. Key, J. A. W. Moore.

\$15—B. F. Whitley, A. Swift, J. Howson, Joseph Harrison.

\$10—R. A. Fletcher, J. P. Price, D. C. Ransom, A. L. Nelson, J. W. Hall, J. E. Richmond, J. P. Gregg, Simon Ridout, Stephen T. Miller, J. F. R. Summerhill, F. W. Puryear.

\$6—James F. Foster, J. W. Richmond.

\$5—J. H. Coppag, S. B. Danley, Sallie Johnson, J. B. Bradford, J. R. Ransom, H. Primm, Thomas Belcher, H. Robinson, W. Ellison, A. M. Porter, J. L. Massey, Mrs. Rebecca Crutchfield, Miss Birdie Farmer, Calvin Pickett, B. F. Anderson, James Pickett, F. J. Yeargin, W. H. Vaughn, Alonzo Jones, A. P. Blackmore, G. W. Marsh, I. N. Shadd.

\$4—W. M. Bryant.

\$3—R. Johnson, Robert H. Johnson, Thomas Ward, M. Williams.

\$2—H. E. Erwin.

\$1—L. L. C. Fields, James Price.

CENTRAL TENNESSEE CONFERENCE.

\$100—Thomas G. McCreary (by Thomas F. McCreary, Jr.)

\$50—J. W. Asbury (by Louis C. Mills).

\$36—Charles E. Hammond, Wm. P. Banks (by John B. Robinson).

\$25—Joseph M. Carter, Samuel L. Clark.

\$20—Kynette Clayton, Daniel P. Searcy (by John B. Robinson), Otis O. Knight (by Dr. Thomas F. McCreary).

\$15—Wm. P. Banks, James A. Hassell, Ulysses G. Paschal (by J. C. Paschal), Ephraim R. Conder, John W. Faulkner, John D. Holland.

\$10—Francis M. Morgan, Wm. H. Stricklin, Virgil Pafford, David L. McCaleb (by S. G. and T. L. McCaleb), Allen L. Wheatley, Charles A. Stockwell, Wm. C. Carter, Rufus F. Wilmoth, John P. Williams, George S. Hicks (by John Miller), Davis H. Martin, William Clayton (by J. R. and Kynette Clayton), Ephraim H. Creasy.

\$5—John W. St. John, John R. McGowan.

Acknowledgment.

It is our purpose to acknowledge all gifts to The American University in the columns of THE COURIER. We have published from time to time lists of the ministers who have made pledges to the Asbury Hall Fund. Quite a number have been making payments on these pledges, some of them in full, others in part. We give below a list of all payments to this fund up to date. Such acknowledgments will be made in the future as payments are received. Our thanks go to each giver also, with a personal receipt. May not these gifts stimulate many laymen to invest in the University also?

\$1,010—C. C. McCabe.

\$250—M. D'c. Crawford.

\$200—C. W. Baldwin, P. M. Watters.

\$125—C. S. Harrower.

\$100—Abel Stevens, Wesley Webster, M. L. Smyser, A. J. Hawk, Daniel Wise, C. W. Buoy, Fields Hermance, G. O. Ferguson, J. B. Merwin (\$30 by Wooster, Worth, and Beiler), Robert Knapp, Wm. Wood (by F. A. Hatch), B. S. Burnham, Samuel L. Beiler, Thomas

H. Pearne, Manassas Miller (by Wesley Chambers), S. S. Benedict, W. G. Browning, A. C. Morehouse (by Wm. Leonard), Gordon Moore, Lucien Clark, Asbury Lowrey, Richard Harcourt, Wm. N. Tatt, C. H. Buck, S. Lowther, G. H. Gregory, Marcus L. Taft, R. Vanhorne, H. A. Buttz, Harvey Harris, J. M. Thoburn (by G. P. Hukill), William Herr.

\$76—V. F. Brown.

\$70.66—J. C. Nicholson.

\$70—C. T. House.

\$65.50—T. M. West.

\$56—D. C. Vance.

\$50—H. E. Swan (by T. E. Hinshaw), R. M. Stratton, S. L. Bowman, Charles Sheard, Charles H. Barnard, W. H. Peters, D. M. Browning, L. T. Wideman, B. C. Warren, L. R. Dunn (by S. Rowland and Mrs. H. F. Clark), W. H. Mickle, Abraham Davis, Thomas Lamont, T. S. Bond, B. L. McElroy, A. Gilruth.

\$43—H. D. Ketcham.

\$40—W. A. Layton, J. Y. Bates, J. A. B. Wilson.

\$35—M. R. Webster, D. F. Pierce, A. F. Chaffee, A. B. Sniff.

\$34—H. Hewitt, E. L. Seamans.

\$33.33—W. L. Slutz.

\$33—R. E. Smith, G. L. Tufts, T. F. Royal (by S. O. Royal), J. W. Welsh.

\$31—W. McIntosh.

\$28—J. B. Wentworth (by A. O.).

\$27.50—P. S. Butts, D. Mann (by Mrs. A. M. Mann).

\$25—Bishop S. M. Merrill (by 25 members of Wilmington Conference), J. S. Haugh, T. H. Burch, J. H. Myers, Milton Smith, W. S. Edwards, L. B. Wilson, G. Lansing Taylor (by B.), G. W. Townsend, C. F. Burdick (by J. W. Somerville), Class of 4th Year, S. W. Kansas Conference (by A. B. Westwood), J. B. Graham, T. S. Wilcox, C. W. McPherson, H. E. Wing, B. F. Thomas, H. B. Westervelt, J. F. Bell, J. C. Jackson.

\$20—W. F. D. Noble, Alexander McAllister, E. Tinker, F. B. Upham, J. M. Brashares.

\$16.66—C. Herbert Richardson.

\$15—P. P. Wesley, J. R. Schultz, C. H. Payne, W. M. Carr, J. C. Wharton.

\$13—E. H. W. Barden.

\$12.50—F. Stiehler.

\$10—H. G. Dodds, C. D. Shepard, T. L. Tompkinson, D. F. Barnes, N. C. Alger, J. F. Grimes, Patrick Henry, Geo. H. Smith, D. S. Monroe, J. C. Wilhelm, F. B. Stockdale, J. H. Mortimer, W. T. Hill, F. D. Abrams, C. M. VanPelt, G. W. Green, R. D. Morgan, George Aten, T. M. Ricketts, T. G. Wakefield, M. V. B. Evans, W. W. Trout, M. E. Ketcham.

\$9—W. McK. Riley.

\$8—W. L. McDowell, F. E. Vance, J. N. Shoop.

\$6—C. W. Rishell.

\$5.25—C. H. Reynolds.

\$5—F. M. Turrentine, Joseph Gray, Richard Hinkle, D. G. Watson, M. L. Drum, L. O. Deputy, C. J. Wells, B. D. Hypes, J. W. Adams, Class of 4th Year, Ohio Conference (by W. H. Miller), F. R. Crooks.

\$3—James Robinson.

\$2—Seth C. Cary, B. F. Delo, E. L. Eslinger.

\$1—Henry B. Peters, Col. Paton, Philip Brown, Chillies Jenkins, J. L. Dalby.

Needs.

Grading the Grounds.

The offer of \$500 for this purpose, on condition that work is begun before May 1, 1895, makes it needful that the Trustees have additional funds for this special purpose by that time. There are doubtless those who are interested in the beauty of the grounds, that they should be laid out to the best advantage and in harmony with the best principles of landscape architecture, and who would be willing to help in this direction. It is not the purpose to undertake the immediate grading or landscaping of the whole site, but of the part to be soon used, that the trees and shrubbery may be growing. Who will help in this good work?

The Telescope Lens.

In another column we refer to the acceptance of this gift, on condition that the actual expense of material, &c., be defrayed. Dr. Peate has already begun his arrangements for the work. A firm in Butler, Penn., has consented to make the rough disc from which the lens is to be ground. We are still desirous that some friend of Dr. Peate's, or more particularly of the University, will assume this expense. Is there not some one who will undertake the expense of the entire telescope, and let it bear their name, as do the *Yokes* Telescope, or the *Lick* Observatory? The amount necessary to complete the lens is only \$3,500, and may be paid gradually during the next year, or even two years.

Buildings.

Still the feeling is growing in intensity that it is time to begin building. The management feels the importance of this as keenly as others can. The preparations for it have been pushed as rapidly as the future interests of the enterprise would warrant. Changes in the plan of avenues and grades adjoining the property of the University have necessitated great care and some delay. As mentioned elsewhere, it is now hoped that the recent visit of F. L. Olmsted and Son will result in all these matters being speedily adjusted.

Meanwhile architects have been at work, and a complete set of plans for the principal quadrangle of the University have just been received at the office. We wish we could lay these before all our readers. We hope that in the near future we may be able to give some reduced sketches.

They make a picture that would cause the hearts of all our friends to leap for joy.

We now hope that all will be ready for friends, who have been considering the matter of erecting a building, to give the order for work to begin in the

spring. Are there not many who would be willing to give from \$1,000 to \$25,000 to start this work early in the new year? We would like to erect two, or even three buildings, at the same time, as it would reduce the final expense in many ways. Do not hesitate to write us, and send whatever amount you can for the building fund. The "widow's mite" is not only still acceptable to our Lord, but may be so blessed by Him as to be a mighty inspiration and help on earth.

A GREAT TELESCOPE.

The next great telescope which focuses the attention of contemporary astronomers and excites the wonder of the public in general, will be a giant among its kind. It is now being widely discussed as the great 10-foot reflector, and will have a diameter of 10 feet, a length of 80 feet, and weigh somewhere between 50 and 100 tons, most probably the latter. Among all the big tubes now pointed at the heavens, it will consequently stand very much in the position of the first 100-ton gun as compared with the smaller bores which preceded it, and its most interesting scientific aspect will be the departure which it represents from existing methods of construction, as well as the influence it will have upon the plans for the great telescopes of the future, and the new knowledge of the universe which will come to us through them.

Great telescopes used for photography require an exactness of the adjustment and clock-work motion to counteract the motion of the earth, and keep them fixed in exactly the same relative position to the object being photographed, which is almost impossible to obtain with the great tubes and augmented weight now desired.

The great reflectors of the future, however, will have no weight at all, mechanically speaking, because they will be floated in water. This strange and novel principle, due to the invention of Dr. Common, is impossible in the case of refractors, because the observer would necessarily be at the bottom of the water, but with reflectors it shows every promise of availability and enduring success. Consequently, all the great reflectors of the future will probably be tank telescopes, and this departure is perhaps the greatest novelty in telescope mounting that has yet appeared.

Sir Howard Grubb as a telescope maker occupies the highest rank. His whole life has been devoted to the study of telescopes and their mounting, and his works at Dublin have built, among others, the great Vienna telescope, the great Melbourne reflector, and many others of less note, including a new 28-inch refractor for Greenwich Observatory, which he has just completed, and a 26-inch photographic instrument for the same observatory, which he has in hand. He is to build this new monster.

Sir Howard being asked as to the present status of the 10-foot reflector, said: "I have been asked for and have prepared estimates and a model of that instrument. There are three different projects under discussion, but with these I am not concerned. I shall merely make and mount the instrument, if desired. It will have a double steel tube 80 feet in length. The thickness of the steel will be three-eighths of an inch, and the two steel shells will be separated by a space of three inches. The

object of this is to equalize the temperature and avoid the mixture and consequent movement of the air at the mouth of the tube. This movement would arise from the difference of temperature between the air inside and that outside, and would cause a consequent movement in the rays of light. To escape this I use a pump to suck out the air from the cavity between the shells which is closed at the top and open at the bottom inside the tube. I thus obtain a steady, slow current of air passing down the tube and avoid the injurious irregular mixture.

"The instrument complete will weigh perhaps as much as 100 tons, though no weight will fall on the bearings. It would probably be a mechanical impossibility to drive an instrument of this weight by clockwork, if it were mounted in the ordinary way, with the absolute steadiness, smoothness and accuracy necessary for observing, and, above all, for photographic purposes. The only way of getting rid of the weight is the ingenious method of flotation, first suggested by Dr. Common, a principle which I have somewhat developed in the present instance. The steel tube carrying the reflector at the bottom, will float in a reservoir 100 feet in diameter, and 50 or 60 feet deep. The tube will be watertight, of course."

"How much power will be required for its movement?"

"The power will be very small. A one-horse-power gas engine will be used to charge storage cells in the day time, the current from which will be ample to drive the requisite electro-motors at night. The force will be independent of the weight of the telescope, and depend only on the friction necessary to be overcome in moving it through the water. The water currents will not affect the steadiness, as they will sub-side in a few moments. With a pair of trunnions attached to the tube at the water line, and these carried on a polar axis, we have an equatorially-mounted telescope without any weight whatever on the bearings of the declination axis. More than this, the tube may be lightened by an amount nearly equal to the weight of the polar axis, and there will then be practically no weight upon the bearings of that axis. There will be this disadvantage, that it will not be convenient to use the instrument within 15 degrees of the pole. I could plan it to work closer to the pole than this, but I prefer to have the instrument do perfectly nine-tenths of all the work that will be required of it rather than strain it into doing five degrees more of work that would only be of use on rare occasions."

"What kind of a reflector will it be?"

"I have designed it on the Newtonian plan. In all reflectors the light passes down the tube to a concave mirror, which reflects it and would bring it to a focus in the tube at a distance depending upon the shape of the mirror. Before coming to a focus, however, the light is received on a small mirror and again reflected to an eyepiece located in a convenient position for observation. In the Gregorian form this small mirror is concave, and the light is reflected from it down the tube through a hole in the center of the large mirror. The eye-piece is placed in this hole, and the observer looks up the tube in a manner precisely similar to that necessary with an ordinary reflector. In the Cassegrain form the reflector is convex, but is placed inside the focus, and the light is also shown through the centre of the large mirror, and the direction of observation is exactly the same. It is obvious that

neither of these forms would do for the floating telescope. The other form is that known as the Newtonian, in which the light from the large mirror is received on a small, flat mirror placed in the upper end of the tube and inclined at an angle of 45 degrees. The image of the object looked at is thus formed at the side of the tube, through a hole in which it is observed. This form has the lower end of the tube completely closed, and is especially suitable for the method of flotation which I propose."

"What will be the size of the large mirror?"

"About ten feet in diameter. If, as I expect, I can procure the material for one of that size, it will be of silver on glass. This is a film of silver from a chemical solution deposited upon the face, not the back, of the glass. It is extremely thin, being estimated at one two hundred thousandth of an inch in thickness, but it makes the best reflecting mirror for this purpose. It is deposited on glass of the highest polish."

"What will be the cost of such a mirror?"

"About £10,000."

"What great advantages do you look for from the use of the 10-foot refractor?"

"Generally speaking, all those advantages which come from increased optical power. During the last ten or fifteen years we have advanced some 15 inches in the size of our refractors, that of the Yerkes being now 40 inches. In the next ten or fifteen years we may advance proportionately, and probably eventually attain a refractor of 60 inches. All those who use large telescopes know only too well that the larger the aperture the fewer are the opportunities on which it can be used with advantage, and the question has often been discussed as to whether the useful limit of aperture has not already been reached except where the instrument can be mounted in such favored localities as Arequipa, for instance. The conditions of life at these isolated stations are not of the happiest, however, and though observers, in the cause of science, may put up with the difficulties temporarily, they will not do so permanently, and the conditions so far interfere with the steadiness of the work that relays of workers have already been found necessary in some cases, which plan is open to objections. It appears, however, that the new photographic system is independent to a great extent of atmospheric disturbance. Consequently we can use and use with efficiency large instruments conveniently within the confines of civilization, a great gain in itself.

"Moreover, we shall be able to use with advantage, and in these accessible positions, instruments of a far greater power than have hitherto been built, and instruments whose value was very doubtful so long as the old system of eye observations was the only one available. Photography, in other words, has created a demand for larger and larger telescopes. Whenever we double the diameter of the aperture, we get four times the light. In photography this is of maximum importance, because by doubling the diameter we can obtain a result, say in one hour, which previously required four. A 12-hour exposure, other things being equal, should give us as good a photograph as 48 hours' exposure with an instrument of half the size. Now, we can certainly obtain these large instruments in the form of reflectors, while it is doubtful if we shall be able to in the form of refractors."—*Buffalo Express.*

SITE OF AMERICAN UNIVERSITY.

THE AMERICAN UNIVERSITY SITE.

In the above picture of the site of The American University, we have tried to give our friends a glimpse of the ground on which the Administration Hall is soon to be erected, and a hint of the fine view over the Potomac valley. The open plateau, 400 feet above the Potomac, on which the building will stand, is quite well represented, but it was impossible to get into a photograph, and thence into a "half-tone," and thence on paper, anything like a fair representation of what has been known in Washington as "*The Inland View.*" Such is its beauty that for years people have been driving out by this site, just to enjoy the finest scenery in all this region. The picture gives but a small segment of the semi-circle of landscape, 40 miles wide, swinging from the broad reaches of the Potomac in the south, over the Manassas battlefields, along the distant Blue Ridge of the Alleghenies, by the notch where Harper's Ferry

lies, to the Sugar-Loaf Mountain, at the north, in Maryland.

We have thought that a brief history of the site might be of interest to our readers. On May 1, 1672, *Joseph Addison*, the gentle and humorous "Spectator" of England's Augustan reign, was born in the rectory of Rev. Lancelot Addison at Milston in Wiltshire, England. About the same time, there was born in Maryland, a Thomas Addison, to John Addison, a brother of the Rev. Lancelot. This first American-born Addison, Thomas, was sent to England to be educated, and according to tradition among his descendants, was in Oxford at the same time with his cousin and friend, Joseph Addison, the poet and essayist.

On his return to this country, Thomas Addison, who afterward was known as Col. Addison, married and built the fine old manor house on the banks of the Potomac, opposite Alexandria, which he called "Oxon Hill," in honor of his Alma Mater in old England.

THE ROMANCE OF DREW.

BY BISHOP JOHN F. HURST.

It seemed fitting that this son of Oxford, and relative and friend of Joseph Addison, to whom Dr. Johnson says "belongs the glory of being the first popular man of letters who, after the Restoration's moral decline, separated wit from wickedness and laid the blushing honors of his genius on the shrine of goodness and virtue," should become the owner of the virgin soil now forever dedicated to literature, science, and religion. According to records, a copy of which has passed beneath the writer's eye, the site of The American University was granted to Thomas Addison and James Stoddard by "letters patent" on December 3, 1713. This grant included about 3,000 acres lying between Rock Creek and the Potomac.

About this time Rev. Geo. Murdock was serving as the first Rector of the Rock Creek Parish. To him was born a son, William, and to Col. Thomas Addison was born a daughter, Nancy. In due time there was love-making among the picturesque hills and dales, and William and Nancy were married. To this couple Col. Addison devised by will (a copy of which is in the possession of Miss Marie Murdock, of Georgetown), the above-mentioned tract of land.

This William Murdock was a man of bright colonial fame. He, with Edward Tighman and Thomas Ringgold, was a delegate from Maryland to the famous "Stamp Act Congress," held in New York in October, 1765, which adopted a declaration of rights, giving expression to the dissent of the colonists with the methods of government pursued by England. William Murdock, with Robert Livingston and Samuel Johnston, signed the famous address then made to the king. Thus early was the possessor of this site of "The American University" truly American in spirit and action.

It was somewhere near this same period that the old mansion still standing on the site was built. It later became one of the centres of social life of the young capital, for a daughter of the Murdocks married into the family of President Adams, and often the old élite of those early days drove out onto this hill with its magnificent view to enjoy the hospitality of its distinguished owners. The property remained in the Murdock family until since the war, and the last lineal descendant, Wm. D. C. Murdock, died on July 22, 1886. Two daughters, Mrs. E. Keith and Miss Marie Murdock, much interested in the University, still live in Georgetown. B.

THE *Christian Advocate* of October 4, says: "The editor has received from 'American Winter Fruit,' College Hill, O., fifty cents for 'The American University.' That is a good kind of 'Winter Fruit' that grows on College Hill. We receive this 'first fruit' with thankfulness, and would be glad if our friends throughout the country would keep our editors busy acknowledging gifts received.

The story of this Theological Seminary, nestled for a quarter of a century amid these ancestral oaks, is one of the most charming romances in the annals of theological education. The search of Jason over wild and uncertain seas in quest of the Golden Fleece is a delightful Greek myth, but by far not so fascinating as, in the higher world of spiritual romance, has been the pilgrimage of young men to this place of sacred learning. They have come expecting much, and, if wise and zealous, have always gone away with a richer prize, of purer gold, than ever entered the mind of the restless Jason.

Some eventful days and nights have rolled over these consecrated acres. It was a happy hour when Daniel Drew placed this domain, with its land and houses and library and an actual outlay of annual revenue—a total of \$600,000—upon the altar of a higher and special theological training. Another event of far-reaching quality was when the Introductory Department, which consisted of classical studies only, was, by a single vote of the faculty one Monday evening in the autumn of 1873, eliminated from the course of study, and the curriculum of the seminary was restricted, and most justly, for all time to come, to theological studies alone. Another momentous occasion was when it was announced in this chapel, one Wednesday morning, that the endowment had totally failed, and when, for the first time, the burden of the seminary was thrown upon the great heart of the Church, and prayers went up throughout the land for new funds and larger gifts. It was a notable event when the noble Anderson Fowler gift of literary treasures was announced, by which the seminary came into possession of the best collection of *Methodistica* in all literature, which reveals the genesis of universal Methodism to the world as never before. Still another happy event was when that generous man, the friend of all good movements in Christendom—John B. Cornell—presented that beautiful fire-proof library building for the storing of our rich theological treasures, and for special facilities for studies by the individual student. Such an equipment in such a short period seldom falls to the lot of any institution. How shall we account for these great results, except on the firm conviction that at the very beginning of the seminary prayers were registered before the throne for such magnificent results by many whose names are known only to our heavenly Father.

But however happy the hour and wide the scope, no generous gift has been more timely, more judiciously conceived, more fittingly finished, and none which has awakened a purer, keener, and more grateful appreciation than that of this new structure—the Hoyt-Bowne Hall—for the larger equipment of this seminary. It was no sudden spasm of generosity, like that of Benjamin Franklin when he gave the contents of his pockets—copper, silver, and gold—for the Georgia Orphan Asylum, as he listened one day to Whitefield's matchless eloquence. The timeliness, the spirit, and the magnitude of this generous offering prove fully to every eye that the two minds which conceived it, the two hearts which inspired it, and the two wide-open palms which gave it, were in the sweet habit of large benefaction. It came as naturally as, at the touch of autumn, there fall the thistly

burs from these majestic chestnuts, and the acorns from these lordly and lamillar oaks, and the oracles of systematic theology from the great brain and kindly heart and eloquent lips of our kingly Miley.

But beneath all the beautiful and fascinating environment of this new hall, and the generous emotions which have called it into being, there lies a precious lesson of divine philosophy, namely, that our faith in the word of God and its universal and final triumph is undisturbed by the literary questionings of the hour. The insinuations against the authenticity of the Scriptures; that Moses never wrote his own immortal Pentateuch; that the Psalms are not the fore-notes of the Messiah; that Isaiah never wrote more than one-half of his own peerless prophecy, and was mixed in his construction of the other half; that John could not have written his own gospel; that miracle is a myth and prophecy only a wild vagary of an overwrought fancy in an infantile age—such insinuations never reach the great depths of the life of the Christian world. These and kindred objections are only the gentle and harmless ripples over the broad surface of the ocean of Christian thought and conviction, while the measureless depths of prayer and faith and the mighty ground swell of the innumerable sanctities and activities of Christian life are not one whit disturbed.

And wonderfully have all the later discoveries marched on with steady step to fortify, protect, and confirm the faith and brighten the prospect of the humble and sincere believer. How largely has the horizon of Christian knowledge and of the study of theology been extended by the excavations in Egypt and all the Bible lands, and by the marvellous illuminating flashes thrown on the sacred page by the manuscripts unearthed within the last decade! Going still farther back, Tischendorf's discovery of the Sinaitic Codex in St. Catherine's Convent was the beginning of the discovery of an amazing series of codices and separate books which have come to light from the distant Christian past, to strengthen our firm belief in the substantial unity of the Gospel history and the authenticity of the sacred canon. The lately-found manuscripts either furnish us with new and substitutional readings, or they remove discrepancies in ancient copies, with the one result of a more nearly certain biblical text. By the beginning of the twenty-first century every important discrepancy will either have been removed altogether, or those remaining will have been reduced to an unimportant minimum. Every spadeful of earth thrown up by the reverent excavator in the Bible lands furnishes new proofs of the correctness of the divine word.

The revelations of Egyptian life and thought at the time of the bondage of Israel, as furnished by the tombs of the kings, unfold and corroborate the records of the Pentateuch in a most unexpected manner. The mummies of eleven Pharaohs, wrapped in the still fragrant spices and fine linens of their embalmment, have been brought out from their mausolea of syenite and made to tell anew the story of Egypt in its most brilliant period. The very Pharaoh of the oppression has been found, and his proud face has been photographed. There is but one hiatus in this wonderful series of kings, and that is the absence of the Pharaoh of the Exodus. But there is no difficulty here. Moses has told us what became of him. Strangely enough, the land which furnished a

refuge for the infant Messiah from the wrath of a jealous and cruel king, has become, after the lapse of nearly twenty centuries, an eloquent voice in defense of the truth of His Gospel and the divine origin of His Church.

In view of the later confirmation of the Bible by the opening of the buried treasures of Eastern lands, and the new light thrown on the theology and history of the early Church by the discovery of new books, such as the *Teachings of the Twelve* and the *Gospel and Revelation of Peter*, what limit is there to such discoveries in the future? For the broad and thin theologian one can not escape a certain degree of commiseration. He has nothing to hope from the coming archaeological triumphs. They will all be against his theory of brilliant infirmity, and in favor of the strong and firm positions of the evangelical theologian.

Grand is the field, therefore, which opens before the theological student of this hour! For attractive themes, for new paths of theological inquiry, such as comparative theology and Christian evolution and biblical and Christian archaeology; for languages yet to be reduced to organic law; for newer conceptions of the personal history of Christ; and for a deeper insight into the classic preparations for Christianity, no period in the past has ever approached the attractiveness of the present. All the sciences are progressive, but none more so than that of theology. There is no limit to its development. The possessions of the theological student defy all measurement. He reverses the sorrow of Alexander, and rejoices at the certain possession of both worlds—that which now is, and that which is to come.

The new hall which to day we consecrate to God as an offering of grateful hearts and generous hands is a part of the great furnishing of this noble seminary. Choice spirits have labored here, and rich is the inheritance we enjoy. As we this hour begin the new, we could not, if we would, forget the old. Who that has ever looked on the face of McClintock, or been charmed by his superb voice, or felt the pressure of his gentle hand, can ever forget him? The inspiration of that first president of the seminary still lingers in the noble work and lofty aims of the first graduates. Nadal was one of the noblest of that first group of professors in these lecture halls. It was no effort of his to make himself the equal of the students who sat at his feet for wisdom, or walked with him along the corridors of historical theology. He was one of the youngest to the last, and an intense student until he saw "The New Life Dawning," and entered upon his great reward. Kidder, the man of majestic mien, of great heart, of sympathy with every student, of nature as pure and unselfish as the very stars, has left his impress on the literature of the whole American Church. He came to his Chair of Historical Theology here after many years of careful preparation, and Drew received the fullness of his scholarship and the ripeness of his intellect. What shall one say of Strong, him who has only recently ascended the shining path? A kindly service, in simply the loan of a needed book, away back in the years, knitted one heart to him for life. That was only the beginning of many a brotherly deed. His nature was to help smooth the paths. The eldest of us all in wisdom, and the youngest of us all in hope and faith, the last of the Church Fathers, he has led a noble and spotless life of theological consecration. He was technically a layman, but no themes so fascinated him as those

in theology. To him no Christians were so attractive as the leaders of Christian thought. How he reveled in his favorite theories of the exact route of the Israelites through the wilderness, of the form and fashion of the Tabernacle, and then of the Temple! It has all come before him now in its perfect light. What a joy has been his in the few short months since he has worn the crown! My brother and counsellor in many a crisis, life has lost much of its sweet and soft coloring without thee! Drew is no longer Drew without thy cheering voice and gladsome face! Thy life of labor was ever one long psalm, and thy pen never wrote aught than the true, the beautiful, and the good.

But we dare not lose hope because of the shadows which have fallen across these paths which wind through the forest. The faculty of to-day is worthy to take the place of the men who have preceded them. The seminary was never so able as now to serve the Church in rich learning and wise instruction. Its traditional attachment to our theological standards is maintained as thoroughly now as when the first lectures were delivered in these halls. Depend upon it, when the bells of the twentieth century and of the twenty-first, and of all the rest, shall ring out the old and ring in the new, the tone will be as sweet and rich as to-day. It will always be the music of loyalty to the revealed truth of God and to the cardinal doctrines of our common Christianity.

The young men who come here will find a new inspiration on reaching this place. The traditions are all in the line of a deeper consecration. The men and women who occupy these homes will be just as kindly, and the front doors will swing open as widely, as in years gone by. Having finished the course of study, the students will go out into fields both far and near. Already the distant shores have been reached by men who have studied here. It seems but yesterday when Robinson, Dease, McGrew, and Neeld went to India, and Taft and Smyth to China, and Soper and Davison to Japan, Salmans to Mexico, Burt and Clark to Italy, and others to other fields. The succession of true apostles will never be broken. Students from Drew will go out upon all the great crusades of the next century, attacking wrong, smoothing the pillow of the dying, "speaking a word in season to him that is weary." How great the value of this new Hoyt-Bowne structure which to-day takes its place among the consecrated homes of sacred learning no eye can foresee and no pen describe. There are some things you can measure by easy methods; but he who dispenses for the more rapid and effective fitting of a student for the ministry performs a service quite beyond the realm of common calculation. It does, in fact, defy all arithmetic.

Great is the beauty of the new edifice. Wise the mind which made its plan; skilled are the hands which reared the walls and polished the woods and brought all from the plan on paper to symmetrical completion. All is in harmony with that great purpose which gives to all art its breath of life. But there is a finer hall than this. An unskilled human being, without culture of mind or voice, called to the great work of the ministry—and with little else than a call—with few friends and no money for an education, not fit for the humblest pulpit in the land, and not daring to turn his back upon the greatest, sitting day after day at the feet of wise men, then after the "three years in training" going out upon the great field of the

wide world, to whom no zone has its rigors of cold or heat, no ocean its tempests, no language its limitations, and no idolator too low for its administrations—that belongs to a higher architecture than ever floated in the mind of Wren when he reared St. Paul's Cathedral, or of Michael Angelo when he poised St. Peter's dome in mid air. For such stately buildings of the theological student this seminary begins a new departure. For larger success the students of Drew, now scattered all over the world, will unite with all friends near by in thanking God for His guiding hand in the past, and trusting Him for equal care in all the years to come.—*Christian Advocate.*

Book Notices.

[The Editor will give brief notice of such books as are appropriate to the COURIER. Copies of volumes sent for notice will be placed in the University Library.]

EXCHANGES.

In this, our last number of 1894, we desire to thank our many *exchanges* for their courtesy. We would like to print a list of the religious weeklies, Conference Year Books, publications of educational institutions in this and other countries, and documents from the various Government Departments, which have come to us. We must be content with simply thanking each and all.

BIOGRAPHY OF REV. DANIEL P. KIDDER, D. D., LL.D., by his son-in-law, Rev. G. E. Strobridge, D. D. Hunt & Eaton, N. Y.

An interesting and valuable work, giving the career of a good and true man who laid the foundations of some of the most valuable institutions in Methodism. His missionary career in South America reads like a romance. His work as the founder of our Sunday School Union, as the prime mover in sending the first missionaries to China, in connection with Mrs. Garrett's gift and the development of Garrett Biblical Institute, his pioneer work in Homiletics for the Methodist Episcopal Church, and finally, his organization of the Board of Education, only hint at the vast work accomplished by this quiet, persistent worker. Dr. Strobridge has done his work well, and this book should be read by all young ministers. It would be an incentive to larger ideals.

TWO PREMIUM BOOKS ON EDUCATION.

"How shall we order the child?" is the great problem of parents and teachers. We are close upon the twentieth century, and the man and woman who shall direct affairs in the first half of that century are now boys and girls. The educational and formative influences now shaping the young people will determine the future. The American Sunday-School Union offered \$1,000 in two premiums, \$600 for the best book and \$400 for the next best, written for the Society, on the "Christian Nurture and Education of Youth for the Twentieth Century." After careful examination of a large number of manuscripts submitted, the premium of \$600 was awarded to the manuscript entitled "A New Life in Education." The second premium of \$400 was awarded to the manuscript entitled "How John and I Brought Up the Child. By John's Wife." After the awards were made the names of the writers of the two prize books were found to be Fletcher Durell, Ph.D., of Dickinson College, Carlisle, Pa., and Mrs. Elizabeth Grinnell, of Pasadena, California. The books are one in aim, but diverse in method. The first is a broad and scholarly discussion of the principles of education. The other is a portrayal of how the actual problem of bringing up the child was wrought out in a Christian home.

PREACHER'S PILGRIMAGE, by Rev. J. B. Robinson, D. D., Ph.D. Hunt & Eaton.

A suggestive and valuable book for the young minister who has not had the advantages of training in the theological school under such a man as Dr. Kidder.

Notes.

Educational.

BENEVOLENT.

JOHN WESLEY in his later years cried out, "O, that God would enable me once more, before I go hence and am no more seen, to lift up my voice like a trumpet to those who gain and save all they can, but do not give all they can!" The following notes show that many are giving, and should inspire others to "go and do likewise."

THE *Yale News* says that \$221,000 has been paid in for the Yale gymnasium, leaving only \$2,625 yet to be raised to pay for it fully.

AN ESTIMATE of the charitable bequests in England during 1893, puts the total sum at about \$7,000,000. This is held to be about one-tenth of the estates upon which probate duty has been levied.

THE *Golden Rule* is authority for saying that during the year 1893 the large sum of \$29,000,000 was given by bequests in this country to religious and charitable institutions. This does not include any bequest under \$5,000.

GENERAL J. WATTS DEPEYSTER, who formerly gave a beautiful church building to the Methodists of Madalin, N. Y., has recently given a school property valued at \$60,000 to the Woman's Home Missionary Society of the Methodist Episcopal Church.

ROBERT STANTON AVERY, of the United States Coast Survey, has bequeathed property valued at \$120,000 to the Smithsonian to create a fund which shall bear his name and be applied to the promotion of publications relating to phonetic type and printing chiefly.

THE death of Prof. Von Helmholtz takes from scientific circles one of their brightest lights. No less than 122 papers by him appear on the catalogue of the Royal English Society. His best-known work is "The Sensation of Tone as a Physiological Basis for the Theory of Music."

ANTON GREGOR RUBENSTEIN died on November 20, at Peterhof, Russia. The death of the Czar was Russia's loss, the death of Rubenstein is the world's loss. He was great in several lines. The world will not forget him as a pianist, but he preferred to be known as a composer. In this he was probably too prolific, and not sufficiently critical. Still, his operas, symphonies, songs, and piano pieces will probably be more highly appreciated now that he is gone. To us he is fully as great as the founder of the National Conservatory of Music at St. Petersburg, which grew to have 700 students. He is said to have given away \$250,000.

THE cosmopolitan character of the German universities is remarkable. Literally every clime and civilized country is represented in their enrollment. Of the 28,105 students in attendance during the summer term, 1,896 were from non-German countries. Of these, again 1,461 were from other European lands, and 435 from non-European nations. Of these 1,896 strangers, 467 were students of philosophy, philology, or history, 415 of medicine, 373 of mathematics and natural sciences, 269 of law, 157 of Protestant theology, 130 of agriculture, 47 of political economy, 18 of pharmacy, 12 of Catholic theology, 11 of dentistry. Of foreign countries Russia had the largest representation, namely, 410, followed by America with 351, Austria with 291, Switzerland with 262, England with 125, Bulgaria with 75, Netherlands with 66, Rumania with 32, France with 28, Luxemborg and Turkey each with 26, Italy with 24, Greece with 22, Sweden and Norway with 20, Belgium and Servia each with 18, Denmark with 13, Spain with 3, Montenegro and Portugal each with 1. Asia had 64 sons enrolled, nearly all of them Japanese, while there were 14 from Africa and 4 from Australia. This list includes only matriculated students. In addition a large number of foreigners attend lectures without being matriculated.

Proposed Buildings and Endowments of the American University.

ADMINISTRATION HALL.

This should combine Library and Chapel; or Library and Chapel might be detached, the whole forming one group. The Administration Hall should contain the general offices for the management of all Departments, and also a Senate Chamber, as an auditorium for the general assembly purposes of the University.

HALL OF SCIENCE.

For the following Departments of Study.

MATHEMATICS, CHEMISTRY, PHYSICS, BIOLOGY.

HALL OF PHILOSOPHY.

Departments.

METAPHYSICS AND HISTORY OF PHILOSOPHY, ARCHAEOLOGY, THEISM, COMPARATIVE RELIGION, PSYCHOLOGY, LOGIC AND ETHICS, SOCIOLOGY AND ECONOMICS, CIVICS.

HALL OF LAW.

HALL OF HISTORY.

Departments.

AMERICAN, EUROPEAN (west and north), MEDITERRANEAN, ORIENTAL.

HALL OF LANGUAGES AND LITERATURE.

Departments.

ORIENTAL AND SEMITIC, GREEK, LATIN, ROMANCE, GERMANIC, ENGLISH.

HALL OF MEDICINE.

In addition to these buildings there will be needed special endowments for instruction in the various Halls classified under the general names of Professorships, Lectureships, Fellowships, and Studentships. It is preferred, unless there be special reasons to the contrary, that gifts of both Halls and Endowments should bear the names of the donors, or of such friends, living or deceased, as they may designate.

The University grounds comprise a tract of nearly ninety acres, situated on the northwest heights of Washington. This space furnishes commanding sites for all the above buildings, with such others as the future may prove to be necessary for the full development of the University. The arrangement of the grounds is under the care of Mr. Frederick Law Olmsted, who will advise with reference to the location of the Halls.

THE AMERICAN UNIVERSITY HEIGHTS.

The brightest star in the constellation of the growing suburbs of the great Capital of the Nation. **Investors** should always keep two things in view: 1, the absolute **security** of their investments; and 2, the likelihood of paying a **good return**. That there is no place in the United States where real estate prices have been so secure and steady, no one conversant with facts will deny. That any place in Washington could be more advantageously situated than "**The American University Heights**" it is hard to believe. The beautiful Massachusetts Avenue, soon to be the finest resident street in the world, runs through this ground. Near by it is situated the National Observatory, costing six millions; the Episcopal Cathedral, to cost over two millions, and immediately adjoining it, the great American University, with a prospective ten millions of dollars to invest in its various departments. Ten thousand dollars a year is being spent on this avenue. Work begins in the spring on the Cathedral. The white marble buildings of the Observatory already glisten through the grove on Observation Hill, while this copy of the COURIER will tell of what is proposed for the University next spring. The value of these lots has greatly increased since the present prices were established, and before another number of the COURIER is issued the price list will increase the prices at least twenty per cent. This is guaranteed to all who buy before February 1 next. One-quarter of the lots have been sold during the past season. By this time next year it is confidently expected that **every lot** will have passed into the hands of speculators, or those who intend to build, and the middleman's profit will have to be paid. Therefore, **buy now**. Send a deposit and we will select a location, the best that is left for the value of the lots you desire to secure. To own a good building lot in Washington will soon be out of the reach of all except the rich. From \$550 to \$900 will secure one if selected **at once**. Read what some of our best business men, entirely conversant with all the facts, say:

WASHINGTON, D. C., Nov. 1.

J. D. CROISSANT & Co., Ohio National Bank Building.

Gentlemen—Complying with your request, we take pleasure in saying that we know the value of Real Estate in the Northwestern portion of the City, and are fully advised of the building of the American University, and believe that we comprehend its influence to increase the value of property in its vicinity.

We most willingly express our opinion that the American University Heights, a recently plotted subdivision adjoining the University Campus, offers unusual opportunities for investors, as well for personal use as for increasing profit.

Very respectfully yours,

JOHN O. JOHNSON, V. Pres. Ohio Nat. Bank.
A. B. RUFF, Cashier Central National Bank.
GEN. ELLIS SPEAR, Equitable Bldg. Ass'n.
E. & E. BALTZLEY, Mgrs. Glen Echo Chau't.

BARNES & WEAVER, Real Estate.
WRIGHT & STOCKETT, Real Estate.
D. D. STONE, Real Estate.
S. A. SIXBURY, Real Estate.
JUDGE ANDREW B. DUVALL, Att'y at Law.

For full information as to prices, maps, etc., address

J. D. CROISSANT & CO.,
Room 31, Ohio Natl. Bank Bldg., Washington, D. C.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

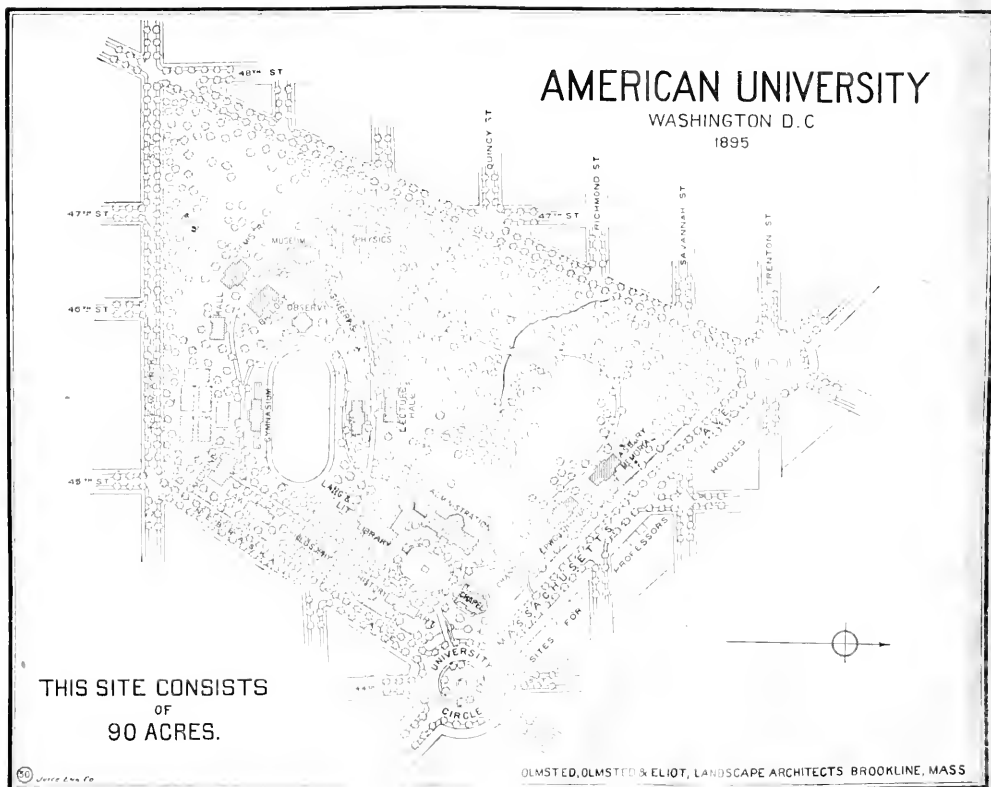

VOL. III.

WASHINGTON, D. C, JUNE, 1895.

No. 4

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

The site cost \$100,000, is paid for, and is now worth several times that amount. The assets of the University, exclusive of the site, are \$500,000. The \$150,000 for the Hall of History has been subscribed and assumed. Work will begin on the building this autumn.

Editorial.**\$150 000.**

The gift of this amount of money to the American University during the last four months is an earnest of the interest of the people in this great enterprise. The spirit with which it has been done transcends the amount. In a number of instances great regret has been expressed that burdens assumed in other directions, or present financial conditions of the country, prevented the gifts being larger. From New England, from the shores of the Pacific, and all the regions between, have come gifts to swell the amount. Methodists, Episcopalians, Congregationalists, Baptists, Presbyterians, and persons of no special church affiliations are among the donors. It shows how this is to be a truly American and Protestant enterprise. It has revealed, also, larger purposes to aid in the building and equipment of the University. It will soon give the institution a material existence that will forever establish the faith of those who can not build on ideals.

THE TRUSTEE MEETING.

Perhaps no meeting of the Board has ever been looked forward to with such interest as that of May 22, 1895. Its opening was tinged with sadness by the sudden death of General S. S. Henkle. The reports of the officers were full of encouragement, and a spirit of assured enthusiasm pervaded the meeting. Bishop Hurst passed to the possession of the Board the deed for the grounds, free of all incumbrance. The amendment to the Charter enacted by Congress in its closing hours was accepted. The statement was made that the Olmsteads were paid for their work in laying out the grounds. This led the way to the next natural movement in developing the material side of the University, the question of building, reported under the heading, "The Hall of History." It was a meeting never to be forgotten for its intensity of purpose and triumphant faith.

There were present at the meeting Drs. C. McCabe, A. J. Palmer, C. H. Payne, and J. L. Hurlbut, of New York; Rev. C. W. Buoy, of Philadelphia; Rev. D. H. Carroll, of Baltimore; President W. W. Smith, of Lynchburg; Bishop John F. Hurst, Mrs. E. J. Somers, Judge L. E. McComas, Messrs. A. B. Browne, A. B. Duvall and B. F. Leighton, Vice-Chancellor Samuel L. Beller, Secretary C. W. Baldwin, Western Secretary W. W. Martin and Registrar Albert Osborn.

Mr. William Connell, of Scranton; Hon. John Paton, of Curwensville; Mr. John G. Holmes, of Pittsburg; Chaplain W. H. Milburn, of Illinois; Mr. John E. Herrell, of Washington; and Hon. John Fritz, of Bethlehem, were elected members of the Board of Trustees.

The following were appointed on the Executive Committee: Bishop John F. Hurst, Mr. John E. Andrus, Hon. M. G. Emery, Mr. B. F. Leighton, Mr. A. B. Duvall, Mr. A. B. Browne, Mrs. E. J. Somers, Rev. C. W. Buoy, Mr. B. H. Warner, Mr. S. W. Woodward, Mr. John E. Herrell, and Mrs. John A. Logan.

CLEVELAND MEETING.

It is the desire of the University authorities that in the course of time there shall be held in each of the large cities of the country a series of meetings in the interest of the American University. The first of these was held in Cleveland, Ohio, on April 14 and 15. The Chancellor and Vice-Chancellor preached in different churches on the Sabbath, and a mass-meeting was held on Monday evening. President Thwing, of Western Reserve University; W. M. Day, President of the Chamber of Commerce; O. M. Stafford, a prominent banker; Horace Benton, Dr. Muller, and others spoke, heartily endorsing the enterprise; and Bishop Hurst presented more fully the history, plans, and purposes of the University. Great interest was awakened in the city, and valuable assistance secured. Our thanks are especially due the *Leader* and *Plain Dealer* for full reports and excellent editorials. Mr. E. B. Bauder, esq., was Chairman of the Committee of Arrangements.

SAUL S. HENKLE.

Early in the morning of May 21, just the day before the Trustees held their annual meeting, this devoted friend of the University passed into the unseen realms of higher life. The bar, press, and pulpit have joined to do him honor. He was one of the early contributors to the Land Fund of the University, and in many ways contributed to its present status and prospects. The Trustees, by unanimous rising vote, adopted the following resolutions presented by Mr. A. B. Duvall, Esq.:

"The Trustees of the American University have heard with profound sorrow the announcement of the sudden death of General S. S. Henkle, on the morning of the 21st of May.

General Henkle was one of the original incorporators of this University. From its inception he has been a member of its Executive Committee, and by his wise and hopeful counsel he has constantly furthered its best interests. He was a learned lawyer, of eloquent speech, and charming personal traits, of religious convictions and wide views. He delighted in all the forward movements of the church, and alike by word and example was known and beloved as a type of the Christian gentleman."

Progress.

HALL OF HISTORY.

The final determination concerning this first building of the American University marks an epoch in the history of the institution. History is the natural starting point in the evolution of plans that may go on unfolding for many years. This department has already received over \$100,000 of endowment, which seemed also to be a providential indication as to where work should begin. It is intended that the historical department will in time cover the field commonly called history, and will also include lines of more special historical study and research, such as the history of science, art, philosophy, religion, government, civilization. It will thus become the foundation department in which the students in all lines of specialization will be definitely prepared for their more direct work of original investigation.

It was not a mere spontaneous impulse, but, we believe, a divine inspiration, by which three of our trustees, at the January meeting, proposed to give \$10,000 each toward the erection of the Hall of History, on the condition that \$150,000 be pledged by the May meeting. There was more than one doubting Thomas, who said: "I will not believe that it can be done in these times until I see the walls rising on their solid foundations." But Thomas usually yields to ocular demonstration in Christian enterprises. Faith in God and in the providential character of their work enabled the Chancellor and his co-workers to go forward, planning and toiling by day and by night, sure that victory would come in the end. They only hope that another proposition of a similar character will come to them when the heat of summer is over.

When the trustees met, Bishop Hurst announced that the subscription was nearly completed. It was the unanimous judgment that it must be completed that day. The president, Mr. Andrus, was necessarily absent, and Chaplain McCabe was in the chair and helped on the victory.

When the Chancellor waved a telegram in the air announcing \$10,000 additional, it was resolved to finish the subscription then and there. Had there been the requisite ability it would have been given outright. A part of it was assumed, certain individuals becoming responsible for a comparatively small balance. So the entire subscription was fastened and the first building made a certainty.

The Chaplain quickly proposed that the Doxology be sung, and thankful hearts poured out their gratitude to God for the signal victory achieved. The names of all donors, with the amounts given, will be published in due time.

BUILDING.

The subscription to the Hall of History is mostly in large amounts, and the terms of payment are, one-third of the amount subscribed on July 1, 1895; one-third on January 1, 1896; and the balance on July 1, 1896. This will enable the Board to go on with building during the time covered by the payments.

Arrangements were made for the Executive Committee to select a Building Committee, which is to take immediate steps to secure competitive plans from the leading architects of the country. When these are ready the Trustees will meet to decide which plans shall be used. Contracts will then be let for the work, the excavations made, and the walls begin to rise. This glad day can not be hastened too much for those who have the matter in hand. There are many assurances that when building is under way, other gifts will follow to enable this great enterprise to begin its noble work.

The Executive Committee and six other trustees held a joint meeting on June 6, and appointed Mr. John E. Andrus, of New York; Mr. Anderson Fowler, of New York; Mr. Matthew G. Emery, Mr. John E. Herrell, Mr. A. B. Duvall, Chancellor John F. Hurst, and Vice-Chancellor Samuel L. Beiler, of Washington, the Committee on Plans and Building. Those present planned to go to work at once on matters that must be settled before information and conditions can be furnished to architects.

ASBURY MEMORIAL HALL.

The subscriptions from ministers toward this part of the University enterprise continue to come from Conference sessions and from individuals. The following letter from the Editor of the *Pacific Christian Advocate*, Portland, Oregon, speaks for itself:

APRIL 25, 1895.

DEAR BISHOP HURST:

Receipt of your favor of the 19th inst. reminds me of a purpose, long cherished, to take a share in the Asbury Memorial enterprise. I think I can find a hundred dollars for you when required. Will it advantage any interest if sent immediately?

With great esteem, your Brother,

A. N. FISHER.

We can only say, thank you, Dr. Fisher, and add, both to you and all our other friends, that such pledges, and especially the money, will advantage the interests of the University in many ways. The following has been subscribed to this fund since March 1, 1895. The Wilmington Conference had subscribed previously \$1,325, and the Newark Conference \$1,450. Some individuals have given a second time.

SUBSCRIPTIONS TO ASBURY MEMORIAL HALL.

WILMINGTON CONFERENCE, 1895.

\$100—L. E. Barrett and wife, Alfred Smith and wife, Adam Stengle and wife, J. T. Van Burkalow, J. H. Howard, W. E. Avery, F. C. McSorley (by John H. Phillips), C. A. Hill and wife, H. S. Dulaney (by George W. Todd and wife), Peninsula *Methodist* (by T. S. Thomas), Wilmington Conference *Herald* (by J. D. C. Hanna), J. G. Robinson and wife, J. T. Prouse (by W. H. Thompson), J. M. Lindale and wife, Robert Watt and wife, C. S. Baker and wife, A. S. Mowbray and wife, H. W. Ewing and wife, R. T. Coursey and wife (by L. S. Melson), B. F. Price (by friends), W. R. Gwinn, James Carroll and wife, J. B. Quigg and wife, W. W. Sharp and wife, A. P. Prettyman and wife, P. H. Rawlins and wife, J. H. Caldwell (by George W. Todd and wife), W. M. Warner (to be raised), R. H. Adams, J. D. Rigg (by J. S. Clark and wife), R. H. Adams (to be raised), Bishop J. F. Hurst (by W. F. Corkran, C. T. Wyatt, J. H. Howard, F. C. McSorley), W. E. England (by J. L. Wood, D. H. Willis, J. S. Wickline, George W. Bounds, A. Burke, T. B. Cooper), B. F. Price, Mrs. W. F. Clarkson.—Total, \$3,500.

\$75—John H. Beauchamp and wife.—Total, \$75.

\$50—H. C. Turner, Mrs. S. N. Pilchard.—Total, \$100.

\$25—G. L. Hardesty, W. Beuford, W. B. Guthrie, T. A. H. O'Brien, E. S. Mace, E. H. Derrickson, George E. Wood.—Total, \$175.

Previously subscribed, \$1,325; total for Conference, \$5,175.

NEVARK CONFERENCE, 1895.

\$200—L. R. Dunn.—Total, \$200.

\$100—A. B. Richardson, D. Halleron, Charles Judge, R. L. Dashiell (memorial, by W. H. Murphy), Mrs. R. Vanhorne, Samuel Sterling, D. R. Lowrie (by Annie Lowrie), J. A. Craig, E. W. Burr, W. S. Robinson, J. Y. Dobbins, J. C. Jackson (by W. R. Esher), J. H. Robertson, J. L. Hurlbut (last of \$5,000), R. Vanhorne and wife, H. J. Hayter, G. W. Smith, R. K. Boyd, John Atkinson (by Mrs. F. D. Gray), William Eakins.—Total, \$2,000.

\$50—J. B. Faulks, S. Van Benschoten, C. S. Ryman, W. M. Johnston, S. P. Hammond, H. A. Buttz, J. R. Wright (by A. Craig), Henry Spellmeyer, R. Vanhorne, J. Boyd Brady, F. S. Cookman, Fred. C. Baldwin, L. C. Muller, P. C. Bascom.—Total, \$700.

\$30—C. E. Walton.—Total, \$30.

\$25—S. B. Rooney (by John Krantz, jr.), W. Chamberlain (by C. S. Ryman), W. E. Blakeslee, C. H. Bassett, J. G. Johnston (by Mrs. H. L. Simon), J. F. Maschman, W. B. Judd, C. R. Barnes, S. N. About, N. J. Brown, J. A. Mason, T. S. Haggerty, J. R. Bryan, J. A. Cole, N. Brooks, T. Hall, Mrs. J. A. Cole.—Total, \$425.

\$20—D. R. Lowrie, H. D. Opdyke.—Total, \$40.

\$10—E. Meacham, G. D. Price, Paul Eustice, H. J. Johnson, F. L. Round, W. S. Coeyman, C. K. Kemble, J. B. Heard, W. Martin, E. O. Howland, F. Bloom, W. S. McCowan, J. A. Gutteridge, P. G. Blight, R. B. Collins, Charles F. Hull.—Total, \$160.

Previously subscribed, \$1,450. Total for Conference, \$5,005.

LEXINGTON CONFERENCE, 1895.

\$100—E. W. S. Hammond and wife, W. D. Johnson, Wm. L. Muir and wife.—Total, \$300.

\$50—F. D. Breckinridge and Son, Samuel R. Gibson and wife (Upper Miss. Conf.), W. W. Locke and wife, Geo. A. Sissle and wife.—Total, \$200.

\$35—T. L. Wilson.—Total, \$35.

\$30—Wm. B. Harris and wife, Mary F. Young and daughter.—Total, \$60.

\$25—Benjamin Alexander, G. F. Carr, wife and mother, Mary Jordan, E. A. Lewis and wife, Geo. W. Linsay and wife, Willis D. Locke, E. D. Miller, W. S. Rollins, John H. Stanley, Benj. J. Strider, W. E. Statesman and wife, Simon G. Turner, James Taylor and wife.—Total, \$325.

\$20—Mrs. Eliza Campbell, W. H. Evans and wife, Preston Long and wife, David E. Skelton and wife, Elam A. White and wife.—Total, \$100.

\$15—Abram Booker and wife, John H. Jackson, M. S. Johnson and wife, C. J. Nichols and wife, Scott Ward and wife, B. J. Ward and wife, Amos Washington and wife, T. F. Williams and wife.—Total, \$120.

\$12—H. A. Southgate.—Total, \$12.

\$10—Randall Acton, Miss Edna N. Brown, G. W. Bailey and wife, W. H. Bloomer and wife, Josephine Brady, George Currey, Jos. Courtney, T. T. Carpenter, Robt. L. Dickerson and wife, Henry Dupee, W. C. Echols, T. R. Fletcher, S. H. Ferguson, Solomon Ferguson (by T. L. Ferguson), Thomas Graves and wife, E. D. Gray, S. C. Goosley and wife, Edward L. Gilliam, Jesse Henry and wife, L. M. Haygood, Thos. J. Holliway, Robert Johnson, Daniel Jones (by L. C. Harris, Ezra Miller, D. Hickman, Jos. Small, Charles Pyles, and Mrs. Daniel Jones), R. T. W. James, B. W. Kertley and wife, Marion Lowrey, Wm. Langford, Mrs. Dollie Lewis, Mary L. Lowrey, M. McCoomes and Son, Jane Mitchell, A. McDade, Mr. and Mrs. Samuel J. Mundy, Randolph Pugh, Miss Sallie Parker, Mrs. Georgia Phillips, Charles Perkins and wife, A. Posey, F. P. Robinson, Felix Ross, John W. Robinson (by Lucy B. Wallace), J. H. Ross and wife, J. W. Russell and wife, W. H. Robinson and wife, Walter H. Riley and wife, Henry W. Simons, Joseph Small, Henry Steene, W. H. Stephenson and wife, J. A. Smith and wife, Louisa Singleton, Henry W. Tate, Creed H. Taylor and wife, Thomas Tompkins, Maria Vinegar, Nannie Wilson, J. W. White, Z. Winchester, Charles Walker and wife, Alex. White.—Total, \$600.

\$6.50—W. Hopewell and wife.—Total, \$6.50.

\$6.00—W. W. Heston and wife, J. E. Warren and wife.—Total, \$12.

\$5.00—Joseph Allen, W. H. Bell and wife, Benjamin J. Bradley, J. S. Bailey and wife, James Bowran, W. H. Brown, Amanda Bennett, Harris C. Buckner, Anne Brooks, J. A. Brooks, Joseph Courtney, Jr., N. I. Carr, Delia Carlisle, N. L. Carr (by G. F. Carr, Jr.), Tillie Chambers, Lucy Cash, Mary Eliza Carr, Lizzie Demby, Samuel Downing, Miss Alice Darnell, Braxton Daniels, Mrs. Sallie Dupee, Nancy Edwards, J. L. Franklin, Miss Rachel Fisher, F. P. Fielding, Parish Fisher, Rosetta Fox, Mrs. Elisha Green, Miss Reva Goosley, Sallie Gordon, Mattie Gordon, Frank Hinton, J. H. Hargeaves, D. W. Heston, Mrs. Sarah Howard, Dillard Hickman, L. C. Harris, Florence Harris, Thomas R. Johnson, Charles Jones, Jonas G. Jones, Miss Carrie Jackson, William A. Johnson, Charles T. Lewis, E. D.

Lawrence, Miss Mollie Lamb, J. L. Leggett and wife, Alfred Lanes, Jr., Isaac Wiley McCoomer (by Marcus McCoomer), David McFarland, Charles Miller, Logan W. Miles, Green C. McPheeters, George O. Moore, Harvey Manchester, Clara Mickens, Ida Overstreet, Samuel Pierce, Owen Perrin (by Mary Perrin), W. H. Pope, J. H. Payne and wife, T. R. Prentiss and wife, Charles H. Pyles, Mrs. Eliza Ross (by Felix Ross), Louis Robinson, Mrs. Kate Robinson, Mrs. F. P. Robinson, Celia Robinson, S. S. Stone, Frank Shipman, Mrs. George Strawder, John M. Taylor, N. H. Tolbert, Francis B. Turner, Llewellyn Taylor, Leah Taylor, Alanda Wilson, Henrietta Wilson, Elisha Ward, J. L. Webb, Annie J. Williams, A. Woolfolk.—Total, \$415.

\$3.00—Melville Hubbard, Albert, Nellie, and Mabel Prentiss.—Total, \$6.

\$2.50—Mrs. Eliza Harris.—Total, \$2.50.

\$2.00—G. W. Burnett, Mrs. Matilda Clark, Hattie Murphy.—Total, \$6.

\$1.00—Alice Anderson, Lucy Fisher, Carrie B. Gallagher, Jennie Paxton, Carrie Emma Pearl, Letha Robinson, Mrs. C. A. Stanley, Mrs. Anna Taylor, James Taylor, Jr.—Total, \$9.

Total for Conference, \$2,209.

PAYMENTS ON THE ASBURY MEMORIAL HALL SINCE FEBRUARY 21, 1895.

\$300—George O. Ferguson.

\$105—William P. Ryder.

\$100—S. M. Hartsock, J. M. Lindale and wife, Ralph T. Coursey and wife (by L. S. Melson), P. H. Rawlins and wife, Merritt Hulburd (by William McEchorn), Joseph E. King (by William McEchorn), Russell M. Little (by William McEchorn), C. S. Ryman, Davis W. Clark, J. W. Bashford, James Boyd Brady, A. S. Hunt, J. C. Scofield.

\$95—C. S. Harrower.

\$50—John Lanahan, Vaughan S. Collins and wife, Bishop J. M. Walden (by D. W. Clark), H. A. Buttz.

\$40—John B. Quigg and wife (by friends).

\$35—G. F. Pierce, W. A. Layton.

\$34—M. S. Heavenridge (by Mrs. Heavenridge).

\$33.33—E. W. Burr.

\$33—E. L. Seemans.

\$32—Benjamin F. Price (by friends).

\$25—Luther B. Wilson, Hugh Johnston, C. V. Hartzell, J. N. Ramsey, George W. Townsend, F. J. Belcher, P. R. Hawxhurst (by George R. Clark), L. R. Dunn (by S. Rowland), J. R. Wheeler.

\$20—F. B. Riddle.

\$15—John B. Wentworth (by A. O.), N. M. Carroll, T. H. Willis.

\$12.50—Fred Stiehler.

\$10—W. F. F. Smith (by Rachel E. Clark), W. F. D. Noble, W. R. J. Williams, J. L. Evans, P. G. Walker, Class of 4th year, Northwest Indiana Conference, W. G. Koons, R. H. Adams (by Joseph Smither), J. S. Wickline, David Phillips, George V. Morris, F. B. Stockdale.

\$8—B. F. Devries.

\$5—Mrs. Sarah Baker, T. O. Carroll, Mrs. T. O. Carroll, Joshua Barnes, R. H. Robinson, Elijah Ayres, W. D. Johnson, W. W. McIntosh, John D. C. Hanna, W. M. Warner, G. W. Vorhis, E. H. Wood.

\$3—James Robinson,

\$2—G. D. Nickles,

\$1—Mrs. Courtney Stanley, Mary Jordan.—Total, \$2.

WILL OF DR. BIRCH.

On Friday, March 29, Rev. William S. Birch, D. D., of Kokomo, Indiana, passed to a good man's reward on his seventieth birthday. Forty-four years had he preached Christ after "the type of the fathers—with love and power divine." An alumnus of Indiana Asbury University from which he also received the Doctorate of Divinity, he became much impressed with the advantage and necessity of a great American University at the Capitol of his beloved country. Eighteen months before his death he divided his estate, worth \$40,000, into four parts, deeding one to each of his three children, and willed a farm, worth \$6,000, and his home in Kokomo, worth \$4,000, to the American University, reserving a life estate in this part to his widow. "He was a faithful man, and feared God above many."

SCHOLARSHIPS.

Sometime ago a gentleman in the northwest offered to found a scholarship when the University is opened to students. Recently Mrs. Judge Cartter, of Washington, has sent word to the Vice-Chancellor that she will pay for a scholarship when the Hall of History is erected. It is well for our people of wealth to remember that it is frequently our young people of very limited means that have the instinct, ambition, and patience of scholarship. *The Outlook* recently said: "It is the fellowship and scholarship system which, more than any other, makes it possible to carry education on to the very highest plane and to secure a group of men and women trained in the most perfect manner and with the very highest aims."

While we are seeking especially, at present, to secure necessary buildings and the needed endowment of professorships, we are glad to have these offers come to us, and hope they may stimulate others to plan their gifts so that they will forever have a representative in the halls of the American University, and thus soon put a corps of trained men and women into the world's onward march to a higher civilization.

THE TELESCOPE LENS.

Friends who have not yet learned the fact will be glad to know that the Glass Plate Co., of Butler, Pa., have succeeded in casting the lens. This is a great victory. Heretofore we have been compelled to go to Paris for such work. Now America comes to the front at a bound with the largest lens ever made—62 inches in diameter and weighing 2,500 pounds. It is right that this lens for the American University should be American.

The Vice-Chancellor recently spent an evening with Dr. John Peate, who is soon to begin the work of grinding. It is one of long, loving patience, requiring about two years. The Doctor is not a novice at this business, but has been at it for sixteen years. A number of effective lenses of his grinding are now in use. We will watch his progress with deep interest.

BOOKS.

As we go to press, an offer of a valuable gift comes to us from the estate of Stephen C. Parrish, late of Washington, D. C., formerly of West Chester, O.

"UPON THIS ROCK."

In a rural spot, at Abingdon, Harford county, Maryland, may still be found the ruined foundation walls of the oldest Methodist College in America. It was founded in 1785 by Bishops Thomas Coke and Francis Asbury, and was hence called Cokesbury College. It was burned on the night of Dec. 7, 1795. It has never been rebuilt.

Some time ago, Rev. Charles W. Baldwin, M. A., Secretary of the Board of Trustees, visited the memorable ruins, and through the courtesy of Mr. C. W. Baker, of Aberdeen, Md., secured one of the foundation stones, weighing about 300 pounds, for the Asbury Memorial Hall. It is now deposited temporarily in one of the rooms of the Foundry Church. From what Abel Stevens says in his History of the Methodist Episcopal Church, this stone was contracted for by Bishop Thomas Coke, D. D., who laid the corner stone and preached from the foundation walls. Bishop Asbury attended to the further construction of the building.

WORDS OF CHEER.

During the last few months more messages of faith, indorsement, good cheer, and congratulation have come to the Chancellor and Vice-Chancellor than ever before in the same length of time. We would like to publish all of these, but can only give a few selections, with thanks to all such kind friends.

Dr. Wm. M. Swindells, of the *Philadelphia Methodist*, says: "I congratulate you and rejoice with all the friends of the University in the financial success by which the Hall of History is secured."

Rev. D. H. Moore, D. D., *Western Christian Advocate*, writes: "I wish that I might be able to help on your University. I am increasingly clear that it is the transcendent cause of American Protestantism."

Ex-Senator James Harlan, of Iowa, with a contribution, sends these words: "My heart is with you in this great enterprise."

Gen. James F. Rusling, Trenton, N. J., says: "There is nothing more sure than that we need a great Protestant University at Washington. I like your plan of raising \$10,000,000. You will need it all, and more. You have struck the key-note and, in due time, the American people will meet your call handsomely."

Rev. P. S. Cadman, Central Church, New York City, sends word: "I will gladly do all I can, whenever and wherever I can, to aid our great educational project of the Century's Methodism, the world over."

Mr. E. T. Burrows, Portland, Me., writes: "I believe your scheme of the American University a grand one, and trust that it will meet with the greatest success."

Mr. Wm. H. Murphy, Newark, N. J., after referring to the financial condition of the country and the change that is needed, adds: "When we secure this the sun will shine again, confidence will be restored, and the effort to increase the endowment of the American University will be easier and more successful. I wish it abundant success."

Mr. Henry C. Weeks, New York, writes: "Aside from all other considerations, I am greatly interested in

your success connected with your great project, and anything I can do will be done very willingly."

Rev. W. H. Milburn, D. D., Chaplain of the United States Senate, says: "I congratulate you heartily upon your success thus far. You may count on me to second you by every means in my power."

The press of the country, religious and secular, has been very helpful, so willing to publish any news given them, very hearty in words of commendation. Dr. C. H. Payne, Secretary of the Board of Education, gives especial indorsement in his valuable Annual Report.

J. M. Barker, Ph. D., in his excellent book, "Colleges in America," mentioned in our book notices, says: "Washington City is the most strategic educational center in America. This (American University) is certainly one of the most magnificent opportunities in the history of the Christian Church to establish a powerful and comprehensive agency to help uphold, expand, and organize a Christian civilization. It will gain an increasing power through coming generations."

Charles Parkhurst, editor *Zion's Herald*, writes: "I am anxious always to help on your *great, GREAT work.*"

Rev. Dr. Potts, of the *Michigan Christian Advocate*, says: "Someone predicts that the Roman Catholic University, at Washington, will become the greatest seat of learning in the world. That prophecy may prove true. That church can secure the money. But we believe the drift of the most enlightened people of the next century will be to Protestantism and not to Romanism. The American University will surely command brains and scholarship if it does not secure so large sums of money."

A NOTABLE GIFT.

Columbia University, New York, is again favored with a large gift. President Low has given \$1,000,000 for the new library to be erected on Morningside Heights. This is notable for its amount, for its purpose, from being from the president of a university, and as an example to men of wealth.

Such gifts were rare a few years ago, but are becoming more and more frequent with the large increase in the fortunes possessed by the wealthy. It is in harmony with the new university movements of the day. They are on a large scale—they necessarily must be. Columbia was reported last year as having over \$8,000,000 of productive funds, and still the millions are falling into her treasury.

It is given for a library. Knowledge must be handed from generation to generation. The living teacher must be the agent in this work. But the past ages show how important it is that knowledge should have a material habitation. The housing of knowledge, and the bringing together of the material out of which it is organized, are emphasized by this gift. Libraries and museums are the storehouses of knowledge, the magazines and workshops of the modern scholar.

This is no gift resulting from momentary impulse or whim of idiosyncrasy. It is the intelligent, considerate act of a man esteemed for his poise of character, and well versed in the needs of educational enterprises, the way money is used in them, and the good results achieved by them.

Contributed.

ROMANISM IN WASHINGTON.

It may well be an example to persons of large wealth. No man or woman ought to hold a large fortune in this country, where it is conceded that higher education should be fostered by private munificence, without aiding directly and largely some educational institution. It is the direct way to help the higher life of the nation. Education, art, literature, government, religion, indeed everything, is dependent on this.

President Low also establishes twelve Brooklyn scholarships for boys in Columbia College and twelve Brooklyn scholarships for girls in Barnard College. How this will foster the love of knowledge and its increase. America greatly needs opportunities for more young men and women to devote themselves to long years of study for the pure love of it, joined with a consuming desire to extend the realm of scientific investigation and carry scholarship to the very highest level. Would that some friend might speedily do for the American University what President Low has done for Columbia.

GIFTS TO COLLEGES.

The \$1,000,000 gift to Columbia College by Pres. Seth Low has called out expressions of praise from hundreds of editorial pens. Properly so. William C. Schermerhorn, Chairman of the Board of Trustees, followed this donation up with another of \$300,000, to be devoted to the erection of any building the College may need. F. A. Schermerhorn, another trustee, has given to the College the Townsend Library of War Records, with \$4,000 for its indexing. It was a great day, therefore, for Columbia, its munificent donors rivaling Mr. Rockefeller's contributions to the University of Chicago.

The past few weeks have been great ones for the Colleges. This list will show some of the institutions which have been favored. Other donations have doubtless escaped our notice: Monmouth College, Ill., \$80,000; University of Chicago, \$210,000; Williams College, \$34,000; Hamilton College, \$50,000; Catholic University of America, \$100,000; Alfred (Pa.) University, \$150,000; Wittenberg (O.) College, \$25,000; Tufts (Mass.) College, \$70,000; Bernard (N. Y.) College, \$100,000; Harvard, \$20,250; University of Pennsylvania, \$10,000; Yale, \$145,000; Dickinson (Pa.) College, \$40,000; University of Michigan, \$65,000; Columbia College, \$1,304,000. A significant fact is that in all these cases the gifts were made by a living alumnus. Not a dollar of it can be contested by relatives or diverted from its purpose, while in each case the donor will have the double happiness of seeing it applied according to his plans and realizing the fruits of his own generosity. It is the right kind of giving. It makes its own answer to the sneers of socialists and anarchists at the greed of wealth.

We are sorry we could not write the names of several Methodist Episcopal schools in the favored list, but perhaps their glad day is coming soon. — *Epworth Herald.*

Did the Editor forget that "Dickinson" is a Methodist Episcopal school? He might have put in the Ohio Wesleyan's \$50,000 library, and may now add \$150,000 to the American University for the Hall of History.

Rev. Dr. T. C. George, who was appointed Agent of the American University on the Pacific Coast, has died since our last issue. A good and scholarly man, he was an enthusiastic friend of our enterprise.

We are frequently asked about the real strength of the Roman Catholic Church in the Capital of our country. It is difficult to estimate it, and more difficult to state it. Its power lies so much in its *personnel*, and in its methods, that a mere statement of facts, such as we give below, is only suggestive. There have been stories afloat through the press and in platform addresses that were doubtless exaggerations of the real facts. There is certainly sufficient truth to give food for reflection.

In and around the Capital there is a perfect network of schools and colleges all leading up to the new Catholic University, which is becoming more and more the head of all the Roman schools of the country.

Georgetown College, established in 1778, had last year 106 instructors and 650 students; Gonzaga College, established in 1821, had 11 instructors and 141 students; St. John's College, established in 1865, had 13 instructors and 160 students; the Catholic University of America, established in 1880, had 13 instructors and 30 students. The last-named is the national university of the Papal church, and is confined strictly to post-graduate work. All these are within the District of Columbia. The total number of instructors they employ is 142; the total number of students last year was 981.

Besides these collegiate establishments, there are numbers of others, such as Carroll Institute, St. Rose's Industrial School, the Academy of the Visitation, the Convent of Notre Dame, St. Dominic's Convent, and St. Vincent's School, all within the District of Columbia. The numerous parochial schools, moreover, lend increased strength to these higher institutions, while to meet all this mighty educational force the Protestants have practically nothing but the common schools of the District.

As to churches, the Papists are equally fortunate, having sixteen magnificent church edifices, the finest structures in the city except the Government buildings. They are the church of the Immaculate Conception; Holy Name of Jesus; Holy Trinity; St. Aloysius; St. Cyprian; St. Ann's; St. Dominic's; St. Joseph's; St. Mary's; St. Matthew's; St. Patrick's; St. Paul's; St. Peter's; St. Stephen's; St. Teresa and St. Augustine (negro Catholic church).

Among other institutions owned by them, and conducted, of course, in their interest, are Providence Hospital, the establishment of the Little Sisters of the Poor, the House of the Good Shepherd; St. Ann's Infant Asylum, the Joseph A. Asylum and the Industrial Home Schools.

Taking the whole archdiocese of Baltimore, which includes the District of Columbia and those counties of Maryland lying west of Chesapeake Bay, we find a Romish population of 235,000, with 150 churches, 47 chapels, 60 stations, 22 orphan asylums, 90 parochial schools, 6 hospitals, 4 ecclesiastical seminaries, 8 colleges, 19 academies for young ladies, 2 founding asylums, 2 asylums for colored children (see Sadler's Catholic Directory for 1894, page 73).

At Baltimore are St. Mary's Seminary, established in 1791, and having last year 11 instructors and 245 students; and Loyola College, established in 1852, which had last year 11 instructors and 219 students.

At Emmettsburg, Md., is Mt. Saint Mary's College, established in 1808, and having last year 30 instructors and 108 students.

We give these figures from the Diocese of Maryland, because Romanism is a unit, the Archbishop of Baltimore holds the property, and throws the whole force of his personal and financial strength into work here.

In view of all this concentrated power, is it any wonder that the Papacy is stronger in Washington than in Rome? Is it startling that the Romanists have been able to accumulate \$13,600,000 worth of property in the District of Columbia? Is it a surprise that there have been scandals connected with the Indian Appropriation bill, the Sundry Civil bill, and the District Appropriation bill?

It is generally understood that this Baltimore diocese is the head center of the Jesuitical power on this continent. Georgetown University is owned and run by the Jesuits. Now an effort is being made, we are told, to transfer the headquarters of all the other religious orders here. The Marists and Paulists are already at the new Catholic University.

The coming of Satolli as the chief representative of the Pope, not to New York, but to Washington, has its significance also. The prestige given to the Roman Church by the Diplomatic representatives from the Catholic countries of the world can hardly be estimated. That it is used to further church interests is only natural, and in harmony with the well-known worldly wisdom of this church.

We do not say all this in the way of attack or denunciation. Religious liberty is a part of our creed. We only wish Protestants to know the facts and be awake to the interests of Evangelical Christianity at this heart and head of our national life. Protestantism here needs the help of friends all over the country. It is not as strong as it ought to be. It needs better churches, better schools, better institutions generally, with better endowments and support. S.

AMERICAN STUDENTS IN GERMANY.

The question is sometimes raised whether there would be sufficient students demanding training in original research and lines of special scholarship to fill the various departments of the American University were it ready to receive them. It may be a difficult question to answer, and all attempted answers be somewhat prophetic; but tendencies, as well as present facts, are certainly significant. While Clark, Johns Hopkins, Columbia, Yale, Harvard, Boston, and a few other universities have been giving graduate instruction, even they are evidently not meeting the full demand.

The number of American students going to Germany annually to find the advantages necessary to the training they must have in these days as specialists is very suggestive. Prof. W. Lewis, in his work "Die Deutschen Universitäten," gives the following figures for the twenty-two universities of Germany. The number of Americans studying in Germany in the year 1835-'36 was 4; in 1860-'61 was 77; in 1880-'81 was 173; in 1891-'92 was 446. Mr. Freeman A. Havighorst estimates that the number must be near 800 at this writing. He thinks this estimate conservative. There can be no question about a large increase since 1891-'92.

There is great significance in the present number of Americans in Germany. There is even greater meaning in the rapid increase in that number. There is a certain halo about study in Germany that is fascinating to young men. There are advantages from travel and from being in touch with another circle of educational life. But, after all, two facts remain. There are facilities and advantages for special training and original investigation in Germany that America does not provide for the most advanced scholarship. There is also in this country a greater and ever greater number who must have post-graduate training. The student body in America has been growing by leaps and bounds. This has had two effects. It has demanded a large increase in professional force. It has pushed the standard of scholarship in the schools higher and higher. Shall these demands be met chiefly by men trained in Germany? Or shall America do her share in producing the specialists who are to train America's brightest minds and make her future civilization? America will not much longer remain dependent on Germany. She must have her own universities. B.

"The Financial Side of the University."

Under the above caption the Rector, Bishop Keane, in the *Catholic University Bulletin*, gives an excellent resumé of the financial history of the Catholic University of America. We believe the reading of it would move some of our Protestant friends to "go and do likewise" for the American University. We can only summarize the article and show by what manner of gifts that institution has grown.

The Rector first states that this financial side had delayed the project for eighteen years, when it was again taken up in 1864. Miss Caldwell then offered \$300,000 for the starting of the work. The Bishops in council decreed the establishment of the University, and ten years later the Pope indorsed it.

The Bishop then shows why a university needs so much money for buildings, appliances, salaries, and why it can not be supported by students' fees—students being largely "burdened with but slender purses." So gifts were sought and received.

Baroness von Zedtwitz, sister of Miss Caldwell, gave \$50,000 for the chapel. The Misses Andrews endowed the Andrews Chair of Biblical Archaeology. The Misses Drexel endowed the Francis A. Drexel Chair of Moral Theology. Mr. Eugene Kelly gave \$100,000 to found chairs of Ecclesiastical History and of Holy Scripture, bearing the names of himself and wife. Miles P. O'Connor founded the O'Connor Chair of Canon Law by giving \$50,000. His wife gave also \$10,000. Patrick Quinn, directly and by will, gives \$25,000 for the Quinn Chair of Ecclesiastical History. An F. W. C. Mauley Chair of Theology has received \$25,000 from the Catholic Total Abstinence Union. Seven scholarships have been endowed also with \$5,000 each.

Then came the gift of \$100,000 from Rev. James McMahon for the McMahon Hall of Philosophy, which is now about completed. Mrs. Celinda Whitford died last June leaving \$50,000 to endow the James Whitford Chair of Law. Joseph Banigan, in January, gave \$50,000 for the Banigan Chair of Political Economy. Other sums of \$10,000 and lesser amounts are also mentioned. A Chapel Fund Association has been formed, the mem-

bers of which give \$10 a year to support the religious services. Also a Divinity Fund Association and a University Fund Association, the former of priests and the latter of the laity, have been organized, each member of which gives \$100 a year to defray current expenses and help on the general organization.

The article also implies that many smaller gifts have been received, which have helped to swell the current that has carried them on to success. Such giving makes rapid development possible. It is notable that though the University is not open to women, these devoted Catholics have given very largely.

May we not hope that before the American University is as old, it may publish even a brighter financial history? Who will help to make it possible? A.

HISTORY.

The increased interest in history is manifesting itself in many ways. The Napoleonic craze, one might almost call it, is a sign of the times. It is an impressive fact that of the 210,000 volumes consulted at the Astor Library last year, the greatest number, 23,000, were American histories; then came American literature, with 16,000 volumes; then art and general history, 11,000; then American documents, also 11,000.

Within a few months a conference of representatives of a number of our leading colleges has been held in New York for the purpose of founding a historical review. It was decided to publish a quarterly magazine to be known as "The American Historical Review."

So do the reading public and the colleges move together. In the olden times it was thought important for rulers to know something of history, and a few leading minds to have some information concerning the evolution of human society. In America it is different. The people are the rulers. They should know history. "The American citizen uninformed in at least the primary lessons of history is weak, fatally unarmed for both the offensive and defensive warfare of his citizenship."

History, says Mr. Ridpath, "is essential to the happiness, intelligence, and perfection of the American family." Here the informed mind is a necessary factor. The household is not joined merely to eat, sleep, and survive. It is joined and held in unity by "an intellectual and spiritual heat and light, without which organization does not organize and the domestic bond does not bind." It is the absence of this that often leaves the family to disrupt and segregate. The brotherhood and sisterhood of the race, the solidarity of humanity, needs to be felt at the hearthstone to temper the assertiveness of the individual. What can do this more effectively than history that brings a sympathetic touch with all the peoples of earth?

The American mind and American life thus provides a better ground for historical study; mightier motives and loftier aims for seeking the knowledge of the past and its application to the present than was ever before manifest in the situation and attainment of any nation.

To these facts many minds are now awaking. It is seen that this field must be cultivated anew. The new interest in history must not be allowed to run riot without any direction. New demands for opportunities to study history must be met. Now is the hour for original investigation and for training specialists in this great department. We rejoice that the American University is taking this movement in its rising tide by founding a graduate historical department. L.

EDUCATIONAL ITEMS.

Amherst is bereaved with all of us in the death of ex-President Julius H. Seelye. During his presidency the institution received more than \$825,000 in gifts.

Albert College, Belleville, has had the offer of \$10,000 from Mr. H. A. Massey, of Toronto, on condition that another \$10,000 be raised for extension.

Boston University has received from the King of Siam 39 large octavo volumes, comprising the sacred writings of the southern Buddhists. Chicago, Princeton, and Johns Hopkins are also favored by the King. Rev. C. W. Rishel is elected professor of historical theology.

Catholic University of America announces the opening of four new departments with the beginning of the next school year. They are letters, philosophy, experimental and applied sciences, and the social sciences.

Columbia, New York, announces thirty university scholarships in philosophy, political science, and pure science. The faculty has adopted the old German system of conferring the Ph.D., which not only requires a thesis on an approved subject, but also that the candidate appear in public to defend his assertions before experts.

Cornell White School of History and Political Science issues an amended course for 1895-'96. It has nine instructors, four fellows, and twenty-eight graduate students.

Dickinson College, at Carlisle, Pa., is erecting a new building on the spot where Washington reviewed the troops on their way to suppress the whiskey insurrection.

De Pauw University has lost a scholarly and efficient president by the resignation of Dr. J. P. D. John.

Harvard has shown its appreciation of Bishop Vincent's service as preacher in residence by electing him to a third term.

Johns Hopkins keeps up its excellent work in historical and political science, recently issuing valuable studies on "The Early Relations Between Maryland and Virginia," and "Is History Past Politics?"

Moody's Mt. Hermon, and Northfield schools have asked the legislature for permission to hold \$2,000,000 worth of property in real estate. Many citizens are opposed to it, as this action would free it from taxation.

New York University has recently had a gift of another new building. It also receives the direction of the endowment of the American Institute of Christian Philosophy. This is a good illustration of how soon personally raised and used endowments are apt to be changed from their original purpose on the person's death.

New Orleans University has received \$10,000 from a New England friend of Bishop Mallalieu. This school knows no race distinctions.

Ohio Wesleyan University is about ready to begin work on its new Slocum library, and hopes to soon complete the arrangements for the transfer of the Wooster University Medical School, with its fine hospital in Cleveland, to its own control.

Princeton has lately received a rare and valuable book, printed by John De Spira, at Venice, in 1469. It is a natural history by Pliny the elder, and is one of the first books printed at Venice.

Union Theological Seminary has received an addition of 3,000 volumes to its hymnological department. These were the collection of Prof. F. M. Bird, and the seminary now has over 5,000 volumes in that department.

Wesleyan University shows a net increase in the endowment fund of \$125,000 during the presidency of Dr. Raymond. This increase is almost entirely free from special restrictions to specific purposes. This increases its practical value.

The 40-inch lens for the Yerkes' telescope, to be mounted on the shores of Lake Geneva, Wisconsin, is finished. When the Clarks received it at Cambridge from Paris two years ago, it was worth, in the rough, about \$40,000; after two years of grinding and polishing, its value is probably twice as much. With this wonderful glass, four inches wider than that of the Lick telescope, the astronomers of Chicago University will detect new glories in the heavens.—*Zion's Herald*.

For the Berlin Exposition in 1896, a monster telescope is now being wrought. The four lenses measure each 110 centimeters (about 45 inches) in diameter, but the length of the instrument will be but five and one-half meters. The lenses, therefore, will be larger, but the telescope shorter, than the Yerkes' telescope.

New Zealand has invented a unique method for the prevention of intemperance. It proposes to pass a law to the effect that any person convicted of being an habitual drunkard shall be photographed at his own expense and a copy be supplied to every saloon-keeper in the district. The dealer selling liquor to such a person is to be fined heavily.—*Christian Statesman*.

A reform to which the Treasury Department is giving attention, and one which is found very difficult to execute, is the prevention of the sale of intoxicating liquors in Alaska. The country is so far distant, United States officers so few, the United States courts so far apart, and what laws exist there are enforced with so much laxity, it is almost impossible to prevent the importation of liquor into Alaska, and still more difficult to stop the manufacture of "moonshine whisky."

Benevolent.

CAPT. JAMES WILEY, of Bethlehem, Pa., has recently given \$5,000 to St. Luke's Hospital, and is erecting a Children's Home, at a cost of \$6,500, as memorials to his deceased wife.

THE Old South Church, Boston, has recently celebrated its 225th anniversary. Its contributions last year amounted to \$116,267.

THOMAS E. PROCTOR, of Boston, Mass., left in 1885 will \$100,000 for the Massachusetts General Hospital, to be held in trust until the principal and interest reach the amount of \$400,000, when it is to be expended in erecting an insane asylum.

IT HAS been known for some time that the Protestant Episcopal Church has been planning for a great Cathedral foundation at Washington, including a series of schools. Within a few months, Mrs. ex-Senator Hearst has agreed to give \$175,000 to build the "Hearst School for Young Women," as a part of the general scheme. The site is already purchased.

Book Notices.

[The Editor will give brief notices of such books as are appropriate to the Courier. Copies sent to the Editor for notice will be placed in the University Library.]

COLLEGES IN AMERICA, by John Marshal Barker, Ph.D. The Cleveland Printing and Publishing Co., Cleveland, O., 265 pp.

This is an interesting and valuable work on lines not heretofore traversed by any one writer in a single volume. The author starts with the rise of universities in the Old World, and then describes the planting of colleges in the New World, shows the characteristics of the American college, and sets forth the functions of a college to be the securing of a symmetrical development in its students, the advancement of knowledge, and preparation of men and women for service. There are also chapters on Student Life, Personal Factors in a College Education, the Practical Value of an Education, and Our Indebtedness to Colleges. Pres't Warren says: "What an incalculable effect it would produce could it be read by every official member of our wide-spread Church! How I wish it might be done!"

PAMPHLETS have come to us as follows, for which we thank the different authors: *Methods and Results of Investigations on the Chemistry and Economy of Food*, W. G. Atwater, Ph.D., U. S. Department of Agriculture; *A Preliminary Catalogue of Parasites*, C. W. Stiles and Albert Hassall; *An Extreme Case of Leucoderma in a Negro*, G. L. Magruder, M.D., and C. W. Stiles, Ph.D.; *Parasitism*, C. W. Stiles; *Notes on Parasites*, Chas. Wardell Stiles, Ph.D., 21, 22, 23, 26, 27, 28; *The Aquarium of U. S. Fish Commission at the World's Columbian Exposition*, S. A. Forbes, I. S. K. Reeves, G. P. Clinton, C. W. Stiles.

The Bachelor of Arts; The Author's Journal; The American Magazine of Civics; Electrical Engineering; The Southern Cultivator; Louisiana; Homeric Memory Rhymes; References in the Pentateuch to Jair and Hivwoth Jair; The Alpha; The University Graduate Magazine; Revista Juridica, organo de La Sociedad de Jurisprudencia, San Salvador; The American University Magazine; Forward Movement Magazine; Reports of Board of Education, Sunday School Union and Tract Society of the Methodist Episcopal Church; Sir Francis Bacon's Cipher Story, and The Tragical Historie of the Earl of Essex.

We take pleasure in acknowledging, with our thanks, the receipt of Circulars, Announcements, Catalogues, and Year Books, from the following institutions: Boston University, Year Book; Harvard Catalogue and Special Circulars of Lawrence Scientific School; Report of the President and Departments of Clark University, Worcester, Mass.; Programme of Massachusetts Institute of Technology; Wesleyan University Year Book; University of the City of New York, Catalogue and Announcements; Columbia College Handbook; Cornell Register and Circulars of Special Departments; Syracuse University Annual; The Lutheran Theological Seminary Catalogue; The Princeton College Bulletin, the February number being especially valuable for its full details of the life and work of Dr. James McCosh; Johns Hopkins University Circulars, the April number containing the Commemoration Day Address of President Seth Low; Catholic University Bulletin, full of interesting papers and reports; Catalogue of the Washington and Lee University; Annual of the Case School of Applied Science, Cleveland, Ohio; Year Book of DePauw University; The Indiana University Catalogue and Report of President; Catalogue of the University of Wisconsin; Catalogue of the University of Kansas and Kansas University Quarterly; The Minnesota University Magazine; The Lawrentian of Lawrence University; The University of Colorado, Catalogue; The Educator, Morgan College, Baltimore; Catalogue of Central Tennessee College; Quarterly Bulletin of Gammon Theological Seminary; Catalogue of Fort Worth University; Annual of School of Expression, Boston, Mass.; Catalogue of Bareilly Theological Seminary, India; The University Magazine, Peking University, China; Anales de La Universidad, Santiago, Chili, one of the largest volumes that comes to us from any University, and shows that excellent work on the Flora and Exploration of South America, as well as other scientific lines, is being done by the professors.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

VOL. IV.

WASHINGTON, D. C., SEPTEMBER, 1895.

No. 1

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

A LARGE GIFT.

GENERAL J. WATTS de PEYSTER, of Tivoli, N. Y., has just made it possible for the Trustees to proceed at once with the erection of a second building of the American University. While he made this large and important gift on June 11, through Bishop John F. Hurst and the Rev. Arthur M. Griffin, of Tivoli, there were some details to arrange, so that the gift was only formally accepted on August 20, by Bishop Hurst, as Chancellor, and Mr. John E. Andrus, as President of the Board of Trustees. We need hardly add that it was with expressions of high appreciation that this action was taken on behalf of the Trustees. It was decided to name this second building, "The General J. Watts de Peyster College of Languages." It will be planned for all the special work to be done in Language and Literature, covering the departments of Oriental and Semitic, Greek, Latin, Romance, Germanic, English, and in time all other tongues and literatures of earth.

They also accepted from the General a further gift of a bronze statue of heroic size, now being made in Paris at great expense, and decided that it should be placed in front of the College of Languages. This will be the first of many works of art that will in time add beauty to the classic groves, and help to educate the men and women whose footsteps are to wake the echoes in its halls.

The De Peyster College of Languages will be erected near by, and be a companion piece of, the Hall of History, for which the sum of \$150,000 was subscribed and assumed last spring. Arrangements will be made at once for the building of the College of Languages.

Indeed, it is understood that an architect is already at work on some suggestive designs, and the corner-stones of the two buildings—History and Language—will be laid at the same time. It is the intention that excavations shall be begun in November.

This is not General J. Watts de Peyster's first gift. He has been benevolent in many directions. We understand he has given much to the Episcopal Church. He erected the fine Methodist Episcopal Church at Tivoli, and gave it to the Trustees. He purchased and gave to the Woman's Home Missionary Society the splendid property now used as the J. Watts de Peyster School for Girls, at Tivoli.

The General is a member of the old historic De Peyster family, has been an interesting figure in New York life for many years, is a master of a number of languages, and author of several volumes, an authority in Napoleonic matters, a member of learned societies on both sides of the sea. He has a fine mansion at Tivoli that is full of valuable books and interesting historic relics.

Will not this gift suggest to some one else that they do likewise?

BOOKS.

We would call especial attention to the gifts of books received since our last issue of the COURIER. From the estate of Mr. Stephen L. Parrish, late of Washington, D. C., there comes 230 bound volumes, 30 pamphlets, and a fine collection of photographic and stereoptic views. From the Hon. Judge William M. Springer comes 75 volumes of "War Records," in good calf binding. From Dr. Muller two large old volumes of Stackhouse's History of the Bible, and single volumes from various other friends. A fuller description will be found under book notices.

HALL OF HISTORY.

We hardly need to remind our readers that the building of a university is not a matter of a day or a year. The initial steps of a great scheme involving more than a score of buildings and millions of dollars are very important and must be taken with great care. This is especially so of the first building, as it sets the type of architecture for the whole institution. The authorities are moving carefully, and propose to be sure they are right as they go ahead.

A Building Committee has been appointed, composed of Bishop John F. Hurst, President of the Board John E. Andrus, Treasurer Matthew G. Emery, Mr. Anderson Fowler, Mr. A. B. Duvall, Mr. John E. Herrell, and Vice-Chancellor Samuel L. Beiler.

This committee has already secured plans from six different architects, which will be laid before the Board of Trustees about the middle of October for a decision as to which shall be used.

Since the adjournment of the Trustees in May, when a subscription of \$150,000 was completed (by a small balance being assumed by individuals present), there have been received additional subscriptions of \$1,500 from B. W. Blanchard; William J. Jackson, \$500; and William H. Jackson, of Salisbury, Md., \$500.

It is very much desired that we receive \$15,000 to \$25,000 more on the Hall of History. There will be some extra expenses in connection with the first building that it will be well to meet, independent of the \$150,000 which is to go into the building itself.

There will be the need of doing some grading, besides that which goes with the excavations for foundations. We must also provide for a central power house for heating and lighting. So there is yet room for gifts from our friends who want to be in at the start of this great enterprise.

As said about the College of Languages, it is the purpose to begin excavations in November.

ASBURY MEMORIAL HALL.

SUBSCRIPTIONS.

Since our last report we have received two additional subscriptions—\$100 from Rev. John Wilson, D. D., of the North Ohio Conference, and \$100, in the name of Rev. John Janes, a cousin of Bishop Janes, who died in 1843, from his son and daughter, Frank and Emma Janes.

CASH RECEIVED SINCE JUNE 1, 1895.

\$100.—W. S. Birch (by Mrs. Emma L. Daniel), R. L. Dashiell (by W. H. Murphy), W. H. Meeker, J. J. Reed.

\$50.—Ezra Tinker, J. H. Michell, J. V. Bates, T. S. Bond, D. A. Jordan.

\$33.33.—J. C. Jackson (by W. R. Esher).

\$25.—F. J. Belcher.

\$20.—R. F. Elsdon, W. McK. Hester (by Jane Adams), J. B. Wentworth (by A. O).

\$12.50.—J. R. Bryan.

\$5.—R. L. Spurter, A. M. Barnitz.

\$3.—W. Ackroyd, W. McK. Riley.

OTHER GIFTS.

Besides some small amounts to different funds, such as the Land Fund and the Epworth League Fund, all of which will be reported in due time, we have received \$500 for the General Fund from Mrs. Fanny Speed, of Louisville, Ky., through the Rev. Joseph S. Jencks, D. D.

NOTES.

The *Chicago Tribune* says that the total donations by gift and will in this country since January 1, counting individual sums exceeding \$1,000, are as follows: January, \$1,698,900; February, \$1,873,300; March, \$736,559; April, \$1,311,100; May, \$4,239,300; June (to date), \$575,600. Total, \$10,434,150. Of this amount colleges and universities have received \$4,075,750; hospitals, \$1,593,000; churches, \$789,000; and libraries, \$208,000, or nearly two-thirds of the total. The remainder, \$3,708,400, has been distributed among museums, art galleries, and various classes of charity.

Mrs. Caroline Polhemus, of Brooklyn, New York, has announced her purpose to build a dispensary for the Long Island Hospital at a cost of \$250,000, and to endow it with \$250,000 as a memorial to her late husband, Henry D. Polhemus.

The Boston Museum of Fine Arts has recently come into possession of a legacy of \$50,000.

The Indianapolis Art Association receives \$225,000 from John Herron, who was entirely unknown to the association.

Rev. Dean Cannon, of Lockport, New York, has endowed two scholarships in the Propaganda at Rome for young men from western New York.

The most complete medical library in the country, says the *Washington Star*, is that of the Army Medical Museum in that city, under the care of the War Department and supervised by John S. Billings. It includes 112,000 bound volumes and 150,000 pamphlets, or, as is estimated, three-fourths of the medical literature of the world, and has an elaborate catalogue which renders all its contents available for use.

General Francis M. Drake, a liberal benefactor of Drake University and contributor toward the erection of the Hall of History of the American University, has been nominated for Governor of Iowa by the Republicans.

Professor Newcomb, of the Washington Observatory, succeeds Professor Helmholtz as a member of the Paris Academy of Sciences.

Professor Lorenzo Dow McCabe, one of our best-loved instructors, has resigned his position of Professor of Philosophy at the Ohio Wesleyan University, after fifty years of honorable service.

The United States Census report just issued gives the figures as follows: Roman Catholics, 6,250,000; Methodists, 4,600,000; Baptists, 3,725,000; Presbyterians, 1,280,332; Lutherans, 1,230,000; Protestant Episcopalians, 540,000. These are the figures compiled by the officers of the Government, and are correct. Boasting of mere numbers is a small business, but it is important to have the truth stated about such matters.

DR. LOWRY ON THE UNIVERSITY.

Our thanks are again due to the Rev. Asbury Lowry, D. D. His name stands among the ministers of the Cincinnati Conference who gave \$100 each toward the Asbury Memorial Hall. He has spoken of his desire to do more. He has recently given about seven columns of his excellent magazine, *The Divine Life*, to the advocacy of this enterprise. He published in full a circular letter from Bishop Hurst, and prefaced it with these significant words:

"Bishop Hurst, I believe, has the credit of projecting the American University at the seat of our National Government. But the need of a school equal to any German or English University as a seat of learning, and far superior to any of them in moral and religious influence and evangelical faith and character, was felt some time before the Bishop undertook the praiseworthy task of founding such an institution.

"In 1876 and 1877 I spent several months in Leipsic, Germany, the seat of one of her great universities. I found no vital religion there except in the little American chapel sustained by American students. I worshipped in the Kirche, once the Church of Luther. It was an emblem of desolation. The place was uninhabited, and almost deserted on a bright Sunday morning.

"A prominent and popular professor had been advertised to preach, the congregation was small and seemed uninterested. But at night the great theatre near by and contiguous to the university was packed like a beehive. I went to the entrance to make observations and verify or contradict reports. I had heard that a great theatrical concourse met there on every Sabbath evening. I found it sadly true.

"I looked in the saloons and found them crowded with both sexes, enveloped in tobacco smoke, and engaged in drinking—not beer only, but the strongest liquors. I found in the restaurants, at other times, that they quaff from coffee to the strongest intoxicants. I met American students, both male and female, and was told they generally patronized the Sunday evening theatre. The Lord's day was no more sacred than any secular day. I found young men from Canada and the United States completing their education preparatory to the Christian ministry. I mingled with them and preached several times in their chapel. After I left I was written to and requested to become their chaplain. Being on my return tour from Egypt, the Holy Land, Asia Minor, Greece, and the Continent, and having reached England, where I was engaged to spend some time in service, I regretfully declined the invitation. I have sometimes been sorry that I could not, or did not, enter the open door. If we must send our students to Germany to gilt edge their education, we ought to send to these seats of learning the antidote to German rationalism and religious indifference. How inconsistent it is to suffer our young ministers to immerse themselves in such an atmosphere in order to get a finishing touch for our evangelical ministry.

"Since these explorations and observations were made in Europe, I have not ceased to wish and hope that a University would be erected in the United States, so prominent and so equipped with men and means as

not only to stop trans-Atlantic graduation, but turn the current back to the land of the free and the home of the brave, in which resides the best form of Christianity and civil government.

"We have the prospect of such an institution in the American University.

"Let us give it our prayers, our money, and our students." A. L.

BENEVOLENT.

The will of B. P. Cheney, of Dover, Mass., leaves \$70,000 to educational and charitable institutions.

St. Luke's Hospital, New York, receives by the will of the late Rufus Waterhouse a bequest of \$200,000.

Edward A. W. Hunter leaves \$500,000 for a ward in the University of Pennsylvania Hospital, at the death of his wife and daughter.

Dr. D. K. Pearson, of Chicago, who is reported to have given away about \$2,000,000, recently offered \$50,000 to Berea College, Kentucky, on the condition that \$150,000 more be raised.

The will of the late Augustus Knowlton, of Gardner, Mass., bequeaths more than \$100,000 to found a charity to be known as "The Gardner Home for Elderly People."

Mrs. Sarah A. Smith, of Philadelphia, leaves \$300,000 for the maintenance of the children's playground at Fairmount Park.

CHANCELLOR DAY AND A UNIVERSITY.

We wish we could republish the whole of Chancellor Day's contribution to the Educational number of the *Christian Advocate*, on "Methodism and her Colleges." We can only make some extracts that bear especially on a university. He may have been thinking of his own Syracuse University, but his words are also a plea for the American University.

"Do the Methodists, who boast that their Church was born in a university, hold higher education in just proportion to the other great interests of the denomination? We are great, numerically, great in Church property, great in wealth and social influence, but we have not one great university between the two seas; not one that ranks in endowment and equipment with Harvard, Yale, Columbia, and Chicago. Every other prominent denomination has at least one, and some of them two and three great universities.

"To-day we have not a university or the combination of two or more universities where the sons and daughters of the Church can receive an education in all of the branches of higher learning demanded by the times and furnished by similar institutions of other denominations.

"It may be said that we must not be impatient; 'colleges grow;' 'it takes time.' It is true that the

college idea grows, but a college is made out of that idea just as fast as you furnish the money. It has taken eight hundred years to grow the idea up from Oxford to Leland Stanford, but it took only five years to make Leland Stanford with the millions given to it. And the same is true of Johns Hopkins and Chicago. The Methodists can have a great university, as great as the sun shines upon, as soon as they will put in the money. The part that grows has grown. The part that waits only waits to be made when we have the money to get the material and workmen.

"We are a young Church." Yes, but we waste in needless indulgences the endowment of a university every year. We have surplus enough to found a Harvard every twelve months.

"We are in the surgings of tremendous thinking and activities, and if we are to retain our hold upon the world and lead and control thoughtful men, if we are to command respect instead of contempt, and utter a voice that men will hear and heed, we must have a religion with strong brains. Our fiery zeal must burn and glow in furnaces of knowledge.

"Nowhere in the Church can men invest their money in forms of usefulness so secure and where returns will be so certain while time stands as in our colleges. This world needs brains. It always will need brains, and the colleges of our Church are Christian brain factories. We have to use material from the farms, the shops, the coal mines, the canals, and the stores. We must have the working capital. When you make your wills do not count the colleges out, but do not wait to die. Help them while you live. If you want a thoughtful pulpit that your boy in the public school will respect; if you want educated physicians to whose advice and skill you may safely commit the health of your home; if you have a drop of patriotism in your veins, and would bring back your country from the demagogue to the statesman; if you care for the choicest amenities of literary and social life; if, as a Christian, you would interpret God's word and human history; provide learning, thoroughly furnish, endow, and man your colleges. We shall not be less spiritual."

"That is a true statement; 'the idea has grown.' 'The part that waits only waits to be made when we have the money to get the material and workmen.' And we believe the money is coming to the American University. There are signs in the sky that a brighter day is dawning for all our educational work. The material and the workmen will be forthcoming. 'God is not dead.' The silver and the gold are His. His hand is on many hearts and they are planning to carry out the Divine purposes.

KIND WORDS FOR THE AMERICAN UNIVERSITY.

The projected American University is winning new friends. From unexpected quarters come words of approval and promises of substantial support. For this *The Epworth Herald* is glad. If an ordinary man were leading this great enterprise we would have our misgivings. But with Bishop Hurst at the front we have perfect confidence in its ultimate success. To build a small school requires only a few months, but to rear a great educational institution that will perma-

nently honor our denomination and our country requires years. Bishop Hurst understands this. He is not hurrying matters. He is building strongly—building for to-morrow and the day after. Among the latest notes of approval we notice an exceeding appreciative article in the *Methodist Review* of the Southern Church. Strong reasons are given why the university should be founded and supported, and the writer then concludes in this way: "As a practical and powerful bond of union between all the bodies of American Methodism we believe there is, and can be, nothing so appropriate or efficient as this projected university. Here the flower of our youth, from the South and from the North, from the East and from the West, may come and mingle in the common lofty aims of such an institution, and, going hence with appreciation of the merits of one another, learned in the friendly friction of university life, build both in church and state on the foundations of the first century of the republic a structure more beautiful and enduring than the one our eyes behold."—*Epworth Herald*.

Thanks, Dr. Berry, thanks. Now help us to wheel the Epworth League into line behind this great enterprise. We want the young people of Methodism for education. They ought to be rallied on this line. To be rallied they need one object that will unify them, so that they may feel the momentum of a common movement. What is there better than the American University?

AN EDUCATIONAL RENAISSANCE.

After the destruction of Cokesbury College by fire, in 1795, and again a year later, for a score of years following the Church did not feel, as Asbury expressed it, that Methodism was providentially called to build colleges. But the fires of enthusiasm could not be quenched in the heart of the church, and an educational renaissance soon followed. The first academy of the present order was opened in Newmarket, New Hampshire, in 1817, and transferred in 1825 to Wilbraham, Mass., where for seventy years it has sent out its beams far and wide, and has contributed largely to the education of more than 25,000 students. For less than three-fourths of a century the work of education in the Methodist Episcopal Church has been carried forward with varying success, and notwithstanding all mistakes and failures, that work to-day presents the following encouraging showing: Theological institutions, 19; colleges and universities, 57; classical seminaries, 56; foreign mission schools of higher grade, 76; making a total of 202 separate institutions of learning, with property valued at more than \$26,000,000 and over 42,000 students. It may also be encouraging to add that a very large proportion of the money now invested in these Methodist institutions of learning has been given within the last thirty years, making the contributions to this noble cause little less than \$1,000,000 annually.

The American University, projected at Washington, is gradually commanding the confidence and support of the whole church. Since its work will be confined exclusively to professional and technological studies, it will in time constitute a fitting head and crown of the educational system of the Methodist of this continent.—Rev. C. H. Payne, D. D., in *Zion's Herald*.

WOMEN AT GERMAN UNIVERSITIES.

We condense from the "*Independent*" this interesting statement of the attitude of the German Universities toward the higher education of woman. A hundred years ago, one woman, the learned Dorothea von Schlöser, attained the dignity of a doctor's degree, and it has taken a hundred years for such an event to occur again. Miss Grace Chisholm, of England, has received the degree from Göttingen by the special sanction of the Minister of Education. Heidelberg has granted the degree of Ph. D. to one woman, and another has received an honorary degree from Freiburg last year.

This does not mean that women can be freely matriculated as students in any German University. The trouble is in the matriculation. The proposal to admit women students at Berlin has been discussed in the University Senate and rejected; and yet occasionally a woman has gained admission to lectures. At Göttingen a number of Englishwomen and Americans have been admitted to lectures on showing certificates from some foreign university, and under these circumstances are now allowed to take part in the seminaries and present themselves for the degree of Ph. D.; and under this regulation there are now twelve women studying at Göttingen, of whom two are Germans; but they pursued their preparatory studies in other countries. At Leipzig women are admitted to lectures if the professor will permit it, but are not allowed to proceed to a degree. At Heidelberg women are admitted to the lectures, but each case is considered by itself and is not allowed to be a precedent. At Tübingen one woman has actually been matriculated, but this was due to special private interest. Schools are being organized to fit girls to enter the universities, and we may look for an organized attack on all the barred and bolted doors. There is no proposition for a university for women. The demand will be for co-education—it is coming. The world moves. B.

CHRISTIAN ADVOCATE AND AMERICAN UNIVERSITY.

No religious paper in America exerts a more powerful influence than the *Christian Advocate*. Its versatile editor has well been called "the Horace Greely of the religious press." Dr. Buckley is a Trustee of the American University. His words in a recent editorial should have weight with the corporation, and with the whole country.

"The American University at Washington is a tree that seems to have visible and invisible roots. It is being developed on what may be called the German principle, of slow but sure. Walking by faith is about to be rewarded to some extent by sight. Buildings are to rise, and when on that site they will be as a city set upon a hill, that can not be hid. This is a large enterprise. Its appeal is to all Methodism. Its corporation, if not cosmopolitan, defies the bounds of States and of separate denominations. Washington is yet to be a center of great universities. The Catholic University, if by some it is regarded as a menace, by all it is justly considered a spur. The Government of the United States by its Constitution is forever divorced from any form of religion, yet denominational influence

has been exerted to a large degree at the Capital. The establishment there of a central institution of learning makes certain the presence there of Roman Catholic dignitaries, masters of the art of influencing individuals. It does not imply bigotry to consider desirable at Washington the establishment of a great institution whose primary element shall be Protestant, and all the more so because of the existence of such a one as that to which we have referred; "not for that" we would recommend the exertion of denominational influence for political ends, but because the best way of preventing it is to have two great forms of Christianity, Protestant and Catholic, where both may be eyes, ears, and tongues.

"This, however, is the least of the reasons upon which the projectors of the American University rely. They foresee the destiny of Washington. They perceive the value of all the Government collections which are at the service of students. They know its historical relations. They rely much upon the opportunities to study civil government, and in particular the history, methods, and traditions of the United States. They dwell upon the climate, which, like that of Baltimore, is far enough South to be softened in the winter, and not far enough to be enervating for any period of the scholastic year. If the corporation can adopt Goethe's motto, "Haste not, rest not," or John Wesley's, with the same meaning, "I am never in a hurry, but always in haste," it can build itself into success without in any degree weakening the long catalogue of useful and growing institutions in Methodism, North and South, to which we have referred."

THE AMERICAN UNIVERSITY.

BY BISHOP JOHN F. HURST, D. D., LL. D.

On May 28, 1897, the American University was incorporated in the District of Columbia, for post-graduate and professional courses of study and for original research. Its design is to secure the best and highest instruction in every department of human learning, under influences intellectually the strongest and spiritually the purest. The charter from the District of Columbia was surrendered and a new charter, with enlarged powers, was granted by Congress in 1893.

The search for a probable site for the institution in the suburban region of Washington began in January, 1890, and was continued two weeks until January 25, when an appropriate piece of ground was found. The merits of the chosen site lay chiefly in its being an undivided tract, elevated four hundred feet above the sea level, and of such surface as to make the entire space available for sites of buildings. It consists of ninety acres of ground on the northwest heights of the District of Columbia. It is a plateau from which the ground declines both on the city and country sides. The view from it toward the northwest commands the panorama of the Blue Ridge Mountains, forty miles away, while on the city side, to the south and east, the eye rests upon the National Capital, the Manassas plains, and the Potomac down to Alexandria. For a perfect atmosphere, no better place could be found. This feature had to be considered with the utmost care, from the fact that students would live there, or in the neighborhood, from September to the following June.

It was not known when the land was selected precisely what relation it would sustain to the great residence street, namely, Massachusetts Avenue; but a few months after the contract was made, it was learned that Massachusetts Avenue, if extended in a straight line, would go directly to the site, passing the new Naval Observatory on the way.

The land was bought by faith alone. There was no wealthy individual who came forward to make pledges for its purchase. Every step at the initial stages was taken on the ground of reliance on the great multitude of Christian people, and not upon the generosity of one or of a few. Mr. John F. Waggaman, of Washington, furnished the \$1,000 for the option. The option was later accepted, and the land was purchased for \$100,000. The first payment of \$20,000 was made February 28, 1890. The remaining payments have been met, and on March 1, 1895, the last payment was made, and the land is now in the possession of the Trustees of the American University. It seemed only fair that the citizens of Washington should pay for the site, and this plan has been strictly adhered to, though a few individuals from a distance have seen fit to add their contributions. It is safe to say that \$90,000 of the amount has been furnished by the citizens of Washington alone. Congregations, Sunday schools, Government officers, clergymen, merchants, clerks, and mechanics, and people of every class, have contributed toward the fund. It is highly probable that at least ten thousand of the citizens of Washington have been contributors for the purchase of the site of the American University.

WHY THE AMERICAN UNIVERSITY?

Wise and trusted leaders of our American Protestantism—especially of Methodism—were consulted before the first step was taken for the purchase of the land. It was believed that for the interest of all Protestant Churches the time had come when a thoroughly evangelical university should be established at the National Capital. It seemed to be high time that for the best university advantages our young people should not be compelled to cross the ocean, but that the best instruction, either in this or foreign countries, should be furnished here, and that our American youth should not need to go abroad, as they have been doing since the beginning of our national history, for superior educational privileges.

The lesson of the State colleges and universities had proved to be a bad one. The most of the State institutions of learning had been developed in the most capricious way. The *personnel* of the entire faculty was reduced to a humiliating subjection to political fluctuations. When the State passed from the control of one party to another, both trustees and professors were subject to change. There was no fixity whatever. A still more reprehensible state of things had been found in the relation of some of the State institutions to the Christian standards. The fundamental doctrines of Christianity had not received the attention they deserved. In one case I have learned that during about a decade one of the State institutions had no chapel service for the students, and chapel prayers were only again instituted after a change in the presidency of the college.

With these sad reminders, it has been concluded that the control of the American University should be lodged in a board of trustees who are Christian people, thoroughly devoted to Protestant interests; and, while two-thirds of the board are members of the Methodist Episcopal Church, there are six denominations represented in that corporation. In addition to the members of the Methodist Episcopal Church who are upon the board, three are members of the Methodist Episcopal Church, South, namely, Bishop Alpheus W. Wilson, of Baltimore; Dr. William W. Smith, President of Randolph-Macon College and Secretary of the Board of Education, and the Hon. Julian S. Carr, of North Carolina. Besides these two denominations, there are also among the members of the board representatives of Baptist, Congregational, Presbyterian, and Protestant Episcopal Churches. While one Protestant Church is thus made responsible for the doctrinal quality of the university the other Protestant denominations have thus far co-operated as heartily as if the responsibility were their own. The fraternal character of all deliberations and measures has been so far without a jar, and this we regard as a strong indication of the providential mission of the university. So far as the future faculty is concerned there is no denominational limitation. But the Protestant Churches of the country may understand that there will be no promulgation of doctrines not in accord with the evangelical standards of the whole Protestant Church.

WHY IN WASHINGTON?

Washington has long been the political and scientific center of the country, and it is the most available place for becoming the intellectual center of the continent.

The fitness of the National Capital as our country's true educational center did not escape the attention of George Washington. With characteristic far-sightedness he fixed upon it as the only proper location for a truly national university. He spoke and wrote upon the importance of it, planned for such an institution, and gave \$25,000 as the foundation of a fund for his "favorite National University."

The original letter in which Washington makes this donation known, written from Philadelphia to Governor Brooks, of Virginia, March 16, 1795, has recently come into the possession of the present writer. In this letter he says:

Ever since the General Assembly of Virginia were pleased to submit to my disposal fifty shares in the Potomac, and one hundred in the James River Company, it has been my anxious desire to appropriate them to an object most worthy of public regard.

It is with indescribable regret that I have seen the youth of the United States migrating to foreign countries, in order to acquire the higher branches of erudition, and to obtain a knowledge of the sciences. Although it would be injustice to many to pronounce the certainty of their imbibing maxims not congenial with republicanism, it must nevertheless be admitted that a serious danger is encountered by sending abroad among other political systems those who have not well learned the value of their own.

The time is therefore come when a plan of universal education ought to be adopted in the United States. Not only do the exigencies of public and private life demand it, but if it should ever be apprehended that prejudices would be entertained in one part of the Union against another, an efficacious remedy will be to assemble the youth of every part under such circumstances as will, by the freedom of intercourse and collision of sentiment,

give to their minds the direction of truth, philanthropy, and mutual conciliation.

It has been represented that a university corresponding with these ideas is contemplated to be built in the Federal City, and that it will receive considerable endowments. This position is so eligible from its centrality, so convenient to Virginia, by whose legislature the shares were granted, and in which part of the Federal District stands, and combines so many other conveniences, that I have determined to vest the Potomac shares in that university.

Presuming it to be more agreeable to the General Assembly of Virginia that the shares of the James River Company should be reserved for a similar object in some part of that State, I intend to allot them for a seminary, to be erected at such a place as the wisdom of the legislature shall deem most proper.

I am disposed to believe that a seminary of learning upon an enlarged plan, but yet not coming up to the full idea of a university, is an institution to be preferred for the position which is to be chosen. The students who wish to pursue the whole range of science may pass with advantage from the seminary to the university; and the former, by a due relation, may be rendered co-operative with the latter.

I can not, however, dissemble my opinion that if all the shares were conferred on a university it would become far more important than when they are divided; and I have been restrained from concentrating them in the same place merely by my anxiety to reconcile a particular attention to Virginia with a great good, in which she will abundantly share in common with the rest of the United States.

I must beg the favor of your Excellency to lay this letter before that honorable body at their next session, in order that I may appropriate the James River shares to the place which they may prefer. They will at the same time again accept my acknowledgments for the opportunity with which they have favored me of attempting to supply so important a desideratum in the United States as a university adequate to our necessity, and a preparatory seminary.

This beautiful plan of Washington's failed. From his days to our own, however, distinguished statesmen and educators have renewed the advocacy of the project. Recently the Roman Catholic Church has established an institution here to represent its faith, promote its interests, and become the heart of its educational system. We admire its courage and the keenness of its vision. But we deem it due to Protestantism—to which the world of science and vital religion looks for leadership—to undertake the establishment of an institution of learning which shall represent its highest educational purposes, and that spiritual life on account of which the world has deemed it worthy of confidence.

The university must be in Washington because of the unequalled facilities of the National Capital as a distributing center for great intellectual and moral forces, and because of the incomparable advantage for scientific and literary investigation presented by the General Government. American university life is destined to center here. The Congressional, Departmental, and Technical libraries, the Smithsonian Institution, and National Museum, the Army and Navy Medical Museum, the great Naval Observatory, the Department of Agriculture and Labor, the Patent Office, the Geological Survey, the Bureau of Ethnology, the Botanical Garden, the Museum of Hygiene, the Bureau of Education, and the many subdivisions of scientific investigation under the direct patronage of the Government, are gratuitously furnished and constantly multiplying. Already the money invested in the collection of these departments and bureaus amounts to more than \$32,000,000; and for their maintenance and increase about \$3,500,000 are expended every year. All these great collections

are now thrown open by special act of Congress to all scientific students, without a dollar's cost to the student. In the shaping and securing of this liberal legislation the labors of President William W. Smith, LL.D., of Randolph-Macon College, were largely influential and effective. Money given for education here will go farther than anywhere else in the country, because of these priceless accessories. A student in the American University will always find this other university—Washington's matchless collection of science and art—within reach and without cost.

STUDENTS.

The American University proposes to receive as students young men and women who shall have completed their academic studies and received their first degree. Its plan is to furnish the amplest facilities for the broadest and highest work in professional, special, and original studies. The idea of advanced education must now be higher. The standards of a few years ago will not suffice for to-day.

HIGHER EDUCATION.

In the realm of material appliances for comfort and health, the American people, both in their labor and in their leisure, are satisfied with nothing less than the best that can be devised by the ingenuity of mankind. So in the pursuit of intellectual culture the American people will not be permanently content with any system of learning that does not include the highest and the best.

Toward the realization of the ideal best the effort has been continuously and persistently made, from the founding of Harvard College down through the two and a half centuries of our colonial and national history. As in art, so in science, literature, and education, America has hitherto been and must yet for a time be, though in a decreasing degree, dependent upon Europe for what is highest in attainment. For the past thirty years there has been a most hopeful, vigorous, and, in the main, a well-directed series of movements in several distinct centers of American education toward the establishment, upon the college foundations laid in the earlier years, of courses of study having the principal features of the advanced university work of the Old World. Though these outgrowths of the collegiate courses in the direction of elective, professional, and post-graduate studies have often been seriously lacking in the essentially full equipment of a true university, and in some instances have doubtless diverted the collegian at a premature stage from his much-needed process of training; yet to the observer of the progressive spirit and methods of American education, it is to-day apparent that a great and commendable advance has been made toward the goal of supreme excellence.

The need for the higher education is clear, and the call is loud. To meet the need there must be the creation of the new methods and their adaptation to existing institutions. To supply the facilities that shall be equal, or superior, to those found in Europe in order to keep at home those who now in large numbers go abroad for help not adequately furnished on American soil, is perhaps a worthy object for our endeavor; yet a more worthy ambition is so to develop our present institutions and to establish such others of higher grade as that we shall encourage and stimulate a hundred-

fold larger number of our trained men and women to enter these higher walks of thought, and add by a large increment to the percentage of those who not only possess knowledge, but who, by personal influence in all the avenues of professional, commercial, and social life, incite the multitudes to do more of independent thinking.

In this general forward movement among educational forces the interest of all the Methodist Churches is not merely that of an onlooker, but more—that of an earnest and active participant. In all our colleges and higher institutions there is a strong and steady progress toward the lofty standards involved in a true university. The sober thought of the Church recognizes the great, if not insuperable, difficulties of developing any one or any few of our existing institutions into such a university as the gravity of the situation requires for our denominational stability and for our leadership among the Protestant forces of this age. The very excellences and advanced standards of all our Methodist schools point to the necessity for a unique and crowning institution that shall so thoroughly unify and efficiently supplement their work that Methodism may contribute not only its numerical quota of able thinkers and scholarly authors for the coming centuries, but that in the future contests in the arena of thought the intellectual fiber of all our Protestant champions of truth may be proved the best the world has ever seen.

MAGNITUDE OF OUR UNDERTAKING.

The institution is designed to represent the highest form of Christian education, to be an exponent of the best forces of Christian thought and activity, and to express, at this center of our civil and political influence, the firm faith of our people and their devotion to Christ and His kingdom. We can not afford to make it inferior to the strongest in the Union.

PROPOSED BUILDINGS AND ENDOWMENTS.

These should include the Administration Hall, to contain the general offices for the management of all departments, with a Senate Chamber as an auditorium for the general assembly purposes of the university. There should be combined with it a library and chapel, forming a central group. To these must be added a series of buildings:

HALL OF HISTORY.

Departments: American, European (West and North), Mediterranean, Oriental.

HALL OF SCIENCE.

Departments: Mathematics, Physics, Chemistry, Biology [Physiology, Comparative Anatomy].

HALL OF PHILOSOPHY.

Departments: Metaphysics and History of Philosophy, Christian Archaeology, Evidences of Christianity, Comparative Religion, Psychology and Logic, Sociology and Economics, Civics [Constitutional Law and Science of Government].

HALL OF LANGUAGES AND LITERATURE.

Departments: Oriental and Semitic, Greek, Latin, Romance, Germanic, English,

HALL OF LAW.

HALL OF MEDICINE.

HALL OF ART.

To these must come such other structures as the expanding needs of the university shall demand. In addition to these buildings there must be special endowments for instruction in the various halls, classified under the general names of Professorships, Lectureships, Fellowships, and Studentships.

For these purposes we estimate that *Ten million dollars* must be dedicated to God and humanity. For this sum—\$10,000,000—we make our appeal. We appeal to all friends of Christian Education, under whatever denominational banner, and to all lovers of Protestant America, for co operation in the great work of establishing the American University, which shall conserve and promote all the interests of our country and our common Christianity. Members of other Christian bodies have given practical expression of their gratitude at the inauguration of this great enterprise. The influence of its work will not be limited, but will be world-wide.

To the rich we appeal to give largely of the wealth of which the Lord has made them stewards. How can they better perpetuate their beneficence and name than by some princely gift to build a hall or endow a chair of learning in such an institution at the National Capital?

To those of limited means we appeal to give according to their ability, though their gifts be farthings. They or their children may be the recipients of thousand-fold benefits.

The assets of the university, in real estate, securities, and substantial subscriptions, are now \$500,000, exclusive of the site, now valued at three times its purchase price.

Bequests should be made to "The American University, situated in the District of Columbia." We advise, however, that all who have the ability should make their gifts promptly, in their lifetime, that they may have the satisfaction of seeing the fruit of their beneficence. The risk is too great and the issues too serious, in these days, to intrust too confidently one's noble, benevolent plans to the doubtful mercies of discontented heirs and industrious attorneys.

The present outlook is for the erection of the Hall of History as our first building. The beginning of an endowment for this department has already been provided by the gift of \$100,755 by a lady in New York, and pledges have recently been received of \$150,000 for the erection of the building. The trustees have authorized the selection of a building committee and the immediate securing of competitive plans from leading architects, with the purpose of an early adoption of such as are approved, and the laying of a corner-stone as soon thereafter as contracts can be closed.

One of the most significant and helpful features of the enterprise has been from the very first that our ministers have evinced a most intelligent and ardent interest in its progress. As a practical demonstration of their deep devotion to this educational work on the highest lines, voluntarily from many different localities and quarters of the land there came offers of financial aid from the slender purses of our preachers. These subscriptions have been merged into one fund, known as the Asbury Memorial Fund, which has now grown to be \$75,000; and the end, who can tell? It is to be used for a building to be known as Asbury Memorial

Hall—a monument to the immortal pioneer bishop of American Methodism—and also for endowment when the fund shall have become sufficiently large. Already \$10,000 of this subscription has been paid. The hall will be a reproduction of the Christ Church College, Oxford, the college where John Wesley studied.

At the session of its General Conference in Memphis, in May, 1894, the Methodist Episcopal Church, South, suspended its rules, and with great unanimity passed the following resolution:

Whereas, a movement has been set on foot, under the leadership of the Methodist Episcopal Church, for the establishment of a great Protestant university in the Capital City of our nation; and

Whereas, it becomes all Protestants, and especially all Methodists, to give encouragement to this important enterprise:

Resolved, That we heartily approve and endorse the undertaking of the trustees of the American University, to establish in Washington City a great university for post-graduate study and original research, under the influence of Protestant Christianity and the auspices of American Methodism.

This graceful and hearty action is a pledge and prophecy of the fraternal and harmonious co-operation of the two great bodies of our common Methodism in maintaining the spirit of consecrated culture that so clearly marked the founders and fathers of the Wesleyan movement. All our friends most highly appreciate these generous resolutions.

The ideals of John Wesley, of a developed and a constantly-developing intellectual force side by side with the growth of the spiritual nature in man, have always characterized the leaders of the Wesleyan reform—a reform involving in the operation of the Divine Spirit upon man, first, the renewing of the heart; second, the culture of the mind; and third, the application of the hand. Insisting, as Methodism does and will, upon the first as the great prerequisite to a true life, it hesitates not to affirm and maintain that the second and third must accompany, or closely follow, as seals and proofs of the genuine character of the first.

Education thus forms a prominent feature in the history of our denomination. Our membership has been a large factor in the establishment of the public school system, which is the common pride of our American Protestantism. In intermediate and collegiate instruction we yield to no other denomination in the spirit and success with which institutions of these grades have been brought forth and developed. Leading minds in our common Methodist Church have, however, felt a growing need for a half century that more ample provision should be made for continuous helpfulness to our college graduates as they emerge from institutions of training to take up the special and crowning work of their lives.

As a practical and powerful bond of union between all the bodies of American Methodism, we believe there is, and can be, nothing so appropriate or efficient as this projected university. Here the flower of our youth, from the South and from the North, from the East and from the West, may come and mingle in the common lofty aims of such an institution, and, going hence with appreciation of the merits of one another, learned in the friendly friction of university life, build both in Church and State on the foundations of the first century of the republic a structure more beautiful and enduring than the one our eyes behold.—*Methodist Review*.

EDUCATIONAL NOTES.

Ann Arbor Senior Class presented the University with a bust of President Angell.

Chicago University is trying to take Rush Medical College under its wing.

Harvard has sent out a little class of only 678 men this year.

Wesleyan has secured \$11,000 endowment fund for its library, and \$2,500 to meet immediate necessities in its maintenance.

Leland Stanford University has gained a point in the government's suit against the Stanford estate for \$15,000,000, but the case must still go to the Supreme Court for settlement.

Syracuse is erecting a new Medical College building.

Purdue University is honored with having ex-President Harrison appointed a trustee by Gov. Matthews.

Denver University has recently received \$10,000 through Bishop Warren.

University of Pennsylvania has been blest with \$500,000 from Provost Harrison in honor of his father.

Ohio Wesleyan University has received property worth \$30,000 from Benjamin F. Cessna, M. D., of Kenton, Ohio. The sum establishes a professorship to bear the Doctor's name.

The University of North Carolina has just celebrated its centennial. It is the oldest university in the South.

University of the Pacific has been freed from its \$50,000 debt by the heroic efforts of the Chancellor, Dr. F. F. Jewell.

University of Cincinnati has lately received \$45,000 to complete its north wing, from Mr. Henry Hanna, in honor of his son Thomas, who lost his life under the wheels of a cable car.

Massachusetts Institute of Technology recently received \$10,000 from the will of B. P. Cheney, of Dover, Mass.

Boston University graduated this year a class of 209: 27 in Theology, 59 in Law, 23 in Medicine, 32 in Agriculture, 62 in Liberal Arts, and 6 in Post Graduate studies.

Berea University has elected the scholarly and successful acting-President, M. F. Warner, to its Presidency.

The University of the City of New York is reported to have recently graduated fifty young women from the woman's law class. Many of these do not intend to practice law, but took the course for its educational value.

The Catholic University of America will open a department to laymen this autumn. Bishop Keane said at Georgetown no students will be more welcome than those trained by members of the Society of Jesus. He has not said anything yet about the welcome of women.

Georgetown University (Jesuit) has received \$4,000 from Mrs. Maria Coleman, to be invested in a telescope, a new transit, and meridian circle.

Book Notices.

[The Editor will give brief notices of such books as are appropriate to the Courier. Copies of volumes sent for notice will be placed in the University Library.]

PHOTOGRAPHS OF YELLOWSTONE PARK and views in Wyoming and Montana Territories, made in connection with Hayden surveys, by W. H. Jackson.

A splendid collection of 37 views, finely bound in large quarto volume.

THE YELLOWSTONE NATIONAL PARK and the mountain regions of Idaho, Nevada, Colorado, and Utah, with chromo-lithographic reproductions of water-color sketches by Thomas Moran—L. Prang & Co., 1876.

This magnificent quarto volume, in rich binding, contains 15 plates of the wonderful scenery of that interesting region, with two maps and a descriptive text by Prof. F. V. Hayden.

PHOTOGRAPHS OF WESTERN SCENERY, illustrating the Hayden surveys. Unbound.

These consist of 29 finely mounted photographs, 2 x 2½ feet, 90, well mounted, 12 by 14 inches, and 24, mounted, 8 by 10 inches, making a rich collection indeed.

PHOTOGRAPHS SHOWING GEOLOGICAL AND OTHER FEATURES OF WESTERN TERRITORIES, by 1st Lieutenant George M. Wheeler. Richly bound, quarto.

This fine volume contains 60 excellent photographs.

PANORAMIC VIEW OF WASHINGTON CITY. A quarto, substantially bound, and giving a clear idea of the city when it was taken.

PHOTOGRAPHS OF FISHES. Large size; some 80 in number; mounted; unbound; with about 30 other photographs of scenery and buildings in the United States.

STEREOPTICON VIEWS. A large collection of views in the Western Territories.

ATLAS OF UTAH MOUNTAINS.

WILKES' U. S. EXPLORING EXPEDITION; atlas; botany. Vol. 1, by Asa Gray, M. D. Quarto; unbound. Full of excellent work.

ATLAS OF COLORADO; geological and geographical, by Prof. F. V. Hayden.

ATLAS OF STATES AND TERRITORIES over which surveys had been extended in 1879.

WHEELER'S GEOGRAPHICAL SURVEY WEST OF 100th MERIDIAN. Quarto. Vols. 2, 3, 4, and parts of 5, on Zoology, Palaeontology, &c.

HAYDEN'S SURVEYS OF TERRITORIES; geological; monographs; twelve volumes; quarto, richly bound.

HAYDEN'S ANNUAL REPORTS, BULLETINS, MISCELLANIES; 26 volumes and a number of pamphlets.

HAYDEN'S SUN PICTURES OF ROCKY MOUNTAIN SCENERY. Quarto, of beautiful pictures.

POWELL'S GEOLOGICAL SURVEY; 3d Annual Report.

POWELL'S LANDS OF THE ARID REGION.

POWELL'S CONTRIBUTIONS TO NORTH AMERICAN ETHNOLOGY. Vols. 1, 4, and 5.

POWELL'S GEOLOGY OF HIGH PLATEAUS OF UTAH.

SECOND ANNUAL REPORT OF BUREAU OF ETHNOLOGY.

CLARENCE KING'S SURVEYS. 7 volumes and maps.

EXPLORATIONS AND SURVEYS OF THE ISTHMUS DARIEN, ISTHMUS OF NICARAGUA, AND ISTHMUS OF TEHAUNTEPEC. 3 volumes.

EMORY'S UNITED STATES AND MEXICAN BOUNDARY SURVEY. 3 volumes.

DIPLOMATIC CORRESPONDENCE, from 1774 to 1789. 9 volumes, bound in calf.

REPORT OF CENTENNIAL COMMISSION. 8 volumes, giving a full record.

PUBLIC LIBRARIES IN UNITED STATES, by the U. S. Bureau of Education, 1876.

AMERICAN ALMANACS, 1830 to 1861, and 1878 to 1883. 37 volumes.

CENSUS OF THE UNITED STATES. 12 volumes; 1790 to 1840, 1 volume; 1850, with compendium, 2 volumes, and also mortality statistics; 1860, 4 volumes; 1870, with compendium, 5 volumes.

GEORGE WASHINGTON'S PUBLIC ACCOUNTS during the Revolutionary War; reproduced in fac-simile in 1844.

A very interesting volume.

GEORGE WASHINGTON'S LETTERS ON AGRICULTURE, reproduced in fac-simile by Knight, 1844.

UNITED STATES OFFICIAL REGISTER [blue book], complete from 1816 to 1881, making in all 36 volumes.

A very valuable set of books.

MINUTES OF AMERICAN CONFERENCES, held annually in America from 1773 to 1794, inclusive. Published in Philadelphia, 1795 and sold by John Dickcuss.

This is quite an interesting old volume to Methodists, and especially to Methodist historians. It is bound in calf, and is in excellent preservation.

MINUTES OF ANNUAL CONFERENCES, 1773 to 1879, inclusive, in 17 volumes. Publication begun in New York in 1846; Mason & Lane, agents.

This set we hope some one will complete up to date. They are bound in calf and in good preservation.

JOURNALS OF THE GENERAL CONFERENCE of the Methodist Episcopal Church from 1795 to 1880—Volumes 1 to 8. Publication begun in New York, 1855. Carlton & Phillips, agents.

The full sets of the Journal is becoming valuable. This one should be completed to date, and then kept up year by year.

FLETCHER'S WORKS. Four volumes, New York. Carlton & Lanahan, agents.

WESLEY'S "METHODIST CONFERENCES" in England, 5 volumes, beginning with 1744. London 1812.

EMORY'S EPISCOPACY, AND DEFENSE OF OUR FATHERS, in one volume; New York, 1838.

PORTRAITURE OF METHODISTS AND HISTORY OF WESLEYAN METHODISTS, Jonathan Crowther, 1813.

HISTORY OF THE DISCIPLINE, Emory, 1845.

SHORT HISTORY OF THE METHODISTS, by Jesse Lee, 1810. Often quoted as an early authority, and of much value.

MEMOIRS OF THE WESLEY FAMILY, by Adam Clarke, 1823.

A REFUTATION OF THE DOCTRINE OF UNINTERRUPTED APOSTOLIC SUCCESSION, by Richard Tydings, Louisville, 1844.

THE METHODIST CHURCH PROPERTY CASE; Report of the suit of Henry B. Bascom and others v. George Lane and others, 1851.

CHURCH HISTORY, by Martin Ruter.

BIOGRAPHY OF REV. L. L. HAMLINE, by F. G. Hibbard, 1880.

CENTENARY ALBUM, a contribution to the early history of Methodism in Maryland, by G. C. M. Roberts, D. D., Baltimore, 1866.

MINUTES OF ANNUAL CONFERENCES, 1856. Paper.

CHANNING'S DISCOURSES, REVIEWS, AND MISCELLANIES. One volume.

HISTORICAL SKETCH OF TRINITY CHURCH, NEW YORK,

All the above are from the estate of the late Stephen L. Parrish, Washington, D. C., and formerly of Westchester, Ohio. They are a part of a very valuable collection of books that Mr. Parrish had been making for many years. His wife and daughter have given them to the University, believing they will be more useful there than in their private library.

A NEW HISTORY OF THE HOLY BIBLE, with answers to most of the controverted questions, dissertations, and the most remarkable passages, with notes explaining difficult texts, rectifying mis-translations, and reconciling seeming contradictions; the whole illustrated with proper maps and sculptures. By the Rev. Mr. Thomas Stackhouse, Curate of Finchley, &c., &c., London, 1733.

These two royal quarto volumes have been presented to The American University by the Rev. D. H. Muller, D. D., of Cleveland, Ohio. It is evident the author's intentions were great, and if he could in these days accomplish all he indicates in the title of his book, it would be well to put the heavy volumes in general circulation again. But we fear the very preference would frighten most readers, as they would open to it and find the heading, "Apparatus of the History of the Old Testament." A little farther on he would learn that Dr. Wm. F. Warren's book locating paradise at the North Pole was rather late in appearing, as a century and a half ago Dr. Stackhouse placed it on a map at the junction of the Euphrates and Tigris. So we put the old volumes on the shelves as valuable reminders of the work and faith of scholars of the last century.

THE WAR OF THE REBELLION—A compilation of the official records of the Union and Confederate Armies, from the secession of South Carolina to the close of the long struggle. Prepared under the direction of the Secretary of War, by Lieut. Col. Robert N. Scott, Third U. S. Artillery, and published pursuant to the Act of Congress approved June 16, 1880.

To the Hon. Wm. M. Springer the American University owes the possession of these splendid 75 volumes, some of which are now published for the first time. They will be invaluable for research into the real facts connected with the immense armies and complex movements of those fearful years. They make a most excellent beginning of the historical collection that must be gathered for the Hall of History.

OUTLINE STUDY OF LAW, by Isaac Franklin Russell, D. C. L., LL. D. Baker, Voorhis & Co., New York.

This is a work on Elementary Law, designed for the use of students and others who may wish to understand the general principles of law. It is an interesting, a fascinating volume. It is not a mere skeleton whose bones stare you in the face. It has flesh, blood, life. It brings out the great principles of law in so natural, orderly, clear, transparent, untechnical way, that the layman who runs may read. Every student in any field, every minister, every citizen ought to read it. We thank our former instructor, Dr. Russell, for it.

RAILWAY SURGERY; a practical work on that special department for railway surgeons, by C. B. Stemen, A. M., M. D., LL. D. J. H. Chambers & Co., St. Louis.

This valuable book is the result of a very busy man's experience in accidental and railway surgery. While its finely illustrated pages are intended for surgeons, its reading by the traveling public would not be amiss. We gladly add it to our Medical Library.

THE ANGEL AND THE VISION, or the New Christian Commission, by Christopher Fleming H. Revell & Co., N. Y.

A series of pulpit addresses by one of our younger ministers, who hopes thereby to help ministers and people to that larger Christianity of loftier spiritual vision, broader intellectual horizon, and more intensely practical activity which he believes is to conquer the world for Christ.

THE JESUITS, their history, constitution, moral teaching, political principles, religion, and science, by Dr. Otto Henne am Rhyn. J. Fitzgerald & Co., N. Y.

RELATION OF SOCIOLOGY TO ANTHROPOLOGY; pamphlet, by Lester F. Ward.

100th ANNIVERSARY OF WASHINGTON PARISH; pamphlet.

THE PROPHET OF TISHBE; poem; pamphlet, by Joseph H. Beale.

MAGAZINES AND PAMPHLETS

The Bachelor of Arts for July and August has several interesting articles and much space given to the athletic department. *The School Journal*, 25th annual, with valuable school discussions. *Kansas University Quarterly*, containing studies in scientific and sociological fields. *The Catholic University Bulletin*, with interesting articles on the University of Paris, German Schools in the XVI Century, coupled with much valuable matter, maintaining the high, scholarly character of this publication. *The Fecundity Report of the Board of Park Commissioners*, sent us by the Olmsteds, is valuable for its matter, its maps and illustrations of the extensive parks now being laid out in the "larger" Boston. *Expression*, a new venture, timely and valuable, edited by Prof. S. S. Curry, and published by the School of Expression, Boston. *Parallax of Eta Cassiopeiae*, Nos. 6 and 7, by Hermau S. Davis, of the Observatory of Columbia College, N. Y. *Protection from Lightning*, by Alexander McAdie, of the U. S. Weather Bureau. *The Natural and Industrial Resources of Maryland*, by Thomas Scharf, LL. D., presented by Mr. Boogher. *Massey's Illustrated*, a journal of news and literature.

John F. Waggaman,

Real Estate Investments,

700 14th Street N. W.

Washington, D. C

I am agent for the beautiful suburban property known as Wesley Heights, situated opposite the site of the American University. This property has a great future, not only because the University is to be built opposite, but on account of its desirability as a resident part of the District of Columbia. I am also agent for lots in Morris' Addition to N. E. Washington, which presents a good field for investment for small amounts. All this property is laid out in conformity with the general plan of the city of Washington and is entitled to the city improvements. In addition, Washington, being the Capital of the Nation, is free from strikes and conditions that exist in manufacturing cities. I will make investments on first mortgages, secured on real estate, interest at 6 per cent. We will also purchase for you improved property that will pay between 6 and 7 per cent., after paying taxes and insurance. Now is the time to invest from \$250 to \$100,000. For further particulars write to above address.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

VOL. IV.

WASHINGTON, D. C., DECEMBER, 1895.

No. 2

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

EDITORIAL NOTES.

MRS. FRANCIS H. ROOT—\$25,000.

THE death of Mrs. Delia S. Root, widow of Francis H. Root, and mother of Mrs. Bishop Hurst, on November 10, 1895, has left a vacancy in many hearts, and also in the ranks of those who befriended the needy. She was a Christian woman, always true, faithful and courteous. The simplicity of her character shone all the more brightly when material wealth was added to her store. She gave with liberal hand to every righteous cause, seeming to regard her wealth as a sacred trust. She was the president, since 1875, of the managers of the Home for the Friendless in Buffalo. She sympathized with her husband in all his benefactions. The American University is honored with a bequest in her will of \$25,000.

"Among the beautiful pictures
That hang on memory's wall,"

will ever be one of this gracious woman, with kindness in her hand and sunshine on her face, helping and blessing even from her home above.

\$250,000.

The pledging of this amount for the endowment of the College of Scientific Temperance is a splendid stroke for the cause of temperance and for the University. Do not fail to read the full account and the legal agreement on another page.

\$10,000.

Mr. John D. Flint, of Fall River, Mass., has just sent to the Chancellor a deed for a block of business property in the heart of Findlay, Ohio. It is carefully estimated that \$10,000 will be realized out of it. The thanks of all the friends of the University are due Brother Flint for this splendid gift.

Dr. H. W. Swartz and wife, of Gettysburg, recently sent a check for fifty dollars to the Treasurer.

CHAPLAIN McCABE is sure the interest and enthusiasm of the public concerning the American University are increasing everywhere.

THE ANNUAL MEETING of the College Presidents of the Methodist Episcopal Church in November reaffirmed their endorsement of the American University.

INTERESTING relics are frequently sent to the University. Bishop Hurst's exhibition at the Detroit Conference of the original letter of George Washington, offering to give \$25,000 for founding a university at Washington, brought out the following gifts: Rev. Mr. Knobloch gave the latch from the vestry door of the first Methodist chapel ever built in Bristol, England. This was often lifted by John Wesley. Rev. T. Y. Bate gave the original copy of the printed proof sheets of John Wesley's "Notes on the New Testament," corrected in the handwriting of the founder of Methodism. Rev. D. C. Challis gave an ancient coin from the city of Thyatira. Mrs. Francis W. Ware gave the ordination parchments of her maternal grandfather, signed by Bishop Asbury in 1810. Rev. John Wright presented a copy of the original of "Butler's Analogy," printed in 1736.

BOOKS are constantly sent to us by publishers, authors and friends, who wish to help stock the library. Our thanks are due Hon. Washington Gardner, Secretary of State for Michigan, for securing for us a complete set of 23 volumes of the Pioneer Collections of Michigan. A minister, who does not want his name mentioned, sends 30 volumes.

Mr. F. K. Smart, Detroit, Mich., sends six volumes of "Fletcher's Checks," second American edition, owned and used by his grandfather, Rev. E. K. Smart, and his father, Rev. James S. Smart, D. D. All such gifts merit our gratitude.

THE WASHINGTON DISTRICT Epworth League Convention, in resolutions endorsing the American University, directed the Literary Department to establish a University Bureau to diffuse information among Epworthians and promote interest in the work and aims of the University. A good suggestion to other District conventions.

THE reception of the representatives of the University by conferences, conventions, institutes, churches and individuals, to whom the interests of the institution are presented, is more cordial and sympathetic than at any time in the past.

AT the last meeting of the Executive Committee Dr. C. B. Stemen, Dean of the Fort Wayne Medical School and editor of the *Fort Wayne Journal of Medical Science*, was authorized to develop and organize the College of Medicine in the American University.

TRUSTEE'S MEETING,

A special meeting of the Board of Trustees was held at the Arlington Hotel, Washington, D. C., on the 16th of October, to consider plans for the Hall of History. There were present, President John E. Andrus, Dr. C. H. Payne, Dr. A. J. Palmer, and Chaplain C. C. McCabe, of New York; Dr. C. W. Buoy, of Philadelphia; Dr. D. H. Carroll, of Baltimore; Dr. W. W. Smith, of Lynchburg, Va.; Hon. Jacob Tome, of Port Deposit, Md.; Bishop John F. Hurst, Mrs. E. J. Somers, Mrs. John A. Logan, Mr. John E. Herrell, Mr. B. F. Leighton, Mr. A. B. Browne, Mr. A. B. Duvall, Mr. S. W. Woodward, Mr. C. C. Glover, and Mr. B. H. Warner, of Washington; also, Dr. Richard Wheatley, of Irvington-on-Hudson; Dr. C. B. Stemen, of Fort Wayne, Ind.; Rev. Arthur M. Griffin, of Tivoli, N. Y.; Samuel L. Beifer, Vice-Chancellor; Charles W. Baldwin, Secretary, and Albert Osborn, Registrar.

Plans were presented by the following well-known architects: G. & W. Audsley, Mr. Ernest Flagg, and Mr. James Brite, of New York; Mr. S. R. Badgley, of Cleveland, Ohio; Messrs. Van Brunt and Howe, of Boston and Kansas City, and Mr. W. M. Poindexter, of Washington, D. C.

These gentlemen had shown great skill and put much work on their plans. It was no slight task to study them so as to grasp them sufficiently to compare them. They all had their merits. But after long hours of careful consideration, it was found that no one of the plans for the Hall of History could carry the unanimous judgment of the Board. Some studies for the J. Watts de Peyster Hall of Languages were also submitted, as well as a new scheme for laying out the grounds. It was finally voted to refer the entire matter to the Committee on Plans and Building, with power, after consultation with experts, to select an architect, to decide upon the plans for the Halls of History and Language, to locate them upon the campus, and to proceed as soon as practicable with their erection.

A resolution of grateful appreciation of the gift of General J. Watts de Peyster, which enables the Trustees to proceed to the erection of the College of Languages, was passed with hearty unanimity; and also a request that a bronze statue of great value, now being completed in Paris, be placed by the General in front of the College of Languages.

While the meeting had not reached a decision on architect or plans, it was felt by all that real progress had been made, and that a little delay in the inauguration of such a scheme was better than by haste to make any fundamental mistake.

THE BUILDING COMMITTEE.

It was confidently expected that before this writing the work of excavating would be begun. But unexpected delays have thwarted the purpose of the committee. The delay is not simply on the plans for the two buildings—the Hall of History and the Hall of Languages. It is the general scheme for the grounds, and, more particularly, the general style of architecture that is to characterize the whole series of University buildings, that have demanded further time. This mat-

ter is one of such importance that all have felt it best to delay a little rather than to make any fundamental mistake. Several schemes for the grounds, materially modifying that of Mr. Olmsted, have been presented by architects. The committee has consulted Mr. John C. Olmsted about these, and it is hoped that the preliminary questions may be finally settled by the time this paragraph reaches our readers. The location of the two Halls, now to be erected, can then be quickly agreed upon. The plans for these two structures are in such an advanced state also that actual work on excavations need not be much longer delayed. The management feels confident that such delay has been of decided advantage to the University, and is justified by every interest of the enterprise. There are indications that decided improvements may be made in the avenues and streets around the University during the year 1896. It need hardly be said that the committee is as anxious to make progress as any of the friends of the University can be who do not understand the difficulties in the way. The members of the committee propose to be sure that they are right, and then go ahead.

EDUCATIONAL NOTES.

The Queen has granted an amended charter to the University of Durham, whereby all degrees except D. D. are open to women.

The library of Syracuse University has 47,000 volumes.

The value of all property used for educational purposes in the United States is placed at \$600,000,000; the public school property alone is valued at \$400,000,000.

The University of Berlin has the largest attendance of any similar institution on the globe; namely, 8,343 entitled to lecture privileges.

There are one hundred and forty-three women's colleges in the United States.

It is estimated that Methodism has \$52,000,000 invested in educational institutions, and is educating 60,000 students.

Holland admits women as students to all its universities, but the largest number of women students is to be found in the Swiss universities, where they number over four hundred.

Dickinson College has three hundred and fifty students.

The death of the eminent Louis Pasteur is a great loss to the scientific world. He was a public benefactor.

The McMahon Hall of Philosophy in the Catholic University was opened the first week in October with good wishes from the Pope, a Latin address by Satolli, and a dissertation by Dr. Pace on "The School of Philosophy."

A recent study of the facts shows that Harvard has a decreased percentage of students from the East, and an increased percentage from the South and West. In the Middle States the undergraduate department lost in proportion, while the graduate departments about held their own. In the Central States the graduate departments made a large gain, while in the Western States the principal gain was in the undergraduate department.

Frank Hamilton Cushing, ethnologist and discoverer among the Zuni Indians, has just gone to Florida, where he hopes to obtain facts of great value and interest in regard to prehistoric life on the American continent.

The Chancellor, Bishop John F. Hurst, delivered the address at the inauguration of President Ferguson, of Hackettstown Institute.

The Pepper Laboratory of Clinical Medicine has just been opened at the University of Pennsylvania.

A \$6,000 scholarship has been founded at Radcliffe by friends of Mrs. Agassiz in her honor.

THE COLLEGE OF MEDICINE.

On the 16th of October, 1895, the Trustees of the University took the first step in the direction of a College of Medicine. They put into Dr. Stemen's hands the following credentials:

"Dr. C. B. Stemen, Dean of the Fort Wayne College of Medicine and editor of the *Fort Wayne Journal of Medical Sciences*, is authorized to develop and organize the Medical Department of the American University, at Washington, D. C., and is hereby commended to the esteem and confidence of all friends of this important undertaking."

Dr. Stemen is well and widely known through his large practice, his relation to the Pennsylvania Railroad, his relations with the Ohio and Fort Wayne Medical Schools, and his editorial work on the oldest medical journal in Indiana. He is in the prime of life, where wisdom is joined with energy, and has shown his rare executive abilities in many directions.

Dr. D. S. Lamb, of the Medical Museum, invited about twenty-five of the leading medical men of Washington to meet Dr. Stemen in an informal conference on Saturday evening, December 7.

The response must have been very gratifying to both Drs. Lamb and Stemen. There were present, besides Dr. Lamb, Dr. Stemen, and Vice-Chancellor Beiler: Dr. S. S. Adams, Dr. John E. Brackett, Dr. G. W. Cooke, Dr. W. F. Graham, Dr. Ida J. Heiberger, Dr. T. B. Hood, Dr. H. L. E. Johnston, Dr. J. Taber Johnston, Dr. W. W. Johnston, Dr. James Kerr, Dr. C. B. Purvis, Dr. Thomas C. Smith, Dr. Isaac S. Stone, Dr. Charles H. Stowell, Dr. D. H. Williams, Dr. John T. Winter, and Dr. William C. Woodward. Notes of regret that they could not be present were received from Dr. J. Wesley Bovee, Dr. C. S. Busey, Dr. Robert Fletcher, Dr. H. D. Fry, Dr. A. F. A. King, Dr. Robert Reyburn, and Dr. J. Ford Thompson.

Nearly all of these are connected with the different schools, hospitals, and publications in the city. They manifested and expressed deep interest in this new movement. After brief general statements about the college of medicine had been made by Dr. Stemen, and about the university in general by Vice-Chancellor Beiler, nearly every one present took part in what proved to be a very suggestive and valuable discussion. The plans for the college, the kind of work it ought to do, the facilities existing in laboratories, museums, libraries, and hospitals, and the additional facilities needed, were quite thoroughly canvassed.

It is the purpose of the authorities that the college shall be up to the highest ideal of the times; that only graduates of approved schools shall be admitted as students; that the work shall not conflict with that of schools already in existence; that special emphasis shall be placed on the training of specialists and original research; that while the practical side of medicine and surgery shall not be overlooked, more attention shall be given to the scientific side of investigation, discovery, and invention.

It is foreseen that this will require a college building, special laboratories, a hospital, and endowments sufficient to support the men who give all their time to this work. It is believed that when the plan and purpose are fully understood, the necessary money will be forthcoming.

ASBURY MEMORIAL HALL.

The following list of subscribers to this fund, all secured since our last issue, attest the continued interest of the ministry in this movement. It is a splendid expression of their endorsement of, and faith in, the American University. It might well inspire our laity to emulate their heroic giving. The total from the Detroit Conference is \$5,012; the Michigan Conference, \$4,016; the North Ohio Conference, \$3,605; the Central Swedish Conference, \$350.

DETROIT CONFERENCE.

\$200—G. L. Hanawalt. **\$100**—C. T. Allen, Mrs. J. F. Berry, J. F. Berry, E. E. Caster, W. C. Clemo, L. P. Davis, J. M. Gordon, S. W. Horner, A. J. Holmes, H. W. Hicks, G. N. Kennedy, N. G. Lyons, O. J. Perrin, Seth Reed, A. J. Richards, E. W. Ryan, John M. Shank, W. H. Shier, J. J. Smith, R. T. Savin, I. E. Springer, F. A. Soule, John Sweet, A. B. Storms, M. D. Terwilliger, R. Woodhams, H. E. Wolfe, O. W. Willets, F. W. Ware, George Whitaker, W. W. Washburn, Eugene Yager. **\$80**—C. M. Thompson. **\$50**—H. Cansfield, C. W. Baldwin, C. B. Case, M. J. Carley, J. B. Goss, Mrs. F. L. Hoyt (in memory of Rev. A. F. Hoyt), J. E. Jacklin, J. A. Lowry, John McEldowney, E. S. Ninde, Mrs. F. L. Osborne, F. L. Osborne, Philip Price, Dwight H. Ramsdell, J. Stansfield, Mrs. Louise Soule (for Rev. E. L. Moon), A. W. Stalker, F. A. Smart, C. B. Steele, L. S. Tedman, Andrew Wood. **\$25**—W. H. Allman, Mrs. C. W. Baldwin, Arthur Beach (for Rev. J. A. Rowe), Thomas A. Greenwood, J. F. H. Harrison, J. G. Haller, B. F. Lewis, Henry J. B. Marsh, B. C. Moore, George J. Piper, W. F. Sheridan, S. P. Warner, P. J. Wright, W. B. Weaver, A. W. Wilson, D. H. Yokum. **\$15**—W. J. Campbell, A. B. Clough, Alex. Gee, C. E. Hill, H. C. Kispagh, Mrs. J. J. Landensager (in memory of L. S. Littlefield), W. H. Lloyd, J. B. Oliver, W. J. Passmore, R. Pattinson, W. M. Ward. **\$10**—C. W. Butler, C. W. Baldwin (in memory of M. J. Scott), F. Coates, R. Emery, R. Hancock, F. D. Ling, W. C. McIntosh, J. H. McIntosh, George Nison, Benjamin Reeve, Mrs. Phoebe Stark (in memory of Mrs. Polina Perrin), H. S. Sheldon, T. Wakelin, W. W. Will, J. S. West, J. L. Walker. **\$5**—Edgar M. Armstrong, C. L. Church, Judson Cooper, Mrs. R. Emery, J. T. Gurney, P. B. Hoyt, Carrie Manley, John Thomson, Fred H. Townsend, John Wesley, W. T. Wallace. **\$1**—S. Bird, D. A. Curtis.

MICHIGAN CONFERENCE.

\$100—N. L. Bray, J. I. Buell, M. M. Callen, M. D. Carroll, Class of Fourth Year (per C. W. West), Wm. Denman, J. C. Floyd, "A Friend," James Hamilton, Goe. S. Hickey, H. C. Hobart, Geo. W. Howe, D. D. King, G. B. Kulp, E. G. Lewis, O. R. Lovejoy, L. E. Lovejoy, J. H. Lozier, P. J. Mavey, J. P. McCarthy, J. W. Moon, A. D. Newton, E. B. Patterson, L. N. Pattison, Dr. Pettijohn, Dr. Potts, James Roberts, Ella Van Schoick. **\$50**—D. F. Barnes, F. W. Corbett, R. R. Farnsworth, O. H. Perry, W. H. Parsons, C. A. Varnum. **\$35**—W. H. B. Urch. **\$30**—Geo. A. Brown, J. G. Crozier, J. W. Davids, A. M. Gould, E. L. Kellogg, W. M. Puffer, G. W. Tutthill. **\$25**—Edith Disette, Harriet Eddie, M. A. Jackes, L. E. Lennox, A. T. Luther, I. H. Skinner, J. R. Skinner. **\$20**—Ralph

Newman, E. V. Armstrong, W. W. Aylesworth, J. Bennett, Arthur D. Cole, W. Z. Cole, F. E. Druice, John S. Evans, J. A. DeGraff, W. W. Divine, C. E. Hoag, W. L. Holmes, Mrs. Iddings, Fred Kimmer, Mrs. I. A. McGowan, A. F. Nagler, F. L. Niles, Mrs. M. A. Robinson, E. S. Sinclair, A. H. Sturgis, R. Tindall, Herbert Varnum, F. A. Van DeWalker, J. H. Westbrook, P. E. Whitworth. **\$12.50**—A. H. Coons, Geo. Killeen. **\$10**—Minnie Ball, Eliza A. Beach, J. C. Beach, C. F. Brown, Geo. Diamond, W. J. Douglass, J. E. Goote, D. M. Goodyear, Levi Holms, June Kirk, G. L. Mount, G. A. Odlum, Mrs. Dr. Pettijohn, A. H. Ranton, R. W. Van Schoick, (by a friend), N. S. Tuttle, A. J. Wheeler, J. White, I. Wilson. **\$5**—Mrs. Phoebe Bagne, Joseph Beach, "A Friend," H. C. Hobart, Lewis M. Davis, John L. Mount, R. W. Van Schoick (by James Finch), R. W. Van Schoick (by Mary Sykes), J. R. Skinner, E. L. Sinclair (by a friend), L. L. Yower. **\$3**—Herbert E. Wylie. **\$1**—"Cash" by J. E. W. Tuthill.

NORTH OHIO CONFERENCE.

Wm. Kepler, collection of fossil fish, worth \$1,000. **\$100**—N. S. Albright, C. R. Chase, G. W. Collier, W. C. Dawson, W. C. Endley, W. D. Gray (100 copies of his book), G. A. Hartupke, G. W. Huddleston, J. H. Johnson and wife, D. Kemble, J. D. Lea and wife (in memory of Mrs. M. M. Lea), E. S. Lewis, J. Long, Mrs. Ida Mitchell, Wm. C. Pierce, G. A. Reeder, Sr., J. F. Smith, W. F. Whitlock, John Wilson, A. E. Winter. **\$50**—C. C. Ball and wife, J. M. Barker, J. H. Barron, E. T. Hagerman, R. McCaskey, W. B. Mead, R. T. Stevenson. **\$40**—M. E. Rife. **\$30**—J. W. H. Brown, B. Hushour, E. D. Smith, F. D. Stevich, Jas. Torbet. **\$25**—J. T. N. Braithwaite, C. M. Gay, Thos. W. Grose, J. F. Hastings, S. E. Idleman, Geo. Mather, B. J. Mills, M. W. Reece, E. L. Smith, P. B. Stroup, Walter Torbet. **\$15**—Elton Barnett, R. C. Beichele, E. J. V. Booth, M. A. Castle, A. C. Corfman, F. I. Dunbar, S. T. Dunbar, F. A. Gould, W. D. Gray, T. H. D. Harrold, F. S. Hoyt, W. J. Hyde, P. Kelsner, C. F. Johnson, G. M. Knapp, F. G. McCauley, C. D. Patterson, W. S. Philpott, A. C. Ruff, Mrs. C. I. Russell, M. T. Scarborough, J. W. Thompson, R. M. Yoder. **\$10**—O. M. Ashbaugh, M. T. Ayres, Mrs. Julia Burger, P. F. Graham, C. E. Jackson, J. R. Jewitt, J. A. Kellam, W. W. Long, W. H. Painter, F. M. Poole, Mrs. Thos. Struggles, M. T. Ward, E. L. Warner, W. A. Wintermute. **\$5**—J. McK. Barnes, Mrs. J. W. Barr, A. C. Barr, P. D. Brush, J. H. Douds, C. F. English, P. P. Fulmer, Mrs. P. F. Graham, F. H. Huntsberger, Rina F. Mayer, A. McCullough, E. B. Shumaker, G. R. Simmons, John A. Wright.

CENTRAL SWEDISH CONFERENCE.

\$75—K. H. Elmstrom. **\$30**—Richard Cederberg, A. G. Johnson, N. M. Liljegren. **\$25**—William Swenson. **\$15**—Alfred Anderson, J. T. Wigren. **\$10**—N. Eagle, J. A. Gabrielson, Martin Hegg, C. O. Karlson, J. O. Nelson, Otta A. Rabe, A. T. Westergreen, M. L. Wickman. **\$5**—C. A. Albrektson, Isaac Anderson, J. B. Anderson, John Bendix, G. E. Carlson, O. T. Linstrum, J. P. Miller, Andrew Reese, John Simpson, C. G. Wallenius.

PAYMENTS.

The following payments have been made toward the "Asbury Memorial Hall Fund" since September 1, 1892: 57
\$100—R. E. Smith, Herbert Welch, W. C. Peirce.
\$50—Thos. H. Pearne.
\$45—Henry A. Buchtel.
\$35—James Hamilton.
\$33.50—P. J. Mavety.
\$33.34—T. I. Conlats, W. L. Sutz.
\$33—R. E. Smith.
\$30—A. B. Sniff, H. D. Ketcham.
\$27.50—A. M. Mann.
\$25—D. C. Vance, J. I. Buell, C. E. Asbury, J. H. Martin, J. H. Ketcham, J. F. King, J. B. Braden, H. W. Key, J. F. Bell, H. B. Westervelt, B. L. McElroy, J. C. Jackson.
\$24—V. F. Brown.
\$20—N. D. Bigelow,
\$16.67—J. H. Doddridge.
\$15—G. L. Tufts, W. S. Shepard, A. E. Johnson, T. H. Willis.
\$10—"Class of Fourth Year" (A. B. Westwood), John Pearson, G. W. Colagan, M. E. Ketcham, J. F. Hastings, M. T. Ward, J. E. Rudisil, J. F. Steel, F. H. Smiley.
\$8—F. E. Vance.
\$5—J. B. Wentworth (by A. O.), J. R. Skinner, Eliza A. Beach, "A Friend," ——— (Mich. Conf.), L. O. Deputy, A. G. Newton, J. W. Robinson, C. B. Patterson, D. P. Fulmer, F. S. Hoyt, F. G. McCauley, J. McK. Barnes, P. F. Graham, John Wright, P. D. Brush, E. B. Shoemaker, J. N. Shoup.
\$2—F. H. Huntsberger.
\$1—J. E. W. Tuthill.

A FASCINATING VOLUME.

We last week referred to the great value of Bishop Hurst's new book, *The Literature of Theology*. It is the most complete bibliography of valuable theological works that has ever been published, and it is accordingly needed by every preacher and every layman who has any interest in theological and religious publications.

But its usefulness is not our present theme; we simply want to say that it is beyond measure fascinating. As one holds it in his hands and turns its pages he seems to walk the alcoves of a wonderful library and to become familiar with its thousands of volumes. During the last week it has many times been in our hands and it has always been reluctantly laid down. To look up the books that one does not yet possess at least seems to bring them nearer, and to become informed concerning those that he desires in order to increase his resources for his favorite lines of theological study gives a rare delight.—*Northern Christian Advocate*.

CHANCELLOR MACCRACKEN's scheme to classify the colleges and universities in the United States by a system of State aid is open to serious objection. It would make them all State institutions. The Methodist Episcopal Church has already accomplished this work under the lead of Dr. C. H. Payne, Secretary of the Board of Education.

THE COLLEGE OF SCIENTIFIC TEMPERANCE.

\$250,000 for the endowment of this College is now assured to the University. The names of the persons named in the legal agreement are a guarantee of its success. Their eminence in scholarship and practical philanthropic work is well known. They represent five of the leading religious denominations of the country. Dr. Strong well said, in view of this movement and the broad purposes of the University, "it is really an Evangelical Alliance that you are developing at Washington."

This College (as the departments of the University are to be called) is a new departure. There has never been anything like it. If its scope and purpose are not well considered, it might be thought too practical, and to not have a sufficiently scholarly basis for a department in a great university. But it is a good illustration of how the American University proposes to maintain a high grade of scientific work and adapt itself to the practical needs of the times. It is not to be a propaganda of any special theory or preconceived notions. It is to seek the truth with untrammelled freedom and to fearlessly make it known to the world. The friends of the movement are broad-minded enough to realize that the truth, sustained by scientifically ascertained facts, will finally prevail. They want the best equipped specialists to seek the facts in all the fields in which alcohol and kindred substances, together with their effects, are related to the welfare of mankind. The College is to be post graduate.

The proposition to endow such a department, if it could be inaugurated in the University, was accompanied by a numerously-signed petition. Among the signers were the governors, treasurers and secretaries of States, judges of supreme and other courts, National and State legislators, State and local superintendents of instruction, presidents and other officers of universities and colleges, and representatives of various religious bodies.

The scheme has been under consideration for more than a year, and the following agreement was unanimously adopted at a joint meeting of the two Boards in New York on December 5, 1895:

Whereas, the Board of Counsel of the Temperance Educational Association, composed of the following persons, namely, W. T. Harris, LL.D., Mary H. Hunt, A. H. Plumb, D.D., Joseph Cook, LL.D., Daniel Dorchester, D.D., William A. Mowry, Ph. D., William E. Sheldon, T. D. Crothers, M.D., J. N. Quimby, M. D., L. D. Mason, M. D., Josiah Strong, D.D., Jesse B. Thomas, D.D., W. C. Roberts, D.D., and Bishop E. R. Hendrix, D.D., and having power to perpetually fill vacancies in and enlarge its membership, not to exceed twenty-five in all, has been legally constituted for the creation and maintenance of a College of scientific investigation and instruction in physiology and hygiene, with especial reference to the nature of alcohol and kindred substances, together with their effects upon mankind; and,

Whereas, this said Board of Counsel heretofore presented a petition to the Board of Trustees of "The American University," Washington, D. C., praying for the creation of a College in the said University "for such original investigation and study as will furnish to the country the needed teachers of teachers in the new and now almost universally mandatory branch in the Public Schools that is properly termed Scientific or Physiological Temperance," with the understanding that the aforesaid Board of Counsel should undertake to raise and transfer to the proper authorities thereof a sufficient sum of money or endowment for the support of the desired College; and,

Whereas, the said Board of Trustees of The American University acted upon said petition by passing resolutions, as follows, namely, "Resolved, that we, the Board of Trustees of the American University, agree to organize such a College of scientific temperance instruction as is requested, on the condition that an endowment of at least \$250,000 be provided therefor," and "Resolved, that a committee be appointed, consisting of Bishop John F. Hurst, LL.D., Charles H. Payne, LL.D., and Vice-Chancellor Samuel L. Beiler, Ph.D., to arrange all details with the sub-committee of said Board of Counsel, and that when these committees have completed the detail arrangements, the President and Secretary of this Board be authorized to sign an agreement in harmony with this action;" and,

Whereas, the said two committees have met and completed the detail arrangements contemplated;

Now, therefore, in consideration of these premises, we, the Board of Trustees of The American University, hereby covenant and agree that the detail arrangements completed and agreed upon by the said two committees shall be, and hereby are, herein assented to and made a part of this agreement.

And we further covenant and agree that upon the payment to the Treasurer of this University of the sum of \$250,000, or such lesser sum as shall be deemed by said Board of Trustees sufficient for the beginning of the work of said School, a College of The American University shall be inaugurated for such original investigation, instruction, and study as will furnish the country with the needed teachers of teachers in the branches of Scientific or Physiological Temperance herein agreed upon and determined by the said two committees, reduced to writing and forming a part hereof as aforementioned, which department shall be called "The College of Scientific Temperance," being a school of investigation and instruction in Physiology, Hygiene, and Pathology, with special reference to the nature of alcohol and kindred substances, together with their effects upon mankind, and including the following studies as they are related to the purpose of this College, namely: Toxicology, Chemistry, Biology, Psychology, Ethics, Criminology, Law, Political Economy, Reformatory Measures, and Pedagogy, with such other studies as may be found necessary.

And we further covenant and agree that the said endowment fund shall never be diverted from the purpose for which it was raised and made, and that if any such diversion shall be made or attempted, that then the said fund shall revert to the said Board of Counsel.

And we further covenant and agree that the said College of Scientific Temperance shall publish from time to time the results of the scientific investigations of its faculty and students, especially such as will be of practical value in promoting the purpose of the College.

And we further covenant and agree that the Board of Counsel shall be authorized to exercise a power of visitation and investigation of the College, and of recommendation to the Board of Trustees of the University concerning it.

Now, therefore, the foregoing covenants and agreements are hereby approved and accepted by the aforesaid bodies jointly and severally, viz. the Board of Counsel of the Temperance Educational Association, and the Board of Trustees of the American University.

It is worthy of note that since this scheme was elaborated a Committee of Fifty has been raised in New York, with Seth Low of Columbia, as President, W. E. Dodge, Treasurer, and President C. W. Eliot of Harvard, President F. A. Walker of the Massachusetts School of Technology, Dr. J. G. Billings of the University of Pennsylvania, and Col. Jacob L. Greene of Hartford, Executive Committee, to make original investigations in the same general directions. They have divided the work among these sub-committees, the Physiological, the Legislative, and the Ethical. They have secured \$10,000 to pay for the investigations. Their purpose is a temporary work, ours a permanent one.

We hope the friends of the cause of Temperance will help the Board of Counsel in securing the \$250,000.

THE AMERICAN UNIVERSITY.

By Richard Wheatley, D. D.

The American University is *in posse*, not *in esse*; in conception, rather than in fully organized activity. Chartered by Congress, located in the cerebrum of the national body politic, and therefore certain of powerful influence on the moral and physical forces of the commonwealth, it is slowly and scientifically embodying itself. Its home, or the foundations of its home, are provided in the ninety beautiful acres that crown one of the highest points in the District of Columbia, and whose market value is estimated to be half a million dollars. From them the eye wanders over the wooded foothills and mistily charming ranges of the Blue Ridge Mountains, the fertile expanses of Maryland, and the majestic buildings of Washington. Massachusetts Avenue, the principal residence street of the latter, extends nearly to University Heights, and will pass through the grounds of the institution, leaving room for professorial domiciles and student dormitories on its right, while on its left a broad mall will lead from massive gateway to eminence topped by dome and gables of the Administration Building, library, and chapel.

COLLEGES.

On the left of the mall will rise—endowed in part by an elect lady—the Hall of History, and also the Hall of Languages, with its collection of bronzes and bric-a-brac of the Dutch colonial period, created by the public spirit and beneficence of General J. Watts De Peyster. On other elevations will appear the Halls of Science, Philosophy, Theology, Medicine, Law, Art, and Technology. Other edifices, devoted to specialized education, will follow in providential sequence.

History, with its illustrations of divine unalterable law, and languages, with their polyglottal power of diffusing knowledge of that law, are the first in the long series of instrumentalities leading this and other peoples to that knowledge of the only true God and of Jesus Christ whom He has sent, which is eternal life begun under earthly conditions. Theology of purely biblical character, ethics of origin inspired, and experience crystallized; will receive fullest exposition. So will that law whose seat is in the bosom of God and whose voice is the harmony of the world. Conformity with it is the ultimate of the technical, medical, surgical, and philosophical halls.

SCIENTIFIC TEMPERANCE.

Three of the institutions projected will be of special value. One is the College of Scientific Temperance, which will deal with the nature of intoxicants and narcotics, their influence on individuals and communities, on the national well-being, and the welfare of the world at large. It will also deal with the questions of remedies, legislation, and administration; of criminology, penology, and reform. From it we may look for the only exhaustive exhibition, including statistics, of the worst social evil afflicting the Republic. Of like importance will be the College of Medicine, the plan of which is intrusted to the consultative preparation of Dr. C. B. Stemen, Fort Wayne, Ind., who is one of the committee of five appointed by the collective medical colleges (one hundred and forty-six) of the country to prepare a four years' curriculum for students. The plan

will also provide facilities for postgraduate study, in which the unrivaled representations of wounds and diseases brought together in Washington will be utilized.

COLLEGE OF RELIGION.

Another educational establishment, remarkable in character, that is under serious consideration, is that of a College for Missionaries. This is greatly needed. The romance of mission work at home or abroad has been dissipated. The work itself is now seen to be thoroughly practical and commonplace, yet in its issues sublime. It requires the clear, cool, hard good sense of business life, instinct with burning enthusiasm for the benefit of humanity, and filled with the Holy Spirit. Missions demand the best brain, heart, and muscle of the Church. Missionaries should be acquainted with the ethnic religions, and with the history, beliefs, customs, habits, institutions, and idiosyncrasies of the peoples whom they are sent out to serve and save. This may be costlier in the beginning, but will be cheaper in the end.

POSTGRADUATE.

Every hall of the American University is to be for the use of postgraduates; probably also of non-collegiate men whom strict examination may approve as equal in attainment. Preparation must be completed elsewhere. This institution is designed to equip students for higher work, including that of special and original research, to train for leadership in the realms of thought and action, so that the hundreds of American graduates now studying in Europe may possess aids of equal value at home. Ideal university the founders mean that the American shall be. God, man, nature, compose the whole of being. Truth is the intelligible, commensurate expression of reality. Presentation and representation should be coincident. Man needs the knowledge of physics, biology, mathematics, economics—in a word, of nature; of himself scientifically and philosophically; of God—but how is he to gain the latter? Science is confessedly dumb when questioned on this point. She places us in the presence of a power from which all things proceed, and by which all things are upheld, but is ignorant of the nature and moral qualities of that power, whose personality is virtually conceded. Has it or He revealed Himself, made known His mind and will? Rational faith replies, "He has. The Bible contains, is, His word." Theology seeks to know Him spiritually, science to explain His works, philosophy to understand His workings. Theology reconciles with God; science and philosophy reconcile man with nature, and in the reconciliation the differentiated but perfect oneness of all is apparent. Such is the function of the American University, unique on the continent, unique in history. It is wholly non-political, independent, and fairly searching for all truth.

Men and women of all colors, creeds, climes and races will be welcomed to the halls of the University. Not incidents, but essentials, it holds in chiefest regard. Humanity everywhere is capable of exhibiting the likeness of God in knowledge, righteousness and true holiness.

George Washington conceived the idea and advocated the foundation of a national university. Great Federalist statesmen eloquently approved it. But conditions were not favorable to immediate attempt. Bishops Newman, Hurst, and others revived the obso-

lescent project. Roman Catholicism has adopted it, and puts it into tangible and masterly shape. The same idea—full of life, vigor, purpose, plan—materializes itself most prominently in the nascent American University. Buildings and athletic appliances will not be the University, but only its clothes. The National Capital's peerless literary and scientific collections, costing over thirty-two million dollars, are simply its instruments. The University will be the earnest, sincere men and women who, in the stress and strain of toil and struggle, seek to acquaint themselves with all truth, that individually and collectively they may be perfected in Christ Jesus.

THE CHANCELLOR.

The American University is singularly fortunate in the modest but mighty leadership of Bishop John F. Hurst, its Chancellor. His experiences of college life at Dickinson, of postgraduate culture in the best universities of Europe, of the home pastorate, in the van of theological education in Germany, in the professorate and presidency of Drew Theological Seminary, wherein his wise and vigorous efforts restored the lost endowment of the institution, have trained him for the grandest and most beneficent work of his life. In the doing of this work the wisest and most trusted leaders of the Church in America have been consulted. All believe that the hour for founding a thoroughly evangelical university has struck. His solicitations secured from about ten thousand citizens of Washington funds sufficient to purchase the site. His gentlemanly, dignified bonhomie endears him to all circles of society. His remarkable bibliophile tastes and collections, his erudition, his acquaintance with men and things, with many modes of thought, aim, policy and action, with the deep things of God, with the meaning of man and the universe, add to his qualifications. Such is the verdict of criticism.

Great undertakings—whether at Chautauqua, Chicago, or Washington—require fitting leaders, whose God-given and acquired talents shall command the confidence and call forth the unlimited support of citizens.

PROGRESS.

Ten million dollars, at least, must be expended in the construction and equipment of the American University. About one million, more or less, is in possession. Another million is in sight. More millions are waiting to come to its aid. The sooner they are put in motion and arrive at the institutional treasury the better.

Chaplain McCabe vouches for the enthusiasm everywhere felt in its favor. The great Methodist Episcopal Church, South, is strongly approbative and co-operative. The university is a providential phenomenon. Its trustees have carefully approved the designs of the landscape architect; its building committee will shortly approve plans for the erection of the Halls of History and Languages, and will order the commencement of construction. Five or six of the trustees are members of other religious denominations. Liberal Roman Catholics—a nephew of Pope Leo among the number—are subscribers to the building fund.

No educational movement of modern times is fraught with weightier results to Christianity, Methodism, the American people, and the world at large. The historic

Christian university is the creation of the soul's instinct for God, of the craving for fellowship with Him. It is the cradle of independent thought, private judgment, concerted action, real godliness, democratic liberty, government of, by, and for the people, and of crescent civilization. It is the bond of political unity, the solvent of ungodly bigotries, the crucible in which human nature may be freed from its dross. It is the most potent factor, when inspired by and filled with the spirit of Christ, in the expansion and perfection of God's kingdom in the world. Thought, sympathy, speech, and gifts in aid of the American University are now most timely and befitting.—*The Christian Advocate.*

BENEVOLENT.

The gift of the year is that of John D. Rockefeller to Chicago University, being \$1,000,000 outright, and \$3,000,000 more as fast as it is duplicated between now and 1900.

Mr Andrew Carnegie has recently given a million dollar library building to Pittsburg, to which he proposes to add other extensive gifts.

At the fifth convocation of the University of Chicago, October 1, President Harper announced a gift of \$250,000 to the university by bequest of Mrs. Mary Esther Reynolds, of Chicago, lately deceased, widow of Joseph Reynolds.

Rev. Wesley Webster, who died at South Charleston, Ohio, September 25, aged 82 years, some time ago gave his entire estate to Ohio Wesleyan University, reserving only sufficient for the support of himself and wife.

Miss Helen Gould has just founded two scholarships in New York University of \$5,000 each, to yield \$250 annually.

Charles R. Bishop, first vice-president of the Bank of California, has contributed \$800,000 to schools and societies in the Hawaiian Islands.

Mrs. Adeline Smith, Oak Park, Ill., was left \$125,000 by her husband. She so managed it that, in the thirteen years before her death in July, she gave to different benevolences \$135,428.

Christ Hospital, Mount Auburn, Cincinnati, has just received a donation of \$5,000 from Mrs. Jane A. Gibson, of Aurora, Ind.

Dr. D. K. Pearsons, of Chicago, offers to give \$150,000 to Mt. Holyoke College, provided the Chicago alumnae raise an additional \$50,000.

The American Education Society has received a gift of \$60,000 from a New England man who withholds his name.

Marx Strauss, of Elyria, has presented to Oberlin College an entire hotel block at Oberlin, Ohio, valued at \$50,000. This gift has been made with an annuity attached.

Charles S. Hackley, president of the board of education of Muskegon, Mich., has presented to the board the sum of \$135,000 and \$5,000 yearly while he lives. The gift is for the construction and maintenance of a manual training school.

Mayor Sutro's gift to the University of California, including the Sutro library, is over \$1,000,000.

Barney Barnato, who has accumulated about \$200,000,000 during the past four years from South African mines, has just given \$225,000 to the poor of London, which is larger than any single gift ever made by the Rothschilds.

Horace S. Plumb has just given a memorial library to the town of Shelton, Conn.

Charles B. Rouss has offered to give \$100,000 to build a memorial hall, which is to be made "The Battle Abbey of the South," containing the historical data of the Southern Confederacy.

A GREAT UNIVERSITY FOR LONDON.

In the *Nineteenth Century*, under the above caption, the Right Hon. Lord Playfair has given us a notable article, which closes with these words: "London must have a teaching university worthy of the great metropolis of a great nation." He shows how the present London University, with examining functions only, does not meet the needs of the times. A modern university must teach, be the possessor and distributor of knowledge, and also develop a love for learning that will make teachers and taught the creators and promoters of knowledge by research. It must be of the type of Edinburgh and Berlin, rather than of Oxford and Cambridge. It will give unfettered liberty to an approved and recognized professor. It must be imperial in its scope, giving the same advantages to students of equal knowledge from any part of the empire. It must be richly endowed, so as to strengthen the twenty-five institutions it proposes to absorb, organize other departments, avail itself of the splendid materials about it in London, and command the best educational talent in the whole nation. The article is full of suggestiveness to the friends of the American University.

EDUCATIONAL ENDOWMENTS.

President Thwing makes American universities his debtors in a recent article in *The Forum*. He shows the proper province of endowment to be in the realm of man's spiritual and intellectual interests. Physical and material interests are more obvious and will be cared for by the state. Endowments should be made to do work that the state will not or can not do.

Men should be careful not to create endowments that are permanent for purposes that are evanescent. A large endowment was left in 1626 for redeeming captives from pirates, but no captive has been found to spend it on since 1723. Such changes can not, in any degree of probability, occur in the conditions which education represents. The need of trained minds and stores of knowledge will never pass away.

There should be care not to create endowments that, because of their smallness, will be incapable of producing results, or of securing the wisest and most careful management. Universities command the services of the best men as trustees and administrators, because of the great interests represented, and of the exalted purposes they subservise. No funds are better managed.

The permanence of endowments and the certainty of changes after a man's death should incline him to be liberal in the conditions with which he surrounds a gift to a university. The men of fifty years from now may know the needs of their day better than the man of to-day. Conditions should be made broad enough that they will never render the endowment worthless. The conclusion is that the agency through which wealth is most certain of doing the most good to the most people for the longest time and in the widest realms is the college and the university.

C. W. STILES, Ph.D., of the Bureau of Animal Industry, was recently sent by the Government as a representative of the Department of Agriculture, the Smithsonian and the National Museum, to the Third International Zoological Congress at Leyden, Holland.

CHURCH AND STATE UNIVERSITIES.

This is Professor Ely's real topic in *The Cosmopolitan* of October. He swings out in knightly style in defense of the State and against the Church as the rightful lord of the university domain. It is well to note the shots that fly from his locker. That is a strange statement, that because the great universities in Europe are State institutions, the men who favor the private (Church) universities are the radicals. Does he forget that Church and State are one in most of Europe, and that it is really the Church half of the unity that is the patron of higher education? How do evangelical Christians enjoy being told that they may build a "dormitory" opposite the university and have family prayers every morning! Is it then necessary to go outside of the university to have family prayers? If that is the logic of a State university, as well to have Professor Ely say it. He would find evidence of Christianity and Christian ethics outside, "opposite" the university, also. Evidently, his ideal university is "opposite" Christianity! How fortunate for the Church institutions that he sees he has to deal with a situation and not a theory. Otherwise he would not think it "undesirable to wipe them out of existence." What a narrow escape for Columbia, Princeton, Wesleyan, Chicago, Northwestern, Yale, Boston, and hundreds more?

The will of Miss Mary Lockhart, of Mauch Chunk, who died September 13 in her 96th year, contains the following bequests: St. Paul's Methodist Episcopal Church, Mauch Chunk, 64 shares of Mauch Chunk Water Company stock, value, \$25 a share; Preachers' Aid Society in Philadelphia Conference, \$3,000; Woman's Foreign Missionary Society, \$3,000; Woman's Home Missionary Society, \$3,000; the General Missionary Society of the Methodist Episcopal Church, \$3,000.

Rev. A. M. Hough and his wife have deeded to the Southern California Conference a magnificent gift, valued at \$12,000, the proceeds of which are to go for the support of the superannuates of that conference.

The following Pamphlets have been received and are hereby thankfully acknowledged:

Did King Alfred Translate the *Historia Ecclesiastica*? by Dr. J. W. Pearce. Tulane University. What are the Doctrines of the New Church? by B. F. Bartlett. Iowa Health Bulletin, from Dr. J. F. Kennedy. Food and Diet, by W. O. Atwater, Ph. D., of U. S. Department of Agriculture. *Stafford's New Magazine*. The Mount Holyoke, Founder's Day Number. The Meaning of the University, by Horace Davis. The New Bohemian. Catalogue of University of Wisconsin. Year Book, vol. XXII, of Boston University. The Kame-Moraine at Rochester, N. Y. Lake Newberry the Probable Successor of Lake Warren; The Evolution of the Ungulate Mammals; The Length of Geologic Time; A Section of the Strata at Rochester, N. Y.; The Geological History of Rochester, N. Y., and the Glacial Lakes of Western New York, by Prof. H. L. Fairchild. Records of the Columbia Historical Society. Germanic Studies of the University of Chicago. The Theological Plail, by Adam Miller. The World's Markets for American Products. Protection from Lightening, and Education and Research in Agriculture in the United States, from the U. S. Department of Agriculture. The Catholic University Bulletin, No. 4. Manual of Central Pennsylvania Conference, by Rev. W. A. Carver. Christianity and Science versus Evolution and Infidelity, Rev. J. G. Evans, D. D. Index Lysiacus, and Die mit Präpositionen Zusammengesetzten Verbe bei Thukydides, by Prof. David H. Holmes, Ph. D. The American Magazine of Civics. From the Poor of Great Cities, by Ernest Flagg.

Book Notices.

[The Editor will be glad to give brief notices of such books as are appropriate to the COURIER. Copies of volumes sent for notice will be placed in the University Library.]

THE MICHIGAN PIONEER COLLECTIONS, being twenty-three volumes of Reports of the Pioneer Society of the State of Michigan. Lansing, Mich., 1877-1893.

This is an exceedingly valuable collection for its historical data.

OFFICIAL RECORDS OF THE UNION AND CONFEDERATE NAVIES IN THE WAR OF THE REBELLION, vol. 1, series 1, Lieut. Commander Rush. Washington, 1894. Secured by Judge Springer.

FLETCHER'S CHECKS, six volumes, second American edition. John Wilson and David Hitt, New York, 1809.

BUTLER'S ANALOGY OF RELIGION, first edition. James, John and Paul Knapp, London, 1736.

ELEMENTARY PHYSICAL GEOGRAPHY, Prof. Ralph S. Tarr, of Cornell University. MacMillan & Co., New York, 1895.

A new text book. The physiographic element is given more prominence than usual, and the order of presentation is not that ordinarily followed. There is much new material that gives a charm to the book.

CORNELL STUDIES IN CLASSICAL PHILOLOGY, No. 5. Index Antiphontes, by Frank Louis Van Cleef, Ph. D. Ginn & Co., 1895.

FABLES AND ESSAYS, by John Bryan, of Ohio. The Art and Letters Co., New York, 1895.

An interesting volume, with practical lessons by a frank author, who publishes, as a hen lays eggs, because she must and without regard to the price. Jesus did not copyright and charge for his sermons.

MISCELLANEOUS AMERICANA, published by Wm. F. Boogher, 1339 F street n. w., Washington, D. C. Octavo, half Russia; price, \$5.00.

This is a work treating of history and genealogy of families of New Jersey, Delaware, Pennsylvania, Maryland and Virginia. Its topics are outside of the ordinary paths of history, and its full and accurate annotations make it of especial value to professional and amateur genealogists.

INTRODUCTION OF REINDEER INTO ALASKA, by Dr. Sheldon Jackson. Government Printing Office, Washington, D. C., 1894.

ELEMENTS OF POLITICAL ECONOMY, by Wayland Chapin. Sheldon & Co., N. Y., 1886.

RECENT ECONOMIC CHANGES, by D. A. Wells. D. Appleton & Co., 1891.

MONEY AND THE MECHANISM OF EXCHANGE, by W. Stanley Jevons. D. Appleton & Co., 1892.

PUBLIC DEBTS, by Henry C. Adams. D. Appleton & Co., N. Y., 1887.

EDUCATIONAL REMINISCENCES, by Catharine E. Beecher. J. B. Ford & Co., N. Y., 1874.

BIBLE STUDIES, by Geo. F. Pentecost. A. S. Barnes & Co., N. Y., 1889.

THE TWO GREAT COMMANDMENTS, by Orville Dewey. James Miller, N. Y., 1876.

THE DIVINE LIFE, by John Kennedy. Parry & McMillan, Philadelphia, 1857.

THE CRITERION, by A. Cleveland Cox. H. B. Durand, N. Y., 1866.

RELIGIOUS TRAINING OF CHILDREN, Catharine E. Beecher. Harper & Brothers, N. Y., 1864.

ROOTS AND FRUITS OF THE CHRISTIAN LIFE, Wm. Arnot. T. Nelson & Sons, London, 1860.

GOD IN HIS PROVIDENCE, by W. M. Fernald. Otis Clapp, Boston, 1859.

SERMONS, by Rev. John Caird. Robert Carter & Brothers, N. Y., 1858.

THE VARIATIONS OF POPERY, by Samuel Edgar, of Ireland. First American edition. N. Y., 1849.

CHRISTIAN THEOLOGY, by Samuel Wakefield. Cranston & Stowe, Cincinnati.

HARMONY OF THE GOSPELS IN GREEK, by Edward Robinson. Crocker & Brewster, Boston, 1845.

EVIDENCES OF THE GENUINENESS OF THE GOSPELS, by Andrews Norton. 3 volumes. John Owen, Cambridge, 1846.

A SERMON OF MERCHANTS, &c., by Theodore Parker. George Coolidge, Boston, 1847.

SERMONS, by Richard Watson. 2 volumes. Lane & Scott, N. Y., 1851.

ADDRESSES—Scholar, Jurist, Artist, Philanthropist—by Charles Sumner. Ticknor & Co., Boston, 1846.

ANNALS OF THE AMERICAN METHODIST PULPIT, by William B. Sprague. Robert Carter & Brothers, N. Y., 1861.

SERMONS ON CHRISTIAN COMMUNION, edited by T. R. Sullivan. Crosby & Nichols, Boston, 1858.

METRICAL PIECES, by N. L. Frothingham. Crosby, Nichols & Co., Boston, 1855.

ROSA MYSTICA, or Mary of Nazareth, by Marie Josephine. D. Appleton & Co., New York, 1865.

THE PROSE WRITERS OF AMERICA; selections. Hurst & Co., New York.

TRIBUNE ESSAYS, by Charles T. Congdon. J. S. Redfield, N. Y., 1869.

A VISIT TO THE CONSULAR CITIES OF CHINA, by George Smith. Harper & Brothers, New York, 1857.

SERMONS, by Stopford A. Brooke. Fields, Osgood & Co., Boston, 1869.

PUBLIC OPINION. Vols. 10 to 16—the first three bound. Washington and New York.

THE KENYON COLLEGE BOOK, a history, by a committee of the Board of Trustees. Columbus, Ohio, 1890.

MEMOIR OF JOHN HOWE PLYTON. Published by A. B. Blackburn & Co., Staunton, Va., and presented by John S. Peyton.

THE WORKS OF GEN. J. WATTS DE PEYSTER. Tivoli, N. Y.; "Kearney in Africa," 1884; "The Affair of King's Mountain," 1880; "Heintzelman and Hooker," 1881; "Mary, Queen of Scots," 1882; "Bothwell and Mary Stewart," 1883; "The Burgoyne Campaign," 1883; "From the Rapidan to Appomattox Court House," 1883; "Address Before New Brunswick Historical Society," 1883; "The Thirty Years War," 1884; "Bothwell; A Historical Drama," 1884; "The Third Army Corps," 1884-7; "Torstenson Before Vienna," 1885; "Major-General Anthony Wayne," 1886; "Before At. and After Gettysburg," 1887; "Prussia &c.," 1887; "Miscellanies of an Officer," two volumes, 1888; "Was the Shakespere, After All, A Myth," 1888; "Wallenstein," 1889; "Mary Stewart Bothwell, and the Casket of Letters," 1890; "The Wirtenbergers in the Black Forest," translation, 1891; "Letters of Mary, Queen of Scots," 1891-2; "Waterloo: The Campaign and the Battle," "The Prussians in the Campaign of Waterloo," and "Authorities" cited in the last three pamphlets, 1894.

PAMPHLETS of Prof. Edmund J. James of the University of Pennsylvania: "Modern Municipality and the Gas Supply," 1886; "Education of Business Men," vols. I, II, III, 1892-3; "The Farmer and Taxation," 1892; "Education of Business Men in Europe."

THE VICE-CHANCELLOR enjoyed the privilege of planting, in the name of the American University, one of the four corner stones that mark the site of Cokesbury College. The stones were provided by Dr. Goucher, of the Baltimore Woman's College, in connection with the Methodist pilgrimage.

John F. Waggaman,

Real Estate Investments,

700 14th Street N. W.

Washington, D. C.

I am agent for the beautiful suburban property known as Wesley Heights, situated opposite the site of the American University. This property has a great future, not only because the University is to be built opposite, but on account of its desirability as a resident part of the District of Columbia. I am also agent for lots in Morris' Addition to N. E. Washington, which presents a good field for investment for small amounts. All this property is laid out in conformity with the general plan of the city of Washington and is entitled to the city improvements. In addition, Washington, being the Capital of the Nation, is free from strikes and conditions that exist in manufacturing cities. I will make investments on first mortgages, secured on real estate, interest at 6 per cent. We will also purchase for you improved property that will pay between 6 and 7 per cent., after paying taxes and insurance. Now is the time to invest from \$250 to \$100,000. For further particulars write to above address.

\$50,000—Hon. HART A. MASSEY.

THE bequest to The American University of \$50,000 in the will of the Hon. Hart A. Massey, of Toronto, Canada, is notable in many ways. While it is but a fraction of the several millions he has given during his life or left by his will to educational, charitable, and benevolent purposes, it emphasizes his desire that Canada should have a share in The American University. He recognized the fact that Canada is in America, if it is not in the United States, and hence The American University should be international enough, and strong enough, to do post-graduate, special, and original research work for this whole continent.

Mr. Massey died in Toronto on February 20, 1896. He had reached the ripe age of 73. He graduated from Victoria College in 1844, and his gifts to education were not a sudden impulse, but a life-long and intelligent conviction of the need of such gifts, and of the good that would be accomplished by them. He was an ardent Christian, and while so successful in business as to start with little and attain a commercial prosperity seldom reached by the most fortunate, he was constantly active in all church enterprises.

A noble man has fallen. His form disappears from sight, but his monument is in public buildings and institutions in his home city and other places of his native land. In due time his gift to the American University will take form on the hill overlooking the Capital of the United States, and send forth its stream of blessing to humanity through all time to come.

What a precious heritage is left to his bereaved family and friends in the memory and reputation of one whose life was so full of good works.

THE PHILADELPHIA CONFERENCE responded nobly to the address it requested of Bishop Hurst on The American University. It added \$5,140 to the Asbury Memorial Hall Fund.

AN OLD BIBLE.

A HEBREW BIBLE has been given to the University by Mrs. Wm. H. Laney, whose husband was a member of the Baltimore Conference. It is a fine folio volume, in vellum, very well preserved, and dated 1603, with a preface dated 1587. The editor was Elias Hutter, a German Hebraist, who studied the Oriental languages in the universities of Jena and Leipzig, and in 1579 became Hebrew teacher of the Elector August of Saxony. His reputation as a linguist was established by the preparation of several Polyglot Bibles. The year previous to the date of this Hebrew Bible, he published a harmony of the New Testament in Hebrew, Greek, Latin, and German. His works are now rather more curious than useful, but still possess considerable value.

This Hebrew Bible is printed in remarkably bold and large letters that make the page a pleasure to the eye. Its peculiarity is that the servile letters are distinguished from the radicals by being in hollow type. It is an illustration of the indefatigable labor the old scholars were willing to put on almost infinite details.

THE GROUND-BREAKING for the Hall of History took place on Monday, March 9, at 2 p. m. It was a memorable day of sunshine, hope, and enthusiasm. The program was a genuine success. Our especial thanks are due to all who took a part in the exercises, to Hon. W. G. Wilson, Postmaster General, President B. L. Whitman, and Mr. Gurney of Toronto, for their excellent addresses; Knox & Brothers for kindness in furnishing conveyances; Moses & Sons for the loan of a flag; and Mr. J. B. Lambie for the gift of a now historic shovel, which was photographed, and is to be appropriately inscribed and preserved. Read the full account in later pages.

THE collection of books in the possession of the University is constantly growing by the gifts of friends. A list will be found under book notices.

NOTES.

Rev. H. H. FAIRALL, D. D., editor of *The Iowa Methodist*, deserves our thanks for securing nearly \$1,000 for the Hall of History from his friends in Iowa.

THE new *American Historical Review* is a success in more ways than one. It has already been obliged to print a second edition of its initial number.

OLD Bologna University has recently been thoroughly aroused by the celebration of the thirty-fifth anniversary of the professorship of the poet Carducci.

LECKY, the historian, was not disturbed by his Parliamentary campaign. While the polling was proceeding at Dublin, he was seen in an old book shop diligently searching for literary treasures.

Dr. J. G. Fitch says: "The great function of a university is to teach, and to supply the world with its teachers." That is well said, but another function is also laid upon these institutions to-day—that of original research.

SINCE Cambridge University admitted women to the honor examinations fifteen years ago 659 women have obtained honors in mathematics, classics, moral and natural sciences, theology, history, law, and Oriental mediæval, and modern languages.

The movement for a University of the United States is meeting with decided opposition in both the House and the Senate. The Presidents of Harvard, Yale, Columbia, Boston, University of Pennsylvania, and other strong institutions, have expressed themselves against it. Such an institution is not a necessity, and is not desirable. It would tend to centralization and paternalism. It would not add to the religious force of the country. It would be a football of the political parties. Why should the General Government enter into competition with the institutions now doing university work? It would try to do their work; it would take away their students; it would stop the tide of beneficence that is now strengthening them.

It is more than three centuries since John Knox blew "The First Blast of the Trumpet against the Monstrous Regiment of Women." Woman marches steadily on, and now the great medical school in Vienna University is disturbed by her rappings at the door, and Cambridge is stirred over the admission of women to all degrees. Is it not time for some old conservative to blow the last blast of the trumpet over this whole woman question in education?

HALL OF HISTORY.

By the time the reader's eye scans these lines the plans and specifications for this building will be complete. We had hoped that in this number of the COURIER we should be able to give a cut of the front elevation. Some changes introduced in this part of the structure at the last moment make this impossible.

The plan of the Hall is, however, so nearly complete that it may be described in quite full detail. The edifice will be 176 feet long, the central part have a width of 98 feet, and the two ends be each 70 feet in depth. It will be two stories and a half in height—the half being a well-lighted basement story, rising six feet above the ground. It is to be of marble. The basement will be rock-faced and the two upper stories dressed. The style of architecture is the classical. Doric, with some renaissance modifications. The entrance is by a large and handsome portico, facing on an inner quadrangle. On entering, the visitor will find himself in a large entrance hall, 36 feet square, from which roomy corridors run to either end of the building. Directly in front of the visitor will be two double doors leading into the Library and Museum. These are not for the whole University but for this department of History only, and are quite large and well lighted. There will be an Assembly Hall on the second floor, over the Library and Museum, large enough to accommodate the whole department. The other parts of each floor are arranged in suits of three rooms—a professor's room, a seminar and a lecture room.

UNIVERSITY ADVANTAGES IN WASHINGTON

Ex-provost Pepper, of the University of Pennsylvania, recently said before a Senate Committee: "The facilities for university work in Washington are immeasurably superior to those of any other city, and are becoming more and more so."

Mr. A. D. White, ex-President of Cornell, and member of the Venezuelan Commission, recently said: "The immense advantages of Washington (for university work) are unsurpassed by any city in the country."

Mr. Gardiner Hubbard, of Washington, D. C., said, not long since, that two years ago the trustees of Columbian University invited Dr. Harper, of Chicago, to come here as President of Columbian. He came on here, investigated the advantages, and said: "Give me one million dollars and I will make here a better university than can be done in Chicago with ten millions."

In the midst of these priceless advantages, now open by act of Congress to all students and professors within the District of Columbia, the American University is rising to do its work of training specialists and original investigators. The libraries alone would make Washington the greatest educational center in America. The scientific collections are even more valuable. The new Corcoran Art Gallery will be a great accession.

ASBURY MEMORIAL HALL.

There are several reasons for publishing the names of those who subscribe to the fund for the erection of this building. We desire to give credit to those who by sacrifice help on the cause of The American University. We desire, also, to give opportunity for the correction of names or amounts in these lists taken publicly in conference session. We gladly note the following corrections of the list published in the last number. The Rev. C. C. Ball and wife were credited with \$50. It should have been Rev. C. C. Ball, \$50; Mrs. C. C. Ball, \$50. Rev. M. D. Carrel's subscription should have been \$50.

The spirit of the Conferences in reference to this movement is excellently set forth in the following quotation from a letter of Dr. E. A. Schell, Secretary of the Epworth League, published in the *Epworth Herald*:

"Bishop Hurst came almost to the close of the session of the Central Alabama Conference when the brethren asked him to address them on The American University. He complied, and presented the interests of that great institution as it has seldom been presented even by him. The business was practically completed before he began, and for an hour he portrayed the need of such a post-graduate university, the hearty response of people of all denominations to appeals for its endowment, and the ability of our church to carry and complete great enterprises. Before he had finished a dozen were on their feet with pledges for the Asbury Hall, and further along they passed a motion unanimously asking him to receive subscriptions. The conference subscribed nearly \$1,000, and some against the protestation of the bishop that they ought not to do it. It is evident that the project of a great Methodist University at Washington, the Capital of the country, has laid firm hold on the sentiment and very imagination of the people, and that it is no longer a chimera, or vagary, but a potential fact. In the end the fact will be a generous premium on the most exuberant present fancy."

The following subscriptions have been received since our last issue—making a total of \$95,000:

PHILADELPHIA CONFERENCE.

\$500—C. W. Buny. **\$125**—A. F. Dotterer. **\$100**—W. C. Best, Conference Class of '91 (Gladstone Holm, J. H. Royer, Jay Dickerson, L. A. Parsells), Conference Class, 2d Year, Jacob Dickerson, J. Wright and others. **\$6**—Jefferson Lewis, G. W. Mann, E. B. McCauley, Mrs. S. J. McGill, B. G. Smith. **\$3**—H. D. Byrd, A. N. Jackson, Georgia Jackson, R. N. Jackson, Hazel Leewood, Mrs. S. P. McClain, W. L. Trammell.

UPPER MISSISSIPPI CONFERENCE, \$763.

\$100—J. W. Davis. **\$51**—R. Sewell and his Church. **\$50**—S. R. Gibson. **\$30**—L. F. Jones (C. H. Hundley). **\$15**—M. Blair (his Wife), T. W. Davis, B. H. Ferguson, B. H. Ferguson (J. W. Longstreet), G. H. Harvey (T. Weatherly), O. Gillespie, N. L. Lackey, W. E. Gask (Sarah Weatherly), Edward Newton, M. W. Reid (his Wife), H. R. Revels, H. R. Revels (L. C. Murray), D. P. Shaw, S. D. Troupe, W. H. Whitlock, N. H. Williams, B. F. Woolfolk. **\$12**—L. F. White. **\$10**—N. R. Key. **\$6**—M. Adams, William Bell (G. Reynolds), P. S. Bowie, J. Burton, E. D. Cameron, William Campbell, W. C. Conwell, G. J. Dubson, John Everett, Sr., J. H. Everett, W. H. Gatewood, J. D. Gibson, W. Golden, G. H. Harvey, C. P. Head, W. H. Hundley, G. W. Hunt, P. O. Jamison, J. J. Johnson, L. F. Jones, W. S. Leake, W. Lester, M. Lockman, S. M. McLeod, J. M. Nevils, G. Orange, J. W. Parks, William Roberts, E. F. Scarborough, L. L. Shumpert, E. J. Terrell, Elias Troupe, D. L. Tubbs, G. L. Walls, J. M. Walton, W. C. Weatherall, F. G. Wibon, H. M. Wilkins, H. X. York. **\$5**—W. E. Logan. **\$3**—William Bell, J. T. Cannon, C. E. Gates, H. H. Johnson, John Mayo. **\$1**—H. A. Johnson (Josaphine Parks).

ALABAMA CONFERENCE, \$197.

\$32—G. E. Ackerman. **\$15**—P. W. Blackwell. **\$9**—D. C. Beltz, J. L. Brasher, J. A. Mitchell. **\$6**—S. R. Crampton, J. G. Johnson (F. M. Brown), J. G. Johnson (William Donaldson), J. H. Lott, C. L. Mann, J. M. Mason, J. A. Mitchell (Homer Perrin, Jr.), F. R. Parker (M. F. Parker), F. G. Thompson, A. T. Vandiver, Bigab Watson (E. S. Wear), James A. Webb (H. W. Perrin, Sr.), James Williams, Charles Wolford. **\$3**—James Bowman (J. T. Pool), H. J. Brown, J. L. Freeman (D. H. Wear), J. N. Gibbs (A. H. Gibbs), William Green, J. G. Johnson (Minnie Johnson), J. G. Johnson, H. W. Jones, George G. Miller, William P. Miller (H. E. Wear), T. S. Rains, J. T. Terry, James A. Webb.

Payments.

The following payments have been made toward the "Asbury Memorial Hall Fund" from December 17, 1895, to March 12, 1896.

\$100—P. N. Chase, George B. Clarke, Wm. Denman, Zenas Hard (by friends), C. U. Wade (by First Church, Bluffton, Ind.) **\$33.33**—R. Vanborne. **\$50**—Isaac E. Springer, Thomas Lamont, E. L. Moon (by Mrs. L. Soule), E. S. Nindle. **\$35**—J. W. Welch. **\$34**—C. C. Ball. **\$33.34**—J. H. Johnson, Joseph Long. **\$33.33**—J. C. Floyd. **\$33**—E. L. Semans. **\$30**—T. H. Willis, Chas. E. Walton. **\$25**—S. J. McConnell, George Lansing Taylor (by a friend), C. W. Baldwin and wife, J. J. and Ida J. Smith, O. W. Willits, R. Woodhams, G. N. Kennedy, John B. Wentworth (by A. O.), D. H. Ramsdell.

- \$23—E. Vager.
 \$20—A. J. Richards, A. J. Holmes.
 \$15—H. Cunsfield.
 \$12—Duston Kemble, E. H. W. Barden.
 \$10—J. R. Colley, Geo. V. Morris, J. M. Sllarrow, Geo. E. Smith.
 F. D. Stevick, M. J. Scott (by C. W. Baldwin), T. Wakelin.
 \$9—Thos Greenwood.
 \$8.33—F. A. Mason.
 \$8—W. B. Weaver, J. G. Haller.
 \$5—J. W. Adams, Wm. S. Coeyman, J. W. Thompson, F. A. Van De Walker, Geo. W. Vorhis, W. McK. Hester (by Jane Adams), Judson Cooper, C. L. Church, J. B. Oliver, W. H. Lloyd, W. J. Passmore, Mrs. Mary Lautenslager, James T. Gurney, J. Rowe (by A. Veitch), I. L. Walker, W. C. McIntosh, G. J. Piper.
 \$3.35—E. L. Warner.
 \$3—Byron Carter, Geo. Nixon, J. S. West.
 \$2.50—B. Reeve.
 \$2—Fred. K. Townsend.
 \$1.60—John Thompson.
 \$1.25—Edgar Armstrong.
 \$1—H. E. Wylie, D. A. Curtis, S. Bird.

EDUCATION IN METHODISM.

Methodism is an organism. Its whole growth has been organic. Most of its lines of work have been so made a part of the organism as to feel the impulse of the whole denomination. The itineracy belongs to the whole Church, and each pastor is allied with, and strengthened by, the whole body. The bishopric is not diocesan nor local, but of the whole world. The Missionary Society has been so incorporated into the organic structure of the Church, that each missionary has the whole power of Methodism behind him. This is true of Church Extension, Freedmen's Aid and Southern Education, the Tract Society and Sunday School Union, and the Book Concern. Even what is known as the official press, Review and Advocates, belong to the whole Church, though the circulation of some of them is quite local.

It is not so with the educational work as represented by the colleges and universities. We do not forget the work of the Board of Education for the assistance of students, nor the excellent results achieved by Dr. Charles H. Payne toward bringing all the institutions of Methodism into a system with regular gradations.

But why should education be left in each local seminary, college, or university to fight its own battle, secure its own funds for building and endowment, and search for its own students? We are not objecting to local control. That is so thoroughly a part of our system, so imbedded in all charters, that it would be difficult to change, and perhaps it would not be wise to change it if it were easy.

The point we would call attention to is that the connective character of all our other benevolences makes every pastor an agent and every member a supporter. It is not so with our educational work. Pastors, with some marked exceptions, do not feel any special responsibility for the financial care of institutions of learning. The rank and file of the membership do not feel that this work of education belongs to them as the missionary work does. Though the schools are for the education of their children, they never give—it hardly occurs to them that it is their duty to give—to erect halls, build up endowments, and acquire the costly facilities absolutely necessary.

We are not writing now in the interest of The Ameri-

can University so much as of other schools. The American University is in a sense an institution of the whole Church by action of the General Conference. Conferences, churches, pastors, people, have shown it sympathy, given it a welcome, and are helping it to get ready for its great work.

Why, as an illustration, should the mission in Bombay have the whole of organized Methodism committed to its support and success, while Dickinson College with its great work and just as heroic and self-sacrificing corps of teachers, have no such organic relation and support? Why should the colleges of Methodism be left to send out their gleaners into the harvest fields after all the authorized reapers have used their sickles, and only occasionally find a noble-hearted Boaz who will drop some extra gifts in their way?

Does not this condition of things make the impression upon the rank and file of Methodism that education is not as important as a number of other kinds of work? May it not in this day of tendency to secularism in education lead some of our institutions to conclude that after all they only belong to the Church in such an indirect way that they may as well declare their independence? It is a suggestive fact that one of the strongest universities, everywhere considered a Methodist institution, is published, we judge with its own consent, as "non-sectarian," instead of "Methodist" as are all others. We would not wish any of our institutions of learning, not even our schools of theology, to be sectarian in the narrow sense of the word. But if this designation, "non-sectarian," is the beginning of a declaration of independence from Methodism, independence of control, independence of its doctrinal restraints, independence of its ethical standards, independence of evangelical experience and life, we feel that it is time this whole question of the relation of the educational work to the Methodist Episcopal Church were carefully considered by the powers that be.

Dr. Gemss, of Berlin, has computed that the 434 gymnasias, or colleges with classical course in Germany, during the last three scholastic years, have graduated 19,600 young men. Of these the great majority, in fact all but 273, had decided as to the future course—4,786, or 24.75 per cent., had chosen the profession of the law; 3,429, or 17.74 per cent., that of medicine; 2,290, or 11.9 per cent., that of Catholic theology; 2,140 or 11 per cent., that of Protestant theology; 29, Jewish theology; 1,498, or 7.74 per cent., proposed to enter the army; 503, or 2.6 per cent., had philology in view; 458 architecture; 433 civil and electrical engineering; 275 forestry, 257 mercantile pursuits; 168, chemistry; 167, mining; 158, natural sciences; 128, agriculture; 110, banking; 21, music; 10, sculpture. In all, 73.75 per cent. intended to pursue professional studies and 26.25 per cent. other callings

While the question of degrees given by colleges and universities is not an overwhelmingly important one, because men are really judged by what they are and not by their titles, yet it is time for some such legislation as that proposed by Senator Garfield, in Ohio, that the State shall more carefully discriminate in giving the power to confer degrees to institutions of learning.

BETTER not patronize the college that has not a positively religious atmosphere, and does not pay any attention to soul-culture.

THE BREAKING OF GROUND FOR THE COLLEGE OF HISTORY.

This interesting and historical event occurred on March 9, 1896. The day was all that could be desired at that season of the year. The sun shone brightly and the air was dry and bracing. About five hundred people were present, representing many States. They manifested great enthusiasm over the splendid location, the addresses, and the ceremony of Breaking Ground. We give a full account, both because of its interest and to preserve it as history.

The location of the Hall of History had been staked out a few days before by an engineer from the District office. A large four-horse wagon was driven near the spot, and from this the speakers addressed the company. A large flag was unfurled, and beneath the Stars and Stripes the first shovelful of earth was lifted from its place.

In the absence from illness of Hon. Matthew G. Emery, who had been selected to preside, Bishop John F. Hurst, Chancellor, directed the exercises according to the printed program.

The Rev. Teunis S. Hamlin, D. D., read the following hymn written for the occasion by President J. E. Rankin, D. D., of Howard University :

The Living Stone.

- 1 On Christ, the Living Stone,
On Christ, and Christ alone.
We wait to-day,
The Way His own lips taught,
The Truth from Heav'n He brought,
The Life for man he wrought,
Our guiding ray.
- 2 The one Great Teacher He!
We listen patiently,
Low at His feet,
By Him were all things made,
In glory-garb arrayed;
To him be homage paid,
And honors meet.
- 3 Establish Thou these walls!
Thy presence grace these halls,
With learning bless;
Long as you dome shall rise,
Long as our banner flies
Beneath fair Freedom's skies,
Reign righteousness!
- 4 The gold and silver thine!
Do thou our hearts incline
Rich gifts to bring;
Till we in future days
Shall high the capstone raise,
With shoutings and with praise
To Thee, our King.
- 5 Beneath the Morning Star,
These temples shine afar!
Thy hand defend.
Kings and their kingdoms go!
These doors we open throw,
Till oceans cease their flow,
And Time shall end.

The singing of this excellent hymn to the tune America, led by Mr. Frank Wilson of the Foundry Church, assisted by a cornetist, was truly inspiring.

Rev. Alexander Mackay-Smith, D. D., led in the responsive reading of Psalm XIX.

The following prayer was then offered by Chaplain W. H. Milburn, D. D., of the United States Senate:

O Lord God of Hosts, we come to Thee through Jesus Christ, thy Son, to pray that thy blessings be on us as we break the ground in this place to found here halls of science, history, letters and theology. Let the harvest that shall be gathered here generation after generation be to thy glory and for the good of mankind. Send down thy Holy Ghost upon us who are gathered here, and let thy heavenly benediction be upon this enterprise. We dedicate this ground to Thee, and all that shall hereon be built. O Lord God, let the issue of this day's work be for thy glory and for the welfare of this and coming generations to the end of time. We humbly pray in the name of Him—our divine Lord and Saviour—who hath taught us when we pray to say, "Our Father who art in heaven, hallowed be thy name. Thy kingdom come. Thy will be done in earth as it is in heaven. Give us this day our daily bread. And forgive us our trespasses as we forgive them that trespass against us. And lead us not into temptation, but deliver us from evil; for thine is the kingdom, and the power, and the glory, forever. Amen." The grace of our Lord Jesus Christ and the love of God and the fellowship of the Holy Ghost be with us all, evermore. Amen.

Bishop Hurst's Introductory Address.

To this large company of friends who have gathered here on this perfect afternoon in March, I would say in behalf of the Trustees, and of friends and contributors far and near, we bid you a most cordial welcome. We made a little mistake in going to the farther bill. We missed the guidance of the Vice-Chancellor, Dr. Beiler. We are glad that he was not here, for we put our feet on the highest point of all these grounds.

Let me say that this ninth day of March is the anniversary of the day on which Dr. Beiler was elected Vice-Chancellor. I have been looking into the histories, into the old almanacs, and various other places to find an anniversary which this day would suit, and that is the only event—the most important one for us—that does precisely suit. Three years ago to-day he was elected Vice-Chancellor.

For two weeks, when it became necessary to find a good piece of ground on which to locate the proposed university, we made the search. Mr. T. W. Tallmadge, who is here, made the examination with myself, and on the last afternoon of the two weeks we saw this beautiful location. A gentleman met us along the road, a little before we reached here—Major Arnes—and told us about this place. The result was that it was bought, costing \$100,000. It seemed only fair that we should ask Washington to pay that money, and not ask anybody outside of Washington to contribute. And I say it, to the everlasting honor of Washington citizens, that they made the gift of that \$100,000, and it is paid for. Every foot of land in the ninety acres, every bird that flies in the trees on these grounds, and every rabbit and squirrel, they are all paid for, so long as they stay within the enclosure of the ninety acres. Across to the left, as I stand, are the breastworks of the first fort built north of the Potomac during the Civil War. It was built there by the Pennsylvania Reserves. Some of it has been taken down, but the fragments still stay. We intend to have them stay. This ground has a lengthy history, one part of which connects it with the domain of letters. It was owned at one time by the cousin and friend of Joseph Addison, the author of the Spectator, and of other works standing foremost in the English literature of the last century.

Now, I suppose you would like to know just where we stand financially. It is calculated by those who know the figures better than myself, that, including the ground, the available subscriptions and money already paid in, we have about one million of dollars. Two-thirds of the Trustees of the University, by the charter which Congress has granted us, are members of the Methodist Episcopal Church. The other one-third are members of various denominations—six or seven denominations in all being represented. We hope to increase that number; we should be glad to have a dozen

or more represented. Let me say that about one-half of the money contributed for the ground has been paid by Presbyterians, Episcopalians, Baptists, Congregationalists, and others; so that they have shared with us the common interest in the welfare and growth of the institution. Contributions have come from various parts of this country, and from all over the world. Various distant mission fields have sent their gifts. For all these we are very grateful. The last notable gift was a bequest in the will of the late Hart A. Massey, of Toronto, of \$50,000. Of that we knew nothing, until it was seen in the papers. A friend of Mr. Massey—a life-long friend—is here to-day, and we want to have a few words from him before we close, and when it comes to digging the shovelful of earth, we want Mr. Gurrley, the friend of Mr. Massey, to represent that well-wishing and noble family.

Now, there is much to say, but it will not be said by me. I am glad you came to-day, glad to look you in the face, glad to know that you have a sympathetic feeling for us. Now that you have been out here once, you will always know the way. I think in about five weeks the builders will be ready to lay the corner stone; so if you get no formal invitation, you must accept this as an invitation. We will have speakers then—some from a distance; we have asked none from a far distance at this time. I think that Postmaster General Wilson will be almost, perhaps altogether, the only gentleman representing the Administration or either House of Congress. He was himself a man engaged in instruction in the State University of West Virginia, and he speaks to us as one acquainted intimately with our prospects, with our objects, and with the plan of the University. I take great pleasure in introducing to the audience Postmaster General W. L. Wilson.

Postmaster General Wilson's Address.

MR. CHAIRMAN, LADIES AND GENTLEMEN: Bishop Hurst has made out rather a difficult task for me to perform and that is at the same time to represent the Administration and both Houses of Congress. But I will take it for granted that whatever differences of opinion may exist between the Administration and either House of Congress, they are at least in accord so far as the ceremony of this day is concerned. I have felt it a great honor to be invited by the Chancellor to be one of those who were to take part in this notable service. There are many trains of thought which spring spontaneously from such an occasion as this. The American University passes to-day out of the era of prospectus into the era of seed and active life. What this life is to be, none of us can wisely attempt to forecast, and yet it would be unnatural—it would be almost blameworthy—if we sought altogether to repress the enthusiasms that are kindled by such a ceremony as this, or to clip the wings of hope and of faith which are assumed in such a presence. What a great university can do for the cause of human civilization! What it can do for Christianity—for freedom! What it can do to strengthen those forces which must be constantly called upon to fight for man's progress and man's elevation; and to fight against those forces which must be constantly fought against to prevent man's regression and degradation!

These are themes tempting, indeed, to one who speaks on such an occasion as this, and too tempting for me to undertake to pursue. Nor can I omit in this presence nor on this spot to allude to the great work of the university as the pillar of the church, and as the bulwark of a free republic. To both these services your school is to be dedicated.

As a rule, the great schools of the world have been extremely slow in their growth. They are the children of the products of centuries. And though we have seen in our own country, where men move more rapidly than anywhere else in the world, and, perhaps, in one or two instances in other countries, great schools brought into existence by the fiat of a State, by the support of the Government, by the unforced philanthropy of private wealth, yet time, and time alone, can bring to a great institution that stability of growth, that power of inspiration, and those traditions that come from its past history and from the lustre of the names by which that history has been illustrated. And so to-day, humble and small as this beginning is, it pledges those to whom this work is committed for all the future. Whatever may be accomplished by those who have planned and toiled and prayed and given, up to this time, this day's work pledges them and those who come after them to higher endeavor, to more fervent prayer, to more elaborate planning, and to more generous munificence for all the coming generations, for whose benefit this school is here established.

It is upon this career to-day that the authorities of this school enter—a great, noble, and inspiring career; when we reflect that it is to build here at the capital of the country an institution that shall

be at once worthy of the ambitious name which it has assumed, and worthy of that great and intelligent denomination in this country which to-day plants its standard at the Federal capital.

The audience cheered Mr. Wilson's eloquent and appropriate words most heartily.

Bishop HENRY: "We shall now have the pleasure of listening to President Whitman, of the Columbian University. President Whitman has recently arrived in our city. The Columbian University is an honored institution, whose alumni have gone out and are now all over the world doing important work. We are very glad to welcome President Whitman to Washington and to this place."

President Whitman's Address.

LADIES AND GENTLEMEN: When I understood that there had been a break in the programme, and that there was not as much difference between the Postmaster General and myself as had been planned, I felt unhappy; but how do you suppose I feel now, that there is a complete jump from him to me? Yet I am just as glad to be here as he is; just as glad to pay tribute to the noble spirit which is behind this movement; just as glad as the representative of another institution to extend the hand of welcome to this institution, which to-day makes its beginning in the life of our fair city. I am the more glad as a teacher for the establishment of this institution because of a felt need which it will meet.

The great present-day need of American education is unification. It is only by forced language that we can speak of ourselves as having a system of education. This is not because we have not institutions enough. Of certain kinds we have quite enough, but every educator feels that there is a lack of consistency and continuity in our work. In some quarters courses are not discriminated; in other places there are great gaps between courses. As a matter of experience, difficulties of this kind have been corrected only when impulses came from above. In many movements it is necessary to apply inspiration at the bottom, but in education it is necessary to work from above downward.

There is to be added also to what I have suggested a demand, which in recent decades has been strong, for provision for the highest education. In a country as new as ours it is not strange that the equipment for the highest education is meagre. Educational machinery costs, and it takes time to get it. Naturally the part that goes in last is the most costly part, and that is the part that concerns the most advanced stages of education. It is really a tribute to social development that the demand for highest education has become more and more marked in recent years. There are many institutions that are rising grandly to meet this demand, but the time apparently has come when we may take a step in advance even of the best of these, and I welcome the establishment of this University as a member of a group which is bound to come and grow larger; institutions which do not undertake undergraduate work, but leaving that to the colleges and academies through their appropriate curriculum, are themselves prepared to take the products of these lower institutions and lead them along the way of independent study. There will be at the same time a toning up of the whole system, for when the colleges have been braced and strengthened the preparatory schools will follow; and when this has been done the intermediate and lower grades have felt the impulse. So that the toning of the highest institution and the consequent bracing and strengthening of the grade which stands next below means an impulse which stops not there at all, but passes all through the grades, and they likewise are braced and strengthened.

At the same time that this bracing and strengthening is going on, there is a sense of unity developed, for it is expected that this movement shall be the center of a larger group, and this again of yet larger groups, thus developing a sense of unity. This is all true from the secular point of view; it is even more true from the religious point of view. I am glad that this institution has been founded as a Methodist institution. Of course, we may ask how there can be Methodist Greek or Methodist Latin or Methodist philosophy, and we shall simply ask foolish questions. But it is vastly important that there should be institutions established under religious auspices, and I suppose it is understood that this is to be a university controlled by the Methodist denomination. For criticism as we may the idea, the principle has been established that the great educational machinery in this country is to be controlled by men of distinctive religious views. Whether we will it or not, history has put it on record that vastly the larger percentage of our students are in institutions which rest upon a religious basis. And as time goes on, we shall still have need of just the kind of auspices which are understood to control this university.

Now, the Methodist denomination has already many good schools. As time goes on, it will have more and much better schools. This university will unify all the rest of the schools that belong in that system. Relief will be felt at once by taking off of certain schools the stress and strain incident to their attempt to do university work, and leaving them free to do the work for which they are fitted; while, at the same time, a sense of unity will come into these groups by the thought that they are related to the great central institution. Your denomination, my brother, has planned wisely in planning this university for just the grade of work contemplated for it. All of its educational work will be centralized and unified, and out of this new and larger equipment will come tremendous impulses for the advancement of religious work which has already been so magnificently performed by this denomination.

In the name of those I have the honor to represent, in the name of the great body of teachers who welcome always aids to their work, in the name of fellow Christians, I say God speed the work.

Bishop HENRY said: "One of the peculiarities of our situation is that we are constantly receiving applications for students. They are writing to us from various parts of the country, thinking that we are at work with a faculty and ready to take students. We have to tell them that we are not ready yet awhile. So far, we have not recommended them to come to Washington at all, but since hearing President Whitman, I think we will tell them to come on; that the Columbian University has its doors wide open and will give them welcome.

"Now it was said that Mr. Massey, in the goodness of his heart, had made a bequest to The American University. It is not enough for a whole building, but it was a large and generous gift. The proviso that it is for a building to represent Canadian Methodism has the significance that it will form a bond, and must form a bond, between the United States and Canada. How we are going to get all the way over that Suspension Bridge, we do not exactly know, but we think the fifty thousand dollars will grow until the Niagara division is bridged in that high moral and scientific sense. His friend of many years, Mr. Gurney, happened to arrive in Washington the other day and stays over a day longer than he had planned in order to accept our invitation. Mr. Gurney was a fellow-townsmen of Mr. Massey, and we should be glad to have him say a few words."

Mr. Gurney's Address.

If I were in Canada or in England and called upon to address a bishop, I should say, "My Lord Bishop," but being in Republican America, and being in a certain sense a Democrat myself, I will call you "My Brother Bishop." You know I am a bishop among laymen.

I am glad, sir, to be on this ground to-day, but I am sorry that the limitation is placed upon me of saying in twelve words just how much of friendship there is in Canada toward the people of the United States. If I had been given years in which to give to you my deliberate opinion upon that point, I should exhaust them all. Twelve words will not do; twelve hours will not do. The people of Canada have no feeling toward the people of the United States but one of entire friendship. In the early history of Canada a great many people emigrated from here who were called Tories. You who read the early school books will remember what their history was. They have a few descendants left, and amongst them there is a little of the feeling that some of you on this side have imbibed from your school books. But taking the people, as they run, I know of no feeling but one of friendship for your people and for your Government.

During the recent war between Great Britain and the United States which occurred here some six or eight weeks ago, I chanced to be at the Parker House, in Boston, and, rising one morning, I read in one of the papers the ominous word "War!" It added a little piquancy to the breakfast, but, looking for the men who would represent that sentiment in Boston, in Philadelphia, and in other places, I have yet to find the first man who had one atom of sympathy for that idea. To men who belong to colleges, to men who belong to churches, the element of the animal is supposed to be subdued. War has in it something of glory, but the glory exists only in the manifestation of patriotism, in the manifestation of love, and in no wise in the mere act of war. War is brutal; and every man of us who believes in

war is representing, to the extent that is within his reach, the principle that resides in the brute. The animal believes in war; no Christian man has any sympathy with the idea.

I am very glad to be with you; I am sorry that on this occasion, as on many others, a small individual represents a great constituency. I can not help the fact. I was selected for the occasion by a Bishop, I would have been in Richmond now if it had not been for a Bishop. I believe in bishops for their manifested power on this occasion.

The words of Mr. Gurney struck a responsive chord in the hearts of his audience, as was evinced by their laughter and cheers.

Bishop Hurst: "Now, I want to say that no one has done harder work in all the initial stages to bring us together at this time than Dr. Beiler, my associate. I want Dr. Beiler to say a word or two to this audience."

Vice-Chancellor Beiler's Remarks.

This is entirely unexpected, and I shall not detain you in this kind to make any speech.

I am glad that this movement is pleasing to our English friends—those on this side of the ocean as well as on the other side. I understand that Charles Dickens, when he was in Washington, had something to say about large avenues that led nowhere, and that as he wandered about through these avenues he wondered there was no university at the Capital of the United States. We are trying to do something that will satisfy even the shade of Dickens. Also, one of the most prominent English Methodists, Mr. Arthur, when here in the city of Washington some years ago, suggested an enterprise of this kind, so that England as well as Canada has an interest in this project. If I have not forgotten all my geography, Canada is in America. So if Canada does not belong to the United States, it does to The American University, or The American University belongs in part to Canada.

This is The American University, and I hope that it will be American through and through, and that this most beautiful of all flags shall forever float over its buildings. But I am more and more convinced that the highest type of Americanism is cosmopolitan in its feeling; it takes in all nations; it recognizes the brotherhood of all humanity and wants to achieve the highest ideals of manhood. And for this institution which we here plant, so far as I have any thought about it, I trust that we shall have the highest ideals not only of culture but of manhood, and not simply of manhood but of religion. The greatest man in all human history was the Lord Jesus Christ, knowing most, being most, having the closest fellowship with the spiritual universe about him. As we come closest to that ideal, we come closest to the highest type of the educated citizen not only of America, but of the world; and my prayer is that some such characters, somewhat like unto Him, at least, may be developed in this institution as the years go by. Thank you.

Bishop Hurst's Closing Remarks.

The regular program has now been nearly completed. You may like to know now how we reached the conclusion to locate the first building here. Mr. Olmstead, who laid off the Central Park at New York, the Fair Grounds at Chicago, and the Capitol Grounds here, has been with us a good many times. He has been at work on the plans of the grounds for about three years. On Saturday afternoon, the last hour of the afternoon, we reached the conclusion as to the location of all the buildings which we have in view. That plan is entirely different from that with which we began as a rough draught. And I know it will interest you very much to know that the grounds are all laid off on this plan, and that we proceed immediately to dig the foundation and to erect this building—the Hall of History.

We will have no college departments here; no curriculum for the four years of the college course. This institution is dedicated to the more advanced studies of post graduate and professional schools alone. That is the program which we have in view. Students coming to us with diplomas of bachelor of science or arts—the regular diplomas of our colleges—will be admitted on the face of their diplomas for their special studies.

This building will be of marble, Doric style, and will be one hundred and seventy-six feet long and seventy feet wide. We have three architects, Van Brunt and Hoyle of Boston and Kansas City, and our fellow-townisman, Mr. Poinlexter, as associate and equal in rank with the other two gentlemen.

We will now proceed to the spot which Dr. Beiler will indicate. We would like to have all of our friends here dig a spadeful of earth. It will be a delightful fact to bear in mind by us.

The entire company then passed to the spot on which the College of History is to stand, and, forming a large circle, watched with interest the ceremony of "Breaking Ground." Bishop Hurst, as Chancellor, turned up the first sod, and at the suggestion of Mr. Cox, of the Smithsonian, it was preserved as an interesting souvenir. Inasmuch as the University is to be thoroughly co-educational, Mrs. Hurst threw out the next shovelful, followed by Mrs. Somers, one of the trustees, Mrs. Beiler, the speakers of the day, Mr. A. B. Duval and Mr. A. B. Brown of the trustees, Mr. Tasker of the Epworth League, Mr. Warner of the Board of Trade, Mr. Cox of the Smithsonian, Prof. Frisbie of the Naval Observatory, Dr. Rankin of Howard University, Rev. Albert Osborn, Registrar, Rev. C. W. Baldwin, Secretary, and many others connected with different institutions, colleges, churches, and States. Indeed, about everybody took a hand in the work, even to a little boy, Freddie Paxton, said to be the first child born on the site after it was purchased by the University.

The doxology was then sung, the benediction pronounced by Rev. L. B. Wilson, D. D., and the work of building The American University was begun.

COLLEGE OF SCIENTIFIC TEMPERANCE.

It has been said so often that the entire work of The American University is to be post-graduate that we are surprised that some of our friends thought the announcement of the above department meant a school for undergraduates. All parties to the agreement founding such a department understand that its work is to be thoroughly post-graduate, both as to its instruction and original investigation. Toxicology, Chemistry, Biology, Physiology, Hygiene, Psychology, Ethics, Criminology, Political Economy, Sociology, Law, Reforms—legal, medical and religious—History and Pedagogy, as related to the use of stimulants and narcotics and their effects upon mankind, surely gives room for a full department, room for all students can do in three or four years, and opportunity for specialists to spend their lives.

WASHINGTON is the best place in the United States for the study of Civics, and it is hoped that this may be one of the earlier departments to be organized in The American University. It should be closely associated with History, for which a hall is now being erected. The interest in civic reform now making itself felt in many places can only be made permanent and lastingly effective by putting itself into educational institutions everywhere.

GIFTS AND BEQUESTS.

"A man can not be trusted to do right in any particular till he can do right easily; that is to say, until it has become his habit to do right. Giving can not be left to impulse any more than spelling can be left to impulse. We have seen what might be called impulsive spellers, and they make just the same wretched work with orthography that impulse-giving makes with charity."
—C. H. Parkhurst.

The late Mrs. Anna R. Aspinwall willed her entire estate, estimated to be worth \$3,000,000, to the hospital of the Protestant Episcopal Church of Philadelphia.

The will of Anna Brown, of Quincy, Ill., gives \$350,000 for charitable purposes.

Mr. William Scott bequeathed \$100,000 to the Brooklyn City Missionary Society of the M. E. Church upon the death of his wife.

Mrs. E. J. Swain, who recently died in Detroit, made special bequests amounting to \$100,000, and the balance of her large estate is to go to Fisk University.

Mayor Sutro's gift to the University of California, including the Sutro library, is over \$1,000,000.

The late Mr. Samuel Insee gave the Y. M. C. A. of New York property worth \$219,000.

Ex-Governor Flower and his niece, Mrs. Emma Gertrude Keep Halsey, have endowed five additional beds in the Flower Hospital, New York, at \$5,000 each.

The contribution from Henry Phipps, Jr., of \$50,000 for the enlargement of the conservatory erected at his expense at Pittsburgh, Pa., will make this conservatory one of the largest in the world.

By the death, in Philadelphia, of Mrs. Margaret Creighton Agnew, widow of Dr. D. Hayes Agnew, the hospital of the University of Pennsylvania becomes the beneficiary of a bequest of \$50,000 by Dr. Agnew.

Miss Helen Culver, of Chicago, gives one million for the promotion of the interest of Biology in the Chicago University.

Boston University has accepted \$5,000, left it by L. T. Jeffs, and established a scholarship in name of the donor.

The Woman's Home Missionary Society is made legatee of the \$100,000 estate of Miss Clara Campbell, of Ironton, Ohio.

Mr. J. D. McCard has given \$6,000 to the Presbyterian Hospital of Philadelphia for the erection of another building.

In addition to the \$1,449 realized from his recent lecture at Denver for the benefit of the University of Denver, Chaplain McCabe has given \$1,000 in behalf of himself and wife to that institution, to be applied on the bonded debt.

Mr. Robert Hamilton, of Quebec, has made an offer of \$20,000 to the authorities of Bishops' College, Lennoxville.

The will of the late Franklin Baldwin, of North Grafton, Mass., directs, after the death of his widow, the payment of the following legacies: To Wellesley College, \$55,000 to found a chair in Mathematics; to Smith College, Northampton, \$12,000 for two scholarships, preference to be given to students from Putney, Vt., his native town; to the Home for Aged Men, Worcester, \$10,000; to the University of Vermont, \$10,000 for scholarships; to Dartmouth College, \$6,000 for scholarships; to the First Universalist Church, Worcester, \$6,000 for a poor relief fund. The residue of the estate, with the exception of one private legacy of \$1,000, goes to Clark University, Worcester.

Mrs. E. G. Kelly has given \$100,000 to Chicago University for a chapel, and Mrs. P. K. W. Shimer, of Mount Carroll, Ill., has signified her intention of turning over to the University the Mount Carroll Female Seminary. In addition, she promises to endow the University with at least \$150,000 in cash, and that sum may be increased to \$200,000.

The Chicago Training School for Missionaries has received a new building worth \$50,000.

A New York gentleman named Palmer has given \$100,000 to Elon College, at Raleigh, N. C.

Mr. C. L. Magee and his associates in the Fort Pitt Street Railway Company have contributed \$100,000 for a zoological garden at Highland Park, Pittsburgh, Pa.

Mrs. Phineas M. Barber, of Philadelphia, is about to erect and equip, at a cost of about \$40,000, a seminary for girls at Armstrong, Ala., and hand it over to the Presbyterian Board of Missions for Freedmen.

Dartmouth College receives \$25,000 from the estate of the late Mrs. William H. Brown, of Manchester, N. H. When interest and principal amount to \$100,000 it will be used to found a professorship for instruction in Human Physiology.

Mr. W. A. Slater, of Norwich, Conn., has given \$10,000 toward the construction of a new school building in his city, and has offered, if a normal department is established, to endow it with \$175,000.

Andrew Carnegie has announced that he will give \$50,000 a year for the embellishment of the museums and the art galleries in Pittsburgh bearing his name.

The will of the late Martin Brimmer, of Boston, gives \$10,000 to the Boston Children's Aid Society. It provides that after the death of his wife one half of his interest in the Old Corner Book Store property shall go to the Museum of Fine Arts, and that from the one half of the property put in trust for his wife during her life \$20,000 shall go to the Massachusetts General Hospital and \$50,000 to Harvard College, and the surplus of that half, if any, shall go to the Museum of Fine Arts.

Mr. Cornelius Vanderbilt and his wife have transferred as a gift a plot and house on the north side of Forty-second street, New York, purchased for \$60,000, to St. Bartholomew's Church.

Some years ago J. H. Armstrong, of Plattsburg, New York, deeded a considerable property to Union College, but retained a life interest in it. On January 2 of this year he died, and by his will added to the gift, which now amounts to \$100,000.

Miss Helen Gould has given \$8,000 to Yassar College to found a scholarship in memory of her mother.

Mrs. Josiah M. Fiske has made a gift of \$5,000 to Barnard College to found and support a scholarship.

It seems likely that the 3,000 or more women art students in Paris will soon have suitable headquarters where they may have the benefit not only of co-operative board and lodging, but also of reduced instruction rates, suitable assembly rooms, reception rooms and lecture halls. The American National Institute was recently incorporated in New York with Channey M. Depew as president, and a board of directors including Henry C. Marquand, Mrs. Candace Wheeler, Mrs. Helen McKay Gilder, and other prominent New York men and women. The object of this society is to provide a suitable building on a well located site, at a total cost of about \$150,000, and to provide a fund of \$100,000 for support.

The late Hart A. Massey, who died at Toronto, Canada, bequeathed \$650,000 to charitable, educational, and religious institutions. Among his other bequests—we refer elsewhere to his bequest to the American University—are the following: Victoria College, Toronto, \$200,000; Wesley College, Winnipeg, Man., \$100,000; Mount Allison College, Sackville, N. B., \$100,000; Wesleyan Theological College, Montreal, \$50,000; The Rev. D. L. Moody's Schools, Northfield, Mass., \$10,000; Methodist Deaconesses' Home, Training School, and Hospital, Toronto, \$100,000; National Sanitarium Association (consumptive hospital), Gravenhurst, Ont., \$25,000.

"A university training is the great ordinary means to a great but ordinary end; it aims at raising the intellectual tone of society; at cultivating the public mind, at purifying the national taste, at supplying true principles to popular enthusiasm and fixed aims to popular aspiration, at giving enlargement and sobriety to the ideas of the age, facilitating the exercise of political power, and refining the intercourse of private life."
JOHN HENRY NEWMAN.

Book Notices.

[The Editor will be glad to give brief notices of such books as are appropriate to the COURIER. Copies of volumes sent for notice will be placed in the University Library.]

Bibliae Ebraicae, Eleganti et Maiuscula Characterum Forma, quae ad facilem sanctae linguae et Scripturae intelligentiam primo statim intuitu literae Radicales et Seriales, Deficientes et Quiescentes, &c., situ et colore discernuntur: Ad propagandam Dei gloriam elaborato Cura et Studo Eliæ Huteri. Coloniae. 1603.

BROWN'S BIBLE, called also the Self Interpreting Bible. Edited by Rev. John Brown of Haddington, and published by T. Kinnersley, New York, 1827.

It is a fine, large volume, with names of Daniel and Emeline Ricketts in gilt letters on the cover.

ARCHITECTS OF FATE, or Steps to Success and Power, by Orison Sweet Marden, author of "Pushing to the Front." Houghton, Mifflin & Company. Boston. 1895.

The former volume, "Pushing to the Front," has been a remarkable success. It is having a great run beyond the sea, being published in several languages. We predict that this volume of our classmate in Boston University will be as popular. Mr. Marden has found his vein of gold and works it well. This book will be an inspiration to character-building, self-culture, and noble achievement with all the young people who shall be privileged to read it.

MEMOIR OF JOHN HOWE PEYTON, A Lawyer of Virginia. Printed for private circulation.

This is a collection of facts, letters, and papers that has its historical value. A large collection of family, semi-private, and public documents that were the heirloom of the family, which came to Virginia in 1644, was destroyed or burnt during the late civil war. This experience doubtless suggested the putting of these into such form, and so distributing them, that a like calamity may not again occur. This might well be a suggestion to all who hold in insecure possession any historical data, whether it be public or private in its character. It should be duplicated, and the original manuscripts housed in the fire-proof buildings of our public institutions.

GUTHRIE AND GROFTHHEAD, the title of a little volume, in which are bound together two old volumes. The first one was by Rev. Wm. Guthrie of Kilmarnock, and published at Edinburgh by the Heir of Andrew Anderson, Printer to His most sacred Majesty, City and College, 1627. Its title is, "The Christian's Great Interest." The other volume is "The Testament of the Twelve Patriarchs," claiming to be a translation of "an antient Greek Copy, written on Parchment and preserved in the University Library of Cambridge." It is dated 1763, and is interesting for its crude attempts at illustration.

FAITH PAPERS, PENTECOSTAL PAPERS, AND PRAISE PAPERS. Three small volumes by Rev. S. A. Keen, D. D.

The author, who passed triumphantly into the heavens a few months ago, was a pastor of great acceptability, and an evangelist of deep spirituality and unusual mental balance. His life and work were a benediction to thousands. Among his later deeds was the sending of these little volumes to the University. They will long perpetuate his brief earthly ministry.

SMITHSONIAN REPORTS, being 32 volumes, from 1853 to 1880, and nearly complete for those years.

REPORTS OF THE COMMISSIONER OF EDUCATION, being 20 volumes, from the year 1871 to 1892-93.

These two sets were secured by a friend who appreciates the fact that many of these volumes, especially of earlier years, are becoming scarce and difficult to get. We desire to secure complete sets of all governmental publications, and will be very thankful to any friend who will assist in the matter. Should duplicates be sent, they will be of value in exchanging with other libraries.

REPORT OF THE COMMISSIONER OF NAVIGATION, 1894.

THE METHODIST REVIEW, being 22 bound volumes extending from 1863 to 1884, inclusive, and 11 unbound volumes extending from 1884 to 1895, inclusive.

These volumes are the gift of Rev. S. J. McConnell, D. D., of Philadelphia, and embody the great discussions of Methodist Theology and Polity during those years.

THE HOMOLETIC REVIEW, being 11 unbound volumes extending from 1884 to 1895, inclusive.

These valuable volumes are also the gift of Dr. McConnell.

REPORT OF PENNSYLVANIA METHODIST CONVENTION; and several other fugitive Reports, from the same kind friend.

The following Pamphlets have been received since our last issue: "A History of the Public Education Association, by Lewis R. Harley, Ph. D." "Declinations and Proper Motions of Fifty-six Stars," by Herman S. Davis, Ph. D. "Scheychichi and the Strand," or "Early Days along the Delaware," by Edward S. Wheeler. "Revue Politique et Parlementaire," Paris. "First Report of the College for Asiatic Christian and Other Youth," 1819. Presented by Fred. W. May. Also by the same, "Letters on Education by Junius to 'The Friend of India,'" "The American University; When, Where, and What shall it be?," by Prof. John W. Burgess, Ph. D., 1884. "Washington, or The Revolution." A drama, by Ethan Allen. Several publications of the American Bankers' Association, by Prof. Edmund J. James, Ph. D. "Bibliothèque Universelle et Revue Suisse," Lausanne, 1896. We have received quite a large number of Year Books and Catalogues from different Colleges and Universities, for which we are very thankful.

EDUCATIONAL NOTES.

Howard University, Washington, D. C., has 585 students.

Hamline University has taken in the Minneapolis College of Physicians and Surgeons, and is organizing a School of Theology.

Chicago University, though two-thirds of its trustees must be Baptists, is said to have 100 Methodists among its professors and students.

The trustees of Northwestern University have determined to erect a great office building upon the site of the abandoned Grand Pacific Hotel, in Chicago, which the University owns.

President Chase, of East Maine Conference Seminary, is toiling earnestly for the securing of the \$50,000 so much needed to endow this school.

The attendance in the Scottish universities for the year 1894-1895 is thus stated: Edinburg, 2,924; Glasgow, 1,903; Aberdeen, 812.

Iowa Wesleyan University is putting in a plant for Civil, Architectural, Mechanical, and Electrical Engineering sufficient to accommodate 500 students.

Medical students at Athens are riotous because women have been admitted to the university. An Arcadian recently shot a student from Asia Minor in the chemical laboratory in a dispute over the question. At Moscow the students refuse to attend the lectures of Professor Sacharin because he is the Court physician.

David Keppel, of Clyde, has recently presented Syracuse University library with a rare and valuable book. It is the New Testament in Greek, published at Leyden in 1633 by the famous Elzevir press. According to bibliographical manuals, it is the best and most sought-after edition. Dean Alford, in the introduction to his Greek Testament, says that it is the original printed edition of the *received text*, and that the term itself appears to have originated in an expression used by the Elzevirs in the preface of this volume. It is also the first Elzevir edition in which the text is divided into separated verses. The book is in perfect preservation, and is a beautiful specimen of the Elzevir press.

President Cleveland has accepted an invitation to deliver an address at the one hundred and fiftieth anniversary of the founding of Princeton College.

The Methodist Recorder, of London, says: "Some months ago a pair of saddle bags used by the famous John Nelson as he traveled about the country preaching—sometimes in company with John Wesley—was given to the Allan Library."

Revolutions of religion resulting in hundreds of conversions have taken place in the colleges of the Methodist Episcopal Church this year. Indeed, it is a question whether the colleges do not lead the churches in this all-important work.

Wisconsin University issues a Bulletin of News to Editors once in two weeks.

Proposed Buildings and Endowments of the American University.

ADMINISTRATION HALL.

This should combine Library and Chapel; or Library and Chapel might be detached, the whole forming one group. The Administration Hall should contain the general offices for the management of all Departments, and also a Senate Chamber, as an auditorium for the general assembly purposes of the University.

HALL OF SCIENCE.

For the following Departments of Study.

MATHEMATICS, CHEMISTRY, PHYSICS, BIOLOGY.

HALL OF HISTORY.

Departments.

AMERICAN, EUROPEAN (west and north), MEDITERRANEAN
ORIENTAL.

HALL OF PHILOSOPHY.

Departments.

METAPHYSICS AND HISTORY OF PHILOSOPHY, ARCHEOLOGY,
THEISM, COMPARATIVE RELIGION, PSYCHOLOGY, LOGIC AND
ETHICS, SOCIOLOGY AND ECONOMICS, CIVICS.

HALL OF LANGUAGES AND LITERATURE.

Departments.

ORIENTAL AND SEMITIC, GREEK, LATIN, ROMANCE, GER-
MANIC, ENGLISH.

HALL OF LAW.

In addition to these buildings there will be needed special endowments for instruction in the various Halls classified under the general names of Professorships, Lectureships, Fellowships, and Studentships. It is preferred, unless there be special reasons to the contrary, that gifts of both Halls and Endowments should bear the names of the donors, or of such friends, living or deceased, as they may designate.

The University grounds comprise a tract of nearly ninety acres, situated on the northwest heights of Washington. This space furnishes commanding sites for all the above buildings, with such others as the future may prove to be necessary for the full development of the University. The arrangement of the grounds is under the care of Mr. Frederick Law Olmsted, who will advise with reference to the location of the Halls.

Trustees and Officers of the American University.

John F. Waggaman,

Real Estate Investments,

700 14th Street N. W.

Washington, D. C.

I am agent for the beautiful suburban property known as Wesley Heights, situated opposite the site of the American University. This property has a great future, not only because the University is to be built opposite, but on account of its desirability as a resident part of the District of Columbia. I am also agent for lots in Morris' Addition to N. E. Washington, which presents a good field for investment for small amounts. All this property is laid out in conformity with the general plan of the city of Washington and is entitled to the city improvements. In addition, Washington, being the Capital of the Nation, is free from strikes and conditions that exist in manufacturing cities. I will make investments on first mortgages, secured on real estate, interest at 6 per cent. We will also purchase for you improved property that will pay between 6 and 7 per cent., after paying taxes and insurance. Now is the time to invest from \$250 to \$100,000. For further particulars write to above address.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

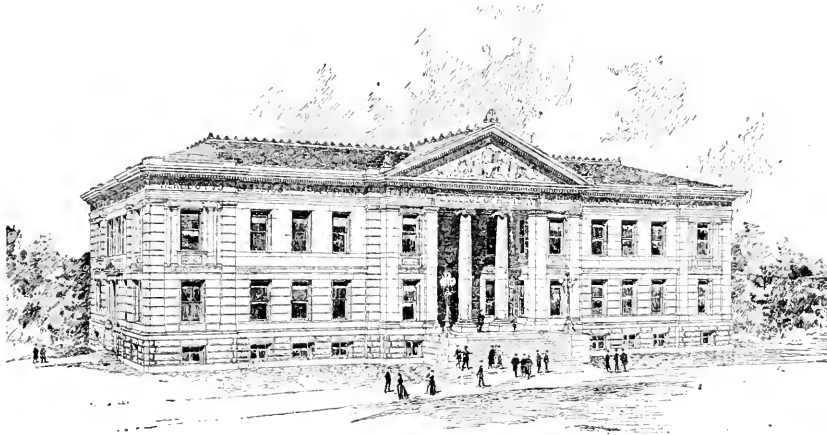

VOL. IV.

WASHINGTON, D. C., JULY, 1896.

No. 4.

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

COLLEGE OF HISTORY.

We are glad to present to our readers a view of the front elevation of the College of History. The lower story rises six feet above the ground, and is divided into a number of well-lighted rooms, already assigned to definite purposes. The second, or main story, will be occupied by a library, a museum, professors' rooms, seminaria and lecture rooms. The upper floor will contain an assembly room large enough for the entire department of history, besides a number of rooms similar to those on the main floor.

The building will be of white marble from the Columbian Quarries at Rutland, Vt. The style is the classic, of the Ionic order. The foundation story will be of rock-faced marble, while all the rest of the walls, pilasters, pillars, frieze, etc., will be tool dressed. The entrance hall and corridors of the main floor are to be tiled and wainscoted with marble, and the first flights of stairs are to have marble steps. The outer steps and the base course around the building are to be of Woodstock granite.

The contract has been let to Mr. James L. Parsons, of Washington, D. C., a builder of fine reputation.

The excavations are now complete, the concrete footings are in place, and the foundation walls begun. The contract price for the building complete is \$158,600. This is a little above the figure fixed by the Trustees, viz., \$150,000, but it is owing to some improvements in the interior work, both in material and construction, introduced after the plans were practically completed.

There will be some additional expenses also, for grading, furnishing, etc., which it will be necessary to provide for. We are sure, however, that some friends who have not yet given toward this first building will cheerfully help us to make up this deficiency before the building is completed, which will be in about eighteen months from this date.

The question is often asked whether it is the purpose to open this department of the University to students as soon as this building is completed. There has been no action by the authorities as to when educational work will be begun. It is only safe to assume that it will not be done until there are sufficient facilities and resources to organize several departments.

EDITORIAL NOTES.

A pastor in Ohio has recently published a book entitled "The Angel and The Vision." It is an exposition of Peter's vision with reference to movements of the present day. *Evangelical* says:

"The narrative is freely handled, ingeniously applied, and made to yield abundant fruit of suggestion and instruction, rather out of the ordinary course of such treatment. Considering the events of the chapter as a turning point in the history of the Apostolic Church, and believing that we are in the midst of such a crisis in the history of the American Church, and that the need of to-day is 'a loftier spiritual vision, a broader intellectual horizon, and a more intensely practical activity,' the author aims to contribute his part to the need. It is certainly a thoughtful, suggestive, stimulating book."

The author has given 100 copies of the book to The American University, and we will mail it to purchasers at \$1 each.

Dr. Daniel Wise, in sending a couple of interesting pamphlets, says, "most sincerely do I congratulate you on the advance of your great University enterprise to the first step toward the erection of its halls, and on the encouraging fact that you have secured the first of the ten million dollars needed for its full inauguration. May the great Head of the Church incline the rich to contribute freely and speedily."

Dr. Paul Haupt, head of the Semitic Department of Johns Hopkins University, started recently for Leipsic, to direct the work of a new poly-chromatic edition of the Old Testament.

The University of Calcutta, India, is said to be the largest in the world. Every year it examines over 10,000 students. Of these more than 6,000 are candidates for matriculation. This vast educational organization is destroying superstition at every session and shaping anew the secular thought of at least 15,000 of the picked young men of the province. There are ninety-nine Indian colleges affiliated with the University, which receives no public money in any shape.

American Agriculturist: A French scientist, M. Ragonneau, says he has duplicated the Hindoo trick of growing a plant from seed in thirty minutes. The Hindoos use earth from ant-hills, that is saturated with formic acid and greatly stimulates the germination of the seed. By infusing ants in boiling water, acid as strong as vinegar can be obtained. M. Ragonneau has achieved the best results and most perfect growth by using earth moistened with a solution of 5,000 parts of water to 1 of acid.

Prof. Henry M. Hartman, D. D., LL. D., widely known as a Biblical scholar and critic, who has been for twenty-five years professor of Greek and Hebrew in Dickinson College, has tendered his resignation as a member of the faculty of that institution, owing to advanced age.

Cornell University library has secured a valuable collection of works on South America, which were gathered by a former Cornell student, H. H. Smith. The collection numbers about 700 volumes and some 800 pamphlets.

Dr. Charles Wardwell Stiles, a professor in the Bureau of Animal Industry of the Department of Agriculture, Washington, has been elected a member of the French Academy of Medicine. He is only 28 years old, and the honor has never before, says the *New York Tribune*, been conferred upon so young a man.

President B. P. Raymond, of Wesleyan University, has been granted a leave of absence for next year and has already gone to Europe. He seeks a much needed rest, and will improve the opportunity to study the systems of education in England, France, and Germany.

The Japanese, in order to celebrate their recent victories, are going to erect a gigantic statue of Buddha. The height will be 120 feet. The metal will be supplied from the ordnance captured in the late war. The monument will cost about 1,000,000 yen, and is to be erected in Kioto. How much more worthy a fruitage of our Christianity is a great Christian University at our National Capital.

Mrs. M. D. Wightman, widow of the late Bishop Wightman, of the Methodist Episcopal Church, South, has given to The American University an interesting letter from John Wesley, to Rev. William Hammett, dated March 31, 1790. It was written at Macclesfield, within a year of Wesley's death. There are some characteristic Wesleyan touches in it. He corrects an error about the Methodists in Antigua, urges the introduction of "the whole Methodist Discipline," decries "slouched hats," and being singular for singularity's sake.

Johns Hopkins University has been going through a crisis in the depreciation of B. & O. stocks, and the stopping of dividends thereon. It looked for a few days as if the institution might also lose its able president. But Baltimore has waked up and is providing the means for the continuance of the work of the university, and given Dr. Gilman such assurances of support that he has declined a tempting offer to leave.

ASBURY MEMORIAL HALL.

ANOTHER BEQUEST.

As there were no Conferences meeting during May or June, there have not been so many subscriptions made, but two of especial interest are to be noticed. The Rev. John W. Butler, D. D., of Mexico, adds his name to the list for \$100. This represents another mission field in addition to Italy, South America, China, and Africa.

Mrs. M. D. Wightman, President of the Woman's Board of Foreign Missions of the Methodist Episcopal Church, South, gives \$100 in the name of the beloved Bishop Wightman, and writes: "We assure you of our joy that this magnificent ideal is crystallizing into a beautiful reality. We would be glad to identify the spot where the College for Scientific Temperance Instruction will rear its pure front; we covet to stand where the College for Missionaries is to be builded, and from that mount of vision behold the trained and well-equipped army issuing thence to the peaceful conquest of the world.

The Hon. Willard Ives, of Watertown, N. Y., has been known for years as a man whose life was largely devoted to deeds of generosity and practical helpfulness. His interest in education has been especially manifest in the help he has given to the "Ives Seminary," to which he leaves \$30,000 with a condition that it shall be securely invested, and if the Seminary should ever pass from Conference control, the said amount shall go absolutely to "The American University."

Mr. Ives also leaves 5 per cent. of his estate, after provision is made for his wife, and the above \$30,000 is deducted, to The American University. The published report of the probate of the will indicates that the university will receive about \$10,000.

The Bible Society, Missionary Society, Freedman's Aid, Methodist Hospital, and Church Extension are also provided for in the will.

What a help it would be to the Church, and what a blessing to humanity, if everyone making a will, whether for a large or small amount, would do something in the same line. This is the third will probated within a year in which The American University has been remembered.

PAYMENTS.

The following amounts have been paid on the Asbury Memorial Hall subscriptions between March 12 and July 1, 1896:

\$250—G. W. Miller. \$200—Eloa Foster. A. K. Sanford. \$150—George Clarke. \$100—G. W. Brown, D. H. Carroll, W. R. Chase, A. T. Civill, J. M. Driver, J. M. Durrell, Homer Eaton, J. G. Eckman, Cyrus D. Foss, Philip Germond, E. T. Gregg, J. M. Haines, Manley S. Hard, W. V. Kelley, Edmund Lewis, Esigun McChesney, G. F. Oliver, C. H. Payne, W. T. Perrin, E. E. Shipley, George Skene, E. R. Smith, G. V. Spenser, J. S. Stone, S. Q. Wilson, J. P. Wright. \$50—S. L. Bowman, W. H. Dockham, R. H. Gilbert, J. O. Munson, W. H. Peters, L. B. Wilson, J. W. Young. \$45—William Nowkirk, G. H. McLaughlin. \$40—E. F. Hoffecker. \$35—F. D. Abrams. \$33.34—C. C. Edwards *et al.*, H. T. Hayter, C. H. Richardson. \$32.33—J. A. Craig, J. Y. Dobbins, G. P. Eckman, Mrs. F. D. Gray, D. Halleron, J. H. Putts, R. Roberts, G. P. Robertson, G. W. Smith. \$32—J. W. Welch. \$30—Drew Alhuni (\$10), G. W. Carter; \$10, W. A. Layton; \$10, W. E. Schoonover; R. F. Eilsden, Hosea Hewitt, W. H. Mackey. \$25—C. L. Benseoter, W. E. Blakslap, T. H. Burch, J. W. Cain, Alexander Hamilton, Rev. and Mrs. G. W. Howe, M. A. Jacobs, W. A. Layton, Robert McCaskey, J. N. Ramsey, F. B. Riddle, C. S. Ryan, J. P. Wagner, E. L. Watson. \$20—P. S. Basconi, Alexander McAllister, J. T. Stafford. \$16.66—J. A. Cole, F. S. Cookman, J. B. Fankls, S. P. Hammond, L. C. Miller, S. Van Benschoten. \$15—A. C. Corfman, C. C. Edwards, W. T. Gilbert, O. H. Perry. \$13—C. A. Varnum. \$10—B. T. Abbott, J. Y. Bates, Osborne Bell, L. B. Bennett, G. A. Brown, J. W. Buckley, W. M. Carr, M. D. Carrel, J. R. Colley, T. J. Cross, Paul Estuice, T. S. Faus, L. Fox, A. M. Gond, C. M. Howard, J. D. Lea, N. O. Lent, G. B. Mead, G. V. Morris, W. M. Puffer, D. A. Schuyler, J. W. Simpson, Sarah Speigel, Ezra Tinker, Lenora J. Wharton (James C. Wharton.) E. A. White, J. T. Willhite, Mrs. Julia Young. \$9—B. F. Devries, L. H. Skinner. \$8.35—S. N. Eebout, A. B. Beech, M. A. Farr, Thomas Hall, John Krantz, J. F. Maschman, J. H. Martin, Mrs. H. S. Simonson, T. S. Truher. \$8—W. Meek, Riley. \$6.25—G. V. Leech. \$6—C. H. Reynolds. \$5—J. W. Adams, E. V. Armstrong, Mrs. E. A. Beach, T. P. Bell (Eliza A. Bell), J. H. Bennett, E. J. V. Booth, A. D. Cole, W. Z. Cole, R. B. Collins, A. H. Coors, Joseph Courtenay, Mrs. J. A. DeGraft, T. L. Ferguson, W. H. Ferguson, Mrs. W. H. Ferguson, H. C. Glover, G. M. Hoke, Mrs. J. T. Hddings, Charles Jones, C. S. Kenible, Frank Kirk, B. N. Lewis, A. M. Lowden, Wesley Martin, Mrs. S. A. McCowan, S. J. McCutcheon, Mrs. Jane Mitchell, A. H. Nagler, F. L. Niles, C. J. Price, Louis Robinson, E. L. Sinclair, Scott Ward, T. L. Wilson, E. H. Wood, R. M. Yoder. \$4—James Robinson, J. W. White. \$3.50—W. J. Douglass. \$3.35—Julva Butler. \$3.34—J. C. Beach, I. Wilson. \$3.33—F. Bloom, C. F. Hull, E. Meacham, G. L. Mount, T. D. Price. \$2—Amanda J. Bennett, J. L. Mount.

NOTICE.

The following action was taken by the Executive Committee of the Trustees of The American University, on the date mentioned, with the request that it be published in all the Church papers:

A Caution—To Whom it May Concern.

"It having been brought to the attention of the Trustees of the American University, that certain persons owning or controlling ground situated contiguous to or in the vicinity of the grounds belonging to the said university, have subdivided the same and are offering it for sale, using in connection therewith, and apparently for the purpose of promoting said sales, the name of the American University, the Trustees of said university consider it their duty to advise the public that it has not now, and never has had, any land for sale; that it has not now, nor ever has had, any interest in any subdivision or land offered for sale in the District of Columbia; that the use of its name in such connection is without its authority or consent, and until recently, was without its knowledge; that no person or persons have any right or privilege to use its name in such connection, and if used at all, it is used to promote private interests of the persons owning or interested in the land, and not for the benefit of the university in any manner.

"This public announcement is due to the University, as well as the community at large.

"JOHN F. HURST, *Chancellor.*

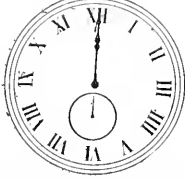

"Washington, D. C., June 9th, 1896."

"THE TWELVE O'CLOCKS."

A card of the following form, issued by Bishop Hurst is awakening much interest. A noble band of women is already enrolled, and at each noontide their prayers are heard. One of them suggested the passage of Scripture at the head of the card, as a precedent for their earnest pleadings at a throne of grace. Bishop Hurst would be pleased to receive applications for this card from those who will join in this prayer at the noon hour.

"The Twelve O'Clocks."

"At noon will I pray and cry aloud;
and he shall hear my voice."—*Psalms, v: 17.*

"More things are wrought by prayer
Than this world dreams of."—*Tennyson.*

Who are they?

A CIRCLE OF WOMEN.

What do they do?

PRAY.

For what do they pray?

THE AMERICAN UNIVERSITY
AT WASHINGTON, D. C.

When do they pray?

EVERY DAY AT 12 O'CLOCK.

What are the terms of membership?

A SIMPLE PROMISE TO PRAY
AT THE NOON HOUR.

To whom shall application
for membership be sent?

TO BISHOP JOHN F. HURST,
1701 MASSACHUSETTS AVE.,
WASHINGTON, D. C.

"O woman, great is thy faith: be it unto thee even
as thou wilt."—*Math., xv: 28.*

An exchange credits Miss Helen Gladstone with having called attention to the fact that no fewer than six Cambridge colleges were founded by women for men—Clare, by Elizabeth de Burgh, Countess of Clare; Pembroke, by Marie de St. Paul, Countess of Pembroke; Queen's, by Queen Margaret of Anjou; Christ's and St. John's, by Lady Margaret, Countess of Richmond, who also founded a divinity professorship; and Sidney Sussex, by Lady Frances Sidney, Countess of Sussex.

Many noble ladies have already given largely to American colleges, and there are indications that still more liberal benefactions will be given by women as they come to hold more property and share equally in the benefits of the higher institutions of learning.

BOOKS.

The Rev. John W. Butler, D. D., Presiding Elder in the Mexico Conference, has presented a rare and interesting volume to the library of The American University through Bishop Hurst. It is bound in vellum, is well printed in fine type, on excellent paper, and is in a good state of preservation, though dated 1775. It is the second edition of "The Constitution of the Royal and Pontifical University of Mexico," and is dedicated to Don Carlos III. Such gifts are highly appreciated by the Bishop and all friends of the University.

Rev. Dr. Ridgway, of the Baltimore Conference, has presented to The American University a volume entitled, "Eight Discourses by Rev. Spencer Cowper, D. D." They were preached in the Cathedral at Durham, and published in 1773. The chief interest in the volume is the fact that it has the autograph of the poet, William Cowper, on the inside of the front back. The author is understood to have been a nephew of the poet.

The Rev. S. W. Sears, of the Central Pennsylvania Conference, died at Frankford, Pa., June 10, 1896. He was a man of studious habits, and gifted in homiletic analysis. At his request his family has sent about 170 volumes, together with unbound magazines and pamphlets, to the Library of the University.

The Rev. Zenas Hurd, a member of the Genesee Conference, and for a time Principal of Genesee Seminary, died April 11, 1896. He was scholarly, earnest, tender, courageous, and had a spiritual vision like that of a seer. At his request his son and wife selected 28 volumes for The American University.

We sincerely thank the donors, and commend their example to other friends who can in this way help the University. A description will be found under Book Notices.

GENERAL CONFERENCE GAVEL BLOCK.

An artistic souvenir of the General Conference of 1892 is the Gavel Block presented by Mr. L. D. Jones, of Lincoln, Nebr. It is about a foot in diameter and two inches thick. The top of the block is formed of 108 different specimens of wood of different colors, collected from as many historic places. It has a curved rim made of 24 pieces of different kinds of wood, contributed by 24 Methodist institutions of learning. The base is a solid piece of white holly representing The American University.

Rev. John Watson (Ian Maclaren), the author of "Beside the Bonnie Brier Bush," will deliver the Yale lectures on "Preaching," in September next.

Joseph Pulitzer has offered ten scholarships of \$250 each to male graduates of the grammar schools of New York to enable them to pursue college courses.

TELESCOPE GLASS.

The fact that the Yerkes telescope is now approaching completion is awakening renewed interest as to what the results may be when its immense eye is opened on the heavens. It is said that its highest power will bring the moon, optically, to within just about sixty miles of the observer's eye. A lunar object as large as the Capitol at Washington will be distinctly visible.

The great telescope of the Berlin Exhibition is also attracting attention. When completed, it will have two objectives—one of 43 inches aperture and about 20 feet focus, the other 28 inches aperture and 68 feet focus—in one mounting. It will have no dome, but will be curiously mounted in an immense cylinder, supported only at the inner end.

All this advance in telescopes adds additional interest to the attempt of Dr. John Peate to grind for The American University the largest glass mirror ever made for a telescope. The work is reported to be progressing favorably. The glass itself is thought to be good, the grinding having proceeded far enough to test its quality somewhat. Month by month Dr. Peate is working, now grinding, now testing, the great mass, of a ton's weight, ever coming nearer to the form it must assume. It will yet be months before the work approaches completion.

BISHOPS' ADDRESS ON THE AMERICAN UNIVERSITY.

The most notable utterance at the General Conference of the Methodist Episcopal Church was the address of the Bishops, read by Bishop Warren. It was an able document, of fine literary style, and had in it an enthusiastic ring and swing characteristic of the author. It indorses the University as follows:

"The American University, located at Washington, D. C., came before the Church four years ago, as an applicant for its indorsement in the proposed work of furnishing post graduate and professional instruction. The General Conference of 1892 indorsed the proposition, approved the Board of Trustees, and commended the proposed university to the favor of the Church. The officers of the institution report in assets \$1,040,000, consisting of real estate, reliable subscriptions, and funds in bank. In view of the opening of the immense scientific collections, by act of Congress, to all students for special investigation, and in view of the growing popular appreciation of the necessity of a central Protestant university in the National Capital, we heartily commend to the prayers, the sympathies, and the generous gifts of our people, The American University, which, by its charter and its pledges, is at once emphatically American and Christian."

METHODIST EDUCATIONAL SYSTEM.

Rev. C. H. Payne, D. D., Secretary of the Board of Education of the Methodist Episcopal Church, in the *Daily Advocate* of May 4, called attention to the fact that this denomination has what other denominations are seeking after, viz., an educational system that includes all its schools. In speaking of what institution the system includes, he says: "The system contemplates elementary schools in our foreign mission work and in the more needy districts of the home field;

a first class academy or seminary in every annual Conference where such a school can be well sustained; a well-endowed and generously supported college for a group of conferences, sufficiently large to give it thorough equipment and adequate support; a few, and only a few, genuine universities for professional studies, wisely located at proper distances apart; a limited number of theological schools, not as substitutes for the academy and the college, but doing work strictly supplementary to these institutions. Added to the above it is also hoped that The American University at Washington will be splendidly endowed to carry forward for the whole country educational work of a character not now done in any other of our institutions, but largely done in foreign lands."

GRADUATE WORK ABROAD.

To those who believe that Americans ought to be educated in America, and especially to those who feel that America ought to be an equal competitor with any nation on earth in facilities for the highest training of specialists, and in opportunities for the most thorough original investigation, it is interesting to note, at least, the general movements with reference to granting Americans facilities for graduate work abroad.

Heretofore, the opportunity for this has been limited chiefly to Germany. It is estimated that 1,000 Americans have been abroad for study the past year. This fact is stirring up Oxford and Paris. Heretofore they have not recognized American degrees as a basis for higher degrees. Oxford now admits men as candidates for the degrees of Bachelor of Letters and Bachelor of Science. We understand these degrees are established to encourage research in Oxford by men already trained and even advanced in specialization. They correspond closely to graduate degrees elsewhere. To these degrees men not holding an Oxford B. A. are admitted. This was in part for the benefit of Americans, and will doubtless result in many going there. It shows how England is awaking to the demand for larger graduate facilities on this side of the sea.

The conservative University of Paris is also astray over the same question, and before long French and English institutions will be as open to American graduates with their degrees as they are now to the graduates of their native schools. Shall America lag behind in this highest educational work of the world?

A PLEASANT DESCRIPTION.

Rev. Lucien Clark, D. D., editor of the *Daily Christian Advocate*, published during the General Conference, in describing the Bishops of the Methodist Episcopal Church, wrote of the Chancellor of The American University: "Bishop John F. Hurst is a native of Maryland. He is 62 years of age, but his personal appearance would indicate that he is much younger. He is a thorough scholar, and a zealous advocate of Christian education. Having studied and taught in Germany when a young man, filled the chair of historical theology, and afterwards of president of Drew Theological Seminary, no one could be better qualified to lead Methodism in projecting and establishing a great university at the Capital of the Nation. This enterprise has received from him much labor and thought during the last five years."

CATHOLIC BISHOPS ON THE MANITOBA SCHOOL QUESTION.

The long expected *Mandement* of the Superior Roman Catholic clergy of the province of Quebec has appeared. It is action like this that arouses opposition and criticism of Romanism even in the United States. It is not opposition to the religious work, nor especially to the educational work of that Church. The opposition is either because of actual interference in political matters, or the fear that that Church will do in the United States what it does do in other countries. It may be well to notice the language of these high officials of the province of Quebec:

"Please remark, our dearly beloved brethren, that a Catholic is not permitted, let him be journalist, elector, candidate, or member, to have two lines of conduct in a religious point of view, one for private life and one for public life, and to trample under his feet in the exercise of duties not social the obligat ons imposed on him by his title of a submitted son of the Church. Therefore, all Catholics should only vote for candidates who will formally and solemnly engage themselves to vote in Parliament in favor of the legislation giving to the Catholics of Manitoba the school laws that were recognized to them by the privy council of England. This grave duty imposes itself on all good Catholics, and you would not be justifiable, neither before your spiritual guides nor before God himself, to set aside this obligation."

The above sentences are reported by *The Week* of Toronto as the exact words of the document. They not only dictate how Catholics shall vote on a question of vital interest to all Americans, but they lay down a principle that controls all *submitted sons of the Church* in every relation in life.

EDUCATION.

The following words from the Bishops' Address to the General Conference ought to be pondered and heeded by the whole Church:

"God sees no perfect individual nor perfect service of him that does not include both mind and heart. He does not want his Church nor his Heaven an asylum for feeble-minded children.

"Among the greatest victories in the Methodist Episcopal Church have been those achieved in the field of education. Insisting on a gospel that teaches a loftiness of ideal for man which has elsewhere found no higher expressions, and intimately relating the attainment of those ideals to human endeavor, the Church was logically compelled to give every one of its members the best possible means of development. Hence it has founded schools by the hundred, sometimes more than could be maintained, just as God's overflowing exuberance of life makes a thousand seeds for every one that grows.

"No one of these schools has ever lived in vain. We owe very much of our present greatness to our oldest university, founded by Wilbur Fiske.

"In this connection we would express our distinct approval of the work of the University Senate.

"Our system requiring that a sermon be preached on education every year, and a collection taken in both church and Sunday school for the aid of schools and students, makes it possible that every determined person who exercises his free will in that direction may acquire a liberal education.

"But for the proper and needed development of our schools we need at least \$1,000,000 in gifts every year."

A UNIVERSITY OF THE UNITED STATES.

SAMUEL L. BEILER, PH. D.

Many inquiries have been made concerning the proposal that Congress should authorize the organization of a university under the above name to be supported and controlled by the General Government. Some friends have confused it with The American University, while others have feared it might interfere with the latter. It may be well to give the facts concerning the matter a wider circulation.

The movement for such a university is no new thing. It is as old as the Government. There was great need of it in George Washington's time, especially during the first twenty-five years of the nation's history. The few existing colleges were weak, the people were in comparative poverty, and the few who had wealth were sending their sons abroad to be cultured in monarchial ideas. Washington wanted Americans educated in America.

A few men have favored a Government university in all the years since. It only takes a few to keep an idea alive. It has been agitated in Congress during many sessions, but never made much progress. After the war, when men saw how the Government could organize and carry out great movements, some began to think the Government ought to do everything. Grant and Hayes were induced to recommend a national university in messages to Congress. The House Committee reported in favor of a bill to create such a university in 1872, and a Select Senate Committee reported in favor of it in 1893.

Several bills were introduced early in the present Congress, suggesting widely different plans for such an institution. They were referred to appropriate committees, which gave a few public hearings, chiefly to the friends of the enterprise. No effort was spared to secure the presence of well-known educators to speak to the committees in favor of such a university. So far as known, no one wholly engaged in college or university work has appeared in favor of the project. Letters of endorsement were secured chiefly from those connected with State institutions.

In the House the bills were referred to a subcommittee of the Committee on Education. A majority was not favorable to them. The subcommittee was enlarged to make it favorable. The chairman is reported to have said, "there is so much opposition to the measure that it is not worth while to prepare a report." No report was made up to the time the House adjourned.

In the Senate a special committee of nine was raised on the University of the United States. The chairmanship was given the Populists, in the person of Senator Kyle. It was the only chance for a Populist to do anything. The Senator himself offered a bill, and it was referred to his committee. It looked a little as if it might be favorably reported. But some Senators looked into the measure, found that the Presidents of Harvard, Boston, Yale, Columbia, University of Pennsylvania, and other strong institutions, were opposed to the scheme, while others had refused to give their names in its support.

Good and sufficient reasons were found for opposition, so that while five Senators signed a report in favor of

a bill to establish such a university, four signed a report against it. When the bill was called up for passage there was objection, and it was sent to the foot of the calendar, where it sleeps during the recess. Senator Hoar says that it is not as likely to pass now as it was twenty years ago.

The movement has only had life enough to develop strong opposition, and bring into definiteness the reasons why it ought not to be. Some of these may only be stated, not developed, in a brief article.

There are many governmental reasons against it. The theory that it is the duty of the Government to create a great university is a corollary of monarchial government based on divine right, and hence, duties. In such governments State and Church are combined. In our Government it is not so. Government is of the people, and is only to do what private enterprise can not do, and what is delegated to it to do. The right to establish a university is not expressly delegated, and hence the constitutional right to do this has been denied. There was a movement in the constitutional convention to insert a clause giving the right, showing that some thought such a clause was necessary. Jefferson, in his sixth annual message, said a constitutional amendment would be necessary. A Congressional Committee reported, in 1811, that it would be unconstitutional for the General Government to found a university. It is a grave question whether it would be right morally to take by force the money of all to give such special advantages to the few. The establishment of a national university would increase the strong tendency to centralization, add largely to the number of Government appointees, and strengthen the current that has set in toward paternalism. It would cultivate a dependence on Government that will undermine that characteristic self-reliance so essential to the true spirit of freedom, and give us a large class of educated men who would look to the Government for employment. It would create a perpetual lobby at the seat of Government which would forever cry, "give," "give." The money must come, by millions, from additional taxation, sale of bonds, or devotion of public lands. Certainly the people will not favor the former, and no wise financier would recommend the sale of more bonds at present. It has been the settled policy of the General Government to devote the public lands to educational purposes in and through the States, so that the benefits may be within reach of all the people. The reversal of this policy, and the selling of lands in the new States to build up a great university for comparatively few at the National Capital would not meet with favor. Governmental control of universities where government is by parties has not been a success save in a few isolated cases. An ex-president of one of the most successful has said: "It has been injured by unwise legislation far more than it has been augmented by direct appropriation."

There are many educational reasons against it. It would not supplement existing institutions, but as the proposed bill shows, be a direct competitor in work for students and for gifts, in fields left to private enterprise for a hundred years, and in which millions have already been invested. The munificent gifts of recent years for university purposes show that this work will be well cared for if the Government will let it alone. If the Government takes up the work, it will stop the flow of

benevolence that is now building up great universities at strategic points throughout the country. Such a governmental institution would be a disintegrating force and cause of contention. Its natural tendency to domination would be to the injury of other institutions. It would not lead the world in research and investigation. That has always been the province of private enterprise and not of governmental conservatism.

It was proposed in the bill reported that in the University of the United States, "neither sectarian nor partisan preference shall be allowed in any form." That looked simple at first, but how could it be carried out? Are there real patriots in this country who actually have no partisan preferences? Are there really live Christians in this land of free churches who have no sectarian preferences? Or shall all patriotism and religion be excluded, and all topics that may have a political or religious implication be tabooed? Shall the great question of constitutional interpretation be excluded? Shall there be no discussion of the relation of this Government to other governments on which the President and certain professors recently differed? Shall economics be omitted, and there be no reference to free trade or tariff, gold standard or bimetalism? Shall political history be excluded and theories of government be shut out of a Government institution? Certainly there could not be a theological faculty, and how could philosophy be taught without discussing theism, atheism, pantheism, or agnosticism with some preferences? How could history be taught dealing with religious wars, or the Reformation, so as to please both Catholics and Protestants? Would psychology be complete without anything about the religious nature of man? Can ethics be taught, and a sufficient basis be found for right and wrong, and God be left out, as well as the questions of divine sovereignty and human freedom? How could science be taught without theistic or agnostic implications? Shall biology discuss the origin of life without a creator? Shall a materialistic evolution be taught, or a theory of evolution in harmony with the highest principles of theistic philosophy? So might the questions go on indefinitely; and could the remnant left, after all these omissions, be a university representative of a great Christian nation?

Patriotism should rise above party when need be, but in a country governed by parties, it will have partisan preferences or be as pale and sentimental as moonshine. Religion should be broader than denominationalism, but in a land of free churches, it will have sectarian preferences or be as dangerous as rationalism and damning as agnosticism. Education without character is a curse. There is no true basis for morals but in belief in and reverence for deity. In this country, where there is no State Church, this religious faith and reverence is only maintained where there is denominational activity and influence. If this is to be excluded from a national university it would be non-religious, non-believing, non-moral, agnostic, infidel. This was found to be the desire of some of its promoters. It was their intention to set the State against the Church, the secular power against the religious. Surely the American people are not ready for this. Many Christian men were not in the Senate and House, and we pray the time may be long ere such a university shall be organized.

A visionary hobbyist and persistent lobbyist is now

pushing this scheme for a livelihood. Much of its life is due to his efforts and to a visionary sentimentalism that it would be a glorious thing for the Government to do. But practical men of common sense see otherwise. The rapidly developing universities will soon meet all the needs of America on the recognized principle that the highest education shall be left to voluntary support and freedom from Government control. The American University proposes to do all that the Government is asked to do here at the Nation's Capital, and will do it at less expense to the people of this great nation, and in a way far more economical to the students who may wish to come here for original research and for training as specialists.

—*The Christian Advocate.*

GIFTS AND BEQUESTS.

M. C. D. Borden, of New York, has given \$15,000 to the Home for Aged People at Fall River, Mass.

Mr. C. H. Hackley has given an additional \$25,000 to finish the Hackley Manual Training School at Muskegon, Mich.

The Baroness de Hirsch, widow of the recently deceased Hebrew philanthropist, has presented \$20,000 for distribution among the poor of Paris.

Mr. A. C. Boudurant has given ten acres of choice land near Boudurant, Iowa, to the Woman's Christian Temperance Union of Iowa as a site for an industrial home for girls.

Vassar College has the promise of a gift of \$100,000 from John D. Rockefeller, to apply on the erection of a new dormitory or a recreation hall.

William Deering, of Chicago, has given \$215,000 to the Northwestern University at Evanston, Ill.

Mrs. Stanford has at last been able to pay over to the Stanford University the \$2,500,000 left it by her husband.

May 6 Mr. Cyrus McCormick formally presented the new Virginia library to McCornick Theological Seminary of Chicago. The building is modelled from the Erechtemm at Athens.

Miss Lydia Bradley of Peoria, Ill., will erect a polytechnic institute to cost, with endowments and appurtenances, \$1,000,000.

An unknown friend has offered to donate to Princeton University a new library building, to cost between \$300,000 and \$500,000.

Pomona College of the Congregational Church has recently received a gift of \$25,000 from C. H. Baldwin of Dayton, Ohio, as a memorial fund for his daughter, Mary E. Cook, late wife of Professor A. J. Cook of the college.

Eight hundred thousand francs (\$160,000) have been given to the Paris Academy of Medicine by a Mme. Andrieff, the income to be paid yearly to the man who discovers a specific remedy for consumption, whether a Frenchman or a foreigner.

Oswald Ottendorfer, editor of the "Staats-Zeitung," New York, who has just celebrated his seventieth birthday, is held in high esteem both in this country and his native town, Zwittau, Moravia, for the generous use he has made of his large wealth. He has contributed liberally to benevolent objects, one of his gifts being \$300,000 to build and endow an educational institution in Zwittau. In New York he founded the Isabella Heimath, at a cost of \$1,000,000, and established the Ottendorfer Free Library, in the same city, at a cost of \$50,000, which has been augmented by annual gifts.

Baron de Hirsch was a generous contributor to every sort of worthy charity. He was a great patron of the public schools, and many institutions in Egypt, Turkey, and Asia Minor bear his name as their benefactor. In 1835 he offered the Russian government \$2,000,000 for public instruction, if no distinction should be made as to the race or religion of the pupil! The offer was declined.

The late John W. Miller, whose will was recently filed at New York, leaves to the Ottilie Orphan Asylum, New town, Long Island, the sum of \$50,000; to the Evangelical Reformed Church, \$25,000, and a trust fund of \$23,000, the income of which is to be applied to the paying of the salary of the minister of the said Church. At the death of his wife he gives to the Five Points House of Industry \$5,000, to the Wetmore Home \$5,000, and to the German Evangelical Synod and Missionary Society, St. Louis, \$10,000.

Martin Brimmer, who died recently at Boston, left \$50,000, to Harvard University, to become available upon the death of his wife.

Mrs. Elizabeth Mary Ludlow has given to Columbia University about \$150,000, the estate of the late Robert Center, her son, to found a chair of music in the university.

Barnard College has just received a gift of \$100,000 from Mrs. Van Wyck Brinckerhoff of New York.

The Philadelphia Academy of Fine Arts will receive \$300,000 from the estate of the late Mrs. Mary Gibson, widow of Henry C. Gibson.

A gift of \$100,000 by an anonymous giver will enable Harvard University to establish the first professorship of comparative pathology—the study of disease—in America.

Alfred C. Harrison and Thomas McKean, both of Philadelphia, have given \$100,000 each to the University of Pennsylvania; and Dr J. William White has promised to secure \$20,000 for the Agnew Memorial Hospital in connection with the same institution.

Rev. Dr. Sheldon Jackson, the Alaskan missionary, has given \$50,000 to the University of Utah.

The bequest of \$200,000 from the Thomas Sloan estate to Yale University will be devoted to the library fund.

Dr. D. K. Pearson, of Chicago, has promised \$50,000 to Mt. Holyoke College, Massachusetts, on condition that its friends raise \$150,000 in addition. Other offers akin to this by Dr. Pearson have added large sums to institutions in need of funds. He is one of the rich men in the land who know the joy of giving.

Ignace J. Paderewski, the great pianist, just before sailing from New York for Europe, handed a letter, in which was enclosed a check for \$10,000, to William Steinyay, asking him to act with two other men as trustees of the money, which is intended as a fund from which the trustees will pay prizes for musical compositions to encourage musical work in this country.

The charitable bequests of the will of Leonard Friedman, which has been filed at New York, are as follows: Home for Aged and Infirm Hebrews, \$2,500; Hebrew Sheltering Orphan Asylum, \$2,500; Montefiore Home for Chronic Invalids, \$1,500; Mount Sinai Hospital, \$2,500; Hebrew Sheltering Guardian Orphan Asylum, \$1,000, and Hebrew Children's Society, \$1,000.

Mr. and Mrs. Carl Storekel, of Norfolk, Conn., who recently visited the industrial school at Tuskegee, Ala., have made a gift of a plot of 600 acres of land near the school to Booker Washington and the other trustees, to be held for the institution. The conditions of the gift are that the land is to be sold in plots to deserving pupils of the school at low rates for home lots or small farms.

Bishop Haygood's memory is to be commemorated in a chair of history in Emory College, Oxford, Ga.

J. W. Hendrie has given \$10,000 for the building fund of the Yale Law School in addition to \$15,000 previously given.

William Matthews, who died recently at Brooklyn, N. Y., bequeathed \$500 to the London Orphan Asylum, and \$1,000 to the Orphan Home of the Church Charity Foundation in Brooklyn.

By the gift of the late Wesley Chambers, of Oil City, Pa., supplemented by a gift from his widow, the Erie Conference gets \$20,000 to add to its permanent fund for supernannates. This munificent gift is to be known as the Chambers Memorial Fund.

Ephraim Howe, who died recently at New York, left \$40,000 to Tufts College for the erection of a new building near the present ones, to be known as the Howe Memorial Building, \$5,000 to the Chapin Home for the Aged and Infirm, in New York, \$1,000 to the St. Lawrence University, of Canton, N. Y., and \$10,000 to the Clinton Liberal Institute at Fort Plain.

Book Notices.

[The Editor will be glad to give brief notices of such books as are appropriate to the COURIER. Copies of volumes sent for notice will be placed in the University Library.]

CONSTITUCIONES DE LA REAL Y PONTIFICIAL UNIVERSIDAD DE MEXICO, segunda edicion, Dedicada al Rey Nuestro Señor Don Carlos, III. 1775.

This interesting volume, in very clear type on good paper, bound in vellum, was presented to the University by Dr. John W. Butler, of Mexico.

EIGHT DISCOURSES by Rev. Spencer Cowper, D. D. W. Brown, London, 1775.

This volume is of interest because of the autograph of the author's uncle, the poet, William Cowper, contained in the book, and shows that it was once a part of the poet's library.

COMMENTARIES ON THE CONSTITUTION OF THE UNITED STATES. Vol. I., by Roger Foster, of the New York Bar. Boston Book Co., 1895.

This work shows great learning and much familiarity with the literature pertaining to the Constitution. Its discussions are clear, and its full references to all the writings of Morris, Adams, Madison, Washington, Marshall, Hamilton, historians, and later students of the Constitution will make this a valuable work to all students of that remarkable document.

THE PRINCIPLES OF LOGIC, by A. Schuyler, LL. D. American Book Co., New York, 1869.

READINGS FROM THE BIBLE. Selected for Schools. Edited by W. J. Onaban, J. H. Barrows, C. C. Bonney, 1896.

THE AMERICAN EPIC, by Drummond Welburn, printed for the author by Barber and Smith, Nashville, 1895.

IT MIGHT BE, by H. E. Swan, Stafford. Kansas, 1896.

A story of the future progress of the sciences.

A CHRISTIAN LIBRARY, consisting of extracts from and abridgements of the choicest pieces of Practical Divinity which have been published in the English Tongue. Thirty volumes, by John Wesley, M. A., Late Fellow of Lincoln College, Oxford. London, 1820.

The following twenty-eight volumes were presented to the University, from the Library of Rev. Zenas Hurd, by Geo. W. Hurd and wife:

WESLEY'S SERMONS, volume II. Lane & Scott, New York, 1851.

WESLEY'S WORKS, volumes III, IV, V, and VII. Lane & Scott, New York, 1850.

WATSON'S INSTITUTES. Two volumes. Lane & Tippet, New York, 1845.

WRITINGS OF ARMINIUS. Three volumes. Derby, Miller & Orton, 1853.

BIBLICAL RESEARCH IN PALESTINE AND Mt. Sinai, by Robinson. Three volumes. Crocker & Brewster, Boston, 1841.

NEANDER'S HISTORY OF THE CHRISTIAN CHURCH. Four volumes Crocker & Brewster, Boston, 1851.

HISTORY OF SPANISH LITERATURE. Three volumes, by George Ticknor. Harpers, New York, 1819.

HILDRETH'S HISTORY OF THE UNITED STATES. Six volumes. Harper's, New York, 1849.

BURTON'S ANATOMY OF MELANCHOLY. Wiley & Putnam, New York, 1847.

SYSTEM OF ANCIENT AND MIDDLEVAL GEOGRAPHY, by Charles Anthon. Harper's, New York, 1850.

The following were sent by his family from the library of the late Rev. C. W. Sears, of the Central Pennsylvania Conference:

THE METHODIST QUARTERLY REVIEW, twenty-two bound volumes, from 1856 to 1878. Four unbound volumes, from 1879 to 1883.

BIBLIOTHECA SACRA, eight bound volumes, XIX to XXVI.

LANE'S COMMENTARY, twelve volumes. Scribner's, 1868.

LIFE AND LETTERS, SERMONS, LECTURES AND ADDRESSES, by Rev. F. W. Robertson. Seven volumes. Ticknor & Fields, Boston, 1868.

NEANDER'S HISTORY OF THE CHRISTIAN CHURCH. Five volumes. Crocker & Brewster, Boston, 1854.

HISTORY OF THE PRESBYTERIAN CHURCH, by E. H. Gillett. Two volumes. Presbyterian Publishing Committee, Philadelphia, 1864.

HISTORY OF METHODISM, by Abel Stevens. Three volumes. Carlton & Porter, New York, 1858.

HISTORY OF THE METHODIST EPISCOPAL CHURCH, by Abel Stevens. Two volumes. Carlton & Porter, New York, 1865.

HAGENBACH'S HISTORY OF DOCTRINES. Two volumes. Sheldon & Co., New York, 1864.

EARLY YEARS OF CHRISTIANITY, by Pressense. Nelson & Phillips, New York, 1878.

NEANDER'S HISTORY OF THE PLANTING OF THE CHRISTIAN CHURCH. Volume I. Bohn's Standard Library.

HISTORY OF THE APOSTOLIC CHURCH, by Philip Schaff, D. D. Scribner's, New York, 1864.

EPITOME HISTORICÆ SACRÆ. Thomas, Copertbwaite & Co., Philadelphia, 1847.

NEANDER'S LIFE OF CHRIST. Harper's, New York, 1856.

THE SEVENTH CENSUS OF THE UNITED STATES. Vital statistics of New York and Brooklyn, 1890.

THE PREACHER. Volumes III, IV, V, and VI, bound.

SOUTH'S SERMONS. Four volumes. Sorin & Ball, Philadelphia, 1845.

HALL'S WORKS. Four volumes. Harper's, New York, 1854.

WESLEY'S SERMONS. Two volumes. Waugh & Mason, New York, 1834.

THE HOMILETIC MONTHLY AND REVIEW. Volumes VII, VIII, XVII, XVIII, XIX, XX, XXI, XXII, XXVI, XXVII, XXVIII. Funk & Wagnalls, New York.

METROPOLITAN PULPIT. Volumes I and II bound together; 1877-8.

MELVILLE'S SERMONS. Volumes I and II. Stanford & Swords, New York, 1853.

TYPES AND EMBLEMS, by Spurgeon. Sheldon & Co., New York.

PRAYERS FROM PLYMOUTH PULPIT. Beecher. Scribner's, New York, 1867.

YALE LECTURES ON PREACHING. Beecher. Ford & Co., New York, 1873.

YALE LECTURES ON PREACHING. Third series. Beecher. Ford & Co., New York, 1874.

HELPS FOR THE PULPIT. Smith, English & Co., Philadelphia, 1864.

SPURGEON'S LECTURES TO MY STUDENTS, 1875.

THE SUPERANNUATE, by William Ryder. Carlton & Phillips, New York, 1853.

THOUGHTS ON PREACHING, by J. W. Alexander. Scribner's, New York, 1861.

MILLER ON CLERICAL MANNERS. Presbyterian Board of Publication, Philadelphia, 1852.

CLAUDE'S ESSAY. Carlton & Phillips, New York, 1853.

PREPARATION AND DELIVERY OF SERMONS, by John A. Broadus. Smith, English & Co., Philadelphia, 1872.

FAIRBAIRN'S HERMENEUTICAL MANUAL. Smith, English & Co., Philadelphia, 1859.

COMMENTARY ON GENESIS, by J. G. Murphy. Draper, Andover, 1858.

GUIDE TO THE ORACLES, by A. Nevil, D. D. Murray, Lewisburg, Pa., 1858.

LITERARY CHARACTERISTICS OF THE BIBLE, by Rev. W. Trail, A. M. Poe & Hitchcock, 1863.

NOTES ON THE MIRACLES, Trench. Appleton & Co., New York 1857.

On the Reduction of Kronecker's Modular Systems. Eine Form des Addition's Theorems für Hyperelliptische Functionen, Erster Ordnung von Harris Hancock. Annals of Mathematics. Mathematical and Astronomical Pamphlets, by T. J. J. See. The Astronomical Journal, Vol. XIV, No. 4.

Andrew Carnegie has purchased for \$25,000 a plot of ground at Duquesne, Pa., on which he will erect two handsome buildings, one a public library the other a gymnasium and natatorium. The estimated cost of the buildings is \$150,000. They will be free to the citizens of Duquesne and employes of the Carnegie Steel Company.

Donations to the University of Denver have amounted to about \$15,000 during the year, most of it being given by Methodists of New York and vicinity. The library of the late Rev. F. G. Hubbard, D. D., has been given to the Hiff School of Theology.

Proposed Buildings and Endowments of the American University.

ADMINISTRATION HALL.

This should combine Library and Chapel; or Library and Chapel might be detached, the whole forming one group. The Administration Hall should contain the general offices for the management of all Departments, and also a Senate Chamber, as an auditorium for the general assembly purposes of the University.

HALL OF SCIENCE.

For the following Departments of Study.

MATHEMATICS, CHEMISTRY, PHYSICS, BIOLOGY.

HALL OF PHILOSOPHY.

Departments.

METAPHYSICS AND HISTORY OF PHILOSOPHY, ARCHEOLOGY,
THEISM, COMPARATIVE RELIGION, PSYCHOLOGY, LOGIC AND
ETHICS, SOCIOLOGY AND ECONOMICS, CIVICS.

HALL OF LAW.

In addition to these buildings there will be needed special endowments for instruction in the various Halls classified under the general names of Professorships, Lectureships, Fellowships, and Studentships. It is preferred, unless there be special reasons to the contrary, that gifts of both Halls and Endowments should bear the names of the donors, or of such friends, living or deceased, as they may designate.

The University grounds comprise a tract of nearly ninety acres, situated on the northwest heights of Washington. This space furnishes commanding sites for all the above buildings, with such others as the future may prove to be necessary for the full development of the University. The arrangement of the grounds is under the care of Mr. Frederick Law Olmsted, who will advise with reference to the location of the Halls.

HALL OF HISTORY.

Departments.

AMERICAN, EUROPEAN (west and north), MEDITERRANEAN
ORIENTAL.

HALL OF LANGUAGES AND LITERATURE

Departments.

ORIENTAL AND SEMITIC, GREEK, LATIN, ROMANCE, GER-
MANIC, ENGLISH.

HALL OF MEDICINE.

Trustees and Officers of the American University.

John F. Waggaman,

Real Estate Investments,

700 14th Street N. W.

Washington, D. C.

I am agent for the beautiful suburban property known as Wesley Heights, situated opposite the site of the American University. This property has a great future, not only because the University is to be built opposite, but on account of its desirability as a resident part of the District of Columbia. I am also agent for lots in Morris' Addition to N. E. Washington, which presents a good field for investment for small amounts. All this property is laid out in conformity with the general plan of the city of Washington and is entitled to the city improvements. In addition, Washington, being the Capital of the Nation, is free from strikes and conditions that exist in manufacturing cities. I will make investments on first mortgages, secured on real estate, interest at 6 per cent. We will also purchase for you improved property that will pay between 6 and 7 per cent., after paying taxes and insurance. Now is the time to invest from \$250 to \$100,000. For further particulars write to above address.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

Laying of the Corner Stone.

The corner stone of the College of History was laid on Wednesday, October 21, 1896. It was a memorable occasion. The day was favorable. The attendance was large, fully 1,500 people covering the ground, building, and platform. The walls of the college had risen so far that a part of the main story was up, and showed the quality of the marble and the thoroughness of the work. Both were commended by everybody.

The floor of the corner room near the corner stone was used as a platform. The people joined heartily in the singing and responsive reading. There was a patriotic enthusiasm befitting the day and the flag that floated over all. The seven addresses were masterpieces. They were often cheered. The names of the speakers and addresses in full are given elsewhere. They will repay careful reading.

The corner stone was laid by Bishop Thomas Bowman according to the ritual of the Methodist Episcopal Church. The Grand Master of the Grand Lodge of Masons of the District of Columbia then laid the corner stone with impressive rites. The gavel used by Grand Master Baird was the one with which George Wash-

ington laid the corner stone of the Capitol. It has been used only four times since. It was stated that it was only brought out because they considered this a national occasion.

There were present many distinguished guests from the city and different parts of the country. Several universities had representatives on the platform, among them being two professors from the Catholic University of America. Letters of regret as to their absence, and congratulations on the prospects of The American University, were received from nearly all the leading universities of the United States. The press has given quite full and glowing reports.

The day was one of inspiration. Joy that a beginning was made turned into faith that there would be a rapid development, and that on some future day the cap stone of a great university will swing into place with shoutings.

Crowded Over.

To give in full the addresses at the laying of the corner stone, we have allowed much interesting matter, as well as the report of gifts to the Asbury Memorial Hall, and of books, to go over to our next number.

Consumptives' Sanitarium.

General J. Watts de Peyster has given to The American University a Sanitarium for Consumptives, located near Millbrook, Dutchess Co., N. Y. The property consists of seven acres on the top of a hill, covered with pine trees. It is 1,000 feet above the sea. On this hill is erected a building costing about \$25,000.

The Trustees accepted the gift under conditions elsewhere stated. The sanitarium is already in the possession of the Trustees and occupied for them. Arrangements are being made for its equipment and management. It is hoped that in time it may become a valuable adjunct to the Medical Department of the University. There is here an opportunity for those whose sympathies are touched by the sufferings of consumptives, 5,000 of whom die annually in New York alone, to help a noble charity by liberal gifts.

Will of De Witt C. Weeks.

The will of this well-known and highly-esteemed citizen of New York was probated on August 3, 1896. He left an estate valued at \$250,000. The homestead is given to two of his children, and the rest of the estate is left for life to his widow, Elizabeth Weeks. After the death of Mrs. Weeks, \$30,000 is to be paid to each of three children, and \$30,000 is given, in \$5,000 bequests, to different benevolent causes. The "Methodist Episcopal University, Washington, D. C.," is made the residuary legatee of all the estate left after the foregoing amounts are paid in full. Frances M. Weeks and John Oscar Ball are made executors and trustees.

This is the fourth will probated within a year in which the University is remembered, and shows how widely this noble enterprise is taking hold of the hearts of the people. Let our friends everywhere emulate the example of these benevolent souls, whose good works will continue to bless humanity. It is doubtless better to give during life, where that is possible, but if one-tenth of all estates, large and small, that are left by Christian people, were bequeathed to charitable and educational work, the treasury of many struggling institutions would be filled. Those who have no immediate heirs might well devote their entire estate to such an institution as The American University, and so bless the world by sending forth intellectual children to represent them in the Christian activities of all coming time. What a treasure to the bereaved family of Brother Weeks is the memory of the good he did and planned!

Rev. W. M. Ridgway's Gift.

In our last issue mention was made of a rare book given to the University by Rev. Wm. M. Ridgway, of the Philadelphia Conference. It is a volume of sermons by Rev. Spencer Cowper, D. D., the second son of Lord Chancellor William Cowper, and Dean of Durham. The sermons were preached in Durham Cathedral, and published in 1773. William Cowper, the poet, evidently owned this volume, and wrote his name on the inside of the cover. He was 42 years old when this volume was published. The author was a second cousin of the poet. The autograph, "Wm. Cowper," gives the volume rare interest and value, and especial credit and thanks are due Brother Ridgway for finding and giving such a volume to the library of the University.

The Stahl Antiquities.

Prof. Henry Stahl, of Parkersburg, W. Va., has arranged to give his fine collection of American Antiquities and Relics to the American University. Professor Stahl was recently offered a large price for this collection by an Englishman who wished to give it to an English institution, but the donor preferred that it should remain in America.

The *Marietta Register* speaks of it as "rare, interesting, scarcely surpassed by any similar collection," and adds, "it tells us of the ages that Blennerhassett Island has been washed by the ceaseless flow of the Ohio, for it shows that this spot, made interesting by our country's great historical romance, has been both a home and a fortress for races whose language is written in flint and bone."

Mr. C. F. Ulrich, M. A., M. D., of Wheeling, W. Va., says: "This collection of stone implements from the earliest period of prehistoric man to the end of the stone age, and of pottery reaching to the dawn of civilization, is the most remarkable it has been my good fortune to examine. It is not the quantity, for I have seen larger collections, but it is the artistic and instructive arrangement, by which it is shown how the human mind was gradually developed from the unformed primitive intellect to the highly cultured and enlightened mind of modern times."

The Rev. W. S. Winans, Jr., of Parkersburg, who has been in close consultation with Professor Stahl, concerning this gift to the American University, says: "This rare and beautiful collection is not a mere mass of material, but is so selected and arranged as to give the history and development of the human race in four volumes. Beginning with primitive man and the first article fashioned by his hand, it continues without a gap to the appearance of iron and the dawn of modern historic civilization. It is a revelation of the past. No books can take the place of these silent instructors. It is the result of a lifetime of labor, study, and devotion. When fully arranged in the College of History by Professor Stahl, this unique collection will be an invaluable possession of the University."

The Board of Trustees accepted Professor Stahl's generous gift, and sent him a resolution expressive of their appreciation and gratitude.

Trustee Meeting.

A meeting of the Board of Trustees was held on the evening of the 20th and the forenoon of the 21st of October. There were fifteen members of the Board present. Ex-Governor Pattison presided. The Chancellor, Vice-Chancellor, Treasurer, and committees reported, summing up the work done, the gifts received, and the money expended during the year. All was found to be in good condition.

After careful consideration a gift was accepted of a Hospital for Consumptives, and a committee was appointed to take charge of it, with the distinct understanding that no money given for the work of the University was to be used for this purpose, but funds needed must be otherwise provided. The members of this committee are Mr. Anderson Fowler, Mr. John E. Andrus, Mr. John S. Huyler, Dr. Charles H. Payne, Dr. James M. King, and Rev. A. M. Griffin. The latter was elected a member of the Board of Trustees.

Corner Stone Laying.

The following is a verbatim report of the proceedings at the laying of the corner stone of the College of History.

Bishop John F. Hurst, Chancellor, called the assembled audience to order, and said :

The President of the Board of Trustees, Mr. John E. Andrus, is ill ; not seriously ill, but sufficiently so to prevent his coming to the service to-day. I am asked to request that the entire audience unite in the singing of "America."

Bishop HURST (after the singing). Responsive reading will now be led by Rev. Randolph H. McKim, D. D. (Psalm xxxiii was read.)

Bishop HURST. The hymn will now be announced by the Rev. Samuel L. Beller, Ph. D.

A Prayer for Wisdom.

Written for the occasion by GEO. LANSING TAYLOR, D. D., L. H. D.

Tune: Duke Street.

1. O, WISDOM, whose creating word
The formless void primeval heard,
And ancient chaos flashed with light, —
With ordered suns and systems bright ; —
2. Speak thou in us ! Through mind and heart
Thy radiant beams all quickening dart,
Dispel our darkness, chase our gloom,
The soul's whole orb with truth illumine.
3. Through all the wanderings of our race
Still may we read God's power and grace,
Till through all History's tale shall glow
Heav'n's Kingdom founded here below.
4. Help us, with reverent search, to scan
The birth and growth of reasoning man;
His age-long climb from savage night,
Led up by Thee to moral light.
5. Help us in History's course to see
A grander future's prophecy,
Through Christ our noblest progress here
Made endless in heav'n's brighter sphere.
6. So shall our earthly studies prove
Fit themes for nobler schools above ;
There may we learn God's works and ways
And praise Him through eternal days.

Bishop HURST. Invocation will now be offered by the Rev. Stephen M. Newman, D. D., of Washington.

Prayer.

Almighty and gracious Lord ! Thou giver of all wisdom ! We come to Thy mercy-seat at this time to thank Thee for the promptings with which Thou dost stir the human heart to all elevations and aspirations of service and development. We thank Thee that Thou dost not only plant the seed which is to germinate into effort to build up Thy cause in the world, but Thou dost also protect those germs in our hearts, dost give us strength to carry them out into the world and to do that toward which thou dost impel us from day to day. We thank Thee, O Lord, for these promptings to do what we can to elevate the minds and the hearts of the world in the cause of education, that Thou comest into our souls, stirring in us the desire to see planted great institutions which shall take under their care those who are in need of having the tuition which shall lead them into the things which declare Thy name. We thank Thee for this moment, for the way in which Thou hast led Thy people to it, and we pray that in all the resolutions for the perpetuation and enjoyment of this institution under whose auspices we meet, that in the discernment of all methods and in the right preparation of all material, there may be to-day an enlargement of heart

and mind. We thank Thee for the wisdom with which it has been carried on up to the present time, and we pray that from this gathering point to-day there may come new stimulus which shall lead forward to newer and fresher efforts to carry on that which has been so well begun. Bless those upon whom the burden rests most greatly, and may Thy purpose in them be manifest, and all Thy loving-kindness to them be a shadow of cloud by day and a pillar of fire by night that they may be led in righteousness and in wisdom to do that which is becoming for them to do. Bless all of us who have heard with interest of the project which we now see here started. May Thy kingdom come through what is done here, and Thy grace be manifested throughout the world more completely because of the founding of this institution and the work which it shall do. We crave the forgiveness of our sins, and ask Thy divine guidance that we may keep close unto Thee, have the blessing of Thy Holy Spirit in every step and at every point, and magnify Thee and Thy Son, Jesus Christ, through the way in which we lay our institutions in their foundation, all our efforts in their energy, all our hopes in their brightness and joy, at Thy blessed feet. We ask, therefore, Thy favor, Thy loving-kindness upon us more than we can tell, and pray that Thou wilt attend the exercises of this time, and come to every heart with Thy great grace, and approbation, and guidance, through Jesus Christ, our blessed and risen Lord. Amen.

Bishop Hurst's Address.

This hour is one toward which our thoughts have been directed and on which our faith has been centered for more than five years of waiting and of working.

This picturesque plateau on which we assemble to-day was bought, not because there was money with which to pay for it, but because of a firm belief that not only the particular Protestant church which we represent needed this center for higher education, but because it was a Protestant need of the whole country. With no one great benefactor either to buy the land, or to erect the buildings, or to provide the endowments, our appeal has been to the great commonality of American patriots, and the still greater commonality of Christians throughout the world. The response has been more than our most ardent hopes. Our object has been to found here a university in harmony with the great demands of the century, and to furnish facilities equal to those of the foremost universities of the Old World.

We have learned already that this transcendent object appeals not only to the judgment and the sympathies of leading minds in church and state, but that generous hearts and open hands have given such proof as only sacrifice can lay upon the altar of our Lord. Prayer has ascended from many homes and gifts have come from many hands; and we are now here to lay the corner stone of the first building on these grounds already consecrated to the kingdom and service of our Heavenly Father.

History.

It is highly proper that our group of noble edifices should begin with the College of History. This science takes the first place, by the right of its high functions, in the development of a great educational scheme—a modern, a complete, and an American University.

History furnishes an outlook over the achievements of those who have preceded us in the struggle of our common human life. At the distance of an ocean's width from the animosities and complications of European politics, the American is best fitted for unraveling the tangled skein of European history. Without prejudice or partiality, he is peculiarly qualified for weighing and sifting the vexed questions of the Old World, and for solving the problems of the New. He is far enough away from the noise and the strife of foreign lands to make safe generalizations and to reach just conclusions.

History points out the best paths by which future additions to the world's treasures may be made. No science approaches it in drawing from the errors and the successes of past ages the highest wisdom and the noblest inspirations for meeting the demands which the future is sure to bring with it. It holds out the lamp of caution to the explorer in the realms of truth, guarding at once against the mistakes of the past and the tendencies which might lead to their repetition in the future.

Of all the sciences, history alone selects the good and leaves the evil behind. It forms the proper gateway to every department of human learning. So, as we come to the laying of our first corner stone, it has been our purpose to let the College of History precede all others, for history itself is the foundation of all the sciences.

The Idea of a National University.

George Washington was the first to conceive the importance of planting here at the National Capital a great university. His grounds for advocating it were based upon political considerations, namely, that the American citizen should be trained in America, in order to be saved from monarchical and other notions unfavorable to the development of citizenship in a great republic. But a century of national history has taught us that the true university needs more than that. It needs to open its doors for the development of science based upon the word of God, in harmony with the divine teachings, and in full faith in the final triumph of Christianity over all wrong, be it in hut or palace.

While this institution is under the auspices and care of one denomination there are on its Board of Trustees the representatives of six religious bodies, all of which most cordially co-operate for the achievement of its noble mission. In the accumulation of our funds for the site, for buildings, for endowments and for other purposes, probably one-fourth of the noble sum has come from members of Protestant denominations other than our own. In the management of its affairs and in the choice of its officers and professors, it is safe to say that the fundamental convictions of the great body of Protestants will be respected. But it is further safe to say that in its government and control no word of authority will be either asked or awaited from the wearer of the papal tiara in the Vatican at Rome.

Other Structures.

Other structures will be needed, and for some of them initial gifts have already been made, notably for the College of Languages, toward which \$50,000 have been contributed, and the Asbury Memorial Hall, for which the clergy have subscribed \$100,000, and in which we purpose that the College for Missionaries shall find a home, and that thousands of Christian men and women shall receive, in the languages of the countries where they are to labor, in comparative religions, and in international law, the highest equipment for carrying the Gospel most intelligently to the babbling nations of all the earth.

One of our most urgent needs, and one that will confront us at an early day, and for which, as yet, no gift has been made, is a College of Technology, in which to provide for the best and highest training in mechanical and electrical engineering and the auxiliaries to these great and growing departments of our modern life.

For the further prosecution of this work we invite the sympathies, the prayers and the gifts of all the people who feel that the time has come for the establishment in Washington, where, in response to the appeal of The American University, the General Government has thrown open to every scientific student its immeasurable treasures of literature, science, and art, of a university which shall be pervaded by a Christian atmosphere and conducted in harmony with the noblest aspirations of the American patriot and the world-wide Christian citizen.

As was once said, here in Washington, while in the midst of a great national crisis, so we say on this spot, as The American University moves forward upon its mission of universal blessing:

"On this act we invoke the considerate judgment of mankind and the blessing of Almighty God."

Bishop HENST. I take great pleasure in announcing as the next speaker Bishop Alpheus W. Wilson, D. D., of Baltimore, representing the Methodist Episcopal Church, South, and one of our Board of Trustees.

Bishop Wilson's Address.

More than a hundred years ago Methodism asserted its right to establish institutions of learning in this country, and, without at any time relinquishing its claim or vacating its place in the midst of manifold failures, it has pressed on and broadened the scope of its enterprise, until now, I may say, in some sense, the culminating point has been reached. We have come as a church to, perhaps, the critical point in the world's history—the end of the nineteenth century. May I not say we are at the critical point, geographically, of the world's history—the seat of our National Government where all our interests center, and whence radiate the influences that are going to control our people and the destinies of our land for ages to come, and where are gathered appliances and resources that are not to be found in any other spot on this continent? Indeed, I doubt very much if the equal of them in either variety or fulness can be found in any other spot on the face of the earth. There are older institutions with vast wealth in the way of appliances, of libraries, and laboratories that we have not, but taking the whole range I doubt much whether the appliances and appliances that we command here can be equaled upon the face of the earth. And Methodism has come in at this moment and at this point to take advantage

of all this outlay and gathering of resources, and to assert again in the face of the world not only its right to educate, but to educate up to the highest point of which the mind of man is capable.

We are not afraid of any of the results of education. We do not propose to be hampered in this magnificent undertaking by any apprehension or fear of what may come out of it. We have a well-grounded belief that all these works about us into which we search, and which we handle sometimes very carelessly, are the works of God, and we are not afraid to find out all that we can about any work that God has wrought. If the results are not exactly according to our minds, we are perfectly well satisfied they will be according to His, and that will be better than if they were according to ours. Sometimes there is apprehension expressed as to the result of all this range of inquiry and large research into the manifold resources and forces in this world, lest men should think themselves independent and get away from God. It does seem to me to be not simply illogical—for logic does not rule the world much—but away from all the instincts of our nature, that men should turn away from God because they find out a little more about Him; and it is a curious fact in some directions, that a little learning has become a dangerous thing. But in our time, and under the conditions of our life, it seems to me, the necessary and inevitable movement of man's mind is to get hold of something that is divine. We are getting away from mere mechanics. We quit that long ago. We have stopped dealing with mere brute forces and outside agencies, and are getting into the subtleties and refinements of powers and processes. We do not depend now upon hammering things to pieces and the bringing of masses of weight and mere brute force to bear in the accomplishment of our ends, but we string a wire and send a subtle fluid along it that no eye can see, and work results far surpassing anything that was realized in the pyramids, or anything else on the face of the earth. We have these results as the outcome of researches into nature's hidden forces. And just so far as we get away from the palpable and merely outward, we get nearer to God. I do not know what the outcome of all that is going to be. I am not concerned about it; I am satisfied that when the last result shall be reached it will be found that "power belongeth unto God," and you will not find its origin anywhere else. And the world will be compelled to see it, and we want to get as near to the root and origin of the whole thing as we can by our educational processes.

But let it be understood that we do not admit, and the Church of God never has admitted, that education, no matter how far it may reach, or what its results may be, is going to do the whole work that is necessary for our race. We have a Bible, upon which we rest as the ultimate truth, that teaches us that something more than mere polish and culture, and that sort of thing, are required; that we want a regeneration and reconstruction of our nature, and a divine force working in us to the accomplishment of that which no natural force or agency can accomplish. We hold fast to that. We are not going to give it up when we build this university; we are not going to give it up when we have piled up all the forces of education. We let men learn what they will and push their researches to the utmost verge of the universe, and when they have got beyond the last star and traced its last ray of light, we will say there is something you can not get by your telescope or by anything that belongs to your educational agencies: "You must be born again." And when we have reserved that right to the Church, we will let you go out on other lines as far as you please. You may even found your chair for higher criticism and find out through its processes everything that is possible to find out about our Bible, but that Bible is going to last longer than your university. You may search into its history and its contradictions, but when you have got to the last result the old Bible will stand out and compel you to surrender to its claims and admit its supreme right over the conscience and the heart of the world, and there it is going to stand.

So I say, educate. Methodism has always educated, and will to the end of time. There is nothing that stands so nearly synonymous with freedom of thought as Methodism. We simply lay these foundations, and put down this corner stone, and raise these walls in assertion of our indefeasible right to think as far and deeply and freely as we can about God and all His works. We will take the universe into the compass and scope of our endeavor and enterprise. And let it be understood, further, that Methodism, in this particular, represents Christianity as a whole. We are not a denomination separate and apart from all others in the matter of inquiry and research and understanding; we are simply a representative of that which is fundamental to our gospel: "Ye shall know the truth, and the truth shall make you free." It was Christ who said it, and it is true to-day for all Christ's followers and for all branches of Christ's Church, and anybody who thinks that Christianity has suppressed

freedom of thought and limited the range of discussion makes the grandest mistake. I tell you, frankly, according to my conviction after historical reading and inquiry, that but for Christianity you would have been the slaves of the most beastly ignorance and superstition down to this time. We owe all our freedom from ignorance and superstition to the Gospel. Christ started us out on this line of research. He taught us to look beyond everything we could see, into the very face of God, to hunt out hidden things, and never rest until we could grasp the meaning, if not the reason, of all things, and use them according to our behests and requirements. And Christianity still stands as the representative of this freedom and endeavor to this day. It does not propose to abate its effort or relax it along this line. You will not find the profoundest thought, and the most thorough research, and the widest range of information outside of the Christian circle. You will find it only where Christ has touched the hearts and minds of men, as it has been heretofore and will be to the end, and you can not find it anywhere else outside of the inspiring, and stimulating, and elevating touch and presence of the Son of Man. There is nothing but meagreness of endeavor, and insufficiency of appliance and inadequacy of investigation outside of Christianity. Men may sneer as much as they please about Christianity and boast of their freedom of thought, but they never would have known what freedom of thought meant unless Christ had come; it never would have been attained in any other way.

So I say, in laying the corner stone of an institution like this, we are doing a work that is especially appropriate to our Christianity, and even more so to our Methodism. It is a work that belongs to the Church of God, and you may emblazon His name and Christ's name over its doors, and upon its walls, and along all of its galleries, and you may sound them through all its classrooms and among all its lines of inquiry and research as the talisman and open sesame to every hidden thing in God's universe. There is nothing better, nothing grander, nothing stronger, than Christ and His Gospel.

And now I desire to congratulate the projectors of this enterprise upon their success. It is a wonderful thing they have done; it is a marvelous thing when you think about what is to come. Who can foretell the vast results of this undertaking? This is the culmination of a century of effort, and Methodism to-day concentrates its educational work at this point, but not to end here. It is broadening its vision as the years go on, and another century will find it reaching out into all lines, fitting itself continually for better work, and moving from this center to every part, and giving men higher and truer knowledge of God and of all things. I congratulate the projectors of this institution upon the success they have achieved thus far. Let me say to you that the Methodist Episcopal Church, to which I do not belong, with its wealth, and the Methodist Episcopal Church, South, to which I do belong, together, ought to make this the university of all the world. You have wealth and you are wasting it in trifles. Why not come and put your millions down here and make something that is worthy not merely of Methodist history but of Christian liberty and Christian endeavor, and that shall give assurance to the world that Christ is going to hold the reins in all the educational movements of the centuries.

Bishop HURST. The next speaker, like others on the program, is a member of our Board of Trustees. I take great pleasure in introducing to you Ex-Governor Robert E. Pattison, of Pennsylvania.

Ex-Governor Pattison's Address.

MR. CHAIRMAN: I fancy that I am put forward to represent the laity upon this occasion. The proportion, however, of ten to one which the clergy hold to the laity upon the program is not representative of the interest of the laity in the wonderful enterprise which is manifested by the laying of this corner stone. The occasion which calls us together is one of general felicitation. Our trustees, our patrons, and our friends are happy in the realization of their hopes and of their prayers. We have looked forward to this day. This autumnal sun, with all the beauty of the autumn foliage and autumn fields, looks not down upon a more important event in this country to-day than the laying of this corner stone. The location and the associations connected with this site ought to be an inspiration. From the hills of the Potomac, Washington gathered the inspiration of the sentiment which led him just one hundred years ago, the first week in December, 1796, in his last annual message, to recommend the establishment of a national university. So that as we assemble here to-day, the thought which inspired him to give that message to the representative body of the country is doubly inspiring. Indeed, as we look back over the past and consider the importance which education holds to popular government, too much stress and too much thought can not be given to the development of education.

Very fortunately for us, at the beginning, in the history of our Government, the founders made provision for education, not only in the primary, and in the secondary, and in the high-school education, but also in the higher academic, college, and university systems of education. The sentiment which inspired the farmers of New England to come and plant the few volumes of books at the feet of the trustees of the early Yale institution led to the establishment of that university. Mr. Harvard caught the sentiment when, with those about him, he began to make contributions, not only from his treasury, but those with him from the products of the field, and so we have to-day the great Harvard University. One institution of learning after another has succeeded, until America to-day stands equal with the Old World in her university system of education. It is true she had not the assistance of lords temporal and lords spiritual, but more than that, she had the assistance of the people. The American institutions, her universities, are purely American, and the product of the American people. There is nothing abroad in the university line to be compared with the university work in its organization as we understand it in America. The universities of Europe and of England have received the assistance of the government and of liberal contributions from time to time in their organization, but our universities have come from the people. And we stand here to-day, at the close of this century, with the sentiment stronger than ever in the direction of higher education.

Fortunate it is, let me repeat, for our country that our people are thus controlled by this high sentiment. We live under a popular form of government, a government which is just such as the people will make it, and it is not intelligently made, it can not remain firm and lasting. So that the more diffused the information and intelligence among the masses of the people, the more solid will become the institutions of government, and as we meet here in laying the corner stone of this university, we are simply strengthening the foundations of the republic. While it is true we have had a period of depression, while there has been financial disturbance, there is one thing our country is to be congratulated upon: there has been no halting in the development of a greater education. The universities of America are more crowded to-day than ever before in her history. Her academies and colleges in all their halls are more filled with students, and have more applicants knocking at their doors, than ever before. So that in our educational development we have not been depending upon those material resources which we are so glad to crowd to the front. On the contrary, I rejoice to-day that in the dark places that seem to appear upon every hand, and men seem to look up in vain for the bright and shining sun, yet amidst it all there is the hope which is given by the education and the intelligence of our people. And the Methodist denomination, born in sympathy with the masses, living in sympathy with them, never has undertaken a greater work than in laying the foundation of this university. She has simply put herself again in touch with the masses. She means in the next century to take her place with other denominations and with the people in the development of intellectuality and of intelligence amongst the masses. Let me repeat to you, the more and the greater becomes the effort in the direction of devotion to the highest education, the greater become the possibilities of this free country of ours. We are absolutely dependent upon it. All our hopes are in the education of the masses.

Just consider for one moment, if you will bear with me, and review the history of the world. Here in this university are we to attempt not only intellectual development, but more than all that—moral and religious training. The world has tried intellectuality. We are to-day, in our colleges and in our universities, finding our classics in the nations which have demonstrated unusual intellectuality, yet they have no place in the world of to-day. It was not possible to sustain them by mere intellectuality. They have tried physical culture. The supremacy of physical culture has been demonstrated by the nations of antiquity, and yet, notwithstanding the perfection of intellectual culture, the perfection of physical culture, nations have gone down, although attaining the highest supremacy in both. So that we must seek for something else for the permanency of government, and I believe we have it in the purpose of this university. In other words, in the moral and religious training there is to come that stability which is to give permanency to our government and to our people. Indeed, our hopes are in the elevation of the moral above the merely intellectual and physical. Do not misunderstand me for one moment to deprecate the highest effort toward the highest physical and intellectual attainment, but above them all is that higher religious influence which is to make the other two stable.

And so I come to you to-day and join with you and with these Trustees in congratulating Methodism, in congratulating the people upon the success which has crowned The American University up to this point. I do hope that the time will come, and I have no doubt that there are those in this audience who will witness it, when this site shall be covered by other magnificent buildings yet to arise and adorn this beautiful spot, and to provide for the applicants who shall come to this university. We remember the request that came from heaven long ago to King Solomon: "Ask what I shall give thee." Sometimes I think that Heaven has asked the American people, "What shall I give thee?" And the response has been, "Give us wisdom; give us an understanding heart." And in addition to that, Heaven has blessed us with all material prosperity. So we come to-day to join again in response to that request for wisdom, for judgment, and for strength to preserve us as a people, to maintain us as a government and to build us up as a beacon to the nations of the earth.

Bishop IVINS: It may not be known to the audience generally, but every speaker on this occasion is a Trustee of the University, and has shown his interest by long journeys to this place, by gifts in many cases, and by a study of the great object that we have before us. So it has been thus far in the program, and will be unto the end. I take great pleasure in introducing to you Bishop Charles H. Fowler, D. D., of Buffalo, New York.

Bishop Fowler's Address.

Hail to the American University! Hail to this goodly company of assembled friends! Hail to the great church especially interested in this enterprise! Hail to the great nation whose sons and daughters will here be blessed by the thousand for unnumbered centuries to come! And all hail to the most beautiful city on whose bosom we hang this anulet, whose efficacy shall increase forever! What more desirable site for a great university than this Capital of the great republic, located between the mountains and the inlets from the sea, catching inspirations from the eternal summits on one side and on the other side perpetual youth from the vastness of the ocean, on whose brow time writes no wrinkles; lying in the highway between the North and the South, inhaling health from one and fragrance from the other, honored alike in its distinguished name and equally distinguished history. A city of avenues, and circles, and parks, and trees, and noble public buildings. A city of palaces and monuments and temples, where her citizens walk among the statues of her heroes and the altars of her God and are transformed into soldiers and patriots and statesmen. A city crowded with public schools, where all her children may be taught, with colleges and universities of long and honorable standing, with vast collections of the products of nature and art from all parts of the world, with all known materials for the illustration of every science and every known branch of useful knowledge, with a library second to none in the world, and an observatory mapping out all worlds, with forty millions of dollars' worth of illustrative apparatus, much of it incapable of duplication, and all of it easily accessible and ready for use, with the Treasury of the United States behind it to secure all possible enlargement, and the authority of the General Government over it to secure safety and permanence. Again, thrice and all hail to this most beautiful city on earth, that receives this day the beginning of the first building of the greatest of all institutions, a Christian university; blessed city and city of the blessed, for yonder rest the ashes of the Father of his country, who is buried deep in the heart of every lover of liberty, and yonder towers his marble monument, still the loftiest memorial shaft among men; and yonder are the low, green tents, whose curtains never outward swing, where are bivouacked the heroes who gladly died to save the republic, and who illustrate that inspired utterance of Horace: "*Dulce et decorum pro patria mori.*"

This institution, born in the nick of time, and on the summit of the centuries, dropped into the lap of events, and endowed with vast estates and palaces, needing only to purchase a key for this big front door, has a right to be questioned, and to be heard. An institution in a community, that is to occupy the time and thought of scores of cultivated laborers, to control capital by the millions and expend its income by the hundred thousands, to build its walls for the centuries and plan its campaigns by the thousand years, to furnish a home for multitudes of the sons and daughters of the land in a critical time of their life and furnish character for scholars and scientists, preachers and philologists, physicians and philosophers, jurists and statesmen—an institution thus purposed and intrusted has a right to the public ear.

It is to-day in the center of American thought. The eyes of millions of freemen are turned this way this hour. The prayers of millions of believers are ascending on behalf of the work occupying us at this moment; nearly half a hundred commonwealths are turning this way, and States unborn, struggling in the womb of the nation, are listening to the plans here crystallizing, and hearing the strokes of the hammer bringing into place this corner stone.

The Capitol Corner Stone.

Standing here this hour, with my back to the mountains that stand about Harper's Ferry, with its memories so dear to every patriot, and with my face toward yonder Capitol building, I am reminded of another ceremony, not wholly unlike this. It took place September 18, 1793, one hundred and three years and one month ago last Sabbath. Methinks I can see it now. There is the noble form of Washington, surrounded by heroes of the Revolution, and officers of the infant republic, crossing the Potomac yonder, and walking up onto that hill in the thick forest, and there, with appropriate service and ceremony, he lays the corner stone of the first building of the National Capital. How meagre and strange the picture. The republic born on the still hot battlefields can not yet talk plainly. It can only shout the battle cry of freedom. With army dispersed and unpaid, with treasury empty, with the nations of the earth letting the new government alone because it was too weak to heed, with sparse settlements along the Atlantic coast, with a wild and unknown continent stretching toward the setting sun, the republic seemed like a mere dreamer or mere trapper camping in the wilderness. Surely those were prophets that gathered on yonder hill in the woods and laid that corner stone. They looked over the bulge of the world and saw the teeming future. Yonder magnificent Capitol, with its chambers, and halls, and stairs, and plateaus, and columns, and pillars, and carved marbles, and statues, and dome, and towering Goddess of Liberty catching the first rays of the morning sun from the Atlantic and the last rays from the western plains, that stately structure, the wonder and a admiration of all the civilized peoples of the earth, stood complete in the faith of that little group of patriots as they stood there that long-ago day in the woods and laid the corner stone of the first Capitol building, with blows that echo round all the world and through all coming centuries.

Not unlike their conditions and task are our conditions and task. We are in an open field beyond the wood, on a hill, laying a corner stone, not of the capitol of a nation, but of a university of a great people. They had three and one-half millions of people scattered in the wilderness. Out of 70,000,000 of citizens we have 25,000,000 of people, members and adherents in a thickly settled and wealthy land. They had a young nation back of them. We have a great nation, and a great Protestantism, and a great church back of us. They had the faith of the patriot to inspire them. We have the faith of the patriot and of the Christian to inspire us. Did they go forward? We can go forward in the name of God. Did they succeed to the joy of their children? We shall succeed to the joy of all coming generations and to the glory of God.

We are only discharging a duty. We are sprung from a heroic ancestry. Our fathers went forth empty handed to build a church and a nation. They drove out the savages and wild beasts and subdued the continent and built it full of cities and towns and houses and comforts. With their blood in our veins and their achievements in our inheritance, we have no right to plan or do little things. As Cæsar said to the frightened sailors on the stormy Mediterranean: "Fear not, you have Cæsar on board," so we can say: "The world has a right to expect achievements and courage from us; we are of the conquering race." Duty demands from us great achievements.

We are the heirs of priceless liberties, and not one right do we claim that was not wrested from fierce enemies with the red hands of heroic battle. Have we religious freedom? It cost the fires of Smithfield. Have we freedom of speech and of the press? It cost the long and bloody strifes of the English-speaking peoples. Have we political freedom? It cost the bloody trail from Concord to Yorktown. Have we universal freedom? It cost the long and crimson struggle from Fort Sumter to Appomattox. Mankind has a right to expect much of us.

The age in which we live demands of us great achievements. We are no longer provincial; we are cosmopolitan; citizens of the world. There are no strangers; all peoples are tributary to us. All the treasure houses of the world are open to us. All knowledge of the ages beckons to us. Nothing seems impossible. We can measure the millionth part of an inch; we can create diamonds; we can

whisper two thousand miles and hear the breathing of the man with whom we are whispering; we can see through triple bars of bones and flesh. Secrets are no longer safe in the heart. We can amass fortunes by the hundred millions in a single lifetime. We have no right to do small things.

Intrusted with Vast Responsibilities.

We are intrusted with vast treasures, and must measure up to vast responsibilities. The man who receives fifty millions as patrimony has no right to keep a peanut stall. Nature keeps a one-priced store. She sells only to him who pays the price; and whoever puts down upon her counter the value of an article can take the goods. So she holds all her servants, and agents, and debtors to a strict account. She has her sleepless eyes open upon us. If we do not use and improve our talent and gain other talents, she will recover her gifts and send us to the eternal poorhouse. We must win or go under. Nature has no time to shilly-shally. In this enterprise we are only meeting imperative obligations.

The university has the right of way. She has this because she takes us up into the invisible world of forces, into the world of ideas. All forces are invisible. Power never took you by the hand. I never looked you in the face. You never saw its form or color. I never saw my own soul. I have hunted for it everywhere. I have gone into my body and searched for it everywhere—down in the center of the bones, in the pivots of the joints, everywhere. I have taken my best chemistries and a strongest microscopes and I have hunted through all the 800,000,000 cells of my brain, but nowhere can I find my soul. It never comes out to me. It may be pondering among the stars while I am hunting for it here in this cage—my bosom. It may be fluttering here while I am searching for it yonder in the infinite spaces that yawn above me. I never saw it, yet I know by my consciousness that this strange, invisible, intangible, imponderable something, which hopes and fears, which renews and forgets, which loves and hates, which acts and is, is myself, a citizen of the invisible worlds, an heir of all the ages, though it is itself always invisible. Indeed, all power is invisible and intangible. The university takes me up among these invisible intangible forces, and so has a right to be heard and obeyed—has the right of way.

Nature stands for the university in the fact that she puts a premium on brains. She is not on the side of the imbecile. They are always left in the race, and take what no one else wants. All that nature does for them is to pick them to pieces when they have starved to death in order that she may give the elements to other agents for another experiment. She does not want us to work merely with our spades and axes. She wants us to use our brains, and thus make one thing do another. She does not thank us for economizing her power. She has power enough; there is no limit to her power, and withholding does not save it. She asks no increment of compound interest for power which she stores. She wants us to use her power. She turns all the great wheels in the universe around one way all the time, and says: "See! They go round this way. Don't you see? Throw your inventive thoughts around them and make them do your work." If only we could throw a belt around the world and utilize her motion, could we not make things spin? Nature wants us to use her power. This is why she pays big wages for brain power. Indeed, wages are a fair test. Nature keeps only true things; she hates shams. She is just.

Take the matter of wages. Wages work down to the fact of justice ultimately. Study it. On the surface, this matter of wages often seems unjust and bad. This man works as a brakeman fourteen hours a day and takes chances on his life; so he must pay heavy premiums to have his life insured. He receives only \$1.25 per day. This man, as president of the road, comes in a carriage to his office at 10 o'clock, is waited upon by half a dozen servants, sits in an easy chair, moves about a few papers, writes his name a few times, goes out at 3 o'clock to eat a big dinner with his friends; for this he receives \$25,000 per year. This seems hard. But nature insists on it. She says it is just, and so it is just. Capital has no conscience. Business is business. Capital only wants another quarter of a cent. Now right behind this president of a road stands another man anxious to do his work for \$20,000. Capital would take him in a minute, if he could do the work. But he can't, and so he does not secure the place. Look at these two men. The first man simply sits on a board and listens for a whistle. He can think of his sweetheart, of what he pleases. The last man has all the trains, and all the engines, and all the brakemen running up and down his nerves; soon he is worn out—has softening of the brain, or nervous prostration, and dies. He earns all he gets. Nature pays big salaries for brain power, and so asks us to build these universities to fit men for great work.

The university has the right of way, because it develops the spiritual forces in the race. Titus had destroyed Jerusalem and was on his way back to Rome. At Joppa, while he was embarking his forces, sitting on his horse watching the moving of the troops, a poor Jew crept in among the horses and pulled Titus' stirrup, and presenting a paper asked Titus to let him teach his people in their distress. Titus, scorning the wretched Jew, gave his consent. That man by his school saved his race to the outwreathing conquering empire by many centuries. On this spot we shall do our part in saving our race and all races.

When God made man, he took so much dust and kneaded it up with other elements, molded it into shape, fashioned the frame in symmetry, fitted part to part, dug the arteries, drilled the bones, spread the nerves, wove the veins, oiled the joints, and completed the entire system with features of beauty and form of grace. But that was not man. That was only a stark corpse. The great Builder and Architect and Artist had done His work, but the Divine Father had not touched it. Then He took up this clay, tenderly, in His hands, and breathed out of His own soul the breath of life into its nostrils, when, lo! the dull eyes opened and gleamed with thought, the dumb heart began its everlasting beating, the warm blood leaped through the new veins, the obedient muscles caught the secret of strength, and Adam stepped forth a living soul—an immortal, accountable being, with power to think, with thoughts to run along God's infinite thoughts, with power to feel and act, with heart to be dead responsive to the mighty throbbings of the Infinite heart, and with will independent of His power, and able to treat with Him, the peer of His majesty.

Such it seems to me is our work here. We are taking our money, and thought, and our best judgment, and are compounding them into a beautiful site, a stately edifice, a wise and prudent board, and many hopes for the future. But all this will not make a university. The brains, and benefactions, and artificers of the Church are coming here. One thing more is wanting. The Church must come with her active and resistless sympathies, and, bowing over this form of beauty, breathe into it the breath of life. Then the university will leap to her feet, and robed in thought and crowned with power, go forth to the admiring millions, fair as the moon, bright as the sun, and terrible as an army with banners.

Bishop HURST: Eight years ago, when our legislative body, the General Conference, sought a man to place at the head of our entire educational system, it elected Dr. Charles H. Payne, and immediately after we began to think of establishing a university here Dr. Payne was visited as supervisor of our whole educational structure. He was asked for his candid opinion. His answer was, "There is a place for such a university as is proposed." At the very beginning, therefore, he put his approval on this movement as an official of the Church, and as one who, for a long time, was president of a university in Ohio. We have had his approval from that hour to this. He will now address you—Rev. Charles H. Payne, D. D., Secretary of the Board of Education of our Church.

Dr. Payne's Address.

The laying of the corner stone of the first building of The American University marks an epoch in the history of Methodism. The future historian of the Church will designate this event as one of the great events in the history, not only of the Church, but of the nation. The institution to be established here will exert a commanding influence over the whole world. It will be a beacon light sending out its beams far and wide to illuminate the entire race of man.

1. The establishment of this university at this time marks the Methodist Episcopal Church as a church of progress. Glorious as its history has been in the past, it proposes that it shall be still more glorious in the future. It is, and is to be, the Church not only of yesterday, but of to-day and tomorrow. It understands full well that the Church that would march with a conquering tread through the twentieth century must keep step with the progress of the age; nay, more, must be a leader in all the progressive moral movements of the age.

2. The American University stands for an intelligent yet evangelical and evangelistic type of the Christian faith. The projectors of this university recognize the fact that the present is an age of widely diffused knowledge, of increasing intelligence, of investigation and research, and this research applies to things sacred as well as to things secular; applies to the very foundations of our cherished Christian faith. It can not be otherwise, and we would not have it otherwise if we could. We hail this awakening spirit!

of investigation; we welcome all reverent biblical criticism. This university will give freest scope and fullest encouragement to the earnest pursuit of truth wherever found. As every window of this building and of successive buildings will be open to let in God's light, so it is hoped the windows of every soul among the thousands of students that will flock to this shrine of learning will ever be open to let in upon their whole being the light of God's truth. We do not believe, and therefore do not fear, that the most thorough investigation of truth—all truth, inspired truth—will ultimately minister to skepticism or tend in the least to overthrow the foundations of our holy faith.

We believe rather that it will be the most effective antidote to skepticism and the strongest defense against the overthrow of faith. Since the investigation of all that is most sacred and most dear to the Church will go on and must go on, the Methodist Church prefers to have it conducted under its own imperial watch-care; not superficially, but thoroughly; not with prejudice, but in the spirit of perfect candor. Mr. Gladstone has acknowledged that the best thing that he received from Oxford University was that he there learned to appreciate the value of intellectual truth. That means that he learned to be earnest in the pursuit of all truth; learned to be honest in the recognition and reception of all truth; learned to be loyal to the imperative demands of truth, and to live ever under her royal supremacy. That lofty and priceless lesson largely made Mr. Gladstone what he has been and what he is—the great scholar, the devout believer, the incomparable statesman. That is the lesson which the intelligent youth of our country to-day most need to learn. That is the invaluable lesson which this university is set to teach.

3. The American University is to stand for the highest ideals in the life of the individual, the Church, and the nation—stand for the highest and the best in attainment and achievement. The distinguished author, Max Nordau, says that the one great trouble with this world to-day—the one prime reason why it is doing so little that is worthy—is its lack of ideals. He particularizes as to nations. England, France, Germany, and the United States have, according to his statement, no worthy ideals; have nothing great to inspire and stimulate them, and consequently are accomplishing nothing great and noble. Whether we admit his statement or not, we can not deny that the want of high ideals is lamentably apparent in church and state. If we take the so-called learned professions, the lawyer, the doctor, the clergyman, the teacher, each and all would accomplish incomparably greater results if they lived constantly under the inspiration of high ideals.

It is the fondly cherished hope of the projectors of The American University that it will furnish to a multitude of educated men the loftiest ideals of scholarship, and character, and conduct, ideals that shall lift the leaders of thought and of action in every department of life to more commanding heights. Standing here at the Capital of this favored nation, occupying so conspicuous a position, this university will have the greatest opportunity ever given to an institution of learning to represent high scholarship and genuine religion, and to bless the world with their combined and beneficent influence.

4. The American University is to stand for equality in privilege amid variety in environment. Too many agencies are now active in society whose chief work is to level down. This institution is rather to level up. Into these halls is ever to be welcomed any seeker of truth holding a degree from a reputable college. Equality before the shrine of truth is the motto over these portals of learning. A sublimer sight the world has never seen than will be witnessed upon this favored spot when the representatives of all lands, of all races, of all classes, of all religions here meet, uniting in pursuit of a common object and blending their voices in worship of a common God and Father of us all.

5. Finally, The American University stands for the quickening and enlargement of all the educational work of the Church; stands for increased support of all Christian schools. No greater mistake could be made than the supposition that the establishment of this institution for post-graduate and for technical studies will in the slightest degree detract from interest in, and general support of, the other institutions of the Church.

On the contrary, the new enthusiasm awakened in the establishment of this university, which is in no sense the rival of any existing institution, will serve to kindle greater enthusiasm in the great but too-neglected cause of higher Christian education throughout the whole Church. Every dollar contributed to this institution will mean added dollars given to the other schools of the Church. Every student entering these halls will mean multiplied students

flocking to the academies, the colleges, and universities of the entire Church. The channels of benevolence for educational purposes once opened will continue to flow, as they ought to flow, more generously toward the treasures of our schools of learning, and will give to those institutions what they have so long and so greatly needed—vastly greater endowments and largely increased numbers of students.

All honor to Bishop Hurst for his quenchless zeal, his boundless enthusiasm, his tireless efforts in behalf of The American University, which we believe will stand through the coming centuries as his greatest monument. All honor also to his coadjutors, whose cordial co-operation will give reality to his dream. The American University marking thus, as it does, the progressive onward march of the Church, standing for an evangelical Christian faith, held in the firm grasp of intelligence, welcoming all earnest seekers of truth, lifting aloft its high ideals for the inspiration of an army of professional workers, emphasizing the equality of all persons in the temple of learning, and marking a decided forward movement in the educational work of Methodism that must tend to lift every one of its cherished institutions to more commanding heights of influence and of usefulness, deserves, and we trust will receive, the good will, the fervent prayers, and the generous support of every lover of his Church, of his country, and of humanity.

Bishop HURST. I take now special pleasure in introducing to the audience one of the first and foremost friends, and a Trustee of the University, and editor of the *Christian Advocate* of New York, the Rev. James M. Buckley, D. D. He is no stranger; I take, therefore, greater pleasure in introducing him to you.

Dr. Buckley's Address.

LADIES AND GENTLEMEN: A celebrated character is reported to have asked a friend to read to him. The friend said, "What shall I read?" and the celebrated character answered, "Read me fiction; that may be true; history I know is false." Yet history is the memory and the recollection of the race. Animals have memory; the most forgetful of human beings have memory, for every impression fixes itself upon a plastic substance, and in the human mind, as is seen in dreams, thoughts that no one can recollect frequently recur with all the vividness of a previous experience. Man, as a thinking, willing being, has the power of recollection, and he is most master of his faculties as well as of his acquisitions who, when he wills, can recollect. The venerable men whose pronouncement was fixed in past ages, when they declared that they find it difficult to re-collect, expressed by their pronouncement the precise difference between memory and recollection. History—recorded history—is both the memory and the recollection of the race. Accordingly, history is the source of patriotism, for it is the root of family, of ancestral, of racial, and of national pride. A people that know not the glorious deeds of their fathers, that are unfamiliar with the sacrifices by which the institutions which they enjoy were established and cemented, can have no patriotism. Savages fight for their possessions as a dog fights for a bone, not with a sense of intelligent possession, but simply because they want them, and they resist those who would wrest them from them. In like manner, regardless of the distinctions of equity or of the holiness of a moral purpose, they seize the possessions of others, frequently with less than envy—a mere blind impulse to grasp. Patriotic institutions, philanthropic thoughts, feelings, and purposes are all born in history, and where there is no history there is no philanthropy, though there may be mere impulses.

History also makes possible scientific investigation. All the advances of science in every sphere to-day depend entirely upon history, for without history of scientific explorations, without history of processes that have been superseded, without history of processes that are incomplete all generations would be compelled to begin over again, but now men see by what they know. They advance higher by every ineffective experiment into new fields, so that it may be truthfully said that without history there can be no science.

Furthermore, history stands between and raises an impassable barrier between civilization and primitive barbarism. Well said an educated Indian, "I have discovered that the white man remembers by what he knows." The Indian's memory is as strong as that of the white man's; he remembers a trail, a scent, a site, but the white man's brain is stored with knowledge and he sees the next step, not by intuitive ability, but by what he possesses. And every generation would sink back into primeval savagery were it not for history, so that the school boy of ten years of age is better equipped than men were thousands of years ago. The ancestors of the Anglo Saxon

people drank blood out of their grandfathers' skulls as they danced in the Druidical ceremonies beneath the holly and mistletoe. We have the holly and mistletoe, but we have dignified them by our Christian festival. But we have also the history of the ages that have intervened, and are distinguished, not by the possession of any new faculties, but by the store of acquisitions that come into our possession the moment we open our eyes and open our ears and stretch forth our hands into the world.

An epoch must be important in history in proportion to the complexity of human relations, in proportion to the aggregations of populations, of structural populations which are strongly cemented, in proportion also to the rate of motion, of action, and interaction between them. There is but one additional element to give glory to an epoch, and that is the number and extent of ecstasies in society. Judged by these standards the last hundred and fifty years are the most important series of years that have taken place in the history of the earth of which no direct supernatural interference is predicated. It is only necessary to appeal to history in natural science, in physics, in theology, in jurisprudence, in constitutional government, and in the migrations of population to see that no five centuries have equalled in the history of this world of which no supernatural interference can be predicated the one hundred and fifty years last passed.

Princeton University is celebrating the one hundred and fiftieth anniversary of its foundation. The remarkable exercises were magnificently opened, by one of the noblest discourses ever delivered in this country, by President Patton. It appears to-day in the *Public Ledger* of Philadelphia. He claims consideration for Princeton on the ground that Princeton antedates the formation of this great new government of Christian liberty. He is right, but if he be right, then Methodism, which antedates the formation of this great new world of Christian liberty in its organized aspect, in a government, and under the Constitution of the United States, may also claim the respect of the civilized world. In 1796, in New York, and about the same time, though some say a little earlier, in Maryland, the first voice recommending to the consideration of the people of the colonies the peculiar form of Christianity known as Wesleyan Methodism was lifted up. It was gratifying when one of the speakers on this occasion pictured George Washington as he ascended Capitol Hill to lay the corner stone of the Capitol; it was gratifying when he announced his date that he knew that, relatively to the appearance of Methodism in connection with the government of the United States, he could antedate that sublime fact. In the year 1789, nearly one hundred and seven years ago, a body of Methodists, whose organization had been built into a church five years before, who had been in this country much less than thirty years, assembled together in the city of New York. It was but a few days or weeks before that George Washington had been elected President of the United States. They took into consideration the subject of the new government and sent a distinguished soldier of the Revolution, one of their ministers, Major Morrell, a particular friend of the Father of his Country, to wait upon him and ask if it would be agreeable to him to receive an address from a delegation from the Methodist Episcopal Church. The President replied that no religious body had as yet waited upon him, and that he would be delighted to receive such an address. Three days later, at a time set by the President, Francis Asbury, the first Bishop of the Methodist Episcopal Church, who had performed service prior to that time in the colonies, accompanied by Major Morrell, appeared in the presence of the President of the United States and delivered to him this address:

"We, the bishops of the Methodist Episcopal Church, humbly beg leave, in the name of our Society, collectively, in these United States, to express to you the warm feelings of our hearts, and our sincere congratulations on your appointment to the Presidency of these States. We are conscious, from the signal proofs you have already given, that you are a friend of mankind, and under this established idea, place as full confidence in your wisdom and integrity for the preservation of those civil and religious liberties, which have been transmitted to us by the Providence of God and the glorious Revolution, as we believe ought to be reposed in man.

"We have received the most grateful satisfaction from the humble and entire dependence on the great Governor of the Universe, which you have repeatedly expressed, acknowledging him the source of every blessing, and particularly of the most excellent Constitution of these States, which is at present the admiration of the world, and may in the future become its great exemplar for imitation; and hence we enjoy a holy expectation, that you will always prove a faithful and impartial patron of genuine, vital religion, the grand end of our creation and probationary existence.

"And we promise you our fervent prayers to the throne of grace, that God Almighty may endue you with all the graces and gifts of his Holy Spirit, that he may enable you to fill up your important station to his glory, the good of his Church, the happiness of the United States and the welfare of mankind." Signed in behalf of the Methodist Episcopal Church."

On receipt of that address, the Father of his Country uttered the following response:

"I return to you individually, and through you to your society collectively in the United States, my thanks for the demonstration of affection, and the expressions of joy offered in their behalf on my late appointment.

"It shall be my endeavor to manifest the purity of my inclinations for promoting the happiness of mankind, as well as the sincerity of my desires to contribute whatever may be in my power toward the civil and religious liberties of the American people.

"In pursuing this line of conduct I hope, by the assistance of divine Providence, not altogether to disappoint the confidence which you have been pleased to repose in me.

"It always affords me satisfaction when I find a concurrence of sentiment and practice between all conscientious men, in acknowledgment of homage to the great Governor of the Universe, and in professions of support to just civil government.

"After mentioning that I trust the people of every denomination, who demean themselves as good citizens, will have occasion to be convinced that I shall always strive to prove a faithful and impartial patron of genuine vital religion, I must assure you in particular that I take in the kindest part the promise you make of presenting your prayers at the throne of grace for me, and that I likewise implore the divine benediction on yourselves and your religious community."

After the Father of his Country had finished reading the address, Bishop Asbury arose and presented him with the copy which he had read, and George Washington presented Francis Asbury the copy which he had read, and they departed. A few days later other denominations appeared in the same way and presented their congratulations and pledged their allegiance. Now, if Methodism was first to present its congratulations to the Father of his Country, it can not be improper for it to come to Washington to establish, later than some others, what Washington in his farewell address recommended the people to conserve, namely, institutions for the promotion of sound learning. Let it be understood that the Methodists laid the foundation of a university at Cokesbury in Maryland, about one hundred and twenty-five years ago. Asbury wanted a seminary and Coke wanted a university. Coke prevailed, and a university was built, and had it not been destroyed by fire we should have had a university to-day one hundred and twenty-five years old, or nearly that, within a short distance of the place where we are now assembled together. Asbury was skeptical about the whole affair, and when it burned down, he was as much resigned as people are now when a heavily insured establishment goes up in flames. He gathered from that that it was not the purpose of God that Methodists should build universities. On one of those early occasions he was invited to preach, and what text do you suppose Asbury took on that occasion? "O thou man of God, there is death in the pot." And he delivered a discourse on the dangers of a university education. He went on and drew most doleful pictures which, alas, have been fulfilled at Harvard about thirty-five years ago. Professor Palfrey resigned his position, as Harvard was rapidly drifting into skepticism, and gave the most peculiar ground for resigning that any man ever gave since the world began. Remember, he had charge of the theological department. He resigned on the ground that one-third of the students were mystics, one-third skeptics, and one-third dyspeptics. Because of that tendency in Harvard, a great theological institution was wrecked on that famous fall. Asbury depicted all these things. He pointed to Germany, alas, and declared that the German universities would soon become hotbeds of skepticism, a prediction which everyone knows has been fulfilled to the very letter. But toward the close of the sermon, Asbury showed that when the prophet was informed that there was death in the pot on account of a poisonous herb that had gotten into the mixture, the prophet proceeded to introduce something else that destroyed the poisonous element so they could take as much as they wished; and Asbury told them he could give them an ingredient which would succeed in counteracting all those influences, that was, the infusion of the clarifying, the illuminating, the purifying power of the Holy Ghost. John Wesley was a great patron of education. He was educated in Oxford. When he was a fellow of the University of Oxford he

saw more deeply into Christianity than ever he had done before, and he produced a hymn in which he set forth that Methodist education was designed to unite the pair, so long disjointed—knowledge and vital piety. There is death in the university pot unless the influence of genuine evangelical religion can be introduced. Knowledge is power, but give a bad man power and it makes him worse. The most learned men in the world were the men that brought on the horrors of the first French Revolution. They were orators and sages and patriots, but were without the spirit of religion, and consequently the more they knew the worse they were. And there are men now walking to and fro in the United States spreading doctrines most terrible on God's day and every day. No one can declare that those socialists and anarchists are ignorant. No one can declare that that lawyer who is making a practice of destroying men's hopes is ignorant. He is learned, he is eloquent, but the more he knows the more power he has against religion, the more power he has to write so as to earn the dread title of a patron of suicide. So that these two considerations must ever be before us—the dangers and the true safeguards of university education.

And now it is in many particulars appropriate that Methodists should erect the university here. This is the capital of the country. Abraham Lincoln, when he thanked the Methodists for their services in the late war, said it was not their fault that they gave more nurses in the hospitals; it was not their fault that they gave more soldiers for the army. The Methodists number less than five million communicants. Take out the Baptists, and they number more than all other Protestants together. Computing them as the Catholics compute their number, and they far outnumber them. The Catholics say they have nine millions. I doubt it not, but they count every baptized person. The Protestants count only those who have made profession of faith. All the children of every Catholic are counted as Catholics. Now, then, multiply the Methodists by three to get the number of adherents and you get fifteen millions; multiply the Baptists by three and you get about twelve and a half millions; multiply all other Protestant denominations by three and you get about four millions and a half. It is not our fault that we are growing with the country and keeping close to the masses, that with our peculiar itinerant system, our men on horseback and on foot, surpassing the trapper and the hunter, our numbers are great. And being so great, if we have any right anywhere we have a right in the Capital of this great country.

We have another reason for settling here. There is a man in this country who never knew very much, but he has made a vast fortune in the purchase of real estate. He was a poor farmer, but suddenly he bought a piece of property; it went up and he made money. A little while later he bought another piece of property; it went up and he made money, and he went on and on, until to-day he is worth two millions of dollars. His aged mother said to him: "Henry, I never thought you would amount to much. How is it that you have done this? You were a very poor farmer but you have become so rich. Tell your old mother the secret." "Well," said he, "I will tell you if you won't make it known." Naming a certain man who once lived in the city of Washington and who died here, I think, he said: "Every time that man bought a piece of real estate he made money, and I had sense enough to buy a piece of real estate as near to all the estates he bought as I could. That is my secret." His mother was so exceedingly vain of her son that she revealed her secret, so by regular steps it reached me. Now, let me say there is a like difference between the Catholics and the Methodists, and the Methodists have sense enough to know that the Catholics have an inherited instinct for buying real estate and establishing church institutions in the right place. So that our sense and judgment in establishing a university at the Capital is endorsed by the example set before us by the Catholics. Every moral, ecclesiastical and, if there be any such reason in it, every political reason for settling in Washington comes with double force to us. It is true that we can not and would not bring from afar persons to superintend it; it is true that the settlement of our controversies and policies will be determined within the bounds of this nation—all that is true, but nevertheless I stand here to-day to approve their judgment. They were wise in putting in the center of national influence their institution, and we are wise in imitating their example. Let the American people see the Catholic religion, and let them see the Protestant religion, and then take their choice. I would rather have free speech and free conscience, if every man becomes a Catholic, than to have any restriction on these liberties, because if there was a restriction on the Catholic Church in this country, how could I know that the power that put it there would not put a restriction on the Methodist Episcopal Church? I accept our republic with all

its privileges, with all its rights. Every denomination has a right to exist, but I want the people to see them and then take their choice. We are here in pursuance of our Saviour's words, "A city that is set on a hill can not be hid."

And now allow me to say it gives me great pleasure to co-operate with the Chancellor of this institution. He and I have been friends from the days of our youth. He and I conferred together about our tours abroad so long ago that I would not give the date. He and I have preached to Methodists in the city of Berlin; I preached in English and he interpreted my sermon to the people. He visited me when I lay sick in the hospital in Vienna; with one exception the only Christian voice that I heard there was his. I accompanied him when he took the train for the dismal and gloomy regions to the far south, and when he was en route for the Methodist missions in India. I have walked with him over the hills of Virginia; I have conversed with him on every cause in Methodism, and when he took the awful responsibility of determining in the presence of God that he would give his surplus strength, his prayers, his time, his thought, and his faith to this wonderful work, I determined that by every means in my power I would assist him in it so long as we both should live. And now I have only to say here and to-day, if he will allow, and if these trustees will allow, and if this vast concourse of friends will allow. Harvard's popular alumni to teach them what to do, and if all the students that shall gather here will take the same guidance, all will be well. There will be no death in the pot. It was Holmes who said:

"Build thee stately mansions, O my soul,
As the swift seasons roll!
Leave thy low-vaulted past!
Let each new temple, nobler than the last,
Shut thee from heaven with a dome more vast,
Till thou at length art free,
Leaving thine out-grown shell by life's unresting sea!"

If, with the architecture outside, there be a true, noble architecture inside, all is well.

It is well that my friends of other denominations should be here to-day. The Methodists received their sublime liturgy from the Church of England. Their founder was a priest of the Church of England. The Presbyterians improved American Methodism. They misunderstood us; they declared we were heretical, and they taught us analysis, they taught us argument. Our exhorters began to debate and our preachers to expound, and Methodism could never have been what it is had it not been for these conflicts with Presbyterians. When we went into New England the Congregationalists liberalized us, so that we have been becoming more democratic ever since, and are going so fast in that direction that some of us think it worth while to anchor ourselves for a few years. And as for the Baptists, they made such an excitement concerning infant baptism that they taught us to beware of undue sacramentalism. And as for the Moravians, John Wesley caught from them his rich impulse in the truly spiritual direction. And as for the Lutherans, John Wesley was converted while Martin Luther's commentary on the epistle to the Galatians was being expounded. So it is quite right for a body that has received so much from all denominations to be doing something for all denominations in the land, not with the hope of proselyting, but with the hope of lifting up every good thing. To-day I give, as the sentiment of every Christian heart, these homely but beautiful words:

"When do Christians all agree,
And their distinctions fall?
When nothing in themselves they see,
But Christ is all in all."

Bishop HURST. Permit me to say that, as a specimen of denominational courtesy, we have on the platform to-day two representatives from the Catholic University of America, who have come over here to see us and to rejoice with us on this festival day. We appreciate most highly this beautiful exhibition of denominational courtesy.

I am sorry to say that Bishop Newman is not with us to-day; he could not come. We received word after his name was placed upon the program. I now take pleasure in introducing to you Bishop Charles C. McCabe, D. D. You will all be glad to hear him.

Bishop McCabe's Address.

I know a great many things pretty well, and one of the things I know is when not to make a speech. This is one of the times when not to make a speech. The bishop wants me to talk to you right along for a good while, but I see that many of you are uncomfortably situated, and I shall be brief.

It seems to me that dreamers are the most practical men we have in the world—dreamers, the men that dream our great things. John Wesley was a dreamer. He said to George Shadford, "George, I send you to the continent of America. Go and take it for Christ." He sent one man over to this country, and from the beginning of those labors we see all the glorious advance of the Church. But now we have another dreamer with us, John Fletcher Hurst. How beautifully these names go together, John Wesley and John Fletcher. He has dreamed out a great university, and the Church that is behind him, assisted by others, will make it a sublime reality. There is one thing that we hope to see done, and that is, that all the rich of our Church and other churches will rally to his support. But if the rich people will not come to his support, we will have the masses to fall back on, and they can endow this university and build these twenty-six buildings. If we would only get back into Malachi 3d and consecrate one-tenth of our income to the cause of God, we would have all the money necessary for all these great causes. The income of the Methodist Episcopal Church is nothing less than six hundred millions of dollars, and one-tenth of that is sixty millions of dollars, but we only give twenty-four millions of dollars. That leaves thirty-six millions of dollars that we ought to give, and when we get back into the 3d of Malachi, we will be able to give thirty-six millions more than we give now. With that sum we could endow this institution and build all these buildings in three months. That time may come. God speed the day when we shall get back to his plan. He made a financial plan and we changed it and put into its place our own plan. That is why we do not raise more money. Let us get back to the 3d chapter of Malachi.

But once in a while we do get help from a rich man. I want to tell you how fifty thousand dollars of the money for these buildings is to come. There lived in the village of Tivoli an Episcopalian, by the name of General de Peyster. He had a lovely daughter but she had the consumption. The doctors said if they would send her to Arabia she would get well. She was sent there, improved a little for a while, was sent home and died there. When she died one of our preachers sat down and wrote him a letter of condolence. On the day of the funeral the grief-stricken father saw that minister standing in the crowd that gathered about the grave. He called him and said, "Sir, I got your letter. It did me good; it comforted my heart." Then there was a pause and he said, "Sir, I hear your people are trying to get a bell for your church. Well," said he, "get a bell and send the bill to me. The bell was gotten, and one day General de Peyster went down to look at the church. When he saw it he said, "This church is not good enough for your people. Build another; build a church worth thirty thousand dollars and send the bill to me." I was there on the day of dedication. We did not take a collection all day. It seemed so strange to have a dedication without begging. You would preach and preach and have no point to your preaching—you were after nothing—close the Bible, sing the doxology, and go home. That was all there was of it. That was a strange day we had there. Well, that man, General de Peyster, paid every dollar of debt on that church. There was one condition, and that was, that there should be placed over the door of it a marble slab bearing these words: "In memory of Estelle de Peyster." It is a memorial church. He got an insight into the work of the Methodists and bought a large building just back of Tivoli and gave it to us as a mission house for Italian waifs, and we have it full of boys and girls from New York, homeless, and poor, and friendless, and that generous man stands back of that institution. Then he heard of our dear Chancellor Hurst and sent for him, and through the help of his pastor, and that pastor sits upon this platform to-day, an honored member of our Board, he was led to consecrate fifty thousand dollars to help us put up one of these buildings, and there is no telling what else he is going to do. To-day we accepted a hospital worth thirty thousand dollars that he has given us, and we propose to fit it up and run it in the interest of the poor and helpless sick ones that are all over our country. Why, the man is just breaking out in new places all the time. We have heard that he will be ready to pay that fifty thousand dollars two weeks from to-day, if all goes well. Let us hope that all goes well. My opinion is that things will go well.

Now, friends, we would not be standing here to-day, we would not be laying this corner stone, we would not have this great property nor this prospect for a university, if the idea had not been born in the heart and soul of one of God's dreamers, John Fletcher Hurst, and I want you to get out your handkerchiefs and give this dreamer a Chautauqua salute. He is worthy of all honor, and I, in the name of the Methodist Episcopal Church and all the churches of our country and of the world, salute him, and hail him, and bless him to-day.

We have further interesting services, but there is one service that I would like to go into now if it were not for this wind. Oh, I would like to get some money out of you! I have a kind of X-ray power to look into pocketbooks, and I see money that I would like to get. We have discussed it on the platform, but owing to the wind I will only say this: come up to Bishop Hurst and let him take your names for subscriptions, and I hope a great many of you will do it, and that you will crown this day by giving the Bishop some substantial appreciation of your interest in the great enterprise in which he is engaged.

Bishop Hurst said: The Grand Lodge of Free and Accepted Masons, who are to lay the corner stone according to their rites, have here, and will use, the identical mallet which George Washington used when he laid the corner stone of the Capitol. I would like you to see it.

Grand Master GEORGE W. BARRO ascended the platform and held up the marble mallet and said: Ladies and gentlemen, this is the mallet which the bishop wishes me to exhibit. My office requires that it shall not leave my hands, but you are at liberty to look at it. There is an inscription on the mallet which states that it was used by George Washington at the laying of the corner stone of the Capitol, and then given by him to the masonic body whose Grand Lodge to-day uses it to lay this corner stone. It has only been used four times since, and is brought here and used to-day because we regard this as a national occasion.

Bishop Hurst then said: I have another statement or two that will interest you. This building is to be 176 feet long. It is built of Vermont marble. You see it is very close to the Loughboro road, but remember that the Loughboro road disappears shortly, and our premises go 60 feet beyond the line of the building.

The next building to come is the Hall of Languages, directly opposite this, 250 feet. An avenue passes along here, and a row of buildings on either side is our plan. I wish you would kindly take a view of the plan of the grounds, as laid off by Mr. Olmsted, who laid off Central Park in New York, the Fair Grounds at Chicago, and the Capitol grounds here in Washington.

I expect that out of this occasion there shall come into the treasury of the University some large sums of money, probably not less than \$100,000. We know of several persons who have gifts who are here this afternoon. If they will kindly present their names to myself or to Mr. Emery, president of the Second National Bank, or to Dr. Beiler, their gifts will be gladly received. In some way, let us get hold of these noble aspirations of yours.

I now wish to say that the corner stone will be laid by the senior bishop of the Methodist Episcopal Church, Bishop Bowman, who has come all the way from St. Louis for this occasion, and after our exercises come the exercises of this noble body of Free and Accepted Masons.

Dr. BEILER then said: I wish to announce, friends, that this massive corner stone is the gift of our excellent contractor, Mr. Parsons, who is doing the work on this building.

The corner stone will now be laid according to the impressive ceremonies of the Grand Lodge. The Grand Lodge then laid the corner stone, depositing in it the following list of articles: A Bible, American Bible Society, 1896; Discipline of the Methodist Episcopal Church, 1896; charter of The American University; list of trustees and officers; list of subscribers to the erection of the College of History; programmes of, and invitations to, ground breaking and corner stone laying; outline of the history of the American University; copy of AMERICAN UNIVERSITY COURIER; copies of circulars concerning the University; fac-similes of letters of approval of the University from pastors of Washington; fac-simile of George Washington's letter making gift toward an American university; copy of the *Christian Advocate*; copies of daily papers of Washington; catalogues of educational institutions; Masonic calendar of Grand Lodge of the District of Columbia; Epworth League document; copy of *Epworth Herald*; and three coins dated 1896.

John F. Waggaman,
Real Estate Investments,
700 14th Street N. W.
Washington, D. C.

I am agent for the beautiful suburban property known as Wesley Heights, situated opposite the site of the American University. This property has a great future, not only because the University is to be built opposite, but on account of its desirability as a resident part of the District of Columbia. I am also agent for lots in Morris' Addition to N. E. Washington, which presents a good field for investment for small amounts. All this property is laid out in conformity with the general plan of the city of Washington and is entitled to the city improvements. In addition, Washington, being the Capital of the Nation, is free from strikes and conditions that exist in manufacturing cities. I will make investments on first mortgages, secured on real estate, interest at 6 per cent. We will also purchase for you improved property that will pay between 6 and 7 per cent., after paying taxes and insurance. Now is the time to invest from \$250 to \$100,000. For further particulars write to above address.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

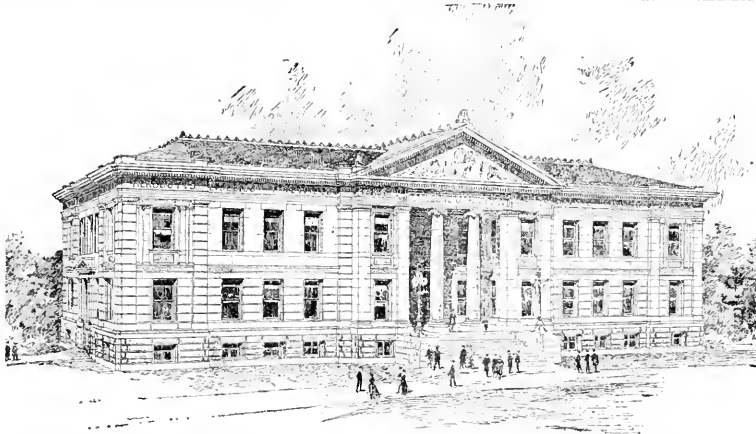

VOL. V.

WASHINGTON, D. C., FEBRUARY, 1897.

No. 2.

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

The College of History.

The last number of the *COURIER* gave an account of the laying of the corner stone on October 21, 1896. Since that date the work has progressed as rapidly as the season, thoroughness of construction, and the preparation of the marble would allow.

We are informed that the marble is all quarried, and that the cutting and dressing of the stone for the cornice and front, where most of the fine work is required, is well under way and will not be interfered with by winter weather. The walls of the upper story are up nearly to the top of the windows. As this upper story rises the building grows in impressiveness. Its size begins to be manifest, and the fact that more work is put on the stone of the upper story adds to the richness of the whole structure. The simple classical outline grows more pleasing and gives assurance of satisfying the most critical taste when all is complete. The expression of wonder is heard that such a structure could be reared for less than \$200,000. It is said that no Government building in the city has been erected more substantially and thoroughly. Completion is expected the latter part of this year.

Congratulations.

The laying of the corner stone of the College of History has called forth many expressions of interest and approval. These are greatly appreciated both as showing the widespread interest in the University, and the approval the public gives to this beginning of the erection of buildings. We would like to quote from all. We could fill the entire *COURIER*. A few extracts must suffice.

The *Washington Post* represents the press in saying, editorially, on that date:

"To day the corner stone of the first of the buildings for The American University is being laid with appropriate ceremonies, and with a spirit of determined enterprise on the part of the incorporators of this great institution that bespeaks for it a successful career. This is an important event in the history of Washington and toward which the educators laboring in this field have long been looking. [They] have chosen well their site and have made an admirable beginning in establishing a Hall of History as the first of the University departments."

These kind words of Bishop John P. Newman to Bishop Hurst are like many others from the clergy, including different denominations:

"The occasion will be great and memorable. The Hall of History is the prophet of the future and the historian of the past. It is appropriate that the corner stone thereof should be the first corner stone laid. The anticipation of President Washington is a realization through you. May President McKinley deliver the inaugural address of The American University."

Among the educators, Commissioner W. P. Harris writes: "I wish to assure you of my personal and official interest in the prosperity of The American University, which I have prophesied from the beginning will be one of the great institutions of America."

Chancellor W. P. McDowell, of Denver, sends word: "I have watched the progress of The American University with absorbing interest from the moment of its inception, and I have hailed with delight every evidence of progress and prosperity."

President Andrew V. V. Raymond, of Union College, writes, "The American University has our best wishes for its growth and prosperity."

Provost C. C. Harrison, of University of Pennsylvania, sends "heartly congratulations and best wishes for a high career for that institution."

Similar words come from President Angell, of Michigan; Dean Buell, of Boston; President Buttz, of Drew; President Drown, of Lehigh; President Eliot, of Harvard; President King, of Iowa; President Low, of Columbia; President Mendenhall, of Worcester; President Richards, of Georgetown; President Schurman, of Cornell; President Stubbs, of Nevada; Presidents Walker and Warren, of Boston; President Whitman, of Columbian; Prof. W. G. Williams, acting president of the Ohio Wesleyan; and a number of others.

Among letters from prominent citizens is this one from Dr. Charles E. West, long identified with education in Brooklyn, N. Y.:

I congratulate you on the success of your great undertaking of what I conceive to be a novelty—a College of History—an institution of supreme importance; for it is by the cultivation of historical research that the past can be known and made available in building better governments and in reaching a higher civilization."

Letters came also from elect Christian ladies, many of whom are taking a special interest in the University. Mrs. W. D. Wightman, whose husband, the late Bishop Wightman, took a profound interest in education, wrote:

"I was with you in spirit, and rejoiced with praise and prayer in the occasion which is so prophetic of glory to God and good to man. The University will be sacred, for it will have Christ the Lord for its chief corner stone."

Mrs. Matthew Simpson also wrote:

"I send my congratulations on the great success of the corner stone laying of the Hall of History. I read

with much interest the proceedings as reported, and think it a beautiful thought to have had the same gavel used by General Washington himself when he laid the foundation of the Capitol, also to have had the Masonic Fraternity to participate in the ceremony. I hope this is but the beginning of great prosperity for the University in the future, and I know how Bishop Simpson would have rejoiced at so grand an opening."

Notes.

The Russian Academy has elected as honorary members Lord Kelvin and Dr. Simon Newcomb, of Washington.

Rev. Thomas J. Conaty, D. D., was installed as rector of the Catholic University in this city on January 19, 1897. The ceremonies were imposing.

President Low has succeeded in getting Professor Sloane to leave his chair in Princeton for a professorship in Columbia. Is it because the city is better for his work?

Pope Leo is said to have charged the General of the Jesuits to take steps to establish a Roman Catholic University at Oxford, the Vatican to share equally in the expense. Is the prisoner on the Tiber turning for assistance to the secret societies among the Romanists? He has sent the head of one order to succeed Satolli, and a man educated by the Jesuits to succeed Bishop Keane.

The British Museum announces the recovery of a lost classic—the works of one of the great lyric poets of the earlier period of Greek literature, Bacchylides, nephew of Simonides, the rival of Pindar. The manuscript was recently discovered in Egypt. It comprises fifteen to twenty poems, varying in length from fourteen to two hundred lines, mostly celebrating victories at the Grecian games.

"Out of 451 colleges and universities in the United States only 41 are closed to women. All the others are now co-educational. And, besides, women have 143 schools of the higher education, with 30,000 students." Will it not soon be time to raise the question why men should be shut out from the advantages of these "143 schools of the higher education" which now are open to women only? Forty-one institutions are closed to women and 143 closed to men. Why?

Greifswald has just lost its oldest student, a man who died at the age of seventy after having "studied" theology since he was twenty. Fifty years ago a rich relative left him an annuity to be paid to him until he had finished his studies. He knew better than to finish them. Another case like this was that of Beste, a Göttingen student. His aunt left him a yearly stipend of \$400 to be paid as long as he studied to advantage. Professor Klinkerfues used to certify every year that this student was the *Beste* among his hearers.

One of the most interesting discoveries in Egypt of recent years is a tablet, found by Prof. Flinders Petrie at Thebes, recording the sojourn of the Israelites in Egypt. The date of this tablet is estimated to be about 1,200 B. C. A fac simile of the inscription is now on exhibition at the University College at London.—*Ex.*

Rev. T. A. Goodwin, D. D., of Indianapolis, has issued a pamphlet of sixteen pages, in which he shows that the university system of the State is unconstitutional; that it has cost the State in thirty years \$2,000,000; that it has secured a permanent endowment from the State of \$6,103,000, which must be at least quadrupled in the near future, and that it costs the State \$600 per capita to graduate a teacher from the State Normal, and about the same from Bloomington, which already wants \$250,000 to improve its plant. The pamphlet throws a search light on many a dark and hitherto concealed phase of the State University, and deserves reading by every friend of education. It will be sent by the author to any address for three cents, or ten for twenty five cents. It would be a genuine mission work to put it in the hands of every voter in the State.—*Ex.*

\$25,000 on Annuity.

Two pieces of property, estimated at a net value of \$25,000, have recently been deeded by friends to The American University on the condition that the University shall pay an annuity to them during their lives. The properties are improved, under rent, and so situated as to be likely to yield a regular income, and to increase in value.

This arrangement enables these friends, who ask that their names shall not be published, to actually transfer the property to the University, and yet to receive the support from it which they will need during their stay on earth. It relieves them, in advancing years, of the care of the property, and avoids any possible litigation after their decease, as the property belongs to the University. A beautiful annuity certificate has been prepared in due legal form, which is issued to the annuitants.

There are doubtless many persons who have possessions which they are dependent upon while living, and which they desire to have go to some benevolent purpose after their decease, who might well consider this method of dealing with their property. The authorities of the University will be glad to enter into communication with such persons. There can be no general statement made as to what annual annuity can be paid, as that must depend in each case on the nature of the property and the age of the annuitant.

It is hardly necessary to call attention to the fact that many persons find the care of property an increasing burden as years come on, and often lose much of it because they are not able to manage it as was done during the prime of life. Then, if they succeed in holding it together by constant and anxious care, and leave it by will to benevolent purposes, it is even more frequently frittered away by litigations, or transferred where it was not intended to go, by the breaking of the will.

All this is avoided by the annuity plan. It will help the person who gives, will avoid possible loss, and will assist the University. Let us hear from you.

\$23,750.

The bequest of \$25,000 left to The American University by Mrs. Delia S. Root, of Buffalo, N. Y., and mentioned by us when the will was probated a little over one year ago, has been paid to Bishop Hurst as Chancellor of the University. Notwithstanding a legal protest, the University had to pay an inheritance tax of \$1,250. By request of family friends the amount received, \$23,750, is to be invested and kept as a permanent fund in honor of the generous giver.

Asbury Memorial Hall.

The most of these subscriptions were made at the sessions of the fall Conferences under the inspiration of addresses made by Bishop Hurst in response to resolutions passed by hearty vote of the ministers. The report was crowded out of the last number of THE COURIER by the addresses at the laying of the corner stone. Rev. Alfred H. Ames, D. D., of the Baltimore Conference, has added his name to the list for \$100.

KENTUCKY CONFERENCE, \$517.

\$100—C. B. Nordeman, J. W. Turner, J. D. Walsh (S. A. Lighton.) **\$55**—C. W. Sutton. **\$50**—D. W. Clark. **\$15**—F. W. Harrop, S. F. Kelly. **\$10**—F. W. Harrop (W. M. Birely), F. W. Harrop (T. B. Harrison), W. C. Schell. **\$6**—B. D. Burnett, N. G. Grizzle, J. S. Miller, H. W. Northcott (N. B. Wallingford), H. J. Prettyman (I. M. Lutz), J. D. Walsh. **\$5**—T. B. Rankin (J. M. Ackman), D. Stephenson (Mrs. J. B. Jones' Sunday school class). **\$4**—G. M. Burnett. **\$2**—B. D. Morris.

WEST VIRGINIA CONFERENCE, \$843.

\$100—W. G. Smith, R. B. Ward. **\$98**—L. L. Stewart (G. W. Grimes, \$15; R. B. Ward, \$15; A. A. Weaver, \$15; S. W. Booher, \$10; J. A. Sigafosse, \$10; C. S. Sunderland, \$6; P. H. Hawk, \$6; C. E. Jackson, \$5; Maud Malcolm, \$5; D. S. Hammond, \$5; C. E. Shaw, \$3). **\$30**—F. D. T. Bickley, C. E. Clark, H. C. McWhorter, A. Moore. **\$25**—C. B. Graham, W. S. Winans, Jr. **\$15**—S. K. Arbutnot, S. M. Day, B. B. Evans (C. W. Lynch), D. A. Friend, D. S. Hammond, J. A. Hlatt, Jothan Holt (J. H. & W. J. Holt), N. B. Johnson, P. N. Lynch, A. M. C. C. B. Shackleford. **\$10**—William Anderson, G. W. Grimes, Joseph Lee, F. M. Malcolm, C. H. Maloney, John Mizley (W. H. Holt). **\$6**—Lizzie Buckley, S. P. Crummit, C. H. Lakin, A. Merritts, T. Richmond, L. L. Stewart (D. Dick). **\$5**—A. D. Adams, L. D. Bryan, C. W. Cox, L. D. Grimes, W. P. Guina, William Hunter (Martha Lemly), J. S. Jenkins, S. King (G. W. Grimes), J. H. Koch, C. E. Leahey, A. J. Lyla (J. Q. Sigafosse), G. Martin (G. W. Grimes), S. J. Miller, F. W. Queen, J. M. Warden (W. B. Matthews), Eugene Weaver. **\$3**—L. D. Ashby, L. E. Leslie, W. C. Rogers, W. T. W. PITTSBURG CONFERENCE, \$3,760.

\$250—Two gentlemen (Pittsburg, Pa.), Maj. Hazlett (for the Library). **\$100**—J. A. Ballantyne, B. F. Beazell, T. N. Boyle, T. X. Bytle (Mrs. E.), Class of 1893, Class of 1895, J. F. Core, G. D. Crisman, S. P. Douglas, T. N. Eaton, David Flanigan (Dr. T. W. Fawcett), G. H. Flinn, G. W. Izer, E. J. Knox, N. Luccock, L. McGuire (James Mechem), James Mechem (J. A. S.), J. W. Miles, N. G. Miller, George Orbin, T. P. Pershing, J. W. Risk, C. W. Smith, W. P. Turner, E. M. Wood, T. H. Woodring, J. A. Younkus. **\$60**—H. L. Chapman, G. W. Terbush. **\$50**—W. W. Hall, J. C. Pershing. **\$45**—J. W. Garland. **\$30**—C. E. Cable, S. W. Macurdy. **\$25**—W. S. Cummings, A. H. Davies, J. G. Gogley, W. F. Hunter, S. W. McCorkle, E. S. White. **\$15**—L. R. Jones, S. E. Rodkey, S. M. Rodkey (J. W. M.). **\$10**—A. Friend, J. E. Inskeep, G. M. Kelley, W. P. Varner.

GENESEE CONFERENCE, \$3,135.

\$100—T. E. Bell, R. W. Copeland, F. H. Cowman, C. W. Cushing, I. N. Dalby, Mrs. B. L. Duckwell, Mrs. James Gilray, James Gosnell, Jacob Hager (Albert Osborn), Zenas Hurd (A. friend), W. H. Kellogg, E. H. Latimer, P. T. Lynn (D. R. Failing), S. McGeard, P. S. Merrill, W. P. Odell, G. W. Peck, J. D. Phelps, Andrew Purdy (D. A. Parcels), \$20; S. M. Stewart, \$20; B. M. Clark, \$10; Uri Milford, \$10; E. G. Piper, \$10; J. A. Smith, \$10; G. S. Spencer, \$10; W. F. Wells, \$10). L. A. Stevens (J. A. Hartman, I. H. Marvin, A. T. Vick), M. R. Webster, M. R. Webster (F. H. Beach), H. R. Webster (G. B. Watkins), M. R. Webster (J. P. Weston), J. B. Wentworth (Albert Osborn). **\$70**—James Moss. **\$50**—Mrs. J. L. Muchmore, E. M. Kelley, D. A. Parcels. **\$40**—E. G. W. Hall's boys, J. G. Ham. **\$30**—O. S. Chamberlayne, B. M. Clark, B. Copeland, W. McGavran, W. R. Pierce, B. H. Stauffer, C. A. Woodworth. **\$25**—E. J. Gwynn, S. A. Morse, W. A. Pattison, T. F. Parker, L. A. Stevens.

FLORIDA CONFERENCE, \$109.

\$30—S. A. Hager, Peter Swaerengen. **\$25**—B. Dilworth, C. C. Fanchard, O. P. Nblack, J. B. L. Williams. **\$20**—F. M. Spicer. **\$18**—J. M. Deas. **\$15**—A. S. Allen, J. F. Elliott, Isaac Johnson. **\$12**—J. L. Middleton. **\$10**—P. A. Daniels, J. Grant, J. P. Patterson, R. E. Robinson. **\$6**—Turner Austin, S. B. Bartley, C. M. Buckbee, W. T. Collier, A. Debose, J. J. Debose, E. Demery, Mrs. H. Dilworth, B. J. Grant, P. C. Jackson, D. E. Jacobs, J. S. Jenkins, J. J. Keller, Z. D. Linckrick, L. J. Little, I. H. Lockheart, T. Moody, A. N. Richie, T. H. Walker, A. Williams, J. Wilson, A. B. Young. **\$5**—R. H. Debose, R. Drake, Thomas Holsendoff, R. N. Keeling, S. J. McRay, Edward Sabie, J. Washington, Simon Welch, S. Wright. **\$3**—Sarah Daly, R. Hawkins, Dennis Johnson, R. B. Pinkny, J. H. Williams. **\$2**—Mrs. J. G. Howards.

SAVANNAH CONFERENCE, \$548.

\$16—P. H. Travis. **\$15**—A. B. Allen, W. H. Brown, William Daniels, J. H. Grant, D. G. Greer, W. F. Haven, James Jackson, E. R. O'Neal, R. B. Reppard's Sunday School Class, S. C. Upshaw, John Watts, H. M. White. **\$12**—W. A. Holmes, L. S. Reed. **\$10**—Robert Anderson, John Crolley, J. W. Green, P. F. Hazel, W. H. Lovelace, Mrs. M. E. Meyers, O. N. Samples, R. S. Stacy. **\$10**—D. Z. Duncan. **\$8**—O. C. Collins. **\$6**—St. Clair Adams, J. C. Allen, S. H. Bryant, S. P. Bryant, S. C. Crandall, N. J. Crolley, A. B. Fish, G. Y. Flenister, S. H. Gary, M. J. Gibson, P. B. Gibson, William Gantz, W. A. Hill, G. T. Holman, Matthew Holman, S. H. Jordan, M. S. C. E. Lewis, D. McClendon, L. W. McGloughlin, Simon Mincy, E. W. Moore, M. P. Moore, C. H. Newton, S. A. Peeler, William Reddick, Mrs. S. A. Saunders, Thomas South, McJ. Spencer, Thomas Thompson, Mrs. Maria Williams. **\$5**—Miss J. B. Boozer, W. H. Dinkins, James Gordon, A. C. White. **\$3**—Miss L. T. Bell, Mrs. Mary Crolley, G. R. Hause, R. B. Hayes, Miss Adna Johnston, John Matthews, Adam McClendon, Mrs. Anna Owens, Miss M. V. Williams. **\$2**—M. J. Hamilton, Smith Hubbard.

Payments.

It is with pleasure that we acknowledge the receipt of the following amounts paid on the Asbury Memorial Hall subscriptions between July 1, 1896, and February 1, 1897:

\$200—Andrew Longacre. **\$105**—Levi Gilbert. **\$100**—O. D. Becker (by Mrs. S. E. Haws), Bloomington, Ind., Sunday school (by W. B. Halstead), Bishop Earl Cranston, Michael Kaufman, J. Leak, J. J. McCabe, A. R. Miller, S. H. Prather, E. L. Santee, F. A. Soule, C. L. Spencer, W. C. Webb (by George Kessler), Mrs. Mary Wightman, J. O. Willson. **\$75**—G. H. Humason. **\$65**—M. R. Webster. **\$66.66**—E. W. Burr. **\$50**—A. B. Ames, C. W. Briggs, D. W. Clark, I. N. Dalby, L. M. Davis, D. A. Jordan, E. W. Ryan, I. E. Springer, C. B. Steele. **\$45**—H. A. Buchiel, G. H. McLaughlin, William Newkirk. **\$33**—C. C. Badl, S. O. Royal. **\$30**—G. W. Collier. **\$25**—J. K. Adams, C. E. Asbury, J. F. Bell, J. Braden, J. W. Crawford, W. L. Davidson, F. P. Doty, S. W. Horner, Stephen Jay, H. W. Key, E. S. Lewis, J. W. Mason, J. W. Price, F. B. Riddle, L. H. Shiveley, J. J. Smith, A. N. Spahr, A. W. Stalker, L. Timberlake, W. H. Wardell, H. B. Westervelt, T. H. Willis, C. E. Wing. **\$22**—G. L. Tutts. **\$20**—J. R. Colley. **\$17**—W. H. Barron. **\$16.33**—W. L. Slutz. **\$15**—T. M. Joiner, M. E. Ketcham, J. A. Lowry, C. M. Thompson. **\$10**—J. C. Arbuckle, A. B. Austin, H. E. Brill, A. L. Brokaw, Mrs. Ames Carl, M. E. Carley, Joseph Clark, J. L. Dalby, K. H. Elmsstrom, J. W. Gaddis, S. M. Gordon, J. W. Gorse, F. W. Harrop (by T. B. Bireley), F. W. Harrop (by T. B. Harrison), J. F. Hastings, W. B. Jackson, J. R. Jewitt, A. G. Johnson, C. L. Kalbins, H. D. Ketcham, J. D. Lea, W. L. McDowell, J. McDowdow, C. E. McKinley, J. F. Miller, H. W. Millisca, C. D. Munsey, J. P. Nide, N. A. Palmer, John Pearson, C. F. Peck, J. F. Pennington, J. E. Rudisill, W. S. Shepherd, T. B. Smith, W. A. Stephens, J. W. Thompson, E. Yager. **\$9.10**—W. M. Mason. **\$9**—J. B. Marsh. **\$8**—J. D. Darling, W. A. Wiaat. **\$7**—J. B. Westworth (by Albert Osborn). **\$6**—O. W. Berry. **\$5**—E. D. Barnett, A. Becks, D. I. Ewry, Jacob Hagner (by Albert Osborn), T. H. D. Harrold, P. E. Hoyt, G. M. Knapp, Dollie Lewis, A. M. McCullough, A. G. Newton, G. J. Piper, D. Stephenson (by Mrs. Jones' Sunday school class), J. T. Wigren. **\$4**—W. J. Jewett, O. C. Paxton, H. E. Wright. **\$3.34**—Clifford Jackson. **\$3.33**—Edna Browa. **\$3**—Maria Vinegar, R. C. Wilkinson, A. G. Yount. **\$2.50**—C. H. Taylor. **\$2**—C. L. Bare, B. Daniels, W. H. Evans. **\$1.66**—Florence Harris, Leah Taylor, Annie J. Williams. **\$1**—W. D. Gray, Eliza Harris.

Sociology.

We take the liberty of printing the following letter addressed to the Chancellor of the American University by Dr. J. H. W. Stuckenberg. The facts to which he calls attention should have wide circulation. What he urges is so in harmony with the plan of The American University, and with the efforts already made to secure funds for this special purpose, that we rejoice in these strong words from Dr. Stuckenberg. He knows whercof he speaks. His well-known work in this field, and well-improved opportunities for observation and study during a long residence in Berlin, add weight to his facts and arguments. Christian scholarship must purge this science of false materialism. It can only be done by specialists who are as scientific as the best, and at the same time Christian in spirit. Such men are among us. They need a "local habitation," and a livelihood while doing right here amid the immense facilities of Washington the great work suggested by Dr. Stuckenberg. Would that some noble hearted person might be moved by this letter to equip such a department in The American University. Consider well his words.

"MY DEAR SIR: I am anxious to have Sociology as scientific as possible and yet Christian in spirit established in our institutions of learning... A visit to Washington some months since convinced me that no other place in this country offers equal facilities for the study of the subject from the American point of view. The Government with its various departments, the numerous collections of natural and ethnological interest, the cosmopolitan character of the city, all point to Washington as the place for our greatest school of Sociology.

"It was suggested that I write [elsewhere] * * * ; but I thought it better to address you. Perhaps it is useless, since you may have fully considered the matter in connection with the University. But in case you have not, will you do me the favor to weigh carefully the reasons for giving special prominence to that most important subject? The Smithsonian Institution and National Museum are full of treasures for investigating the development among the Aborigines, a matter which has received too little attention. In your city the history of the white man, and of our Government, can also be most advantageously studied.

"Vigorous measures ought to be taken to rid the study of sociology of the materialism which has entered the literature on the subject. * * * This evil can be met by a sound philosophy, and it ought to be met soon.

"Pardon me for troubling you. I am sure the matter I present is not foreign to your thoughts. With many others I look forward with deep interest to the establishment and equipment of a great American University in Washington. Success to you in your grand undertaking, and may you see your way clear to give particular prominence to sociological studies.

"Faithfully yours,

"J. H. W. STUCKENBERG."

Thanks.

Especial gratitude is felt by the University authorities to Dr. Richard Wheatley and the Harpers, for the finely illustrated article in the Christmas number of *Harper's Weekly*.

umes on the "Warfare of Science and Theology," makes a desperate attack on the Church, and would take all education out of her hands. His pupil, Dr. Jordau, a graduate of Cornell, follows his master. Mr. E. P. Powell, after eulogizing Michigan University in the *Forum*, says, "the transfer of our educational system from Church to State must be completed." Prof. Ely, of Wisconsin, says, he would not sweep all the Church institutions out of existence, because we confront not a theory, but a condition. His theory is that the Church university ought not to be. These are only illustrations.

We are not surprised that friends of Church institutions, who did not object when large grants were voted to the States to found Agricultural Schools, are now stirred up when presidents and professors in these schools, that are trying to be universities, join certain men in privately-endowed institutions in an attack on Church universities. The article of Dr. Hammond, and a recent pamphlet of Dr. Goodwin, attacking the State University of Indiana, are samples of what may be expected on the other side.

The root difference between the two classes of institutions is, that one is *religious* and the other *secular*. It is not fair to put it as a conflict between Church and State. Protestants in America, and they are the Church in this country, agree and insist that the State give all the education necessary to good citizenship, and make all the scientific investigation necessary to the general welfare. Neither of these warrant a State university. They do warrant the public school, and such work as is being done by the Departments at Washington.

The full purpose of a university, as respects the student, is two-fold—it is personal and practical. The practical side includes all training for work, whether for a trade, a profession, or as a specialist. We can not admit that the State owes this to the individual. If it owes it to one, it owes it to all. It ought, then, at once to make provision for this university training as universal as the public school. This is impossible, yet anything less is partial, and is the robbing of the many to favor the few. Some of our State universities, which have free scholarships, are now conducted on a sort of limited "free lunch" system, to which only a few can be admitted. This partiality is unjust. Furthermore, this whole system of the State giving free, special, practical training, is a species of socialistic paternalism, for which America certainly is not ready. Is no responsibility to be left to parents or the individual, or to that brotherly helpfulness which develops philanthropists?

The stress of the argument, however, turns on the personal result in the student. Any college or university training that does not produce an ideal manhood is a failure. It is not only likely that the man will otherwise be practically worthless, but also injurious to himself and to society.

What is the ideal manhood? In spite of the blatant howlings of a few sceptics, and the sneers of a few materialistic scientists, we assert that this is a Christian country, and that the ideal manhood is a Christian manhood. It is a religious manhood in the best sense of the word. This carries Christian morality with it, all Christian motives and aspirations.

The State university is secular. In this country it

must be. We have no State church. There is no form of religious service that is not of a denominational type. But the denominational can not be recognized in a State institution. There can be no form of religion recognized. Individuals may be religious. The institution can not be. It is secular. As a necessary result, its atmosphere and its influence will be secular. The ideal it ever upholds will be secular. The divorce of intellectual and religious life will be recognized. The result in its students will be secular. A secular manhood is the harvest of State universities. There may be exceptions, but this is and will be the rule.

Here is the *raison d'être* for the Church university. It will be as liberal in its scientific investigations and training, as broad in its philosophical research and instruction, as impartial in its historical and social studies, as thorough in its literary ideals and work, and as practical in its professional equipment of men as the State university, while at the same time it supplies the religious ideal, atmosphere, and spirit that tend to produce the ideal Christian manhood.

It is not simply because of its "other-worldliness" that the Church insists on this ideal Christian manhood, and hence on institutions of learning that tend to produce it; nor is it because it means men who will be a help to the life and power of the Church; but because it believes this type of manhood is the only safe one in this life, the best one for all trades and professions. Such a manhood, other things being equal, ends in the best laborer, tradesman, citizen, scientist, linguist, historian, litterateur, philosopher. An ideal Christian manhood means better society and a higher civilization. This is not a matter of theory with the Church, but of conviction, yea of "*conscience*," and she "could no more abandon" her work of higher education, "even under the ban of the State, than she could her work of evangelization."

There is coming to the front another reason why the Church must continue her work of higher education. She is waking as never before to her duty to society. It is not enough to evangelize individuals, she must Christianize society. Society can not be Christianized as the individual may, by evangelistic appeals. It can only be done by the leavening of all social life with Christian ideals, Christian ethics, the Christian spirit. The Church has been trying to infuse the Christian spirit into secular ideals and ethics. The process and results are neither one satisfactory. The former is slow, and the latter is the old story of new wine in old leathern bottles. The ideals and ethics of society must be changed. This can only be done by education. If society is to be Christian, the education must be Christian.

We were pleased to note some time ago that the president of one of our leading universities had planned for work in this realm of ideals. The distinction between the secular ideal and the Christian ideal of man and of society is profound, and lies at the bottom of much that is wrong in men and society to-day. The State is secular. It acts from the secular standpoint. Under the American theory of government it can not be otherwise or do otherwise. If the secular State, then, is to teach ideals and ethics, how can these be other than secular?

What is the State ideal of man? A man of this life, who does not violate civil law, who discharges the duties of citizenship by voting (not much matter how), by

holding office if wanted or if he can get it, by fighting for his country when endangered. He is a *good* citizen in the view of the State. He may be better, but the State can not require it. Is this to be the ideal of manhood in our universities? Of course it will be denied. Certainly the individuals making up faculties in State universities appreciate a higher ideal and would commend it. But has the State a right to demand anything higher, is the question; if not, what right has the State university to demand anything higher? Can the stream rise above the fountain? The State is limited to the secular, and the State university has no right to transcend that limit. That is why, as Mr. Bryce says, the students of State universities "are subject to very little discipline."

The State theory of ethics can be no higher. It has no right to consider a man's relations to God, or the *Christian* scheme of right and wrong, let alone the gospel law of love for his neighbor as for himself. The State is political, utilitarian, economical, selfish in its ethics. Has the State university a right to be otherwise? "The State," says Dr. Hammond, "when it leaves the Christian element out of ethics, is forced back upon the principles of Hobbes, Hume, Spencer, and Mill. Right is right, for no better reason than that of custom or the sanction of the State, and if these should change, wrong might with equal propriety become right, and right wrong." The practical ethics of the people will not rise above the theory that is in the common mind. Until the ideals and ethics of the people are Christianized, society can not be.

O, but, says some one, the State universities will leave this whole realm of ideals and ethics to the Church; they are not particular about it. Exactly. They are not particular about it. But the Church is. Education with no ideals of manhood! Education with no ethics! An education that ignores the whole religious element in man's nature is bad enough, but if the whole realm of ethics and ideals be omitted, what sort of *human* creature will be produced?

The State university, if it is to be as secular as the State, can not give the education a Christian country, a Christian society demands. The Church alone can do this, and must do it. Her colleges and universities must give us men and women of the highest Christian ideals, grounded in the most thorough Christian ethics, that these may everywhere permeate society. Then may come that social revolution, or better, evolution, that will usher in a society Christian in spirit and fact.

B.

Of Interest.

Two events of general public interest, besides the inauguration of Mr. McKinley as President of the United States, will soon occur in Washington. The Corcoran Art Collection is now being moved from the old gallery to its fine, new, marble home. It is hoped this will be ready for inspection by the public during inauguration week.

The Congressional Library building is receiving its finishing touches. It will not be entirely completed this month, and we judge that all the books can not be put on the shelves for some little time. But the magnificent structure, the finest in this country, and of its kind the finest in the world, is open to visitors, and will probably be open for use before we issue our next COURIER.

Gifts and Bequests.

Who will put The American University at the head of this list in the next number of the COURIER? There is no equal opportunity for an educational investment anywhere on earth.

The *Chicago Tribune* records gifts to benevolent institutions in the United States in sums of \$10,000 or over for the year 1895, showing a total of \$29,000,000, an increase of \$9,000,000 over the gifts in 1894. Of gifts less than \$10,000 each, it is estimated that the sum would be nearly \$15,000,000.

William Hoyt, Esq., added \$10,000 to the General Endowment Fund of Wesleyan University during the past year.

Miss Huldah Keeney, of South Manchester, Conn., who died recently, aged eighty-four years, willed \$2,000 to East Greenwich Academy.

The Ancient Order of Hibernians has raised \$50,000 to endow a chair of Irish Literature in the Catholic University of America.

Major R. W. Millsaps has lately added \$10,000 to his former gifts to the Millsaps Methodist College, Jackson, Miss. This makes the aggregate of his contributions to this institution more than \$80,000.

The late Godfrey H. Paysant, of Windsor, N. S., left \$100,000 to the Acadia College to endow new chairs, one of them in theology.

Joseph W. Harper, one of the founders of the publishing firm of Harper & Bros., who died July 21, 1896, bequeathed \$5,000 to Columbia College.

A wealthy woman has just given \$750,000 in cash to Yale University.

The son and daughter of the late H. O. Houghton have given \$100,000 for a new chapel at Wellesley College.

Mrs. Julia Bradley, of Peoria, Ill., gives the University of Chicago over \$2,000,000 on condition that a branch school shall be built at Peoria. It will be called the Bradley Polytechnic Institute.

The will of the late Nathan T. Graves, of Syracuse, N. Y., makes Syracuse University a beneficiary to the amount of \$10,000, the income to be applied to a lectureship on missions, which will perpetuate the course to which Mr. Graves annually for some years past gave \$500.

Subscriptions to the fund for the new museum of science and art for the University of Pennsylvania have been received to the amount of \$180,000.

Mr. J. T. Morton has promised to give \$20,000 toward the new Kafir College in Caffaria, Africa, an institution of the Moravian Church.

The late Dr. James Marshall bequeathed \$5,000 to Coe College, Cedar Rapids, Iowa, of which institution he was president at the time of his death.

Sir Donald Smith, the distinguished philanthropist, now Canadian High Commissioner to London, has given \$2,000,000 to found a woman's college in Montreal. Sir Donald is a Scotchman, and must now be more than eighty years old. His gifts to Canada, where he has made a fortune, of which none but himself knows the magnitude, amount, with the last, to more than \$5,000,000.

By the will of George W. Wales, recently admitted to probate at Boston, the trustees of the Museum of Fine Arts are to receive \$30,000, payable on the decease of his widow, together with all his books on pottery, painting, glass, engraving, and architecture, and many valuable paintings.

Mr. B. N. Faren has given \$10,000 to the free Museum of Sociology and Art of the University of Pennsylvania.

A gift of \$1,000 has lately gone from Miss Caroline W. Bruce, of New York, to the director of the Lick Observatory.

President Gobin, of De Pauw University, announces that a friend of the university from Evansville, Ind., has given \$50,000 to the endowment fund of the institution.

The late August Wendt, of Newton, Iowa, left \$4,000 to Lutheran institutions.

The late Patrick Burke O'Brien, of New Orleans, bequeathed \$150,000 to the Catholic University at Washington, and \$10,000 to the Jesuit College of New Orleans.

Vice President elect Hobart has given \$5,000 to Rutgers College, New Brunswick, N. J., his alma mater.

The widow of Baron Hirsch, of Vienna, has resolved to present about \$400,000 to the Pasteur Institute, as a memorial to her husband.

The will of Ellen Thurston, of Brooklyn, N. Y., bequeaths to the Hampton Normal and Agricultural Institute, \$10,000, and to the Tuskegee Normal School, \$3,000.

At a meeting of the board of governors of the New York Living in Hospital, a letter was read from J. Pierpont Morgan offering to erect a new building for the institution to cost \$1,000,000.

Ex-Mayor Matthew G. Emery, treasurer of The American University, has given a \$12,000 parsonage to the Metropolitan Church, Washington City.

Mrs. Lewis and Mrs. Gibson, of Cambridge, England, two widowed sisters who are celebrated for the discovery of Biblical manuscripts on Mount Sinai, have given a site and £20,000 for the Presbyterian college to be removed from Bloomsbury, London, to Cambridge. It is this Mrs. Lewis whose article entitled "What Language did Christ Speak?" is one of the most important contributions to the *Christmas Century*.

The will of Miss Sarah Martin left an estate estimated at over \$100,000, and made bequests as follows: Hampton Institute, of Virginia, \$2,000; Indian Industrial School, Carlisle, Pa., \$2,000; Burrell School, Selma, Ala., \$1,000.

The will of Charles Willard, of Battle Creek, Mich., the eccentric bachelor, bequeaths \$40,000 to be expended in the erection of a library building; \$40,000 for a Young Men's Christian Association building, and \$40,000 to the Baptist College at Kalamazoo.

It is stated that Baroness Hirsch will give another 2,000,000 francs (\$400,000) to build a hospital for consumptive children on the Riviera.

Alfred Noble, the inventor of dynamite, and whose death in Sweden we chronicled recently, left a fortune of \$10,000,000 to Stockholm University. He was the son of an eminent Swedish engineer.

The city of Paris has recently voted a sum of \$2,000,000 for the establishment of homes in Algeria, Tunis, and Corsica for the consumptive patients of the metropolitan hospitals. The homes are to be arranged in accordance with the new theories concerning the necessity of isolating patients in the last stages of the malady from those who are not altogether beyond the hope of recovery.—*New York Tribune*.

American Beneficence.

The *Chicago Tribune* presents an interesting exhibit of the aggregate amount of money given by private individuals to American educational and religious institutions, to charities of various sorts, libraries, hospitals, museums, etc., during the last year. The total is \$33,670,120, which is a gain of \$4,000,000 over 1895, and of \$13,000,000 over 1894. In view of the fact that these figures do not cover any gifts smaller than \$1,000, the real amount is not given, but must be far in excess of that stated.

Field Flowers.

This is the name of a beautiful souvenir of Eugene Field, the beloved poet of childhood. It is a selection of beautiful poems, handsomely illustrated by thirty-five well known artists. The proceeds of the sale are to be applied toward the erection of a monument, and the support of his family.

Book Notices.

[The Editor will be glad to give brief notices of such books as are appropriate to the *COURIER*. Copies of volumes sent for notice will be placed in the University Library.]

Donated to the Library.

PROF. J. H. WOLMAN, PH. D.—First German Book, 1880. Second German Book, 1881. An Elementary German Grammar, 1867-1895. A Complete German Grammar, 1868-1881. An Elementary German Reader, 1873. A Collegiate German Reader, 1873. A Manual of German Conversation, 1870. First French Book, 1883. Second French Book, 1882. Grammaire Française, 1883. Le Questionnaire, 1884. L'Echo de Paris, 1870-1881.

This is a series of Language Text-books, after what is called the Natural or Pestalozzian Method, and has been used in many schools throughout the country. It has become widely known as the Chautauqua Language Series.

REV. JOHN H. PITEZEL, ALBION, MICH.—The Methodist Review, 14 volumes, 1810 to 1850, bound, and 8 volumes, 1853 to 1861 (excepting 1856 and one number of 1859), unbound. Lights and Shadows of Missionary Life, 1883. Sure Leaves from the Budget of an Itinerant, 1861. The Backwoods Boy, 1859. The Old Paths, 1885.

The last four volumes are by the donor, and are chiefly biographical of a man who lived and toiled in the days when the itinerant was all that the word means.

MISS MARTHA A. HUNTER, PHILADELPHIA, PA.—The Classic and the Beautiful from the Literature of 3,000 years, 1895.

This is an effort to give a sort of University extension course in the best literature of the world by making brief selections from authors and orators. There are five volumes, finely bound and illustrated.

A FRIEND IN NEW YORK STATE.—Paley's Evidences, 1819. Hugh Miller's Foot-Prints of the Creator, 1857. Life and Times of Herod the Great, by William M. Willett, 1860. Mission of Inquiry to the Jews, 1839. Planetary and Stellar Worlds, by O. M. Mitchell, 1848. Tupper's Works, 1851. Paley's Theology Illustrated, 1848. My Schools and Schoolmasters, by Hugh Miller, 1851. Parke's Philosophy of Arithmetic, 1859. The Fountain with Jets of New Meaning, by Andrew Jackson Davis, First Edition, 1870.

REV. M. A. MICHAELS, MUSCODA, WISCONSIN.—Practical Discourses Concerning the Christian Temper, 38 sermons, by John Evans, D. D., London, 1742. The Dignity of Human Nature, and other Tracts, 1762.

REV. HILES C. PARDOE, of the Central Pennsylvania Conference.—Byrne Bronson's Building, 1881. Up the Susquehanna, 1895. Beyond the Ruts, 1885.

Presented by the author. The first is an interesting story illustrating the principles of Honor, Truth, and Purity; the second, a series of summer letters on the Susquehanna from the Chesapeake Bay to Otsego Lake.

THE MASSEY FAMILY, TORONTO, CANADA.—A very appropriate and beautiful "In Memoriam" of the Hon. Hart A. Massey, who died February 20, 1896.

The resolutions passed by so many different bodies attest the high esteem in which this generous Christian man was held in all the circles of life he touched.

EUGENE FIELD MONUMENT COMMITTEE.—Field Flowers, a beautiful souvenir of the "beloved poet of childhood." It is a work of art, a rare collection of drawings illustrating some choice selections. The proceeds of the volume are to help the family and erect a monument. Send one dollar for a volume.

MR. S. R. BADGLEY, CLEVELAND, O.—A souvenir of the work of this architect so distinguished for his success in church building. We congratulate him on the exhibition he is able to make.

MR. STEPHEN H. EMMENS.—The Argentaurum Papers, being some remarks concerning Gravitation, in which the author, Dr. Emmens, claims to have found some defects in the mathematical reasoning establishing the Newtonian doctrine of gravitation, and to have established a doctrine of gravitating centres.

U. S. DEPARTMENT OF THE NAVY.—Official Record of the Union and Confederate Navies, vol. 3, by Lieut.-Commander Rush, under direction of Secretary Herbert, 1896. Secured by the Hon. Wm. M. Springer.

U. S. DEPARTMENT OF AGRICULTURE.—Division of Botany, Vol. III, No. 8, Flora of the Black Hills of South Dakota. Office of Experiment Stations, Vol. VII, No. 8, Experiment Station Record and Dietary Studies at University of Missouri. Division of Statistics, Report No. 111, Crop Report for September, 1896. Bulletin No. 11, Farm Animals of the U. S. Division of Vegetable Physiology and Pathology, Bulletin No. 9, Bordeaux Mixture; Bulletin No. 19, Copper Sulphate and Germination; Bulletin No. 11, Restriction of Plant Diseases. Bureau of Animal Industry, Bulletin No. 13, Tuberculosis Investigations. Office of Road Inquiry, Bulletin No. 20, Traction Tests; Farmers' Bulletin No. 11, Fowls; Care and Feeding. Division of Entomology, Circular No. 16, The Larger Corn-Stalk Borer.

U. S. DEPARTMENT OF STATE.—Venezuelan Boundary—General Arbitration, being the correspondence between the United States and Great Britain.

VARIOUS PAMPHLETS.—The Old College and the New, by Charles W. Dabney, University of Tennessee. The Cap and Gown in America, by G. C. Leonard. Annual Report of American Bible Society, Progress, Vol. II, No. 1. Impressions of American Methodism, by Rev. R. Crawford Johnson, D. D. The New Crusade, Vol. III, No. 5. Randolph-McDon System of Colleges, illustrated. Advice to Young Men, and Nacoochee and its Surroundings, by George W. Williams. Souvenir of the General Conference, 1896. Twenty-first Annual Report of Board of Commissioners, Boston. Expression, S. S. Curry, Boston. Lassel Leaves, The Dickinsonian, Vanderbilt Observer, Old Testament History, by George W. Pease. Vedantism, read before the American Society of Comparative Religion, by Rev. T. J. Scott, D. D., Baselle, India. The Christian Evolution of Man, by Prof. Henry Stahl, Parkersburg, Va. Heating and Ventilation of Senate Wing of the Capitol, Washington, D. C. Eighty years of the Public Schools of Washington, D. C.

BOSTON UNIVERSITY.—Historical Sketch of the School of Theology.

YALE UNIVERSITY.—Studies from the Yale Psychological Library.

CORNELL UNIVERSITY.—Annual Report of the President.

COLUMBIA UNIVERSITY.—Bulletin XV.

PRINCETON UNIVERSITY.—Bulletin, Vol. VII, No. 4.

CATHOLIC UNIVERSITY.—Bulletin, Vol. II, No. 3.

KANSAS UNIVERSITY.—University Quarterly. The Limitations of the Compositions of Verbs with Prepositions in Thucydides, by Prof. David H. Holmes, Ph. D.

LELAND STANFORD UNIVERSITY.—II. Genus of Sebastodes. III. The Fishes of Puget Sound. IV. New Mallophaga.

Millionaires' Gifts to Colleges and Universities.

The following gifts, exceeding one million of dollars each, have been given by individuals to educational institutions in America: Stephen Girard, to Girard College, \$8,000,000; John D. Rockefeller, to Chicago University, \$7,000,000; George Peabody, to various foundations, \$6,000,000; Leland Stanford, to Stanford University, \$5,000,000; Asa Packer, to Lehigh University, \$3,500,000; Charles Pratt, to the Pratt Institute, of Brooklyn, \$2,700,000; Paul Tulane, to Tulane University, New Orleans, \$2,500,000; Isaac Rich, to Boston University, \$2,000,000; Jonas G. Clark, to Clark University, Worcester, Mass., \$2,000,000; the Vanderbilts, to Vanderbilt University, \$1,775,000; James Lick, to the University of California, \$1,600,000; John C. Green, to Princeton, \$1,500,000; William C. DePauw, to DePauw University, \$1,500,000; A. J. Drexel, to the Drexel Industrial School, \$1,500,000; Leonard Case, to the Cleveland School of Applied Sciences, \$1,500,000; Peter Cooper, to Cooper Union, \$1,200,000; Ezra Cornell, and Henry W. Sage, to Cornell University, each, \$1,100,000; \$1,000,000 by President Low, to Columbia College.—*The Christian Financier*.

FIELD & FLOWERS

The Eugene Field Monument Souvenir

The most beautiful Art Production of the century. "A small bunch of the most fragrant of blossoms gathered from the broad acres of Eugene Field's Farm of Love." Contains a selection of the most beautiful of the poems of Eugene Field. Handsomely illustrated by thirty-five of the world's greatest artists as their contribution to the Monument Fund. But for the noble contributions of the great artists this book could not have been manufactured for \$7.00. For sale at book stores, or sent prepaid on receipt of \$7.10. The love offering to the Child's Poet Laureate, published by the Committee to create a fund to build the Monument and to care for the family of the beloved poet.

Eugene Field Monument Souvenir Fund,
180 Monroe Street, Chicago, Ill.

TEACHERS WANTED!

We have over four thousand vacancies for teachers each season—several times as many vacancies as members. We must have more members. Several plans: two plans give free registration; one plan GUARANTEES a satisfactory position for the coming Fall. Ten cents, silver or stamps, (the regular price is twenty-five cents) pays for a 100 page book, explaining the different plans, and containing a complete \$500.00 Prize Story, a true and charming love story of College days. No charge to employers for recommending teachers.

Address REV. DR. O. M. SUTTON, A. M.,
President and Manager, Southern Teachers' Bureau,

Branch House or dealer in almost every city and town. If Columbias are not properly represented in your vicinity, let us know.

You should know about Bicycles Send for the handsomest Catalogue ever issued. Free if you call at any Columbia dealer; by mail from us for one 2-cent stamp.

John F. Waggaman,

Real Estate Investments,

700 14th Street N. W.

Washington, D. C.

I am agent for the beautiful suburban property known as Wesley Heights, situated opposite the site of the American University. This property has a great future, not only because the University is to be built opposite, but on account of its desirability as a resident part of the District of Columbia. I am also agent for lots in Morris' Addition to N. E. Washington, which presents a good field for investment for small amounts. All this property is laid out in conformity with the general plan of the city of Washington and is entitled to the city improvements. In addition, Washington, being the Capital of the Nation, is free from strikes and conditions that exist in manufacturing cities. I will make investments on first mortgages, secured on real estate, interest at 6 per cent. We will also purchase for you improved property that will pay between 6 and 7 per cent., after paying taxes and insurance. Now is the time to invest from \$250 to \$100,000. For further particulars write to above address.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

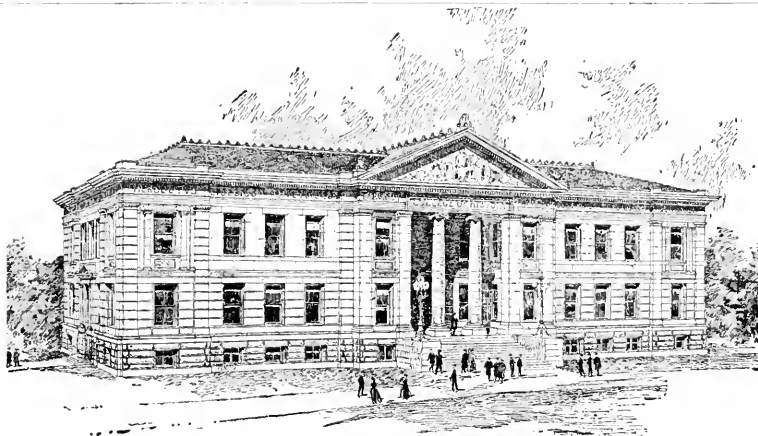

VOL. V.

WASHINGTON, D. C., MAY, 1897.

Nos. 3 and 4.

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

The College of History.

We are glad to report that the work on this building progresses satisfactorily month by month. It was expected by the contractor that the roof would be well under way, if not completed, by this time. There has, however, been a delay in the cutting of the marble for the cornice and gables, for which no one is directly responsible. It led the contractor to report that while he could complete the building by October 1, 1897, it would be better not to hurry it.

The walls should have more time to come to their permanent condition before plastering, and the plastering should have more time to dry in the progress of the interior finishing. The Building Committee extended the time of contract, so that it now calls for the completion of the College by January 1, 1898.

The cornice is now in position, and the four heavy blocks of marble at the corners of the gables, each weighing seven tons, are in their places. The roof timbers begin to rise over the beautiful structure. The capstone will be set before our next COURIER is issued.

The College, on its lofty hill, is visible for long distances, and its praise is on the lips of all visitors.

The cheapness of the building is a marvel to those who study its material and construction. No changes have been made in the original plans that will add to the cost. The contract was let for \$158,600. The building will be completed for that amount.

The report of the Chancellor to the Board of Trustees showed that \$150,000 had been subscribed toward the erection of the College of History. On account of the financial depression, a part of this will not be available for payments coming due during the summer and autumn. Also that it is necessary to provide for some other expenses, as of architect, superintendent, grading, and drainage. A good friend, who has already given \$10,000, offered to give \$10,000 more in six months from date, on condition that \$65,000 additional were in the Treasurer's hands in cash on that day. Another trustee agreed to give \$5,000, and other amounts aggregating \$650 were announced. This will give a splendid impulse to other gifts, and the officers expect to secure the entire \$75,000 in six months from date. The names of these friends, as well as of others who have given toward the College of History, will be announced in due time. Will you help?

Trustee Meeting.

The semi-annual meeting of the Board of Trustees of The American University was held in Washington, May 5, 1897. There were present Bishops Thomas Bowman of Evanston, Charles H. Fowler of Buffalo, Charles C. McCabe of Fort Worth, and John F. Hurst of Washington; Drs. A. J. Palmer of New York, Charles W. Buoy of Philadelphia, Charles H. Payne of New York, and D. H. Carroll of Baltimore; Chaplain W. H. Milburn of the United States Senate; Hon. William Connell of Scranton, Hon. M. G. Emery of Washington; and Messrs. John E. Andrus of New York, Benjamin F. Leighton, C. C. Glover, and John E. Herrell, of Washington.

Mr. John E. Andrus, President of the Board, presided with easy tact, and helped on the accomplishment of a large amount of important business. The Chancellor, Bishop John F. Hurst, reported on the satisfactory progress in the erection of the College of History, on the gift elsewhere mentioned of \$55,000 toward the endowment of the College of History, and on the efforts made toward the opening of the De Peyster Sanatorium for Consumptives, at Millbrook, N. Y.

Action was taken by the Board which, it is expected, will result in the opening of the Sanatorium in the near future. A scholarship was established in the name of the donor of the \$55,000, additional to former gifts, the beneficiaries of which are to be nominated by the donor during natural life.

The Vice-Chancellor reported on the condition of the various funds, the collections for the last six months, and the receipt of the \$3,000 on annuity elsewhere mentioned. The annuities were approved by the Board.

The Treasurer's report showed all bills and expenses paid up to date.

Mr. Benjamin F. Leighton, for a committee, reported By-Laws and Regulations governing the Board of Trustees and the officers of the Board, also concerning the duties of the officers of the University, and after careful discussion and amendment they were adopted. Regulations were also adopted concerning moneys received on annuity, insuring the perfect security of these funds and the payment of the annuities during the lifetime of the annuitants.

A plan of the grounds of the University, showing especially the proposed location of buildings, was approved, and a committee appointed for the adjustment of certain boundary lines, so that Nebraska avenue may soon be opened along the south side of the campus.

The spirit of the meeting was most excellent and hopeful. It is felt with all confidence that with the improvement of financial conditions throughout the country the development of the University will surpass what has been the expectation of its most sanguine supporters.

Words of Cheer.

Kind words always cheer on the toilers in a good cause. Such expressions are frequently received, and are always appreciated. We quote from Dr. Kendig, and take this opportunity to thank all.

"MY DEAR BISHOP HURST: I congratulate you and American Methodism on the success attending the laying of the corner stone of the first of the buildings of the great American University. May God in his goodness and wisdom graciously open the way for the speedy following of all the others. I wish I could pay for *two* of them!"

Your brother,

A. B. KENDIG."

Notes.

Lord Roseberry's income is over \$1,000,000 a year.

The annual income of the Pope is said to be \$2,000,000.

Dr. Nansen will lecture in this country next fall.

In its sixty-years' history Mt. Holyoke Seminary has had nearly 8,000 students.

Sarasate, the violinist, has a violin for which he has been offered \$30,000.

The Standard Oil dividend, payable June 15, will be 20 per cent. this year to that date.

A historic relic, the original log of the *Mayflower*, which is now in the possession of the diocese of London, will be given by that body to the State of Massachusetts.

"Even in 1824 no student in Yale College could make an utterance against the wrongs of slavery in a college essay or oration without incurring the risk of insult and even of violence."

Herbert Spencer has declined the offer of Cambridge University to make him a doctor of science, on the ground that he has always refused to accept such honors.

Hamline University celebrated the 100th anniversary of the birth of Bishop Hamline May 10.

Clark University, Atlanta, Ga., has been made a weather signal station by the Weather Bureau.

Switzerland has seven universities, or one to every 428,570 inhabitants, and Germany twenty-two, or one to every 2,856,360. Russia has a university for every 10,000,000 only. And the United States — ?

The New York *Sun* says in commenting upon the President's address at the dedication of the Grant tomb: "With the exception of Gen. Benjamin Harrison, Major McKinley is the best occasional speaker we have had in the White House since the war."

The University of Vermont has a new science building which is soon to be fully equipped with chemical, physical, and biological apparatus.

Sir Archibald Geikie, the eminent geologist, who is Director-General of the Geological Survey of Great Britain and Ireland, lectured at Johns Hopkins University, Baltimore, the Brooklyn Institute, and before the scientific bodies of Washington, D. C.

The first beefsteak that ever reached Circle City, Alaska, sold for \$48 per pound a few weeks ago. The steak consisted of a ten-pound piece of beef that was slaughtered at Forty-Mile Creek and was packed at that place and shipped 250 miles to Circle City.

\$55,000.

Since the last issue of the COURIER a friend has put into the hands of Bishop John F. Hurst, Chancellor of The American University, \$5,000 in cash and \$50,000 in securities that are a little above par and bearing five per cent. interest. This gift is the more highly appreciated because it is in addition to previous gifts made by this same friend, whose name must not be given to the public.

The purpose of the gift is specified as for the endowment of the College of History, the cash being intended to pay the salary of a professor until the income from the other gifts will provide therefor.

This insures that for all time a scholarly and Christian man shall be at work in The American University as the representative of this benevolent donor. Who can measure the influence of this gift as we think of the personal touch and scholarly inspiration of such a man on the most cultured and, hence, the most influential young people of all the coming generations? Surely many will arise and call this friend blessed.

Are there not others who wish to share in this privilege of having a representative in some one of the faculties of this new institution? We have urgent letters from scholarly men that The American University should give special attention to Sociology, covering all the social questions of the day, and to the Science of Government, including Economics and politics as viewed from a positively Christian standpoint.

Here are opportunities to set influences at work that will not only tell on individuals trained in the University, but also upon the whole nation. Why should we insist on special training for the professions, and choose, in a haphazard way, whether trained or untrained, the men who are charged with the responsible duties of government? Christian citizenship is one of the watchwords of the hour. Christian statesmen—men trained in statesmanship under Christian influences, so that they will look at all public questions from a Christian standpoint—are necessary to give effect to Christian citizenship.

All this work may be, should be, associated with the study of history in The American University. Who will endow the chairs, and set the men at work?

\$2,000.

The gift of this amount on annuity to the University by an active member of one of our Conferences is not only a wise provision for the future of his natural life, but will be of great help to the University in which he believes so thoroughly. There are many persons who have moneys invested in various forms, and who care only for a reasonable interest during their lives, who might well follow this donor's wise and benevolent example.

\$1,000.

A check for one thousand dollars on annuity was received a little time ago from Rev. Asbury Lowrey, D. D., an honored servant of God who is waiting in physical weakness for the coming of the heavenly chariot. His mind keeps its well-known freshness and power. His faith and trust are an inspiration to all who see him. He is not idle. His eye is on the Church he loves. His heart is in the triumph of a spiritual and holy Christianity. The following letter is a bugle blast that might well stir the heart and increase the gifts of the whole Church. It has been said that the only *raison d'être* of an educational institution being under Church leadership may be summed up in one word—Religion. Read this letter and think:

"DEAR BROTHER BELLER: I give this thousand dollars from my small resources in hope that The American University will ere long furnish to students a most thorough post-graduate course and thus supersede the necessity of sending our sons, especially those designed for the ministry, to finish their education in Germany, where they are quite sure to receive a rationalistic bias and to be smitten with a religious apathy.

"I know whereof I affirm. Near the Leipsic University, I have seen the old Kirke of Luther almost abandoned while the saloons and theatres were crowded to suffocation on Sunday. Lord, save our youth from such an atmosphere.

ASBURY LOWREY."

Indian Curio.

THE REV. H. M. HUGHS, of Chases Lake, New York, has sent to The American University a rare Indian curio found on the Buffalo Fork of the White River in Searcy County, Arkansas.

In last March it was shown to Prof. Mason, who has charge of the Department of Ethnology in the National Museum. He said "it is what is called a 'Banner Stone,' and that the Indians prize such stones highly and travel long distances to get them. It is used as an ornament and is considered 'good luck' to have one."

The Century Dictionary says the name "Bannerstone is sometimes given, not very aptly, to certain stone objects shaped like a small two edged axe, which are supposed to have been worn as ornaments in prehistoric times, or held in the hand as badges of authority. They have an eye for the insertion of a handle."

The Smithsonian Report of 1881, page 657, says "some banner-stones of striped slate have been found in Camillus, and one on Skaneateles Lake" [New York].

Thanks are due Bro. Hughs for this gift, and we hope that it will bring "good luck" to The American University.

Asbury Memorial Hall.

The following subscriptions were made by these heroic Conferences of the South about the date of the last COURIER. Were their spirit emulated by the laity everywhere, the \$10,000,000 asked for would soon be pledged.

ST. JOHN'S RIVER CONFERENCE, \$202.

\$20—R. O. Payne. \$15—S. H. Day. Mrs. J. J. Edwards, L. L. Fisher, C. M. Green, J. T. Lewton, L. S. Rider, J. H. Stoney, Mrs. J. C. Sullivan, Mrs. J. C. Teter, I. R. Vandewater. \$10—E. V. Blackman, G. W. Butler. \$6—J. H. Martin. \$2—Cash, J. E. Crippen. \$1—Winifred Payne, Miss Weaver.

SOUTH CAROLINA CONFERENCE, \$1,151.

\$50—J. E. Wilson. \$30—N. T. Bowen, B. M. Pegues, G. W. White, B. F. Witherspoon. \$21—A. G. Kennedy, H. M. Murphy. \$15—Henry Baker, B. J. Boston, E. C. Brown, E. B. Burroughs, C. H. Dangerfield, J. L. Grice, J. W. Groves, C. V. Jacobs, W. R. Jervay, F. E. McDonald, J. E. Middleton, D. M. Minns, J. W. Moudrie, W. R. W. Palmer, Mrs. W. R. A. Palmer, E. M. Pinckney, E. W. Scrwen, Morris Stewart, W. S. Thompson, A. G. Townsend. \$12.50—R. L. Hickson (C. M. Wilder), J. E. Wilson (C. M. Wilder). \$12—C. C. Scott. \$10—E. W. Adams, H. C. Asbury, F. L. Baxter, W. B. Bowers, Benjamin Brown, C. R. Brown, J. A. Brown, J. L. Chestnut, J. W. Connelley, Absalom Cooper, Gauey Davis, W. M. K. Eaddy, E. W. Forrest, A. B. Franklin, B. G. Frederick, G. W. Gault, Jackson Gordon, M. V. Gray, W. Haltman, W. M. Hanna, A. D. Harris, P. D. Harris, A. H. Harrison, J. L. Henderson, R. L. Hickson, S. H. Jefferson, V. S. Johnson, W. H. Jones, D. H. Kearse, S. S. Lawton, Alfred Lewis, C. L. Logan, Joseph Lucas, H. H. Matthews, William McWillie, J. F. Page, C. C. Robertson, J. P. Robinson, J. R. Rosemond, J. S. Taylor, G. W. Williams. \$9—S. S. Butler, E. J. Curry, W. G. Deas, J. W. Dore, D. G. Johnson, J. E. A. Keeler. \$6—J. C. Burch, G. W. Cooper, B. S. Jackson, G. S. McMillan, G. F. Miller, A. B. Murphy, A. J. Robinson, D. J. Sanders, N. T. Spencer, L. L. Thomas. \$5—J. W. Brown, Scipio Green, W. H. Greer, J. H. Johnson, Wiley Littlejohn, I. E. Lowry, Jerry McLeod, J. D. Mitchell, M. M. Mouzon, F. W. Vance, J. W. H. Witherspoon. \$3—C. H. Daniels, I. H. Fulton, C. B. Lowrey, T. Macfarland, Washington Thomas, F. C. Weston, J. D. Whitaker. \$2—William Baker.

Payments.

It is with appreciative thanks that we acknowledge the receipt of the following payments on the Asbury Memorial Hall subscription between February 1 and May 18, 1897:

\$500—Philip Rising. \$100—T. N. Boyle, E. H. Burch, J. H. Caldwell (by G. W. Todd), J. S. Clark, Oliver Ege (by A. H. Ege), M. K. Foster, H. S. Goldey, S. A. Keen (by Mrs. S. A. Keen), J. A. Mellick (by John P. Mellick, \$25; Emily D. Mellick, \$25; Emma Mellick, \$25; Mary Mellick, \$25); T. B. Neely, C. J. North, L. W. Peck, John Thompson, W. H. Thompson, J. T. Van Burkalow, W. E. Yeager. \$83.34—R. Van Horne. \$66.67—Henry Spellmeyer. \$50—R. F. Bishop, F. S. Ellis, R. H. Gilbert, D. Haller, A. J. Hawks, G. A. Habbell, J. G. Robison, G. W. Townsend. \$36—Hosea Hewitt. \$35—W. C. Best, H. W. Hicks. \$33.34—Jacob Dickerson, J. Y. Dobbins, H. J. Hayter, Wallace MacMillan, F. B. Lynch, J. H. Robertson. \$30—D. F. Pierce, F. B. Riddle, William Ross. \$25—C. W. Baldwin, D. Y. Bronse, L. B. Brown, B. T. Callen, T. M. Furey, Fred. Gacks, C. A. Hill, G. H. Humason, R. H. Kelley, T. D. Littlewood, C. W. McPherson, D. S. Monroe, Richard Norris (by D. P. Miller), A. J. Palmer, J. N. Ramsey, G. E. Wood, R. Woodhams, C. T. Wyatt. \$20—B. C. Bascom, J. A. Matern, A. T. Mowbray, J. B. Westcott. \$18—James Carroll. \$16.75—L. C. Muller. \$16.67—A. A. Arthur, N. J. Brown, J. A. Cole, O. R. Cook, J. B. Faulks, S. Van Benschoten. \$16.66—C. S. Ryman, Nimrod Snoddy. \$15—C. V. Hartzell, M. E. Ketchum, L. A. Lowrey, O. H. Perry, J. S. Wickline. \$12—G. E. Ackerman. \$10—H. F. Cares, J. R. Colley, S. W. Horner, E. O. Howland, N. P. Kerr, A. McAllister, J. B. Quigg (by G. W. Todd), V. T. Rue, Charles Sheard, J. A. Shippe, W. Warren, D. H. Willis, E. Yeager. \$8.34—S. N. Behout, W. Chamberlain (by C. S. Ryman), Jay Dickerson, J. G. Johnson (by H. L. Simonson), F. A. Mason, W. L. McDowell, S. R. Rooney (by J. Krantz), J. J. Tim-

nus. \$8.33—T. S. Haggerty. \$7.50—J. L. King. \$6.67—J. B. Heard. \$6—J. L. Thomas. \$5—J. W. Adams, J. M. Andrews (by T. B. Cooper), P. W. Blackwell, J. W. Bradley, W. S. Coeyman, Wilmer Coffman, William Coleman, R. B. Collins, H. C. Glover, C. E. Hill, C. K. Ilick, H. J. Ilick, E. M. Jones, Mary Lautenschlager, S. J. MacCutecheon, R. A. Mellwain, J. B. Middleton, W. Martin, W. J. Passmore, G. P. Sarvis, R. L. Shurter, F. B. Stockdale, B. T. Strong, I. Townsend, W. M. Ward, A. S. Williams, E. Yager. \$4.17—J. R. Bryan. \$4—J. W. Patton, J. S. Todd. \$3.34—Fred. Bloom, S. C. Grove, B. M. Neill, J. F. Meredith. \$3.33—C. F. Hill, G. D. Price. \$3—William Ackroyd, D. C. Beltz, George Nixon. \$2.50—B. Reeve. \$2—A. H. Gibbs, C. L. Mann, G. W. Mann, J. M. Mason, J. H. Martin, D. L. McCartney, M. F. Parker, David Royal, A. T. Vandiver, E. S. Wear, James Williams, L. D. Williams. \$1.50—B. D. Lewis, L. H. Mixon, William Perry. \$1.33—James Yarnell. \$1.25—William Stricklen. \$1—H. D. Bird, H. J. Brown, William Greco, H. W. Jones, W. H. Jordan, S. S. Lawton, M. Melin, J. T. Poole, T. S. Rainis, J. T. Terry, W. T. Traummel, D. A. Wear, J. A. Webb, H. E. Wylie.

Books.

Thanks are due Rev's Gilbert, Stevenson, Delo and Williams for books mentioned in the column of Book Notices. We desire to express our gratitude also to Miss Olive B. Washburn for a fac simile of the Ulster County (N. Y.) *Gazette* of Saturday, January 4, 1800. It is from the estate of her grandfather, Rev. Elbert Osborne, of the New York Conference. The paper is in heavy mourning, and contains the official announcement of the death of George Washington.

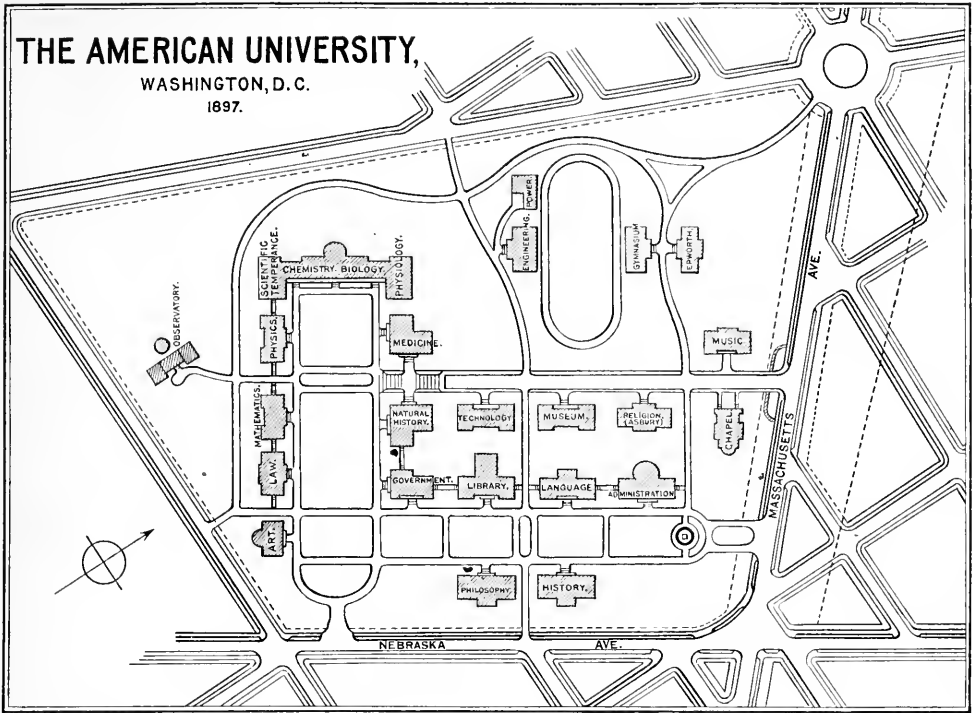

Study of History.

We are indebted to A. J. Faust, in the Catholic *Church News*, for the following quotation from the *Ave Maria*, another Catholic journal:

"It is pleasing to hear that our Methodist brethren propose to consecrate to history the first hall of their projected university at Washington. An admirable resolve. If Protestantism could be made to think seriously of its past, it would soon be occupying the anxious bench. Looked at it in the light of cold criticism Protestantism has contributed just two leading ideas to the world—the idea of private interpretation, which has made havoc of the people's faith; and the idea of divorce, which has made chaos of the people's morality."

We thank our good friends for the kindly approval of the College of History in The American University, but think we see reason in the reference to Protestantism for a study of the present and past by the writer in the *Ave Maria*. Protestantism has emphasized the right of private interpretation, but denies the effect said to have followed. It will be well for the *Ave Maria* to compare the "faith" of the people in Catholic countries with that in Protestant countries, as to its existence, intelligence and practical effect on benevolence and morality.

That Protestantism has "contributed" the "idea of divorce," is rather startling. Come now, was there no such thing in the world before the rise of Protestantism? Is there no mention of it in the Old or New Testament? Was there none of it in Rome about the time Christianity was planted there? Did the Popes never grant divorces, or the privilege of separation, to royal personages? We do not deny that the civil power is woefully lax on the divorce question, but suggest a fresh study of history to the *Ave Maria*.

Plan of Grounds.

The above cut exhibits in outline the plan for the arrangement of buildings on the grounds of The American University. It was adopted in its general features by the Board of Trustees on May 5, 1897. The details of walks, trees, shrubbery and decorations in the way of statues and fountains can not be shown on a plan of so small a scale. The College of History is 176 feet in length, and may be used as a scale of measurement. It is expected that grading will be continued during the year, and the planting of trees and shrubbery follow soon thereafter.

Notes.

Methodism is rich in men or it could not lose without embarrassment such noble workmen as Prof. Crooks of Drew Theological Seminary, Prof. Nelson of the Ohio Wesleyan University, Dean French of Syracuse University, and Dr. Williams, sometime ago President of Allegheny College. The resignation of Dr. L. R. Fiske, for twenty years President of Albion College, takes a striking figure from a place where he has wrought successfully.

The recent fire in Pittsburg emphasizes a lesson that should be heeded. There was quite a valuable historical collection belonging to the local Historical Society in the building that belonged to the Methodist Book Concern. It was totally destroyed. Some parts of it can never be replaced. Such collections should be more safely housed. Even more valuable collections in Indianapolis, Baltimore and New York are in business houses and in the midst of combustible material. They should be put in

buildings erected for such purposes, which, if not fireproof, should be practically so. We suggest the American University as a depository for some of these collections.

The San Francisco *Call* says that the taxation of churches, colleges and all benevolent institutions for the last twenty years in California has resulted in repressing charity, in turning many gifts to institutions outside the State, in placing heavy burdens on private educational enterprises, and crippling many others. Little encouragement is furnished for the maintenance of libraries, art galleries and museums. It is further declared that there is no State in the Union with such poor churches as are found in California, with an average tax of more than \$10 a month upon each.

A report from the scene of the work of the Egyptian Exploration Fund announces a somewhat important discovery. New Testament scholars have long been aware of the early existence of a document known as the "Logia [or oracles] of the Lord." It is referred to and commented on by an old writer named Papias, who, as he affirms, was intimate with those who had personally known and spoken with Christ. The only fragments of Papias known to us are those preserved by the historian Eusebius, who makes him to say: "So then Matthew composed the oracles [the Logia] in the Hebrew language and each one interpreted them as he was able." It is these oracles, or sayings, of Jesus which are alleged to have been found. The value of the find largely consists in the fact that the "Logia" are believed to be the source of the greater portion of the common matter in Matthew and Luke which has not been taken from Mark, and that they will throw light on the composition of the Synoptic Gospels, possibly bringing us "a step nearer the actual words of Christ."

Modern Education.

John Brisbane Walker, editor of *The Cosmopolitan*, has undertaken to bring together leading educators in the discussion of *Modern Education: does it educate?* The editor's introductory article is chiefly critical. He starts with the idea that the colleges are bound in tradition, and the men who control them steeped in tradition. "The pursuit of all mankind is happiness." That is the editor's dictum. He proceeds on the hypothesis that education is intended to bring men or women into a condition of mind and body best calculated to produce happiness. Does modern education do this? This is the question to be discussed, and this the standard by which modern methods of education are to be tested. He then suggests a scheme of education in groups under the headings, wisdom, life, science, language, accomplishments, business preparation, citizenship, the arts, manual training, taking them in the order of importance.

We do not accept Mr. Walker's dictum on the pursuit of all mankind, nor his hypothesis as to education. But he is trying to voice a widely-prevailing sentiment. Schools are springing up all about us that are totally unlike the college. They have no such ideals of culture. They only mean to train men how to get there in some special field of work. They are short cuts to a trade, a business, a profession, a social position, a means of happiness. As a help to get there, and to a share of the good things that add to the happiness of life, they seem to be a success. If the highest result of education is to bring a man into comfortable relations with his environment, they may help him to achieve it.

But, meantime, what becomes of the notion that a man's own inner self may be a fountain of blessedness—of happiness; that man only comes to his best by a struggle—a battle; that there is something nobler than being happy?

Were man simply an animal, this complete differentiation of education might be all right. The race-horse must have different training from the draught-horse. It matters little as to the outcome of the horse as a horse, if he is only fitted to do his work. He will go to the boneyard in due time, and there is an end of all things so far as the horse is concerned.

Modern education has a tendency full strong even in the direction of materialism. Some tendencies we may yield to for the general good as well as personal happiness. But other tendencies should be resisted, yea, even unto blood. Education should ever look beyond the mere practical aims of every-day life to what man should himself be. A symmetrical manhood, cultured after the largest and noblest ideals, should be the goal. The student's nature should be given such a trend in this direction that, in spite of the practicalities that would divert him, he may yet achieve this final end.

This will not be the result of the short cuts to success even though they bring happiness. They train to adaptability, perhaps, but do they to a large mastery? They begin to build on narrow lines, and the enlargement of life afterwards is but the building of a pyramid on its apex. The college of to-day is not a result of tradition in a fossilized sense. It has in its elements that result from large and wide experience.

Wonderful modifications have taken place since Spencer wrote his essays some forty years ago. Scientific

studies have been multiplied. Observation and experiment are emphasized. But he could not rule out literature, nor even the dead languages. The old humanists have yielded but a part of their power. Literature is the realm of ideals and cultures ideality. Language is the door into literature. He who climbs up some other way is never so much at home there. Greek may be winked at, but Greek holds the great ideals that might well help to mould the thought, the life, the religion, the government of to-day.

What is needed to-day is the most thorough college course for its general culture of body, mind and heart while giving a bird's-eye view of the world of knowledge; and this to be followed by as thorough a course in the university, where special training for life work shall be adapted to fit the graduate of general culture for the definite sphere in which he is to move. This will give a large manhood trained to a definite purpose. This is a tendency in higher education. Special schools are being grouped in university centers. This will elevate them. Isolated special schools of low grade may still be a necessity, for it is a sad fact that hundreds do not seem to be able to take the college course and then the university course. Still, this is the ideal. Dr. Walker's discussion will help it in the end.

University Struggles.

Many institutions of learning find themselves in financial trouble in these times. Their income has been cut down even where their endowments have not been impaired. The Catholic University of America, at Washington, D. C., is not an exception. At the suggestion of the Trustees, Cardinal Gibbons has appealed, in the name of the Archbishop of the Roman Catholic Church of the United States, for a collection in all the dioceses throughout the country. The appeal is based on the fact of non-payment of promised endowments. The appeal of Johns Hopkins University to the citizens of Baltimore twice within two years for temporary relief, is cited as a similar case of need. They urge the fact that universities can not be made to pay. They must depend on endowments, or collections, as is the case with the University of Louvain, in Belgium. This appeal is significant. It appears to put the entire body of Catholics in this country unitedly behind the university. The university has depended on the private munificence of the wealthy, now it appeals to the public gifts of the many. It seems to make the whole hierarchy sponsor for the enterprise. All this may be helpful in the end. There is no doubt the university will continue to prosper.

We see that a bequest of \$150,000 from the estate of Col. Patrick B. O'Brien of New Orleans, has been paid to the Catholic University since Cardinal Gibbons wrote his letter, but we have no doubt the collection asked for will be taken throughout the Catholic Church of America.

Should not this be a lesson to our Protestantism to put itself unitedly behind its educational enterprises? They ought not to languish, nor to live at a poor, dying rate. As every member of a church is expected to do something toward the missionary work, so should every one do something to build and endow the institutions of learning that are responsible for the Protestant Christian education of the future.

Gifts and Bequests.

In addition to payments on old subscriptions, \$58,000 in cash and 5 per cent. interest-bearing securities now a little above par, has been received by The American University since the last issue of THE COURIER.

The widow of Sir Richard Wallace has left her art collection to the English nation. It is valued at \$1,750,000.

John D. Rockefeller has given \$40,000 to Mount Holyoke College for a new dormitory.

Madame Audifred has given \$170,000 to the French Academy of Medicine, of which the interest will be awarded, without regard to nationality, for the discovery of a cure for tuberculosis.

W. C. MacDonald, of Montreal, who has already given \$1,500,000 to McGill University, has just made a further gift of \$500,000 to that institution. Of this amount, \$450,000 is for the erection of a building for chemistry and mining and metallurgy, and for the endowment of chairs of architecture and mining and metallurgy.

Syracuse University has secured a loan of \$350,000 at 4½ per cent. from the Syracuse Savings Bank to build the new University block. Work was begun about the first of May.

A Barbara Heck Hall is to be added to Victoria University, to provide a home for young women in the University. About half the cost of it is provided for from the estate of the late H. A. Massey, and the Canadian Methodist women will raise about \$50,000 more.

The late Thaddeus Richardson, of Charlestown, Mass., left a bequest of \$2,000 to Doane College, Crete, Nebr.

Anson Chappell, of West Hartford, Conn., left \$3,000 each to Washburn College, Topeka, Kansas, and the Hampton Normal and Agricultural Institute of Virginia.

J. Pierpont Morgan has given to the Metropolitan Museum of Art, New York, an altar piece of silver repoussé and enamel. It represents the Madonna enthroned with four standing figures at her feet, and is copied from a painting by Perugino. The cost is about \$10,000.

T. A. Bondurant has signed an agreement to deed to Eureka College, at Eureka, Ills., property valued at \$20,000.

Mrs. F. A. Stevens, widow of the founder of Stevens Institute, New York, has just given to that institution property valued at about \$30,000.

Emily G. Heins, who died a short time ago, left \$5,000 to the Lutheran Theological Seminary at Mount Airy.

Alfred Greenbaum of San Francisco gives a Semitic library of a thousand volumes to the University of California.

John Wanamaker gives \$30,000 for a V. M. C. A. building at Madras, India.

The late Judge B. R. Shelton, of Illinois, former member of the State Supreme Court, left by bequests \$100,000 to Williams College, his alma mater; and \$100,000 to Hampton Institute, Virginia.

The class of '85 of Wells College, of which Mrs. Cleveland is a member, will present their alma mater a beautiful stained glass window.

Mrs. Josiah M. Fiske gives \$140,000 to Barnard College for a dormitory, to be known as "Fiske Hall."

Prof. Moses C. White of Yale University has given to the Boston School of Theology a copy of the commentary on the New Testament by Malortus, the French Protestant and theologian and martyr.

Harvard class of '72 will celebrate the twenty-fifth anniversary of its graduation this year by presenting a clock for the tower of Memorial Hall. This gift will cost \$6,000.

The University of Chicago has been given \$225,000, according to an announcement made by President Harper. The gift is the fulfilment of a pledge made by Mrs. Mary Esther Reynolds nearly five years ago.

President Low of Columbia University announced a few days ago at a meeting of the board of trustees of the University a gift to the institution of twelve lots of land in Brooklyn by Mrs. Elizabeth Mary Ludlow.

The Duc d'Aniane, recently deceased, gave the estate of Chantilly with its book and art treasures, valued at \$8,000,000, to France, notwithstanding he was twice expelled from the country.

The late Lewis Crozer, of Upland, Pa., bequeathed \$250,000 for a public library in Chester, Pa., and \$500,000 additional for a homeopathic hospital, with a home for incurables attached, in the same town.

Hon. H. W. Corbett, of Portland, has given \$10,000 to Pacific University, Forest Grove, Ore., for the endowment fund.

The late Mrs. Mary Johnson, of New York City, bequeathed a large sum to Roman Catholic institutions.

Charles W. Fullerton, of Chicago, has given \$25,000 to the Art Institute of that city for the construction of a lecture hall.

Ex-Mayor Grace, of New York, his wife and son, have jointly set aside \$200,000 to found a training school for girls and young women.

By the will of Rev. Dr. Charles Frederick Hoffman, late rector of All Angels' Protestant Episcopal Church, New York, \$50,000 is left to the endowment fund of St. Stephen's College at Annandale.

At a recent dinner of the alumni association of the New York University the announcement was made of a gift from Henry Morton of a thousand shares of stock of the Texas Pacific Railroad Company toward the erection of a proposed alumni building.

The will of the late William Drury, of Alledo, Ills., has been filed in the Mercer County Court and disposes of property estimated at \$1,000,000. The bulk goes to his wife, Vashti Drury. After her death the estate is to be sold and the proceeds divided into one hundred shares, ninety one of them to be devoted to the founding of an educational institution in Mercer County, Ills.

Mrs. E. B. Coxie has just given \$20,000 to Lehigh University to establish a fund in memory of her husband, Eckley B. Coxie, who was a trustee of the University, the income of which is to be devoted to the support of poor and worthy students.

It is reported that the Catholic University has received a legacy of \$150,000 from the estate of Mr. O'Brien, of New Orleans. The money will be used to endow three chairs, to be selected by the authorities of the University.

Barnard College receives a gift of \$140,000 to be used in erecting a building to be known as Fiske Hall.

The will of the late Prof. E. D. Cope bequeaths the entire estate of \$100,000 to the founding of a professorship of Paleontology in the University of Pennsylvania.

John Nicholson Brown, who has just given \$200,000 to the Providence Public Library Association for a new building, is the eldest son of the late John Carter Brown, who gave to Brown University its new library building and the land upon which it stands. The younger Mr. Brown is thirty three years old, lives in Newport, and is an earnest student of social and political questions.

"At the meeting of the Trustees of Stanford University Mrs. Jane L. Stanford surprised everyone present by announcing that she had made a deed of gift to the University, to take effect at her death, of the fine Stanford mansion on Nob Hill, San Francisco, with all its furnishings, paintings and other art works, the whole valued at \$1,000,000.

The memory of Thomas Hughes, author of "Tom Brown at Rugby," is cherished by so considerable a body of Americans that we suppose there will be no difficulty in securing a very handsome sum in this country to be used in the establishment of a memorial to the creator of "Tom Brown." An American committee, consisting of such distinguished educators as President Eliot of Harvard, Dwight of Yale, and Low of Columbia, has been appointed to act in conjunction with the English committee.

Science of Government.

It is hoped that a department under this name may sometime be established in The American University. There is great need for it. Washington is the place for its habitat and work. The facilities are here. If there are men trained to man such a department, certainly they must be in the Government circles in this city. If they are not, there is the more need for the department, and the putting of scholarly men at work in this field. Good and wise men are thinking along this line, and inquiries already come to us concerning facilities for such study.

We take the liberty of quoting from a letter written by a prominent professor in Political and Social Science:

"It seems to me that in planning your University for the future, you ought to lay especial emphasis upon such subjects as are not likely to be considered adequately in the existing institutions at Washington, or in any possible National University of the future. If a Government University should be established, of course Natural Science would be the main subject to which it would give attention. Politics and Theology would naturally be excluded from the field of any Government-managed university.

"Now, the study of Politics in a scientific way and in a broad way is especially necessary at a center like Washington, and is especially necessary in the United States to-day. Would it not be possible for you to concentrate a large part of your attention upon this field, as one which is inadequately cultivated at present; one for the cultivation of which Washington offers special opportunities, and yet one which the Government would not probably cultivate as assiduously as it deserves to be cultivated, for the reasons which are manifest to a very superficial observer?

"Our State Universities as a rule have found great difficulty in dealing with political and economic questions as they ought to be dealt with, from the simple fact that the people in the community who hold one view, however erroneous it may be, are much opposed to contributing money to the support of antagonistic views, and it is not possible, therefore, to secure the fullest and freest discussions of such matters."

This letter emphasizes the need of such a department as we have named, and that it ought to be located in Washington. The tendency to secularism to-day makes such a department necessary. Secularism would divorce religion and education, religion and government. We believe in the complete divorce of State and Church. We believe religion is an essential quality in man, and that it is necessary, in its purest and highest form, to the best government and the highest education.

A world-wide and thorough study of religion in all its forms, and the faiths of the world, Christian and non-Christian, in their relations to individual culture and to government, would, we are sure, make the nation feel that religion must not be separated from education and government. Non-religious statesmen, and an irreligious people under an unreligious government is certainly not a very high ideal. It is the end, however, of secularism in individual life, in education, and so in government.

What was the effect of Buddhism and Brahmanism; what is the effect of Confucianism and Taoism, of Mohammedanism and Greek Christianity, of Romanism and

Protestantism, of scepticism and materialism on the governments of the world? Such a study would show the vital relation of religion to all forms of civilization and government, as well as to the ideals of individual life. The Christian religion, apart from all sectarian creeds and organizations, covets such a study and test.

University of Paris.

The old University ceased to be by order of Napoleon in 1808, and all institutions of advanced learning were grouped as the University of France. The University of Paris has been reorganized by the French Republic. Dr. Gilman, in the May "*Cosmopolitan*," calls attention to the addresses made at the inauguration last November:

"The addresses delivered on this important epoch in the educational history of France have just reached this country. They are worthy of this great occasion—brief they are, but full of enthusiasm and suggestion. An American turns to them with eagerness, to see the attitude that is taken, at the end of the nineteenth century, in one of the most ancient seats of learning, by the most enlightened men of a most enlightened state.

"The President of the University Council, Monsieur Gréard, the first speaker, after extolling the advantages of uniting in one body all the chairs of superior instruction, glories in the fact that the University of Paris is 'practical.' The 'lecture,' purely theoretical and mental, is now, he says, only a memory. No chair is without its laboratories. Even the faculty of letters has its ateliers. He reminds his hearers that, when the laboratories were introduced, thirty years ago, with their lofty flues, within the precincts of the Sorbonne, people called the school 'des hautes études'—the school of high chimneys! To-day nobody is surprised that the entire establishment is one immense usine or factory, marvelous in its adaptation to the diversity of scientific work. Like the science of nature, the moral sciences have become great schools of truth. None of the interests of society is foreign to them.

"Monsieur Rambaud, Minister of Public Instruction, declared that the concentration in the university of subjects most diverse was intentionally designed to give to all students an opportunity to acquire that general knowledge which makes a truly cultivated man. The modern university does not propose to produce men who know everything, but know it badly; on the other hand, it does not expect to produce physicians who are nothing but physicians; or lawyers, humanists, savants, capable of devotion to merely a single branch of knowledge. That would be to reduce liberal education to education for a trade; and that, too, at a moment when, for those who are destined to trades, France is beginning to organize a system of liberal education.

"In both these discourses, as in that of Monsieur Lavisse, which was addressed particularly to the students, the dominant thought is the unity of knowledge, the value of an ascertained truth, and the importance of scientific methods of inquiry. The practical uses of knowledge are repeatedly emphasized, and the desirable adaptation of universities to the needs of the region in which they are placed receives attention. There is no dread apparent of the utilization of knowledge. On the other hand, the doctrine is emphatically put forth that

specialization must be based on a liberal preparation for higher work, and that inquiry, research, investigation are habits that should be developed by university education. In all this there is nothing new. It is only the restatement, with French clearness, of doctrines familiar to Americans, at a significant moment, when magnificent and well-equipped laboratories are provided, chiefly by the liberality of the City of Paris. However, the perusal of these speeches is not without suggestions as to the state of education in this country." * * * "Monsieur Rambaud congratulates his hearers that 'auditoriums' are no longer demanded but 'seminaries.' In the substitution of one word for another, the history of recent advances is recorded. So Monsieur Lavisse. He says to the students: 'The method of instruction has changed. Your masters are not, so much as they were, orators *ex-cathedra*. We have left our chairs, or if we remain there we speak in lower tones. We affirm less. We demonstrate; we show; we say to our scholars, hear, see, judge.'"

Degrees by Degrees.

As the time for the college commencements approaches there is heard a sound of a going in the tops of the mulberry trees that has reference to the conferring of honorary degrees. No doubt college trustees and faculties are already feeling the pressure of the friends of those who hope to be the recipients of the cherished honors. To the consideration of such college officers, the custodians of these much-sought-after degrees, the following paragraph from *The Christian Advocate* of Nashville is commended: "We hear that the Kentucky school—the Normal something or other—of which we spoke a few weeks ago as selling its degrees, is actually offering to bestow them on the installment plan. The charge for turning an untitled preacher into a Doctor of Divinity is fifteen dollars; for making him a Doctor of Laws, it is twenty-five. Five dollars must be paid down, and five dollars each month thereafter till the entire balance has been canceled. Whether interest is added to deferred payments, we are not prepared to say, but we are informed that liberal commissions are granted to agents. Would it not be well to maintain a due proportion in the whole business by conferring the degrees a letter at a time? The Rev. John Smith, L., would then mean that the clergyman in question had handed over the first five dollars; L.L. would signify that he had sent a second check; and L.L. D. would show that the whole transaction had been closed. Really it is a shame that such things should be tolerated among Christian men."—*N. Y. Christian Advocate*.

Gains and Needs.

President Gilman, in an article referred to above, outlines the gains in education in this country as, first, institutional—"observatories, laboratories, libraries, museums, halls of assembly, lecture rooms, and lodging houses have sprung up as if by magician's touch. Nor are the buildings merely architectural monuments. They generally have an appropriate equipment—the instruments and appliances required for investigation and instruction in the natural and physical sciences, or the latest and best of literary and historic apparatus—

books, journals, memoirs, and the transactions of learned societies."

The second gain is the recognition of the distinction between the disciplinary work of the college and the advanced special culture or training of the university."

The third is the improvement in professional training, and the demand that there shall be a good preliminary education before professional studies are taken up.

The fourth is the increasing tendency to separate business management from the educational work proper. This tendency will grow with the growth of universities.

The needs are a far greater amount of personal supervision of the student; a greater recognition of individuality, so that we shall have more persons at work by themselves, not persons enrolled in classes; a "general" among the "specialists" who will be counsellors of the students; a training of each student to care for his body; a study of the mental characteristics of each student so as to wisely direct his training and help him in the choice of his work for life. Dr. Gilman appends as suggestions to young men choosing a profession:

A PARTIAL LIST OF THE PORTS OF ENTRY FOR WHICH A MAN OF LIBERAL EDUCATION MAY SET SAIL.

1—LITERARY.	{ Scholars. Teachers. Preachers. Lawyers. Editors.	{ Writers. Librarians. School Superintendents. Supervisors of Charities.
	{ Mathematicians.	{ Teachers. Engineers. Architects. Astronomers.
	{ Physicists.	{ Teachers. Mechanics. Electricians.
2—SCIENTIFIC.	{ Chemists.	{ Teachers. Manufacturers. Metallurgists.
	{ Naturalists.	{ Botanists. Zoologists.
	{ Biologists.	{ Physiologists. Anatomists. Pathologists. Physicians. Surgeons.
3—ARTISTIC.	{ Painters. Sculptors. Architects. Decorators. Illustrators. Etchers and Engravers, Musicians.	
4—MERCANTILE.	{ Merchants. Manufacturers. Bankers.	{ Railroad Men. Accountants. Publishers.
5—POLITICAL.	{ Statesmen. Diplomatists. Consuls.	{ National Officers. State Officers. Municipal Officers.

This is a suggestive table as to the practical side of the work of a university. Had it courses of study, thoroughly scholarly, leading to all these professions, it would meet a great want in America to-day.

Book Notices.

[The Editor will be glad to give brief notices of such books as are appropriate to the Courier. Copies of volumes sent for notice will be placed in the University Library.]

Donated to the Library.

REV. WM. T. GILBERT, NEW MILFORD, CONN.—Synopsis Criticorum Aihomique S. Scripture Interpretum, Mattheus Polus, Londini, Anno Dom. MDCLXIX.

Matthew Poole was an eminent English Non-Conformist minister. When ejected from his rectory in 1662 he devoted his pen to the service of religion in general. The result was this work, which was intended to bring into one view whatever had been written by critics of all ages and nations on the books of Holy Scripture. In its day it was a great work, and especially valuable to students who had not access to large libraries but wanted a convenient body of exegetical criticism. Recent research has rendered it to a great extent obsolete, though few will deny that it is a very valuable and useful abridgement. It is in five volumes, 15 by 11 inches, leather backs and paper covers, of about 1,000 pages each. The Latin text is in fine black letter.

REV. THOMAS STEVENSON, NEW YORK EAST CONFERENCE.—The works of that Famous and Worthy Minister of Christ in the Universitie of Cambridge, Mr. William Perkins, London, 1617, Vol. II.

This volume contains "Cases of Conscience," "Epistle to the Galatians," *Man's Imaginations*," "The forged Catholicity of the Romish Religion," "Treatise on Predestination," and "The Arte of Prophecing."

Mr. Perkins was greatly admired as a preacher and appreciated as a scholar and author. Hallam, in his *Literary History of Europe*, referring to Cases of Conscience, says, "the science of morals, according to Moshem, or rather of Casuistry, which Calvin had left in a nude and imperfect state, is confessed to have been first reduced into some kind of form, and explained with some accuracy and precision, by Perkins."

REV. B. F. DELO, CENTRAL PENNSYLVANIA CONFERENCE.—Collection of Sermons, Speeches, and Exhortations at Subscribing the National Covenant of Scotland in 1638, and the Solemn League and Covenant of the Three Kingdoms in 1643. Glasgow, 1741. Schema Sacrum, or a Sacred Scheme of Natural and Revealed Religion, by Thomas Blackwell, Lancaster, 1776.

REV. A. M. WILLIAMS, SAVANNAH, GA.—The Discipline of the Methodist Episcopal Church, published by John Wilson and Daniel Hitt, New York, 1808. Well bound and preserved. Also, "The Discipline of the Methodist Episcopal Church." Title page and date lost. We think it is of the year 1812.

Some time ago we announced the gift of a copy of the Discipline of 1816. We are glad to receive these and feel confident that there are still copies of other dates earlier than these in the possession of persons where they are liable to be lost or destroyed. May they be sent to The American University for preservation?

REV. WM. A. THURSTON. Souvenir History of the East District New England Conference, 1896.

JUDGE W. M. SPRINGER.—The Official Records of the Union and Confederate Navies in the War of the Rebellion, by Lieut. Commander Rush, under direction of the Hon. H. A. Herbert, Secretary of the Navy. Series 1, volume 4. 1896.

MAN WEST, WASHINGTON, D. C.—Wealth and Waste, the Principles of Political Economy in their Application to the Present Problems of Labor, Law, and the Liquor Traffic. A. A. Hopkins, New York, 1895.

REPORT OF THE COMPTROLLER OF THE CITY OF NEW YORK. BIENNIAL REPORT OF THE RAILROAD COMMISSIONER OF the State of California—1895 and 1896.

FATHER A. LACOMBE.—First Reader in the English and Black-foot Languages, Montreal, 1886.

J. F. DRAUGHON. Practical Bookkeeping.

U. S. DEPARTMENT OF AGRICULTURE.—The Carbohydrates of Wheat, Maise, Flour and Bread. Food and Nutrition Investigations in New Jersey. Relative Humidity of Southern New England. Dietary Studies at Maine State College. Notes on Irrigation in Connecticut and New Jersey. Food of the Negro in Alabama. Peach Yellows and Peach Rosette.

U. S. DEPARTMENT OF INTERIOR.—Annual Report of the Secretary—1895.

U. S. DEPARTMENT OF JUSTICE.—Report on Defense of Indian Depredation Claims.

U. S. DEPARTMENT OF TREASURY.—Letter of Secretary transmitting Reports of Agents to the Seal Islands.

SMITHSONIAN INSTITUTION.—A Revision of the Adult Tapeworms of Hares and Rabbits, by Ch. Wardell Stiles, Ph. D.

VARIOUS PAMPHLETS.—El Nuovo Ponte Sul Forth, and other pamphlets by Ing. Rodolfo Buti, Roma, 1896. Semi-Centennial Sermon, Rev. W. Stevenson. Christianity and Science versus Evolution and Infidelity, by Rev. J. G. Evans, D. D. Latin Pagan Side-Lights on Judaism, by Edwin Post, Ph. D. The Religion of a Nation, by Rev. Alexander Mackey-Smith, D. D. Rightly Dividing the Word of Truth, by Rev. T. M. Eary. Cokeburg College, etc., Rev. Leonard Cassell. Some of the Moral and Physical Effects of the Game of Foot-Ball. Christian Education and the Gospel in Foreign Lands. Should we Treat Pulmonary Tuberculosis as a Contagious or as a Communicable Disease, by S. A. Knoff, M. D. Boston University Law School,

E. H. BENNETT, DEAN.

New Hall, Ashburton Place,

Opens October 7. BOSTON, MASS.

TEACHERS WANTED!

We have over four thousand vacancies for teachers each season—several times as many vacancies as members. We must have more members. Several plans: two plans give free registration; one plan GUARANTEES a satisfactory position for the coming Fall. Ten cents, silver or stamps, (the regular price is twenty-five cents) pays for a 100 page book, explaining the different plans, and containing a complete \$500.00 Prize Story, a true and charming love story of College days. No charge to employers for recommending teachers.

Address REV. DR. O. M. SUTTON, A. M.,
President and Manager, Southern Teachers' Bureau,
LOUISVILLE, KY.

5% Nickel Steel TUBING

ONLY IN 1897

Columbia Bicycles

STANDARD OF THE WORLD

No other bicycles are made of 5 per cent. Nickel Steel Tubing. Only Columbias. We control the entire production of this tubing and use it exclusively in Columbia bicycles. They are the strongest bicycles in the World—the Standard by which all others are judged.

\$100 TO ALL ALIKE.

POPE MFG. CO., Hartford, Conn.

Greatest Bicycle Factory in the World. Floor Space, 17 1/2-100 Acres.

Branch House or dealer in almost every city and town. If Columbias are not properly represented in your vicinity, let us know.

You should know about bicycles. Send for the handsomest Catalogue ever issued. Free if you call at any Columbia dealer; by mail for one 2-cent stamp.

John F. Waggaman,
Real Estate Investments,
700 14th Street N. W.
Washington, D. C.

I am agent for the beautiful suburban property known as Wesley Heights, situated opposite the site of the American University. This property has a great future, not only because the University is to be built opposite, but on account of its desirability as a resident part of the District of Columbia. I am also agent for lots in Morris' Addition to N. E. Washington, which presents a good field for investment for small amounts. All this property is laid out in conformity with the general plan of the city of Washington and is entitled to the city improvements. In addition, Washington, being the Capital of the Nation, is free from strikes and conditions that exist in manufacturing cities. I will make investments on first mortgages, secured on real estate, interest at 6 per cent. We will also purchase for you improved property that will pay between 6 and 7 per cent., after paying taxes and insurance. Now is the time to invest from \$250 to \$100,000. For further particulars write to above address.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

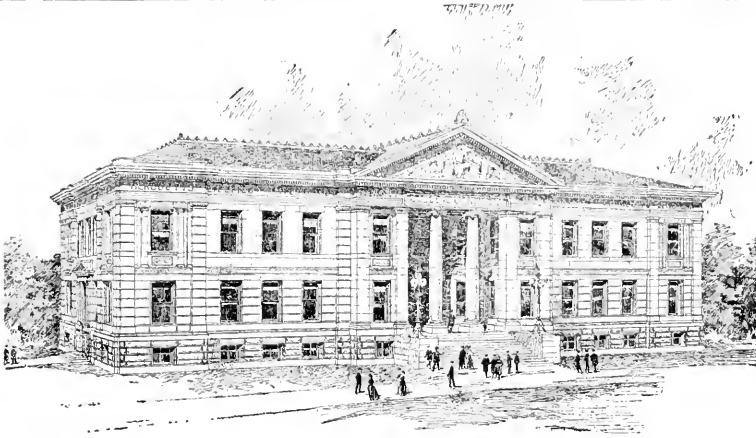

VOL. VI.

WASHINGTON, D. C., SEPTEMBER, 1897.

No. 1.

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

College of History.

A special reference to the need of this building was made in the *COURIER* in September, 1894, and was emphasized in the December number. On January 16, 1895, the Trustees resolved that building should begin, and subscribed \$33,500 on condition that \$150,000 be subscribed by May 15. This condition was met by the Chancellor and Vice-Chancellor assuming a comparatively small balance. On June 6, 1895, a Building Committee was appointed. On October 16 plans were received in competition by six different architects, but no one of them was fully satisfactory. Van Brunt and Howe were associated with W. M. Poindexter as architects, in December, 1895, and the final plan of the building soon after determined upon. Ground was broken amid sunshine, hope, and enthusiasm, on March 9, 1896. In June, 1896, after competitive bidding, the contract was let to Mr. James L. Parsons for \$158,600, and building was begun at once. On October 21, 1896, the cornerstone was laid with a memorable program.

The building is now enclosed, the marble work all done, roof on and windows in. The plastering

is well under way, and it is thought the work will be done by December of this year.

The above cut can not do justice to the noble structure. Its appearance will be greatly improved when the grading is done and the adjacent avenue brought to the level fixed by the District Commissioners. Its clear white walls are visible for long distances. It stands on a plateau from which the ground descends in all directions, and breezes constantly sweep through its halls and corridors. This keeps it cool inside the building on the hottest days, an important feature in this climate. The view from the roof is magnificent. A great circle of hills and mountains shuts in a landscape of great beauty.

The view to the northwest commands a panorama of the Blue Ridge mountains, forty miles away, while on the city side can be seen the Washington Monument, Capitol, and new Congressional Library. Away beyond stretches the Potomac River to Alexandria, and the Manassas plains suggest strife that this enterprise will help to make impossible in the future.

Funds are still needed for finishing up, for grading, and for equipment. Will you put something into this first building?

Educational Notes.

Cambridge University, England, May 21, by a vote of 1713 to 692, rejected the proposal to confer degrees upon women.

The first Christian school was established by Pantenus in 181.

Maps were invented by Anaximander, a Greek, about B. C. 568.

Schools at Oxford were established by Alfred the Great about 879.

The first modern medical school was at Salerno in the eighth century.

Collegiate degrees were first conferred by the University of Paris in 1149.

The charter of Oxford University was granted by Henry III. in 1248.

The oldest German university is that of Heidelberg, founded in 1386.

Eton College, in England, was founded by Henry VI., about 1443.

The famous Rugby School was founded by Lawrence Sheriff in 1567.

The great School at Harrow, in England, was founded by John Lyon in 1571.

The first work on geology was written by Mercati in 1574.

The first professorship of history was established at Oxford in 1724.

The first medical school in the United States was founded in Philadelphia in 1764.

The first academy for the deaf and dumb was opened in Edinburgh in 1773.

The first normal school was opened in Paris in 1795.

Schools of forestry were established in Austria in 1810.

Infant schools were first established about the year 1815.

The first normal college for the blind was founded in 1873.

France had, in 1887, 85,554 schools, 135,800 teachers, and 308,000 students.

Italy, in 1887, had 70,507 schools, 86,400 teachers, and 3,071,000 attendance.

Russia, in 1889, had 43,100 schools and 2,510,000 attendance.

Italy has 21 universities, with 600 professors and 6,000 students.

There are 369,634 teachers in the United States.

This country has 52 law schools, with 345 teachers and 3,905 students.

The United States has 115 medical schools—regular, eclectic, and homeopathic.

Great Britain has 11 universities, with 344 professors and 13,400 students.

The Georgia State University will not admit women, notwithstanding the Chancellor's recommendation, unless the State legislature so orders. Thus the trustees have voted.

Professors in Princeton University are under fire for signing a petition for a license for Princeton Inn, not owned by the university, but by some wealthy alumni. Will they plead the right to liberty of thought and action?

Dr. John Freyre, professor of Oriental languages and literature of the University of California, has returned from China, where he has been in consultation with high government officials about the founding of a great university at Shanghai for the education of Chinese in Western art, sciences, and literature. It is intended to be an educational center where the favored youth of the empire may go to gain knowledge of the Occidental civilization.

The famous Yerkes lens, the largest in the world, has been placed at the observatory at Geneva Lake, Wis. The lens was made by Alvan G. Clark. It is stated that the taking up of telescope-making by the father of Mr. Clark was the result of an accident. When George Bassett Clark, a brother of the late Alvan G. Clark, was a student at Phillip's Academy, Andover, he gathered up the cast away fragments of a broken bell, and taking them home melted them with some tin in a crucible

in the kitchen fire. His mother smiled at his statement that he was going to make a telescope, but his father became interested in the matter, and laying aside his paints (for he was an artist) he gave his time and genius to the work, and together they fashioned a 5 inch reflecting telescope. This was the beginning from which have emanated in gradual succession the famous reflecting telescopes of Vienna University, 12-inch aperture; Northwestern University, 12½ inch; Lick Observatory of California, 36 inch; and finally the lens to the Yerkes telescope of 40-inch aperture. The first official sight through the great lens was made by President Harper of Chicago University, Friday night, May 21. The lens, so far as can be determined by this casual test, more than fulfills any expectations which have been entertained concerning it.

In connection with, and as a sort of annex to, the Catholic University of America at Washington, a woman's college "of the same grade as Vassar," to be known as Trinity College, is to be established under the direction and control of the sisters of Notre Dame, whose mother-house is in Namur, Belgium, and who are devoted exclusively to teaching.

Ninety-three graduates of Harvard College have proceeded to the degree of Bachelor of Laws in Boston University. One student who already held the doctorate in law from the University of Leipsic, Germany, and another holding the same honor from the University of Heidelberg, have subsequently completed their studies in Boston and taken the baccalaureate degree there.

There has been great recent indignation in England over the fact that an institution known as the "National University of Chicago" has been selling degrees for \$5.00 each. No wonder. Now it transpires that a fraudulent London concern, calling itself the "London Society of Science," is selling bogus degrees to Americans for about the same price. The degree of "M. A.," with a hood and gown thrown in, may be obtained for a song by anyone who applies, and it is announced that a number of people in this country are wearing the bogus title. What an exhibition of the vanity of humanity! And what a story it tells of the falsehood some people are willing to act to gratify their longing for an empty honor!

It is a remarkable fact, that of five law graduates of Boston University residing in the Hawaiian Islands, one is now a judge in the highest court, another is the Minister of Foreign Affairs, a third is the Deputy Attorney General of the Republic, and a fourth its Chief Marshal. It is possible that the desire of these "fellows" of the university to be joined to the "Hub" has something to do with the annexation of Hawaii.

Brown University and President Andrews are being well advertised. It may not help either one. We do not believe all the *Spectator* says, as quoted in another column. There is no conspiracy on the part of capitalists. Our millionaires are sometimes benevolent. There are bounds even to freedom of thought.

The largest educational institution in the world is supported by Lord Rothschild in one of the worst quarters of London. In it are gathered 3,500 Jewish children, with 100 teachers.

The new library at Washington has about 44 miles of shelving in the portion that is already finished, which will accommodate over 2,000,000 volumes, while the ultimate capacity of the building for books will be upward of 4,500,000 volumes, or nearly 100 miles of shelving.

An Hungarian professor, who was referred to as an old man in an encyclopedia dated 1857, died a few weeks ago at Klausenburg, having celebrated his one hundredth birthday on June 15. He was a member of the Hungarian Academy of Sciences, and was noted for the great variety of topics on which he had written—botany, mathematics, literature, music, banking, etc. He was eccentric in his habits, an I so thin and spectral in appearance that one day he was hunted down in the mountains by a band of peasants, in the belief that he was a ghost.

Out of four hundred young men graduated at Harvard this year, it is said that not one of them will study theology.

The following are said to be the six wealthiest women in the world: Senora Isidora Cousino, \$200,000,000; Hetty Green, \$50,000,000; Baroness Burdett Coutts, \$20,000,000; Mme. Barrios, \$15,000,000; Miss Mary Garrett, \$10,000,000; Mrs. Woleska, \$10,000,000.

Gifts.

Eleven volumes for the Library mentioned in the COURIER last February should have been credited to Rev. J. A. Oaks, Hurfville, N. J.

Thanks are due Rev. F. J. Bate, Rev. George C. Wilding, Rev. J. E. McCracken, Rev. Charles Sheard, Judge W. M. Springer, Mrs. J. L. Stratton and others for books elsewhere described.

Rev. William Kepler, of the North Ohio Conference, for some time Professor of Natural Science in Berea University, Ohio, has had a passion for geological exploration that has burned for years. It has been his delight to find recreation from ministerial work in searching for geological specimens. He has collected many of these and has recently disposed of one to Oxford University, England. Dr. E. Ray, Lancaster, was highly pleased with it.

Dr. Kepler has sent two boxes of fossil fish, collected by him in Northern Ohio, to the museum of The American University. We need not say they are very highly appreciated. When placed in the museum a detailed description will be given.

Rev. Lewis R. Dunn, D. D., of East Orange, N. J., has given his excellent library of about 1,000 volumes to The American University. His good works will follow him.

Mrs. Dr. Harman, of Baltimore, is now arranging to transfer to The American University the library of her late husband, Prof. Henry M. Harman of Dickinson College. We have not received a list in time to give it in this issue, but are sure it will be valuable. What a strong man Prof. Harman was, so full of information and so genial! One of the happy weeks of the writer's life was spent as a fellow guest with him at a session of the New York East Conference.

Mr. Jason Moore, of Brooklyn, N. Y., always full of good humor and good deeds, has recently sent \$100 to the University. We wish there were a thousand like him.

Bequests.

Rev. W. A. Davidson, D. D., of the East Ohio Conference, left \$300 in his will for The American University. It is thought the special inspiration of this gift came from an address delivered by the Rev. C. W. Baldwin. But Brother Davidson needed little inspiration to good deeds. For forty-three

years he did faithful service in the Methodist ministry, and gave himself and about all he ever had to the cause of his Master. The \$300 was paid on May 25 by his son, Rev. W. L. Davidson, D. D. Did all Christians give in life and in death as this good man did, good causes would not lag for lack of funds.

Miss Sarah A. K. Osborn, of Ocean Grove, bequeathed \$100 to The American University. She was the daughter of Rev. Elbert Osborn, of the New York Conference, one of the good men who for nearly fifty years toiled in hard and stony fields. The daughter shared in this itinerant life. She also taught in Five Points Mission, New York, and cared for her aged parents in their declining years. She had small means, but her heart was in the great cause of Christian education, and "she did what she could." Here is an example worthy of emulation. Every year there ought to be a million dollars left in wills for the cause of education by Methodists alone. Have you given one-tenth in life, or is there a good margin due the Lord before you meet Him? The \$100 was paid on June 4 by Rev. S. B. Darnell, the executor.

Miss Dora B. Pike, of Lowell, Mass., left all her property, save a few minor sums to relatives, who we understand are in good financial condition, to The American University, after the decease of a faithful friend and companion. She has also named Bishop John F. Hurst executor. Miss Pike was somewhat peculiar, perhaps. Such, it is said, the Lord's people are to be. We only wish there were a thousand people peculiar enough to make such wills in behalf of the University. It might make it hard for Bishop Hurst to attend to them all amid his Episcopal duties. But we think he is versatile enough to manage it. Try him!

Asbury Memorial Hall.

The following payments have been received from the subscriptions toward the erection of this building:

\$100—J. S. Breckinridge, A. S. Hank (Mary E. Hank), A. B. Leonard, Cearing Peters, W. R. Picken. **\$75**—W. H. Wardell. **\$60**—John Wilson. **\$50**—A. H. Ames, Frank L. Wilson. **\$33.34**—J. C. Jackson (W. R. Esher). **\$25**—Class of first year in 1894 Northwest Indiana Conference (H. C. Weston, \$10; Charles Jakes, \$5; J. E. McCloud, \$5; H. C. Riley, \$5); D. S. Colt, G. H. Humason, O. C. Murriott, W. W. Washburn, C. S. Wing. **\$15**—M. E. Ketcham, G. L. Tutts. **\$10**—J. R. Colley, J. T. Hamilton, W. A. Koontz, George Morris, W. M. Osborn, I. J. Breeser, J. D. Stevick, R. H. M. Weech, Eugene Yager. **\$5**—S. W. Horner. **\$3.35**—S. K. McConnell. **\$2.60**—E. L. Eslinger.

Proof Sheets of Wesley's Notes.

"John Wesley's Notes on the New Testament" is one of the standards of doctrine among Methodists. Everything touching the book is of interest. The proof sheets of this work, substantially bound, have been presented to the American University by the Rev. Frederick J. Bate, of Dollar Bay, Michigan. It is a generous thing in him to put this very interesting relic where it will be sure of preservation, and where it will be accessible to scholars.

The history of the proof sheets is not fully known. It has long been a family heirloom, and was in possession of the late Rev. George Osborn Bate, of the Wesleyan Conference, England. There can be no doubt of its being just what it claims to be. It speaks for itself. While much of the mechanical detail is corrected by someone else, there are a number of corrections in John Wesley's own hand. It is well known that Wesley, in the changes he made in the text of the New Testament, anticipated the Revised Version at many points, and in some cases the Revisers might well have followed him where they did not. We only call attention to some of the changes made in the text as he read the proof. Most changes were made in the copy.

In Matthew he changes "thieves" to "robbers," as being crucified with our Lord. In Matthew 6-22, "light" is changed to "lamp." In the parable of the "tares," he strikes out "tares" and puts in "darnel." The Revisers put darnel in the margin. The "tare" is the *Lycia Sativa*, which is widely cultivated in Europe as a forage plant. The "darnel" is the *Lolium temulentum*, a pest of the wheat fields. Wesley, probably, as the Revisers, hesitated to the last to make this taring change, but truth compelled it.

A very interesting incident of more probable hesitation in the mind of Mr. Wesley occurs in the proof of Acts 2: 27 and 31. "Thou wilt not leave my soul in hell," had been changed so as to read, "in the unseen world." But this does not suit him, so he changes both text and note, the latter probably a second time, and leaves us to read "in Hades," with the explanatory note, "the invisible world," "soul in its separate state." "It does not appear that ever our Lord went to hell," "but to Paradise." Mr. Wesley is consistent in adhering to this use of Hades in Cor. 15: 55, though it would sound strange to shout in our burial service, "O Hades, where is thy victory?"

He seems to have had less trouble with doctrine than with the text. He hints at his preference as to mode of baptism, possibly, when he changes his text so it reads that John baptized "at," instead of "in Jordan." He shows a little leaning to Sacramentarianism when he changes the note on Acts 22: 16, from "Baptism * * * a Means and a Seal of Pardon," to "The Means and The

Seal of Pardon," adding, to the typesetter, "Put a great letter 'T.'"

In one place he strengthens his language concerning the depravity of human nature, that "We are by nature at a distance from God, alienated from him." In his note on Luke 10-22, he makes a strong addition concerning the deity of Christ—"essentially one with the Father." His mind is evidently on the Person of Christ, as on John 3: 13 he insists on the Omnipresence of Christ, and adds: "This is a plain instance of what is usually termed the communication of properties between the divine and human natures, whereby what is proper to the divine nature is spoken concerning the human, and what is proper to the human is spoken of the divine."

We might give more instances. Here is a mine for some digger in the days to come.

The Growth of Historical Study.

HAMILTON W. MADR, in *Current Literature*, New York, May. Condensed for *Public Opinion*.

Those who have the literary interests of the country at heart may find good cause for encouragement in the extraordinary growth of the historical feeling in this country during the past twenty years, and in the increasing activity of students and writers in the field of American history. Of the older group of historians, only one devoted his life exclusively to the study of our own early history. Bancroft alone among his contemporaries of the first rank found his field at his own door and worked it with life-long fidelity. Parkman belongs to a later generation, although for so long a time contemporaneous with Bancroft; and it is one of our undischarged obligations to this long-suffering and fascinating writer that he first made Americans aware of the rich material within reach not only of their historians but of their novelists. The contact of the Spanish and the French with this continent was destined to be casual and temporary so far as political institutions and control were concerned, but it left everywhere a deposit of sentiment, feeling, and romantic episode which makes rich soil for later writers of imagination. The recent historical movement is significant in its extent, its direction, its hints of possible literary uses, and in the deepening and widening response of popular interest which it is evoking. Mr. Fiske was one of its leaders in point of time, and remains one of its foremost figures. Probably no man has done so much to put a living sense of their past into the minds of Americans.

That the universities and colleges have had much to do with the widespread activity in historical study is beyond question. Twenty years ago history was taught, as a rule, in the most perfunctory fashion; the text book was in possession of the field; the student learned his stint, heard a few lectures, and that was the end of the matter. To-day, under direction and guidance, the student deals with the sources and authorities as directly as his instructor. The recent historians have visibly widened the popular no less than the professional conception of historical writing; they have made it inclusive of those more elusive but penetrating ideas and influences in which the secret of national character and spirit lies. There is, in consequence, a large and increasing number of well-trained scholars and writers in America, who are making faithful and searching investigations in many sections, and who are rapidly bringing the events of our national life into real order. Further than this, the public interest has deepened and widened with the increasing activity of students and writers. Historical societies have sprung up in all parts of the country. Historical places, houses, localities, and objects of every kind are being marked, cared for, and cherished as never before. Private students are everywhere digging into the soil about them, and there is reason to hope not only that true civic pride is being developed, but that significant material may be brought to light. The reports of the public libraries show a demand for historical books, which is not only unprecedented in extent but which seems to evidence serious and systematic study on the part of a rapidly increasing number of men and women.

De Peyster Sanatorium for Consumptives, Millbrook, N. Y.

The De Peyster Sanatorium for Consumptives.

By SAMUEL L. BEILER, Ph.D., Vice Chancellor of The American University.

This institution is located at Millbrook, Dutchess County, N. Y. It is 75 miles from New York city. A few miles from the railway station, on a hill 1,100 feet above the sea, in the midst of a pine grove, with a fine outlook over the valleys and lower hills to the south, stands the substantial building. It is of brick, two stories high, with deep basement, and well finished throughout. A large, wide veranda, with glass inclosure when needed, runs the whole 240 feet of the south side, and across the 50 feet of the east end. It is planned so that each patient shall have a separate room, and about forty patients can be cared for. An effort was made to secure perfect sanitary conditions. The generous donor, whose name the institution bears, lost a beautiful daughter through consumption's dread power, and was resolved to help those who might be suffering from this scourge of the human race. He built this institution, and gave it to The American University. The Trustees felt that the property must be held and used for its sacred purpose and, not being in a position to use it at present, have leased it to the Methodist Episcopal Deaconess Society, of which Mrs. Lucy Rider Meyer, of Chicago, is the active representative. The work of this society and of Mrs. Meyer is well-known, and gives assurance that this sanatorium will be made a success and a blessing to hundreds of suffering ones.

The sanatorium will be under the immediate care of deaconesses who have consecrated their lives to this work, and have been specially trained for it in the excellent training school in Chicago. A physi-

cian, who is a specialist, will also be associated with them, and it is expected that in time to come there may be here an investigating station of The American University.

Already there is a goodly tract of ground surrounding the building, and arrangements are made for the purchase of an adjoining farm in the near future. We understand that it is not the expectation of the lessees to make this an expensive institution to those who seek its benefit, but to so conduct it that any of the multitude in New York and vicinity who are suffering from pulmonary affections may be able to find entrance to its doors. It is said that 5,000 people are dying annually in New York of consumption. It is believed that many of those who in the near future may swell this number can be helped back to health and years of comfortable and useful life, by the change of air, carefully arranged diet, wisely planned exercise, and simple medical treatment, which will be given in this new institution.

It is now open to patients, with Miss L. M. Overfield, a regular trained nurse, in charge, and we commend it to all who need its help, and also to the prayers and benefactions of Christian people. It will be a Christian institution—I might have better said, a Christian home to the weak and weary ones who enter it. A cheerful piety, that stimulates hope and nurtures health, will be maintained.

—*The Christian Advocate.*

Peate Telescope Reflector.

We clip the following interesting personal from the *Pittsburg Leader*:

"To-day, July 15th, the Rev. John Peate, D. D., of Greenville, Pa., will notify the trustees and

deans of the Faculty of The American University, at Washington, D. C., that the largest reflecting telescope glass in the world has received the last delicate touch, and is now ready to be silvered and mounted for astronomical use. The glass is sixty-two inches in diameter and five and three-eighths inches thick, and, when mounted, will be the most powerful reflecting telescope in the world. Doctor Peate has worked only about 750 hours on the glass in the two years in which he agreed to do the work, and it has been, to all practical purposes, finished for the past three months. The remarkably short time in which he made the glass is due to his inventive genius, which enabled him to devise time-saving instruments for grinding and polishing, hitherto unknown. * * * It will probably not be removed from the workshop until the University has arranged for mounting it. So it may remain there a year or so more."

While all the above is practically true, except the last paragraph, it hardly tells the whole story. There was much to do that was done by Dr. Peate beside the 750 hours of rubbing or polishing. Dr. Peate made all the arrangements for casting the glass, visiting Butler, and making valuable suggestions as to methods and means. He built a shop especially for this work, and fitted it up with such machinery that a small engine did the rough grinding. He not only "devised," but made with his own skilled hands most of the "time-saving instruments." Dr. Peate, with his usual modesty, writes that he does not claim that it is "*perfect*," for "nothing human is perfect," but he thinks it a good glass, that will do good work if properly mounted and handled. It would be a noble act for some friend of the University now to provide the funds for the mounting and building the observatory. It ought to be done under Dr. Peate's direction. It will take some time to develop the plans, erect the structure, and get ready for work. The University has a better place for it than the National Observatory occupies. Who will do this? We hope the glass will be at the University before January 1st, 1898.

Comparative Politics.

Senator Hoar, at the opening of the Summer School of Clark University, made a plea for a school that would be covered by something like the above title. It should give training in international law, methods of diplomacy, mechanism of government, the method of enacting laws, and many closely allied topics. The *Nation* of July 29 has some sport with the Senator and his scheme. It makes Congress out to be such a school. Gorman, Pratt, Quay, and Jones are the professors.

But, really, is not that the great trouble with our Government? Politicians, and not trained states-

men, are conducting our affairs. Senator Hoar knows whereof he speaks. His whole address is a plea for the early establishment of what is planned for in The American University under the College of the Science of Government.

The Johnstown Board of Trade has quite recently passed resolutions calling for a Consular Service Training School, and the idea is approved by the *Philadelphia Press* and *Times*. Every appointee to the consular service is called to Washington for special instruction. The trouble now is, the time of instruction is brief, the training is superficial, and the returns in practical service are not what they ought to be. If Congress could be made to see the need of training for these positions, and require that appointees should stay in Washington long enough to fit themselves for their duties, such training could be found in a College of the Science of Government.

Other countries have, in some sense, such schools, and Senator Hoar does well to emphasize the need in this country, despite the *Nation's* sarcasm.

A Risky Act of Generosity.

Lehigh University, at Bethlehem, Pa., founded by the beneficence of the late Asa Packer, has been tided over a financial crisis by an appropriation of \$150,000 for current expenses for the next two years from the State treasury. The endowment of the institution is chiefly founded in stocks and bonds of the Lehigh Valley Railroad Company, of which Mr. Packer was the president and leading spirit for many years. That corporation, and the coal interests connected with it, have been prostrated in recent years by the financial stringency through which the country has passed, and the University, in consequence, has been threatened with collapse. The institution is so identified with the railroad and mining interests of Pennsylvania, by its location, its history, and its engineering departments, as to justify the appeal to the legislature which its friends made, and the response which that body has rendered. It is hoped that inside of two years the finances of the University will be recouped. The precedent, however, which this appropriation makes is a risky one. Lehigh University is neither a State institution, nor is it on the other hand a denominational college, although in fact it is allied very closely in all respects with the Protestant Episcopal Church. Its relations to the State are somewhat akin to the ties which bind Johns Hopkins University to Maryland and the city of Baltimore. The work done for Lehigh University will doubtless prompt other institutions, however, to apply for State aid in their emergencies. It is to be hoped that no other precedent of the sort established by this special appropriation will ever be made in Pennsylvania, or in any other State.—*Central Christian Advocate*.

Gifts and Bequests.

Now that better times are here we shall expect The American University to lead this column in the near future.

Canovas' fine collection of 30,000 books was bequeathed to the National Library.

The entire collection of the late Cyrus W. Field's papers relating to the laying of the first Atlantic cable has now become the property of the National Museum in Washington.

Mr. Daniel McIntire, of Portsmouth, N. H., a prominent Methodist, has presented Claflin University, Orangeburg, S. C., with a fine piano in memory of his deceased daughters.

Gen. G. W. C. Lee, the retiring president of Washington and Lee University, has presented the institution with portraits of General Washington and General Lafayette, both of which were once the property of Washington at Mount Vernon.

Lawrence University receives a bequest of \$25,000 from the late Mr. Robert McMillan, of Oshkosh.

Harvard University receives \$30,000 from the estate of the late A. W. Thayer, of South Natick, Mass.

Mrs. Caroline M. Pettibone, of Wyoming, Pa., has donated \$50,000 to Wyoming Seminary for a gymnasium. The plans are now being prepared, and it is expected that ground will be broken for the building by September 1. Mrs. Pettibone has been a strong financial supporter of the school for many years.

Miss Helen M. Gould, who has been spending several days at Chautauque, has made a donation of \$5,000 to the proposed memorial temple, the Hall of the Christ, about to be erected there.

Northwestern University of Evanston has received \$128,000 from the Daniel B. Fayerweather estate of New York. It is the first one of nineteen colleges to receive money under provisions of a will that has been in litigation since 1891.

Mrs. W. F. Cochran, of Yonkers, N. Y., has presented to the Y. M. C. A. of the Sheffield Scientific School, Yale University, a house and lot on College Street, for which \$10,000 was paid. The building will be opened by the association next autumn.

Bishop and Mrs. Warren have recently made a new gift of \$25,000 to the University of Denver.

Washington Corrington, of Peoria, Ill., provides for the establishment of a university at that place, endowing it with \$1,000,000 in his will.

Rev. John G. Paton, D. D., has presented to the Victorian General Assembly \$60,000, the proceeds of the sale of his well-known book, "Life in the Hebrides."

The climax of the semi-centennial services of Beloit College was a \$30,000 speech made by Dr. D. K. Pearsons. The applause was great.

Mr. H. J. Heinze, of Pittsburg, Pa., gives \$ 0,000 more to Kansas City University.

Drew Theological Seminary's endowment now amounts to \$375,000, ten thousand collars having been received from two unannounced donors.

Thomas Stanford, who has made a great fortune in Australia, is a brother of the late Leland Stanford, the California millionaire. Thomas Stanford has given \$300,000 to build a library for the university founded by his brother, and has given notice that he will make other liberal gifts to the institution.

Mr. John I. Blair, of Blairtown, N. J., who reached the age of ninety-five on the twenty-second of last month, is one of the most benevolent members of the Presbyterian Church. He founded Blair Presbyterian Academy at Blair's own, giving to it \$600,000 in property and endowment, gave \$90,000 each to Princeton and Lafayette, rebuilt Grinnell College, Iowa, after it had been blown down by a tornado, and has helped many other educational institutions.

The will of the late John B. Curtis, of Deering, Me., bequeaths a fortune of \$2,000,000 to various charities.

John D. Archbold, president of the board of trustees of Syracuse University, has subscribed \$16,000 to help pay off that university's deficiency.

Mrs. J. W. Taoby, of Chicago, has given \$5,000 to St. Mary's Academy at Notre Dame, Ind., to found a scholarship.

The will of the late Edmond de Goncourt, of Paris, provides for the founding of De Goncourt Academy, a school designed to aid young men of talent.

Under the will of Mrs. A. J. McDaniel, of Hookinsville, Ky., the Cumberland University, of Lebanon, Tenn., receives \$20,000 in trust for the benefit of the theological department.

James C. Carter, of New York, has contributed \$5,000 to Randolph Tucker Memorial Hall to be erected at Washington and Lee University, Lexington, Va.

At the commencement at Hope College, Holland, Mich., President G. J. Knollen announced that on his recent trip east he had succeeded in raising \$100,000 for the college in cash donations. One gentleman contributed \$50,000, another \$20,000, and Helen M. Gould \$1,000.

Mr. John D. Rocketteller has offered to give to the Des Moines Baptist College, which is affiliated with the University of Chicago, three dollars for every one dollar that is raised for the institution from other sources. The college hopes to get \$50,000 as the result of this offer.

At the commencement of Wesleyan University, Middletown, Conn., Mr. J. E. Andrus, of Yonkers, directed Physical Director Marvel to study all the best athletic fields in the east and plan for the university the best one that could be made, and stated that he (Mr. Andrus) would see that the bills were paid.

The will of Dr. George R. Edwards, who died recently, leaves \$50,000 to Princeton University for the endowment of a chair in American history, \$25,000 to the Ivy Club of Princeton, and \$2,500 to the trustees of Princeton University, to be applied to whatever purposes the class of 1889 may decide.

Robert Hayward, of Fairfield, Ills., has founded a professorship in Ohio Wesleyan University by a gift to that institution of \$37,000.

By the will of Miss Edith Letch, Boston, the Lawrence Scientific School, Cambridge, is to receive \$5,000.

Dr. E. H. Stokes, of Ocean Grove, among other bequests left \$1,000 to Drew Theological Seminary, and \$1,000 to Dickinson College.

Charles Crump leaves \$25,000 at the death of his wife to the Illinois Wesleyan University.

Edward Cooper, the heir of Julia Cooper, has again performed an act of honor that reflects the fine saying, *noblesse oblige*. By voluntarily observing a pencil mark on the margin of his sister's will, a memorandum having no legal force, a gift to the Adirondack Sanitarium for Consumptives, originally \$25,000, is made \$30,000. In precisely the same way Julia Cooper's original legacy to Cooper Union of \$100,000 was doubled. The honor of this heir is only equalled by his modesty, but in an era that is called materialistic and selfish, it is a bright and shining example.

State Universities.

The worst feature of State universities is their dependence upon the will of the legislative majorities. There is probably nothing for which the modern lawmaker is worse fitted than the construction of an educational course or the selection of instructors, and yet questions of this sort are always liable to be raised in the State house. The Texas legislature last week spent hours in discussing the university of that commonwealth, a controversy having been precipitated by the charge that the professor of political economy was teaching "Northern ideas," regarding the struggle which ended in the civil war. The University of Washington, which was just gaining a respectable footing, has been utterly demoralized by the triumph of Populism last Fall. The Portland *Oregonian* draws this melancholy picture of its present situation. "Deprived of the head to whom all its late and slow growth was due, made the spoil of patronage-traders and the refuge of place-seekers, defiled with nepotism by the Governor, whose chief charge it should be, and delivered bound and helpless to be stripped and torn and devoured by a flock of vulgar and greedy barpies forced into the board of regents, it has lost all standing as a place of learning and become the dirty nest of a brood of worthless sneerers." The outlook is only less gloomy, according to the same authority, in Oregon, where the university "has had to fight for its very life against drowning in the dirty pool of State and local politics, and the outcome of the struggle is still in doubt." In Missouri and West Virginia, also, political bigotry is disorganizing the State educational institutions.—*The Nation*.

Religion or Secularism.

REV. SAMUEL L. BELLER, PH. D.

Prof. J. R. Seeley, in his interesting work on "Natural Religion," says to us, on page 111, "The practical question of the present day is how to defend the very principle of religion against naked secularity."

Secularism is "the ignoring or exclusion of religious duties, instruction, or considerations." Secularists "reject or ignore the forms of religious faith and worship, and maintain that public education and other matters of civil policy should be conducted without the introduction of the religious element."

That secularism is growing in the United States scarcely needs the saying. While the Church is making progress, and religion is on the increase, our rapidly enlarging population gives room for the growth of secularism also. The increasing number who neglect the forms of worship, who pay no attention to religious instruction, and give little, if any, heed to religious considerations, is very manifest.

Secularists are not organized under this name to oppose religion. If they were thus localized and focalized, their influence would be easier to meet and defeat. But secularism is in the air. Its germs are floating through all society. They are taken into the mental and religious life in unconscious ways, and often work their deadly mission before the object of their attack is aware of the trouble. The Sabbath is gradually secularized. Reading becomes almost entirely secular. Forms of worship are on many excuses neglected. The religious and spiritual become less interesting. They lose their apparent reality. The material becomes more engrossing. Success along material lines seems independent of the religious. The secular man seems to succeed in winning the world's prizes of wealth, comfort, position, power. Religion only has to do with another world, and that world is very uncertain to such a man. So men drift into a secular mood.

Indeed, religion often seems to such to be a hindrance to success. It is a constant spur to morality. It requires honesty. It would curb the selfishness that amasses wealth. It seems to take from the time needful to gain knowledge in this rapid-moving age. It makes conscience too tender for the tricks and trimming of the politician. So the motto is at last intelligently adopted, "Let religion alone." Divorce it from education. Separate it from business. Banish it from politics. Be a secularist.

It is not my purpose in this article to argue against this secularism in general. It would be easy to show that the history of humanity proves the necessity of religion. By religion we do not mean a narrow and cramped denominationalism.

We do mean a living and conscious relation with the religious, the spiritual. Civilization can only live by religion. We, if we are to live at all, must live by religion. "Every high thought and liberal sentiment, though now appearing as if divorced from religion, is but a fragment which once had its place in the fabric of some religion." Religion is the life of the world's hopefulness. Throttle the religious in man's nature and pessimism lifts its head. Blight the religious nature of man and morality loses its inspiration and authority. Sweep immortality from view, and the more we know, the larger and richer the universe becomes to us, the less we seem, and the less of worth this little life appears. Faith in God and a future life are indispensable if we are to retain those grand ideal elements which glorify and ennoble our present existence.

The heart is an important part of man's nature. It is a rich bed of germinal possibilities. It will only bud and blossom and come to a fruition in a religious environment. The heart of man needs a heart of warmth at the center of all things. Cold materialism is a bad nurse for a warm heart. Love can not flourish in the vacuum of atheism. Secularism, chilly and dreary, is an arctic environment to affection, sentiment, and all the heart's great possibilities.

But my purpose was different at present. I wish to call the attention of some who may not have noticed it to be the fact, that the point of attack of secularism on religion to-day is in the realm of higher education. A few years ago it was the public school. Now secularists would separate religion from education in the colleges and universities. It has been accomplished in some private institutions. But this is not enough to satisfy the secularists. They could neither hope to secularize the many colleges and universities under Church control, nor to compete with them by institutions they themselves might build.

So they have adopted the plan of making higher education a part of a governmental system of education, of securing a college or university in each State, controlled and supported by the State, and hence free from religious control, and secular in spirit and work. This may seem like a broad and sweeping charge. Doubtless many have been drawn into this movement for higher education by the State without appreciating the spirit that so often prompts it. If this is not the spirit, why do these State secularists raise the cry of narrowness against the institutions under religious control, when they know it is the secularist who is narrow, and the State institution that is compelled to leave the most important realms of human study out of its curricula? If this is not the spirit, why should a president of a university of a large Western State declare publicly that "there is no longer need of individuals giving to higher education. The State

will now attend to that?" Was it not a direct attack on the only means of growth open to the college under religious control? Why should a president of another State institution withdraw from his Church on the plea of wanting a larger liberty, if there is no tendency to secularism, before which this president bent rather than be broken? If this is not the spirit of this movement, why has an attack been made on another president of a State institution because of the positively religious and evangelistic policy he has maintained?—*Western Christian Advocate*.

London Spectator on President Andrews.

"What was predicted nine months ago has apparently come to pass, for it seems that Dr. Andrews has been forced into a resignation that could scarcely have been voluntary and which has made such a stir that expressions of indignation were heard even in so uncongenial an atmosphere as that of the Senate chamber of the United States. It may be said that Brown University is situated in Providence, the capital of Rhode Island, which, by a strange freak of fortune, is the State founded by Roger Williams to secure that mental freedom denied by the stern Puritans of Massachusetts Bay. The university is an old foundation, but it has recently made great strides, and it has come to the front largely through the able administration of the very man who is now forced to sever his connection with it. Dr. Andrews is so important and recognized an authority on finance that he was appointed by President Harrison a delegate to the Brussels Monetary Conference. His work in favor of bimetallicism has been regarded as the best exponent of that side of the currency controversy in the United States. He is also a man of wide learning, powerful intellect, and the very highest character.

"If the case of Dr. Andrews stood alone, if it had not been heralded by the striking document issued during the presidential campaign, if it were at all probable that a very successful administrator had voluntarily resigned, in the prime of life, a position which he had been filling with singular success, nothing more would need be said. But the case of Dr. Andrews does not stand alone. During the last ten or a dozen years many rich men have secured no little renown by endowing either new or existing colleges and universities in the United States. The *American College Yearbook* gives a presumably accurate account of the income and resources of the numerous seats of learning in the United States, and from its pages we discover that immense gifts by wealthy men have raised some of the leading American universities to heights of affluence which might well excite the envy of Oxford and Cambridge. Among others, the new University of Chicago is conspicuous. Its chief benefactors are Mr. Rockefeller, head of the Standard Oil corporation, and another gentleman less known to those who watch the American millionaires. The benefactors of the University of Chicago are largely interested in gas companies. Among the teachers in the university was Prof. Edward W. Bemis, who vigorously denounced certain private monopolies and who advocated the municipalizing of gas and all other public services in the hands of private corporations. Though no fault had been found with him as a teacher, he was, nevertheless, summarily dismissed. As he had been threatened before the bolt fell, it was assumed in Chicago and all over the United States (the case attracting general attention) that the advocacy of municipal gas and the dismissal of its advocate were related as cause and effect. If, therefore, we connect the cases of Dr. Andrews and Professor Bemis; if we still further recall the prediction made last year, we can scarcely escape the conclusion that a conspiracy exists in America to interfere with freedom of teaching in the universities, so far as economic questions are concerned. We may add that in the University of Wisconsin the charge of 'anarchist' was brought against so well-known a writer and teacher as Prof. Richard T. Ely, who, far from being an anarchist, is a leading member of the Christian Social Union connected with the Episcopal Church, whose head in England is Dr. Westcott, Bishop of Durham. The absurd charge was solemnly investigated by the regents of the university and dismissed. There is thus good *prima facie* ground for believing that the heads of the trusts in the United States have determined to lay their hands on

the universities and to control the economic teaching given there, so that nothing shall be uttered which has not the hall-mark of monopolist approval.

"How serious is the condition thus created for the American people is apparent to everyone. The nation which like Brutus, worshipped 'liberty,' like him finds it but a shade. The nation which started on its great career with republican formulas taken almost direct from the 'Contract Social' is reduced almost to the situation in which Russia finds herself. In one case academic censorship is exercised by public officials, in the other by wealthy magnates who have 'cornered' all the chief necessities of daily life. To be sure, American 'liberty' has always been found consistent with not a little of practical tyranny. In the old slavery days not a single church or college south of 'Mason and Dixon's Line,' and only a few north of that boundary, dared utter a word of protest against the traffic in human flesh. Even to-day theological thought is far less free than in Western Europe, and some recent prosecutions of able and devoted scholars have been a scandal alike to culture and religion. Everything in America, from the written Federal Constitution downward, seems exacting, clear-cut, inviting antagonism, and providing for no easily reached *modus vivendi* between the contending parties. The American people have been, it seems to us, too content to worship the forms of liberty, and to let the substance often slip from their grasp. But since the overthrow of slavery amid a human holocaust terrible to contemplate, no form of substantial freedom has been so little regarded there as economic freedom. It may, of course, be said that the economic conditions of the United States are only those of the world at large carried to a logical issue. The right of accumulation within the law is, it will be said, the foundation of our present economic order, and that right has been exercised by the fittest in America, by the Goulds, Rockefellers, Mackays, and they have survived—that is all.

"But, so far as our own country is concerned, this contention is scarcely true. Wealth here has been mainly created (we are not speaking of the old landed families) under conditions either of fair competition, or with the odds somewhat against us by reason of foreign tariffs. But in the United States, Congress and the State legislatures have been parties to the accumulation of private wealth, tariffs being elaborately devised in obedience to outside interested dictation. The railway monopolies of the West have received as sheer gifts hundreds of millions of public lands, which were supposed to be held by public authority for the benefit of actual settlers. The Treasury is in the banking business, and it has more than once—notably in the last public loan of Mr. Cleveland—played into the hands of the great bankers, so that one firm coined millions in a few hours. All through we see the phenomenon of government partnership with private monopolies, or, as Mr. Lowell puts it in 'The Pious Editor's Creed,' of converting public trusts into very private uses. We do not say there is no case of a bad and rotten monopoly here; we know that swindling companies and their dishonest 'promoters' are even more general here than in the United States. But here the victim is usually the gull who believes in lying prospectuses and newspaper paragraphs; in the United States the whole public is made a victim by public official participation in what ought to be a purely private enterprise—*i. e.*, a 'natural' evolution of capital. The outcome of this, in a word, has been to create an economic despotism which the masses in America, especially in the West, are beginning to see is entirely at variance with the professed ideas on which the American Republic rests. On the one hand we have the supposed 'free and equal' citizens; on the other hand Mr. Rockefeller, with his tens of millions, and the victims of an artificial and 'protected' corporation. Now, just as soon as this monopoly has reached out its hand to destroy economic freedom it finds itself compelled to meet public criticism. Being audacious beyond any recent old-world experience, the great capitalists of America are determined to capture free opinion and to prevent criticism. They subsidize pulpits, they buy the press, they sent their well-paid attorneys in the United States Senate, and at length they stretch their hands over the colleges, which it is easy to capture by acts of generosity. Thus their design is to prevent any effective action which shall in any way weaken their authority or undermine their position. Their object can not be mere wealth-making, for they already enjoy wealth beyond the dreams of avarice. Apparently their intention is first to convert the United States into a powerful oligarchy, and then to extend the sway of that oligarchy over other lands.

"Now, we need not say that we do not find in bimetallicism any solution of the economic problem of America or of any other country. But we readily admit the existence of respectable authorities on that side. The present British and French cabinets contain bi-

metallists of standing, and in not a few of the leading European universities the professors of economics advocate the silver cause. Men like the late M. de Laveleye, like the late M. Cernuschi, like the late Dr. F. A. Walker, like M. Melin, Mr. Balfour, Professor Foxwell, take the bimetallic view. But think of Mr. Foxwell being dismissed from the chair of political economy at University College because of his views on currency! Think of Professor Marshall being dismissed from the chair of political economy at Cambridge because he favors municipal ownership of public services! Even the German Emperor leaves Professor Wagner alone at Berlin University, while Dr. Schachtelle, a semi-collectivist, was Finance Minister in Austria. The late Mr. Thorold Rogers was notoriously elected to his chair at Oxford by men who avowedly disbelieved in his political and largely disbelieved in his economic opinions. It is reserved for the "free" West to dismiss from academic service tried and competent teachers at the bidding of rings of millionaires who will not hear one single criticism or questioning of the justice or necessity of their doings, or of the character and tendency of the trust they have built up with the aid and at the expense of the public. The divine right of kings is to be succeeded by the divine right of millionaires, who are to run everything, including the American Senate and the conscience and intellect of university professors! It is none of our duty to say how the American people should deal with the portentous growth of that money power which overshadows the institutions of the Republic. But we think that the rich men of America are revealing such a deadly plot against all genuine public freedom that, unless we are mistaken, the opening years of the new century will witness an outburst in the West which will amaze the world."

New Sayings of Christ.

In January last Messrs. Grendell and Hunt made a wonderful discovery on the borders of the Libyan desert—the oldest papyri known bearing the words of Christ. The value of this find, in the interest it will arouse in the whole Christian world, proves inestimable. It comprises a dozen leaves, each $5\frac{1}{2} \times 3\frac{1}{2}$ inches in size, remarkably well preserved, and clearly written in uncial characters of the ancient Greek. It dates about sixty years after the crucifixion. It has easily been translated, and is found to consist of detached sayings of Christ, without context, each beginning with the words, "Jesus saith." The translation will soon be published by the Egypt exploration fund. An immense edition at a few pence per copy will be provided, so as to reach everybody.

Notes.

The late Dr. William Graham, of Lafayette, Ind., bequeathed his large and valuable library to the School of Theology of DePauw University.

The late William L. Bradley was much interested in trees and tree-planting. His daughter, Miss Abbie Bradley, of Hingham, Mass., has presented \$20,000 to the president and fellows of Harvard College in memory of her father, and the income of this fund is to be expended by the director of the Arnold Arboretum in scientific investigation at that institution for increasing the knowledge of trees.

Government experts have just completed their valuation of the pictures and art treasures of one kind and another bequeathed to the English nation by Lady Wallace, who, during her lifetime, was barred from presentation at Court and subjected to much unkindly ostracism by English society. The value is set down officially at the enormous sum of \$22,000,000. The government has decided to keep the collection where it is—that is to say, in Hertford house, which the state is now about to acquire for the purpose.

Book Notices.

[The Editor will be glad to give brief notices of such books as are appropriate to the COURIER. Copies of volumes sent for notice will be placed in the University Library.]

Donated to the Library.

REV. GEORGE C. WILDING, JERSEY CITY, N. J. The Gospel in All Lands. From 1881 to 1895 bound, and 1896 unbound. Works of Orville Dewey, three volumes, Charles S. Francis, N. Y., 1872. The Problem of Human Destiny, Lowell Lectures, by Rev. Orville Dewey, James Miller, N. Y., 1864. Statement of Reasons, by Andrew S. Norton, Boston, 1870. Forrest's History of the Trinity, Nichols & Noyes, Boston, 1871.

"The Gospel in all Lands" is a magazine full of information on all phases of missionary work, and will be a thesaurus of historical data in the years to come.

REV. J. E. McCracken, LITCHFIELD, ILL.—History of the Revolutionary War, by William G. ———. N. Y., 1789.

This is a series of letters, dated at Roxbury, from December 26, 1771, to December 25, 1775. It is very interesting for the side-lights thrown on that stirring period in American History.

REV. FREDERICK J. BATE, DOLLAR BAY, MICH.—The Proof Sheets of John Wesley's Notes on the New Testament. Bound. William Bowyer, London, 1755.

See description elsewhere.

REV. CHARLES SHEARD, NORTHERN N. Y. CONFERENCE.—Notes on the New Testament, by John Wesley, A. M. Ezekiel Cooper & John Wilson, N. Y., 1806. Two volumes.

JUDGE W. M. SPRINGER—The Official Records of the Union and Confederate Navies in the War of the Rebellion, by Lieut. Commander Rush, under direction of the Hon. H. A. Herbert, Secretary of the Navy. Series 1, volume 5. 1896.

MRS. J. L. STRATTON, MILES GROVE, PA.—Discipline of the Methodist Episcopal Church. Lane & Scott, N. Y., 1849.

This was once the property of John McFalls, who bought it in 1819, and wrote on the title page, "Any person is welcome to the loan of this book by returning it. I regard it next to the Bible." We shall be glad to receive other copies of the Discipline that have come down from the earlier years.

DR. E. A. DE SCHWEINITZ, WASHINGTON, D. C.—The War with the Microbes. 1897.

UNIVERSITY OF STATE OF NEW YORK.—Examination Bulletin, No. 13, June, 1897.

ASSOCIATION OF AMERICAN ANATOMISTS.—Proceedings from date of organization in Washington, D. C., 1888. Also, Polychromism, by Dr. D. S. Lamb. Anatomy and Art, by Dr. Robert Fletcher. The Witches' Pharmacopoeia, by Dr. Robert Fletcher. Mycetoma, by Drs. Pope and Lamb.

U. S. DEPARTMENT OF AGRICULTURE.—Tuberculosis Investigations, by Professors de Schweinitz, Dorset, and Schroeder. Report of the Chief of the Weather Bureau, 1895.

PAMPHLETS—Goethe's Dedication of Faust, by Adolph Hepner. The Mosaic System, by E. B. Latch. Railway Pools, by Geo. R. Blanchard. Commencement Address by German H. Hunt. Teachers' Leaflets, Cornell University. The Vendetta, by I. A. Russell. Digest of Dingley Tariff Bill, by Vandegrift. Active Service, by Rev. T. G. Steward. The Present Obligations of the Scholar, by President C. K. Adams. Journal of Osteopathy, June, 1897. Addresses at Boston Merchants' Association, 1897. New Constitutional Laws for Cuba, 1897. Massey's Magazine. Form, July, 1897. The School Physiology Journal. Kansas University Quarterly. Expression. Report of Board of Education. Christianity in Earnest. The Christian Educator. Lassell Leaves. Johns Hopkins Circulars. Princeton Bulletin. Many Catalogues and Reports.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

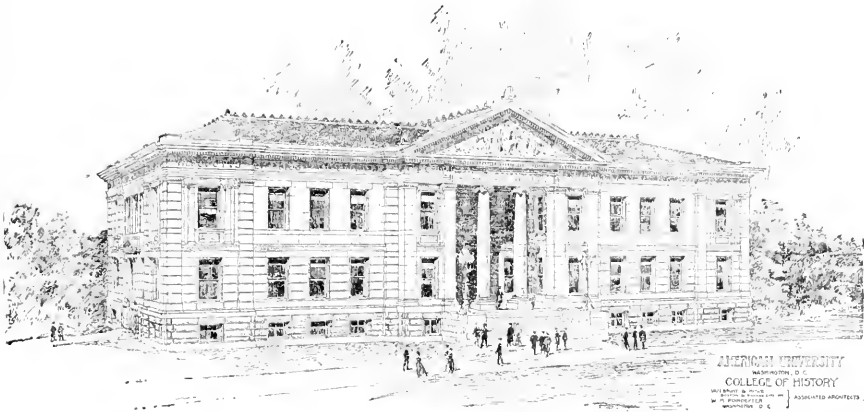

VOL. VI.

WASHINGTON, D. C., DECEMBER, 1897.

No. 2.

College of History.

This first building of the American University will be completed when these pages greet the reader's eye. It is a beautiful and imposing structure in white marble. The design is classic, and adheres closely to the Greek models. The College is 176 feet long, the central part 90 feet wide, and the ends 70 feet. At the center of the front is a wide portico, with pillars running up the height of the two stories. These pillars are surmounted with a wide pediment, whose peak, capped with a block of ornamentally-carved marble, reaches the height of 60 feet. The windows are high and wide, giving an abundance of light everywhere. The external walls are treated in a simple manner, avoiding over-decorations, and yet producing an impression of strength and richness combined. The minor entrances at each end add to the architectural beauty.

The interior is finished in Tennessee marble and quartered oak. The latter is one of the handsomest specimens of that kind of work in the District of Columbia. The forty-two rooms are large, with high ceil-

ings, including a historical library room, a historical museum room, and over them, and as large as both, an assembly room for the department of history. This is a magnificent room in size and finish. The floors of the main hall are tiled with marble, and the walls wainscoted with a beautiful specimen of the same material. The other halls and the rooms are floored with Georgia edge-pine. The lavatories are walled with white-glazed brick. All partitions and floors are of marble, and the plumbing of the latest and best designs.

The whole building gives the impression of breadth of construction, with great care for light and ventilation, and for the acoustics of the assembly room. The thoroughness and smoothness of finish and perfection of detail has reminded observers of the new Congressional Library.

This building is designed for the department of history. The planning and arrangement of the rooms had this in view. Ultimately it will all be needed for this purpose. For a time it may be made to house two or three allied departments of study. The work of furnishing and equipment has not been seriously taken in

hand, though some special articles have been secured, and a couple of thousand volumes are awaiting removal to the shelves of the library. The entire cost of the building, including architect's fees and superintendence of construction will be about \$175,000.

The grounds have been graded around the building, and walks and driveways are sufficiently developed to begin to show the plan of the grounds.

This excellent beginning makes the officers, trustees, and friends of the University anxious that the good work should proceed as rapidly as possible. It is hoped that proposed plans for other structures will soon materialize, and endowments be so increased that educational work can begin in the near future.

Educational Notes.

Harvard is 262 years old.

Oxford University has a freshman class of 725 this year.

John Dewey: Education is not a preparation for life; it is life.

The endowment of Wesleyan University now reaches \$1,250,000.

The new public library building in Chicago cost \$2,000,000, and is open to the public.

It is reported that the funds of Yale University now amount to the splendid sum of \$1,567,495.49.

President Edwards, of the University of Washington, has been challenged to prove that he is not an agnostic. Profound silence is his answer.

The presentation of the life-size statue of Commodore Cornelius Vanderbilt to Vanderbilt University took place before an immense audience, at Nashville, Tenn.

The faculty of the University of Buda-Pesth have voted to give the honorary degree of doctor of philosophy to the Queen of Roumania, known in literature as Carmen Sylva.

Newell Simpson Albright, D. D., Professor of Biblical and Historical Theology in the Iliff School of Theology, Denver, died on the 10th instant. He was a scholar of rare ability and a man greatly beloved.

Boston University will celebrate its first quarter-centennial next June. Ex-Governor William Claflin is the chairman of the committee of arrangements for the celebration, which will doubtless be a notable one.

Women are now admitted to the lectures of the faculty of philosophy in the Austrian universities. In Vienna a large proportion of the applications come from Russian women. There are two classes enrolled, ordinary and extraordinary.

Cairo is to be enriched with a new Arabian museum and Khedival Library, now being built opposite the Khedive's palace. Trolley cars are also to be introduced in the old Egyptian city, and a Belgian company has obtained a concession to run a line to the foot of the Pyramids.

The Catholic University of America was canonically established by Leo XIII. in 1867. The first school of theology was opened in 1880, and the schools of philosophy and law in 1895. It has been built and maintained by the generosity of individual Catholics, who have contributed the means by which over \$1,000,000 has been invested in the buildings and \$500,000 in endowments for professorships.

In the University of Heidelberg students of chemistry and physics are now obliged to take out accident insurance policies. The premiums, which range from 75 cents for those who engage in practical experimental work down to 2½ cents for students who only listen to lectures on chemistry and witness the accompanying experiments, must be paid at the beginning of each term, and entitle the insured to an annuity of \$400 in case he is injured so as to be incapable of working.

Trustee Meeting.

The annual meeting of the Board of Trustees of the American University was held on December 8, 1897. There were present Rev. Charles H. Payne, D. D., of New York, who acted as chairman in the absence of the President, Mr. John E. Andrus; Rev. D. H. Carroll, D. D., of Baltimore; President W. W. Smith, L. L. D., of the Randolph-Macon College of Virginia; Bishop John F. Hurst, D. D., Chancellor of the University; Rev. W. H. Milburn, D. D., Chaplain of the Senate; Hon. Hiram Price, Hon. M. G. Emery, Messrs. John E. Herrell, B. F. Leighton, A. B. Duvall, and B. H. Warner; Samuel L. Beiler, Ph. D., Vice-Chancellor; Rev. C. W. Baldwin, M. A., Secretary of the Board, and Rev. Albert Osborn, Registrar.

The Chancellor, Bishop Hurst, reported from extensive observation by travel and correspondence during the past summer and fall, that public interest in the University was very great and constantly growing, and that in several different quarters plans were in process of formation that would materially hasten and strengthen the development of the enterprise.

The Vice-President reported that the College of History was completed, save a little interior marble and wood-work, and that it would be turned over to the trustees by the contractor during the month of December. Also that there had been collected since the last trustee meeting \$28,976.88. It was shown that a conservative estimate of all the University's holdings, including real estate, bonds, and other securities and subscriptions rounds up a little more than \$1,000,000.

The meeting was characterized by hopefulness and carefulness. All matters and methods were carefully examined, and plans for future work were deliberately canvassed. It is desired and hoped that the erection of other buildings may soon begin, and sufficient available funds be in hand to commence the great educational work of the University. The demand for the training of specialists grows with every year, and the conditions in Washington are such that it might and ought to be begun in the near future.

Several bequests have been paid to the Treasurer during the year. Six other wills have been probated and are in course of adjustment that will add largely to the funds in hand. While gifts made in life are best, and no one who is able should put off giving according to his ability, yet it is felt that thousands of Protestant Christians in this land of wealth should be making their wills so that their good work would be continued forever on earth.

Rev. Minor Raymond, D. D., professor of Systematic Theology in Carret Biblical Institute and author of a system of theology, died recently at the age of 86.

Gifts.

MR. ROBERT F. MILLER has sent a box of books to the Library. These are in the new building, but unpacked, so that we can not publish a list in this number.

REV. DR. L. R. DUNN'S library of one thousand volumes also awaits the arrangement of shelving in the new building. We hope to give a full list in our next issue.

MRS. HENRY M. HARMAN has shipped her husband's library to the University. It is unpacked, awaiting the completion of the shelves in the Library. It includes books in thirteen languages, in all of which Dr. Harman worked.

SEVERAL new sub-criptions have been made toward the completion of the College of History. These will be published with the list of others who have given to erect this first building. It is desired now that some kind friends will help in its furnishing and equipment.

REV. A. M. WILLIAMS has sent to the library a bound volume containing the *Daily Advocates* of the General Conference of the Methodist Episcopal Church, held in Baltimore in 1876, and also those of the General Conferences of the Methodist Episcopal Church South, held in Louisville in 1874, and in Atlanta in 1878.

HISTORICAL FURNITURE is being secured for the College of History. Three interesting pieces have recently been bought. A large double dresser, the property of George Bancroft, the historian, is now in the College. A magnificent walnut table and chairs, once owned and used by Charles Sumner, have just come into possession of the University. Mr. Julius Lansburgh made a subscription of \$25 toward the price of these articles. Another interesting piece is the war desk of Secretary Edwin M. Stanton. It is a large, heavy, black walnut, roller-top desk, with shelves above. It helped to carry on the war for the Union.

PROF. ALFRED HIGBIE, of the University of the Pacific, California, has given to the Library of the American University his library and mineralogical collection. The library consists of two parts—a mixed library of 200 volumes, and an Oriental library of 234 volumes. The full list of books and mineralogical specimens is published elsewhere, as sent by Prof. Higbie. These are valuable gifts, from one who has devoted his life to doing good in the ministry, in public school work, and later in the University of California. He was also at one time in the State legislature. Prof. Higbie is also to send his mathematical, surveying, and astronomical library and instruments, when he has completed the writing of a work in this field, which he now has well in hand.

Asbury Memorial Hall.

Since the last issue of THE COURIER, September 10, 1897, the following amounts have been subscribed toward this fund, which is to build a hall by the gifts of ministers. The total amount now subscribed is \$112,043. This is heroic giving that ought to stimulate many who are better able to give than these self-sacrificing workers:

CENTRAL ILLINOIS CONFERENCE, \$1,940.

\$100—H. D. Clark, J. W. Edwards, W. D. Evans, J. W. Frizelle, J. W. Haney, W. H. Hunter, F. W. Merritt, J. H. Ryan, D. N. Stafford. **\$75**—Washington Puffer. **\$65**—A. K. Tullis. **\$60**—L. F. Cullom, J. H. Scott (by Elizabeth Ball). **\$30**—O. T. Dwinell, W. F. Jameson, Mrs. G. J. Luckey, I. Willett Puffer, E. G. Smith. **\$25**—R. A. Brown, J. A. Chapman, J. E. Connor, Alexander Smith. **\$15**—S. T. Allen, R. T. Ballew, H. C. Birch, R. E. Bird, J. F. Bliss, V. H. Brink, A. P. Butters, W. R. Carr, C. W. Cordes, C. F. Crane, J. S. Cumming, Fletcher deClark, J. W. Denning, W. F. Dudman, W. L. Dugless, J. P. Forsythe, L. R. Furguson, G. D. Hensell, J. H. Hobbs, J. J. Hunter, M. L. Miller, J. W. Noles, D. G. Murray, J. A. Northrup, J. M. Prouty, P. T. Rhodes, S. E. Steele, A. M. Stocking, E. W. Thompson, O. I. Truitt, W. L. Ward, E. A. Whitman, R. B. Williams, D. F. Wilson. **\$9**—J. A. Alford. **\$6**—M. C. Smith. **\$5**—J. N. Fawcett.

MINNESOTA CONFERENCE, \$1,470.

\$150—W. C. Rice. **\$100**—H. C. Jennings, G. H. Bridgman, S. W. Kemmer, W. H. Stone. **\$65**—John Watson. **\$60**—J. M. Bull. **\$50**—Thomas Craven, Samuel Ellery. **\$45**—F. D. Newhouse. **\$40**—Thomas Hamby. **\$30**—H. F. Ackerman, L. L. Hanscom, Mrs. W. K. Marshall, E. P. Robertson, E. M. Rule, Mrs. J. Stafford. **\$25**—F. A. Cone, T. A. Jones, L. E. Shaaks, J. Frank Stout. **\$15**—H. G. Billie, Mrs. G. A. Cahoon, James Castles, William Cooke, J. W. Fryberg, William Gillis, J. A. Hovis, J. E. Kepler, J. W. Martin, Frank Parr, W. J. Robinson, E. G. Saunderson, T. H. Sheckler, E. C. Tearhout, W. E. Thompson, J. F. VanCamp, G. H. Way, Samuel White, L. A. Willsey. **\$10**—John Pemberton, E. E. Satterlee, F. S. Seeds. **\$6**—A. W. Brown, Mrs. B. P. Joy, J. W. Lewis, H. L. St. Clair.

NORTHERN MINNESOTA CONFERENCE, \$1,268.

\$100—J. F. Chaffee, C. P. Mitchell, C. B. Breconnt, J. W. Hill. **\$50**—J. M. Brown, S. F. Kerfoot, L. F. Merritt. **\$35**—F. H. Roberts. **\$30**—R. H. Craig, Mrs. William Fielder, Robert Forbes, F. W. Hart, Mrs. G. H. Humason, B. F. Kephart, H. W. Knowles, W. P. McVey, David Tice, George Willett. **\$25**—J. H. Cudlipp, Elijah Haley. **\$20**—R. R. Atchison, J. H. Dewart, J. W. Heard, D. J. Higgins, J. B. Hingley, G. S. Innes, R. N. McKaig, Joyce McKaig. **\$15**—William Burns, E. K. Copper, J. C. Craig, S. H. Dewart, G. R. Geer, Mrs. M. L. Hutton, L. S. Koch, S. X. McAdoo, F. E. Ross, G. S. Satterlee, W. A. Shannon, C. F. Sharpe, F. M. Taylor, G. G. Valleniyne, J. W. Valleniyne. **\$10**—S. S. Farley, H. C. Maynard, Henry Nobbs, William Pickard, L. P. Smith, M. O. Stockland. **\$9**—J. G. Morrison. **\$6**—C. O. Beckman, C. A. Cooke, J. R. Davis, C. W. Lawson, Roderick Murray, A. L. Richardson, C. H. Sweatt, R. J. W. Swinnerton, G. E. Tindall. **\$5**—T. E. Archer, G. E. Pickard, G. W. Proctor, D. L. Shrode, T. W. Stout.

CENTRAL GERMAN CONFERENCE.

\$25—Mr. Hartman, New Albany, Ind., Rev. J. G. Schall. **\$5**—A friend.

Payments.

With sincere appreciation we acknowledge the payment of the following amounts on the Asbury Memorial Hall subscription from September 10 to November 30, 1897. The total amount paid to this date is \$32,769.88.

\$100—Joseph Earp (Mrs. E. G. Earp), W. R. Halsted, S. D. Hutsipiller, John Royer, W. J. Sharpes, (Ellen J. Sharpes), J. E. Steele (W. H. Adams), J. E. Steele (W. F. M. S.), Wm. Telfer, E. E. Urner. **\$50**—C. E. Bacon, R. R. Farnsworth, W. P. Gingham, L. D. Moore. **\$35**—N. Luccock, N. G. Lyons, J. B. Risk, T. H. W. (G. H. Fliinn). **\$34**—James Mechem (J. A. Strickler). **\$33.34**—T. B. Bell, C. B. Case, F. H. Coman, C. C. Edwards and others.

A State University.

James Gilray, James Gosnell, J. H. Johnson, P. T. Lynn (D. R. Failing), J. H. Martin, P. S. Merrill, W. P. Odell, G. W. Peck, J. H. Potts, M. R. Webster (F. H. Beach), M. R. Webster (G. B. Watkins), M. R. Webster (J. P. Weston). **\$33.33**—R. Roberts. **\$3.33**—C. C. Ball. **\$3.40**—G. W. Collier. **\$2.25**—C. T. Allen, C. E. Ashary, Alfred Coons, P. C. Carnick, A. Giruth, H. W. Key, C. E. McKinley, L. Timberlake, H. B. Westerville. **\$2.00**—H. L. Chapman, G. W. Coburn, M. S. Heavenridge, E. L. Kellogg, A. B. Saffell. **\$1.17**—H. D. Ketcham, W. L. Slutz, L. L. Stewart (E. O. Conaway, \$2; G. W. Grimes, \$5; Maud Malcolm, \$5; J. A. Sigalose, \$5). **\$16.70**—Andrew Purdy (B. M. Clark, \$3.35; E. G. Piper, \$3.34; S. M. Stewart, \$6.67; W. F. Wells, \$3.34); **\$16.67**—Mrs. L. J. Muchmore, F. S. Tinker. **\$16.66**—P. B. Stroup. **\$1.6**—J. H. Barron, J. K. Skinner. **\$1.5**—D. F. Barnes, H. Causfield Class of '91 N. W. Indiana Conference (Char'as Jakes, \$5; J. E. McCloud, \$5; W. H. Wise, \$5), M. E. Ketcham, E. S. Lewis, C. W. Lynch, John Pearson, A. W. Stalker, C. M. Thompson, G. L. Tutts. **\$12.50**—Class of '93 Pittsburg Conference (E. H. Greenlee), George L. Killen. **\$1.0**—J. W. H. Brown, M. J. Carley, M. A. Castle, O. S. Chamberlayne, H. C. Clipping, W. S. & A. D. Cole, Benjamin Copeland, Remben Emery, A. M. Gould, G. W. Grimes, Philip Kelsler, J. F. Laird, Joseph Lee, W. H. Lewis, A. T. Luther, Mrs. S. A. McCowan, W. R. Pierce, W. M. Puller, J. E. Radliff, C. E. Scheuck, A. H. Stargis, F. A. Van de Walker, T. G. Wakelind, S. L. Weeker, W. H. W-hrley, J. H. Westbrook. **\$9**—W. B. Weaver. **\$8.34**—C. B. Graham, J. M. Maschman, D. H. Ramsdell. **\$8**—E. J. Gwynn, J. H. Haller, H. J. B. Marsh. **\$6.67**—C. F. Brown. **\$6.66**—E. Yager. **\$6**—R. A. Fletcher. **\$5**—S. K. Arbutnot, E. D. Barnett, E. J. V. Booth, Daniel Brooks, Class of '92, Ohio Conference (George Summs), L. M. Day, Mrs. J. A. De Graff, Mrs. Remben Emery, D. A. Friend, Jacob Huger (Albert Osborn), E. G. W. Hall, T. H. D. Harrold, F. W. Harrop, Mr. Hartman, J. T. Hastings, S. A. Huger, J. S. Jenkins, S. B. Johnson, S. F. Kelley, G. M. Knapp, Mrs. M. Lanteuolager, C. E. Leatherby, F. N. Lynch, F. M. Malcolm, R. T. Mayer, A. McCullough, Asbury Mick, A. F. Nagler, F. L. Niles, J. B. Oliver, C. D. Patterson, R. Pattinson, G. J. Piper, Mrs. M. A. Robertson, J. G. Schaal, E. L. Sinclair, F. L. Thompson, W. W. Trout, P. E. Whitman, J. M. Worden, R. M. Yoder. **\$4**—B. Carter, J. S. West. **\$3.35**—L. D. Grimes, E. L. Warner. **\$3.34**—Wm. Anderson, C. H. Maloney. **\$3.33**—I. Wilson. **\$3.25**—G. V. Leech. **\$3**—A. H. Coors, S. B. Danley. **\$2.50**—B. Reeve, J. L. Walker. **\$2**—J. F. Arnold, G. M. Buckbee, H. D. Burnett, S. P. Crummitt, Wm. Goody, N. G. Grizzle, J. M. Grase, J. C. Howard, J. H. Koch, C. H. Lukin, J. S. Miller, T. Richmond, J. B. Workman **\$1.75**—John Thompson. **\$1.67**—C. H. Cox, W. P. Gu nn, S. J. Miller, F. W. Queen. **\$1.34**—G. M. Burnett. **\$1.00**—L. D. Ashby, L. E. Leslie, B. D. Morris, A. A. Nichols, W. T. W. Sleeth, C. Warman, W. W. Workman, H. E. Wylie.

The Church Congress.

This may be a new name in Methodism. The thing is as old as Wesley, though in a little different form. If our conferences had a little less of the stereotyped form and more of the intellectual and spiritual ozone of the late congress in Pittsburgh they would be much more helpful to the ministry. It lasted nearly a week.

The papers were of a high order, both as to thought and literary merit. Quite full reports have appeared in the church papers. But reports can not do the Congress justice. The personal inspiration and power was as marked as the thought. The enthusiasm was contagious. Loyalty to the Lord Jesus Christ was pronounced and joined with fearless assertion of scientific truth and belief. The bringing together of so many young specialists, choice spirits, to touch elbows in their search for truth in many different realms, will be a great inspiration to them. The Methodist Church is fortunate in having no narrow formulas that hamper these specialists in their various fields of investigation, or puts on them the brand of heretic if they differ from opinions of the past. Methodism stands to-day for freedom of scholarly investigation.

Students everywhere of the subtle, yet powerful, operations of public sentiment, will be interested in a matter that has caused a great deal of discussion in religious and educational circles in the Pacific Northwest. It grew out of the removal of President Edwards, of the University of Washington, by the regents of that institution. The action of the regents caused an uproar among the politicians, and a great deal was said about the matter in the papers. The cause assigned was that the president would not obey the instructions of the regents. He was specifically accused of changing the courses of study. The bone of contention was "mental and moral science." The president didn't believe in moral science. To use the expression of one of the regents, he had an "intellect capable of reasoning the Deity out of existence," and, therefore, he did not approve of a study that tended to demonstrate the existence of something which he had discovered did not exist. The regents felt the pressure of public sentiment, and realized that the destiny of the University demanded the removal of Edwards, and so he was "ousted." A prominent Methodist pastor and Prof. Edwards were in conversation one day, and during the chat the Professor tacitly admitted that he was an agnostic.

"There are two kinds of agnostics," was the comment of the pastor. "One class believe that they know everything and that other class simply don't know anything, while the second class simply say they are in a state of not knowing."

"I guess I belong to the second class," was the reply.

The University of Washington is an important educational institution. It offers peculiar advantages to advanced students and to young men and women preparing themselves for teachers. As it is maintained by the State, tuition is free. It is on a pagan basis, however, like most State universities, and as the sentiment in favor of higher education and religion going hand in hand is growing stronger each year in Washington, the University finds it increasingly difficult to overcome the lack of co-operation on the part of churches and pastors in securing students. Meanwhile the regents are scanning the Eastern horizon with a double-barreled telescope in hopes of discovering a "liberal" university president, who is willing to risk the destruction of his own theory by teaching moral science.—"Argus," in *Zion's Herald*.

As regards the admission of women to the German universities, no recent concessions have been made. The statistics for the summer semester show a total of 30,982 matriculated students and 1,510 hearers, including 207 women. These were distributed as follows: At Berlin, 114; at Bonn, 13; Breslau, 22; Göttingen, 34; Halle, 6; Königsberg, 11; Marburg, 7; Munich, 2. The number at Berlin has very nearly tripled since the summer of 1896, rising from 29 to 114.

The Franciscans have obtained permission to establish a house of studies which will be affiliated with the Catholic University, and which will have for its object the higher education of its scholastics and priests fitting for missions in the Holy Land as well as in America. Forty acres of land have been purchased by them in Brookland, near the University, and the work of construction will be begun as soon as possible. This step shows a marked approval of the University work.

Proposed United States University.

The annual agitation concerning a university to be supported by the Government and managed by it, again finds its way into the Associated Press dispatches. There is more of it there than anywhere else. The Senate and House are not moving in the matter. The papers in Washington report that a majority of the committee to whom the subject must go, should a bill be introduced in the Senate, is against such an enterprise. There was so much opposition to it in the House last year that the Committee on Education did not think it worth while to make up a report.

It is clearly seen to be a move in the direction of paternalism in government. It would only add another long list of appointments to those the politicians are already fighting over. The flings made at the churches at a recent meeting held in the interest of this proposed movement, show that such university would antagonize the Christian churches if it should ever be established. It would be divorced from religion, stand for secularism, be a hot-bed of scepticism, have no true basis for morals, be a pagan institution in a Christian country.

The organization of a number of ladies to carry out the wish of George Washington by erecting a building as a Washington Memorial is a patriotic one. Could they see the wisdom of combining it with some university already in existence, it would be much better. Their alliance with the movement to foist a university onto the Treasury of the United States is unfortunate. It is a question whether the public schools should be turned into an agency for raising money for even so good a purpose as they propose were it not allied with the other movement above suggested. Do they forget, when they thus ally themselves, that the children to whom they propose to appeal for a penny each on every returning birthday of George Washington are from the homes of Episcopalians, Presbyterians, Baptists, Congregationalists, Lutherans, Methodists, and even Roman Catholics? Such a movement in the public schools, in alliance with antagonism to these churches, would be a crime against that sacred bulwark of American institutions.

There must be an intelligent citizenship. The common school is sufficient for this. The normal school is its complement. The university for post graduate work can not be put on the same basis.

We can not enter into a full discussion of the question. It is enough at present to call attention to it, and ask all of our Christian readers to consider well their ground before allying themselves with a movement for a government university that would, beyond question, be a thorn in the side of every evangelical Christian organization in the country.

Gifts and Bequests.

Puget Sound University has received a 6-inch refracting telescope.

William C. Todd, of Atkinson, N. H., has given \$50,000 to the Boston Public Library.

Mrs. Richard T. Auchmuty, of New York, has given \$1,000 to Roanoke College, Salem, Va.

Olivet College, Michigan, is rejoicing over the offer of a friend of \$25,000 toward a new endowment.

The will of the late Caroline Talman, of New York, contains charitable bequests aggregating \$126,000.

George M. Pullman left a bequest of \$1,200,000 to build, equip and endow a free Manual Training School at Pullman.

First Church, Wilkesbarre, Pa., congregation will sing joyfully now. An elect lady presents a magnificent pipe organ.

Miss Alice L. Gould has given \$20,000 to the National Academy of Sciences for astronomical and mathematical research.

Henry Rogers, of Philadelphia, has given \$20,000 to the town of Mattapoisett, Mass., for the erection of a high-school building.

Egbert Starr, who recently died in New York, is reported to have given to Middlebury College, at different times, \$100,000.

Thomas McKean, of Philadelphia, has given \$100,000 to the University of Pennsylvania toward the erection of a law school building.

Forty four wealthy Roman Catholics have given \$5,000 each to the building fund of the New Roman Catholic Cathedral, at Westminster.

Two halls have recently been given to Hamilton College—the Root Hall of Science, costing \$31,000, and the Benedict Hall of Languages, costing \$30,000.

Three Cleveland ladies have given \$5,000 to the trustees of the Rayen High School, Youngstown, Ohio, to found a library for the school in memory of their mother.

William J. Bryan has given to the Missouri State University \$250, which is to be used annually in awarding a prize for the best essay on the science of government.

Private gifts to the first-class educational institutions in this country for the past twenty years, aggregate nearly \$200,000,000, or an average of nearly \$12,000,000 a year.

Clarence Eddy, of Chicago, gave an organ recital at the Methodist Episcopal Church, Canton, Ill., dedicating the new \$7,000 pipe organ donated to the church by W. J. Orendorff.

Miss Alice L. Gould has given \$20,000 to the National Academy of Science, to be known as the Alice L. Gould Fund, the proceeds to be used to further mathematical and astronomical research.

Henry G. Marquand, who has been a generous patron of the Metropolitan Museum of Art, New York, has recently given to that institution a number of antique bronzes of great interest, costing about \$50,000.

Mr. Charles O. Baird, of Philadelphia, has offered five annual prizes, aggregating \$250, to the members of the senior class of Princeton University who excel in oratory, and one prize of \$50 for the best poem written.

Henry W. Sage, the founder of Sage College for women and chairman of the Board of Trustees of Cornell University, died a short time ago. His direct money gifts to Cornell University aggregate \$1,250,000.—*E. r.*

The Methodist Orphanage on Monumental avenue, near Belmont, Philadelphia, was dedicated recently with appropriate ceremonies. It is the princely gift of Col. Joseph M. Bennett, together with land worth \$100,000.

More than \$200,000 in public bequests to Massachusetts institutions are provided for under the will of Edward C. R. Walker, of Roxbury. The bequests are to be paid out of a trust fund, contingent on the death of relatives.

The will of the late John Sartain, the artist, of Philadelphia, gives to the Philadelphia School of Design for Women his folios of prints, his pictures and his library, with the condition that they be used only within the building and never loaned out of it.

Joseph Wylie, of Chester, S. C., has given \$15,000 to Erskine College in that State to build a dormitory for girls. This makes more than \$100,000 that Mr. Wylie has given to Erskine College and the theological seminary connected with it.

At the recent dedication of the new buildings of Mount Holyoke College, announcement was made that John Rockefeller would add \$10,000 to the \$30,000 already contributed by him for the erection of the hall which bears his name.

The first endowment bestowed upon the Arnold Arboretum of Harvard University is the gift of Miss Attie A. Bradley, of Hingham, Mass., who has presented \$20,000 in memory of her father, who was greatly interested in trees and tree planting.

Rev. R. H. Pullman, of Baltimore, a brother of the late George M. Pullman, of Chicago, is so deeply interested in the Reform League that he has determined to devote a part of the \$50,000 legacy left him by his brother to the further development of the work.

Education has long been a favorite object with public benefactors. The vast sums given to endow academies, colleges, universities, and various special educational institutions show how education attracts the great wealth of prosperous and fortunate men and women.

The will of Theodore Lyman, of Brookline, Mass., makes these public bequests: To the President and fellows of Harvard College, \$10,000; to the Museum of Comparative Zoology in Cambridge, his books; to the Boston Asylum and Farm School for Indigent Boys, \$10,000.

Miss Frances E. Willard announces that she will contribute \$5,000 of her own money to start the fund of \$300,000 which the W. C. T. U. women need to hold control of the Temple property in Chicago. This sum is the memorial testimonial which was presented to her on her fiftieth birthday.

Mr. Morris Sharp, a Methodist layman of Ohio, has offered a magnificent gift to start a theological department in connection with Ohio Wesleyan University. A press-dispatch says that the late Stephen Watson, of London, Ohio, had left a bequest of \$55,000 to the university for the purpose of endowing a new professorship.

Mrs. Esther B. Steele, of Elmira, N. Y., who is a trustee of Syracuse University, has donated \$5,000 toward the physics laboratory, which is to be erected at a cost of \$25,000. Mrs. Steele's offer carries with it the proposition to put in a large quantity of special and costly apparatus when the building shall be completed.

The University of Missouri receives \$23,023 from the estate of the late John C. Conley, under the operation of a law recently passed by the legislature, which provides that if a man dies leaving no father, mother, or direct lineal descendant a certain per cent. of his estate, excluding any amount left for charity or religious purposes, must go to the State University.

The Root Hall of Science and the Benedict Hall of Languages were formerly presented to Hamilton College, Utica, N. Y., and dedicated on Nov. 16. The Root Hall of Science is the gift of Elihu Root, of New York, in memory of his father and mother. It is a beautiful stone building, and cost \$31,000. The Benedict Hall of Languages, also of stone, is the gift of H. H. Benedict, of New York. This building cost \$30,000.

Mr. P. A. B. Widener, of Pennsylvania, has announced his intention to present his magnificent residence to the free library of Philadelphia. The building is to be held in trust forever by the city as an integral part of the free library system, under the name of Josephine Widener Memorial Branch, to commemorate the deceased wife of the donor. A low estimate of the value of the residence, when equipped for library purposes, is \$600,000, and the donor will expend \$400,000 additional in placing therein a gallery of choice specimens of purely American art.

The Orange-Judd Farmer estimates the wheat crop of the United States at 589,000,000 bushels, oats at 814,000,000 bushels, and corn at 1,750,000,000.

The Czar believes in the higher education of women, and has ordered the reopening of the Women's Institute of Medicine at St. Petersburg, which was closed by order of the Government some years ago.—*University Courier*.

The Income of the Average College Professor.

The salary of a full professor, the country over, is little, if at all, in excess of \$2,000. In the larger universities it may rise to \$3,000 or something more, but the men who receive above \$4,000 are so few as scarcely to affect the general average. Aside from the bare possibility of a call to a richer institution, the college professor is not likely to be earning more at fifty than at thirty. Unlike most other professions, there is here no gradual increase of income to give tangible evidence of a man's growth in power. Unless one has taken the *Northern Farmer's* thrifty advice and "gone where money is" when he married, his outlook as he gets old age is not reassuring. Pensions are extremely rare; college trustees are forced in most cases to be as ungrateful as republics. The cost of living has steadily risen in college towns, keeping pace with the general increase of luxury throughout the older communities. Here and there, particularly in the West, there are exceptions, but upon the whole the scale of necessary expenditures for a man fulfilling the various social duties required by his position is constantly growing greater. The professor's incidental income from books and lectures is ordinarily insignificant. When he has paid his bills he finds no margin left for luxuries. If he smokes at all, he is prone to invent ingenious reasons for preferring a pipe. He sees the light-hearted tutors sail for Europe every summer, but as for himself he decides annually that it will be wiser to wait just one year more. Once in awhile he will yield to the temptation to pick up a first edition or a good print, but Aldines and Rembrandt proofs are toys he may not dally with. In short, his tastes are cultivated beyond his income, and his sole comfort is in the Pharisaical reflection that this is better, after all, than to have more income than taste.—*Eliss Perry, in the October Scribner's*.

Of Interest.

Watches were first made in 1476.

The Chinese invented paper 170 B. C.

The phonograph was invented by T. A. Edison in 1877.

The first balloon ascended from Lyons, France, in 1783.

The postage bill of the world is over a million dollars per day.

The Treasury of the United States now holds \$157,000,000 in gold.

Gen. Neal Dow's property is estimated at \$350,000. He left no will.

The estate of the late James G. Fair has been appraised at about \$12,000,000.

The gold yield of the United States for the current year is estimated at \$80,000,000.

The Government will pay \$30,350,000 to railroads for carrying the mails during the current year.

The medical department of Queen Victoria's household costs \$12,000 yearly and comprises twenty-four persons.

It is stated that ninety-three years ago, when the Bible Society was formed, there were only about 4,000 copies of the Bible in the whole world.

Prof. Elmer Gates, of Washington, has invented a marvelous new appliance in microscopy, by which objects can be magnified 3,000,000 diameters.

At fourteen years of age the late George M. Pullman received \$40 a year and board as clerk in a village store. At his death he was worth \$30,000,000.

President McKinley has received from the Pope a copy of a book describing and illustrating the Borghese apartments in the Vatican. Only 100 of the books were printed.

What is probably the most venerable piece of furniture in existence is now in the British Museum. It is the throne of Queen Hatasa, who reigned in the Nile Valley some 1600 years before Christ.

Queen Victoria owns a dress manufactured entirely of spiders' webs. It was a present from the late Empress of Brazil, who had it specially prepared in her palace by twenty native silk workers.

Populist State College.

"The Nation," of November 25, condenses an article in the "AMERICAN JOURNAL OF SOCIOLOGY," which gives an excellent illustration of the danger that ever hangs over State educational institutions. Five years ago Kansas had the largest and one of the best State Agricultural Colleges in the country. Experts visited it from all over the country. It was a model for many younger colleges.

Agriculture and horticulture had chief place, but mechanics ranked but little lower. The college had a four years' course, and post-graduate courses were provided. About 700 undergraduates and 40 graduates were at work in its halls. Its faculty of 24 teachers and 16 assistants had good standing everywhere.

In 1892 the People's party came into power, the Populists electing four out of the seven regents, and an attack was begun on the College. Change after change was forced on the faculty, all in the direction of the Populization of the College. The regents, by resolution, required that the principles maintained by the advocates of land nationalization, public control of public utilities, and the reform of the financial and monetary system shall be fairly stated and candidly examined. The division of labor among the professors was so arranged that political economy was put into the hands of a man of Socialistic tendencies, who was forced into the faculty.

Other changes finally forced the president, in sheer honor to resign, when he was informed that if he had not resigned, his resignation would have been asked for, because he differed from the board of regents upon fundamental principles of distribution of wealth. Later, twelve of the teachers and six of the subordinates were dismissed, among them most of the older members. Industrial training in agriculture and horticulture and all agricultural study after the second year are made optional in an agricultural college. Economics have been given the chief place, and it is understood the teaching is on the Populist basis, if there really be such a thing.

Now, we hope no one will misjudge this spirit or purpose of this article. It is not an attack on the Populists. *Pro se* there is no more harm in calling an institution a Populist State College, than in calling others Republican State Colleges. We have no doubt there are many of these latter. In Kansas the Populists have only done what the Republicans and Democrats have done in other States. It is a striking example, so open and of such proportions, as to be useful as a lesson. It is no wonder President Fairchild, after fifteen years in an agricultural college in Michigan, and a little longer in the Kansas Agricultural College, says, "I tremble for the future of State educational institutions." They will be the football of changing political parties. Civil Service can not prevent it. The politician of the demagogue sort will not vote the necessary supplies and keep his hands off. Will the honest statesman of convictions, as to the welfare of the State, fail to see that what he thinks is for the public good is taught? The latter might be trusted farther than the former, but either would turn a college upside down to secure their ends.

A national university under control of the General Government would only be a field for the larger play of these forces, as administrations change. It would be impossible to tell what such an institution would stand for. It would be an educational chameleon.

"State Bank Examiner R. T. Joyce, of Mt. Airy, N. C., last evening showed the Raleigh correspondent of the Charlotte, (N. C.) "Observer," a remarkable curiosity—one of the seven books of hymns written by John Wesley. It is beautifully written and the music is as finely done as if engraved. Mr. Joyce says that when Wesley formed his first class in England, in 1739, he made seven of these books, as he was not allowed to print any. A brother of Ralph Potts brought this book to Washington, N. C. Ralph was later an owner and his name appears 'Ralph Potts' book, July 3, 1789, Durnston.' There is also the name of William Williams, of Gates County, and that of 'John Wesley Potts, Festina Leute.' After a fire at Tarboro, the book was picked up by John F. Shackelford, of that place, who lends it to Joyce and permits the latter to lend it to the library of Trinity College. To Methodists it will be a great treasure indeed."

Book Notices.

(The Editor will be glad to give brief notices of such books as are appropriate to the COURIER. Copies of volumes sent for notice will be placed in the University Library.)

DONATED TO THE LIBRARY.

MRS. EMELINE L. BICKNELL, BROOKLYN, N. Y. "Violets and other Poems," by Mrs. Emeline L. Bicknell. Eaton and Mauis, N. Y. 1897.

This poetry is the birth of a mind compelled for years—

"To listen, weep, watch by the door

"That bides life's mysteries evermore."

As the nightingale, with breast pressed on the thorn, she had to sing. Often through the fleeting years the public has caught some notes of this singer's song. Faith has been quickened, hearts have been lightened lives have been cheered by these "Violets," and we are assured the world will be brighter for their blooming in many a home garden.

ORISON SWETT MARDEN, BOSTON, MASS. "SUCCESS," by Orison Swett Marden, author of "Pushing to the Front," etc. 347 pp. Fourteen full-page portraits. Cloth, \$1 25. W. A. Wilde & Co., Boston.

It is doubtful whether any success books for the young appeared in modern times which are so thoroughly packed with stimulating, uplifting, and inspiring material as the last book by Orison Swett Marden.

To stimulate, inspire, and guide, is the mission of his latest book "Success," and helpfulness is its keynote. This book teaches the youth who may think he has no chance that, in a land where farmers and mechanics sit in Congress, no limit can be placed to his career if he is armed with determination and has learned the alphabet. It teaches that under the American flag there are bread and success for every youth who has the grit to seize his chance and work his way to his own loaf; that the barriers are not erected which can say to aspiring talent, "Thus far and no farther"; that poverty, humble birth, or the most forbidding circumstances can not repress the longing for knowledge and the yearning for growth; that poverty has rocked the cradle of the giants of the race who have turned barbarism into civilization, and led the world up from savagery to the Gladstones and Lincolns. The author seems to have performed the difficult task of really helping and inspiring the young people while they are in the transition state from dependence to independence.

MINERALOGICAL CABINET.

Presented to the American University by Prof. Alfred Hodge, of California.

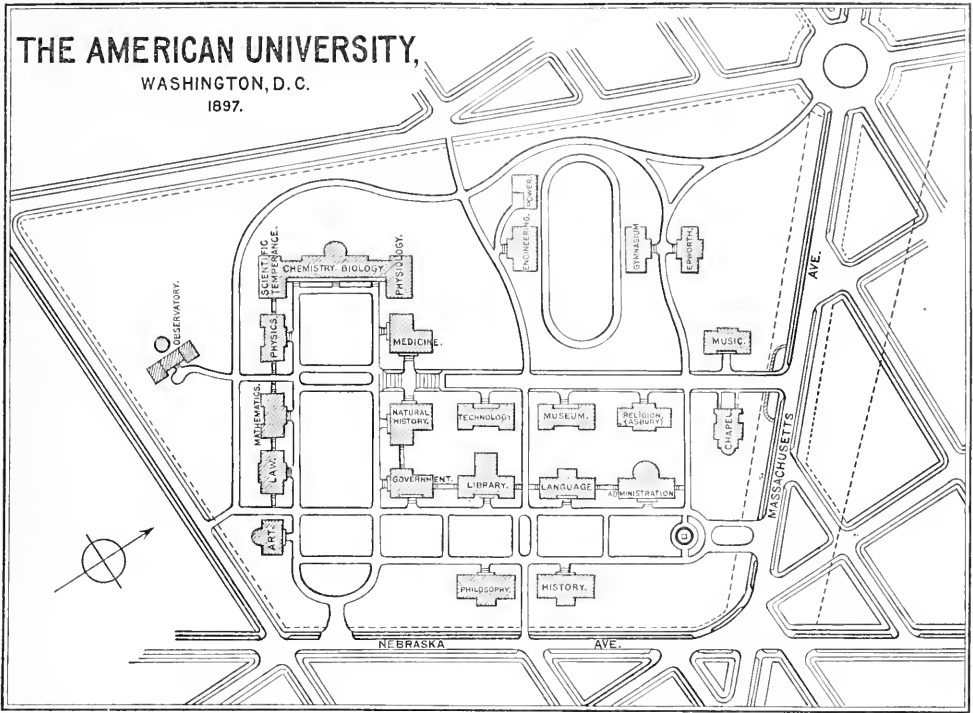

Achalone Heliotus.
 Achalone Heliotus, red.
 Agate, moss and fortification.
 Alum.
 Alabaster, white and pink.
 Antimony, Salinas, Cal.
 Apatite, Canada.
 Aragonite—very peculiar and beautiful; formed in a box leading
 the water from the timbers in the Overman Mine, Nev.
 Asphaltum rock.
 Borax, from Death Valley.
 Building stone.
 Calcareous tufa, ex Mono Lake.
 Calcite—very beautiful.
 Carnelian.
 Chalcocopyrite and corallite.
 Chalcedony, Geodes, and Jasper in almost every possible variety
 of form and color, representing the Pacific Coast.
 Chrysoprase.
 Cinnabar and trap.
 Copper, hydrosocyanite of.
 Coral, one, red.
 Dolomite, amber-colored, crystalized.
 Dolomite, variegated, beautifully crystalized.
 Diatomaceous earth.
 Feldspar, in eruptive rock.
 Fire-clay, Michigan Bar, Cal.
 Fossil.
 Garnets in mica schist.
 Glass, natives ex Orthoclase.
 Gold quartz—Indian and Burman.
 Gold quartz—California, Arizona, Nevada, New Mexico; fine.
 Graphite, ex Ceylon.
 Granite, rough and polished; representing the different quarries in
 the State.
 Granite, black; fine.

Gypsum, pink and other colors; ex native rock, to, and through the
 various forms to the plaster on the wall.
 Hydras calcium sulphate.
 Iron Pyrites.
 Igneous ferruginous rock.
 Jasper, with quartz and iron, with beautiful colors, variegated.
 Ka-so-lin-ite.
 Lava burling stone, California and Arizona.
 Lead ore.
 Lignite, California.
 Lithomarge, Modoc County.
 Marble, representing nearly all the marble-producing States of the
 Union; also representing all shades, variegated, mottled, etc.,
 etc., from black to white. California marble is well represented
 and compares favorably with Italian lying along side.
 Mascovite—white mica, 8x12 in.; fine.
 Obsidian.
 Old red sandstone, Flagstaff, Ariz.
 Onyx, beautifully variegated.
 Opals.
 Ostrich egg (*Onis Struthis*).
 Porphyry, red antique.
 Porphyry, variegated.
 Porphyry, bearing opals, California.
 Quartz, crystal, igneous, malachite, conglomerate, hexagonal, and
 prismatic, in chalcedony.
 Rhombic-carbonate of lime; very fine.
 Silver and gold ore, from Arizona, California, and Nevada; very fine
 and rich.
 Sulphur, native Sandwich Islands.
 Sard, San Bernardino County.
 Serpentine.
 Slickensides.
 Silicified wood; very fine.
 Spar, satin.
 Stone, artificial, for building; manufactured in San Francisco
 Tale, foliated; very fine.
 Terra cotta, stained and polished.
 Tin ore, Cassiterite.
 Trap-igneous ferruginous.
 Volcanic rock, Mojave Desert.
 Wellington coal.
 Wood, compressed from 12x12 to 12x3, taken from the 1,600-ft. level
 of the Consolidated Virginia Mine, Nevada.
 Wood, mountain mahogany, satin, bay, yew.
 Wood, *Lion-o-thum-sus As-plu-mi-to-li-us*.
 Wood, foliage of, in a box, from Santa Cruz Island of Santa Barbara,
 California.
 Wood, ex Old Charter Oak; very fine.

The Entomologist, Dr. George H. Horn, of Philadelphia, has left \$5,000 to the American Entomological Society, with his cabinet of insects, books and pamphlets lenses, microscopes and other appliances, with \$200 annually from his estate. He also gives \$1,000 to the Academy of Natural Sciences, and \$500 to the American Philosophical Society.

You Will Never Be Sorry

For living a pure life.
 For doing your level best.
 For being kind to the poor.
 For looking before leaping.
 For hearing before judging.
 For thinking before speaking.
 For harboring clean thoughts.
 For standing by your principles.
 For being generous to an enemy.
 For stopping your ears to gossip.
 For being as courteous as a duke.
 For asking pardon when in error.
 For bridling a slauderous tongue.
 For being square in business.
 For giving to the American University.

Plan of Grounds.

The above cut exhibits in outline the plan for the arrangement of buildings on the grounds of The American University. It was adopted in its general features by the Board of Trustees on May 5, 1897. The details of walks, trees, shrubbery, and decorations in the way of statues and fountains can not be shown on a plan of so small a scale. The College of History is 176 feet in length, and may be used as a scale of measurement. It is ex-

pected that grading will be continued during the year, and the planting of trees and shrubbery follow soon thereafter.

The entire track consists of 90 acres, quite varied and rolling in its contour, the elevations varying 100 feet. Not far from the center of it is a spring of good water sufficient for the development of artificial lakes.

Boston University Law School, **TEACHERS WANTED!**

New Hall, Ashburton Place.

.. 400 STUDENTS ..

E. H. BENNETT, LL. D., DEAN.

Opens October 6, 1898. Boston, Mass.

We have over four thousand vacancies for teachers each season—several times as many vacancies as members. We must have more members. Several plans: two plans give free registration; one plan **GUARANTEES** a satisfactory position for the coming Fall. Ten cents, silver or stamps, (the regular price is twenty-five cents) pays for a 100 page book, explaining the different plans, and containing a complete \$500.00 Prize Story, a true and charming love story of College days. No charge to employers for recommending teachers.

Address **REV. DR. O. M. SUTTON, A. M.,**
President and Manager, Southern Teachers' Bureau,
LOUISVILLE, KY.

John F. Waggaman,

Real Estate Investments,

700 14th Street N. W.

Washington, D. C.

I am agent for the beautiful suburban property known as Wesley Heights, situated opposite the site of the American University. This property has a great future, not only because the University is to be built opposite, but on account of its desirability as a resident part of the District of Columbia. I am also agent for lots in Morris' Addition to N. E. Washington, which presents a good field for investment for small amounts. All this property is laid out in conformity with the general plan of the city of Washington and is entitled to the city improvements. In addition, Washington, being the Capital of the Nation, is free from strikes and conditions that exist in manufacturing cities. I will make investments on first mortgages, secured on real estate, interest at 6 per cent. We will also purchase for you improved property that will pay between 6 and 7 per cent., after paying taxes and insurance. Now is the time to invest from \$250 to \$100,000. For further particulars write to above address.

THE UNIVERSITY COURIER

Devoted to the Interests of The American University.

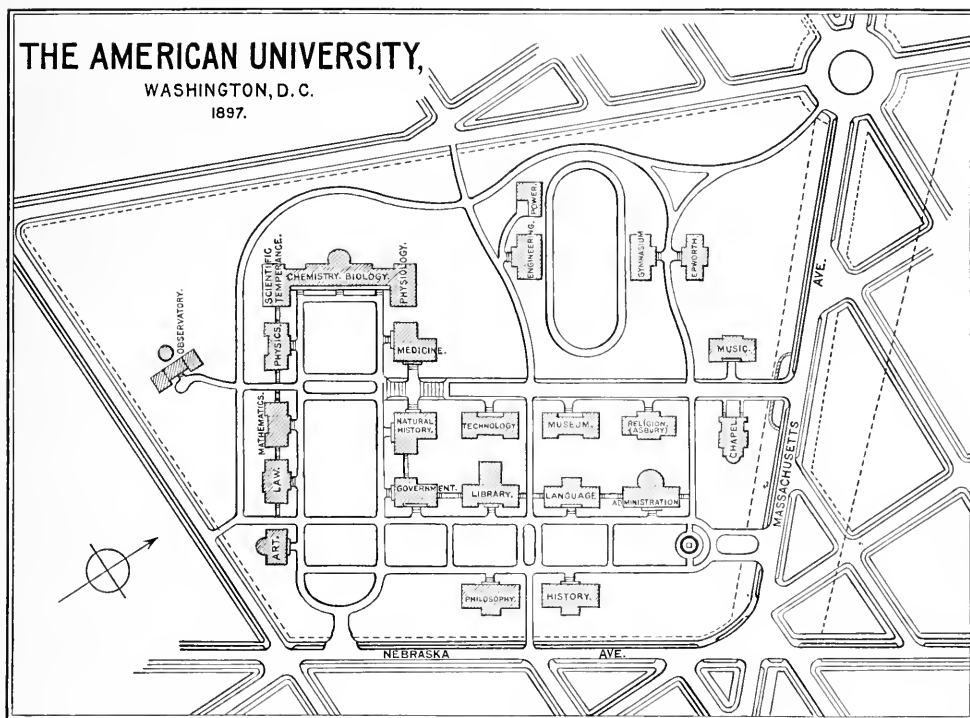

VOL. VI.

WASHINGTON, D. C. MARCH, 1898.

No. 3.

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

PLAN OF GROUNDS.

This plan of the grounds of the American University was adopted in its general features by the Board of Trustees. Some modifications are suggested, as, the placing of the "Library" where the word "Art" was put temporarily, and the erection of a "Teacher's College" in the place designated for the "Library." This plan gives a good idea of the proposed arrangement of the University work into departments and of the field it is expected to cover. The whole 90 acres will not be too much a few years from now. It is hoped that electric cars will be running along Nebraska Avenue within a year.

Gifts and Bequests.

Don, Clem Studabaker and wife have just given \$5,000 to De Pau University.

The Massachusetts Horticultural Society is to be enriched to the amount of \$300,000 from the estate of the late Francis B. Hayes, of Boston.

John D. Rockefeller has given \$200,000 to the University of Chicago to enable it to swell its income for the year beginning July 1, 1898, to \$720,000, the sum needed to carry out its work as planned.

By the will of the late Henry L. Pierce, Harvard University, the Massachusetts Institute of Technology, and the Boston Art Museum each receive \$700,000. Harvard will use up her share in building a reading room to the library.—Ex.

The sum of \$30,000 has been given to Harvard University by Mrs. William Belden Noble, of Washington, to endow a lectureship in memory of her husband, a clergyman in the Protestant Episcopal Church and a graduate of the Harvard class of 1885.

The Tucker memorial received a contribution of \$500 from Mrs. Lucretia R. Garfield, wife of ex-President James A. Garfield, through Prof. H. St. G. Tucker, of the Washington and Lee University.

W. C. McDonald, the millionaire tobacco manufacturer, whose gifts to McGill University already aggregate nearly \$3,000,000, recently gave \$250,000 more to the institution.

Mrs. J. B. Hobbs recently gave eight lots, valued at \$2,000 to the Lake Bluff Orphanage.

A San Francisco woman gives the Volunteers of America an orange grove of twenty acres, valued at \$10,000.

Mrs. Paul Breen of San Francisco gives \$30,000 for an arch in Golden Gate Park, as a memorial to her husband and sons.

Under the will of Mary McCarty, of Jefferson, Iowa, Drake University receives \$25,000.

One-half of the fortune of \$80,000 of the late William S. Allgaier, of Reading, Pa., is bequeathed to charitable institutions in that city and in Philadelphia.

An Episcopalian lady has left a bequest of \$5,000 and a residuary interest in her estate to the W. H. M. S. for the benefit of the Cunningham deaconess home and orphanage at Urbana, Ill.

Gen. Lew Wallace has announced that at his death his study will become the property of the city of Crawfordsville, Ind., for a public library. The edifice has just been completed in his beech grove at a cost of \$40,000, and is to be surrounded by an artificial lake.

Mrs. Tyndall, the widow of Professor Tyndall, has sent to the British Royal Institution \$5,000 which she states that her husband desired her, at such time as should be convenient to herself, to present as the expression of his attachment to the institution with which he was so long connected, and of his sympathy with its objects.

By the will of the late Charles C. G. Thornton, of Gloucester, Mass., \$2,000 is bequeathed to the Maine Missionary Society, \$1,000 to the First Congregational Church at Black Point, Scarborough, Me., and \$1,000 to Union Church, at Magnolia, Mass. At the death of his wife and daughter, \$50,000, of which they have the income during their lives, goes to the Thornton Academy, Saco, Me.

By the terms of the will of Miss Frances E. Willard, her estate will pass into the Woman's Christian Temperance Union Fund, after the life interests of her secretary, Miss Anna Gordon, and of her sister-in-law, Mrs.

Mary B. Willard, have expired. The property consists of "Red Cottage," at Evanston, valued at \$16,000, a small cottage in the Adirondacks, and \$3,000 in cash, which was presented to Miss Willard on her fiftieth birthday.

The lot upon which the First Church, Chicago, stands, is valued at \$1,500,000. The trustees have given \$600,000 to other Methodist enterprises in the city.

It has been computed that in the year just passed there was contributed in the United States by bequest or personal gift, to churches, colleges, charities, museums, art galleries, libraries, etc., an aggregate of \$33,612,814. Like contributions in 1896 were \$33,070,129; in 1895, \$28,943,549; in 1891, \$19,967,116. These statistics do not include the numberless small donations. Of the total amount as stated, there was given to colleges, \$10,203,450; to charities, \$11,785,626; to churches and religious societies, \$5,023,728; to museums and art galleries, \$1,218,000. Men gave \$50,233,378 of this, and women \$13,039,436. The largest contributions of the year are as follows: J. Pierpont Morgan, to charities, \$1,000,000; Mrs. Leland Stanford, to Stanford University, \$1,000,000; John Fred Martin, to churches, \$1,000,000; John B. Deering, to charities, \$2,000,000; Washington Covington, to colleges, \$1,000,000; George M. Pullman, for maintenance of a training school, \$1,200,000; P. A. B. Widener, for art gallery, \$1,000,000; Charles Condit, to charities, \$1,000,000; Henrietta R. V. Baker, to charities, \$2,000,000.

Items of Interest.

The highest salary of any college professor is \$20,000. Prof. Sumner, of Edinburg University, receives this amount.—Ex.

Yale annually buys \$7,000 worth of books for her library, Harvard spends \$16,000 for the same purpose, and Columbia \$43,000.

The entire collection of the Cyrus W. Field papers relating to the first Atlantic cable, has become the property of the National Museum, at Washington.—Ex.

Forty-one students have been dismissed from Stanford University, California, for inferiority in college work, immorality, and drinking habits.

The famous university at Cairo constitutes the strongest support of Mohammedanism, and has a far-reaching influence. Last year there were present over 7,000 students, representing all parts of the Islam world, from India to Morocco.

The University of Heidelberg was founded in 1385. Two American women recently received the degree of Ph. D. from Heidelberg, being the first American women to receive a degree from a German University.

Harvard has graduated more than any other college in America, the number of her alumni being 17,684. Yale stands next, with 16,765 graduates. The universities of Pennsylvania and Michigan each have over 10,000.—Ex.

Methodism last year had fifty-three colleges and universities, with a property valued at \$10,540,608, and \$11,500,000 endowments, 1,647 professors, and 25,090 students. She had twenty-five theological schools, with 1,252 students. She has in seminaries, colleges, etc., a total of 227, with a valuation of \$16,739,788, and an endowment of \$13,497,465, a total investment of \$20,200,000; and a total of 3,030 professors and teachers, and 47,830 students.

About 500 Liberal students marched to the Campo Di Fiore, Rome, and laid their wreathes upon the monument to Giordano Bruno, the Italian philosopher, as a reply to the action of the clerical students, who, attending the Pope's mass at St. Peter's on Sunday last, cheered the "Pope King."

EDITORIAL NOTES.

The American University Courier has been sent to most of the Pastors of the Methodist Episcopal Church. After this number it will only be sent to subscribers to the University Funds. Others desiring the Paper will please write the Courier, 1425 New York Ave., Washington, D. C.

PROGRESS is being made in different directions in developing the plans of the University. Among the more notable events since our last issue is the formal transfer of the College of History to the Building Committee by the contractor; the purchase of additional ground; the action of the Commission on Federation; and assurances that cannot yet be published concerning other buildings.

MR. JOHN J. BARNEIR, of Brooklyn, N. Y., has generously sent the Vice Chancellor \$250 to help on the good work of the University. May his example stimulate others to go and do likewise.

FIVE HUNDRED DOLLARS has been pledged and two hundred of it paid toward the purchase of additional ground made necessary by the location of Nebraska Ave. We hope to report a large list of names as giving toward this in the near future.

BOOKS have been sent to the Library and are thankfully received from Rev. J. C. Thomas, of New York, by the kindness of Dr. Smith, editor of Gospel in All Lands, Rev. Clark P. Hard, Rev. Salmon Steele, Rev. J. Haskall Keep, Mr. William Boogher, and others. The boxes of books sent by Dr. Dunn and Mrs. Dr. Harmon, are still unpacked, and the lists will be given later.

DR. A. A. LONG, of Constantinople, has our thanks for an immense document, such as has often burdened travelers, his Firman for Traveling in the Turkish dominions.

OLIVE B. WASHBURNE sends a fac-simile of the Ulster County Gazette of Jan. 4, 1860. It contains the announcement of the death of George Washington. It is from the estate of Rev. Elbert Osborne, the grandfather of the donor whom we thank for the interesting paper.

REV. THOMAS BILLING, and wife, of the Northern Minnesota Conference, subscribe \$10 to the Asbury Memorial Hall Fund. Their names were accidentally omitted when the list was forwarded from the Conference.

More Ground.

When the Site for the American University was purchased, the streets and avenues were not even mapped out for that part of the city. Massachusetts Avenue extended was soon after surveyed to the University site by the city engineer. Recently a map for all that section of the City has been prepared under the direction of the Commissioners of Washington. This in a general

way extends the plan of the Streets in the other part of the City to all suburban sections. This plan of streets about the University is shown to some extent in the "Plan" on the first page. Nebraska Avenue takes the place of what has been known as the Loughboro Road. This road, however, curved somewhat to follow the crest of the high ridge or plateau on which the University stands. When Nebraska Avenue was definitely located it was found that a triangle of ground was left between it and the University site, at the junction of this avenue with Massachusetts Avenue. This triangle was 8,550 feet long, and 135.4 wide at the base, making 63,743.9 square feet, and so, large enough for a row of small buildings between the Avenue and the University. It was seen at once that the University must possess this ground. The gentlemen who owned it made the University an offer, and although it was higher than the price paid per square foot for the site, yet its location, and its being the very cream of the Ridge, made it seem wise to get possession of it while the opportunity offered. The purchase was completed on January 3, 1898, and an effort is now being made to raise the \$9,500 which it cost. This enables the University to control, and hold in one block, all the ground within the four avenues shown on the "plan," and also the north side of Massachusetts Avenue to the dotted line. It rounds out the full 90 acres, and secures the dedication of Nebraska Avenue at once. It is hoped that the new avenue may be graded within a year, and electric cars be running on it before Jan. 1, 1899.

Asbury Memorial Hall.

The following payments on this building have been received from subscribers since the issue of December 1897:

\$100—Noble Frame; Alfred Smith. \$50—J. I. Buell, H. W. Hicks, Frank L. Wilson, \$25—J. F. Crouch, F. A. Gacks, J. M. Hinson, J. H. Littell, Arthur Oakes, Seth Reed, W. M. Ridgway, H. N. Van Duesen. \$20—T. M. Jackson, John Wilson. \$16.67—J. S. Hughes. \$15—J. B. Colley, M. L. Drum. \$13—Nimrod Snoddy. \$10—Aaron Coons, W. J. Keatley, J. Stansfield, F. D. Stevieck. \$8.34—I. M. Gault, C. L. Gaul. \$8.33—C. M. Wilder. \$8—C. H. Hundley. \$6.67—R. O. Payne. \$6.66—J. H. McIntosh. \$5—H. Baker, H. N. Brown, Samuel Brown, J. J. Cecil, Mrs. J. J. Edwards, C. F. Greene, J. L. Grice, C. C. Jacobs, E. M. Jones, Charles S. Kemble, J. T. Levton, D. M. Minus, Mrs. Benjamin Myers, E. M. Pinkney, John Priest, L. S. Rader, E. M. Smith, T. B. Snowden, F. L. Teague, J. C. Teter, W. S. Thompson, A. G. Townsend, J. R. Vandewater, B. L. Woolfolk. \$4—George Nixon. \$3.35—C. R. Brown, E. Forrest. \$3.34—Benjamin Brown, P. A. Daniel, W. M. R. Eaddy, T. H. Evans, J. F. Page, J. P. Patterson, J. R. Rosemond. \$3—E. J. Curry, G. W. Gault, A. S. Williams. \$2.10—E. M. Armstrong. \$2—J. A. Brown, J. C. Burch, P. O. Jamison, James Jenkins, C. Emma Lewis, J. H. Lockhart, J. H. Martin, E. B. McCauley, J. W. Parks, S. A. Peeler, D. J. Saunders, B. G. Smith, Thomas Thompson, T. H. B. Walker, E. L. Walls, W. H. Williams. \$1.75—W. Strickland. \$1.67—J. W. Brown, Scipio Green, S. J. McCray, J. D. Mitchell, J. W. H. Witherspoon. \$1.50 A. S. Carter, R. H. Debose, B. D. Lewis. \$1—E. W. Adams, W. B. Bowers, H. D. Boyd, J. T. Cannon, G. W. Cooper, Sarah A. Daley, A. Debose, E. Demsey, D. Johnson, W. S. Leak, J. Mayo, Cornelius Miller, C. H. Newton, Alfred Nichols, David Royal, E. Sabin, J. T. Terry, L. L. Thomas, D. L. Tubbs, E. Welsh, J. D. Whitaker. \$67—J. B. Crippen.

The College of Government.

A special effort is now being made to secure the erection of this building as a companion to the College of History. The one is the natural complement of the other. The need of such a College for the training of graduates in all that pertains to government is becoming more and more manifest. The crowding of men who have neither fitness nor training for their work into positions of great responsibility by mere influence or sheer political trickery cannot be much longer endured. As the bar, the pulpit and the practice of medicine has had to have restrictions placed around them so as to insure efficient service, so must there be trained men to serve in all the responsible places of government. The civil service must be remedied of some of its vicious defects or it would better cease to be. The Diplomatic and Consular service must be elevated and made worthy of the nation by putting into them men thoroughly trained in all their duties.

What a field there is here for study, especially for original investigation. Its curriculum should be based on a general knowledge of history, anthropology, ethnology, physical geography, governmental ethics, and the relation of religion to government. Then should follow a study of the origin, development and history of institutions, ancient, mediæval and modern. This would lead naturally to the present; the philosophy of the State; different forms of government; constitutions; powers and relations of governmental departments; municipal organization, problems and administration; laws and practices of elections. Then would follow jurisprudence; customary and statute law, rights, courts, methods of legislation, international law, treaties, and arbitrations. This leads naturally to diplomacies; the history of diplomacy, its methods, paleogeography; governmental representatives, their duties, and the customs and manners of Courts and Government circles. Then should politics be studied; the history of political ideas; political parties, their relation to the government and the relation of citizens to them; practical politics, and the ethical and Christian principles that should dominate them. The duties of the citizen, loyalty, patriotism, self government; the ballot, office bearing, and all that is meant by Christian citizenship should be mastered. The relation of Church and State should be investigated, covering religion as an essential fact in man's nature, the relation of the religions of the world to governments, and especially of Christianity in the early centuries, in the Middle Ages, under papacy, and in this country, with the duties of the citizen to each. Then what a field to-day in economics, its general history, its history in this country, its general principles, applications, problems, tariff, taxation, debts, credit, money, banking, currency, bimetallism, revenues, as from lands, monopolies, fees, licences, taxes, loans, all as affecting state, country, city and town. This would open the door to modern industrial improvement, wages, invention, commerce, labor organizations, trusts, pauperism, corporations, monopolies, roads, railroads, telegraph, distribution of wealth, interest, capital and labor, and the ethics of industries. Social Science might be the climax of all,

dealing with individualism, socialism, communism, co-operation, profit sharing, collectivism, all social problems, and ending in the general science of Sociology.

Such a brief outline suggests a course of study covering three years, that would be of immense advantage. Its practical value to the individual, and especially to the community and the nation must be apparent. From college graduates who have earnestly wrestled with the above hinted problems, there should come statesmen worthy of the name and needed in America to-day.

Where could such a college find the advantages that would surround it in Washington? If there be any statesmen, they are supposed to be here. Diplomacy has its seat in the capital. Here finance is wrestled with, legislation is in progress, courts from lowest to highest abound, and social questions are debated by masters. Here are specialists in all these lines who could be drawn upon for lectures and even professorships.

It is to be hoped that many may so see the value of such a department in the American University that soon the walls of this college may rise and its chair be endowed, so that its work may be begun with the new century.

American Methodism and the American University.

Rev. Dr. Palmore, editor of the St. Louis Christian Advocate, in discussing the points that might well be considered by the Commission on Federation between the two Methodisms, says: "We see no very great reason why both Methodisms should not unite on a great university at Washington, D. C., for post-graduates of Methodist colleges of all the world. If our national capital, with all its architecture, art, libraries, museums, natural history and botanical gardens, was roofed over it would be the University of the world, with the Washington Monument for a spire, or bell tower. A national Methodist University of this kind will serve as a much-needed barrier to the percolating, insidious, slowly-rising and encroaching waters of the Tiber. Eternal vigilance in the direction of Rome is the price of an enduring republic."⁷

Cheer from India.

Rev. C. L. Bane, M. A., one of the faculty of the Bareilly Theological Seminary, sends a contribution to Bishop Hurst, and says: "I have been greatly interested in your university at Washington, from the beginning, and have often wished to send you a small gift for it, and wish it were a thousand times larger. You may apply this to the fund for building Asbury Hall, if it is your pleasure. It gives me great pleasure to see that that hall is to have a large side for missions. I suppose it is this which has led me to send you this mite. May you continue to receive every encouragement in your magnificent and magnanimous effort to build up at Washington a great Christian University, which will be more and more as the years come and go, a mighty stronghold for the spread of Christian truth throughout the world."

Commission on Federation and The American University.

The Joint Commission of the Methodist Episcopal Church and the Methodist Episcopal Church South after recommending joint action of the two Methodisms on other matters, passed a strong resolution concerning Christian education. It deserves unusual consideration. We give this action in full:

"In view of the many efforts made to give a purely secular direction to all forms of education, we are convinced that the time has arrived when greater attention should be given to higher education under Christian auspices than ever before, and when the Church should feel its full responsibility for the wise and safe training of all its young people. We are approaching the close of the nineteenth century, and believe that our members should give some tangible expression of our gratitude to our Heavenly Father for the manifold blessings which have marked our progress.

Resolved, 1. This expression should take such practical form as will increase the efficiency of our higher institutions of learning.

2. That the years 1900 and 1901 should be the period for the presentation of the subject of higher education to all our people and of their gifts to the cause.

3. That it is the imperative duty of the Protestant Church to provide in the city of Washington a University—Christian, catholic, tolerant, and American—having for its sole aim post-graduate and professional study and original research, and that the American University is worthy of the confidence and benefactions of the people in all our churches; we therefore recommend that the claims of this institution be commended to both churches for special contributions during the closing year of the present and the opening years of the coming century."

This report will go to the General Conference of the Methodist Episcopal Church South, next May, and will doubtless be approved. It is unfortunate that the General Conference of the Methodist Episcopal Church does not meet until May, 1899, and action on the report must be delayed until then. Meanwhile this expression of "duty" should weigh with the Christian people of the whole country. Methodists especially should heed it. From North and South come expressions of congratulation and of strong feeling that here in the American University is a cause in which the two Methodisms can unite, and that united work to build up a great university in Washington would bring these two great churches together as no passing of resolutions or mere speeches of fraternization could do. We hope the people will not wait for further official action, but at once heed this call of the Commission and send to either of the officers of the University their pledges of gifts, or, what is still better, their gifts toward this great enterprise.

Rev. William D. Parr, of Indiana, writes, "We want no university under government control. Too many State Universities show what we could expect."

Federated Methodist Education.

The sixth paragraph and its three resolutions in the summary of the conclusions of the recent commission on Methodist federation deserve our separate and emphasized, if brief, mention. That paragraph should have the instant respect and obedience of the two Methodisms, South and North. We shall not marvel if several other American Methodist churches, whether "Episcopal," or "Non," become interested in the grand scheme of education shadowed forth. All Methodist branches will do well to consider and realize all possible wise schemes of immediate organized and consolidated university work. Again, it is old, and as true as old, to say that nearly all these branches have too many "universities." Each branch should organize its own plans, but they should be co-related to the plans of all other branches in certain respects. This is not a matter of choice. That co-relation is already forced upon American Wesleyanism! If we are not to be left hopelessly in the rear, made ashamed, if not actually superseded, we must make the educational plans of which the many churches acting in combination, at points, are entirely capable, if wise men lead. What a vista of reasonable and irresistible power and victory is thus outlined in the very statement! Each branch should have its own scheme of academy, seminary, and reorganized, definite college work, while all branches amenable to the inevitable argument may face the problem of the higher education with results that will command the enduring respect of the secular world. We seriously suggest and urge that such reasonable and possible plans are the sole conditions upon which the Church of Christ can stem the secular floods whose menacing crests are within sight of the shores of the present emergency.

Still more—all evangelical churches in the republic may well plan with respect to each other. America needs, and must have, a godly, educational bond. Secularism crowds them on the one side and Romanism, with its astute, silent, powerful and already formulated schemes, presses on the other. Let us pray that these walls may not become millstones. He surely must sleep who does not see the foregleams and jarrings of the rising and imminent struggle. That is the real "American conflict."

Who knows that that deadly struggle will not prove to be the real motive and basis of coming church union, applicable to far more than the over many Methodist churches in the republic?—Northwestern Christian Advocate.

Johns Hopkins Wants State Aid.

A bill has been presented in the House of Delegates, and both branches of the General Assembly have been memorialized concerning it, which has for its purpose an appropriation of \$100,000 annually for the aid of Johns Hopkins University by the State. This will make Johns Hopkins a State institution in every practical sense of the word. It will not add much to its secular spirit for that is already pronounced. It shows that it is not wise to plant institutions with the expectation that they will remain independent.

The College of History.

The picture of this magnificent structure on these pages is made from a photograph of the building, as it now stands with the grading completed around it. The illustration appeared recently in the National Architect and Builder of this city, with a flattering account of the construction of the building. The plans were the joint work of Architects Van Brunt & Howe of Kansas City and Wm. M. Poindexter of Washington, D. C. While the building had been practically complete for some weeks it was formally transferred to the Building Committee by the contractor, Mr. James L. Parsons, on Feb. 1, 1898. The building Committee consisted of Bishop John F. Hurst, Mr. John E. Andrus, Hon. M. G. Emery, Mr. John E. Herrell, Mr. A. B. Duvall, Dr. A. J. Palmer and Vice-Chancellor Samuel L. Beiler. In December, 1895, a Sub-Committee of Messrs. Emery, Herrell, Duvall and Beiler was appointed and on these the work and responsibility largely devolved. Mr. John B. Hammond was their representative and Superintendent.

The plan of the Grounds of the University will show the location of the College of History, facing on an open court which is entered from Massachusetts Avenue. The completion of this first of twenty-five splendid halls that are to be, marks an era in the history of the institution. It is a sort of first-fruits, a pledge of the future, and a type of what is to follow. Thoroughness has been the watchword of all who have had to do with the work. More showy types of architecture and methods of construction were refused. A more substantial building in all its details can not be found.

The earth beneath the foundations is of a very firm, homogeneous character and was carefully tested. On this a heavy bed of finely broken stone and cement was thoroughly packed and allowed to harden before the stonework was begun. Very large, heavy slabs of gneiss or bastard granite were then laid on the cement from which the solid walls of blue gneiss rose to the level of the ground. The back of this stone wall was covered with a heavy coat of pitch and then faced internally with brick. On this double wall, at the ground line, is a heavy course of light gray granite. Above this rises the wall of white marble that is from eight inches to two feet thick and backed everywhere with solid brick. There are 21,000 cubic feet of marble in the walls, half of it carved and moulded. No saving of marble by merely using it as a veneer was allowed anywhere. As an illustration of this it may be mentioned that the blocks making a part of the cornice at the corners of the front pediment weighed seven-and-one-half tons.

The marble is of the purest white seen in any building, and is of a remarkably hard and non-absorbing quality. The Columbian Marble Company of Rutland, Vermont, deserves great credit for furnishing so large a quantity of such stone, cut and carved, ready to be set in the walls, and shipped six hundred miles, within nine months time. The heavy copper roof was so put on that not a nail or screw pierces the metal anywhere and it extends clear out over the marble walls so that

THE COLLEGE

not a joint between the blocks is exposed to the weather. The design is pure Grecian, adhering to straight lines, and a severe simplicity. The massive marble columns supporting the front pediment, with their beautifully carved Ionic capitals, produce a most agreeable and artistic effect.

The great marble blocks and other heavy materials were hoisted by four large steam derricks, and so wisely and carefully was this done under the vigilant superintendent of construction, Mr. John B. Parsons, a brother of the contractor, that not an accident occurred, nor was a man injured during the progress of the perilous work.

Passing up the solid granite steps between the massive columns and across the marble-tiled porch, one enters, through heavy oak doors, the lobby hall, thirty feet square, tiled and wainscoted with beautiful Tennessee marble. A wide corridor, also tiled and wainscoted with the same material, extends from the hall to either end of the building where there are minor entrances, with large windows over the doorways.

Across the lobby from the front entrance, are two double doors, one leading to the historical library and

HISTORY.

the other to the historical museum. There are large, well lighted rooms, the latter fitted up with glass enclosed cases, and the former with adjustable shelving. At either side of these two rooms, is a small room, the one for the curator, the other for the librarian. The rest of this floor is arranged in four suites of three rooms each, planned so that one of each will be the workshop of the professor, another the work room of the students, and the other a lecture hall. As one passes from room to room he is impressed with the solidity. Every partition wall is of solid brick work, the ceilings are high, and the plastering of the adamant type, the windows large and numerous giving an abundance of light, the finish of the most beautiful and durable quartered oak, showing some of the handsomest natural graining in the District of Columbia.

Ascending either of the two roomy stairways, with their easy treads of solid oak and handsome balustrades, one reaches another corridor, extending the whole length of the building, on either side of which are four suites of rooms like those on the floor below, while over the library and museum is an assembly room fifty-five by sixty-five feet in size, rendered perfect in its acoustic

properties by the introduction of large quartered oak girders at the ceiling.

The lighting of this floor, and indeed of the whole structure, is a marked feature. Windows and sky-lights abound and there are glass transoms over every door. Arrangements are made for heating by steam, the radiators being placed by every window, and a simple device introduces fresh air under every radiator from under the window. The whole building is fitted up with the latest devised methods of lighting by both gas and electricity, the electrical wires being everywhere inclosed in tubes until they enter the fixtures or chandeliers. It is expected that the building will be heated from an outside power-house, though it is arranged so a furnace and boiler can be put inside if need be.

From this floor a stairway leads through the attic, where the large timbers of the simple construction show, to the level deck of the roof, which is arranged for the convenience of those who wish to gaze on one of the finest inland views ever found outside of a mountainous country. Over a circle of fifty miles diameter the eye wanders by hill and dale, river and mountain, farm and city, peaceful villas and historic battlefields, with the Congressional Library, Capitol dome and Washington monument as distinctive features.

On the way down it is well to notice that in no corner, or outer or inner wall, can the least crack be found that indicates any uneven settling. When one has reached the semi-basement story and looked at the solidity of walls, pillars and arches, he ceases to wonder. Here too is a substantial finish. The concrete floors in the corridor and the eight well lighted rooms, excellently adapted to certain laboratory purposes, are only surpassed by the four large toilet rooms, each a model in itself, all lined with enameled brick, and fitted up with Italian marble and a complete complement of Mott's most improved plumbing fixtures.

The structure is of slow-burning construction. The plastering is all on brick walls, so that there is neither studding nor lathing, save on the ceilings. The joists are all heavy and the floors durable with two sheets of paper and sea-weed and an inch of sand between. It would be almost impossible to force a fire through this. The material, woodwork, glass and hardware fixtures are of the best. Admiration is the word that expresses the judgment of all visitors.

The cost of the entire structure including the contract price of \$158,000, the architect's, superintendent, drainage, preliminary surveys and studies, with many incidental items is \$175,000.

Inability to collect all of the \$150,000 subscribed, and the difficulty of obtaining new subscriptions until the tide of prosperity fully returns, has made it necessary to borrow some temporarily from other funds, but from first to last the Treasurer has paid every bill on the first of each and every month. There is no encumbrance on the site of 90 acres, and not a dollar of loan upon this splendid College.

We are still looking for friends who will make up the deficiency, help in the furnishing and equipment, and increase the amount of endowment so that in the near future as thorough work may be done within these walls as has been done upon them.

A Government University?

The following educators are opposed to a National University:

Wm. F. Warren, LL. D., president of Boston University, said: "No nation without a National Church has ever evolved a nationally supported university worthy of mention."

F. A. Walker, LL. D., late president of Massachusetts Institute of Technology, said he was strongly opposed to the idea of a National University.

Prof. John Bascom, LL. D., says a National University is to be objected to on the ground that there is no demand for it. "An extreme secular temper would be sure to prevail in such an institution. Its moral force would sink to a minimum."

Dr. J. L. M. Curry, secretary of the Slater Fund, is quite outspoken in his opposition to the scheme of a National University.

Prof. E. P. Seaver, Superintendent of Boston Public Schools, says such a scheme would be impractical, have no promise of usefulness, and assure no freedom in teaching.

The great churches are practically committed to another policy by having their own institutions, or by action of their legislative bodies.

The Baptists have Chicago University as their center, and Columbian in Washington.

The Presbyterians are committed to Princeton and other institutions.

The Catholic Church is building a great university for itself here at the National Capital.

The Methodist Episcopal Church, and the Methodist Episcopal Church South, are committed by their General Conferences to The American University.

The supreme legislative body of the Protestant Episcopal Church, in 1871 adopted the following:

"Resolved, That, except where weighty local or special considerations intervene, it is our duty to sustain our own educational institutions by our gifts and patronage."

LETTERS.

These letters from the heads of Universities and Colleges show their position:

Harvard University,
Cambridge, Jan. 1, 1896.

My Dear Sir: Your pleasant letter of December 30th came to hand yesterday. I regret to say that I am not able to join you in advocating the establishment of a University of the United States. * * * I perceive that you have endeavored to make your bill more acceptable than preceding bills to existing institutions; but if the proposed University has any function at all, it must prove to be a competitor with existing universities. Now, we have too many universities in the United States already. If the Government wishes to go into university work, it should, in my opinion, strengthen the universities we have, and not build another.

As to the local needs of the City of Washington, they are surely to be well supplied. The Columbian University, the Catholic University, and the new American University will supply the local needs of the District.

Within the last twenty years so much progress has been made in civil service reform that one may be per-

mitted to hope that the University might be partially exempted from the operation of the spoils system; but in my judgment that exemption would be by no means complete even then. I can not feel sure that the professors of philosophy, sociology, political economy, history, constitutional law, and international law, in a National University at Washington would be free men. For these reasons, among others, I find myself quite unable to support the bill which has just been put before Congress. Very truly yours,

CHARLES W. ELIOT.

Columbia College,

New York, February 20, 1896.

My Dear Governor: What I believe to be meritorious in your enterprise is the proposition to make available for students the great collection of books and other objects that already exists in Washington on so splendid a scale, and that are certain to increase in value and importance, decade by decade. I am also sensible of the sentimental attractiveness of a University of the United States. When I have said this I am obliged to say that I see the project in two different but fundamental dangers. On the one hand, there is danger that the University of the United States may exist only in name, and so far from contributing to the scientific prestige and importance of the country, may be a source of shame to all those who are interested in the higher education.

On the other hand, if it should be really a strong and powerful University, animated by the highest ideals, and endowed with adequate resources from the Treasury of the nation, I do not see how it can fail seriously to interfere with the work that is being done by the old and large foundations of the eastern part of the country. These institutions are already doing important and valuable work for graduate students, and are by no means confined, as you seem to suppose, to undergraduate instruction. If they are called upon to compete in the future with a National University supported by taxation, in which there shall be no charge for tuition, it seems inevitable that the effect upon these institutions can not be otherwise than harmful. * * *

I am, dear Governor, yours most faithfully,

SETH LOW.

The following action is very significant in view of the fact that Mr. Pepper, ex-provost, argued in favor of a national university at a hearing before the Senate Committee to establish a University of the United States, and was supposed to represent the feeling in the University of Pennsylvania:

University of Pennsylvania, Office of the Provost,
Philadelphia, March 6, 1896.

The attention of the Trustees of the University of Pennsylvania has been called to the proposed act to establish a "University of the United States." At the last meeting of the corporation I submitted a copy of the act and requested an expression of opinion upon the proposal. The sentiment was quite unanimous that there were few things which the Government of the United States is so illy fitted to do as to conduct a great university; that this was a matter that unquestionably should be left to local enterprise and local support. If some arrangement could be made by which advanced students throughout the country should have the benefit of the vast collections of the United States Government in Washington for purposes of study, that would be an excellent arrangement; but it does not seem to us that this would require any elaborate machinery, nor the foundation of a "University of the United States."

Very truly yours,

CHAS. C. HARRISON,
Provost.

Yale University,

New Haven, February 23, 1896.

The plan of establishing a National University in Washington by Congress seems to me an undesirable plan. I think such a university unnecessary. It seems to me much better that institutions of this character in our country should be sustained by private gifts and efforts, and I doubt the wisdom or propriety of governmental appropriations of money for such purposes.

Very respectfully yours,

TIMOTHY DWIGHT.

Emory College,

Oxford, Ga., February 22, 1896.

My Dear Sir: I beg to say that I am emphatically opposed to a National University by the General Government. (1.) It is an unconstitutional institution. (2.) It is an unnecessary institution. (3.) It would be a most vicious institution, educationally and politically.

You are at liberty to use this as you please.

I am, yours sincerely,

W. A. CHANDLER.

Luther College,

Decorah, Iowa, February 21, 1896.

I make haste to inform you that I, in every essential point, most heartily agree with the "arguments," vs. (a National University) and am not in favor at all of any bill for the establishment of a university controlled and supported by the Government of the United States.

Yours respectfully,

LAUR. LARSEN,
Pres. Luther College.

Upper Iowa University,

Fayette, Iowa, February 23, 1896.

* * * I have very decided convictions against the General Government founding a University at Washington. Recent tendencies in the country and political life lead me to believe that such an undertaking would not be a success, and not in the interest of the highest and best scholarship.

Yours very truly,

J. M. BISSELL.

Randolph Macon College,

Lynchburg, Va., February 19, 1896.

Dear Sir: I think the standard argument against enlarging the sphere and functions of the General Government, multiplying offices and undertaking what can be safely left to individual enterprise and philanthropy, coupled with the present condition of the National finances, will avail now, as for so many years past, when conditions seemed much more favorable, to prevent the proposition for a University in the United States becoming a law. We are against centralization in this section. Yours sincerely,

Wm. W. SMITH.

Tabor College,

Tabor, Iowa, February 21, 1896.

Dear Sir: I heartily agree with your position as opposing the foundation of a National University to be supported by the Government.

We do not need such a university, as the state and denominational colleges and universities cover the ground thoroughly.

Sincerely yours,

R. C. HUGHES.

THE PRESS.

The press is uttering its voice about such an institution also.

The Independent says, concerning an institution that Congress is to be asked to create: "We have no word to say in favor of a national university at Washington, to be supported by the United States government. There is no call for such an institution."

The Evening Star, Washington, D. C., says,

"The committee on the establishment of a national university is composed of Senators Wellington, chairman; Frye, Nelson, Foraker, Deboe, Jones of Arkansas, Turpie, Walthall and Clay. Five of these Senators are either positively opposed to the bill, or are inclined to be opposed to it, while of the other four, Senator Wellington is heartily in favor of the measure, as Senator Frye is supposed to be, while Messrs. Foraker, and Deboe are not regarded as being pronounced in their views."

The Western Christian Advocate, Cincinnati, O., says:

"The adroit attempt is made to enlist women to secure a penny apiece on Washington's birthday from the public-school children of the United States to create the nucleus of a fund of \$250,000, for a building to be known as the Washington Memorial Building, and to be the administrative building of a National University such as Washington is said to have contemplated by certain devices in his will. Let the people go slowly. This is a skillfully-planned flank movement to compel Congress to create and establish a National University. It has not decided to do so. It is not likely to. If it should, such a university would be a political foot-ball, the object of partisan strife and the source of endless disputes. Religion would have no place in it. It would become the citadel of sneering infidelity, and the workshop of scientific atheism. Our American University, in the control of which five great denominations are represented, would be far safer and better for our graduate youth. Affiliated denominations will yet girdle the Capital with Christian universities of the highest grade, availing themselves, without taxing the nation, of all the great scientific and literary resources of the political metropolis of our Nation. The present Washington penny project is 'penny-wise and pound-foolish.'"

A Journal in Syracuse, N. Y., says:

"Several good women, with patriotic intentions, have undertaken to raise a fund for a national university at Washington. They want to carry out George Washington's suggestions for the establishment of a great university at the Nation's capital.

The motives of these patriotic women may be commendable, but the wisdom of their course is not so plain. The United States is not suffering at present for a lack of universities. It has plenty of colleges and institutions of higher education. What it does need is to put some of them on a better footing and equip them with such resources that they can do all that is expected of them.

If there was ever a time when a national university was needed at the capital, that time has passed. It used to be said that it was necessary for an American student to go abroad to get adequate instruction in almost any kind of postgraduate work. That time has passed. The graduate work carried on at Johns Hopkins University, at Harvard, Yale, Chicago, and some other universities, will compare favorably with the graduate work at European institutions. It should be the aim to strengthen American universities, and make them still more useful and effective and not create another which must necessarily divide the patronage with them and encroach upon the field which they are endeavoring to fill. So far as Washington is concerned, the foundations have already been laid for two universities there, (the Catholic University and the American University), which, in the minds of their projectors, at least, are to have a national scope of the highest university type. * *

If the patriotic women who propose taking up penny collections for another university at Washington will center their efforts upon one or two or three of the existing institutions of higher learning in this country, they will be doing the cause of education much better service.'

“The Human Reaction.”

Professor David Starr Jordan, as a scientist, is accorded an honorable place. As the head of a growing university he fills a position of increasing importance. As an honest inquirer after truth in every field and an outspoken defender of what he believes to be true, he is worthy of all praise. But because he influences so large a number of young men and women, we regard any half-truth uttered by him exceedingly dangerous. When he speaks as a scientist, we are glad to listen. But when he assumes to speak upon the philosophy of prayer, we feel constrained to ask people to pause and consider the trend of his teachings. We have no evidence that he has pondered all sides of this vast question so as to speak with authority. He has a right to his opinions; freedom of expression, under proper circumstances we freely grant. But his definition of prayer as “the human reaction” we can not accept as either scientific or final. It expresses only half the truth. It is no doubt true that prayer has a purely subjective side. Human beings in all ages, when in trouble, have been wont to pray. As Holland so truly says, every true man in distress finds rising from within him something very like prayer. And no doubt the habit of prayer itself tends to put men into better ways of thinking and doing. The longing after moral excellence tends to make a man more excellent; the desire, the prayer for purity, gentleness, moral power, helps a man to gain these virtues. This is the subjective power of prayer—“the human reaction,” if you please. But is this all? If so, the effect of a man praying to the sun or moon would be the same as if he prayed to Jehovah. On such a basis the man who prays to a stone would be as well off as the man who prays to the Lord Jesus Christ. No thinking man needs to be told that this is not the Bible theory of prayer. With Dr. Jordan’s statement that nature “is as indifferent as the multiplication table,” we have no quarrel, unless he means to identify nature as God.

But we pass that for the present. For it is the doctrine of prayer to God as a Person with which we have to do—the God who “made the worlds,” who “upholdeth all things by the word of his power,” the God who reveals himself as our Father, “the Father of our spirits,” and the Father of our Lord Jesus Christ. Dr. Jordan says: “Nature neither loves nor hates. She is neither good nor cruel. She is merely the truth of God—the God we know or can worship.” We cannot be sure what this is intended to mean. But if the words mean anything, it would seem to be that God is cold, inexorable law, “just keeping on the same, calmer than clock-work and not caring.” We do not pause here to say that neither science nor philosophy knows of any law that is not in the last analysis the expression of will, the outgoing of the energies of a person. What we do care to say, and to say with all the emphasis we can command, is that God does “care;” that is the burden of the teachings of Him who spake “as never man spake;” it is the theme of the whole Bible, the refrain of every sweetest psalm. God’s care for men explains the Cross, which is, so to speak, its culmination and complete expression: “For God so loved the world that He gave his only begotten son, that whosoever believeth in him

might not perish, but have eternal life.” Does God promise to forgive the sin of the penitent? Then prayer is encouraged. Surely, God cares. Will he restore the lost joys of salvation to a soul that has fallen into transgression? Again is prayer encouraged. God does care. Will he “give his Holy Spirit to them that ask him?” What is that but prayer? Does not God care? But is this no more than “a human reaction?” Surely the Bible is a meaningless or misleading book, if this be the true philosophy of prayer.

But the “human reaction” theory of prayer leaves no room for the incoming of the Spirit of God into the soul, or the shedding abroad therein of the love of God “by the Holy Ghost which is given unto us.” Human reaction is powerless for spiritual good, unless there follow divine action as its answer. The Son of God agonizing in the garden surely received some supporting power other than the boot-strap influence of “the human reaction.”

The German Doctorate.

Public Opinion recently condensed an article in the New York Evening Post which shows that more thorough work is being done for the Ph. D. degree in several American Universities than is being done in Germany. This is true in political economy and the social sciences, while the American institutions have the advantage of looking at things from a new-world point of view. In sociology and history Paris gives better advantages than even Berlin. This is also true in paleontology and administrative law. The Germans seem to lack in breadth in constitutional law, and the political sciences.

For one who is to spend his life amid the associations of the New World, there would be decided advantages in pursuing such studies in America. After the student has taken his doctorate, and become familiar with this field of study from the American point of view, a few months abroad for comparative work might be of great advantage. That this is to be the plan of the future looks more and more likely.

Home for General Conference.

The recent appointment of a Commission on the Seat of the next General Conference recalls the article by Mr. James B. Hobbs, of Chicago, in the Northwestern Christian Advocate, suggesting that a building for a permanent home for the General Conference be erected on the grounds of the American University. The suggestion is worthy of consideration. The difficulties of the present method of preparing especially for each session is more and more manifest. The quadrennial expense necessary would more than pay the interest on such an investment. The advantages that would accrue from a permanent home are well set forth by Mr. Hobbs. Washington is a delightful place in May, and there is no city that could better provide comfortable homes for the delegates than could the Capital in its many hotels and first class boarding houses. We hope our friend Mr. Hobbs will continue the agitation, and that he may see his suggestion a reality.

Book Notices.

[The Editor will be glad to give brief notices of such books as are appropriate to the Courier. Copies of volumes sent for notice will be placed in the University Library.

DONATED TO THE LIBRARY.

REV. CLARK P. HARD, HAMMOND, ILL.—"The Imperial Gazetteer of India," by W. W. Hunter, LL. D., Nine Volumes, Trubner & Co., London, 1885.

This is a valuable gift from Bro. Hard who was in India as a missionary from 1874 to 1878 and from 1882 to 1893. Lord Mayo, Viceroy in 1858, appointed Dr. Hunter to the head of the Indian Statistical Department. These nine volumes represent the essence of 150 volumes. It is not a bare survey of the matters dealt with. It sets forth the fruits of the authors' personal and long protracted researches, and forms a monument of Dr. Hunter's knowledge of the topography, agriculture, administration, and health aspects of the whole Empire of India.

REV. J. HASKELL KEEP, ALFORD, MASS.—"Eight Charges to the Clergy," by Thomas Secker, LL. D., Rivingtons, London, 1780.

This volume contains the autograph of Rev. J. Morse, in all probability the Rev. Jedediah Morse, the founder of Andover Theological Seminary. It was also once the property of Bishop Chase, the founder of Kenyon College.

A FRIEND.—A True Memorial of the Ancient, Most Holy and Religious State of Great Britain, Flourishing with Apostles, Apostolical Men, Monasteries, Religious Rules, and Orders, in great number in the time of the Britains; and Primitive Church of the Saxons. By Richard Broughton. Published by G. A. P. Permissu Superiorum. 1650.

REV. SALMON STEELE, NORTHPORT, MICH.—"Discipline of the Methodist Episcopal Church." Daniel Hitt and Thomas Ware. 1813.

Bro. Steele purchased this volume in 1828, the day after he joined the Church. He is now 86 years of age, has been in the Michigan Conference 59 years, and preached twice and administered the sacrament twice Jan. 30, 1898.

WESTERN NEWS COMPANY, CHICAGO.—"Can a Man Live Forever?" By J. Emile Hix. 1898. 8c.50 cents.

This is an interesting work of fiction built on what seems correct anatomy and physiology, telling how the question of the title was answered in the affirmative by scientists of the next century.

GEORGE BRONSON REA, BROOKLYN, N. Y.—"Facts and Fakes about Cuba." By George Bronson Rea, (Field Correspondent of the New York Herald). George Munro's Sons, N. Y., 1897.

This is a volume from one who has been on the field, seen with his own eyes, and though formerly favoring the Cubans, has changed his mind and writes this book

to show that the Cuban sympathizers have misled the Press, and the Cuban's cause is not worthy of American sympathy.

PAMPHLETS.—Mr. William Boogher sends the Reports of Board of Trustees and Courses of Study for Schools of the District of Columbia for years 1887 to 1895, and other pamphlets. Swami Vivekananda and his Guru. Experimental Psychology by Rev. John Brigham, Ph. D., New Constitution of Cuba. Duties of Physicians in their Profession by Dr. Buscy. Address of Regent J. B. Reinstein. Debate on Equitable Protection. The Pisgah of the Century by William Fletcher King. "New Jersey Day" Addresses by Gen. James F. Rusling. Journal of School Geography, 1878. Golden Ascent of the Sea, or Ocean Grove. Report of Boston Board of Commissioners on Parks, 1897. Book Reviews. American Humane Association, 1897. Charitable and Reformatory Institutions in District of Columbia. The Law of Love. The Pulse. The Pathfinder. Literature. Applied Microscopy. Vassar Miscellany. The Ariel. Journal of Worcester Polytechnic Institute. The School Physiology Journal. Studies in Yale Psychological Laboratory. Princeton Bulletin. John Hopkins Circulars. Wesleyan University Catalogue, Bulletin and Supplement to Alumni Record. Haverford Catalogue. William and Mary Monthly. University of California Register. Maine Seminary Catalogue. Religious Census of State Universities.

U. S. DEPARTMENT OF AGRICULTURE.—Experiment Station Work.—H. Experiment Station Record, Vol VIII, No. 12. Vol. IX, No's 3, 4, and 5. Monthly List of Publications. Dietary Studies in New York City, 1895-96.

SMITHSONIAN INSTITUTION.—Notes on Trematode Parasites of Fishes. Notes on Cestode Parasites of Fishes.

CALIFORNIA STATE MINING BUREAU.—Prof. Henry G. Hanks State Mineralogist, the Fifth and Sixth Annual Reports.

CAPT D. D. GAILLARD, Corps of Engineers, U. S. A. Report on Bridge Across Rock Creek.

Spiritual Life in Colleges.

Certainly the spiritual life of Christian and even state institutions is of prime importance. The growth of drunkenness in certain institutions is of grave significance. But if the colleges be not spiritual centers, are not the nearby pastors to a large degree responsible? What pastoral work can be more precious than that bestowed upon the students in their rooms, by pastors of neighboring churches? To talk over life with them, to show the interest of the churches in their future, to kneel down and pray with them would be quite as well as to stand aloof and criticize. The college community is a largely untouched field among pastors. And what field is of greater moment or promise?—Rocky Mountain Christian Advocate.

BOSTON UNIVERSITY LAW SCHOOL,

E. H. BENNETT, DEAN.

New Hall,
Ashburton Place.

Opens October 7.

BOSTON, MASS.

The Pathfinder

The first and only paper presenting every week all the history-making news of the world, intelligently digested and logically classified for busy people. It is clean, condensed, comprehensive, non-partisan, truthful. Are you disgusted with the filthy, sensational, padded dailies? Do you find the old weeklies incomplete, unneeded and expensive? Are you ready for a newspaper that really gives you all the important world's doings in a nutshell—a paper that you can confidently commend to your family and your friends? THE PATHFINDER is Your Ideal. It costs only \$1 a year. Send in your subscription, mentioning the COURIER, or at least send postal for sample copy. Address

THE PATHFINDER, Washington, D. C.

JOHN F. WAGGAMAN,
REAL ESTATE INVESTMENTS,

700 14TH STREET, N. W., WASHINGTON, D. C.

I am agent for the beautiful suburban property known as Wesley Heights, situated opposite the site of the American University. This property has a great future, not only because the University is to be built opposite, but on account of its desirability as a resident part of the District of Columbia. I am also agent for lots in Morris' Addition to N. E. Washington, which presents a good field for investment for small amounts. All this property is laid out in conformity with the general plan of the city of Washington and is entitled to city improvements. In addition, Washington, being the Capital of the Nation, is free from strikes and conditions that exist in manufacturing cities. I will make investments on first mortgages, secured on real estate, interest at 6 per cent. We will also purchase for you improved property that will pay between 6 and 7 per cent. after paying taxes and insurance. Now is the time to invest from \$250 to \$100,000. For further particulars write to above address.

THE UNIVERSITY COURIER

Devoted to the Interests of The American University.

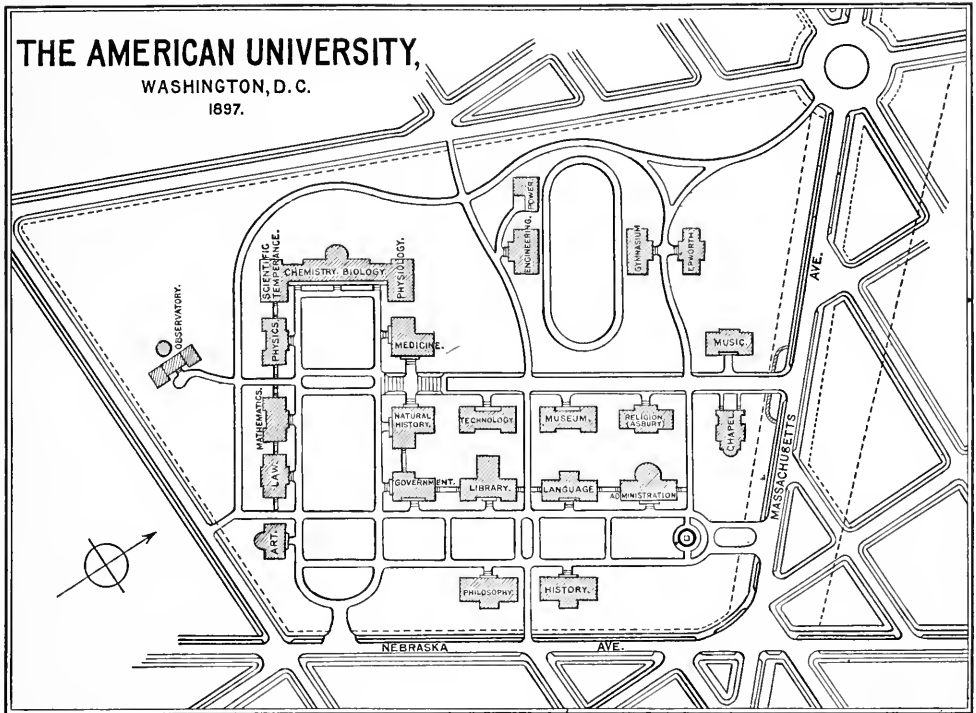

Vol. VI.

WASHINGTON, D. C. JULY, 1898.

No. 4.

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

PLAN OF GROUNDS.

The above cut exhibits in outline the plan for the arrangement of buildings on the grounds of The American University. It was adopted in its general features by the Board of trustees on May 5, 1897. The details of walks, trees, shrubbery, and decorations in the way of statues and fountains can not be shown in a plan of so small a scale. The College of History is 176 feet in length

and may be used as a scale of measurement. It is expected that grading will be continued during the year, and the planting of trees and shrubbery follow soon thereafter.

The entire tract consists of 90 acres, quite varied and rolling in its contour, the elevations varying 100 feet. Not far from the center of it is a spring of good water, sufficient for the development of artificial lakes.

Gifts and Bequests.

The late Sir William Fraser bequeathed more than \$150,000 to the University of Edinburgh.

Andrew Carnegie has subscribed \$20,000 toward the proposed new Allegheny observatory.

Miss Helen Gould has endowed the school of engineering, University of New York, with an additional \$10,000, which brings her benefactions to a total of \$60,000.

Hon. Henry S. Little, of Trenton, N. J., gives \$100,000 to Princeton University to erect a companion dormitory to Blair hall on the campus.

At a meeting of the board of regents, of the University of California, Miss Phoebe Hearst offered to construct and equip at her own expense a building for the college of mines.

Oliver H. Payne has given \$500,000 toward establishing a new medical college in New York as a Cornell University department.

The Methodist Orphans' Home of St. Louis, a benevolent institution of the Church South, just comes into possession of a gift of \$350,000 made by the late Dr. Chas. H. Bradford. He was not a member of that church, but his mother was.

An Easter gift of \$320,000 has been handed to the University of Chicago. The donor of almost one-half of the amount is unknown, save to President Harper and the board of trustees.

The late Mrs. Julia W. James, of Boston, left nearly all her estate, valued at \$512,069, to the museum of fine arts and the institute of technology.

Dr. Elizabeth H. Bates, of Port Chester, N. Y., has made a bequest of \$135,000 to the University of Michigan, the income therefrom to go to the establishment of a chair in the medical department devoted to diseases of women and children, to be known as the Bates professorship.

The late George Russell, of Aberdeen, Scotland, left \$75,000 for the benefit of scavengers and policemen.

John D. Rockefeller has given \$72,000 to Wayland Academy, Beaver Dam, Wis.

The University of Chicago has received a gift of \$150,000 from an anonymous donor.

Mr. Andrew Carnegie has given \$50,000 for a technical School at Durnferline, Scotland.

Mrs. Amos R. Eno, recently deceased, left \$50,000 to Anherst College.

The Teachers' College, Columbia University, has received \$65,000 from four interested friends.

The will of Jacob Tome gives some \$3,000,000 to the Jacob Tome Institute, of Port Deposit, Md.

Henry S. Little, of Trenton, N. J., has given Princeton University \$100,000 to erect a new dormitory.

On April 1, the State Legislature of Maryland passed a relief bill appropriating \$50,000 for two years to Johns Hopkins University, which is in financial difficulty.

The New York Independent gives this pleasing information: "Francis A. Palmer, president of the Broadway bank, has established the 'Francis Asbury Palmer fund,' starting it with a gift of \$400,000, the income of which is to be used for the advancement of home missions and of

educational institutions, to assist evangelized churches, missions and schools, to help needy persons who desire to become Christian ministers, and to establish in colleges and schools Bible teachers and lecturers. It will be under the charge of a board of directors of which Mr. Palmer is president, and most of the others are leading men connected with the Christian Connection."

Gustave Moreau, the French artist, has bequeathed to the Academy \$20,000 to establish a triennial prize to be awarded to the most remarkable work produced in three years preceding the award in painting, sculpture, architecture, engraving, or music.

Educational.

Yale annually buys \$7,000 worth of books for her library, Harvard spends \$16,000 for the same purpose, and Columbia \$13,000.

The highest salary of any college professor is \$20,000. Professor Sumner, of Edinburgh University, receives this amount.

Governor Black has signed the bill providing that five per cent of the excise moneys of New York city shall be applied to the teacher's retirement fund. The board of education will apportion the money among the various boroughs in proportion to the number of teachers employed and the amount of their salaries.

The latest published list of university settlements enumerates 71 in the United States, 41 in England, 6 in Scotland, 1 in Bombay, India, and 2 in Japan, a list of 124 settlements of the world.

A fellowship for women has just been created in the American school for Classical Studies at Athens, yielding an annual income of \$1,000. It is founded in memory of Miss Agnes Clara Hoppin, by members of her family, and is to bear her name. The donors wish that the fellowship be awarded without competitive examination, and that a preference be given in the candidacy to those who have spent a year in Greece in connection with the school.

The eight largest universities in the world are on the other side of the ocean. They rank as follows: Paris, Berlin, Vienna, Madrid, Naples, Moscow, Budapest, and Munich. Harvard, the largest American university, ranks ninth, having risen from the tenth place during the last year. The University of Michigan has risen from the eighteenth to the seventh place, Pennsylvania from the twenty-first to the twentieth, Yale from the twenty-fifth to the twenty-third, while the University of the City of New York has fallen from the forty-ninth to the sixty-first. The relative order of the ten largest American universities is: Harvard, Northwestern, Michigan, Pennsylvania, Minnesota, Yale, California, Chicago, Colorado and Cornell.—*The School Journal*.

When Bishop Hurst gets ready to select the Faculties for the American University, at Washington, he will have hard work to pass by the Ohio State University, where some of our most promising young Methodists have already won distinguished recognition. Joseph Russell Taylor, assistant in English, whose verse has place in the best magazines, and bears every promise of laureateship, comes from a Methodist parsonage. And now from a Methodist home, in an almost prehistoric line of Methodist homes, comes Murray Peabody Brush, as assistant in Romance Languages, and destined to the highest rank in his chosen field. His scholastic record reads: A. B., Princeton, '94; Ph. D., Johns Hopkins, '98. Between the two was honor work abroad. Methodism has good reason to be proud of her young scholars.—*Western Adv.*

Meeting of the American University Trustees.

The semi-annual meeting of the trustees of The American University was held May 25th at 10 o'clock, at the Arlington Hotel, Washington, D. C. In the absence of the President of the Board, Mr. John E. Andrus, of New York, who was detained by illness, Rev. Charles H. Payne, Corresponding Secretary of the Board of Education, presided. Among others present, were Rev. Dr. A. J. Palmer, Missionary Secretary; Rev. Dr. Jesse L. Hurlbut, Corresponding Secretary of the Sunday School Union and Tract Society; Rev. Dr. James M. Buckley, editor of the Christian Advocate, and Mr. Anderson Fowler, all of New York; Rev. David H. Carroll, of Baltimore; Bishop John F. Hurst, Chancellor; Hon. Matthew G. Emery, Treasurer; Mrs. Elizabeth J. Somers, Mr. A. B. Browne, Mr. B. F. Leighton, Mr. John E. Herrick, Mr. A. B. Duvall, and Rev. Dr. W. H. Milburn, Chaplain of the United States Senate, all of Washington; Rev. Dr. Samuel L. Beiler, of New York; Prof. William W. Martin, of Nashville; Rev. Charles W. Baldwin, Secretary, and Rev. Albert Osborn, Registrar.

The Chancellor announced the completion of the College of History, and its acceptance by the Building Committee. He also reported that a triangular addition of one acre and a half of ground to the site had been purchased, at a cost of \$9,500, giving to the University a complete frontage on Nebraska Avenue on the east. Prof. William W. Martin, formerly of Vanderbilt University, was elected Secretary of the University, Rev. Charles W. Baldwin remaining Secretary of the Board of Trustees. Bishop Willard F. Mallahan, of Boston, and Rev. Dr. John O. Wilson, of New York, were elected members of the board of trustees.

After adjournment at 2 o'clock, luncheon was taken at the Arlington, which was followed by a visit to the site, and an inspection of the College of History by the most of the company who were present. The impression was universal upon all the visitors, that the building both in its exterior and interior is eminently adapted to the purposes for which it is designed. The addition of Prof. Martin to the working force of the administration is regarded as a large acquisition. The co-operation of the Methodist Episcopal Church South in the building and development of the University has been pledged by the action of its recent General Conference, in Baltimore, in the adoption of the report to the Commission on Federation. CHARLES W. BALDWIN, Sec'y of Board.

Doctor Peate's Great Work.

Our readers are well acquainted with the large specimen, which Dr. Peate has been making for the University. The pastor of the church at Greenville, Pa., Dr. L. S. Rader, has written a most charming history of this "labor of love," resulting in the perfection of the largest mirror for a reflecting telescope in existence. Dr. Rader is resident in the same place with the maker of this splendid mirror and knows well the facts relating to the glass. He has set them forth with such rare clearness and grace, that the University most gladly reproduces his words in the COURIER. Dr. Rader writes: "Yours of yesterday to hand. In reply I will say, the great lens manufactured for the American University at Washington, D. C., by Dr. John Peate, of this place, is complete, ready for shipment. An order on the United States Express Company for the free transportation of the lens was sent to Doctor Peate by Bishop Hurst last week, but there being no office of that Company at this place, the shipment is delayed.

"For about three years this venerable minister and

scientist has given his wonderfully preserved forces of mind and body to the perfecting of this greatest reflecting telescope lens. Although he is seventy-eight years old, he recently walked twenty-seven miles at one stretch. Hundreds of people from different parts of the country visit the Doctor to see the great glass, and look at the heavens through his mounted telescope. He seems never to tire of explaining the mysteries of the wonderful 'added eye.' He will accompany the lens to Washington, and see that it is safely delivered to the Chancellor of the American University. It is now in a carrying case of his own invention and construction. This consists of a box in which the glass is packed, and a wheeled truce in which it is swung. It is swung on its edge by iron bands, which go round it over an iron belt which encircles it.

Dr. Peate recently made a test of the great glass; by turning it toward the heavens and then perching himself on a ladder thirty-two feet from the face of the glass, he was able, through an eye-piece, to see stars he had never seen before. He said it was the greatest optical pleasure he had enjoyed since he began the study of astronomy and the making of lenses. He expresses himself as perfectly satisfied with the glass, and when he first realized that it was complete, and he could add nothing more to it, a strange joy thrilled him, and he bowed beside his work and thanked God that he had been spared to complete the task assigned him three years ago by Bishop Hurst.

It has been purely a labor of love, as the work of Dr. Peate is entirely donated. He had to invent the machinery for handling, grinding, and polishing, as no machinery existed for handling so large a glass. A few have contributed toward this part of the work. Prominent among these is E. W. Hodge, of this place, who made the necessary castings at cost. It now remains for some public-spirited person to donate to the American University an observatory suitable for mounting this great lens so that with added vision from our great University we can begin to sweep far up the starry pathway toward the Eternal City."

Asbury Memorial Hall.

The following payments on this building have been received from subscribers since our issue of March, 1898: \$110—Wm. Griffin; \$100—Louis E. Barrett; J. A. Davis; \$83.33—Henry Spellmeyer; R. Van Horn; \$66.67—Ephraim Potts. \$50—Joseph Clemens; John G. Robinson; T. N. Boyle (for Mrs. Ellis). \$35—W. C. Best. \$33.33—J. C. Floyd; J. A. Craig; H. J. Hayter; J. H. Robertson; Jacob Dickerson. \$30—John D. Lea; John L. Leitch; Seth C. Cary. \$25—I. Putnam; James A. Lightbourn; Joseph O. Munson; George VanAlstyne; C. A. Hill; E. H. Derrickson; Luther Timberlake; John J. and Ida Smith; C. H. Baldwin; E. H. Ryan; R. Woodhouse; Don S. Colt. \$20—S. A. Creveling; A. S. Mowbray. \$16.67—W. L. McDowell; O. K. Cook; J. B. Faulks; D. Halleron; \$15—J. R. Colley; W. B. Guthrie; E. S. Mace; Wm. Warren. \$10—B. F. Kephart; C. H. Myntinger; B. F. String; G. E. Ackerman; A. G. Kynett; H. Cornford; C. P. Hard; A. D. McClosky; J. H. Morgart; W. G. Coons; P. C. Bascom; John R. Westwood; Charles Sheard; A. Flammons; P. Quattlander; J. Lowry; \$8.33—J. R. Bryan; P. A. Mason; Jay Dickerson; J. F. Maschman; Nelson J. Brown. \$6.66—H. D. Opdyke. \$5—Sallie Parker; Geo. Strander; Mrs. Jane Mitchell; J. B. Anderson; J. P. Miller; J. T. Wigren; Chas. M. Hadaway; G. M. Hoke; J. A. Miller; G. P. Sarvis; S. H. Cummings; Henry C. Taylor; J. T. Pool; W. M. Green; J. A. Webb; G. J. Moerz.

EDITORIAL NOTES.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, 1425 New York Ave., Washington, D. C.

Rev. S. L. Feiler, Ph. D., presented his resignation as Vice-Chancellor of The American University, and it was accepted at the last meeting of the Board of Trustees. The form in which the resignation was given is reproduced because it states succinctly the reason which led Dr. Feiler to take this step. This resignation is as follows:

"Having given five years of unremitting toil to The American University in the position of Vice-Chancellor, to which you called me. * * * I now feel that the time has come to tender you my resignation to take effect on May 1, 1898. While looking with joy toward more congenial work, let me assure you, that I shall ever feel the deepest interest in the American University, and will be ready to assist in its development in any way consistent with other duties."

The minutes of the Executive Committee of the Board of Trustees contain a record of the acceptance of this resignation in which is placed a recognition of "the faithful services of" Dr. Feiler during his term of office. The many friends of Dr. Feiler will watch with pleasure his labors in connection with the pastorate, and will wish him abundant harvests in his work.

"THE HUMAN REACTION" is the title given to an extract from the editorial page of the California Christian Advocate, which was inserted in the columns of the March COURIER. Dr. Feiler, who was editor of the Courier at that time, wishes to have it stated that no acknowledgment of its source was found in the COURIER because of an oversight on the part of the printer, and failure to observe the omission in proof-reading. However, some mistakes lead to unusual emphasis upon things, and all the readers of the California Christian Advocate will be glad that this error led to a more lively interest in the timely words of this editorial.

NEVER in the history of the world has the University idea had mightier hold upon the leaders who would the fortunes of the present, and who will therefore be abiding benefactors of the future. The Chicago University was founded by John D. Rockefeller. The splendid endowment, given by this princely man, has wrought so wondrous a power, that time has been vanquished, and this university to-day has won a place such as others have attained only after a century or more of work. Mr. Rockefeller once said at a commencement of the Chicago University that his investment in the university was the most satisfying and profitable one of all he ever made. He should be a good judge.

PRESIDENT HARPER, of the Chicago University, believes in the command to "ask largely." The public press is authority for the statement, that this university has been running behind something like \$200,000 a year. Such a condition would result in the

closing of several departments, unless help should be immediately forthcoming. President Harper was equal to the emergency, and made a special trip to New York that he might ask the man, who had already given to this institution \$6,000,000, to contribute again, because of the pressing need, Five Million Dollars. That was a cool request to make in hot weather, but it will not freeze the great heart of Mr. Rockefeller. The fact is, President Harper will get the money.

THE Christian College and the Christian University are taking larger hold upon the national thought. State Colleges are making great headway. It is, however, quite the fashion of the one-eyed advocates of these state colleges to slur at what they chose to call Sectarian Colleges. The time was when colleges were sectarian. Yet one must go back to the "Colonial Days" in order to observe such colleges in their plenitude of power. A slightest acquaintance with the progress of educational movements in the present time must convince any one that the Sectarian College is a misnomer. A visitor would scarcely know the denomination to which a college belonged to-day, unless he made a special inquiry. But each denomination rightly demands that its educational institutions be christian. The time must also come when each state college shall also be christian in its spirit.

Higher Education and the General Conference of the M. E. Church, South.

Methodism is becoming convinced that her many institutions of learning should have co-ordination. Each great branch of this large body has had appointed a board, whose principal labors are directed to promote among seminaries, colleges and so-called universities, such union and interdependence, that the lower shall lead by graduated steps to the higher. Seminaries should not do college work; colleges should not attempt university work. Such claims, however, should not prevent colleges with large equipment from having special advanced courses.

The Higher Education is a matter of great concern with both the great Methodist churches. The Committee on Education, during the recent session of the General Conference of the Methodist Episcopal Church, South, held at Baltimore, most carefully considered and discussed the place of the University as related to the College. Prominent educators in the Committee, affirmed that it was the duty of the great university of their church to abandon its undergraduate courses and leave them to the colleges, while the university should confine itself simply to post-graduate courses. A mass meeting in the interest of Higher Education was appointed by this General Conference at the request of officers of The American University. A notable gathering of ministers and educators and citizens of Baltimore met in the Fourth Regiment Armory, where the sessions of the conference were being held. The Speakers on the occasion were Bishop A. W. Wilson, Bishop W. A. Candler, Dr. E. E. Hoss, Editor of the Nashville Christian Advocate, and Bishop J. F. Hurst, Chancellor of The American University.

Our pleasure will be to give later fuller accounts of

these addresses, all most able and inspiring. Dr. Hess, as that able editor who weekly quickens and in many ways guides the thoughts of his great denomination, through the pages of the official organ of the church, holds a position in his church such as to give his words upon education and the Higher Education especial value. No one is more loyal to every institution of Methodism than our distinguished friend. Every element of her power, in the past and to-day, is cherished by him with most ardent love. In his address he spoke concerning our colleges. He said "I am not prepared to say, that the 'day' of these small colleges is ended. On the contrary, I am bold to affirm that they have still a part to perform that no other schools, however large their equipment, can possibly take off their hands. A great deal of specific training work can be done in these colleges, quite as well as in schools of another character. What does a boy who has just begun to read the Anabasis and Cicero's orations, and to study Algebra, need with 500,000 volumes in the library, and with \$250,000 worth of apparatus? The probabilities are that inside of four years he will not see a dozen of those books and will have only a superficial acquaintance with the apparatus. * * * * But I now come to the point: While we must still foster and maintain these smaller institutions, not multiplying the number of them unnecessarily, but seeking to diligently broaden and solidify the foundations underneath them, and give them large equipment and better facilities, the time is also come when Methodism must take upon herself the larger work of the highest possible education. * * * I can see manifold reasons, why a broad, liberal, unsectarian, and undenominational institution of learning under the patronage of the two great Methodisms of this country shall find an especially appropriate place for its existence and labor in the capital of the United States of America. And therefore I say: All Hail to the American University. (Applause.) And I hope Bishop Hurst and his co-laborers may have God speed in the great work in which they are engaged."

Such words come to us bearing great encouragement. They abide with us, precious because of their broad Christian wisdom and their hearty good will. The Joint Commission of the Methodist Episcopal Church and the Methodist Episcopal Church South have met and gone over the vast interests of both Methodisms as they ramify not alone in the United States, but also throughout the world. This joint commission upon Federation have carefully considered the interests of both churches as these were separate and of common concern. It is a matter of great interest as well as of great significance that this joint commission gave expression to their views of The American University in a series of resolutions, which we have given elsewhere. Not second to this utterance is the fact that the General Conference of the M.E. Church, South, held in May at Baltimore, sets apart one of its evenings to consider Higher Education, and endorses the American University in words most generous and cordial. There can be no doubt, therefore, but that this great post-graduate university, situated at Washington, will be a common center for the thought and the love of both Methodisms. Each new building, every substantial increase in its endowment, will cre-

ate a common joy. The future will alone reveal how great a part The American University will take in binding these two great branches of Methodism into a oneness if not organic, yet so federated that Methodism in America shall scarcely seem to be divided.

College of Government.

Our friends will be glad to know that plans are being considered for the erection of the second building of the American university. The logic of events determined that the first building should be the College of History. No place in our national domains offers such facility for historical investigations as Washington. The treasures of the National Library are accessible to the investigators. Our college of History with its full complement of professors and instructors will soon, we trust, furnish with amplest facilities those who shall make these researches.

As Washington offers the rarest advantages for the student of History, it is also true that the nation's capital is the most suitable place to pursue work naturally connected with a College of Government. The functions of government, the comparative study of our various state-governments, will be brought under critical review in the university hall. The mind readily pictures the associate subjects which would be studied within the walls of this College of Government. Here would be considered our municipal governments, the system of election laws throughout our land, foreign forms of state and civic governments, the art of diplomacy in connection with government service. What a field is presented in Civics and Economics! Surely this College of Government would be held in the minds of our young men in our land as a kind of Mecca, to which they would go and make a pilgrim's stay for a while. The Supreme Court of the United States, both Houses of our National Legislature, would be daily inspiration to these young men.

The College of Government will be the magnet which gathers to it professors, lecturers, and students, who will co-operate to mould the national mind to safe, broad helpful understanding of the principles and powers of government. It is in our land, where each one must or should understand this subject. Each one of us helps to choose our legislators and rulers, those who exercise authority in our towns and those who are in the State's legislative halls, or in the branches of our National Congress. There will be great rejoicing and deepest thankfulness among the trustees and the officers of the university, when they shall see this new building completed, a noble companion to the College of History, both standing in simple majestic proportions upon the university site.

Special encouragement has been received, so that there is good expectation of seeing ground broken for the second of the twenty beautiful buildings which shall belong to the American University. It is this College of Government. There is remarkable fitness that this building should follow in course of erection the one already completed. The study of history and the study of government are related subjects.

Many in our land will feel the force of these facts, and to these, who hold in their hearts the good of the youth of the future, we look for the money to endow and build this College of Government.

Environment and Growth.

Step by step, but each step marking a great advance, has been the method of progress, followed by the American University. The public and the Methodist Church were first informed, that a splendid site of ninety acres had been purchased. It was a farm, lying on the border of a hill top presenting a view of the vast valley, which stretches to the North and West, until Sugar Loaf Mountain, Harper's Ferry, and the Blue Ridge are reached. Our Chancellor, Bishop Hurst, saw at a glance rare advantages connected with this property for a great university. It was within the city of Washington, the nation's capital; it gave ever to the eye of the student a panorama, which by its silent beauty and vast extent would exercise daily educating power. He saw, on this spot, with the vision of a prophet, magnificent university buildings rise, each embodying the noblest thoughts of eminent architects; each building the scene of independent research along the many pathways of knowledge, all under the beneficent control of a great, vigorous, and liberal christian care.

A charter for the university was first taken from the District of Columbia; but it was soon supplanted by a charter, granted by the Congress of the United States. An excerpt from this charter will be of interest at this time.

ACT OF INCORPORATION.

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled that John H. Vincent, John E. Andrus, James M. Buckley, Mark Hoyt, Jesse L. Hurlbut, James M. King, Charles C. McCabe, Charles H. Payne, John E. Scarles, Junior, John S. Huyler, of New York; Charles W. Buoy, J. A. M. Chapman, G. P. Hukill, Robert E. Pattison, Charles Scott, Mrs. Matthew Simpson, of Pennsylvania; Julian S. Carr, of North Carolina; David H. Carroll, Jacob Tome, Alpheus W. Wilson, of Maryland; Charles H. Fowler, of Minnesota; William M. Springer, J. B. Hobbs, of Illinois; John P. Newman, of Nebraska; Job H. Jackson, of Delaware; Redfield Proctor, of Vermont; W. W. Smith, of Virginia; D. B. Wesson, M. Burnham, of Massachusetts; Thomas Bowman, of Missouri; and John F. Hurst, Louis E. McComas, Benjamin Charlton, Andrew B. Duvall, Matthew G. Emery, Charles C. Glover, S. S. Henkle, Benjamin F. Leighton, John E. Beall, Aldis B. Browne, Mrs. John A. Logan, H. B. Moulton, Hiram Price, Mrs. Elizabeth J. Somers, Brainard H. Warner, and S. W. Woodward, of the District of Columbia; their associates and successors, two-thirds of whom shall at all times be members of the Methodist Episcopal Church are hereby constituted a body politic and corporate by the name THE AMERICAN UNIVERSITY with power. * * *

These persons constituted our first Board of Trustees. They are representative of the several states in the East and South, the North and West.

The noble purpose to be served by the American University immediately commended itself to the educators of Methodism. They were delighted at a movement, which contemplated the establishment of a university proper with ample endowment and at Washington. The Association of College Presidents of our church adopted

THE COLLEGE

at their meeting in Cleveland, Ohio, November, 1891, resolutions commending this work to the action and co-operation and endorsement of the General Conference. The Bishops of the Methodist Episcopal Church gave their cordial approval of the project. In their Episcopal Address delivered before the General Conference at Omaha, Nebraska, in May, 1892, they use these words: "The initial steps have been taken for the establishment of a University at the Capital of the Nation. A charter has been secured, a Board of Trustees has been constituted, subject to the approval of the General Conference, and an eligible site has been purchased and provided for at the cost of \$100,000. It is our judgment, already expressed to the friends of this movement that the accomplishment of this plan for both religious and patriotic motives is desirable, and that it should be so richly endowed and equipped as to place it in the front rank of the most renowned institutions of the world."

A great mass-meeting in the interest of the American University was appointed by the General Conference of the Methodist Episcopal Church and was held May 8th, 1892. "An immense concourse of people assembled at

HISTORY.

Exposition Hall, in Omaha. There were present delegates and visitors from all parts of the United States, and from Europe, Canada, Mexico, South America, Japan, India, China, and other parts of the world. Many of these were distinguished scholars and educators, who were intensely interested in the exercises. The speakers were Bishop Hurst, Bishop Newman, Dr. Payne, Bishop Fowler, Dr. McCabe, Dr. Bristol, Dr. Bashford, Mr. John E. Searles, Jr., Bishop. Thoburn, Dr. David H. Moore, and W. F. Moulton. The influence of this meeting has become wide-spread and has been manifested in a large public opinion in our churches and in the people of our country, leading to a great desire on their part to see the establishment and endowment of the American University."

The Methodist Episcopal Church, South, has taken a common interest in this great educational project. The several hearty endorsements, which this great branch of Methodism have given to the American University, make most manifest their expectation, that in this great university at the Nation's capital American Methodism will have its mightiest and grandest educational force. At the General Conference of the Metho-

dist Episcopal Church, South, held in Memphis, the following resolution was passed:

Whereas, A movement has been set on foot, under the leadership of the Methodist Episcopal Church, for the establishment of a great Protestant University in the capital city of our nation; and,

Whereas, It becomes all Protestants, and especially, all Methodists, to give encouragement to this important enterprise,

Resolved, That we heartily approve and endorse the undertaking of the trustees of the American University to establish in Washington City a great university for post-graduate study and original research, under the influence of Protestant Christianity and the auspices of American Methodism.

Such were the first encouraging words of our Southern Methodist brethren. At their recent General Conference, held at Baltimore, they set aside an evening at the request of the American University authorities for a mass-meeting in the interest of Higher Education and the American University. The meeting was held in the Fourth Armory building, the place of the session of the Conference. A large number of the delegates and the friends of the higher educational movement in America assembled. The meeting resulted in winning for our educational enterprise a second enthusiastic encouragement and approval from this body of Methodists.

Coincident with the growth of a large public interest in The American University, there has been also increased liberality on the part of those persons, who forward large educational movements, so that our endowment has been steadily increasing. A demand for the erection of buildings began to make itself urgent. The authorities felt called upon to direct their efforts to attain this end; and in January of 1895 subscriptions were sought in order to build the College of History. Three months were hardly passed, before the amount necessary was subscribed. A building committee was appointed in June of that same year and architects and plans chosen in the following December. All now was ready for the breaking of the ground and in March of 1896 the ground was broken for the first in that noble series of twenty buildings, which shall adorn our splendid site and be the scene of student-labors in the investigations for truth.

An impressive pile of marble is the College of History. Its architecture is Grecian and its columns of the Ionic order. These grace the central portico. The charming purity of color in the Rutland marble pleases the observer as he stands almost within the shadow of the building; and from a distance the edifice looms up in massive proportions. A walk through its long halls is a continual surprise. The high ceiling, the heavy oak doors, beautifully grained, immediately take the eye. Then one looks at the wainscoting of Tennessee marble, the marble tiling of the floor, and admiration increases. The same care and excellence in the finishing are present in each of the many rooms, which open into the halls. One is lured into these rooms arranged, in suites of three; one for the study of the professor, one for the seminary-room the third is the lecture room. The brightness of the rooms is most cheerful; and as you

step to the windows, any one, or all of them, a most pleasing landscape greets the eye, enlarging in extent as you look from the upper ones. The building is an ideal college building.

Special favor is sometimes shown our visitors. Then they are permitted to ascend to the roof. The eye from this elevation takes in a long range of valleys and hills. The circle of the horizon is not less than seventy miles in diameter. The enclosing area is a beautiful landscape, where in are broad plains and an intersecting river, undulating hills and winding valleys, distant mountains clothed with the misty blue. Historic battlefields are in sight, also the tall white pyramid of the Washington Monument, the glowing roof of the new Congressional Library, and the charming dome of the Capitol. Few scenes are more lovely. We confidently believe that the day is not far distant when our university shall have its full complement of buildings, all in harmony with the College of History; its full complement of professors, each ardent in his labors; its halls full of students, cheerful in the charms of the university, eager to secure from its ample opportunities the best culture, and surrounded by the great influence of a noble patriotism and a helpful christian faith.

The Two Methodisms.

The Hon. Jonathan P. Dolliver, fraternal delegate to the Methodist Episcopal Church, South, made his address before the General Conference of that Church on May 18, 1898. His address followed that of our other delegate, the scholarly and eloquent Dr. Berry, editor of the Epworth Herald. There was unusual interest attaching to the words of Congressman Dolliver. He left our national Congress in order to fill an appointment, entrusted to him by our church. The House of Representatives had been only recently the scene of most enthusiastic manifestations of our united nation, where North and South, East and West, merged all differences and voted together as the American Nation. It was not strange, therefore, that Mr. Dolliver should say some clear words about Organic Union of the two Methodist bodies. Also it was not strange that the Methodist Episcopal Church, South, should enthusiastically applaud his courageous and wisely chosen words upon this subject. Our readers will be interested to peruse portions of this address. We give the following selections:

Ever since I was appointed to come to this conference, it has been running through my head and stirring in my heart, that the time has come to speak as brother to brethren, as man to countrymen, on a subject that involves the welfare of the republic, of society, taken as a whole, even more than it concerns the churches immediately interested. Nobody doubts that you can get on as a church without us, and it is evident that we are able to get on without you (laughter). The statistics that record the triumphs of Methodism, especially in the South, indicate clearly that if it were only a question of selfish church policy, enlisting no deeper considerations, it is comparatively unimportant whether these two organizations, identical in origin, in doctrine, and in administration, come together or go on their separate ways. Both are strong and splendid enough to stand

apart, and if they lived to themselves alone each is fruitful enough in good works to justify its independent place in the world. It is because I believe that the permanent division of these churches, after nothing whatever is left to separate them, except imaginary lines upon the map, constrains their influence in the formation of the national character and perpetuates a morbid and unnatural tendency in the national life that I have felt, as one who rejoices in the prosperity of both, the pressure of my duty to speak as I have opportunity. Now, I hope that no one will get nervous for fear the china shop, in which the fraternal greetings of forty years have been carefully shelved away is about to be rudely invaded (laughter). I am not going to say a word that will invite any controversy, except the healthful controversy in which men are likely to get at the truth. It is not an accident that the great Christian communion to which we belong has for fifty years, in spite of storms within and without, held fast to its characteristic doctrinal and administrative system, less disturbed than any other by schism or heresy. I don't know how it is with you down south, but I know that in our church we have never had but one trial for heresy. One of our brethren out west lost confidence in the lower world (great laughter). A splendid man, he was; born in the same county with me down in Virginia. He was all right as long as he stayed in the mountains, but curiously enough, he changed his views on the subject after he got to Chicago. (Long and continued laughter and applause.)

What does that mean? It means that while the external conditions that made the division of the church necessary have been slowly passing away, an overruling Wisdom has presided in the councils of both its branches, so that in the fullness of time they might be fitted together, without shock or hindrance, or inconvenience of any kind (applause). My countrymen, the fullness of time has come—that is the message which I bring to you from the scattered constituency for which I speak (applause). The partition of the church more than half a century ago was incident to a controversy long since dead and buried, into which, fortunately, it is no longer necessary to enter. So far as I can find out, the step was chosen more in sorrow than in anger, as the least of the manifold evils with which our fathers were compassed about. I do not doubt that an unseen hand guided the whole proceeding. If it is not true that God governs this world, that the complex movement of events responds to the increasing purpose that runs through the ages, then there is an end of all theology and of all coherent philosophy of human affairs as well (applause). The great debate itself, shows that the church, rent with unavoidable dissensions, was providentially directed in the adjustment of difficulties no longer open to compromise and settlement. Looking back at the events of that period, it is perfectly plain that unless Methodism in the slaveholding states had found expression in an organization no longer connected with the anti-slavery conferences, it would soon have lost any expression whatsoever (applause).

* * * * *

The question was, whether to give up Methodism in the territory where its altars were first erected in the

United States, or to break the bonds of a fellowship that for more than half a century had held the annual conferences together. It is not hard to believe, even for those of us who do not have your point of view, that your leaders of that generation acted not only within their rights, but also within their duty, when, with troubled hearts, they took leave of their brethren and turned to the new responsibility which they assumed (applause and cries of "Hear," "Hear"), the responsibility of caring for the spiritual wants of a community about to pass through the most appalling experience that ever beset a brave and resolute people. If the general conference of 1844 could have looked into the future, could have forecast the drama of the twenty years to come, the reign of prejudice, the carnival of passion, the explosion of the social order, the awful vicissitudes of civil war that ended all, no spirit of resentment would have been bred in its deliberations. It would have said to the brethren of the South, "Your work is with your people. It is for you to admonish them, to soften the asperities of this strife, to exalt the cross of Christ in the midst of this storm to interpret the handwriting of Providence in these blind and bewildered times." Nor can any man read the history of the reorganization of the Southern conferences and consider the quickened zeal of the churches, and the helpful ministry of the Word, in town and country, without feeling in his heart that these men were called into the Master's service for such a time as that (applause.)"

Readable Paragraphs.

Nearly all of the higher educational work in America has until very recent years been done in these church institutions, and the best work is now being done in them. The wholesome Christian atmosphere and elevating influences of a thoroughly Christian college are the most important factors in a genuine, broad, thorough education. We want to utter our strongest protest against the custom of trying to throw discredit upon the educational work of the church of Christ, by saddling onto it the word "sectarian," pronounced with an intonation which makes it most offensive. In these times of secular education and materialistic drift in our higher institutions of learning, Christian people can not be too careful to magnify the absolute necessity of maintaining thoroughly Christian colleges and universities. None other will save our civilization from decay, and make us in the years to come the growing power for good which we ought to be as a nation.—Rev. B. W. Hutchinson.

In his editorial correspondence in the Epworth Era, Rev. Dr. S. A. Steel referred to the speech of the Hon. J. P. Dolliver before the General Conference of the M. E. Church, South, as "an oratorical Iowa cyclone to the tune of 'All hail the power of Jesus' name,' and added: "It is impossible to give any idea of this unique and thrilling address. His subject was 'Organic Union.' Before him sat the stalwarts of Southern Methodism, to whom the idea of organic union is the bogie of the age—stern, unyielding ecclesiastical bourbons. And yet so excellent was the orator's spirit, so adroit his presentation of his theme, so fearless the swing of his

speech, that the General Conference gave him and his message such an enthusiastic reception as it has seldom given to any man. Like Dewey, he went right ahead thundering to right and left, regardless of the hidden mines of prejudice; and, like Dewey, he won a famous victory. Think of Dr. Barbee cheering a man who was pleading with impassioned eloquence for the re-union of the Churches! Think of Bishop Hargrove, who presided, overborne by the enthusiasm of the hour, clapping his hands till they must have smarted, over a speech that aimed to bring us all together! The world do move! Praise the Lord!"—*Central Christian Adv.*

We are indebted to the "New York Times Saturday Review" for some interesting and indeed remarkable figures showing the individual gifts and bequests made during the past five years in this country to public purposes, such as schools, libraries, hospitals, galleries, etc. They do not include church, state or municipal appropriations to any of these causes—only personal gifts and bequests. The "Review" having secured full information from advance sheets of the annual volume of "Appleton's Cyclopaedia" for 1897, of the gifts of that year, presents the following table: In 1895, \$29,000,000; in 1894, \$32,000,000; in 1895, \$32,800,000; in 1896, \$27,000,000 in 1897, \$45,000,000; total for five years, \$165,800,000.

This may well be called a remarkable showing. Of the number reported in detail by the "Review"—about one hundred and forty—somewhat more than one-half were bequests, the remainder being gifts. These facts show that the age is not lost to benevolence. Indeed it may safely be claimed that no other age has ever given so much to public benevolent causes.—*Selected.*

No field is more inviting for the student than that in which the manifold and intricate subjects pertaining to government are pursued. Each great nation of to-day and of the past will be studied under the one thought of its type of government, and the significant modifications of this type. The constitutions under which various peoples have lived, and their slow growth, will be investigated. Indeed, this field broadens into vastness as the mind begins to contemplate the work which must be provided for in the College of Government. Yet there is no thought at present to give the different branches, into which naturally this subject of government would be divided. Rather, it is our purpose to emphasize the advantages, which students would have in all investigations, connected with government, by pursuing them in the College of History, which, we hope, soon will be seen on the site of The American University. There will be in its halls specialists, who are authorities on diverse aspects of government. Special lecturers will also be there, who are connected with the many branches of our national government. Representative men of our own country, in actual service, here in Washington, will add to the results of study that peculiar charm, which comes from responsibilities already assumed, and will give these results in special lecture courses. The finest diplomats are associated with the various foreign embassies. Authorities on constitutional law, on international law, are in our midst. Then the new Congressional Library will proffer its treasures to the student. (*Selected.*)

Important Benefits to the American University.

One of the most important events closely related to the development of the American University at Washington, is the recent action of the Congress, making an appropriation of \$25,000 for the foundations of a bridge across Rock Creek on Massachusetts Avenue. When the present magnificent site of the university was purchased, it was without the thought or knowledge that it was in the line of any of the more important avenues of the National Capital, but it was soon found that this handsome tract of land, surmounting the northwestern heights of the District of Columbia, was in a direct line with Massachusetts Avenue, the finest and widest residential avenue in the city. Congress was asked to authorize the extension of the avenue to the site of the university, and the request was promptly granted. For several years appropriations have been made, amounting in all to about \$10,000 for the opening of the avenue on the west of Rock Creek. This extension has been carried forward as far as Thirty-second street, and thus becomes a great advantage to the Naval Observatory, about the north side of which the avenue is made to describe an arc in order to keep the line of public travel one thousand feet from the delicate instruments employed in the observatory.

All the marble and other material used for our first building, the College of History, now completed, were hauled by a circuitous road a distance of four miles or more, and in some places up very steep grades. But with the completion of the bridge, which is now to be begun, and the completion of the avenue to the site there will be a direct line of access, which will materially lessen the time, labor and expense of transporting materials for future structures. The university will stand at the head of the finest residence avenue in the District of Columbia. Bishop Hurst has asked Congress, and has long advocated in a public way that this bridge be made a monumental structure to serve the cause of American history in a manner similar to the service rendered to Central Europe by the great bridge at Prague.

A bill has been before Congress for a street railroad on Massachusetts Avenue, but Congress did not see fit to grant a charter, because by reasons, urged by Bishop Hurst especially, and others who were opposed to the spoilation of the finest drive in the District, by making it serve as a street car line. Lately the House of Representatives has voted favorably on bills which grant charters to two street car lines, both of which, while avoiding the use of Massachusetts Avenue, will reach and accommodate the University and its immediate vicinity. The building of this bridge and all further extension of the Avenue will be hailed with delight by all friends of the University and constitute an advanced step in the development of the solid interests of our growing and cosmopolitan Capital city.

Endowments For Education.

Bishop Henry W. Warren.

A Quaint Talker. While the General Synod of the Reformed Dutch Church was sitting in New York in 1814, a venerable and quaint-looking old man, with his broad-brimmed, round crowned hat in hand, walked calmly up the aisle toward the President's seat, bowing as he came up, and said, "Mr. President, I want to talk." Nobody knew him, and the President asked, "Are you a member of this body, sir?" "No, sir," was the reply, "but I want to talk." The President reminded him that none but members had a right to speak, when an aged minis-

ter, who had just come in, recognized him and said, "I move that the Rev. Elias Van Benschooten have leave to talk." It was carried, and then the old patriarch went up to the President's table, drew from his pocket a large roll of bank bills, and counted them—\$800. Then he took another package of obligations amounting to \$13,840, and counted this out, and in a few well chosen words donated them to the astonished Synod, and asked a committee of reference to arrange the conditions. Subsequently, by will, he added other sums, the whole being allowed to accumulate until it reached \$20,000. Such was the history of this endowment, which was, so far as is known, the first one made in our country, and certainly the first made in the Reformed Church for theological education. Not a dollar of it has been lost. The interest has educated more than one hundred and twenty-five young men for the ministry, some of whom have been among the most eminent and useful in the service of the Church at home and in foreign lands. "And by it he, being dead, yet speaketh," by many voices, in many lands, through many ages. He built wisely.

Into what shall we build our lives? Into pure personal character, of course, for that endures, is ours forever. Now abideth faith, hope and charity. And he who goes through this life, and out into the boundless possibilities of the next, acquiring an enlarging faith, brightening hope and blissful love, is everlastingly rich.

After middle life, Peter Cooper, of New York, ceased to devote his whole attention to glue, and erected the Cooper Institute, where the poor youth of the city, who had no helper, could become able to help themselves, could develop useful, intelligent, artistic, beautiful lives. For many years the white-haired old man sat in the halls he had built, and saw thousands graduate with honor. Strong men and beautiful maidens took his shrivelled palms in their plump hands, looked in his kindly face and said, "Father Cooper, all I have of worthy life I owe to you." No wonder he lived to be 92 years of age. His is an everlasting glue, and sticks together things that outlast the final fire.

What are our ideals? We have those that we love—national, denominational, Christian—men by the million have laid down their lives for them; they are dearer to us than life. How can we make them spread and survive?

When victorious Titus ravaged Jerusalem and pricked with spear points all the inhabitants of the beautiful city into exile and slavery, he left behind him only a million corpses and salt-sown ruins. He thought it was an end of the hated nation. But before he left the shores of Joppa a Rabbi obtained permission to gather a few boys out of the desolation and teach them the law. Law and theology were synonymous then and now. Ah, victorious Titus! you made a concession fatal to Roman supremacy. Ah, downtrodden Rabbi! You gained a point vital to your race's continuance. That school was the cause of recovery of the amazing vitality and persistence of his people. It built law, national feeling, consciousness of being a peculiar people into wind. Isaac Rich, of Boston, having no children, put the outcome of his life into the Boston University. Now the children of his mind number 1,000 every year, all being carefully trained in the best knowledge, patriotism, and religion.

Thus property is kept forever. It works out one's own plans, perpetuates his ideas, builds his theories into character, and by God's system of book-keeping, is related to the wise contriver always. The product of that mind factory by spiritual commerce passes, not to other continents, but to other worlds. The manager of wide commerce here stands on celestial shores and "sees his sunny ships blown softly home," not laden with spices, ivory, jute and various woods, but with character, nobleness, and Christliness. What priceless products will be turned out in a thousand years! He who remembers the giving of a cup of cold water will not forget the founder of a new colony and builder of another empire of virtuous minds.—Selected.

JOHN F. WAGGAMAN,
REAL ESTATE INVESTMENTS,

700 14TH STREET, N. W., WASHINGTON, D. C.

I am agent for the beautiful suburban property known as Wesley Heights, situated opposite the site of the American University. This property has a great future, not only because the University is to be built opposite, but on account of its desirability as a resident part of the District of Columbia. I am also agent for lots in Morris' Addition to N. E. Washington, which presents a good field for investment for small amounts. All this property is laid out in conformity with the general plan of the city of Washington and is entitled to city improvements. In addition, Washington, being the Capital of the Nation, is free from strikes and conditions that exist in manufacturing cities. I will make investments on first mortgages, secured on real estate, interest at 6 per cent. We will also purchase for you improved property that will pay between 6 and 7 per cent. after paying taxes and insurance. Now is the time to invest from \$250 to \$100,000. For further particulars write to above address.

THE UNIVERSITY COURIER

Devoted to the Interests of the American University.

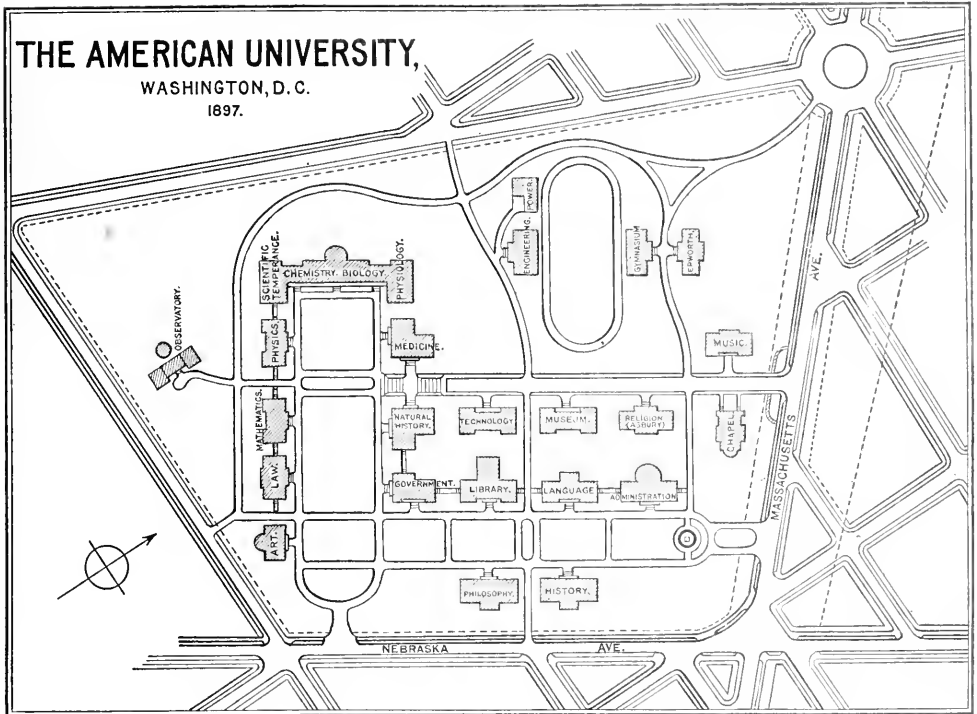

Vol. VII.

WASHINGTON, D. C., NOVEMBER, 1898.

No. 1.

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

PLAN OF THE GROUNDS.

The above cut exhibits in outline the plan for the arrangement of buildings on the grounds of The American University. It was adopted in its general features by the Board of Trustees on May 3, 1897. The details of walks, trees, shrubbery, and decorations in the way of statues and fountains can not be shown in a plan of so small a scale. The College of History is 176 feet in length and may be used as a scale of measurement. It

is expected that grading will be continued during the year, and the planting of trees and shrubbery follow soon thereafter.

The entire tract consists of 90 acres, quite varied and rolling in its contour, the elevations varying 100 feet. Not far from the center of it is a spring of good water, sufficient for the development of artificial lakes.

Gifts and Bequests.

John D. Rockefeller, has given \$10,000 to Barnard College, New York City.

Anthony J. Drexl, of Philadelphia, has just given \$5,000 to the American National Red Cross Relief Committee.

Under the will of the late James Stevenson, of Brookline, Mass., \$10,000 was given to the Harvard Medical School to establish two free scholarships.

Joseph Bangan, of Providence, R. I., who died July 28, gave during his life time fully \$250,000 to Roman Catholic institutions, and bequeathed \$115,000 to similar organizations.

Mrs. Elizabeth Kelly has donated \$75,000 for erecting and equipping a new dormitory for women at the University of Chicago. It will be called Greene Hall in memory of Mrs. Kelly's parents.

By the will of the late A. S. Van Nickel, of Hazelton, Pa., Brown and Princeton Universities receive \$45,000 each, and \$30,000 goes to Lafayette University.

A new building for the East Brooklyn, N. Y., dispensary is being erected by Henry Batterman, at a cost of \$25,000, in memory of his daughter.

Philip D. Armour has presented the Armour institute of technology, Chicago, an additional \$500,000 to maintain that school on the largely increased scale to which its unexpected growth has led. He previously gave the institute an endowment of \$1,000,000.

Mme. J. Langles, of New Orleans, and her daughter, Miss Angelle Langles, who perished in the Bourgeois disaster, left among other bequests \$10,000 to the Clarity Hospital in New Orleans, \$1,000 to the Ambulance Fund, \$2,000 to the House of the Good Shepherd, and \$3,000 to the Newsboys Home. Provision was also made for the erection in that city of a memorial hospital for women and children.

The trustees of the University of Virginia recently received a check for \$20,000 from Henry L. Higginson, treasurer of the J. W. and Belinda Randall Charities Corporation of Monson, Mass., to be used for the erection of a building or as a permanent fund.

The will of the late George A. Pillsbury, of Minneapolis, bequeathes \$250,000 to the Pillsbury Academy, at Owatonna, Minn., and \$5,000 each to the American Baptist Home Mission, the Baptist Publication Society, the Baptist Missionary Union, the Northwestern Hospital for Women and the New Hampshire Centennial Home for Aged Women. The will also requests that the widow shall bequeath \$20,000 to Pillsbury Academy.

Mrs. Josephine M. S. Ayer, who died in Paris last January, bequeathed \$50,000 to the Pennsylvania Hospital, Philadelphia. Her son, Frederic F. Ayer, of New York, has just added \$25,000 to this amount, making in all a fund of \$75,000, which is to be used in erecting and maintaining a clinical laboratory for the advancement of medical science, and especially for the study of all forms of germs and germ diseases.

The will of Albert Curtis, of Worcester, Mass., contains the following bequests: Various philanthropic institutions in Worcester, \$24,000; American Seamen's Friend Society, \$3,000; American Board of Foreign Missions, \$5,000; American Home Missionary Society, \$5,000; American College and Educational Society, \$10,000; Berea College, Berea, Ky., \$5,000; Doane College, Crete, Neb., \$15,000; Colorado College, Colorado Springs, \$10,000; Women's Board of Missions, \$30,000 and valuable homestead estate. The estate is valued at upwards of \$500,000, and the residuary legatees are the American Home Missionary Society, the American Board of Foreign Missions, the American Missionary Association, and the Worcester Young Men's Christian Association.

Appleton's Annual Cyclopaedia for 1897, just published, reports that the "gifts and bequests" in our country for the year, for public purposes, exceed \$15,000,000 exclusive of the \$3,000,000 devised to colleges under the will

of Daniel B. Fayerweather, and during the year directed to be paid by the Court of Appeals of the State of New York. The list published in the Cyclopaedia does not include ordinary denominational contributions for educational and benevolent purposes, nor State and municipal appropriations to public and sectarian institutions. The large sum of over \$15,000,000 is an admirable exhibition of the benevolent disposition of the people of the United States. The amount exceeds all past records. The reports of the immediately preceding years were: 1896, \$27,000,000; 1895, \$32,800,000; 1894, \$32,000,000; and 1893, \$29,000,000.

Educational.

Kalamazoo college has an endowment fund of nearly \$200,000.

The endowment fund of Hope college, Holland, Mich., has been increased by \$200,000 the last year.

Harvard college has received additions amounting to \$400,000 to its permanent funds the past four months.

The University of Michigan began in 1841 with nine students and one department, that of literature, science and the arts. It closed the fifty-seventh year of its history at the recent commencement with 3,114 students and seven separate faculties.

At Beloit college commencement exercises President Eaton announced that the effort to obtain \$200,000 increased endowment had been successful. This includes \$50,000 given by D. K. Pearson, of Chicago, on condition that \$200,000 be raised.

Germany's twenty-one universities had 32,230 students during the summer semester, Berlin, Munich and Leipzig being well in the lead. Paris alone, with its 12,000 students, half of all the university students in France, had as many as these three put together. Of the other French universities, Lyons has 2,335 students, Bordeaux 2,173, Toulouse, Montpellier, Lille, Rennes and Nancy about 1,000 each, Aix, Poitiers, Dijon, Caen and Grenoble between 500 and 1,000, while Besancon has only 197.

The civil war stimulated American education throughout its whole extent. France reorganized her schools after the Franco-Prussian war, and Germany made important modifications of her system. The system of American academies was devised and set in operation by Judge Phillips and his friends in the darkest days of the revolution. Any great crisis which demands intelligence, leadership, and mental powers creates schools. The advances in our education in these last twenty-five years root largely in the period of war and reconstruction ten years before. All our education, primary, secondary, and higher, was revived in that mighty struggle.—Selected.)

Our Values Increase.

A remarkable providence has marked the steps in the onward movement of the American University. Our readers of this issue will peruse with delight the address which Bishop Hurst delivered before the General Conference of the Methodist Episcopal Church, South, held in Baltimore May last. Some new facts, connected with the earlier days of our enterprise, are set forth with charming diction. One feels, after reading his inspiring words, that the true dreamer is after all the veritable seer. The university site was purchased in 1890. Not at that time was it known, that the extension of Massachusetts Avenue would pass through our grounds. Yet when the commissioners of the District plotted out the improvements in the Northwest beyond Rock Creek, it was found that this finest avenue in the capital city passed through our site. This fact largely increased the value of the university property. For several years past there has been an effort to induce Congress to appropriate a sum for the building of a bridge across Rock Creek. The building of this struc-

ture would hasten the improvements in our direction and practically lead to rapid transit facilities to our grounds in the near future. The last Congress made an appropriation for this bridge. Hence comes new increase of value of our site.

The recent purchase of thirty acres for the Cathedral, the great university projected by the Protestant Episcopal Church, on Massachusetts Avenue and lying between Rock Creek and The American University, introduces another factor which will enhance our values. The local papers give the following interesting account of this recent purchase of this Cathedral site by the Board of Trustees of the Protestant Episcopal Cathedral Foundation:

Episcopalians in this city are beginning to realize that the project for the erection of a magnificent cathedral in this diocese is approaching consummation. For many years past this project has been talked of, hoped for and efforts made to consummate it. Funds have not necessarily been lacking, for the church in this city is wealthy and numbers among its members and adherents the most influential citizens of the community. The great trouble has been to secure an available site for the erection of such a cathedral as would be a monument to the church in this diocese and a source of pride to the city itself.

By arrangements made during the past week the ground has at last been secured, and is sufficiently large to afford room for all the schools and buildings which will be erected in connection with the cathedral. Bishop Satterlee returned to Washington for a short time, and last Wednesday held a conference with several members of the Board of Trustees of the Protestant Episcopal Cathedral Foundation, with the result that it was finally agreed to purchase of Mr. Anzi L. Barber part of the St. Albans and part of the "Pretty Prospect" sub-divisions, on Massachusetts avenue extended and Tennyaltown road, in the county, comprising about thirty acres.

Not until last week was an agreement reached, when the tract named was purchased for \$245,000, and there the cathedral, the school for girls, and other costly buildings in connection with the church will be erected. After canvassing the matter thoroughly Bishop Satterlee came to the conclusion that the St. Albans property was the most available for the price of any that could be had. He realized that the city is fast growing in that direction and in years to come the site will be in the midst of a wealthy and populous community, and this fact was taken into consideration more than present conditions. Again, the property is already on one car line, and when Rock Creek is bridged at Massachusetts avenue, as no doubt it will be at some future time, a railway will probably be constructed on that thoroughfare.

Asbury Memorial Hall.

Since the issue of the Courier, March, 1898, the following amounts have been subscribed toward this fund:

NEVADA MISSION, \$411.50.

\$100—Dr. J. E. Stubbs. \$50—F. C. Lee; Dr. and Mrs. Van Deventer. \$30—George C. King. \$25—Merrill Ham. \$18—J. H. Rosen. \$15—G. S. Hatcher, A. Lester Hazlett, W. F. McClure, John J. Pardee, Thos. Taylor, Fred R. Winsor. \$10—S. W. Albone, J. M. Wilson. \$7.50—A. D. Welby. \$6—D. S. Ulrich. \$5—Frederick Lee, Jessie Lee, Leonard Lee.

CALIFORNIA GERMAN, \$467.

\$100—H. Fishbeck, J. J. Pfister, H. Schrader. \$30—A. H. Muller. \$25—W. B. Bichl, Mrs. Henrietta Dankroeger. \$15—H. Brueck, Miss E. Pohli, R. Steinbach,

George Schroeder, L. E. Schneider. \$5—Willh. Gogen. Mrs. Kathrina Mattern, \$2—A friend.

DELAWARE CONFERENCE, \$1,363.

\$30—H. A. Monroe and wife; \$25—W. C. Dickerson, A. R. Shockley and wife, I. H. White; \$24—J. A. Richardson, C. A. Hindley, J. R. Waters and wife; \$18—W. F. Cotton; \$16—E. E. Parker; \$15—C. L. Anderson, J. H. Handy, N. W. Moore, J. C. Banton, C. A. Horsey and wife, Mrs. P. O'Connell, J. H. Blake, J. H. Scott, J. W. Bond, W. C. Jason, William F. Simmons, J. R. Brown, Mrs. H. T. Johnson, E. H. Butler and wife, Nora Johnson, N. B. Snowden, G. R. Williams, L. Y. Cox, A. L. Martin and wife, P. C. Wright, F. J. Handy. \$12—W. H. Caldwell, C. E. Henry, C. W. Fullett and wife, G. B. ASBURY MEMORIAL HALL.

The following payments on this building have been received from subscribers since our issue of July, 1898: \$100—Charles Parkin, E. A. Schell. \$48—S. S. Lewis. \$35—Joseph B. Risk. \$33.33—J. W. Edwards, J. W. Frizzelle, J. C. Jackson, John H. Ryan, Geo. B. Watkins. \$30—J. D. Lea. \$25—W. A. Chadwick, Edward Hayes, C. S. Ryan, S. G. Snowden, Charles E. Asbury, L. Timberlake. \$20—Elizabeth Ball, J. Wilson. \$15—R. B. Williams, Paul C. Corlitz. \$20—Seth C. Cary. \$10—T. Daimell, Robert Forbes, J. A. Gabrielson, Mrs. G. H. Humason, A. E. Lord, I. G. Price, E. G. Smith. \$8—W. L. Y. Davis. \$7—W. L. McDowell. \$5—R. E. Bird, W. H. Brooks, M. J. Ballock, Daniel Collins, Daniel Aquilla, J. S. Cumming, James H. Jenkins, Washington Murray, B. F. Myers, N. B. Ripley, J. G. Schaal, R. M. Stekkoing, E. W. Thompson, Noble Watkins. \$3—J. A. Alford, D. S. Ewry. \$2—G. D. Nickens. \$1.05—B. D. Hypps.

EDITORIAL NOTES.

The American University Courier has been sent to most of the Pastors of the Methodist Episcopal Church. After this number it will only be sent to subscribers to the University Funds. Others desiring the Paper will Please write the Courier, 1475 New York Ave., Washington, D. C.

The Only Safe Method to have the Higher shape, direct, determine the Law is. No greater progress in the operation of the Law can be found than appears in the educational development of our states. Our universities in recent years have taken their places at the head of educational institutions. Johns Hopkins, Clark, Harvard, Yale, Princeton, have reached and entered not alone into our colleges to influence instruction, but also into our seminaries and schools. A practical result has been to give a higher social standing in the teachers of our high schools and thus to place them on equal footing with members of the other learned professions. In the common day schools themselves better methods of instruction have been introduced because of the wider influence upon them of the higher institutions of learning. The development of the universities has been the wonder of this generation.

A College of Teachers is the new idea, which has entered into the plans for University Extension Work at Chicago. The plan is to establish at some central point in the city the full curriculum of the freshman and sophomore courses as taught in the Chicago University. Teachers in the grammar and high school grades will be admitted to these courses without examination, and the work which they do will be recognized by the university in the same way as the university recognizes such work when done within its own walls. This plan secures for the public school teachers of Chicago opportunities of collegiate courses, and they are so arranged that it is possible to prosecute them while the student is engaged in public instruction. The reflex and beneficial influence of these studies upon the public schools of Chicago will be simply incalculable.

The Phenomenal Growth of state universities, especially in the West, has claimed large attention from educators. Forty per cent of all the students at state colleges in the sixteen states where they have been established are attendants upon these public institutions. The inference is that denominational colleges must have larger equipments, or attendance will decrease still more. Another inference is, that denominations must establish universities, which will offer the broadest courses and the best equipments attainable. The American University is in line with this imperative demand, which has been forced upon denominational attention.

The Church Lighting the World: Brothers, the toiling night is well-nigh past; the future is bright with the advancing morning. The ages are rolling together at our feet. In Constantinople once at the Sultan's birthday I saw that great old cathedral St. Sophia illuminated. Everywhere, along the aisles and around the chancel and along the gallery fronts, and round the columns and in the alcoves and niches, and in and about all the windows, everywhere were placed candles and tapers, by the hundred and by the thousand. As the shades of evening settled in the gloomy recesses of the building, a multitude of men went everywhere with their torches, lighting the candles and tapers. The smoke from the torches and from the candles seemed almost to add to the gloom. Now and then a gust from an open window extinguished some of the tapers. It took

much time, but we could see by the flickering lights and lines of sparks that the great building was being illumined, and was marking its dim outline up against a dark sky. At last I watched the tedious process. I thought this is not altogether unlike the work of the church in the early centuries lighting the world. The messengers and torch-bearers stumbled along through the great masses of heathenism and pagan superstitions, here and there kindling a taper and awakening tribes and nations. Many of the tapers were extinguished by the migrations of the people and many quenched in blood by the red hand of war, yet slowly gaining on the darkness and spreading the circle of the light.—TOWLER.

JOHN PEATE AND HIS GREAT REFLECTOR.

"The largest in the world" is always a significant expression. Any thing that can be truthfully characterized in this way deserves and will receive attention. The Peate Telescope Reflector is the largest one of its kind in the world. The glass is sixty-two inches in diameter and five and three-eighths inches in thickness. Interest will attach not alone to this wonderful telescope-mirror, but also to its maker.

John Peate was born May 6th, 1820, in County Cavan, Ulster, Ireland. His parents came to America in 1828. His father was a mechanic. The family settled in Quebec, but soon removed to Vergennes, Vermont. Five years were spent in the Green Mountain State. Then they returned to Canada, living in Kingston. Later the family moved to Oswego and then to Buffalo, N. Y.

John Peate was converted in Eufaula and in 1839 joined the Methodist Episcopal Church in that city under the pastoral care of Rev. John Copeland. He prepared for college at Oberlin. The death of his father in 1844 required him to leave his college course unfinished and set himself to work for the support of his widowed mother. He married while living in Eufaula, but in a short time afterward moved to Warren, Pa. A call came to him to preach the gospel. He did not accept its binding authority except after a struggle. He then joined the Erie Conference in 1849 and is still an honored member of the conference. He has been an itinerant preacher for half a century, fourteen years of which he has been a presiding elder. He has also enjoyed the advantages of foreign travel, having spent one year abroad.

The itinerant life with its many vicissitudes would seem to afford little encouragement to any one who should desire to acquire a difficult art. And for a recreation few would have chosen an art most difficult to master. Yet Dr. Peate was one of these few. It was while he was presiding elder, that he in a half-humorous way asked Rev. W. W. Wythe, what he should do to avoid the danger of becoming stereotyped in that office. Dr. Wythe's reply was, "Make a telescope." To the most of us these would have been idle words; but they were words fitly spoken to Dr. Peate. In consequence of them he set himself to the study of the methods of polishing glass for astronomical uses. But not knowledge alone could accomplish the task in view. Great skill must be acquired, skill involving delicate operations and marvelous accuracy. The undertaking did not daunt Dr. Peate. Rather, its difficulties incited him to the task.

Some idea of his successful labors in this field may be gained from the fact, that Dr. Peate has completed successfully the making of sixteen mirrors of various sizes, since he began this mode of recreation. They are of different sizes and weights and most of them in the United States. An eight-inch mirror of his make is found to-day in India. Another, a twenty-two inch mirror, is owned by the Thiel College in Greenville, Pennsylvania. The largest one made previous to the

American University glass is thirty and one-half inches in diameter and weighs three hundred pounds.

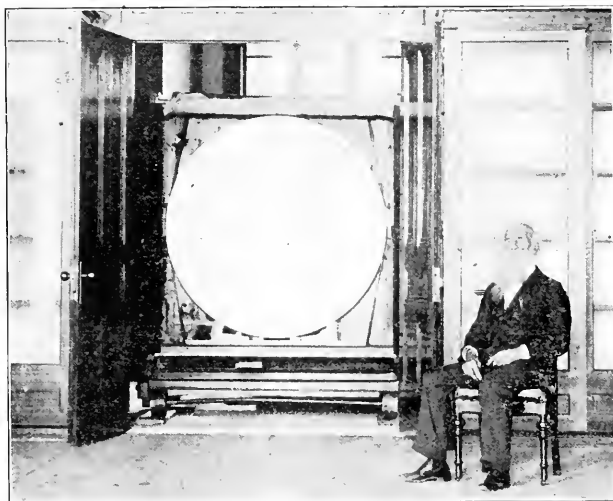

A session of the Erie Conference was held in the fall of 1893, at DuPois, Pa. Dr. Peate made the announcement before this body, that he would polish the largest reflector in the world for the American University if the University would furnish the material and conveniences to hand. He was at that time seventy-three years of age but was vigorous in health. A walk of twenty miles at a stretch would not daunt him. There was every reason to believe that he would live to accomplish this work if he should undertake the task. He left this proposition open for a year. The university accepted the offer through its chancellor, Bishop Hurst. Preparations were immediately begun to afford conveniences to make the mirror. A shop suitable for the work was built at Greenville, Pa., where Dr. Peate resides. Under his own supervision every arrangement was made and the skillful devices for polishing the glass were his own invention. Four times the glass was made by casting; four times there was failure. The fifth time was successful and the casting, weighing about a ton, was conveyed to the little shop. There was then necessity to invent machinery for handling this large

glass and new contrivances were needed for grinding and polishing. The fertile resources of Dr. Peate were equal to all emergencies. The first stroke was put upon the disc on July 15, 1896, and the work of polishing was completed on July 15, 1898. Two years were spent in the completion of this task. There were given 750 hours to the polishing alone. The disc lost about 500 pounds through chipping, grinding and polishing.

A friend writes this graphic paragraph concerning the telescope mirror. "Dr. Peate made recently a test of the great glass; by turning it toward the heavens and then perching on a ladder thirty-two feet from the face of the glass, he was able through an eye-piece to see stars he had never seen before. He said it was the greatest optical pleasure he has enjoyed since he

began the study of astronomy and the making of lenses. He expressed himself as well satisfied with the glass, and when he first realized that it was complete, and he could add nothing more to it, a great joy filled him, and he bowed beside his work and thanked God that he had been spared to complete the task assigned him two years ago by Bishop Hurst."

The removal of this glass required the greatest care. Transportation from Greenville to Washington had in it peril. Dr. Peate devised a mode of packing which seemed to promise safety in its journey. The glass was carefully placed in a box and then swung on a wheeled truck. An iron band was made to encircle the box for strength and other bands to go around it and by these it is hung, as it were, on edge. The large mirror, thus carefully guarded against injury, was placed in the main corridor of the college of History on August 24th. Dr. Peate had come on to Washington and was on hand to unpack the glass and to learn if the glass had become injured in the transportation. It was a great joy to him, to us all, to learn that the valuable telescope mirror had reached the University without harm. Our photograph of the case, enclosing the glass, and near by of the ingenious and talented maker will be a gladly welcomed

DR. PEATE AND HIS GREAT LENS.

sight to the friends of the American University. Some day, we trust before long, a noble and generous giver will appear, who will provide for the proper mounting of this mirror and also build it a worthy housing. The history of this mirror has all the features of romance in it, beginning with the acquisition of skill for this difficult work and culminating in this greatest of telescope mirrors; and interest is heightened when it is learned that Dr. Peate performed this task, after he had passed the appointed three score years and ten of life. The highly cultivated gentlemen who have charge of the Naval Observatory were deeply interested in the glass and were scarcely less interested in the venerable and gifted maker of the mirror. His work is worthy of the highest recognition and in the University it will remain a continual memorial of his genius, prudence, and good will.

Lishop Hurst's Address Before The General Conference of the M. E. Church, South, May 1898.

(Stenographically Reported.)

Bishop Hurst said: I appreciate, Mr. President, very highly the courtesy and hospitality of your honorable body, in permitting me to say at this time what may seem fitting in regard to the American University. With all our educational institutions in the North and South, in the East and West, I have never yet seen two of our schools that I thought interfered one with the other; and it is a very sure conviction of mine and pronounced that when institutions of learning are founded in conscience, founded in prayer, founded with the benefactions of God's saints and children here—that when this takes place—there can be no interference.

I suppose some of those people on the decks of the ships at Manila, on that immortal First of May, this May, when they saw Dewey's boats filing along in a sort of erratic irregularity, erratically filing along, they must have thought, perhaps there will be interference among these boats. But Dewey had measured it all. There was no interference, except with the other side—the Spanish ships. With us it was a happy and a perfect union, until eleven ships, Spanish keels, went to the bottom. (Applause.)

It is a short vision that makes the great Methodist Schools of America interfere one with the other. No more than your beautiful children at your breakfast table interfere with one another. Sometimes when the new one, the new face, is found there, one might think: How about the rest? Well, all the rest will love the new face with an indescribable love.

And I may say here in regard to the work which has been undertaken in Washington, that, so many have been God's methods of overcoming the difficulties; so many have been his royal touches by which the barriers have fallen, that now no one can say, no one can feel, that God is not in it. And when we listen to God's whisper, and when we are engaged in a work which God is seeming to establish by every providence, be it far from any one of us to contest his will. Our duty is to do the best we can.

FOUNDING OF THE BERLIN UNIVERSITY.

In the first decade of this century there were three men in Berlin who were thinking about a University. The decade was nearly at an end; another was about to begin, and these three men in a room scantily furnished brought each his contribution of a dream to the other two. One of them was Fichte, the great philosopher of North Germany; one was William von Humboldt, and the third one was Alexander Voon Schlegel, who wrote the history of literature, so well known in our country. These men had no large means. Like writers generally, they were all poor. They had little except talk and the power to dream, and they brought their thoughts together, and proposed gravely—these impecunious authors—proposed gravely to the whole world that they establish in Berlin a University. And the people said, We have got already in Germany nineteen; why another? These dreamers said, We have only one possible Capital in Germany for all the centuries to come, in which the citizens of our fatherland will gather, with equal love and interest.

They commenced without a dollar, but they gave

THE COLL

their thought to the enterprise. At that time the King of Prussia was in the North, a fugitive from his Capital. He had left Berlin. His beautiful Queen was with him, Louise. She was dying with a broken heart. These authors thought of it, of Napoleon in Berlin at this very time, and the land was over-run with Frenchmen. What, think of a University in such a time! Now is the time, said the Dreamer. Now is the time when we have neither land nor King, only an oppressor. And after a little while Waterloo came, and the fire of the Berlin University began to burn.

And what is it to-day? Only eighty years old, yet it has ten thousand students. It has six hundred professors. And it may safely be said that all the paths of science center in that University. So now it is found that the twentieth century is nevertheless a need for Germany. In '71 it was the German Schoolmaster that went to France, and it was this Schoolmaster that led to the declaration of the German Empire in the Capital of the French King.

GENESIS OF THE AMERICAN UNIVERSITY.

In regard to our own work, it would seem we had in our particular Church colleges enough; and as if we had in some places too many, though I want to cheerfully state that I think that is a mistake—we do not have too many. We are forgetting that

STORY.

our population is increasing all the time. Look at our Methodist constituency. We have to-day five million members. We have also twenty millions that gather under Methodist roofs every Sunday. And I say that it becomes us to pray with all our hearts that we may take care of this vast family, graduating every year at our Colleges and going into other paths and other fields without the slightest denominational or Christian restraint. It often comes to my lot to go across to other countries, and I never go and return but I meet young people, who have been at universities in distant lands but were trained at Methodist altars and converted in Methodist schools. These had graduated and received their diplomas from the hands of our Christian presidents. But after having studied in godless universities, and coming home with nothing of christianity in their hearts, they call the Bible a "failure" and a "fable." It is the duty of the Methodist Episcopal Church to take care of these young people.

THE UNIVERSITY SITE.

We do have in regard to our work in Washington some special reminders of what God has been doing. You will excuse me if there is something of a touch of personality, but it is an experience. When I had been in Washington some years, say eight years ago, I asked a

Methodist man if he could take me around Washington with his carriage and horse, and show me land that was available. And we went around daily for two weeks. On the last afternoon of that two weeks our piece of land came into vision. I was able to say from day to day "nothing suits," for if I must make an honest confession I didn't want to find any land. I wanted nothing of the kind. I wanted the friends who wrote to me to try to find a place where a University ought to be to find out that they were wrong prophets. I supposed if such a thing should come, I would be in duty bound to take it up so far as I could. I fought against it. I would turn my eyes to the other side of the road when anything promised. I thought possibly it would fracture every plan of mine in the world. But I had to do it. When this piece of land came into vision, it seemed as if it had dropped out of the heavens—so perfect was it. I never had an admiration for the Westminster Catechism as an entirety. But when that piece of land (ninety or a hundred acres) came before my vision, then it seemed from all eternity to be foreordained as the site of a Methodist University for the Methodist Episcopal Church. But the money, how should that come? There was not the first dollar of contribution, absolutely nothing. Then I said to myself, if the people here in Washington do not want the University, and will not give the purchase price of the site, I shall take it as providential, and will say, American protestantism is not ready for this undertaking.

Now the money came. We went round from one place to another, and, strangely enough, the money asked for more than came. So that when the first payment, which should be \$20,000, one part of the \$160,000, was needed there was \$23,000 on hand. I began to think: God wants it. And the next year the other \$20,000 and then the other, till now it is all paid, and we own a university site.

GOVERNMENT COLLECTIONS.

But then the question is, Why in Washington? Mr. President, there are in Washington sixteen different scientific collections. The people abroad in the land don't know what a vast scientific storehouse Washington is. We see a great deal of politics, and we see too many queer things in Washington. But where is the reporter, the newspaper reporter that sends it out to the four quarters of the heaven that in Washington there is the vastest literary and scientific storehouse that the sun shines on in this or any other land? Look at it. There is the Army and Navy Medical Museum. It contains the largest medical and surgical library in the world; facsimiles, representations, reproductions in gutta serena of the various formations of all the wounds known to human life, and all diseases. And surgeons come from foreign lands to walk through and see with their own eyes these demonstrations of surgical and medical science. The largest in this country—larger than the celebrated one in Paris that has been growing up for five centuries; larger still than that in Vienna, the finest in the world is that in Washington.

There is the Observatory. Now the Observatory is called the Naval Observatory, but it is not Naval any more than it is Military; simply the curator is a Naval officer. These sixteen great Collections close with the most recent, the Library of Congress, which has one million of volumes. It has cost \$8,000,000.

One of our Trustees, said: I think we ought to ask Congress to make these public to all students. And it seemed a proper thing to do. So we drew up a bill ourselves. I think Dr. W. W. Smith, of Randolph Macon College, gave final form to it. We owe the thought to him to go boldly up to both Houses of Congress and say, Declare these collections free to every student in the land that comes to study in Washington, in any denomination. Well, he wrote a little brief to help a Member of Congress when the bill should come

up. But Congress, in a remarkable spasm of common-sense, passed it without the necessity of urgency. (Laughter.) Dr. Smith's brief was not used, and the Bill was passed in both Houses and signed by the President immediately. What does this mean? What did these vast collections cost? They had cost \$6,000,000 of the people's money, and had been growing ever since the first Congress. We made our calculations after a while, and the first cost was about \$31,000,000. Yet we found that this was hardly half the real cost of these vast collections.

Now what did the Bill call for? It called for special locations. Mr. A. R. Spofford, for long years the Librarian of Congress, said: We will provide special tables for students, and special servitors to get the books and lay them on the tables for the students. And, said he, I am thankful for it. Heretofore, the Members of Congress used these books alone, but the young people can have access to them now.

I say to you this remarkable fact comes before us, that not a dollar need ever be spent in the American University Museum for a zoological specimen, or for any specimen of any kind, or for any large library of any kind. Congress gives them. It costs three and a half millions annually to take care of these collections and develop them; and that is all saved. It is right at our door. The curators complained at first. It was my good fortune to put them at ease, and say, you are courteous; you have always been so; but there is a great difference between a young man going up the steps to enter the collections by right as an American citizen, and by leave of yourselves as officers of the Government. We would first go "by right." There is no city in the world like Washington. Paris is sub-divided; it is all red tape to guard their collections. They have by the way a magnificent army, but I am looking after the practical things to develop the American citizen, and we have the wonderful collections in Washington in Science, in Literature, in every department. The Corcoran Art Gallery is wonderful, a storehouse of Art, of masterpieces. Not a dollar need ever be given by a donor to the American University for these; all gifts go to two things, and only two things: A place for the student and the employment of professors.

FIRST ENDOWMENT.

A lady said some time ago that she expected to make a gift to the University. And when I reached New York, she opened her plan. She said to me, I don't know about it. It is a queer thing to give before there is any visible building. Why, said I, Why not give your money toward a building? No, she said I have great respect for stone, marble and mortar. I like them very much, but I don't love them as well as I do brains. And when you have your building up, you shall have your endowment for your first building. And she gave \$155,755. Why she reduced it to so many odd figures, I don't know, and it was not my business to inquire. That was the first gift to the University, apart from the land. And we have gone on from that as a beginning, and we have to-day a building, the first building. It is built of marble. We intended to build of Georgia marble, but the Georgia owners of the quarries did not make us the good terms we needed, and that we wanted to have. But we are having our eyes for the next year on Georgia.

(A Voice: And Tennessee.)

I want to say that we have managed to bring together about a million of dollars, called by the Trustees a million and forty thousand dollars. And this is a calculation that the Trustees have made. We are now beginning on another plan. I will make you somewhat acquainted with the plan. A good lady in Pennsylvania said the other day: I have ten thousand dollars and I want to make that the beginning of a building in which

Arbitration shall be taught. Then, said I, as soon as the Spanish war is over we will begin Arbitration; (laughter and applause) International Law; Labor and Capital; the Science and the honor of Municipal Government, Christian Citizenship—all these topics that bear upon the burning thought of the time. Well, she says, I will add to that a little, and so, since then, she has given \$8,533. There is another "odd" figure. It was not my part to make it less. But that building, with that little beginning, is to cost a great deal of money. But the Lord is opening the hearts of the people. The money does not come as fast as I would like. Sometimes it seems to come very slowly. When we come to think of it, when we come to think of our Methodism, of the growing fraternity of all the years marked off by the pulsations of God's pendulum, there will never be an hour when the Methodisms of the world shall go apart, but they must come closer together. And it seems to me, whatever may be said of polity and history, nevertheless on the grand subject of education, every Methodist heart throbs with a more burning impulse and there can be no division to hinder this movement. So I do feel that, from the sentiments expressed in the papers of the Methodist Episcopal Church, South, and by your speakers on many occasions, by the letters that come from all directions, by the kindness and sympathy that will bring the tears to one's eyes even as he reads them, that it is not one Methodism alone but our common American Methodism which means to build up The American University. So I wish your prayers for this work.

The Methodist Episcopal Church, South, is represented by three noble men—our Bishop Wilson, than whom we have no warmer friend; Dr. W. W. Smith; and also Mr. Julian S. Hard, of North Carolina. These men are all strong and earnest and noble Trustees.

So I come now right to the thought with which Bishop Candler commenced, simply this: That Christian education is the hope not only of Methodism but the whole Church, and this whole land.

Mr. President: A few years ago an educator from a university in one of our Northern states delivered an address in Washington in which he said, We must have in Washington a free cathedra; we must have in Washington a University broad and strong; we must have in Washington a University founded by the national treasury, and founded by the taxes of the people, in which every thinker may feel at home, and from whose cathedra we can have such men as Huxley and Tyndall, who shall be free to speak their thoughts to the world.

I answer, But pay for it yourselves. If you want an infidel cathedra in Washington, you will never get it from the national treasury. Your Southern Senator, whose spirit went home to heaven a few weeks ago—that Senator and other Senators from every Southern state have stood up boldly and bravely in Washington, in their places in the Senate and said, Not one dollar from the national treasury for a so-called "University of the United States." (Applause.) And it will never be. I say to you this night that that so-called University of the United States, which means to take the money of the national treasury; to make the appointment of the professors from political sources; and to have the whole machinery, the personnel of the University, entirely secular—the appointments purely secular and political—I say to you that that Committee is opposed to it; I say to you that the Committee of the House of Representatives has never been called together in two years; it will never be.

GEORGE WASHINGTON'S THOUGHT.

George Washington did propose to found a University in Washington. He gave \$25,000 that had been given to him as "stock" in a Potomac Navigation Company. In his wisdom he gave that stock as the beginning of a Uni-

versity, in what he called The Federal Capital. But George Washington did not build so wisely as it was thought. The \$25,000 in the Potomac Company was a speculative scheme of certain citizens who hoped to get Washington in to help. Of that \$25,000 nothing came—nothing. It never grew to be anything, and was never worth five cents or the paper on which it was written.

So the good people said, We want to found the University; and some good ladies came to Washington and wanted to capitalize their interests, and found that there had never been \$25,000 except in the good plan of Washington to give it. I happen to have the original letter which George Washington wrote in which he gives that. But the Company went into insolvency afterwards, and there was no outcome. But George Washington never gave anything except in that good purpose. I will tell you practically what he said in that letter: "We want to found at Washington an Institution of Learning which will make us independent of foreign schools; so that our young people can be trained by American teachers according to the best of standards for the best American citizenship." And it is a happy thought. Though the gift never came to anything, the letter is strong.

I thank you, Mr. President, and this patient audience for these moments that you have so kindly given me. And let me say to you that whenever the time comes that any of you can come to Washington and see the University, and whenever any of you can, or are willing at any time to write for information, or any people of your acquaintance, we want you to feel that wherever the hand comes from, wherever the foot has been wandering, wherever the person has been cradled—we want it felt and known that whatever hand from whatever part of the land pulls the latch string, he is welcome and welcome forevermore. We trust we shall have your prayers and sympathy. Slow work. But I say to you that it is a delightful work, because God blesses every step of the way. And may your own institutions, your Vanderbilt and your magnificent schools, be blessed by the same Father that is leading our common Methodism in His path and by His hand. (Applause.)

Bishop Warren A. Candler, of M. E. Ch. So., in his address before the General Conference of his church in Baltimore, said these words:

"If we can bring into view the Image of the Lord Jesus Christ and bring into the heart faith in Jesus Christ and love for Jesus Christ, every one of these questions will settle themselves upon eternal bases that will not be disturbed by any shifting circumstances of the times. And here is our remedy. And I may say without exaggeration that the Hope of the despairing Republic lies in whether or not Christian Education filled with the spirit of Christ, shall dominate the mind of the Republic or whether that Education shall be unchristian and irreligious.

The issues of life are definite, and when we do this great work of Higher Education in the Name of the Lord Jesus, we render a service not less patriotic than pious, one that might engage the heart of the noblest patriots as well as the saintliest saints. We are therefore engaged in the greatest work possible in our time, when we are met in a meeting of this sort."

Readable Paragraphs.

Our Church in the Peninsular (Michigan) has been happy in its deliverance from a suicidal multiplication of Methodist colleges.—Editorial Northwestern Christian Advocate, Aug. 24, 1898.

The statement that a suicidal policy has been pursued in the location of many of our church schools is frequently made and seems to be quite generally accepted as true. Iowa has been usually the target for this kind of criticism. The effort of the board of education is wisely to guard against the multiplication of schools of high

grade. Their scheme is a symmetrical and beautiful one, a completed pyramid of classical schools and colleges, generally one in a state, or in a group of conferences, the whole surmounted by the great American University at the capital of the nation. Viewed as a whole, it is a grand monument to the genius of its originators, "a thing of beauty and a joy forever."

UNIVERSITY WORK: But whatever subjects we teach, it should be remembered that a university worthy of the name ought to be a centre of light on all the questions of the day, a workshop, in which new ideas are forged, and where, through the subtle interaction of mind upon mind, they emerge into clear consciousness and shape themselves in discoveries, in inventions, in systems for the benefit of the world at large. The professors must not be too heavily burdened in preparing students for examinations and examining them. They must have time to think, time to make their lectures really worthy of the highest class of students. If they do so students will be attracted even from a distance; if they have no opportunity of doing so, not only will they lose that for the sake of which they have chosen the calling of a professor, but the university will lose the chance of developing into a truly national institution.—(Selected.)

AMERICAN CIVILIZATION:—"The United States has reflected in every part of the world the light of a far superior civilization" (Lafayette.) "American civilization is the highest civilization that this world has ever seen, and comes nearer to the realization of the catholic idea." (O. A. Brownson.) "I wish to recognize the prospective and approaching right of America to be the great organ of the powerful English tongue." (Gladstone.) "Those men (Americans), whom you call cowards, politicians, runaways, knaves, are become victorious over your veteran troops, and in the midst of victory and the flush of conquest have set ministers an example of moderation and magnanimity well worthy of imitation." (Chatham.)

HISTORY IN EDUCATION: "History is but a series of tales of human beings; human beings form the theme which is of all things the most attractive to a child's mind. If the subject loses its charms by our handling, the fault is ours and we should not blame the child" (T. W. Higginson). "No free government can last in health if we lose sight of its traditions in history. And in the public schools these may be and should be sedulously taught" (W. Wilson). "The simple and sure method of inculcating American principles and ideas is the scientific study of American history. Our authorities in history teaching are agreed that rightly to understand, appreciate, and defend American institutions, the one plan is to know their origin, and their history, and so to learn the true policy required for our safety" (John Jay).

A PROPHETIC OUTLOOK: "Methodism does not beautify beyond the condition of those at her altars. She cannot take five hundred precious years in which to build a cathedral; but she builds three chapels daily, and stands in neglected places to invite the lowly. She erects her costly city churches, or contents herself with a chapel of plain boards or sod. Her schools will soon be of the best, and culture, music, painting, and all the sublime ministry of aesthetics will be the heritage of every child of the Church."—Methodist Review.

A NOTABLE MAN: Speaking of historic events and greetings suggests the snowy beard and white crown of John Peate, who in other years served his pastorate happily. His ruddy face aglow with genial soul within, he stands distinguished in this community as having done more than fashion lenses for telescopes. Below the town, at the junction of French Creek with

the Allegheny, stands a bold point. Here the eye may range up the river, or down, for miles, or, turning, take in a wide view of the long wind-galley of the creek. Here was John Peate's favorite destination in his rambles. He is well known as a rambler even in old age. It was once an Indian outlook. The Indian "God rock" is not far distant. Did not the writer say well, that John Peate had lent his personality to various tasks, but this time unconsciously—since his frequenting the point, where he was seen to sit for hours, lost in meditation, its historic name has been changed? It is known as "Peate's Point."—Pittsburg Advertiser.

SCIENCE TO THE RESCUE OF THE WORLD.

We always look to the presidential address at the annual meeting of the British Association for some expression of opinion not only scientifically important, but humanly interesting. Sir William Crookes, this year's president, has more than fulfilled expectation. He has, indeed, eclipsed all his predecessors by forecasting nothing less than the possibility of the failure of the world's wheat supply. In 1931, at the present average yield of 12.7 bushels per acre, if population increases at its present rate and the whole of the area capable of bearing wheat is under cultivation, the limit will have been attained. The prospect that in another third of a century a famine, such as that in India last year, will result in a shortage throughout the world is too appalling to contemplate. What, moreover, is to be done in 1951, when population will have far advanced beyond that of 1931? Will every human being be put on short rations? Having, with a skill which is a little dramatic as well as scientific, brought us to understand what the prospect is, Sir William proceeds to show how science proposes to come to the rescue of humanity. The problem is to be solved by raising the average per acre from 12.7 to 20 or more bushels. This will be accomplished by the aid of nitrate of soda, the judicious application of which in an invaluable experiment has shown that the productivity of the soil can be more than trebled. Nitrate of soda is mainly composed of nitrogen. But the nitrate fields of the world are exhaustible, and what science is now seeking to discover is how to capture the nitrogen in the atmosphere and reduce it to nitrate of soda. With the aid of the electricity generated at Niagara, science is confident that it can compass this great feat. That, at any rate, is the message which Sir William Crookes brings to menaced humanity in his address before the British Association.—London News.

DO LARGE TELESCOPES PAY?

The principal advantage of a large telescopic object glass—forty inches aperture in the special case as compared with a smaller one, ten inches—are summarized by Professor George E. Hale as consisting of, first, its power of giving much brighter star images and thus of rendering visible faint stars that can not be seen with the smaller telescope; second, in the fact that it gives at its focus an image of the object enlarged in proportion to its greater diameter; and third, in its capacity of rendering visible—as separate objects in the component of very close double stars or minute markings upon the surface of a planet or satellite. The large glass has its disadvantages too, among the chief of which is that it requires better atmospheric conditions to bring out its best qualities. The discoveries of the fifth satellite of Jupiter and the two satellites of Mars were made with large telescopes, and could hardly have been made with smaller ones. Much fine detail on the moon which the author has never been able to see with the twelve-

inch telescope is "clearly and beautifully visible" with the forty-inch. Micrometrical measures are effected with much more ease and certainty with the large telescope. It is particularly in astrophysical research that a great telescope is advantageous. It is necessary in spectroscopic observation to have as much light as can be gathered into a single point, and for this a large glass is essential. It follows from these facts that great telescopes really have a mission to perform. While on the one hand, they are not endowed with the almost miraculous gifts which imaginative persons would place to their credit, they do possess properties which render them much superior to smaller instruments and well worth all the expenditure which their construction has involved. In answering the question, "Do large telescopes pay?" it is simply a matter of determining whether the work which cannot be done without the aid of large telescopes is really worth doing.—Popular Science Monthly.

THE POPE'S CHALLENGE TO MONARCHY.

In the presence of this permanent plague Leo XIII has given the bishops, priests, and laymen the order "to go to the people." By establishing parish associations, workmen's clubs, popular banks, agricultural savings banks, economic bakeries, syndicates of all kinds papal Italy, under the direction of the pope, has created a new policy of economic aid against the heartless oppression of the desperate state. Doubtless the papal party, the vanguard of Italian Catholicism, will weave together again, one by one, all the meshes of the organization that has been destroyed. The adherents of the pope will gradually set up once more the 1,600 establishments which the government has dissolved. During the work of reorganization, however, the people groan and suffer. The quirinal, dragged along by the forces of disorganization, is rushing on toward brutal solutions: "Ruit viribus suis." The encyclical of Leo XIII to the people of Italy, contains instructions for the Catholics of the whole world. By his assuming the paternity of Italian democratic institutions we learn that meaning must be given to his synthetic formula, "go to the people."—Public Opinion.

PHILOSOPHY AND THE NEWER SOCIOLOGY.

There are not wanting in the literature of the new science that is called sociology, in the literature of philosophy, and in general literature, signs that the relation of philosophy to sociology, or of general sociology to general philosophy, is one of the questions of the hour. In Paris, which is after all, the secular head of Europe, and where, on the whole, with the Musée Social, the Institut International de Sociologie, and the Societe de Science Social, and other agencies of a similar nature, there is perhaps more organized study of theoretical and practical sociology than in any other single city, we find that the Revue Philosophique de la France et de l'Étranger, since its publication in 1875, has given a great deal of attention to the social question as calculated more than anything else to revive and sustain the metaphysical and philosophical impulse itself. A similar interest has manifested itself in the pages of the Revue de Métaphysique et de Morale. Many of the votaries of sociology would have the world believe it to be a new positive philosophy, which has supplanted at once the "transcendentalism" of the traditional metaphysics and the anarchistic materialism of the old political economy. A science of human life and of social development which is at the same time the true philosophy! Such is the conception that kindles and sustains the enthusiasm of aggressive sociologists, judging from the magazines and bulletins and propagandas of the countless sociological societies and schools of different countries.—Contemporary Review

FORM OF WILL FOR
The American University,
 WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest:

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land:

I give and devise to "The American University," a corporation in the District of Columbia the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate:

I give, devise, and bequeath all the residue and remainder of my estate, real and personal (including herein any and every legacy, bequest or devise, that may lapse or for any reason fail to take effect), to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses who should write against their names their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereto subscribed our names as witnesses."

OFFICERS OF THE AMERICAN UNIVERSITY.

<i>Chancellor</i>	BISHOP JOHN F. HURST, D. D., LL. D.
<i>Secretary</i>	PROF. WILLIAM W. MARTIN.
<i>Registrar</i>	REV. ALBERT OSBORN, B. D.

OFFICERS OF THE BOARD OF TRUSTEES.

<i>President</i>	MR. JOHN E. ANDRUS.
<i>Treasurer</i>	HON. MATTHEW G. EMERY.
<i>Secretary</i>	REV. CHARLES W. BALDWIN, D. D.

BOARD OF TRUSTEES.

(TERMS EXPIRE IN 1899.)

Bishop Thomas Bowman, Mo.
 J. M. Buckley, D. D., N. Y.
 Michael Burnham, D. D., Mo.
 Hon. Julian S. Carr, N. C.
 J. A. M. Chapman, D. D., Pa.
 Bishop C. H. Fowler, N. Y.
 Hon. H. N. Higinbotham, Ill.
 Bishop John F. Hurst, D. C.

Bishop C. C. McCabe, Tex.
 Judge L. E. McComus, D. C.
 Bishop J. P. Newman, Cal.
 A. J. Palmer, D. D., N. Y.
 Mr. Charles Scott, Pa.
 Chancellor W. W. Smith, Va.
 Judge W. M. Springer, I. T.
 Bishop A. W. Wilson, Md.

(TERMS EXPIRE IN 1903.)

Mr. John E. Andrus, N. Y.
 Mr. A. B. Duvall, D. C.
 Hon. M. G. Emery, D. C.
 Mr. B. F. Leighton, D. C.
 Bishop W. F. Mallalicu, Mass.
 Chaplain W. H. Milburn, Ill.
 Hon. R. E. Pattison, Pa.

Hon. Hiram Price, Iowa.

 Mr. B. H. Warner, D. C.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

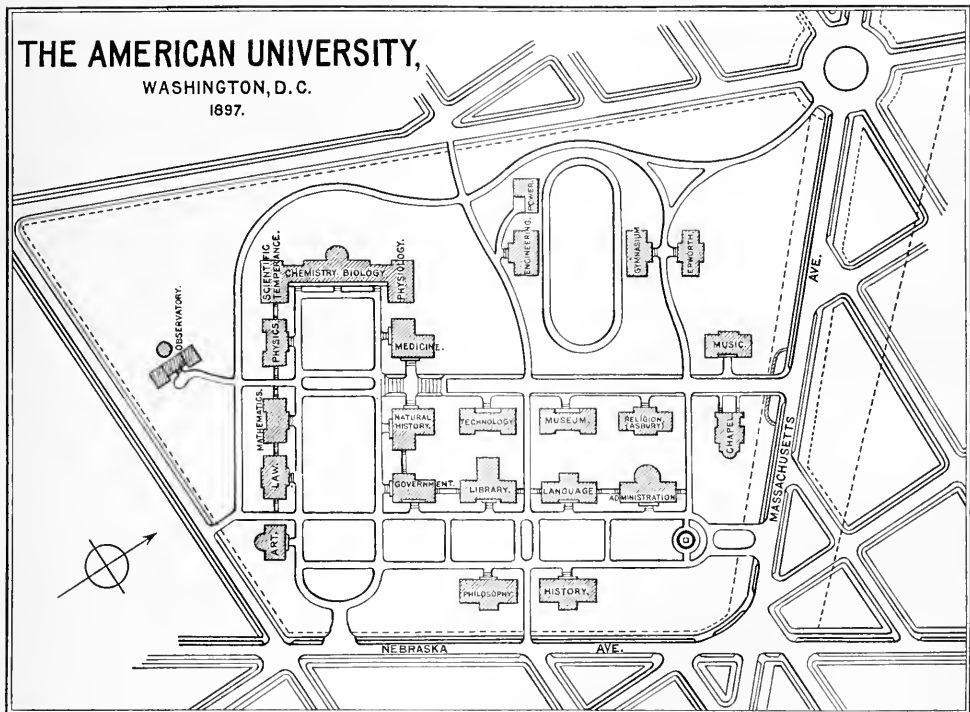

VOL. VII.

WASHINGTON, D. C., FEBRUARY, 1899.

No. 2.

Published Quarterly. Office, 1425 New York Avenue.

Subscription Price, Twenty-five Cents a Year.

Plan of Grounds.

The above cut exhibits in outline the plan for the arrangement of buildings on the grounds of The American University. It was adopted in its general features by the Board of Trustees on May 5, 1897. The details of walks, trees, shrubbery, and decorations in the way of statues and fountains can not be shown on a plan of so small a scale. The College of History is 176 feet in length, and may be used as a scale of measurement. It is ex-

pected that grading will be continued during the year, and the planting of trees and shrubbery follow soon thereafter.

The entire track consists of 90 acres, quite varied and rolling in its contour, the elevations varying 100 feet. Not far from the center of it is a spring of good water sufficient for the development of artificial lakes.

Gifts and Bequests.

John M. Studelaker, Thomas Kane, and Alexander McDonald have given \$55,000 to raise the mortgage on the Presbyterian summer school at Winona Lake, Ind.

Lord Trench (Edward Cecil Guinness) has given \$1,250,000 to the Jenner Institute, London, in aid of scientific research in bacteriology and other forms of biology.

The will of Miss Mary A. Barnard, of Amesbury, Mass., bequeaths \$10,000 to the Amesbury Public Library and \$4,000 to the Anna Jacques Hospital in Newburyport.

Henry M. Livingston, of Saratoga Springs, N. Y., has offered to give \$25,000 for a Young Men's Christian Association building, provided an equal amount is raised by the association.

A press dispatch from Montreal states that at the last meeting of the Board of Governors of McGill University Lord Strathorn announced his intention of endowing the new Victoria College for women, which he built at a cost of \$250,000, to the amount of \$1,000,000.

The will of John L. Gardner, which was recently admitted to probate in Boston, provides that at the death of Mrs. Gardner \$275,000 are to be given to public charities, as follows: Boston Museum of Fine Arts, \$100,000; Boston Lying-in Hospital, \$100,000; Massachusetts General Hospital, \$50,000; and \$25,000 to the town of Brookline for its public library.

Recently it was announced that D. L. Moody had received a gift of \$100,000 in stocks and bonds for his school work in Northfield. The funds are to be divided, the Normal Seminary and Mount Hermon School each to receive one-half. The name of the giver is not made public.

By the will of Felix R. Brunot, of Pittsburg, \$30,000 is given to the Divinity School of the Protestant Episcopal Church; \$60,000 to the Domestic and Foreign Missionary Societies of the same Church, to be applied in sums of \$10,000 to the education of the Japanese in Japan, the Chinese in China, the natives in Africa, the negroes and the Indians; \$10,000 are given to the American Church Missionary Society for Christian Education; \$20,000 to the Evangelical Education Society of the Protestant Episcopal Church; \$10,000 to St. James Protestant Episcopal Church, Pittsburg; \$45,000 to the Western Pennsylvania Hospital; \$50,000 to the Western University, Pittsburg; and \$20,000 to the Allegheny Relief Society.

Mrs. Esther Herrman, of New York, has given \$10,000 to the building fund of the Scientific Alliance of that city.

Dr. Edward Murphy, of New Harmony, Ind., has given \$12,000 to the Library Association of that place.

P. Seme-link, of Vriesland, Mich., has given \$10,000 to the Board of Foreign Missions of the Reformed Church.

Andrew Carnegie has offered to donate \$100,000 for a library building for the State College at Bellefonte, Pa., providing the State will appropriate \$10,000 annually for the maintenance of the library and museum to be connected with it.

William Whiting and William Skinner, of Holyoke, Mass., have each contributed \$10,000 toward the \$50,000 needed to secure a site and building for a library for the city promised by the Holyoke Water Power Company.

The will of Dr. Orrin S. Sanders, of Boston, provides for the distribution of \$50,000 among charitable and educational institutions in Massachusetts and New Hampshire after the death of his widow.

Joseph Pulitzer has given \$10,000 to establish a scholarship at Barnard College in memory of his deceased daughter, Lucille.

Sir William McDonald has given to McGill University \$181,250 to complete the endowment of the McDonald building of chemistry and mining.

George Washington's Educational Idea.

Bishop Hurst has in his possession a unique and valuable endorsement of the wisdom of the Methodist Episcopal Church in undertaking to make the National Capital the national center of higher education.

It is an autograph letter by George Washington, dated Philadelphia, 16th March, 1795. The following are extracts from this rare and costly letter:

It is with indescribable regret that I have seen the youth of the United States migrating to foreign countries in order to acquire the higher branches of erudition and to obtain a knowledge of the sciences. Although it would be injustice to many to pronounce the certainty of their imbibing maxims not congenial with republicanism, it must nevertheless be admitted that a serious danger is encountered by sending abroad among other political systems those who have not well learned the value of their own.

It has been represented that a university corresponding with these ideas is contemplated to be built in the Federal city, and that it will receive considerable endowments.

The students who wish to pursue the whole range of science may pass with advantage from the seminary to the university, and the former, by a due relation, may be rendered co-operative with the latter.

With great consideration and respect, I am, sir, your most obedient and humble servant,

GEO. WASHINGTON.

His Excellency, ROBERT BROOKE,
Governor of Virginia.

Semi-Annual Meeting of the Board of Trustees.

The Board met in executive session Tuesday morning at ten o'clock, December 13, 1898. Congressman William Connell, of Pennsylvania, presided, owing to the enforced absence of John E. Andrus, President of the Board. Prayer was offered by Dr. W. H. Milburn, Chaplain of the Senate. Others present at the meeting were Bishop Hurst, Chancellor; Bishop McCabe, M. G. Emery, Dr. C. H. Payne, Dr. J. O. Wilson, Dr. D. H. Carroll, ex-Governor R. E. Pattison, George P. Hukill, C. C. Glover, Thomas W. Smith, Judge Charles F. Scott, Dr. C. W. Baldwin, Professor W. W. Martin, the Rev. Albert Osborn, Dr. B. F. Dimmick, Dr. J. Wesley Hill, the Rev. M. C. Beale, Henry Ives Cobb, and Thomas Bradley.

The reports of the standing committees and of the officers of the university were submitted. Especial interest attached itself to the statements of Bishop Hurst, Chancellor, when he spoke of the widespread enthusiasm in the university as evidenced in the movement to erect State buildings.

At the request of the Chancellor, Bishop McCabe made known to the Board his purpose to organize an alliance of 1,000 ministers who should pledge themselves to raise \$1,000 each, thus securing for the endowment alone \$1,000,000. Later in the even-

ing C. C. Glover handed to Bishop McCabe a check for \$1,000, being the first \$1,000 actually paid upon this \$1,000,000 endowment fund. A second movement, known as the Woman's Guild of The American University, will also be inaugurated by Bishop McCabe, the purpose of which is to raise a second \$1,000,000 for endowment.

Mr. Henry Ives Cobb was present by invitation, and explained a view in water colors of the site and the buildings which it is proposed to erect. His description and clear definition of the architectural features of these edifices gave the Board a beautiful mental picture of the noble group of marble buildings which it is hoped will some day adorn the large and beautiful university campus.

Professor W. W. Martin, Secretary of the University, was also chosen Professor of Semitic Languages. W. L. Davidson was elected Field Secretary for the University, and will have in his particular care the raising of funds for the Ohio College of Government. Five Trustees were elected, as follows: Mrs. E. S. Tome, Port Deposit, Md.; Thomas W. Smith, Washington, D. C.; S. Parkes Cadman, D. D., New York City; John E. Du Bois, Du Bois, Pa.; J. Wesley Hill, D. D., Fostoria, Ohio. Ex-Governor Pattison, of Pennsylvania, presided at the afternoon session. Taken all in all, the meeting may be regarded as one having the greatest significance for The American University. The dream of the Chancellor seems near fulfillment; or, rather, that provision of a seat which beheld this university, with its twenty-one marble buildings on the finest site in Washington, seems to await only the opening of the next century for its complete realization.

Asbury Memorial Hall.

Since the issue of the COURIER, November, 1898, the following amounts have been subscribed toward this fund:

CALIFORNIA, \$1,880.

\$480—W. C. Gray. **\$100**—D. W. Calfee, E. R. Dille, W. C. Evans, Chaplain McCumber, C. E. Locke, Joseph Stubbs, A. M. Baily, A Friend (Bishop Hurst). **\$50**—J. H. N. Williams, E. R. Willis, R. Bently, C. H. Harrold. **\$45**—A Friend (per Dr. Harris). **\$30**—A. Kummer, S. J. Carroll, J. McCauley, Thos. Filben, Mrs. T. P. Williamson, S. G. Gale. **\$25**—Mrs. G. H. Jones, C. E. Pettis, F. F. Jewell, Fred Sheldon, Geo. Larken. **\$20**—Mrs. E. Wearing. **\$15**—A. Holbrook, A. H. Needham.

SOUTHERN CALIFORNIA, \$1,875.

\$1,000—A. C. Hazzard, **\$100**—A. M. Hough, Mrs. Leslie Gay. **\$100**—B. C. Lockwood. **\$50**—G. W. White, E. W. Caswell, R. S. Cantine, L. M. Bartley, E. S. Chase, Thomas Stalker. **\$30**—W. S. Matthew, A. A. Graves, Clarence T. Wilson, C. A. Westenberg, W. Sterling, Isaac Jewell. **\$25**—E. A. Healy, W. A. Knighten, T. S. Urcu.

ARIZONA MISSION, \$265.

\$100—Ex-Gov. L. C. and Mrs. Hughes. **\$50**—S. A. Thomas. **\$45**—Mrs. Norman Howard Bartlett. **\$30**—John M. Baxter, Miss Ethel McCormick. **\$10**—David Roberts.

NEW MEXICO ENGLISH MISSION, \$220.

\$100—Mrs. A. A. Hyde. **\$10**—A. Hoffman, A. P. Morrison, J. F. Kellogg, F. M. Day, A. A. Hyde, J. A. Mussell, J. G. Hall, A. M. Lumpkin, G. S. Madden, C. M. Light, A. E. Bennett, Mrs. M. J. Clayton.

NEW MEXICO SPANISH MISSION, \$402.

\$100—Thos. Harwood. **\$50**—T. M. Harwood. **\$30**—L. Frampton. **\$24**—L. Fernandez. **\$15**—T. Charez, J. B. Sanchez, S. Garcia, J. Sandoval, B. Gutierrez, Juan C. Charez. **\$10**—E. Flores, J. S. Martinez, E. Montoya, L. Vargas, Cruz Martiuez. **\$12**—A. Mares (Maria C. de Mares, Felix Maris, Rosa Martes). **\$6**—E. C. Salazar, D. Costales, Cecilio Ortega. **\$5**—T. Zubiate, Manuel Flores. **\$3**—B. Gonzales, J. A. Yijil, Mrs. J. B. Sanchez, Nat Frampton, "Dr. Harwood's Boy," J. W. Sinnock.

ASBURY MEMORIAL HALL.

The following payments on this fund have been received from subscribers since our issue of November, 1898:

\$100—J. W. Haney, W. H. Kellogg, J. A. Ballantyne, A. R. Rich, G. W. Izer, J. N. Sayers, A. B. Thomas. **\$75**—Seth Reed, A. T. Dotterer. **\$66.67**—S. W. Stornas. **\$50**—W. C. Rice, Robert Watts, J. B. Brady, N. L. Bray. **\$40**—L. E. Lovejoy. **\$35**—F. H. Coman, James Hamilton, W. H. B. Urch. **\$34**—J. W. Fawcett (for F. Flanigan). **\$33.33**—W. D. Evans, J. H. Johnson, H. C. Jennings, G. W. Peck, P. T. Lynn, F. H. Beach (for M. R. Webster), C. B. Mitchell, A. D. Harrington, Ephriam Potts. **\$33**—F. W. Merrell, W. H. Hunter. **\$30**—F. D. T. Bickley. **\$25**—J. D. Knapp, A. C. Bowers, J. R. Westwood, Edward Hayes, W. F. Sheridan, G. W. Howe and wife, Alfred Coons, C. T. Allen. **\$20**—H. L. Chapman, M. B. Mead, S. M. Hartupee (for J. D. Lea), J. M. Bull, S. D. Kemeser, A. B. Sniff, J. G. Hann, W. C. Clemo, J. B. Westcott. **\$17**—J. H. Barron. **\$16.66**—S. R. Kerfoot, J. A. Cole, L. J. Muchmore, C. C. Albertson, J. M. Brown, J. H. Hughes, D. H. Ramsdell. **\$16**—I. H. Skinner. **\$15**—George Mather, E. G. W. Hall, W. H. Allman, W. L. Holmes. **\$14**—W. A. Mackey. **\$13.32**—B. M. Clark. **\$12**—E. S. Lewis. **\$11.66**—F. H. Roberts. **\$10**—G. J. Luckey, W. F. Jamison, John Watson, T. G. Wakefield, N. D. Creamer, J. A. Killam, O. S. Chamberlayne, B. Copeland, W. R. Pierce, J. A. Lowry, R. Hancock, J. E. McEldowney, E. H. Witman, A. M. Wiggins, E. C. Yerkes, G. E. Ackerman, R. L. Hickson, H. J. Johnston, R. H. Craig, T. W. Hart, H. W. Knowles, E. L. Kellogg, W. Z. Cole, A. M. Gould, Levi Holmes, P. E. Whitman, A. T. Luther, G. A. Brown, J. H. Bennett, F. G. McCauley, J. Torbet, T. J. Grose, F. S. Hoyt, B. Hushour, L. L. Hanscom, W. K. Marshall, E. P. Robertson, J. Stafford, Ethel McCormick, Osborn Belt. **\$9**—Elijah Haley. **\$8.33**—J. J. Timanus, C. L. Gaul, I. M. Gable, L. L. Gaul, F. A. Cone, T. A. Jones, P. B. Stroup. **\$8**—S. T. Dunbar, J. E. Connor, J. A. Chapman, H. B. J. Marsh. **\$7**—G. S. Innis, J. N. Shoop. **\$6.66**—Mrs. Julia Burger, S. M. Stewart, R. R. Atchison, J. W. Heard, R. N. McKaig, Joyce McKaig, D. W. Goodyear, G. L. Mount. **\$5.33**—J. C. Beach. **\$5**—J. W. Joles, J. A. Northrup, D. T. Wilson, R. T. Ballew, C. F. Crane, G. D. Hensell, S. E. Steele, M. L. Miller, V. H. Brink, C. W. Cordes, O. L. Truitt, W. B. Editorial Notes.

The *American University Courier* is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, 1425 New York Avenue, Washington, D. C.

THE ASBURY MEMORIAL FUND has larger significance for The American University than is represented by the money which it yields. It was in line with that far-reaching purpose that inspired our enterprise to have most prominent in the development of the university the preachers of Methodism. The name Asbury was most wisely chosen; for he is type of that consecration, intelligent industry, and masterful courage which has won the greatest triumphs of the Methodist Church. Our preachers have shown large interest in The American University by their gifts to the Asbury Fund, but they are more recently showing a larger interest by active co-operation with us. The preachers' meetings in Pittsburg and in Columbus became most enthusiastic when they learned first of the great scope which the plans for the university involved. They heard this account from the lips of Bishops Hurst, McCabe, and Mallalieu, each wisely eloquent for our great enterprise.

THE TWENTIETH-CENTURY FUND is the latest expression of daring Methodism. Twenty millions of dollars are to be raised for educational and other purposes by our Church. The Executive Committee of this Century Fund have organized, and chosen their secretary. "Conferences, Districts, Churches, Epworth Leagues, and all bodies that can help," are to be approached for gifts. Our Church is great enough to devote this sum to these wise ends; and we think that our Church will be grand enough to do so. It is to be kept in mind by all those who contribute to this fund that they have a perfect right to designate to what special purpose, whether educational or otherwise, and indeed to what educational institution, their gifts shall go. Our university expects large returns from the fund, not less than five million dollars. And in this hope we are confirmed by the many assurances coming from those who are interested in having one university in Methodism that shall take worthy place by the side of Oxford and Cambridge, the splendid ornaments of England.

OHIO IN THE WAR is the unique heading to an editorial in the *Western Advocate*, issue of February the 8th. Dr. Moore opens the editorial with this sentence: "All local interests and jealousies give way before the paramount importance of building and equipping the great Protestant university in Washington city." Such is the magnetic influence of our university. There is in it, because of the vastness of the undertaking and of its significance to every family in Methodism, power indeed to allay all local interests and jealousies. Toward the close of this editorial is this sentence: "What a mighty citadel of our faith! What a fortress of patriotic loyalty! What a Gibraltar of Methodism!" If the editor of the Psalms, instead of the editor of the *Western*, had written these words he would have put Amen in place of the exclamation mark, and in this way he would have said: "So let it be."

The Endowment Alliance of The American University.

The Methodist Episcopal Church is thoroughly committed to the building and endowment of The American University. We can not retreat without disaster, we can not fail without dishonor. -

The General Conference of 1892 took action upon the subject and declared it to be "the duty of the Protestant Church to provide in the City of Washington a university, Christian, catholic, tolerant, and American, having for its sole aim post-graduate and professional study and original research." Great expectations have been justly created by the action of the General Conference. The Bishops in the Episcopal address of 1892 have strongly endorsed the enterprise. They said:

The initial steps have been taken for the establishment of a university at the capital of the Nation. A charter has been secured, a Board of Trustees has been constituted, subject to the approval of the General Conference, and an eligible site has been purchased and provided for at the cost of \$100,000. It is our judgment, already expressed to the friends of the movement, that the accomplishment of the plan, from both religious and patriotic motives, is desirable, and that the university should be so richly endowed and equipped as to place it in the front rank of the most renowned institutions in the world. Its object should be departmental, professional, and scientific truth. In order to its endowment, and preparatory to its operation, there should be not less than \$5,000,000, while we regard \$10,000,000 necessary to its full equipment. It might be wise for the General Conference to commend it to men and women who possess large wealth as a suitable object for their liberal gifts. The character of The American University places the institution under the direct authority and control of the Church and requires that its Board of Trustees be confirmed by this and succeeding general conferences. We hope this General Conference will

take such action in relation to this institution as its proposed place in the Protestant life of our country and its relation to the educational system of our Church would seem to justify.

The Board of Control of the Epworth League, at its meeting in 1891, in St. Louis, took action as follows:

WHEREAS, This Board of Control learns with genuine satisfaction of the measures taken for the founding of a great National University in the City of Washington, D. C., under the patronage of the Methodist Episcopal Church; and,

WHEREAS, The Bishops representing the entire Church have endorsed the proposed University in unqualified language; therefore,

Resolved, That we, the Board of Control, representing the young people of Methodism, and recognizing the close relation between the Epworth League and The American University, whose object is the higher education of the youth of our land, gladly unite in the endorsement of the Bishops and commend this national educational enterprise to the Epworth Leagues of our Church.

It is not to be a Methodist university, but a Protestant university. It is to stand for an open Bible and for religious liberty. We therefore appeal to all American Protestantism to help us.

The progress thus far is most encouraging. Bishop John F. Hurst, resident bishop at Washington, has been the prime mover in the work. He selected the site; he bought the land in his own name; he raised the \$100,000 needed to pay for it. When he

he turned it over to the Board of Trustees its value was not less than \$500,000. An endowment of \$200,000 has been secured and \$155,000 of it paid in securities which are now bringing an income of five per cent. A beautiful building, called The Hall of History, has been completed at a cost of \$175,000, and the money to pay for it has all been pledged by responsible men. The preachers of the Methodist Episcopal Church have subscribed \$80,000 toward the erection of Asbury Hall, which is to cost at least \$100,000. A movement is on foot in Pennsylvania to secure the money in that State to build

the Hall of Administration, whose estimated cost is \$200,000. Nearly \$50,000 has already been pledged for this purpose. A similar movement has been started in Ohio to build The Hall of Government, at an estimated cost of \$150,000, and a good start has been made toward securing the money. There is no doubt that appeals to the Christian and patriotic impulses of the people of these two great States will be successful.

It was a pleasant surprise to Bishop Hurst to find that he had selected the land on the line of Massachusetts Avenue, the finest residence street in Wash-

ington. He secured the passage of a bill opening that street clear through to the site of The American University, and later on the Bishop secured the passage of another bill providing for the erection of a bridge over Rock Creek, which is to cost not less than \$250,000 and to be lined on either side with statues of departed heroes of the Republic. That bridge will itself be one of the finest ornaments of the Capital.

When these improvements are made a brisk drive of twenty minutes will bring the visitor from the center of the city to University Heights. But, more

Copyright, 1909, by L. H. & J. H. ...

C. C. McKeabe

than this, Bishop Hurst has secured the passage of a bill through Congress giving "the right of way" to all students of all colleges and universities in the Capital into all Government institutions, such as libraries, museums, laboratories, including the famous Smithsonian Institution, so that these Government scientific collections, whose total cost is \$32,485,000, and for whose maintenance, increase and care the Government pays out three million and a half of dollars in a single year, shall be accessible to the poorest boy in all the land who can graduate at any college or university and go to The American University for post-graduate study.

No university in the world is rich enough to have such wonderful scientific collections as these, and they will be just as much the property of The American University as though we had bought them and owned them, with the advantage that the Government takes care of them and keeps them for us at its own expense.

The Methodist Episcopal Church needs the inspiration and the unifying power of a great enterprise like this. Let no one say we are not able to do it. A penny a day from each member of our Church for a single year would build all these twenty-one marble buildings and place six million dollars in the Endowment Fund, so that the question of ability is settled forever. *The Church can do it!* We are being educated to attempt great things for God.

Too long we have allowed Bishop Hurst to bear this burden alone. He has toiled on with the same patience and plodding industry that characterized him when he saved Drew Theological Seminary from financial ruin, and he did that so deftly and so quietly that the Church at large did not realize that the entire endowment of the seminary of \$300,000 had been blotted out. That endowment was replaced in an incredibly short time, and doubtless it was in that experience he got the faith to attempt the creation of The American University. We have looked on and voted good resolutions, but the time has come when more than good words are needed. *We must help him now!*

Rome has seen for years the advantage of having a great University in Washington City. Ten years ago the first building was erected. The sisters of Notre Dame de Namur have purchased twenty acres near this university and will there establish Trinity College for the higher education of women. An immense building for the Franciscan monks is being erected. This is the strongest of all the Catholic orders. Forty acres have been purchased for their use. The Jesuits will be there in force, and it is easy to see what part this great institution will seek to play in our national affairs. There is in these statements an overwhelming argument in favor of instant and tireless activity in building and endowing a great Protestant University in the National Capital.

Some one inquired of Stephen Girard how to get rich. He answered, "There is no trouble after you get the first million." What is true of individuals is

true also of universities. If we can raise one million of dollars toward the endowment other millions will surely follow. Only assure the Church and the country that The American University is an accomplished fact and the golden stream will set towards it until all the buildings are erected and the endowment shall be completed.

Are there not a thousand preachers who will enter into an alliance to help raise the first million for the endowment? Let the pledge be this: **"I agree to make steady, prayerful and persistent efforts in behalf of The American University, until I shall have been instrumental in raising for it one thousand dollars."** This pledge is to involve no personal financial responsibility. A failure to succeed will involve no publicity and bring no blame whatever. The security of a bequest of \$1,000 will be regarded as a fulfillment of the pledge. Some who attempt it will succeed far better than they expect. There are thirty-five members already enrolled. One of them has secured a bequest of \$5,000 and another has been instrumental in securing pledges amounting to \$7,000. When the plan of the Alliance was made known in the recent meeting of the Board, Mr. C. C. Glover, one of the members, handed over his check for \$1,000 to pay the pledge made by a member of the Alliance.

The question is, May I enroll your name in this Alliance for the endowment of The American University?

Bishop Fowler closed his address before the General Conference of 1892 with these prophetic words:

But, as I listen and look, a brighter vision spreads out before my gaze. I see the rich men of this great Church coming up from every section of the country; from the factories and refineries of New England; from the shops and homes of New York; from the mountains and coal treasures of Pennsylvania; from the wide plains and crowded granaries of the Mississippi Valley; from the vast cotton fields of the South; from the mines of the golden West; from the counting rooms of all the great cities. I see them coming with their treasures and their wealth, pouring their gifts into the lap of this American University till she has no want named. I see her professors, under the guidance and inspiration of a great evangelical church, unfolding every science to its utmost depths, and leading the throngs of students with glad hearts into the new and multiplying apartments of the magnificent mansion fitted up and given to us by our Great Father. I see on the summits, overlooking the capital of this greatest of nations, an opulent group of stately buildings, forming a suitable city of letters, while, over the dome of her great science hall, the outstretched arms of the Cross and the waving folds of the Stars and Strips catch the first beams of the Atlantic sun.

Let not the "splendor of the promise be lost in

the poverty of its fulfillment." If one thousand of our preachers will join this Alliance to raise the first million we can make it certain that for all coming time The American University shall stand for a pure Christianity, an open Bible, and for religious liberty.

All gifts to the University will be counted in the Twenty Million Dollars Thank-Offering Fund.

Please write me at your convenience. On this subject address me at Evanston, Illinois.

Yours faithfully, C. C. McCABE,
Secretary of the Endowment Alliance.

The College of Government as Architecture.

Few, if any, universities have a consistent architecture expressed in their various edifices. There is, therefore, greatest charm in a university whose projected buildings are architecturally harmonious and beautiful. It was rarest wisdom in the projectors of The American University to secure the services of the eminent architect, Henry Ives Cobb, and in this way be assured of noble edifices, rich and harmonious in their architectural features and

imposing through their splendid proportions. The Ohio College of Government has won immediate admiration from every one who has seen its design. The location on the university site chosen for this college is finely adapted to set forth its beauties. It is at the intersection of the quadrangles. One of these runs north and south and the other east and west. The general plan of this College of Government is readily discerned. At the corner is a semi-circular colonnade. Its six tall columns of the Corinthian style support a beautiful entablature. In

the frieze the name of the college will be carved, and above this is placed a cornice, every line of which is full of grace. A dome rises above this circular portico, making the entrance to the College of Government most impressive and replete with most striking architectural charms. From this beautiful portico there extends northward a series of arches, within which are builded the window apertures, and upon this arcade is placed an entablature which is in harmony with that above the columns of the entrance, and also westward there extends the counterpart to this—the two make the wings of the building. The College of Government is unique as an architectural structure. Ohio is taking heartiest interest in the building. We doubt not that the State which has furnished so many Presidents for our Federal Government will take increasing delight in this beautiful Ohio building, not only furnishing the money to erect it, but also to give to it a suitable endowment.

President's Reception to the Trustees of The American University.

The unusual interest in the University and its remarkable progress within the last few months have combined to make the matters to be presented to the Board of greatest import at their approaching semi-annual meeting. The widespread interest in the movement to erect upon the University grounds State buildings, and to endow them by the people of the different States who are interested in higher education, has increased most remarkably. Already Pennsylvania is planning to build the Hall of Administration, and Ohio the Hall of Government. These interesting and recent developments in the plans and progress of The American University give to the enterprise a distinctly national character.

It was very gracious on the part of the President to assent to a reception to the members of the Board of Trustees as could meet in Washington and be present at the Executive Mansion at 10 o'clock a. m. The following members met at the Arlington: Bishop J. F. Hurst, Chancellor; Bishop C. C. McCabe, Hon. William Connell, C. C. Glover, G. P. Hukill, T. W. Smith, D. H. Carroll, J. O. Wilson, A. B. Duvall, C. W. Baldwin, W. W. Martin, A. Osborn, W. F. Davidson, and B. F. Dimmick. These gentlemen went together to the Executive Mansion. The President

met each and pleasantly spoke to them, and then his attention was called to the birds-eye view of the grounds, prepared especially by William Ives Cobb, the distinguished architect. These buildings were arranged about the quadrangles, each having its distinctive architectural character and together forming a group, when erected, without parallel. The members of the Board were introduced by the Hon. William Connell, Member of Congress from Pennsylvania. In pleasing and graceful words he told the President of the national character of this movement in the line of higher education, and pointed out to him the beautiful building known as the Ohio College of Government, and then directed his attention to the Pennsylvania Hall of Administration. The President, having looked at the designs of these two classical edifices, pleasantly remarked, "Penn's building is by far more pleasing than Ohio's." After the introduction of Mr. Connell, the President spoke genially and kindly with the members of the Board, singly and in groups, and after expressing heartiest pleasure in receiving the Trustees of The American University, and in being informed of the grand scope of the movement and of its remarkable progress, the interview was concluded.

Our Pittsburgh Meetings.

The unusual interest of the friends of the University in that new departure which looked toward the erection of the university buildings by the several States led our Chancellor, Bishop Hurst, to plan a series of meetings in the various cities. Pittsburgh was chosen first. The meetings in this busy city were held during the last ten days of November. Bishop C. C. McCabe joined with the Chancellor in presenting to the Pittsburgh people the enterprise of The American University. It was a revelation to those in the city, interested in higher education, when the magnificent undertaking was set forth by our two bishops. They added these labors for the university to the many duties connected with the episcopal office. Meetings were held in Allegheny and Pittsburgh. The Hon. William H. Graham, Congressman-elect, presided at the Allegheny meeting, and Col. John Murphy, member of the local committee, presided at the Pittsburgh meeting, which was held in Christ M. E. Church. The active co-operation of Dr. Dorchester,

Jr., and Dr. Izer, and the Presiding Elder, Dr. Beazell, promoted largely the success of these meetings. Nor should we be unmindful of the active part taken by our Methodist preachers of the city and vicinity. We give extracts from the public press which will have interest to our readers. Our obligations to the papers of the city for their courtesy in giving splendid notices of our gatherings is very great, and we take especial pleasure in acknowledging our debt.

Echoes from the Pittsburgh Press.

The Visit of the Bishops.

"The purpose of the visit of the bishops to this city is to lay before Pittsburgh's citizens the plan of a great university at Washington, D. C. A site containing nearly 100 acres of land has been secured in the northwestern part of the city, and one of the buildings, known as 'The College of History,' was completed February 1, 1898. The main or administration building will be known as 'Pennsylvania Hall.' This, it is expected, will be erected by the liberality of the citizens of the Keystone State. The building will cost \$200,000, and an endowment of \$200,000 will be needed, making the amount asked from this State \$400,000. Pittsburgh has been selected for the beginning of the work of securing this amount. Since their arrival here the bishops have received by letter one subscription of \$25,000, and have now a nest egg of \$33,000. After closing their labors here and making one or two incidental visits Philadelphia will be visited and the work pushed there. They have no fears of failure in their undertaking. Several meetings have been scheduled for this week. This morning the bishops will meet with the Methodist Episcopal ministers and the general public in the Smithfield Street Church and explain their plans. Tuesday night they will hold a meeting in Butler, Pa.; Wednesday night in the North Avenue Church, Allegheny; Thursday night at Calvary Church, Allegheny; Friday night at Washington, Pa.; and next Sabbath will be spent at Fostoria, O."—*Pittsburgh Gazette*.

Duty of Methodists.

"I do not think we have too many institutions. We are forgetting that our population is increasing all the time. Look at our Methodist constituency. We have to-day five million members. We have also twenty millions that gather under Methodist roofs every Sunday. And I say that it becomes us to pray with all our hearts that we may take care of this vast family, graduating every year at our colleges and going into other paths and other fields without the slightest denominational or Christian restraint. It often comes to my lot to go across to other countries, and I never go and return but I

meet young people who have been at universities in distant lands, but were trained at Methodist altars and converted in Methodist schools. These had graduated and received their diplomas from the hands of our Christian Presidents. But after having studied in godless universities, and coming home with nothing of Christianity in their hearts, they call the Bible a 'failure' and a 'fable.' It is the duty of the Methodist Episcopal Church to take care of these young people."—*Bishop Hurst*.

Meeting in Smithfield Street Church.

"Bishop Hurst was the first speaker. He explained the purposes of the Episcopal visit here to be to interest the people of Allegheny county in the university, and especially in the hope of securing their financial support for the building of Pennsylvania Hall, which is to be one of our great buildings. The site of this proposed edifice is that on which the Pennsylvania reserves pitched their first camp in the War of the Rebellion, and on which was built the first fort north of the Potomac. Bishop Hurst announced that at the meeting to be held in the North Avenue M. E. Church, in Allegheny, Wednesday evening, there will be shown an original letter by George Washington, expressing a wish that a great university be established at the National Capital, and leaving \$25,000 in stock of the Potomac Land Company for that purpose, which stock unfortunately became worthless.

"A design by the well-known architect, Henry Ives Cobb, for the proposed Pennsylvania Hall, will also be shown. He explained that other schemes for the establishment of so-called 'national universities' are mere castles in the air and have no material foundation, but that The American University has 93 acres, which cost \$100,000, and is now worth, as real estate, a full half million. The Hall of History has been completed, and other work is under way. The proposed Pennsylvania Hall is to cost \$400,000, and to be endowed with the sum of \$200,000. Bishop Hurst paid the highest compliment to Governor-elect W. A. Stone, to whom, he said, the university is greatly indebted for delicate, painstaking, and loyal work in Congress in behalf of the school. He announced that Colonel Stone is expected to be present at either the meeting in the North Avenue Church on Wednesday night or at Christ Church on Thursday night. President Harrison, President Cleveland, and President McKinley have given the enterprise their approbation and very material support, he said.

"Concerning the relations between The American University and the Catholics in Washington, he said: 'There is no friction; Catholics have subscribed to The American University funds; a nephew of Pope Leo even subscribed \$10. That is the Pope's subscription,' he said, laughingly.

"Bishop McCabe followed Bishop Hurst, and began

by speaking in the highest praise of him and his untiring efforts in behalf of the new university. 'It is not a Methodist university,' he said. 'It is an American university, and we hope before we get through to enlist the sympathies of every denomination in the land.' It is to consist of 26 buildings that will cost, on an average, \$120,000 each. The magnitude of the task, he said, 'at first caused him to fear for the successful outcome of the plan, but now,' he continued, 'I feel that we shall succeed. A great peace has come over me in regard to this great school, and I believe that we shall see our plans brought to a successful conclusion.'—*Pittsburgh Leader*.

A Protestant University.

"It is to be a Protestant university, and not a Methodist one, as all denominations are to be represented on its Board of Trustees. It was necessary to build it, to offset the great Catholic University at Washington. The latter had a monastery connected with it which would shortly shelter 500 Franciscan monks. An American Protestant university was needed, when it was possible for a great New York paper to give up a page to telling about the miracles alleged to have been performed by a bone of St. Anne's in Brooklyn. I wrote to the managing editor of that paper enclosing the article, and stating, 'This is what ruined Spain,' but had received no reply.

"Our new University will have 28 buildings, the largest, being Administration Building, and dedicated to Pennsylvania, and would have 5,000 students. I received a letter Saturday night from a Rhode Island woman agreeing to give \$25,000 to the University."—*Bishop McCabe*.

Endowment Alliance.

"The bishop then presented a plan of his own conception whereby he proposes that 1,000 Methodist preachers pledge themselves to secure \$1,000 each for an endowment fund for the University—not to give it themselves, for they are already asked to subscribe to Asbury Hall, but to secure it from others.

"Much interest was aroused, and late in the meeting Bishop McCabe presented his plan, and it was responded to heartily. The first to pledge himself for \$1,000 was Rev. B. F. Beazell, D. D., Presiding Elder of the Pittsburgh District. By his promptness he secured the place of cornerstone to the great alliance which will doubtless be reared upon the foundation laid yesterday.

"The clergymen arose and pledged themselves to undertake each to raise \$1,000, and amid much applause the two bishops added their names to the list, thus setting on foot a plan that may, if successful, bring in one million dollars from all over the world towards the endowment of professorships in the new University.

"The name of Rev. G. W. Izer, D. D., pastor of Calvary Church, this city, was the second to be enrolled. Rev. J. Wesley Hill, D. D., of the First Church, Fostoria, Ohio, a member of the bishop's party, was the third to take the financial pledge. Then the bishops thought they should get in on the ground floor, and the names of Bishop Hurst and Bishop McCabe went down. Other names followed in the following order: Rev. J. H. Bickford, of the Smithfield Street Church; Rev. C. W. Smith, D. D., editor of the *Pittsburg Christian Advocate*; Rev. T. N. Eaton, D. D., of McKeesport; Rev. Don S. Colt, D. D., of the North Avenue Church, this city; Rev. T. J. Leak, D. D., of Emory Church; Rev. W. P. Turner, D. D., Presiding Elder of the Blairsville District; Rev. W. W. Youngson, of Vandergrift; Rev. E. S. White, of Butler, and Rev. D. L. Johnson, of Monongahela. Others will doubtless soon be added."—*Pittsburg Record*.

Columbus Opens Its Doors.

Columbus was visited on Sunday, February 12th, by Bishops Hurst and Mallalieu and Drs. Davidson and Hill. Bishop Hurst spoke in Third avenue and at the First German, where the Second German united for the evening service. Bishop Mallalieu preached at Broad and Town streets, Dr. Davidson served at Mt. Vernon and Third street, and Dr. Hill officiated at Wesley and Gift street. According to a prior arrangement with the pastors and official boards the cause was presented in that place, but no formal subscription or canvass of the congregation was made. By private subscriptions and the quiet passing of cards, about \$4,500 was pledged toward the Ohio College of Government. During the whole time of the stay of the delegation at the Chittenden, from February 10th to 13th, the mercury hovered around the zero point, and was farther and longer below than above. The visit was marked by many delightful courtesies, the most memorable being a reception on Saturday evening given by Mr. C. D. Firestone in his spacious mansion on Broad street. A throng of the best citizens of Columbus greeted the university representatives. They were regaled with music and recitation, and favored with brief addresses by the two bishops. A special meeting of the preachers at Wesley Chapel on Saturday morning and the regular session on Monday were each devoted to the consideration of the University, and addresses were made by Bishops Hurst and Mallalieu. Five of the ministers gave their names as members of the Alliance. The total pledges thus secured amounted to about \$10,000, with much more to follow in the months to come.

A. O.

FORM OF WILL FOR
The American University,
WASHINGTON, DISTRICT OF COLUMBIA.

If a Legacy or Bequest:

I give and bequeath to "The American University," a corporation in the District of Columbia, the sum of (insert amount), and the receipt of its Treasurer shall be a sufficient discharge to my executors for the same.

If a Devise of Land:

I give and devise to "The American University," a corporation in the District of Columbia, the following land premises (insert description), with the appurtenances, in fee simple, for the purposes of the said University.

If the Residue of an Estate:

I give, devise, and bequeath all the residue and remainder of my estate, real and personal (including herein any and every legacy, bequest, or devise that may lapse or for any reason fail to take effect), to "The American University," a corporation in the District of Columbia, for the purposes of said University.

The will should be attested by three witnesses, who should write against their names their places of residence, their street and number. The following form of attestation will answer for every State in the Union: "Signed, sealed, published and declared by the said (A. B.) as his last will and testament, in the presence of us, who, at the request of the said (A. B.) and in his presence and in the presence of each other, have hereunto subscribed our names as witnesses."

OFFICERS OF THE AMERICAN UNIVERSITY.

<i>Chancellor</i>	- - - - -	BISHOP JOHN F. HURST, D. D., LL. D.
<i>Secretary</i>	- - - - -	PROF. WILLIAM W. MARTIN.
<i>Registrar</i>	- - - - -	REV. ALBERT OSBORN, B. D.

OFFICERS OF THE BOARD OF TRUSTEES.

<i>President</i>	- - - - -	MR. JOHN E. ANDRUS.
<i>Treasurer</i>	- - - - -	HON. MATTHEW G. EMERY.
<i>Secretary</i>	- - - - -	REV. CHARLES W. BALDWIN, D. D.

BOARD OF TRUSTEES.

(TERMS EXPIRE IN 1899.)

THE UNIVERSITY COURIER

Devoted to the Interest of The American University.

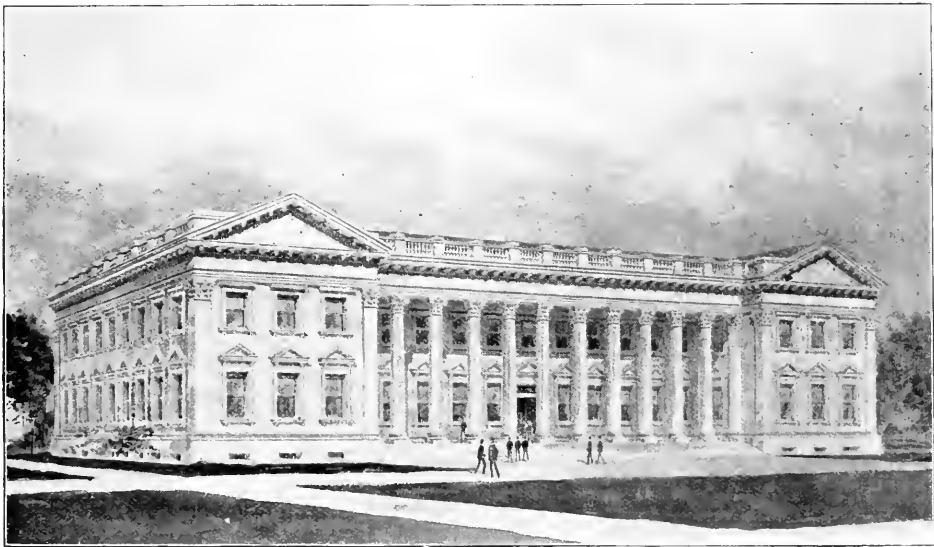

VOL. VII.

WASHINGTON, D. C., SEPTEMBER, 1899.

No. 3.

Published Quarterly. Office, 1419 F Street N. W.

Subscription Price, Twenty-five Cents a Year.

Elevation of The Illinois College of Languages.

Stately, simple, beautiful is the building, designed by the distinguished architect, Henry Ives Cobb, for the Illinois College of Languages. The center is an imposing colonnade. Ten tall, slender shafts, crowned with foliage, support the entablature; and the charm of the cornice, with its dentils and modillions, immediately wins admiration. The upper termination is the balustrade, made strong and beautiful by its pillars and balusters. The two wings have corner Corinthian pilasters, and the gables are completed in harmony with the cornice of the central colonnade. Each wing of this beauti-

ful edifice will be set apart for special work; one being devoted to ancient languages and the other to modern languages. The pediments of the wings will afford attractive spaces for symbolical groups. The genuine enthusiasm in Illinois, among our friends, will be rightly rewarded by this splendid building, designed by Mr. Henry Ives Cobb, for the Illinois College of Languages. It is a happy and singular coincidence that the architect of the Chicago Federal Building is the one who designed for The American University this charming classical edifice.

Editorial Notes.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Any one desiring to contribute to the funds of The University may send directly to The American University, Glover Building, Washington, D. C.

THE DEATH of Bishop John P. Newman removes from our Board of Trustees one of the early and strong friends of The American University. His wisdom in council, his suavity and courtliness of demeanor, his great gift of high and persuasive oratory, his lofty ideal of personal character, and his warmth of friendship, make his decease an event of sorrow, both in the Church and in the nation, to thousands who loved him.

AT THE LAST SESSION of the New Jersey Conference the laymen met in convention and passed resolutions expressing sympathy with the Twentieth Century Thank-offering, as proposed by the bishops, of \$20,000,000 for education and philanthropy, with 2,000,000 new converts, and recommending that so much of said offering by New Jersey Conference as shall be set apart for education be duly appropriated to Pennington Seminary, to Dickinson College, and to The American University, Washington, D. C. The Convention adopted a resolution, proposed by General Rusling, approving of the plan of erecting State buildings at The American University at Washington by the Protestant churches of different States.

IT IS WITH REGRET that we announce that Professor W. W. Martin, who has served as Secretary of The American University since June 1, 1898, has found it impracticable to transfer his family residence from Brentwood, Tennessee, to Washington, as it would be necessary to do in order to continue that service. He has presented his resignation as Secretary, and has already accepted the Chair of Fine Arts and Aesthetics in the Vanderbilt University, at Nashville, only a little distance from his beautiful home. This will bring him again into association with the leading educational institution of the Methodist Episcopal Church, South, where he formerly held for many years the Chair of Old Testament Exegesis.

President McKinley's Approval.

EXECUTIVE MANSION,
WASHINGTON, *February 27, 1899.*

MY DEAR BISHOP HURST: Referring to the recent call here of the Trustees of The American University, I desire to express my interest in the noble undertaking which they have in charge and my hope that the plans outlined to me may be carried out to a successful conclusion.

The extensive work which has already been done toward the organization of colleges and erection of buildings, and the promised contributions of a generous public, are ample assurance of the successful establishment of this great institution.

Wishing for you and the Trustees of the University the fullest measure of success, and earnestly hoping that your labors may be rewarded by a speedy general recognition of the merit of the great educational enterprise you have inaugurated at the Capital of the Nation, believe me,

Very sincerely yours,

WILLIAM MCKINLEY.

Rt. Rev. JOHN F. HURST.

Meeting of The Board of Trustees.

The Board of Trustees of The American University held their semi-annual meeting at the Arlington Hotel, Washington, D. C., May 17, 1899. Those present were: Bishop J. F. Hurst, Chancellor; Bishop C. C. McCabe, of Texas; John E. Andrus, of New York, President of the Board; Hon. Matthew G. Emery, Treasurer, of Washington; W. W. Smith, of Virginia; Rev. Dr. D. H. Carroll, of Baltimore; A. B. Browne, A. B. Duvall, B. F. Leighton, Thomas W. Smith, and B. H. Warner, of Washington; Prof. W. W. Martin, Secretary of the University; Rev. Dr. C. W. Baldwin, of Baltimore, Secretary of the Board; Rev. Dr. W. L. Davidson, of Ohio, Field Secretary, and Rev. Albert Osborn, Registrar.

Announcement was made of the death of Dr. C. H. Payne, whose interest in the University made him a valuable member of the Board from the beginning. Resolutions of respect for the deceased and of sympathy for the widow were read and adopted.

Bishop C. C. McCabe was elected Vice-Chancellor of the University. The vacancies in the Board of Trustees were filled by the election of President

McKinley and Arthur Dixon, of Chicago. Bishop McCabe addressed the Board and gave a most interesting account of the Endowment Alliance of The American University. The growth of the Alliance had been most remarkable. One hundred and twenty-eight thousand dollars had been pledged during the preceding five months. The outlook for the endowment of one million dollars to be raised by members of the Alliance is most promising.

Bishop Hurst, the Chancellor, made his report. He told of the widespread interest in the University which had sprung up on every hand; how it commended itself to the patriotic thought of our States, as evidenced by the great progress in the movement for "State Buildings and State Endowments." Above a hundred thousand dollars has been subscribed to various State buildings. The Chancellor spoke of the great gain to the University because of the co-operation of Bishop McCabe.

Professor Martin, the Secretary of the University, made his report. Since the last meeting of the Board there has been ten thousand dollars spent upon the grading of the campus. This sum was insufficient to complete the work required, but it has given definite form to the quadrangles about which are to be raised the beautiful buildings of the University. Dr. W. L. Davidson, Field Secretary, presented his report. His work for the preceding four months was mainly in connection with the Ohio College of Government. He has secured above twenty thousand dollars in subscriptions for this building through his own personal efforts and the efforts of those who have co-operated with him.

Henry Ives Cobb, the architect, addressed the Board. He explained the plans for the buildings of the University, and gave a description of the Illinois College of Languages. This structure will be a most beautiful classical study. The plan is for a building with two wings, joined by a central portion with a colonnade. He also made a statement to the Board of the cost of erection of the several colleges which were to be commenced in the near future upon the University site.

Rev. J. B. Starkey was appointed to co-operate in the efforts to increase the endowment of The University. One of the most important actions by the Board was the creation of the Woman's Guild for the Endowment of The American University. Miss Ida Simpson, daughter of Bishop Simpson, was elected secretary of the Guild.

The meeting of the Board of Trustees closed, leaving with the members present the profoundest sense of the importance of this great enterprise. The outlook for the University is most encouraging, and is well voiced in the words of President McKinley, that "the extensive work which has already been done toward the organization of colleges and erection of buildings, and the promised contributions of a generous public, are ample assurance of the successful establishment of this great institution."

State Buildings and State Endowments.

A great enterprise builds its own highways toward its ultimate achievement; in a great and true sense man simply co-operates. Such, indeed, is the genesis of State Buildings and State Endowments in connection with The American University. This great University had its prophecy in the educational idea which George Washington advanced at the close of the last century. His words were seed sown. A hundred years passed, then it sprang up and blossomed. All friends of higher education are delighted in that husbanding of this educational idea of George Washington which Bishop Hurst has given in rare wisdom and magnificent faith. The American University commends itself to the patriotic thought of our States; hence arose the State Buildings and the State Endowments. Not the plan of man, but the grandeur of a great educational idea effected this movement.

Ohio has taken the lead, if leadership may be claimed where two States move hand in hand together; for Pennsylvania was scarcely second to Ohio in its purpose to erect an edifice upon the beautiful site of The American University. One desires to know what has already been done in this movement. Above twenty thousand dollars have been given toward the Ohio Hall of Government. This is but the beginning. We believe the State which has furnished us so many Presidents will soon erect upon our grounds one of our finest edifices. Another feature of this general movement is the establishing of State Professorships. West Virginia has taken the lead, and has contributed \$5,000 for this purpose.

The Pennsylvania building is to be called the Hall of Administration. Fifty thousand dollars have been subscribed. One friend has given twenty-five thousand dollars for this purpose. There is remarkable fascination in the thought that The American

University will have buildings erected upon its grounds by friends in the various States. Several other States have made contributions of funds for State buildings; among them Indiana, New York, Illinois, and Maryland may be numbered. These States have made substantial gifts already. Many encouragements have come to those who have given most arduous labors in promoting the University interests. The generous gifts of individuals are among these. But the widespread interest in the various States for the Endowment of Professorships and the erection of State buildings brings largest confidence and noblest hopes.

University Night at St. Louis.

A magnificent audience assembled on Friday evening, March 17th, to listen to the addresses that had been announced in advocacy of The American University. The sight of the great crowd as viewed from the chancel was most impressive. The galleries were packed with eager listeners, as well as the main floor, making an audience worthy of the cause involved. The singing was led by the quartet choir of Lindell Avenue Church, Rev. Dr. W. B. Palmore, editor of the *St. Louis Christian Advocate*, made the opening prayer, and Rev. C. V. Criss presided. Rev. Dr. Michael Burnham, pastor of Pilgrim Congregational Church, made the first address, magnifying the enterprise under consideration, emphasizing with great earnestness and moving fervor the fact that the new university was to be carried on under Christian auspices, and that it was not to be chiefly or merely a series of secular schools.

Rev. Dr. I. S. Hopkins, of the Methodist Episcopal Church, South, next spoke, voicing in behalf of the denomination he represents its sympathy and co-operation, and making a brief but effective plea for the university.

Just as Bishop Hurst was introduced one of the chief guests of the hour, Bishop Hendrix, of the "Church South," arrived and was welcomed with enthusiasm. Bishop Hurst told of the circumstances that prompted him, years ago, to undertake to found a university in Washington. He depicted in a very interesting way the peculiar advantages which the governmental collections of literary, archaeological, and other treasures afford to students living in Washington. He told of the growth of the scheme and of some of the providential tokens of

guidance and favor which had encouraged and rewarded him and his co-workers. He expressed the hope that, since gifts had come from fifteen States to the university, Missouri would not be found behind other Commonwealths in helping to found and foster this great institution.

Bishop McCabe followed, awakening enthusiasm from his first sentence. He declared that Bishop Hurst had proved himself a strong leader of the enterprise. "When the Bishop," said he, "sits down by the side of a man or a woman who has money, then things are brought to pass! He is a great money getter for a great cause!"

Bishop Hendrix added a few words of hearty commendation, and the appeal of Bishop McCabe brought some gratifying responses, including subscriptions for the university of \$1,000 apiece from Geo. Warren Brown and H. H. Wagoner, both beloved and honored officials of Union Church. During later efforts this amount was brought up to \$22,500, a score of preachers uniting with the "Alliance," members of which pledge themselves to try to raise \$1,000 apiece for the university.

—*Central Christian Advocate.*

Enthusiasm at Missouri Conference.

The new church in Cameron, built under the heroic leadership of Rev. Dr. J. H. Poland, with all its spacious rooms thrown into one, was still not large enough to accommodate the crowds that were drawn to the town by the conference held in March last. The enthusiasm evoked, the generous gifts that were made to education, the songs and magnetic addresses of Bishop McCabe, the sermon of Bishop Hurst on "Joy in Heaven over the Salvation of Men," and other phases of the week made the session notable.

One of the remarkable things of the week was the work done for the college at Cameron—the Missouri Wesleyan—under the auspices of Bishops Hurst and McCabe, and with the co-operation of President B. W. Baker. By the cordial agreement of all concerned the right of way was granted to the home school, before the work of The American University was advocated in the conference. The plan projected involved the raising of \$100,000 for the Missouri Wesleyan. Toward this end \$19,000 were pledged amid great enthusiasm. Some pathetic incidents which occurred during the effort

melted the people to tears and then brought out shouts of rejoicing. One widow, for instance, who is striving to make a living with her needle for herself and two children, pledged \$50 in her desire to help the movement. The proposition was no sooner announced than Mr. S. H. Prather, of Tarkio, a member of the present State legislature, one of the best laymen in Missouri, who had already promised \$2,000 for the institution, rose, and said, with choking utterance, "I will take that \$50 subscription."

Later a gentleman rose and said, "I have been intending to put a window in our church in Anacanda, Montana, in memory of a dear little girl who died while we lived there. But I have concluded to give the \$50 I had set apart for that purpose to the Missouri Wesleyan College." The people were touched, and many wept at this offer, but they began almost instantly to shout when they heard Bishop McCabe cry out:—"And I will put in the memorial window for your little daughter!"

For the first time in the history of the college at Cameron its prospects are full of hope, in view of this movement, which will be pressed until at least \$100,000 are secured.

On Monday Bishops Hurst and McCabe introduced The American University to a crowded church, full of preachers and laymen. The response to the appeals made were quick and enthusiastic. S. H. Prather did effective service by his subscription of \$1,000, and by his rousing appeals for co-operation.

In his remarks he said:

"I am building for two worlds when I give of my substance to God's cause. I have found that giving does not impoverish. I have tasted the joy of giving, and I am grateful that I ever tasted that holy joy. I have come up from poverty into comfort, and have had many struggles and hardships, but I rejoice that God has taught me the blessedness of giving. He has helped me to see visions of the large things to be done for his cause by beneficence. I want to see our own college here at Cameron built up in usefulness, and relieved from the burdens now resting on it; and I want also to help accomplish the glorious dream of Bishops Hurst and McCabe—The American University at Washington!"

Major Reuben H. Gunn, a devoted layman of Edgerton, and a Union veteran, rose and said, barely able to speak for his sobs, deeply thrilling everybody with his testimony:

"I sat here all day Saturday without taking part in the work undertaken for our home school. That night I could hardly sleep over the matter as I thought of the needs of the school and of what I ought to do to help. It worried me all through the Sabbath, and last night I tossed on a wakeful pillow, worrying over the movement. I want to get some sleep to-night, and so I rise to say that I am going to give to our college at Cameron \$501."

Great applause followed this little testimony, and also the appeals of Brother Prather, and the work was carried on for the two causes side by side, Bishop McCabe suggesting, "This is a double team that we are hitched to to-day." For The American University, in the Alliance movement and in outright subscriptions there was secured the sum of \$52,000. This result was a phenomenal exhibition of pluck and generosity.

—J. B. Y., in *Central Christian Advocate*.

Asbury Memorial Hall.

The following payments on this fund have been received from subscribers since our issue of February, 1899:

\$100—L. C. Murdock, A. Stevens, J. F. Berry, Mrs. J. F. Berry, A. E. Craig, B. P. Raymond. **\$67**—J. W. Miles. **\$53**—E. H. Vocum. **\$50**—John Lanahan, Joseph Clemens. **\$45**—H. A. Cincinnati Methodist Ministers' Meeting.

There was an unusually large gathering at the Methodist Ministers' Meeting of Cincinnati held in the Chapel of the Western Methodist Book Concern (named Wiley Hall, in honor of Bishop Wiley), on Monday morning, April 10, with Dr. W. A. Robinson, president. Among the distinguished visitors in attendance were Judge Sibley of Ohio, Prof. W. W. Martin of Washington, Dr. C. C. Edwards of Indiana, Dr. Cones of Tennessee, and President Martin, of Moores Hill College.

The interest of the occasion centered in The American University, on which subject addresses had been made in the leading pulpits the preceding day by Bishop Hurst, Bishop McCabe, Dr. W. L. Davidson, Dr. D. H. Moore, and others. After inspiring addresses before the Ministers' Meeting by Bishops Hurst and McCabe, Dr. R. A. Rust, Presiding Elder of the Cincinnati district, and Dr. D. H. Moore spoke in hearty commendation of The American University, and the following resolutions, presented by Rev. Dr. D. Judson Starr and endorsed by Drs. Moore and Rust, were unanimously adopted as the expression of the Cincinnati Methodist Ministers' Meeting on the subject of The American University:

"Resolved, That we have heard with the deepest interest and with great profit Bishop Hurst's presentation of the providential origin, history, plans, and sublime purposes of The American University; that we regard The American University as the logic of Methodism; that from all the facts in the case, we are profoundly impressed that this movement is of God, and that He has been pleased to use the peculiar and unequalled qualifications and fitness of Bishop John F. Hurst in the organization and promotion of this great Protestant American movement.

"Resolved, That we have heard with great pleasure the inspiring address of Bishop Charles C. McCabe on the subject of The American University; that we recognize as also providential the call and exceptional qualifications of Bishop McCabe as Bishop Hurst's coadjutor in the cause of The American University, and see in this the renewed promise of success, in which we rejoice.

"Resolved, That we recognize with satisfaction the appointment of Rev. Dr. W. L. Davidson as Field Secretary in this cause; that we most heartily commend the cause of The American University to the support of Methodists and of all American citizens; that we pledge to this work our most sincere and earnest co-operation, and that we appoint a committee to represent the Cincinnati Methodist Ministers' Meeting in its promotion."

The committee called for in the resolutions was constituted by the appointment of the editor of the *Western Christian Advocate*, Rev. D. H. Moore, D. D.; the editor of the *Christian Apologist*, Rev. A. J. Nast, D. D.; the Presiding Elder of the Cincinnati district, Rev. R. H. Rust, D. D.; the Presiding Elder of the Cincinnati German district, Rev. J. H. Horst; Rev. G. W. Dubois; Rev. H. W. Ewing, and Rev. H. C. Weakley, D. D.

Dr. Berry in Washington.

While in Washington I had the pleasure of spending a few minutes with Bishop Hurst at the office of The American University. That office is a busy place. Visitors come and go. Correspondence with many persons in many places is kept up. Plans for new buildings are being considered. No one who spends half an hour in the place can doubt that the Bishop and his busy helpers are tremendously in earnest. Bishop Hurst is the embodiment of faith. His courage is without limit. He has already faced and overcome difficulties to which almost any other man would have surrendered. But he serenely holds on his way, and never dreams of failure. Some day there will stand upon that slightly campus a great post-graduate university with a magnificent endowment, a cultured faculty, and multitudes of eager students—a university which will be the pride of Methodism around the world! Let us all hope that Bishop Hurst may live to see the splendid realization of his life dream.

—*Epworth Herald*.

The Epworth League and The American University.

At the close of the recent great International Epworth League Convention at Indianapolis the Board of Control held a very important meeting for three days. On the morning of the first day (Monday, July 24th) the action taken by the Board at its meeting, in St. Louis, on May 15, 1891, was unanimously reaffirmed. That action was as follows:

"WHEREAS, This Board of Control learns with genuine satisfaction of the measures taken for the founding of a great National University [The American University] in the City of Washington, D. C., under the patronage of the Methodist Episcopal Church; and

"WHEREAS, The Bishops representing the entire Church have endorsed the proposed University in unqualified language; therefore,

"Resolved, That we, the Board of Control, representing the young people of Methodism, and recognizing the close relation between the Epworth League and The American University, whose object is the higher education of the youth of our land, gladly unite in the endorsement of the Bishops, and commend this national educational enterprise to the Epworth Leagues of our Church."

This renewed endorsement of the great enterprise by the present Board of Control means vastly more than it did eight years ago, for in the interval the League has grown fivefold in its numerical strength and has now a membership of one million seven hundred and fifty thousand. It has besides developed and greatly increased its organic life and force. A new certificate for donors to the Epworth Fund of the University, omitting some defects of the earlier one and adding several positive improvements, will soon be ready for distribution.

**Outline of Address before the St. Louis
Conference, University Night,
March 17, 1899.**

[By Rev. Dr. MICHAEL BURNHAM, Pastor Pilgrim Congregational Church, St. Louis, Missouri.]

I have been asked to say a word on the university idea. The university is not modern.

I. ANCIENT UNIVERSITIES.

There was at Athens, in the time of the Roman Empire, a university, in all essentials, that corresponds closely with what we mean by the word today. Pericles called Athens "The School of Greece."

The early centuries of the Christian era saw an organized faculty of accomplished professors who lecture! students from all portions of the civilized world. From the time of the Macedonian wars, four schools of philosophy flourished at Athens—

- (1) Academic, or Platonic schools;
- (2) Peripatetic, or Aristotelic;
- (3) The Stoic school;
- (4) The Epicurean,

each of them endowed and handed on from the great teachers of the nation to those that came after them.

II. MEDIEVAL UNIVERSITIES.

As, for example, the University of Paris—twelfth century—at first possessing only a faculty of arts, then adding, in the thirteenth century, theology, medicine, canon law.

Oxford and Cambridge existed first only with a faculty of arts. They subsequently added theology, medicine, law.

We can trace the growth of these powerful universities through the middle ages in France, in England, in Scotland, in Ireland, in Wales, and especially the great German universities, worldwide in their influence, and having existed for centuries, although copying largely from the first—from the University of Paris—their methods and departments.

There is complete parity among the universities of the German Empire. They have had seasons of overcrowding, especially in the department of law, in the 30's, in the 50's, and again in the 80's. Ministers of education warned the young men as to too hasty selection of the course of legal study, with good effect.

The American universities are of later date, and yet several of them, like Harvard, Williams and Mary, Yale, Princeton, University of Pennsylvania, Columbia, Brown, Rutgers, Dartmouth, antedate the Revolution, and several of our American universities correspond to the universities of Germany.

American universities have been divided into classes, as follows:

- (1) With regard to their origin.
- (2) With regard to their pedagogical character.

As to the origin and support, there are three classes:

- (a) Those endowed by private individuals.
- (b) Those established by some ecclesiastical body.
- (c) Universities founded and controlled by the authority of the State—the individual State in which they belong.

The American University at Washington belongs to the first and second classes, although another element comes in as to the prevailing Church influence in its origin and support. It is incomplete yet in buildings and professorships; but it starts in with bright prospects.

I wish to make these points in regard to it:

1. *It is Protestant.*—That is, it stands on the platform that the Bible is the sole authority in all matters of faith and discipline, and is to be explained independently of all external traditions. This was the cornerstone of the Reformation, and is the essence of Protestantism. The arguments on which Protestantism was built are:

(1) "The Catholic Church can not be the judge of the Reformed Churches, which are no longer in communion with her.

(2) That the authority of the Bible is supreme, and above that of councils and bishops.

(3) That the Bible is not to be interpreted and used according to tradition, or use and wont, but to be explained by means of itself, its own language and connection." This is the essence of Protestantism.

The essence of Protestantism, therefore, does not consist in holding any special system of doctrines and discipline, but rather in the source from which it obtains truth, and the means by which it pro-

poses to seek for truth in all matters of faith and practice. Protestantism, therefore, does *not* arrest investigation of the Scriptures; nor does it set the authority of any man, even the Reformers themselves, above the Bible.

2. *It is Methodist.*—That is, its Board of Trustees is largely Methodist, which is sound judgment and straightforward. Those institutions always flourish better which are under the wing of some denomination. It does not by any means expect all its professors, nor all its students to be Methodists.

3. *It is Christian.*—I mean by that, not merely in name, where no prayer is offered and the Bible is regarded as effete and set one side. I do not mean, either, Christian as merely humanitarian; I mean a university founded on Christ. Its Board of Management are known to be men who accept and personally appropriate the great Christian doctrines—of the incarnation, of the atonement, of the resurrection, of regeneration, the second coming of Christ, the assembly of the universe to judgment, the Bible as the infallible guide in all matters of faith and practice. I mean that by its influence it puts its pupils with its teachers at the feet of Christ. We can not trust our State universities to do this thing and give us the men we need.

Let me give you the following facts which have been carefully collated by a Doctor of Divinity in a neighboring State:

“A somewhat careful and protracted study of the subject, however, has led to the conclusion that the founding of State universities does not diminish in the slightest degree the obligation of Christians to establish and give vigorous support to Christian colleges. By a remarkable coincidence, in 1892, forty-six young men were graduated from the classical course of the University of Michigan, and exactly the same number from the classical course in seven Christian colleges in the State. It was ten years after the first class was graduated from the State University before any of the colleges were able to graduate a class. In 1890 the university had graduated 1,937 from its classical course, while only 167, or 8.6 per cent, studied theology. Seven colleges, two years later, had graduated only 1,231 from their classical courses, of which 426, or 34.6 per cent, studied theology. Enlarging the view, I find the four great State universities of Michigan, Wisconsin, Iowa, and Minnesota have graduated from their departments of liberal arts, 3,516 young men (not counting engineers). Of these, 270, or one out of every thirteen, or 7.6 per cent, have studied the-

ology. Thirty-seven Christian colleges in the same four States have graduated 1,877 young men, of whom 1,606 have studied theology, or about one out of every three graduates—32.9 per cent.

Once more taking the following Christian colleges, Wesleyan University, Colgate, Trinity, Oberlin, Hamilton, University of Rochester, Amherst, Princeton, Brown University, Middlebury, University of Vermont, Williams, Dartmouth, Columbia, Yale, and Harvard, sixteen in number, and using the last decade in each for which the statistics are available, and they furnish one theological student for every seven men graduated.

Then taking the last decade available for the following six secular schools, namely, universities of Iowa, Michigan, Wisconsin, Minnesota, Cornell, and the College of the City of New York, and they furnish only one theological student for every 34 of their graduates. These and similar facts irresistibly lead one to the conclusion that, if we are to have an educated ministry, or to maintain our Christian civilization, we must have the Christian college.”

Now, our State universities, managed as they are by legislators, are never to do the work of the Christian college or university. Nor can we trust institutions nominally Christian to do it.

The astronomy of David, in the 19th Psalm, “The heavens declare the glory of God,” is in its correctness far in advance of the theology of any institution, however scientific it may be called, that leaves out God.

The teaching of any institution that makes Christianity the acceptance of Jesus Christ as Saviour, and the obedience to him as Lord, is worth all the universities on both sides of the water, however scientific they may be considered.

The American University at Washington is intended to be a Christian university. It plants itself on the foundation of the Gospel of the Son of God. We believe it to be for the best interests of this great Republic that God’s Word should be at the foundation of Christian education, that the Bible should be an open book, and that those great Christian doctrines that center in the personality of Him who is the truth be for us the foundation of a faith that has become historic, of a faith that binds us in penitence and hope, personally, to our blessed Lord.

Mrs. Frederick T. Phillips of Lawrence, Long Island, has given \$50,000 to Harvard University to establish a fund to be known as the Kenneth Matherson Taylor Fund, the income to be expended annually in the purchase of books for the college library to increase its efficiency, so far as may be possible, in the department of English literature.

Women Students Abroad.

Dr. Isabel Maddison, of Bryn Mawr College, has published through the Macmillan Company "A Handbook of British, Continental and Canadian Universities, with Special Mention of the Courses Open to Women." This little book has been compiled for the Graduate Club of Bryn Mawr College and will be useful not only to women students who expect to study abroad, for whom it was especially intended, but also to men who expect to take their degrees at foreign institutions. The information given has been obtained from the authorities of the different institutions or from the calendars and other official publications. The arrangement of the work is alphabetical by countries and then by universities within the countries. Under each such heading is given a condensed statement of the government and support of the universities; requirements for admission and degrees; the extent to which women are admitted on equal footing with men; the number of women in attendance at each university in 1898-99; term calendars and fees, together with lists of the principal professors and lecturers in the various departments of study.

The compiler states that in preparing this new edition "it was found that practically all European universities and colleges were open to women." The history of the entry of women into the universities is especially interesting in some of the countries. In Austria since 1878 by the express sanction of the Minister of Education in each case women have been admitted as hearers. Since 1897 any native Austrian woman over eighteen years of age is admitted as a regular hearer to the philosophical faculty of any Austrian university. Belgium has admitted women to the universities of Brussels, Ghent and Liege since 1883, but the Catholic University of Louvain does not admit women. In Canada most of the colleges are affiliated under central universities, and the courses and degrees are in general open to women. Over two hundred women are now studying in Finland's one university, Helsingfors, but it is feared that Russia will take away that privilege in conformity with her practice at home. Denmark has admitted women on the same conditions as men since 1875.

Nearly all the courses in all the faculties and schools under the University of France have since 1896 been open, free of charge, to persons of either sex as hearers. To matriculate and become can-

didates for degrees a French secondary school diploma or its equivalent from the foreign college must be presented.

Women are, as a rule, admitted only as hearers to courses in the philosophical faculties of the German universities. The degree of Doctor of Philosophy has been granted to women by the universities of Berlin, Freiburg, Göttingen, Heidelberg and Tübingen, and at those universities they have a certain recognized position as hearers, although they are not allowed to matriculate. At most of the Prussian universities properly qualified women are permitted to attend courses in the philosophical faculty if they obtain permission of the rector of the university and of the individual professors whose courses they desire to hear. They have, however, no rights, and are not counted as students.

In Great Britain women students who reside in Girton and Newnham Colleges, at Cambridge, are admitted to nearly all the university lectures, to most of the laboratories and museums, and by special permission to the university library. In May, 1897, the Senate of Cambridge rejected by a vote of 1,707 to 661 the proposition to admit women to the B. A. and M. A. degrees. The University of London—an examining body—opened all degrees, honors and prizes to students of both sexes on equal terms in 1878. The degrees of Victoria University, at Manchester (also an examining body), are likewise open to women. Oxford University does not admit women to matriculation or graduation, but allows them to enter the examinations for degrees in arts and music, and issues certificates to successful candidates. The status of women in the University of Wales differs in no respect from that of men. The same is true of the Royal University of Ireland, but Trinity College, Dublin, grants no degrees to women. Women are in every case admitted to the degrees in arts, science and medicine in the four Scottish universities, and at Aberdeen to degrees in law.

The University of Athens was opened to women in 1895. The courses, degrees, laboratories and libraries at the Italian universities and scientific schools are all open to women on the same conditions as to men. In the Netherlands no distinction is made between women and men, women being allowed to matriculate and to take degrees on exactly the same conditions as men. Norway opened the doors of her university at Christiania in 1884, while in Sweden a royal decree was issued in 1870 giving to women the right to become regular students and take degrees in the medical faculties of her two State universities, and in 1873 this right was extended to the faculties of philosophy and law. In Switzerland the University of Zurich was opened to women in 1872, Berne in 1874, and Basle and Lausanne since 1890. Geneva and Neuchâtel are also open to women equally with men.

—*New York Tribune.*

Gifts and Bequests.

Andrew Carnegie has given \$50,000 for a public library at McKeesport, Pennsylvania.

Andrew Carnegie has given \$50,000 for a public library at Kighley, Yorkshire, England.

The will of James W. Brown, of Chatham, Ontario, gives \$52,000 to Knox College, Toronto.

Dr. D. K. Pearsons, the Chicago philanthropist, has given \$50,000 to Berea College of Kentucky.

Ex-Governor Drake, of Iowa, founder of Drake University, has pledged another \$25,000 to that institution.

Brown University receives \$10,000 from Mrs. James E. Sullivan for the purchase of books on Church history.

Mrs. E. B. Crocker has given to the lodge of Elks at Sacramento, Cal., property in that city valued at \$30,000.

Sir William McDonald has just made another large gift, said to be \$30,000, to McGill University, Montreal.

Mrs. A. F. Page, of Raleigh, N. C., has given \$5,000 to the Methodist Orphanage now in course of erection in that city.

The late Dr. Robert L. Rea, of Chicago, bequeathed \$10,000 to Northwestern University and \$5,000 to the College of Physicians and Surgeons.

The late Joseph Anthony, of Washington, D. C., bequeathed between \$20,000 and \$25,000 to the Methodist Home of the District of Columbia.

Under the will of Albert S. VanPelt, of New Brunswick, N. J., \$10,000 are bequeathed to the Board of Foreign Missions of the Reformed Church.

The charities founded in Austria by Baron Maurice de Hirsch will benefit by the will of the late Baroness de Hirsch to the extent of \$1,400,000.

Miss Mary E. Scranton, of New Haven, is erecting a public library building in Madison, Conn., as a memorial to her father, Erastus C. Scranton.

Mr. Charles A. Aitchison, of Glasgow, has by a trust settlement devoted \$550,000 for the education of Bible women missionaries and religious teachers.

William K. Vanderbilt has authorized the erection of a dormitory on the campus of Vanderbilt University, Nashville, Tennessee, at a cost of \$100,000.

The Board of Education of the Methodist Episcopal Church has recently received a bequest of \$10,000 from the estate of George Barlow, of Brooklyn, New York.

The trustees of Williams College announce that the donor of the new \$55,000 students' building in connection with that institution is Morris K. Jessup, of New York.

By the decision of the Surrogate in New York City legacies given by the will of Mrs. Mary Johnson to Roman Catholic institutions, to the amount of \$300,000, are held to be valid.

The late Rev. George McKillips, of the North Ohio Conference, willed his farm of 150 acres to the Ohio Wesleyan University, to take effect upon the death of himself and wife.

Through the generosity of Robert Pool, of Baltimore, in giving a building and lot to the Enoch Pratt Free Library, that institution is enabled to add a seventh branch to its library system.

Three sons of the late Rev. John K. Shaw, who was the founder of Pennington Seminary, in New Jersey, propose to erect at Pennington a beautiful chapel to perpetuate his memory.

Columbia University has received a gift of \$10,000 from Miss Katherine W. Bruce. The money is to be devoted to scientific investigation in the measurement of astronomical photographs.

Andrew Carnegie has offered to give \$50,000 for a public library at San Diego, Cal. He has also donated \$50,000 to the Fort Worth Library Association, Fort Worth, Tex., for the erection of a building.

During the commencement exercises at Vassar College several gifts to the institution were announced, including one of \$8,000 from Miss Helen M. Gould, to found a scholarship in memory of her mother. Mrs. Caroline Swift Atwater, president of the alumnae association, presented the college with \$4,000.

The will of the late George W. Clayton, which has just been filed for probate in Denver, provides that almost the entire estate, estimated to be worth upwards of \$1,000,000, shall be devoted to the establishment in that city of a new university, to partake of the characteristics of Girard College, Philadelphia.

The will of Wallace C. Andrews, who recently perished in a fire at his home in New York, provides that the residue of his estate in excess of \$500,000 shall go to the establishment of an institution for the education of girls, to be located at Willoughby, Ohio. The estate is estimated to be worth at least \$1,500,000.

Mr. McComb, of New York, who has been making an annual contribution for a number of years for the support of a professorship in Southwestern Presbyterian University, Clarksville, Tennessee, has made his gift permanent by delivering to the university a sufficient amount to partially endow another chair. His gift amounts to \$55,000.

The late Leonard Gould, of Chicago, bequeathed \$10,000 each to the Chicago Theological Seminary, the American Sunday School Union, the American Board of Foreign Missions, the Foundlings' Home of the City of Chicago, and the Young Men's Christian Association of Chicago, and \$5,000 to the Illinois School of Agriculture and Manual Training.

George Averoff, the wealthy Greek, whose gift of 1,000,000 francs for the restoration of the Stadium at Athens led to the revival of the Olympic games a few years ago, has just died at Alexandria, Egypt, in his seventieth year. At the outset of the Greco-Turkish war he presented 40,000 uniforms to the Hellenic troops. He expended a vast sum of money in public charities.

The will of the late Prof. Charles J. Stille, of Philadelphia, former Provost of the University of Pennsylvania, provides that his widow shall enjoy the income of his estate, which is valued at \$158,000, and, upon her death, after a few minor legacies have been paid, it is to be divided into three equal parts, and given to Yale University, Gloria Dei Church, Philadelphia, and the Historical Society of Pennsylvania.

J. Q. Adams of Wheaton, Illinois, bequeathed in his will the sum of \$20,000 to the American Sunday School Union; \$10,000 each to Chicago Congregational Seminary, Illinois H. M. Society, American Bible Society, Chicago Young Men's Christian Association, Red River University, Fargo College, and Chicago University; Chicago Home of the Friendless, \$5,000; Wheaton Congregational Church and Young Men's Christian Association, \$1,500 each, and Rockford College, \$50,000.

Under the will of the late Mrs. Horace H. Crary, of Binghamton, N. Y., the following bequests are made: The Woman's Home Missionary Society of the Methodist Episcopal Church, \$25,000; the Missionary Society of the Methodist Episcopal Church, \$10,000; the Methodist Episcopal Hospital of Brooklyn, \$25,000; the Freedmen's Aid and Southern Education Society, \$15,000, to be expended for the Morristown Normal Academy and school for colored persons at Morristown, Tenn.; to the Trustees of the Wyoming Annual Conference, \$10,000; to the Young Men's and Young Women's Christian Associations of Binghamton, \$5,000 each, and to Main Street Methodist Episcopal Church, Binghamton, \$10,000.

Mr. B. H. Warner, D. C.

Plan of Grounds.

The above cut exhibits in outline the plan for the arrangement of buildings on the grounds of The American University. It was adopted in its general features by the Board of Trustees on May 5, 1897. The details of walks, trees, shrubbery, and decorations in the way of statues and fountains can not be shown on a plan of so small a scale. The College of History is 176 feet in length, and may be used as a scale of measurement.

The grading has been completed on the west and south of the College of History and begun on the north. Nebraska Avenue has been opened in part and will form the eastern boundary of the site.

The entire tract consists of 93 acres, quite varied and rolling in its contour, the elevations varying 100 feet. Not far from the center of it is a spring of good water sufficient for the development of artificial lakes.

THE UNIVERSITY COURIER

Devoted to the Interest of The American University and Higher Education.

VOL. VIII.

WASHINGTON, D. C., JANUARY, 1900.

No. 1.

Published Quarterly. Office, 1419 F Street N. W.

Subscription Price, Twenty-five Cents a Year.

The Pennsylvania Hall of Administration.

This building, erected by the patriotic citizens of the Keystone State, is promised an early completion. The American University appeals to them strongly for several reasons. The contour of the university grounds resembles a keystone. The first fortifications thrown up for the protection of our Capital City during the civil war was on the land now included in the university campus, and the Pennsylvania Reserves were the first to occupy it.

The building, with wings and imposing corridors, will stretch for two hundred feet across the end of one of the quadrangles. It will be the heart of the university system, containing an immense lecture hall and the offices of those who will administer the affairs of the University.

\$80,000 has been contributed. One elect lady has given \$25,000. The building will cost \$150,000. Loyal and generous Pennsylvanians will see that the remainder is given. That great State is capable only of great things. She is one of the wealthiest in the Union and owes much to God and humanity. Who will put up a wing for \$50,000? Who will build a marble corridor? Thirty men in thirty

days could make the future forever glorious by the erection of this magnificent hall. One man in one minute could do it. Has God touched the man?

Another Princely Gift.

Rev. David H. Carroll, D. D., of Baltimore, who had already given \$10,000 toward the endowment of The American University, gladdened the hearts of Bishop Hurst and Bishop McCabe, Thursday, the 8th of November, by subscribing another \$10,000, to be used in the erection of a Maryland building, to cost not less than \$100,000, his former \$10,000 to be a part of its \$100,000 endowment. May Heaven reward this generous and far-seeing Methodist patriot! If the eyes of our people were but opened to the vital importance of this enterprise to the Protestantism of America, fabled Pactolus would not be richer than the streams of their gifts in its behalf.

Another gentleman, Mr. German H. Hunt, has subscribed \$2,500 toward the Maryland building.

Meeting of the Board of Trustees.

The semi-annual meeting of the Board of Trustees of the American University was held at Washington, D. C., December 11th. The reports made by the various officers of the University were full of encouragement. Very substantial gains in resources have been made during the year.

The report of the Chancellor, Bishop John F. Hurst, contained the record of generous giving during the year. A farm worth \$60,000, near Pittsburg, Pa., has been deeded to the University; one gift of \$25,000 came from Pennsylvania, \$20,000 from Maryland, and numerous gifts of smaller amounts from many other States of the Union.

The movement is a national one, and it is the design to have the States erect buildings in the University plant. This movement is attracting widespread interest. The Ohio College of Government has received contributions during the year amounting to \$22,000, and \$100,000 is pledged on the Pennsylvania Hall of Administration. Within two weeks a citizen of Massachusetts agreed to give \$10,000 for the New England College of Technology. Substantial gifts have been made towards the Illinois College of Languages. An earnest campaign has been opened by which it is expected that the Epworth League of America will erect the Epworth College of Literature.

The Endowment Alliance, which is being pushed so vigorously by the Vice-Chancellor, Bishop McCabe, has secured one hundred and thirty pledges of \$1,000 each. Some of the smaller States will furnish endowments for professorships. Already something has been done in this line in West Virginia and Kentucky.

Dr. W. L. Davidson, the Field Secretary, also made his report, which was gladly heard because of the encouragement it contained. The meeting was most harmonious and profitable, and strong hopes are entertained that one or two new buildings will be commenced in 1900.

Among the Trustees present were: Judge William M. Springer, Illinois; Dr. Jesse L. Hurlbut, New York; Bishop John F. Hurst, District of Columbia; George B. Hukill, Pennsylvania; Dr. David H. Carroll, Maryland; Dr. J. Wesley Hill, Pennsylvania; Andrew B. Duvall, Thomas W. Smith, Matthew G.

Emery, B. F. Leighton, B. H. Warner, A. B. Browne, District of Columbia; Dr. W. L. Davidson, Field Secretary, Ohio; Rev. Albert Osborn, Registrar of the University; Prof. Tali E. Morgan, in charge of the Epworth Foundation; Dr. C. W. Baldwin, Secretary of the Board, together with other warm friends of the University.

By invitation, a committee of the Trustees called at the White House in the afternoon and had a conference with the President, who is himself a Trustee of the University.

To fill vacancies, Dr. Charles W. Baldwin, of Baltimore, and Dr. Homer Eaton, of New York city, were elected Trustees.

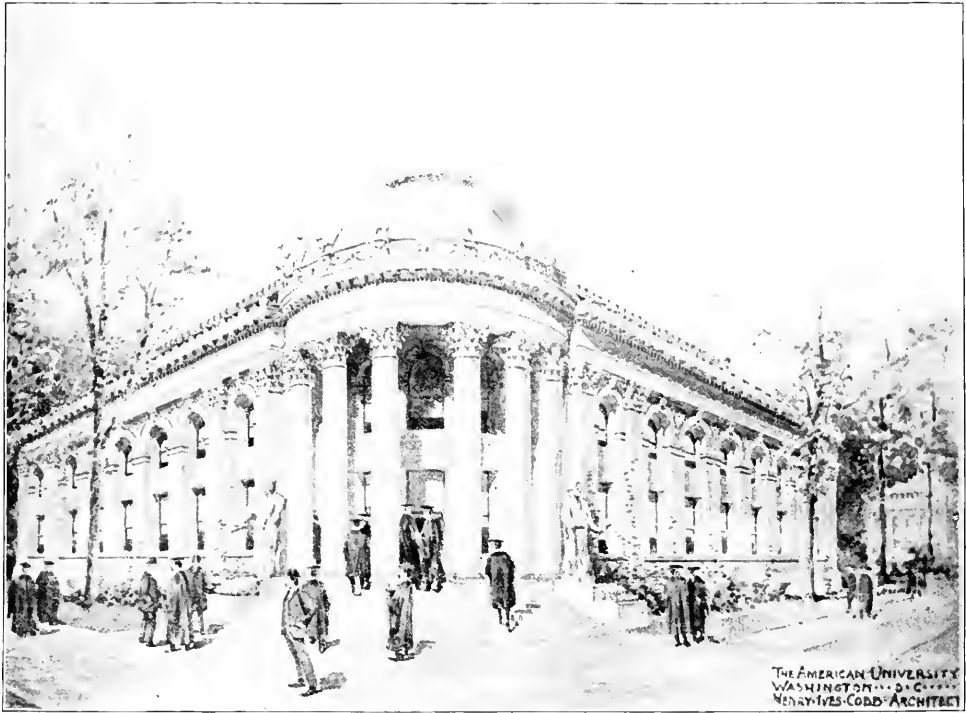

Hearty resolutions were passed expressing great satisfaction and gratitude to Mr. Andrew Carnegie for his splendid gift of a library to the city of Washington.

The following officers were elected for the ensuing year: President of the Board of Trustees, J. E. Andrus, New York; Treasurer, Matthew G. Emery, District of Columbia; Secretary of the Board, Rev. C. W. Baldwin, Maryland; Secretary of the University, Dr. Wilbur L. Davidson, Ohio; Registrar, Rev. Albert Osborne.

A Point Worthy of Note.

The fact needs constant emphasis that The American University is to stand exclusively for post graduate work. It will not parallel the work of any existing institution. It does not stand in the way of, nor interfere with, any institution already organized. There is no room for jealousy, no reason for prejudice. It will simply be the crown to the religious educational system of the nation, making it possible for those who complete the usual college curriculum, and yet desire to extend their investigations along original lines, to prepare themselves for a career, to find such opportunities on the American side of the Atlantic, and that, too, under Christian auspices.

Prof. Tali Esen Morgan, widely known in musical circles, and for some years the Director at Ocean Grove—a man full of faith and earnestness and inventions—has taken charge of the fund for the Epworth College of Literature. His plans must win! Write him for special literature.

The Ohio College of Government.

The architectural beauty of this building has often been described in these columns. This handsome photogravure gives but the faintest idea of this marvelous structure, which is to be the gem in the University setting. Every indication warrants the belief that this will be the next building erected. It is expected that the cornerstone will be laid in the fall of 1900 by President McKinley, when the completed Hall of History shall have its formal dedication.

The Ohio College of Government is not only unique as to its architectural structure, but also as to the subjects which shall be taught therein, *i. e.*, Diplomacy, Arbitration, Constitutional Law, Science of Government, Municipal Government, and the large problems which confront us as we take our place as one of the world powers. The foremost lecturers in this building will be the Chief Justices of the United States.

Money is pouring in constantly for the erection of this building. The State which has furnished so many Presidents for the Federal Government will take increasing delight in this beautiful Ohio building. Four Ohio governors and two Ohio United States Senators have given generous contributions. With the marble which has been donated, and the subscriptions which have been made, about \$75,000 is already in sight. The building will cost \$200,000, and will be endowed with \$200,000 more. Why not a William McKinley professorship with an endowment of \$100,000, to forever perpetuate the memory of the man whom Ohio and the nation delight to honor? He has given his heartiest commendation to The American University, and is one of the honored Trustees. Who will give the first \$10,000?

All gifts will be promptly acknowledged in the COURIER.

THE UNIVERSITY COURIER.

Devoted to the interests of The American University
and Higher Education.
PUBLISHED QUARTERLY.

Subscription Price 25 cents per year.

Entered at the Post Office at Washington, D. C., as second-class mail matter.

Address all communications to UNIVERSITY SECRETARY,
1419 F Street N. W., Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Any one desiring to contribute to the funds of The University may send directly to The American University, Glover Building, Washington, D. C.

Editorial Notes.

WE SEEK to make the COURIER self-sustaining, without crowding its columns with advertisements. The subscription price is twenty-five cents a year. Let us have your subscription, that the policy of the paper may be maintained.

THE NEW OFFICES of the University are in the Glover Building, 1419 F Street. They are bright and comfortable. To them, at any time, our friends will be cordially welcome.

Should any of our readers visit Washington and desire to visit the university grounds, we shall count it a great privilege and pleasure to become their guide.

Let all communications be directed to this new address.

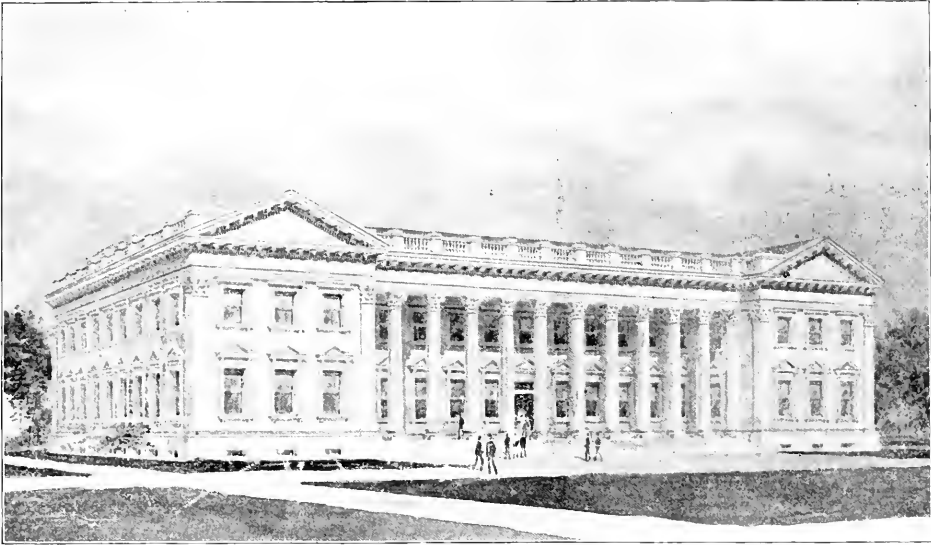

IT WILL BE an inspiration to many to know that the assets of The American University are now about \$2,500,000. This includes lands, buildings, cash, bequests, and valid subscriptions. This question is often asked, and we are exceedingly glad to give it answer in this public way. God has wonderfully blessed the enterprise. Still greater achievements are certain to mark the progress of the new year, over whose threshold we have so recently stepped.

WHEN YOU have finished reading this illustrated number of THE COURIER kindly hand it to some friend. You can thus widen the knowledge of our undertaking, and who can tell what may come of it? If you want THE COURIER sent to some one who might be interested send us name and address.

THE FIRST LETTER opened by Bishop Hurst in his mail received on Christmas morning contained a gift of \$12,000 for the endowment of The American University, made by an elect lady in the central west. It caused great joy. May many of the mails in this good year of 1900 bring like gracious burdens.

IN RECENT months enthusiastic meetings have been held in East Liverpool, Wellsville, Youngstown, Girard, Mentor, Ashtabula, Geneva, Willoughby, Zanesville, Wooster, Kent, Ashland, Fostoria, Canton, Massillon, Columbus, Toledo, Cincinnati, Middletown, Hamilton, Piqua, Eaton, Bridgeport, Belaire, Martin's Ferry, and Cuyahoga Falls, all in Ohio. Also Wheeling and Moundsville, West Virginia; Pittsburg and points in Pennsylvania; Mountain Lake Park, Md., and many other places throughout the country.

Subscriptions in pledges, in three annual instalments, have been generously made in sums from \$1 to \$1,000. A large majority of these subscriptions have been promptly paid. Notices from the Washington office of the University are sent to each subscriber a few days before the annual payment is due. The subscriptions were made in good faith, and, of course, will be paid. They were made by men and women who, without any special urging, were moved by God's Spirit to have some little part in this great Christian enterprise. Our success in beginning new buildings is entirely dependent on the promptness with which our friends meet their obligations. Please be prompt. If this COURIER is a reminder that you are in arrears, let not the sun go down until you have made remittance and cheered those who are working day and night to make glorious the opening years of the new century, by the complete equipment of The American University, the child of faith and prayer. Many subscriptions fell due January 1st. In case of change of address at once notify the Secretary, Dr. W. L. Davidson, 1419 F Street, N. W., Washington, D. C., to whom remittance of subscriptions can also be made.

The Illinois College of Languages.

How impressive will this building be when wrought out in imperishable marble of purest white! In it all languages which men care to read or speak will be taught by the best linguists of the world.

In an article written last year, Mr. Grant Allen, with fine sarcasm, makes short work of the study of the classics, and well nigh advocates their elimination from our college curricula, especially so in the case of those who contemplate a business career. He holds that the same mental discipline will be acquired in the study of the modern languages, with practical results infinitely greater. There may be something in this, as applied to a man who proposes a business career. Still the fact remains that a certain small percentage of students are linguistically inclined. Nothing else has fascination for them, and for nothing else have they aptitude. Is there any reason why these should not have opportunity on this side of the sea to gratify their inclinations? There is much that is worthy and good in classic literatures which has not yet found adequate translation. Much that has been comparatively well done could be bettered.

For all time to come there will be work for the translator, and there will be those born for the work—men who will not be satisfied until they have grasped the heart of the language; and we are greatly mistaken if we fancy that this company of original linguistical investigators is so small that it would not fill a College of Language organized on a broad and lofty scale. To Illinois will belong the honor of erecting this building. Earnest men are now at work in the State who will make personal appeal to the people. Much money has already been contributed.

The American University makes its best bow to the great Chicago University. This school, the chief glory of the metropolis of Illinois, is doing a marvelous work in the central west; but, in memory of the great Lincoln, Illinois' greatest son, who made a plea for a University at the nation's capital, and whose speech at Gettysburg is the finest bit of pure and simple English in the language, let Illinois speedily erect the College of Language in a university system which is not to be provincial, but is to stand for that which is highest and best in education—for the aspiring students of the whole nation and the world.

The American University, the Site, and Plan of Proposed Buildings.

In the center of this page is presented a bird's-eye view of The American University as it is to be in the years which are near at hand. The cause is finding a place in the heart and conscience of the American people, and tokens of success are everywhere apparent.

The campus includes ninety-three acres of high rolling ground. It overlooks the nation's capital, and affords fine glimpses of the purple peaks of the Blue Ridge Mountains which fret the distant horizon. A sweep of a hundred miles of wondrous landscape fills the eye of the beholder. Massachusetts Avenue, extended, the finest residence street in the city, reaches directly to the University site. The distance from the Capitol is four miles. Admirable street-car facilities are now assured. The site cost one hundred thousand dollars, but is now worth more than a million dollars. God's guiding hand is here manifest.

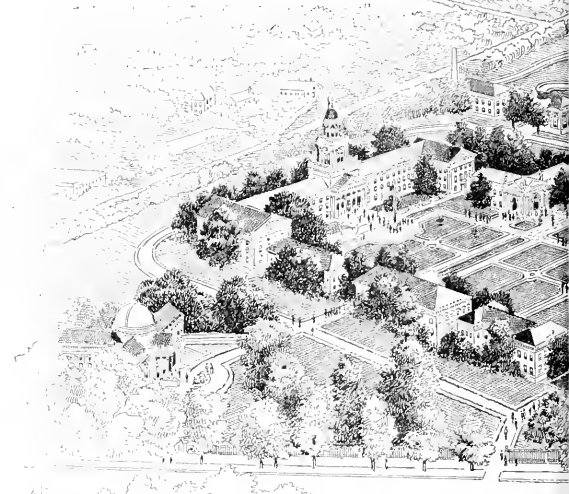

Twenty-three buildings of marble and granite are contemplated. The buildings are to stand for centuries, and only that which is most permanent and beautiful will be permitted to go into their construction; they must, besides, be in keeping with the other great buildings of Washington, that they may not suffer in comparison. Ten millions are to be invested for God and higher education—five millions for buildings, and five millions for endowment.

Henry Ives Cobb, a man of wide reputation and unparalleled skill and taste, a graduate of Harvard University, is the architect for the University. He planned most of the buildings of the Chicago University, and is now building the State Capitol of Pennsylvania and the massive Chicago Federal Building, the corner-stone of which President McKinley laid a few weeks since. He has worked out, in all their details, the plans of the many buildings in the plant of The American University, as the pictures of this issue testify. He has traveled widely, and has studied with critical eye the great University plants of the world, and insists that on the grounds we now have is the finest University site on the face of the round globe. He thoroughly believes in the objects and the aims of the University. Love guides his pencil in all his work, which accounts for the perfection he has reached.

Let a few sentences tell the old story in a new way, and bring clearly before you the aims and objects of the American University:

First. It is a university exclusively for post-graduate work; only college graduates with diplomas will be admitted. It will be open alike to men and women. It will be a unique institution in American education. It was only thirty years ago that Agassiz told his associates that "Harvard is no university—only a respectable high school, where they taught the dregs of learning." Great progress has been made since then, and the curricula have been

THE AMERICAN UNIVERSITY
WASHINGTON, D. C.

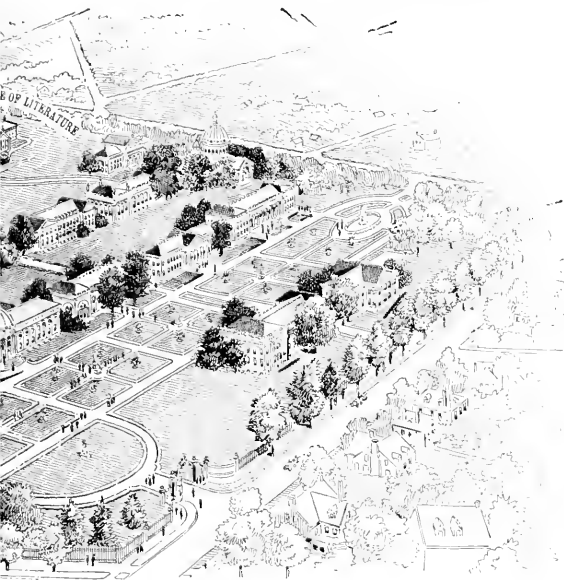

been immeasurably, yet the fact remains that with the single exception of Clark University, at Worcester, Mass., we have not on this continent a true university—one which does not, in some measure at least, combine collegiate training. God has securely locked the secrets of nature. He has not thrown away the keys, but has hung some of them a little higher than the ladder of modern education reaches. It is the purpose of The American University to lengthen the ladder.

The American University had its genesis in a letter written by George Washington to General Brooke, of Virginia, in 1795, in which he made a plea for a university at the nation's capital, that our young

students might be spared the necessity of seeking their higher education in the great universities abroad, where skepticism is the atmosphere of every class room, and where ideas which are antagonistic to republican institutions are imbibed. A century has passed. We have grown from a handful of people to seventy millions, and still the dream of Washington is not realized. Its late prophecy of fulfillment is due to the magnificent faith and unbounded zeal of that scholar and leader, Bishop John F. Hurst.

Second. It is to be a Protestant university. This

nation is emphatically Protestant; yet, strange to say, the most aggressive educational work yet done in Washington has been done by the Roman Catholic Church. Building after building has been erected. She has her eye on the future. We can but admire her courage and the keenness of her vision. The time, however, has fully come to sound a note of alarm. The great battle between Romanism and Protestantism is to be fought to a finish on the ten square miles of Washington. It is here that our civil and political life centers, and these rival universities are to give direction to the forces engaged in the conflict. The surges on Plymouth Rock call to us not to forget the faith of our fathers,

to keep alive in church and school that type of religion which has made us great and good as a nation. We must move mightily at once, if we would hold the ground.

Third. It is a Christian university. The history of State schools is not a brilliant one. Secularism and skepticism easily creep in. A university supported by the Government would become a recruiting office for politics, and would suffer instability through the caprices of shifting administrations. The jealousy for denominational control would rob it of much of its usefulness. The loftiest educational ideas can never be realized by institutions under the patronage of the State, depending on its treasury and subject to political bias and fluctuations. The American University must be reverently Christian. Culture apart from Christian life is mere veneer. Its great glory and the promise of its future will be in the fact that it is built by the individual gifts of philanthropic Christians. It will not be narrow or sectarian. Being a Christian institution, it must of necessity be under the wing of some religious denomination. According to its charter, two-thirds of the Board of Trustees must be Methodist; the other third are divided at present between six denominations, who are among its most enthusiastic supporters, and from whom some of the largest subscriptions have been received.

The American University is to stand for Protestantism, and is projected on such large and generous plans that no attempt will ever be made to duplicate it at the nation's capital. Recently the atmosphere has cleared a little and a surer highway has been thrown up, and on it The American University will march to victory. The scheme of a National University, built and sustained by the Government, which had a few ardent friends, came to naught in November, when a national committee of our most distinguished educators unanimously decided that such a university was at present impracticable.

The friends of the George Washington Memorial met in convention in Washington in December. There was some friction in the election of officers. Scarcely any money had been raised for their project during the year. They are slowly awakening to the fact that the dream which they have been cherishing, that George Washington left an amount of money which for a century has been on interest and is now available for a National University, is but a dream. The friends of this enterprise are

loyal and aggressive. It is a movement of noble women, and if they would but identify themselves with the Women's Guild of The American University and erect a George Washington Memorial on the splendid campus, which is now paid for, they would accomplish something tangible and bless humanity for all the years to come.

Such are the aims of The American University. It is born of God and cannot die. If you believe in it send to it some generous gift. You are God's steward. Give back to him, for his work, some of that which he has given you in such abundance. Leave some generous bequest to this noble undertaking of Protestantism. It will be an investment which will bear interest forever.

The American University and the Epworth League.

Unusual activity exists among the management of The American University in Washington. The clerical force has been largely increased.

The Board of Control of the Epworth League, at its meeting in Indianapolis, in July, reaffirmed its former action by unanimous vote—declaring, with the Bishops, in favor of The American University, and commending this national educational enterprise to the Epworth league of the entire Church.

In harmony with this action, the authorities of the University have had their architect, Mr. Henry Ives Cobb, prepare the plans for a marble building, to be known as The Epworth College of Literature. The building will cost \$200,000. All Epworth Leaguers will be asked to contribute \$1 a member.

A handsome certificate, lithographed in four colors, will be sent to each subscriber. It is a work of art, and will be worthy of framing and preservation. We would like to know that one of these beautiful certificates will hang on the walls of every Methodist home in all lands. On it, in fine relief, is a handsome picture of the building which the young people of the Epworth League will build with their dollars.

There is inspiration in this object. The building will face the majestic College of History, which is now completed, and will stand by the side of the noble Illinois College of Languages. Nothing could more certainly and strongly appeal to the young people of Methodism than Literature—the expression of both History and Language.

It is worth much in the heart and life of a young person to be allied to some great movement for the elevation of humanity; to have some part, be it ever so small, in bringing about some great result. It would be a wonderful impetus to the spiritual life of Epworth Leagues to be united on this one thing and lay definite plans for its accomplishment. There would be splendid inspiration to usefulness in the thought that each Leaguer was, this year, doing the same thing. One dollar is a small gift, certainly, for each member of the League. A trifling bit of self-sacrifice would secure it; but should there roll into the treasury in numbers equal to the membership of the Leagues, the great building in their honor would soon be erected. Many will give more than the single dollar.

To stimulate larger giving, it has been decided that a gift of \$1,000 will constitute a Founder, and the first contribution of this size has already come from Pennsylvania; \$500 constitutes the donor a Counselor; \$100, a Patron; \$10, a Benefactor; and \$1 a Builder. Special certificates will be prepared for each class of givers.

There will be placed in the main hall of the Epworth College of Literature a tablet bearing the names of all the Founders. A parchment scroll will bear the names of all the other givers, and will be preserved in the University archives.

Many of the Corinthian marble columns which will adorn the front of the building will be erected by individual gifts. Tablets bearing the name of the giver will be placed at the base of the column.

A Praise Service of responsive readings and original musical numbers, furnished by some of the well-known hymn and tune writers of the nation, is being prepared, and will carry with it, wherever used, inspiration and information.

This is not to be a continuous appeal, and it is hoped to close the entire Epworth effort within the year 1900. One splendid burst of zeal on the part of every Epworth Leaguer in that magic year, 1900, will do the work.

The close connection between the Epworth League and The American University is a most natural one. They were both founded in the same quadrennium. They are sympathetically united in a common and lofty ideal—the systematic equipment of our youth for the highest service. This connection will be made stronger by a visible tie—one that will bring benefit both to the hosts of the young people and to the institution, whose chief end is the best and highest preparation of our young men and women for successful lives.

It is expected to furnish, to a limited extent, free tuition to select young people who shall come to the University with the diploma of our colleges, and for whom provision shall have been made through some

part of the Epworth foundation. The details of the plan for scholarships will later be arranged and announced.

The movement has the hearty approval of the leaders of the Church. Bishop Ninde, the President of the Epworth League, under date of October 2, writes: "I heartily join in commending the University as a cause worthy the thank offerings of our Christian young people."

All sums given to this cause can be credited to the Twentieth Century Thank Offering. Let there be a grand response from every home. The Church which began in a university will not forget her genesis, and will make glorious the opening of the new century by building, endowing, and fully equipping the most magnificent University, with all that the

name implies, on the face of the round globe.

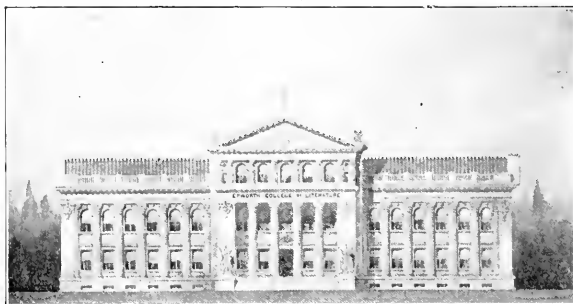

A unique certificate subscription plan has been devised, which is certain to awaken enthusiasm and stimulate healthful competition in any League where it is presented. Get the dollars ready, and see the marble climb. The young

people of Methodism can, in one year, build a monument to their faith and zeal which shall stand as long as the Republic.

The zeal and wisdom of our Roman Catholic citizens are evident in the recent establishment at Washington of their University of America, and in the grouping about it of five other ecclesiastical and educational institutions. Equal ardor and foresight belong to those who, under Protestant inspiration, seek to build a University that shall embody and crystallize the faith that has given us the freedom of our Republic.

For literature and all information, address the Chancellor of The American University, Bishop John F. Hurst, Glover Building, Washington, D. C.

When the time comes for you to plan what you are to do with your property after you are gone, think of the American University. Write us for blank form of bequest.

The Epworth College of Literature.

"Ohio in the War."

All local interests and jealousies give way before the paramount importance of building and equipping a great Protestant University in Washington City.

Not to have such an institution there is to abandon the National Capital to the tireless emissaries of Rome. The moral and political influence of such a propaganda, entrenched in a great Catholic university, would be far-reaching and radical. It can only be met by that of a stronger university, Protestant beyond the possibility of change. A great National University, as is the dream of some, would not answer. Protestantism cannot trade its votes for position. It would be morally certain that Machiavellian conspiracy would either neutralize the influence of such an institution or absolutely control it. Nothing short of Protestant ownership and control would answer the demands of the situation from a Protestant standpoint. Hence the urgent importance of the great project to which Bishop Hurst has devoted his life. It is sagacious and statesmanlike. It is like the deep cañons of the Rocky Mountains, that require "three looks to reach the top." The average thought does not grasp its importance. Local interests obscure our vision. The plan is too comprehensive and magnificent to be at once comprehended. But returning to it, it excites our wonder and challenges our admiration; and finally wins our enthusiastic support.

Its scope is so different from that of any other university Methodism can ever hope to have, that ultimate interference is impossible. Contemplating only post-graduate work, and that of the most advanced and specific character, all its influence would be exerted to foster and strengthen our local educational institutions, as indispensable sources of its student body. It surpasses the average rural conception of a "university" in a single department. For example, it is proposed that this State shall build and equip, at a cost approximating half a million, the Department of Political Science, to be known as the Ohio College of Government. And so on with all the colleges essential to a great university with world-wide reputation and influence.

What a mighty citadel of our faith! What a fortress of patriotic loyalty!—[Dr. D. H. Moore, in the *Western Christian Advocate*.]

The Twentieth Century Fund.

Since the Bishops of the Methodist Episcopal Church issued their call for a Twentieth Century Thank Offering of ten millions of dollars for education, including distinctly The American University as one of the objects for benevolence, the response has been most gratifying. A report recently published by the secretary of the fund shows that nearly two millions of dollars have already been subscribed. The American University is second on the list, with \$316,903 to its credit. The magnificent and aggressive Ohio Wesleyan University stands first in the list.

Many of the conferences of Methodism are laying large and definite plans for the gathering of the Thank Offering, and are presenting the University as a worthy object for the gifts of the people.

We may be narrow and selfish in our thinking, but, nevertheless, are sincere in our conviction that ten millions given to The American University through this fund in the next two years would give Methodism a standing among the religious denominations of the world which nothing else could possibly do, and would give an added glory to Methodism which would last for a thousand years.

Great prosperity is upon the country. Many people are wondering where they can place their January dividends to the best advantage. Invest in The American University. It would bear interest forever for God and humanity. Plant your golden seed in the fertile soil of higher education during the first two years of 1900, and thus prepare yourselves to rejoice in the ripening harvest of the centuries to come.

Munificent Giving.

Gifts to educational institutions in the United States during the year just closed have amounted to nearly \$56,000,000. Some of this amount has been made by will, but the bulk has properly come from philanthropic men of wealth who are living, and who have improved the opportunity to witness some of the results of such benefactions during their own lifetime. This course is to be commended. It precludes any misunderstanding as to the intent of the benefactors, and affords to them while living some measure of the honor due them for such benefactions.

The College of History.

The cut of this noble College of History has frequently appeared in *THE COURIER*. But in order to make this pictorial issue complete, we use this new small picture, which, we think, has never been used in these columns. This is the building now completed. It is built of purest monumental marble, and in its construction no law of architecture is violated. It is the wonder and admiration of all who see it. No finer building for educational purposes stands. The cost was \$176,000. In the very near future multitudes of earnest students will crowd its forty-two bright and attractive rooms.

Distinguished Methodists Inspect the Magnificent College of History.

A large company, including more than sixty of the distinguished Methodists in the city attending the meetings of the General Missionary Committee, on Nov. 18th, accepted an invitation to visit the grounds and buildings of The American University. The day was perfect for such an excursion. Ample bus accommodation was provided over the Loughborough road for the short journey between the Tennyaltown electric line and the beautiful marble College of History, which was the objective point. It was the largest and most representative company of Methodists which has been in the building at one time since its completion. All expressed great surprise at the architectural beauty and finish of the building, which cost \$176,000, and is one of the finest buildings for educational purposes in this country. The forty bright and cheerful rooms were inspected, which are soon to be filled with earnest students pursuing post-graduate work. The entire company

made their way to the roof and caught a glimpse of the outlines of the University grounds and the wonderful landscape, which fills a circumference of nearly two hundred miles.

A halt was made in the great lecture hall, which looks towards the city of Washington. In the absence of Bishop John F. Hurst, the Chancellor of the University (who was detained by an important committee meeting), to whose untiring zeal and mighty faith all things accomplished so far in the University scheme can be traced, Dr. W. L. Davidson, the Acting Secretary of the University, served as master of ceremonies. The audience sang "America," after which prayer was offered by Rev. Dr. D. H. Moore, of Cincinnati, editor of *The Western Christian Advocate*. Representing the educational interests of the Church, Rev. Dr. S. F. Upham, of Drew Theological Seminary, Madison, N. J., made a brief but telling address. Speaking for the benevolent connectional interests of the Church, Rev. Dr. A. B. Leonard, of New York City, one of the Secretaries of the Missionary Society of the Methodist Episcopal Church, gave hearty and enthusiastic approval to the University movement.

On behalf of the Methodist press, Rev. Dr. Charles W. Smith, editor of *The Pittsburg Christian Advocate*, spoke earnest words of approval. The patriotism and Protestantism of the movement were warmly commended by Rev. Dr. William Burt, of Rome, Italy, Superintendent of Methodist Missions in Italy. The love and loyalty of the laymen of Methodism for this movement were voiced in an eloquent tribute given by Gen. J. F. Rusling, of Trenton, N. J. The benediction was pronounced by Rev. Dr. J. F. Chaffee, of Minnesota.

This was the first service held in the building since its completion, and will long be remembered by those who were present. The American University is making rapid and substantial progress. An interesting feature of the occasion was the presence of Rev. Dr. John Peate, of Ohio, who stood beside, and explained, the great reflector, which he ground some time ago and presented to the University. It is the largest in the world.

Give some great gift this year to God. The door of the new century is opening. Let us not carry across the threshold any undischarged obligations to Him who has given us all we have.

School and College.

Plumbing is taught in the Boston Trades School.

Pennsylvania has a new banking and business course.

The class of 1903 at Harvard contains over 500 students.

In the year 1860 Andrew Carnegie gave away \$5,155,000.

"Coods" at the University of Wisconsin wear short skirts.

The proportion of female to male teachers is increasing in England.

The proportion of Latin students in elementary schools has increased.

Class crews and basket-ball teams are being organized at Wellesley.

An astronomical observatory is to be built for the University of Maine.

Bowdoin's entering class of seventy is the largest in the history of the college.

Eight thousand children in Philadelphia cannot find room in the public schools.

Yale's divinity school has a decreased attendance, due to the raising of the standard.

The National Association of Collegiate Alumnae will make an exhibit at the Paris Exposition.

Work has been commenced on Robinson Hall, the new scientific school of Tufts College.

Edward Tuck, of the class of '62, has given \$300,000 to Dartmouth in memory of his father.

Yale shows increases in the entering classes of scientific, academic, and law departments.

Professor Hadley, of Yale, will not relax his public writing on account of his assumption of his new duties.

John D. Rockefeller has just given \$100,000 to Columbia College to endow a chair of psychology.

Louis D. Severance, of New York city, has just given Oberlin College, Ohio, \$50,000, which will be used in fitting up a chemical laboratory.

W. Jones, 1900, who has been elected editor of the *Harvard Monthly*, is a full-blooded Indian and a graduate of Phillips Andover Academy.

A Persian, six Porto Ricans, and a full-blooded native of the Sandwich Islands are among the students that attract especial attention at the University of Michigan.

Harvard University receives a bequest of about \$140,000 by the will of Dr. Calvin Ellis, '46, which has been held in abeyance ever since his death in 1883, and has only recently been probated.

J. D. Rockefeller has given \$7,426,000 to the Chicago University. This includes a gift of about \$4,500,000 made at the beginning of this year. May God raise up such a noble and generous friend for the American University.

James M. Munyon, of Philadelphia, is to build, equip, and endow, at a cost of \$2,000,000, an industrial school in that city for native-born American girls. The institution is to be located on high ground overlooking Fairmount Park.

H. M. Hanna, of Cleveland, Ohio, has given \$12,000 to found the chair of medical jurisprudence in the Medical College of the Western Reserve University. Mr. and Mrs. Samuel Maher have given \$12,000 to the university for immediate use in the purchase of books for its library.

In only nine States of the Union does the reading of the Bible as a part of school exercises rest on a legal basis, plainly written in the State constitution or in the school law. These States are Massachusetts, New Jersey, Indiana, Iowa, Kansas, Georgia, Mississippi, and North and South Dakota.

A FEW LETTERS FROM LEAGUE PRESIDENTS:

William H. Abbott, Baltimore, Md. I heartily endorse this movement and I will do all in my power to advance the cause of the Epworth League of Baltimore.

Jan. Beah, Washington, W. Va. I'll bring the matter before our league at next business meeting and distribute the blank subscription certificates.

Maude G. Benedict, Canton, Penn. I am very much interested. Will bring it before our cabinet.

C. L. Berry, President, Mayville, Mich. I wish to say that I am heartily in sympathy with the move which you represent and wish you success.

Miss Sadie Dunkley, Good Hart, Mich. I think the building of this college a grand and noble work and my prayer is with you.

George H. Richardson, Dudley, Pa. Kindly accept our contributions and best wishes for the success of the University. Please send the certificates, as per agreement.

Enor H. Ridley, President, Newark, N. Y. I wish you all success, and hope to send you more money in the future.

Miss Lula Trimble, Natrona, Pa. We think the movement is certainly one of great importance, and would like very much to assist in this work.

S. M. Beale, Stoughton, Mass. The enterprise is one of the grand possibilities, and the young people should all become its supporters and friends. Will do what I can.

W. Orville Allen, Salisbury, Mass. The erection of the Epworth College of Literature of The American University by the small gifts of thousands is an enterprise worthy the sound sense, youthful zeal and philanthropic heart of Methodist youth. Let us do our part and God will surely bless.

Horace J. Betty, Lebanon, Tenn. We want to do something to help in that great building. I write my good wishes with the other members of the league for The American University. I hope the plans for endowment will succeed.

E. H. Burton, Bartonville, Md. To say that I am in sympathy with the movement is only my duty as a loyal Methodist Leaguer. I am ready to give my efforts in its behalf.

Edgar Ervin, Ashton, Md. I heartily endorse the movement. We are all very much in favor of it, and will be proud to help in so good a work.

J. W. Ferguson, Dennison, Ohio. We as a chapter approve the plan. Surely no Epworth Leaguer should lose this opportunity to help erect the Epworth College of Literature, which will stand as long as the Nation stands.

F. Frulson, Prescott, Wis. Our league chapter acknowledges the receipt of your letter and subscription certificate blanks. We think it a good movement and will do what we can to push the work along.

Frank R. Herrington, Perh Amboy, N. J. In reply to your communication relative to subscription certificates would say that Fletcher Chapter, No. 15058, has decided to do whatever they can to have the certificates filled out and forwarded to you.

Edward Monroe, Baltimore, Md. The W. S. Jackson Chapter heartily endorses this movement. We think this laudable object should receive both the moral and financial support of every member of the Methodist Episcopal Church, as well as every member of the Epworth League.

W. F. Roberts, Grange, Mich. The plan for the Leaguers in the erection of an Epworth College of Literature was a noble conception of the part of those connected with The American University, and I hope its realization will be one of the achievements of the early future.

J. B. Clements, Malta, Ohio. I will do all I can to persuade our young Methodists to push vigorously along The American University, and thus to more firmly establish the Kingdom of God. I earnestly say "Amen" to what has been said by the leaders of the Church and the head of our Government.

C. H. Ehrman, Terre Haute, Ind. I am very much interested in the University; in fact, watch with interest its growth for a number of years, and will do all I possibly can. We have a strong and active league. I really consider it a great privilege to assist.

James A. Fergie, Buenavista, Pa. I am in hearty sympathy with your movement and I must add my hearty approval as a member of such an army of co-workers for God as the Epworth Leaguers at the present day. At present I am a member of Bell Chapel Chapter and I will assist our president to the best of my ability so that she may meet with success.

Rev. J. Howard Hand, Brooklyn, N. Y. The Epworth Foundation of the American University is a credit to heart and head of Methodism and of the Epworth League. When a cause builds its house on a firm fixedness, and our cause is still building foundations and not monuments. I spoke to our president and he will write to you assuring our co-operation. Chapter 4050 will be represented in this grand idea.

W. W. Hiney, Newcastle, Cal. I heartily approve of the plan, and just as soon as I can get a representative number will send it in. We are a live league, have been blessed spiritually, and have much to be thankful for, from a temporal standpoint; trees all in bloom and a fruitful year promised.

George M. Hamilton, Pitts, Penn. I desire to heartily endorse your great and noble work in The American University. I shall bring all your last communications before my cabinet and will let you know their wishes together with the action of our league. I feel sure they will all take an interest in this great enterprise, and nothing would please me better.

T. W. Haven, Roaring Creek, Penn. It seems certainly a praiseworthy plan for the young men and young women of Methodism to give their might and mite to the building and endowing of the Epworth College of Literature of The American University at the dawn of the twentieth century.

Daisy Jackson, Benning, D. C. The subscription books were presented to each captain, and the members of each company will be appointed on Tuesday night evening, and we'll send you some money as soon as possible. This is the agreement we made last night at the meeting. Every one seemed to be interested with what you sent us.

Mr. Phil. E. Parrott, Kansas City, Mo. I am glad to be able to report that after a full discussion all the members were hearty in favor of the University. Think it over and write the authorities of the University that you are planning to do it.

L. B. Ack... I fully expect it may lead and members a will be... Thank you... Gray... can.

VOL. VIII.

WASHINGTON, D. C., DECEMBER, 1900.

No. 3.

Published Quarterly. Office, 1419 F Street N.W.

Subscription Price, Twenty-five Cents a Year.

A Noble Gift.

Hon. Willis George Emerson, of Wyoming, two weeks ago, gave \$5,000 to the Ohio College of Government. His friends in Wyoming, hearing of it, found a little fault with him that the gift had not been made in the name of Wyoming, whereupon he immediately subscribed an additional \$5,000 towards the Wyoming College of Mineralogy. This is a splendid start on a new building in which will be housed an important department of instruction; and the inspiration of this gift will doubtless mean many additional subscriptions in the future from Wyoming. All of the contemplated State buildings are now receiving generous donations. The Illinois College of Languages, the Ohio Hall of Government, and the Pennsylvania Hall of Administration head the list.

About the Picture.

To our loyal friends who are following our career with loving interest, these words will seem trite; but this paper will fall into the hands of many unacquainted with our history and high aims. Here they are, in a few sentences. The

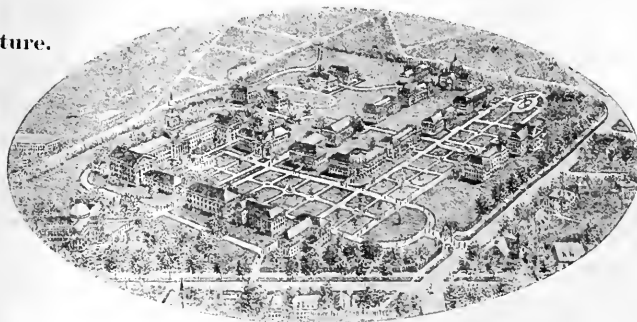

American University is a Protestant post-graduate institution planted in the Capital—the nation's heart—where our civil and political life centers—to take advantage of the rich scientific collections and libraries in which the Government has already invested \$10,000,000, and to keep American scholars desiring to pursue original investigation on this side of the ocean. Twenty-three marble and granite buildings are contemplated, and \$10,000,000 will be invested in buildings and endowments. One building, the Hall of History, is completed. The present assets of the University are \$2,700,000. According to the

charter, three-fourths of the Board of Trustees must forever be Methodists. The rest are divided among other Protestant denominations. Plans are completed for five other buildings, and the opening year of the New Century will see some of them commenced. Methodism is committed to it and will not retreat.

A Suggestion.

Why cannot our national holiday be utilized in a sensible and pleasant way in the interest of The American University? We are talking six months ahead of time, but think it over and see if it does not meet your approval, and if you cannot at once begin laying your plans?

The American University stands for patriotism, Americanism, and the flag. Why would it not be possible to arrange for a patriotic festival or lawn fete in multitudes of our churches in the interest of the University? It could be made a pleasant time socially, and, in the aggregate, large receipts might come to the Uni-

SITE OF THE AMERICAN UNIVERSITY.
Plan of Campus and Buildings.

versity. We have in the past been a little remiss in the using of our national holiday in any very sensible way for the building up of patriotism. The people would readily respond to a call of this kind if it were brought to their attention. If pastors and the earnest women in ten thousand of the churches would put heart and enthusiasm into a movement of this character, enough might be secured on the first Independence Day of the new century to erect a building on the campus of The American University. Think it over and write the authorities of the University that you are planning to do it.

Think it over and write the authorities of the University that you are planning to do it.

A RINGING CALL TO DUTY!

The Epworthians of the Nation—To Build the Epworth College of Literature of the American University.

Unanimous Action of the National Board.
Whereas, This Board of Control learns with genuine satisfaction of the measures taken by the founding of a great national University [The American University] in the city of Washington, D. C., under the patronage of the Methodist Episcopal Church, and,

Resolved, That we, the Board of Control, representing the young people of Methodist, and recognizing the close relation between the Epworth League and The American University, whose object is the higher education of the youth of our land, gladly unite in the endorsement of the Bishops, and commend this national educational enterprise to the Epworth League of our Church.

THE CABINET AND BOARD OF CONTROL TO YOUR LEAGUE:

RISBOP W. K. MINDE, PRESIDENT OF THE NATIONAL BOARD OF CONTROL OF THE EPWORTH LEAGUE. A cause worthy the thank offering of our Christian young people.

JOSEPH F. BERRY, D. D., EDITOR OF THE EPWORTH HERALD. The American University will rise. Its growth may be measured thus: more than one of the promoters wish, but its ultimate success predestinated. I am exceedingly glad that the Epworth League has received such a cordial endorsement from the Board of Control.

REV. J. W. BENNETT, PASTOR, LEWIS, MISSOURI. I trust that every Leaguer in our world will be thankful to you for the call.

REV. S. A. MORSE, D. D., DENVER, N. Y. I think it would be a worthy thing for the Epworth League to do to have a hand in the establishment of this great institution. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

REV. H. R. ALBROOK, D. D., PH. D., Mc. VENEUS, IOWA. This American University is one of the happy consequences of the new day in our country. Its highest laws according to their duty will honor God, fortify the church and profit the world.

REV. WM. J. RAYNE, D. D., PH. D., DENVER, N. Y. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

JOHN W. E. BOWEN, D. D., GIBSON, TENNESSEE. The Board of Control has in every degree its own thing to thank you for. The Epworth League of the Church, which has the largest educational movement of our day in this country.

REV. STANLEY OLIN ROYAL, D. D., DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

REV. FRANK FRANK, DENVER, IOWA. The Epworth League will have the opportunity of its existence if it fails to identify itself with the creation and perfection of this mighty institution of learning. I therefore, highly endorse, and commend to every Epworth League the proposition put up by the Board of Control.

J. A. PATEN, SECRETARY OF THE BOARD OF CONTROL. I hope the gifts of the members of the Epworth League will be in proportion to the call announced by the Board of Control to build the Epworth College of Literature and the Epworth Library.

MR. WM. L. WOODCOCK, OF ALBANY, PA. I considered, therefore, the project of the great hosts of Epworthians and looked for their liberal patronage.

F. A. CHAMBERLAIN, PRESIDENT THE SECURITY BANK, MINNEAPOLIS, MINN. The building and endowment of the Epworth College of Literature will be a lasting honor to the church and ought to attract to itself the students of our day.

REV. ELLIS S. OSBORN, D. D., NEW YORK. Every Epworth League will be moved by the possibility of having a share in the accomplishment of that which is one of the shining glories of all American and Protestant educational achievement in our country.

REV. WILLIAM ROENEKE, D. D., DELAWARE, IOWA. I have no good words with the other members of the Board of Control for the American University, and especially for the Epworth College of Literature.

REV. J. W. VAN CLEVE, EAST NEW YORK, IOWA. This noble school is a great thing to be in at the beginning of this beneficent and noble enterprise.

REV. F. L. NAGLER, D. D., MINNAPOLIS, IOWA. A building which is the Epworth College of Literature, erected by the Epworth League, would be a noble monument for youth, much more in time to come.

REV. WILBUR P. THIERKEL, D. D., CHICAGO, ILL. I am glad to see my personal endorsement of the enterprise and to commend it to the generous support of the young people of our American Methodist Church.

REV. WM. D. PARR, D. D., FORT WARRICK, IOWA. The American University is the crowning glory of our Church—you will be in at the beginning of this beneficent and noble enterprise.

F. D. FULLER, TOPEKA, KANSAS. I cannot see why any Epworth League should not make some contribution toward the construction of this great undertaking. They may have better time to make to push forward this effort, and the completion of this undertaking will be of lasting honor to our sects and every young person who participates in it.

F. W. TUNNELL, DENVER, IOWA. The money so far raised in the American University shows its success. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

A. B. SCHROETER, CLEVELAND, IOWA. The Epworth College of Literature commands the admiration and support of every Epworthian. As a member of The American University, honored with the name it is as it will only be honor to the League if the necessary funds for building and maintaining it should be abundantly so through the generosity of the Leaguers. Let it be so. The Epworth College of Literature and press it to success on the tidal wave.

ROYAL S. COPELAND, M. D., UNIVERSITY OF MICHIGAN. If the League stands for anything it stands for the Highest Type of Christian culture. Schools and the means of education have always been recognized by our Church. It is thus to be the most important thing in the world for every Leaguer, for every Methodist, to rally to the support of this splendid undertaking.

L. J. NORTON, SANTA CALIFORNIA. Our great Epworth League will make itself in providing such a building, and making possible the carrying out of your plan. I trust the Church will help it with itself and early provide the necessary funds.

REV. EDMUND M. MILLS, D. D., NEW YORK. I hope the Epworth League will lend itself and endorse Epworth Hall before the close of this Twentieth Century. Thank you for the call.

REV. H. B. JORDAN, D. D., SANTA FE, SANTA CALIFORNIA. I am glad that the great Epworth League is to have a fitting recognition, not only in the beautiful building of the Epworth College of Literature, but also in the privilege of contribution. I trust that the League will honor itself in its loyalty to this enterprise.

CHARLES R. MAOGE, BOSTON, MASS. The Epworth League, whose members are men to be the leaders of our business, will have cause to rejoice in whatever they may be able to do in carrying to a successful issue this great project.

BORLEY K. BOBBER, NEW YORK, IOWA. There is no work planned by the Twentieth Century Fund more constructive to the young Methodist Church than the higher education of our people for which this American University—the building and endowment of the Epworth College of Literature. Such a noble accomplishment will be a lasting honor to the League.

REV. M. M. ALSTON, PRESIDENT, DENVER IN ATLANTA GEORGIA. I trust every member of the Epworth League will be glad to see the American University. It would be a great thing to be in at the beginning of this beneficent and noble enterprise.

R. L. PAINE, M. D., LANSING, MICHIGAN. The effort now being made to interest our Leaguers in building the Epworth College of Literature, that shall be such an important part of the University, should be encouraged and aided by every local member.

Would be a blessing to the League.
REV. W. H. BULLOCK, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

The Greatest Movement of Methodism.
REV. W. H. BULLOCK, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

It is a Great Thing for Young Men and Women.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

It is the Pride of Methodism.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

Every Leaguer Should be Represented.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

With Us and Pray for Success.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

The University a Magnificent Contribution.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

Each Member Should Take His Offer.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

Will Support the Movement.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

No Doubt of Ultimate Success.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

The Movement Should be a Great Success.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

They Should Build and Endow the College.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

Will Promote the Enterprise.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

A Noble Sacrifice to be Made.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

The Young People Will Surely Respond.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

A Magnificent 25th Century Movement.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

Will be the Greatest Educational Movement.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

To Make a Thriving University.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

Will be a Blessing to the League.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

A Full Provision from God.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

Every Leaguer Should Contribute.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

A Most Magnificent Enterprise.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

Should be the Crowning Glory of Methodism.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

The Right Way for the Young People.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

Young People Should Build.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

A Noble Sacrifice to be Made.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

The Work of a Supreme Importance.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

A Noble Sacrifice to be Made.
REV. J. P. HALL, DENVER, IOWA. I am glad to see that the American University is being established in the city of Washington. It is a great thing to be in at the beginning of this beneficent and noble enterprise.

Will be a Blessing to the League.

VOL. VIII.

WASHINGTON, D. C., DECEMBER, 1900.

No. 3.

Published Quarterly. Office, 1419 F Street N.W.

Subscription Price, Twenty-five Cents a Year.

A Noble Gift.

Hon. Willis George Emerson, of Wyoming, two weeks ago, gave \$5,000 to the Ohio College of Government. His friends in Wyoming, hearing of it, found a little fault with him that the gift had not been made in the name of Wyoming, whereupon he immediately subscribed an additional \$5,000 towards the Wyoming College of Mineralogy. This is a splendid start on a new building in which will be housed an important department of instruction; and the inspiration of this gift will doubtless mean many additional subscriptions in the future from Wyoming. All of the contemplated State buildings are now receiving generous donations. The Illinois College of Languages, the Ohio Hall of Government, and the Pennsylvania Hall of Administration head the list.

About the Picture.

To our loyal friends who are following our career with loving interest, these words will seem trite; but this paper will fall into the hands of many unacquainted with our history and high aims. Here they are, in a few sentences. The American Uni-

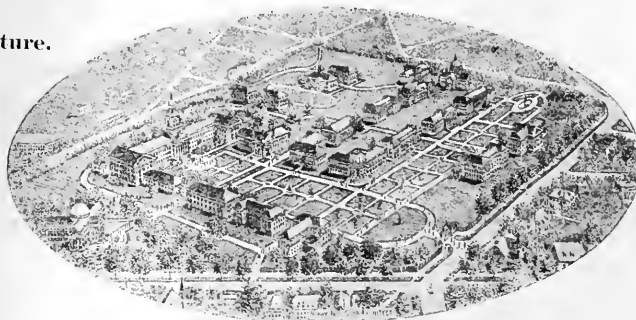

versity is a Protestant post-graduate institution planted in the Capital—the nation's heart—where our civil and political life centers—to take advantage of the rich scientific collections and libraries in which the Government has already invested \$10,000,000, and to keep American scholars desiring to pursue original investigation on this side of the ocean. Twenty-three marble and granite buildings are contemplated, and \$10,000,000 will be invested in buildings and endowments. One building, the Hall of History, is completed. The present assets of the University are \$2,700,000. According to the

charter, three-fourths of the Board of Trustees must forever be Methodists. The rest are divided among other Protestant denominations. Plans are completed for five other buildings, and the opening year of the New Century will see some of them commenced. Methodism is committed to it and will not retreat.

A Suggestion.

Why cannot our national holiday be utilized in a sensible and pleasant way in the interest of The American University? We are talking six months ahead of time, but think it over and see if it does not meet your approval, and if you cannot at once begin laying your plans?

The American University stands for patriotism. Americanism, and the flag. Why would it not be possible to arrange for a patriotic festival or lawn fete in multitudes of our churches in the interest of the University? It could be made a pleasant time socially, and, in the aggregate, large receipts might come to the Uni-

SITE OF THE AMERICAN UNIVERSITY.
Plan of Campus and Buildings.

versity. We have in the past been a little remiss in the using of our national holiday in any very sensible way for the building up of patriotism. The people would readily respond to a call of this kind if it were brought to their attention. If pastors and the earnest women in ten thousand of the churches would put heart and enthusiasm into a movement of this character, enough might be secured on the first Independence Day of the new century to erect a building on the campus of The American University. Think it over and write the authorities of the University that you are planning to do it.

Think it over and write the authorities of the University that you are planning to do it.

Why the American University?

REV. B. F. BEAZELL, D. D.

I. Because it is needed. Variety in the institutions, as well as in the appliances of education, is desirable. Lowell declared that the opening of the first grammar school was the opening of the first trench against monopoly in Church and State. The opening of this institution upon its plane of high purpose will be an announcement that the Old World monopoly of the best opportunities for study and scholarship is at an end. Why American pigiron, and not American education, of the first quality?

II. It will help all other schools. It will receive only such products as are passed on from other establishments. And every lower thing leans on something higher. That is probably an Emersonism, but true, as the pull of gravity. The foothill complained that the mountain peak overshadowed it. "Possibly, but reflect a moment, little friend; I gather the mists and weave the clouds that give life to you and the lesser hills. In truth, I create your climate." Without our higher and highest schools, how soon would the throb of expectant life die out of the lower! We must avoid the dead level of uniformity. As to the sinews of war. Said a thoughtful liberal giver the other day: "Large and repeated askings mean enlarged givings." Millions for enjoyment and luxury, thousands for beneficence, is our present practice. We can surely reverse this order by boldly and authoritatively pressing the claims of the Master's work. In the kingdom of dollars, as of grace, he that asketh receiveth.

III. Assuming that it is needed, the Federal capital is unquestionably the place for it. There, rivalries are lushed. No other city belongs to the whole people. The site chosen seems to be faultless. Washington planned for such an institution as a nursery of patriotism, and that our students might be exempt from the temptations of European university life. The latter reason is, perhaps, not so potent to-day. The nations are learning to recognize one another as members of a common family. Men run to and fro, seeking variety in education, as in other acquisitions of life. The supreme thing is to put the very best article upon the market at the spot where no one can fail to find it. The eyes of continents and of islands are just now turned toward this nation, and the focal point is its capital. We are assuming control of ten or twelve millions of the inhabitants

of the tropics as a trust for civilization. Year by year increasing hundreds of these will come to us for instruction. In this city, which will in the next generation be the political metropolis of the world, there are libraries and museums, rich stores of art, science and discovery, which the Government has been accumulating for a hundred years. All of these, without money and without price, are a part of the University's equipment, and are just the mines of wealth in which the student loves to burrow. At a nation's capital, too, social, religious, and political interests become subjects of special study. Romanism, always alert and aggressive, has already planted there a university of the highest grade, and of course representing her own political and religious tenets. As her island sons and daughters come to receive their first impressions of American life, "Mother Church" is ready to receive them. What is Protestantism prepared to do? Nothing!

IV. I have aimed to speak in moderation. From these facts, does it not follow, as the day the night, that an interdenominational institution of the highest type is needed at our nation's capital, as a representative of the purest stamp of American Protestantism? This great school ought to open within twelve months. Students by the hundred are knocking for admission now. State buildings are certain to come. But at once, in ample sums, endowments! The two Episcopal Methodisms are providentially pushed into leadership in this patriotic, religious work. Let them move forward! Eight or ten years are enough to have spent in preliminaries. What wonder that the dauntless Hurst is consumed with zeal, that the magnetic McCabe is insistent! No hoher, no more urgent responsibility is upon us as a Church. Of course there will be objections. Objectors we have always with us. But the hour is propitious. This is an age on ages telling.

BLAIRSVILLE, PENNSYLVANIA.

To all who visit Washington City we give a cordial invitation to call at the University offices, 1419 F street northwest. We shall give you royal welcome. Please don't all come at once. Should you desire to visit the University grounds, we shall be glad to accompany you. The visit will be an inspiration, and convictions will be born which will make you a loyal friend to the enterprise.

The Woman's Guild of The American University.

This is a new movement which promises much for the University. The plan includes a thorough organization of earnest women in all parts of the country to secure women's gifts for a fund to build the Woman's Guild College of Comparative Religion in the University plant. Many of the best women of the Church are already enrolled in its membership, and when women undertake to push a project it is certain to succeed. The following appended letter has just been issued by the earnest president of the Guild, and it is certain to meet with a hearty response in all sections of the country:

AN OPEN LETTER FROM THE WOMAN'S GUILD OF THE AMERICAN UNIVERSITY.

SEPTEMBER 1, 1900.

The Woman's Guild of The American University proposes to enlist the womanhood of America in one of the noblest enterprises for a higher Christian culture that ever presented itself to her zeal and consecration.

Methodism, though the youngest force in Protestantism, has already justified its leadership, which it shall maintain only so long as its spirit is aggressive and timely. It saved eighteenth century Christianity from secularism and moral laxity; it is, with others, arousing the whole Church to its duty toward the twentieth century, in saving it from agnostic tendencies and beliefs without foundation.

The Church must fulfill its mission to be the leader of thought and the new education. The need of a university for post-graduate work, where young men and women may pursue the highest lines of investigation without the disadvantages of foreign residence and rationalistic influences, has long been felt by the best and noblest workers.

This ambition has begun to be realized in the incorporation of The American University—the purchase of a magnificent tract of land in the suburbs of Washington city and the erection of one building—the College of History. That this University may reach its ideal, the influence and labor of Protestant womanhood should be enlisted in its behalf.

Womanhood has always been a prominent factor in the work for the betterment of mankind. Especially has the work of education appealed to woman's heart and judgment, standing guardian over the states of childhood and adolescence. The full significance of the duty of the Church toward the education of young manhood and womanhood makes this appeal most timely and serious.

Much earnest thought and effort have been bestowed to accomplish what has already been done. But that the new century may open with a splendidly equipped institution for the highest education at the capital of the nation and under the direction of a strong Christian administration, the Trustees call upon the intelligent womanhood of America to organize under the Woman's Guild, which proposes—

First.—To collate woman's gifts to the University into a general fund to build a College of Comparative Religion called The Woman's Guild College of Comparative Religion.

Second.—To form Woman's Guilds in every State and section of the country, and to enlist the united efforts, gifts, and prayers of American womanhood to make this institution what the founder, inspired by the highest and purest motives, has planned. The general introduction of this Guild will give each church and hamlet the privilege of having a stone in this building.

Third.—Any person or Local or State Guild contributing \$100,000 shall be entitled to name a chair perpetual in The Woman's Guild College of Comparative Religion.

Any person or Local or State Guild contributing \$25,000 shall be entitled to enroll a name on a tablet in said College as a part of the building.

Any person or Local or State Guild contributing \$10,000 shall be entitled to name a perpetual studentship in said College.

Any person contributing \$1,000 shall be an honorary Vice-President of the Woman's Guild of The American University; \$500 a charter member of the same; \$100 a life member of the same; \$5 shall be the annual membership dues of the said Woman's Guild.

We make our appeal to all friends of higher Christian education, to every earnest believer in the mission of the Church, and to every zealous lover of Protestant America.

Never before has such a call come to the Christian Church as that which here summons its energies and treasure in consecration to the noble work of building a College of Comparative Religion and its endowment as one of the Departments of The American University. Of all the gifts of the Church to the Twentieth-Century Thank Offering, the gift of a College, endowed and set apart exclusively for the study of "Comparative Religion," with a staff of professors and assistants as a fully equipped College, is without precedent; it is pregnant with great possibilities for the establishment of a pure Christian faith the world over, a lever to all denominational missionary work, the grounding of the faith of the gospel on unquestionable foundations.

This is the Church's opportunity for the preoccupation of the National Capital with this Christian Institution, sending forth into the various avenues of scholarship men and women established in the Christian faith and fortified by comprehensive knowledge and understanding of the religions of the world.

Never has such an opportunity offered itself. Shall not Protestantism and Patriotism of the land unite to carry on to assured success this center of loyalty and of light?

Especially to Christian womanhood, who can feel the significance of the situation and her high duty before God, this appeal comes as again the voice of the angel of the annunciation, proclaiming a new advent to the world. Let American womanhood respond: "Behold the handmaid of the Lord!"

The undersigned will cheerfully respond to inquiries, and solicits correspondence relative to Benefactions, Endowments, or the forming of Guilds in the interest of the College of Comparative Religion of The American University.

Very sincerely yours,

Mrs. M. E. HARTSOCK,

Pres't of Woman's Guild of The American University,

1119 F Street N. W., Washington, D. C.

Rev. John A. Gutteridge, D.D., has become the financial agent of The American University. For twenty-four years he has been a prominent member of the Newark Conference of The Methodist Episcopal Church. He was for four years corresponding secretary of the Centenary Fund and Preachers' Aid Society of the Newark Conference, during which time he raised nearly \$50,000 for the veteran ministers of the Conference. For the past three years he has been financial secretary of the Syracuse University, in which field he achieved great success.

Dr. Gutteridge has a wide acquaintance throughout the entire country. His faith in the success of The American University is deeply grounded. He is in the prime of life, and with his knowledge of men, coupled with his indomitable industry, he is certain to be a valuable addition to the staff of University helpers.

THE UNIVERSITY COURIER.

Devoted to the interests of The American University
and Higher Education.

PUBLISHED QUARTERLY.

Subscription Price 25 cents per year.

Entered at the Post Office at Washington, D. C., as second-class mail matter.

Address all communications to UNIVERSITY SECRETARY,
1419 F Street N. W., Washington, D. C.

The American University Courier is sent to subscribers to the University Funds. Many others have copies furnished them because of special request. Others desiring the paper will please write the Courier, Glover Building, Washington, D. C.

Any one desiring to contribute to the funds of The University may send directly to The American University, Glover Building, Washington, D. C.

Editorial Notes.

HON. W. L. Woodcock and Mr. L. T. Yoder have been constituted Founders in the Epworth College of Literature by the subscription of \$1,000 each.

THE TRUSTEES OF The American University hold their semi-annual meeting at the University offices in Washington, at 10 A. M., Tuesday, December 11th.

THERE IS SOON to come into the possession of The American University \$15,000 from the Willard Ives' Estate, left for the use of the Ives' Seminary, at Antwerp, New York, during its continuance as a school.

RECENTLY A splendid gift of \$25,000 was made to The American University for the Illinois College of Languages; an additional \$100,000 is also assured. This building will certainly be commenced in the near future.

WE SEEK to make the COURIER self-sustaining, without crowding its columns with advertisements. The subscription price is twenty-five cents a year. Let us have your subscription, that the policy of the paper may be maintained.

ENTHUSIASTIC AND successful meetings in the interests of the University have been held recently by the Secretary, Dr. W. L. Davidson, at London, New Philadelphia, Akron, and Ironton, all in Ohio. The people listen gladly to the story of the rise and growth of the University, and are most generous in their contributions. Many other meetings have been arranged for in Ohio and Pennsylvania during the winter.

MANY GENEROUS subscriptions, which have been made to the State buildings in annual payments, fall due January 1st; some July 1st. Many of them have been promptly paid. Some of our friends are a trifle neglectful, and our work is thus hindered. Please look the matter up and be prompt in your payments. Notices are sent to all subscribers. Better not put it aside for another day; you are apt to forget it.

ANNUITIES ARE frequently left to The American University by those who can hardly afford to part with their money while living, and yet who have a desire to help the University. A liberal rate of interest can be paid. This method of investment brings a fair and certain income to those well advanced in years; it lessens the possibility of litigation, and puts money where it will do great good for God and humanity for many years to come. Some was received in this way during the past year.

MANY CHAPTERS in New Jersey Conference are taking an active interest in the Epworth Foundation, and are organizing for a thorough canvass. Where the project has been presented pastors and league officers have promised co-operation with the University authorities. The winter months will show handsome results, while the young people will be broader-minded men and women because of the widening of their horizon gained by the presentation of facts leading to the founding of the University and the growth of the great and far-reaching enterprise.

MANY OF THE Annual Conferences have during the year passed fine resolutions endorsing the work of The American University, and caused the same to be spread upon their journals. This is recognition which the hard-working projectors richly deserve.

Lingering prejudice is being dissipated, and everywhere ministers and laymen are coming to understand that The American University will be the crown to our educational system. The character of its high work along post-graduate lines exclusively constitutes it a unique institution in our Methodism, and leaves neither room nor reason for jealousy.

THE COURIER has no politics to which it feels justified in giving public expression. We shall certainly be pardoned, however, for expressing gratification that one of our honored and valued trustees, President William McKinley, has been re-elected for a second term. He is one of the few Presidents who have taken an active interest in higher education. We shall perpetuate his name and work in the Nation's Capital by the endowment of the McKinley Foundation in connection with the Ohio College of Government. It will be accomplished in the next two years by his loyal friends, who are vying with each other to do him this honor.

THE GENERAL CONFERENCE of the Methodist Church, at its recent session, approved the Trustees of The American University and made no change whatever in its former action concerning this institution. The University and its work were freely and fully discussed by some of the committees. Bits of personal gossip occasionally found their way into the public press, which were in some instances construed as the official action of the General Conference. The University had many loyal friends on the floor of the Conference, ever alert to champion its best interests. There has never been any disposition on the part of the Board of Trustees to violate the compact between the General Conference and the University. There is a settled conviction that it would be unwise to open work in the University until five million dollars have been secured for buildings and endowments above the purchase price of the property. More than half that amount is now in sight. When work is opened there must be sufficient productive endowment to meet promptly the salaries of all professors employed, without special appeal to the churches in this behalf. The necessity, however, is apparent for the speedy opening of the University. Already more than fifteen hundred applications are on file in the office from

students in all parts of the world desiring post graduate work in this University. And if the work were actually commenced, subscriptions could be more readily procured to complete this great enterprise as originally projected. If our loyal friends will just now put forth their best efforts, long before the quadremium is ended, the demands of the General Conference will have been met and work will actually have been commenced.

Something Being Done.

"Washington is rapidly becoming the center of Catholicism in America," says William E. Curtiss. "The apostolic legation is located here. In addition to the ancient Jesuit university, which was established at Georgetown during colonial days, we have now what is known as the Catholic University of America, a more extensive and wealthy institution, whose faculty represents the liberal element in the Church. A year ago an enormous monastery of the Order of St. Francis was occupied by several hundred monks and is now the headquarters of the greatest foreign missionary agency of the Catholic Church—the Franciscan Brotherhood. All their missionary work for the continents of America, Asia, and Africa is directed from here. The monastery, one of the most imposing ecclesiastical edifices in this nation and which cost over \$100,000, is situated a mile or two beyond the Catholic University, near the Soldiers' Home. There is a good deal of mystery about the institution, which gives it additional interest. The monks are seldom seen, except when they come or go through the little village of Brookland, which is their railway station."

Six great buildings of the University are now completed, and work is being pushed with vigor. More than one million dollars have been secured during the year. Archbishop Keene, by appointment of the Pope, at the request of the Catholic clergy of America, has toured the country and has had a large share in gathering this money. Each new year witnesses wonderful gains. Is Protestantism asleep? Is she contented to allow the rich educational advantages of our Capital to be used almost exclusively by the Roman Catholic Church? Answer the question by a gift, that the faith of our Fathers may be preserved.

The Epworth League and the American University.

REV. ALBERT OSBORN, B. D.

In August, 1891, Bishop Hurst wrote and published his appeal to the Protestant public in general, and to the Methodist public in particular, for \$10,000,000 to build and endow The American University. In this undertaking he asks the Epworth League to take a part, and to have as its aim the raising of an Epworth Fund of not less than \$500,000 with which to build an Epworth College and endow an Epworth Professorship and Epworth Scholarships.

To this appeal have come many responses in the sympathetic words of individuals, the approving action of various bodies of Methodism, and the beginning of contributions; and from the Epworth League the response has been in its full proportion of sympathetic endorsement and gifts. Here and there, however, have appeared in various forms indications that by some who are friends both to the League and to the University it is questioned whether the League as such should enter into this work; and it is to help in putting this question in its proper light that these lines are written.

The wisdom or unwisdom of this great work set before the League depends upon the proper answer to one fundamental question—namely: In the new and unique enterprise projected by the Methodist Episcopal Church in the creation of The American University, should there be special recognition of the part which the young people of the Church take in accomplishing the end in view, or should their part, as in other benevolent and educational work of the Church, be simply and wholly merged in the general movement?

This question resolves itself into two parts: First, which will conduce most largely to the success of the Epworth League as an organization, to have its part in this colossal effort designated as its own, or to have its work simply to be an undiscernible part of the great achievement; and, second, which method of procedure will best serve the success and completion of the gigantic enterprise itself? We direct our attention at present solely to the first of these two questions.

It seems to us that the larger results of benefit to the League will be received by the recognition of the

young people and their effort in a separate fund and in an Epworth College. We name some reasons. To the League it will act as a perpetual stimulus to the best intellectual culture and give to it both an immediate and permanent source of inspiration for the highest spiritual attainments. A spirituality that ignores or omits in its purview the ethical element of an honest and conscientious effort to secure the highest and best instruments and results in the search for truth is a misnomer, and is to be rejected as defective, if not spurious. The ideals of Christian character set before the Epworth League are, as they should be, incentives to mental improvement as a life-long duty and delight.

The Epworth College will be a visible and national monument to the devotion of the League to the highest and best interests of the race, while the Epworth Professorship and the Epworth Scholarships will form through the centuries strong, practical and living bonds of union between the beautiful and vigorous life of the old Epworth home of the Wesleys and the unfolding powers of our American youth.

Such a distinct and signal identification of the League with the establishment and endowment of the University will furnish in large measure just such a lofty and abiding *esprit de corps* as will be found to be an indispensable element for the surest progress and success.

Like all other appeals for benevolence, this one should be kept upon the voluntary basis, and the work of collecting should be carried on in the spirit of sympathy and helpfulness toward any and every other good cause. The American University is the friend and ally of every other good cause, both within and without the Church, and its welcome to the educated youth of America in the years to come will be no warmer and no more genuine than is its good will for the well-being and success of the Epworth League in the present appeal for co-operation. No desire nor purpose exists to put upon our Epworthians the double duty of contributing both as members of the church and as members of the League, but simply that in the general gathering of funds and in their expenditure there be a distinct and helpful recognition of the efforts and needs of our young people.

On the broad and important subject of whether the League should as such enter into all or many of the general and local efforts to raise funds for reli-

gious purposes there can be but one opinion: it should neither be asked nor expected. For this would to a large extent mean a divided, and hence a weakened, church. But upon this particular proposition, so fitting in all its aspects, whether viewed as to its effects upon the League itself, upon the University, upon the Church at large or upon the cause of Christian education, we have no hesitation in affirming it to be good, and only good.

Worthy of Imitation.

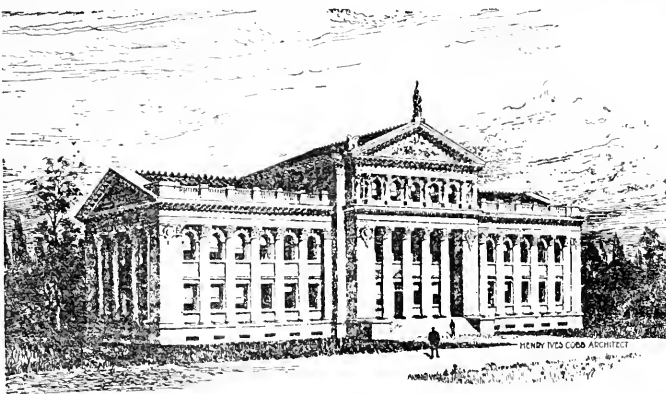

The Washington District Epworth League of the Baltimore Conference has set an example which is worthy of imitation in every presiding elder's district in Methodism. At their Annual Convention,

held recently in the city of Washington, the matter of the Epworth College of Literature of The American University was fully presented. Great enthusiasm was awakened. A few days later the Board of Control decided to make this the one object towards which the members of

the League should give their thought and prayers and generosity during the coming fall and winter. The members of the Board of Control present on that occasion personally pledged \$120. Since then various meetings have been held, committees have been appointed, and in companies of two, as the Apostles once went about their work, selected young people are to personally visit every League in the District to present the cause of The Epworth College of Literature. The battle cry is to be, "At least a dollar from every Epworth Leaguer." The membership in the District is three thousand. The machinery of the campaign has been so carefully adjusted, and the young people have gone into it with such enthusiasm, that success is certain to come. It was a noble thing for the young people to undertake at the home of the University. The influence of such a movement will be wide reaching

and contagious. If the Epworth Leaguers of every district in Methodism would for just a few months devote themselves with the same zeal and carefulness of preparation to this work, the new building could be erected next year. Let this good example be followed everywhere. One strong, steady pull in these closing hours of the dying century will make possible the erection of this splendid memorial to the loyal Epworthians of Methodism in the first year of the new century. The literature needed to effectually push the canvass will be gladly supplied on application to the office of the University, No. 1419 F street N. W., Washington, D. C.

New College Dedicated.

EPWORTH COLLEGE OF LITERATURE.
THE AMERICAN UNIVERSITY,
WASHINGTON, D. C.

On Nov. 23, with great pomp and ceremony, Trinity College for women, under the control of the Roman Catholic Ch'eh, was dedicated at Washington, D.C. Hundreds of Church dignitaries from all parts of the United States and Europe were present. The eyes of the whole Catholic world were turned toward

the occasion, and every heart was responsive to the high import of the hour. Magnificent music rolled through the high arches. Famous pictures, brought from the Old World at fabulous prices, constitute a part of the endowment of the new building. Chants were sung, incense burned, and the Cardinal sprinkled the walls with holy water dedicating the structure to the high purpose for which it was erected. Our Catholic friends with an eye on the future are massing all their high educational efforts in the National Capital. They are a unit; there is not a murmur of discontent or dissatisfaction. They bring things to pass in an amazing way. Lethargic Protestantism, riven by unreasonable jealousies, never moving in solid phalanx towards any great purpose, may awake some day soon to the fact that the ground has been fully preempted and the city taken.

The Young People and The University.

The presentation of this undertaking to our young people is manifold in good results.

It broadens their horizon, giving views of denominational achievement of which they did not know; of national and Protestant needs, of which they can hardly otherwise learn; of world-wide educational facilities—their adaptations and lack of adaptation to our necessities as American Christians, of which none know who have not studied these matters or heard of them through patriotic Christian scholars.

It deepens love toward God, whose kingdom on earth the University is to strengthen.

It incites to patriotism, for the University is founded to perpetuate our Nation, whose capital city it is in; whose embodiment is before the students—visible in all the noble buildings and institutions which are its habitat; and in the distinguished persons who form the executive, legislative, judicial, and other departments of the Government.

It creates desire for higher education, and stimulates endeavor to acquire it. Those who cannot have these higher advantages become friends of education, and do what they can to make it possible for others to secure it.

Participation in this work, by active co-operation and by gifts of money, identifies our young people with a great enterprise, worthy of their best efforts—because wholly beneficent in its designs, far-reaching in scope, and permanent as the nation itself. They became associated with those who are working unselfishly upon broad foundations for those who will follow them.

This widening view and this interest in large and prospective concerns tends to greater interest in and devotion to local affairs, and gives us men and women better equipped for life—whether within narrow limits or in larger spheres. No other interest will suffer because this is chosen. Many will be enriched and strengthened because this has been taken up.

For every reason, it is well that our youth should hear about, and become affiliated with, The American University.

Should this issue of THE COURIER fall into the hands of one not now an officer in the Epworth League, after reading it kindly hand it to your successor in office.

A Thing of Beauty.

The *Epworth Herald* says:

“A thing of beauty,” is the universal expression of those who have seen the new Epworth League certificate of award prepared by The American University to be given to the contributors to the Epworth foundation. The certificate is one of the finest specimens of illuminated lettering that it has fallen to our lot to see. The delicate and effective combination of colors and the ornate, yet strong, lines in which the whole design has been wrought unite to produce a unique effect. Each letter forms a study and possesses a charm that cannot be described in cold type. Sight alone furnishes the medium proper for the full impression of the singular beauty of this document. The whole is surmounted by a fine engraving of the College of Literature, presenting the front elevation of a building about 200 feet long by 90 in breadth. The structure is to be made of marble, a companion to the College of History, which is already completed. The architecture will be the classic, with a combination of Doric simplicity and strength, enriched by Corinthian ornamentation.”

Forward \$1.00, giving the Chapter number of your League, and the certificate, handsomely engrossed, will be forwarded the next day. Address 1419 F street, Washington, D. C.

Gifts to The Epworth College of Literature.

The following amounts have been received by the treasurer, Washington, D. C., up to date:
